Q. How long did your superintendency of the construction department continue?—A. Until the work was completed.

Q. When was it completed under your charge?—A. In May, 1869.

Q. Did you separate from the company at that time?—A. Yes, sir.

Q. Have you had any relations with the Central Pacific since?—A. I do not think so, no further than to build some branch lines. I have not been in the employ of the Central Pacific since.

PAID BY CONTRACT AND FINANCE COMPANY AND CROCKER & CO.

Q. During the years from 1864 to 1869, inclusive, from the beginning to the end of your connection with the Central Pacific, were you on a salary?—A. Yes, sir.

Q. Were you paid by the Central Pacific?—A. I was not. I think that I was paid by the Contract and Finance Company and by C. Crocker & Co.

Q. What was your salary during that time?—A. The largest salary that I got, I think, was $250 a month.

Q. Did that continue through the whole period?—A. No, sir; I do not think that when I commenced on the work I received so much, but I got up to that enormous salary before the work was completed.

Q. We want all the information that you have, from memoranda or from memory, in regard to the construction of the Central Pacific up to the time of your separation from the Contract and Finance Company or from the Central Pacific from 1869, and any information that you may have with reference to the construction of branch lines for the Central Pacific subsequent to 1869, or the construction of lines that were afterwards consolidated into the Central Pacific. Will you give us this information?—A. I had not expected to come before the Commission at all, and I have not thought of those matters. It would be better, perhaps, if it will suit as well, to wait until to-morrow, as there are many things that I cannot bring to mind to-day.

PRICES OF RAILWAY MATERIAL.

Commissioner LITTLER. While you are thinking over matters I wish that you would furnish the Commission with a list of the prices of railway material—material which entered into the construction of every part of the railway.

The WITNESS. Do you mean at the time the road was built?

Commissioner LITTLER. Yes.

The WITNESS. Or do you mean at the present time?

Commissioner LITTLER. During the time that you were connected with these roads.

Mr. COHEN. You mean from Sacramento to Promontory?

Commissioner LITTLER. Particularly, but we mean the Central Pacific generally, and we mean to inquire as to the cost of the material which entered into the construction of these branch roads with which the witness was connected, the object being to ascertain, independently of the books, what these cost, in order to get somewhere near the cost of construction of these roads.

Mr. BERGIN. He can also give information as to the rate of wages paid employés.

Commissioner LITTLER. That is included in the cost of construction.

DUTIES AS SUPERINTENDENT.

By the CHAIRMAN:

Q. Have you any papers, books, or accounts?—A. No, sir; nothing.

Q. Did you keep any at the time?—A. No, sir. Everything was kept in the office. I was on the work.

Q. What were your duties as superintendent from 1864 to 1869?—A. They were largely to see that the men earned their money.

Q. What am I to understand by your answer?—A. To see that the men on the construction did full work and earned their money.

Mr. COHEN. To see that each man did a day's work.

The WITNESS. To see that every man earned his money on the work, during construction. I was personally in charge of that work all the time, every day, nearly the whole time.

Q. How much of the work did you cover in your superintendence?—A. All the grading, track-laying, &c.

By Commissioner LITTLER:

Q. Did you buy any of the materials for this construction, for the company?—A. I do not think I did.

SUBCONTRACTORS.

By the CHAIRMAN:

Q. Did the subcontractors report to you?—A. Yes, sir; there was some work that was "subbed" out.

Q. Did they make reports to you in writing from time to time?—A. No, sir; they did not, as I was on the work every day and saw it. I saw every part of it nearly every day.

Q. What did they give to you in writing?—A. An obligation to complete the work.

Q. Were the conditions in the obligation fully set out?—A. Yes, sir.

Q. What did you do with the contracts given to you at that time?—A. I delivered them to the office.

Q. What office?—A. The office of the Contract and Finance Company. Everything went to the office.

MONTHLY REPORT TO MR. CROCKER.

Q. To whom did you report?—A. To Mr. Crocker.

Q. How often did you report?—A. Every month.

Q. How did you report, in writing or verbally?—A. In writing. Everything, all expenses, went in, in a pay-roll.

Q. Where were the reports filed?—A. I do not know. They went to the office and that is all I know about them.

Q. Were they left with Mr. Crocker as an officer of the Contract and Finance Company?—A. He was the man that I reported to. The reports went to the secretary of the Contract and Finance Company.

Q. Did you retain a copy of any of your reports?—A. Nothing. Everything, every month, was sent right into the general office.

Q. Did you make any memorandum from which you made up your report for the month?—A. No. No memorandum was made up to keep, as I recollect.

WHAT IT CONTAINED.

Q. What would you report in a month?—A. I would report the time and the labor performed, and make a general statement of the expenses of the month, and of the extension of the road.

Q. If you made a report of time and labor, would you not have the entry somewhere on an account which you kept for yourself?—A. No.

Q. How did you make it up?—A. From the time books.

Q. Who kept the time books?—A. We had several hundred foremen, and each man kept a book, for his gang of men and laborers.

Q. Were they handed to you at the end of the month?—A. Yes, sir; I took the books and checked them, and then went on with the work again.

Q. On to what did you check them?—A. The pay-roll.

Q. Did you file the pay-roll with a copy of your report to Mr. Crocker?—A. Yes, sir.

Q. Did you keep any book of any kind whatever?—A. No, sir.

By Commissioner LITTLER:

Q. Was the pay-roll your report?—A. That was the report. Everything was turned over to the office at the end of every month.

PRICE OF LABOR.

By the CHAIRMAN:

Q. How familiar were you, at the time of your connection with the Contract and Finance Company, with the cost of material and the cost of the construction of the road as it proceeded from time to time?—A. I had a pretty general idea of everything connected with the construction at the time.

Q. What was paid for labor at the time?—A. For Chinamen, we paid $35 a month.

By Mr. COHEN:

Q. Of what time are you now speaking?—A. The time we were building across the mountains, building the Central Pacific. I suppose that is what the Commission is inquiring about.

Commissioner LITTLER. Yes, the Central Pacific.

The CHAIRMAN. I wish that you would commence at the beginning, or wherever they were constructing the road at the time of your first connection with it, and then go through with the cost of labor as the road proceeded from year to year.

By Commissioner LITTLER:

Q. The beginning must have been with Crocker & Co., must it not?—A. Yes, sir. I do not recollect the dates as well as I should like to in order to make a statement of that kind.

Q. If you can produce to-morrow morning a memorandum of the cost which entered into the construction of these roads; first, labor, and second, material, giving the prices of the several kinds of material which entered into the construction of the road, that would substantially cover the ground. Can you do that?—A. I think so; certainly more intelligently than I can to-day.

Q. You have at your command the facilities for obtaining this information which you do not have this morning, have you?—A. I certainly could recollect more about it, thinking of it for a few hours, and then I can ascertain the dates that I commenced, and the dates that we reached certain points, &c.

COMMENCING AT SACRAMENTO.

By the CHAIRMAN:

Q. What point of the road did you commence with in 1864?—A. The first work that I did was in Sacramento. I did some work grading in Sacramento.

By Mr. BERGIN:

Q. Do you mean Sacramento City?—A. Yes, sir; and then I took general charge of the construction, 32 miles out. I cannot remember the name of the place.

By the CHAIRMAN:

Q. Do you recall it by the number of the section?—A. I think No. 33 was the section that I took hold of there, as I recollect it. I think it was at New Castle.

WORK PROSECUTED TO PROMONTORY POINT.

Q. How long did you work on the section which you call No. 33?—A. We took up the work in a general way from there and prosecuted it to Promontory.

Q. To what section was that?—A. That is nearly twenty years ago, and I have forgotten.

Q. When did you reach Promontory Point?—A. The last rail was laid on the 10th day of May, 1869.

Q. So that your work was limited from section 33 to Promontory Point?—A. Yes, sir.

Q. And from 1864 to 1869?—A. Yes, sir.

PRICES PAID FOR LABOR.

Q. Can you recall, as you progressed from year to year, the prices that you paid for labor?—A. I think so, by recollecting where we got to in certain years.

Q. What did you pay for labor at the commencement on section 33 in 1864?—A. As I recollect it now, we paid white men $35 a month and Chinamen $30.

Q. What force did you have of Chinamen during the year 1864?—A. I do not think that we had any Chinamen in 1864. I think that the work that we did in 1864 was what was done in Sacramento City. As I recollect it, it was 1865 that we commenced at Newcastle. We commenced with a small force there, and increased to nearly 14,000 men.

NUMBER OF CHINAMEN EMPLOYED IN 1866 AND 1867.

Q. What did your force of Chinamen average from New Castle, section 33, during the four years that you were building to Promontory Point?—A. I do not recollect now. During the years 1866 and 1867, and along there, we had a very large force. After we got out of the mountains and on to the plains our force was considerably lighter. As I recollect it now, we had in 1866 and 1867 about 13,000 or 14,000 men.

Q. That is, Chinamen?—A. Something about 11,000 Chinamen and the balance white men.

Q. During 1866 and 1887 you had about 11,000 Chinamen?—A. Yes, sir.

By Mr. COHEN:

Q. How many white men did you have?

The CHAIRMAN. We will take up the question of white men afterwards. Let us first get through with the Chinamen.

Mr. COHEN. I would like to know how many white men were employed.

The WITNESS. There were 11,000 Chinamen and the balance were white men.

NUMBER OF CHINAMEN IN 1868 AND 1869.

By the CHAIRMAN:

Q. How many Chinamen had you in 1868?

Mr. COHEN. I would like to know if it is one of the elements of the indictment against us that we employed Chinamen?

The CHAIRMAN. No. We simply want to get at the cost of labor.

Mr. COHEN. Then there is no political question in that information?

The CHAIRMAN. I hope not.

The WITNESS. In 1868 I think we had about 5,000, as I now recollect it.

Q. How many had you in 1869?—A. We had that same force, pretty much, in 1869.

Q. About 5,000; so that during the years 1865, 1866, 1867, 1868, and 1869 you had an average of about 8,000 Chinamen. Is that correct?—A. I think that we averaged more than that.

Q. How many more?—A. I cannot tell. I will have to have a little time to think of that, and of those different years, in order to state about the number that there was in any certain year.

The CHAIRMAN. Very well; you can give the figures to-morrow.

NUMBER OF WHITE MEN EMPLOYED NOT REMEMBERED.

Q. As to the white men, how many did you employ in 1864?—A. The work in Sacramento City was let. I do not know how many men were employed. We had but a few hundred men at that time. The work afterwards was contracted from the limits of Sacramento City to section 33, but with that I did not have anything to do.

Q. How many white men did you employ in 1865?—A. I cannot tell. As I said, we started there with a small force and increased it rapidly until we increased it to a very large force. I cannot now tell the number. I can tell generally by thinking it over and seeing where we were from time to time. As I said before, by thinking where we were at certain dates I can give a better idea.

Q. How did the employment of white men compare in number with the employment of Chinamen?—A. I had a great many more Chinamen than white men.

Q. Will you give us in your statement the number of Chinese laborers employed in 1864, 1865, 1866, 1867, 1868, and 1869 during the time you were connected with the road, and also a statement showing the number of white men employed, as you recall it?—A. I will.

TIES WERE CONTRACTED FOR BY CROCKER.

Q. What did you pay for ties in 1864?—A. I do not recollect.

Q. What did you pay for ties in 1865?—A. I cannot tell that either.

Q. In 1866?—A. I do not recollect. Ties were generally contracted for by somebody else—Mr. Crocker, probably.

By Commissioner LITTLER:

Q. You can get all this information by to-morrow, can you?—A. I will make an effort. If I can, I will do so.

By the CHAIRMAN:

Q. Will you also give a statement of the cost of ties delivered to your company during your connection with it?—A. I will make what inquiries I can, and ascertain what they were. That material was generally contracted for by some other party than myself.

REDWOOD TIMBER USED FOR TIES.

Q. Where did you get your ties before you got to the mountain district; what timber did you use?—A. Redwood timber up the coast. It was brought by way of San Francisco, and taken up the Sacramento River in schooners.

Q. When did you stop using the redwood timber?—A. I cannot state that. I think that I can tell you to-morrow.

Q. Will you furnish a statement of the cost of ties for each year, as you recall it; also how long you used redwood timber, and when you commenced to use mountain timber, and the difference in the cost, if any? Can you do that?—A. I will ascertain what I can do for you.

By Commissioner LITTLER:

Q. Also the cost of all lumber which went into the road and the cost of stone, brick, cement, and lime, and any other material which you can think of. Can you furnish that?—A. I will try. Those things were generally contracted for by other parties than myself. My business principally was to do the work.

COST OF GRADING IN 1864.

By the CHAIRMAN:

Q. What was the cost of grading during the year 1864?—A. I do not know.

Q. Do you recall the cost of grading in any year?—A. No; I do not think so.

Q. Did you ever hear it spoken of?—A. Yes; I think so.

Q. What do you recall in connection with the grading, as to the price?—A. The price that the Contract and Finance Campany had—is that what you mean?

The CHAIRMAN. Whatever price you recall.

The WITNESS. The price, as I recollect now, for earthwork during mountain work was, I think, 45 cents a yard.

By Commissioner LITTLER:

Q. Is that for stone work or for earth work?—A. It was for earth work. There were several classifications. There would be earth work, and there would be cement, and then there would be usually at least two prices for rock.

Q. Will you furnish the Commission a statement of the prices during the several years, and during the progress of the work, as it varied in different classes?—A. I will endeavor to do so.

Commissioner LITTLER. We would like the prices that you can recall, the prices of the Contract and Finance Company, and also the prices of the subcontractors.

The WITNESS. There was none of that work subcontracted.

PRICE OF RAILS.

Q. What was the price of rails?—A. That I cannot tell you now; it was very high.

Q. Do you recall any price in connection with rails?—A. As I recollect it, we paid as high as $130 a ton for iron.

Q. In what year?—A. I think that was 1866 and 1867. I am not familiar with that, however, but know in a general way that that was the price at that time. That is all. Of course, I did not have anything to do with that. I did not buy it or ship it, or anything of the sort.

Mr. COHEN. We will arrange to furnish that from the books of the Central Pacific Railroad Company. Mr. Miller is making a statement which I propose to put in, on cross-examination. It is all taken from the books and vouchers from year to year, and will show just what the cost was.

The CHAIRMAN. We want also, if it can be given, what the Contract and Finance Company paid for rails, and what they charged the Central Pacific.

Mr. COHEN. We will give you the cost of rails. One of the witnesses said that rails were bought by the Central Pacific and charged up to the Contract and Finance Company at cost. We will give the cost of the rails in New York, with freight and charges added, so that you can see just what they did cost.

By the CHAIRMAN:

Q. In the report which you are going to give us, you are to give us some information concerning grading, ties, rails, and labor. What else do you recall now as entering into the construction of the road?—A. There would be the forage, groceries, &c.

Mr. COHEN. And whisky.

The WITNESS. Every man had to buy his own whisky.

WHAT GOES TO MAKE UP A RAILROAD.

Q. What else goes into the construction of a railroad?—A. That covers pretty much everything. You have the track, the grading, the masonry, the timber work, and the labor, and all that sort of thing, that go to make up a railroad. I do not think of anything else connected with it.

Q. Do you not think of anything else at all connected with construction?—A. Except the difficulties in the way of construction, I do not know anything else.

Q. Will you furnish a statement of the cost of the work of the Central Pacific complete, in classifications; during your connection with it from 1864 to 1869?—A. I do not think that it would be possible for me to do that.

Q. Will you furnish to the Commission a statement, so far as you can recall these things?—A. Yes, sir; the statement made will be the price that we got for doing the work, as near as may be. What the actual cost was per yard to do that work, it is impossible for me to say. I did not keep account of it. I presume that they kept it in the office, but what they kept in the office I know nothing of. As I have said before, my duties were principally to prosecute the work.

SUBCONTRACTORS CONNECTED WITH THE WORK.

Q. Do you recall the names of some of the subcontractors for the year 1864?—A. Yes, sir; there was a man by the name of McWilliams on some masonry, and one by the name of Quinn.

Q. Where is McWilliams now?—A. I cannot tell.

Q. Does he live in San Francisco?—A. I do not think so. There were several brothers of them, and I saw one of them in this city about six months ago.

Q. Where does Quinn live?—A. Quinn is dead.

Q. What other subcontractors do you recall?—A. There was a man by the name of Pennie. These are the only ones that I can recall at this moment.

Q. Where does Pennie live?—A. I do not know. I am inclined to think that he is dead. He went to South America from here.

Q. Is he in San Francisco?

Commissioner LITTLER. Not if he is dead.

The CHAIRMAN. He has not said that he was dead.

The WITNESS. I do not know that he is dead. I have never seen him since he went to South America.

Q. You do not know whether he is living or dead?—A. No, I do not; there were several brothers of them, but it is many years ago since I saw them and they are now scattered.

Q. What other subcontractors do you recall?—A. I do not recall any at this moment. I do not think of any now. Those were masonry men. Pretty much all the work that we did ourselves we did by day's work.

By Commissioner LITTLER:

Q. Did the company board these men which you had in your employ at the prices that you mentioned or did they not?—A. We boarded the white men. The Chinamen boarded themselves.

SUBCONTRACTORS PAID IN CASH.

Q. Have you any knowledge as to the method or payment to the subcontractors by the Contract and Finance Company?—A. We paid them cash—gold coin, if that is what you mean.

Q. Did you make the payments?—A. No, sir; the payments, I think, were generally made in the office.

Q. Had the company a regular paymaster?—A. Yes, sir.

Q. Who was he?—A. Mr. Crocker paid for doing the work across the mountains, and Mr. Brown paid after we got into the State of Nevada.

Q. Do you live in San Francisco?—A. No; I live across the bay.

Q. At Oakland?—A. No; at Haywards.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Tuesday, August 9, 1887.

CHARLES F. CROCKER, being further examined, testified as follows:

The CHAIRMAN. Colonel Crocker, the Commission recalls you for the purpose of hearing your answer to the questions propounded to you on Saturday last, which the secretary will read.

WITNESS'S PREVIOUS TESTIMONY READ TO HIM.

The secretary read from the proceedings of Saturday, August 6, 1887, the following:

By the CHAIRMAN:

Q. I will call your attention to the stockholders' meeting in the year 1885, April 14, to a resolution reciting that Leland Stanford, C. P. Huntington, and Charles F. Crocker have made various payments of money in the interest of the company, for which they have given their individual receipts, and no vouchers have been received from the parties to whom the sums were paid; also reciting that the nature and amount thereof have been exhibited and fully made known and explained to the stockholders, wherefore it is resolved that the stockholders waive the filing of vouchers and authorize the delivery of releases. Do you recall the meeting at which this resolution was offered?—A. Yes, sir.

Q. What was the nature of the expenditures made by these gentlemen, from which they were thus released from the filing of vouchers or detailed statements?—A. They were general in their character.

Q. What do you mean by general in their character?—A. I mean expenses for various purposes.

Q. What various purposes? Please enumerate or state in detail as far as you can?—A. Anything and everything that they might consider advantageous to the company, and which required the expenditure of money.

Q. Is it not a singular fact that in the management of the finances of a great corporation any one should be released from the filing of vouchers, and from explaining the cause of the expenditure; would not that suggest something irregular in the proceedings?—A. No.

Q. What explanation was made at the time?—A. The explanation was made that the expenses were incurred for the benefit of the company, and that it was impossible to file full explanatory statements or documents.

Q. I call your attention to the statement of fact "that the nature and amount thereof have been exhibited and fully made known and explained to us," that is, the stockholders. Now, what explanation was made?

By Commissioner LITTLER:

Q. Was that a stockholders' meeting?—A. Yes.

Q. It was not a meeting of the board of directors, then?—A. No, sir; it was a stockholders' meeting.

Mr. COHEN. Mr. Chairman, is the amount stated there?

The CHAIRMAN. No. Colonel Crocker, I call your attention to the fact that the nature and amount of such expenditures, according to the resolution, were fully exhibited and made known and explained to the stockholders. Now what explanation was made?

The WITNESS. An explanation was made which was considered sufficient. It was explained that these expenses were incurred and that they were necessary for the company. The stockholders thought that was sufficient, or so far as I was concerned, I thought so.

Q. Who made the explanation?—A. The parties mentioned in the paper.

Q. Were all of the gentleman named, Messrs. Stanford, Huntington, and Crocker, present at the time that the explanation was made?—A. The books will show that; I believe that they were.

Mr. COHEN. That was a stockholders' meeting in 1885.

The WITNESS. The books will show who was present.

By the CHAIRMAN:

Q. Are you not the Charles F. Crocker referred to in this resolution?—A. Yes, sir.

Q. What explanation did you make?—A. I explained in that way just as the others, that these expenditures were necessary.

Q. Did you make the expenditures yourself?—A. No, sir; not directly.

Q. How did you make them?—A. Through attorneys and officers of the company.

Q. What attorneys and officers?—A. The attorneys that were in the service of the company.

Q. Did you make the payments of the money to the officers of the company?—A. In some cases.

Q. For what did you make the payments of money?—A. For services rendered.

Q. What kind of services?—General services; anything and everything.

Q. What kind of a voucher did you take that you did not give to the company?—A. I do not recollect that I took any.

Q. What explanation was given to you?

Mr. COHEN. I beg to say, Mr. Chairman——

The CHAIRMAN. Let him answer this question.

Mr. COHEN. I will ask the witness whether these services were rendered by the counsel employed by the company that made these payments?

The WITNESS. Yes, sir; they were.

Mr. COHEN. As at present advised, without further consultation with my associates, I advise you not to make any further answer to that question.

By the CHAIRMAN:

Q. What is your answer to my question, Colonel Crocker? I repeat it. What explanation was given to you?—A. Under advice of counsel I decline to answer that question.

DECLINES TO ANSWER FURTHER, UNDER ADVICE OF COUNSEL.

By the CHAIRMAN:

Q. Are you now prepared to answer?

Mr. COHEN. I will say that I feel compelled to repeat to Colonel Crocker, the advice that I gave him when he was examined before, as to that particular question.

Commissioner LITTLER. In order that there may be no misunderstanding as to the question, let it be here repeated to the witness:

Q. What explanation was given to you?

What is your answer, Colonel Crocker?

A. The advice that I receive from the counsel of the company is the same that it was on Saturday when I was obliged to decline to answer.

Examined and signed September fourth (4th), 1887.

CHAS. F. CROCKER.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Tuesday, August 9, 1887.

Afternoon session.

Mr. COHEN. I find on page 64 of the minute book of the Central Pacific Railroad Company, under date of December 26, 1862, the first contract made by that company with Charles Crocker & Company. I will read it for the information of the Commission, and as part of the evidence in the case.

FIRST PROPOSAL OF C. CROCKER & COMPANY.

SACRAMENTO, *December* 26, 1862.

To the PRESIDENT AND DIRECTORS
OF THE CENTRAL PACIFIC RAILROAD COMPANY:

GENTLEMEN: We hereby propose to do all the grading, masonry, and bridging, furnish ties, and lay the track upon your railroad from the foot of K street in the city of Sacramento to the line of the railroad of the California Central Railroad Company upon the line recently adopted by your board, the same to be done in accordance with the profiles, plans, and bills, timber, and iron, and in conformity with the specifications proposed by your chief engineer, T. D. Judah, esquire, all for the sum of $400,000, to be paid as follows:

$250,000 in cash, $100,000 in the bonds of the company recently issued and dated December 1, 1862, and $50,000 in the capital stock of the company, the same to be paid upon the estimates of the engineer of the company as the work progresses. We further propose to complete the grading, masonry, and bridging, and furnish the ties ready for the iron by the 15th day of August, 1863.

C. CROCKER & COMPANY.

ACCEPTED, AND CONTRACT ORDERED.

The minutes further state:

——which, after being discussed, was, on motion of Mark Hopkins, seconded by T. D. Judah, accepted, and thereupon it was—

Ordered, unanimously, that the president and secretary enter into a contract with said C. Crocker & Company in accordance with and upon the conditions of said proposal.

Now, as explanatory of that, I propose to read a letter from C. Crocker & Company to the directors of the Central Pacific, to be found on page 85 of the minutes, under date of September the 12th, 1863. The letter is as follows:

LETTER REQUESTING PAYMENT OF BILL FOR EXTRA WORK, AND PROPOSING TO ACCEPT STOCK AT 50 PER CENT.

To the PRESIDENT AND DIRECTORS
OF THE CENTRAL PACIFIC RAILROAD COMPANY OF CALIFORNIA:

GENTLEMEN: Having progressed with gradation, bridging, and masonry upon sections 1 to 18, under the contract entered into with your company last December, to

that extent as to render the entire completion of the work certain in time for the iron and rolling stock which has been delayed, I respectfully petition to your honorable body to audit and allow the accompanying bill of extra work performed under the contract at this time; and, also, in view of the fact, well known to yourselves, that the company is largely in arrears to me upon the cash due me under the contract, to wit, over $48,000, rendering it necessary for me to have some securities upon which I can raise money to carry on the work, I would further respectfully petition your honorable body to order the secretary to issue to me the one hundred bonds which I have now nearly earned under the contract. The cash value of the bonds you would thus advance to me over and above the amount now earned does not equal the amount of cash now due me from the company. Being well advised of the inability of the company to pay me the amount of the bill of extras at this time in cash, and my needs being very urgent for money to carry on the work, I propose to accept the bonds of the company at fifty cents on the dollar in payment thereof.

Hoping this petition will meet with your immediate and favorable consideration, I remain, most respectfully, yours,

C. CROCKER & COMPANY.

RESOLUTION ACCEPTING PROPOSITION AS TO STOCK.

As to this the minutes state:

SACRAMENTO, *September* 12, 1863.

On motion the proposition was accepted unanimously; the secretary was ordered to issue to said Crocker & Company the balance of the bonds under their contract of December 27, 1862; also to deliver to them fifty-one additional bonds in payment of the bill of extras presented.

That was the first contract made with Charles Crocker. As we find the others we will put them in.

Commissioner LITTLER. How many miles of road did that contract embrace?

Mr. COHEN. Eighteen miles.

Commissioner LITTLER. From Sacramento east, the first 18 miles?

Mr. COHEN. Yes; sections 1 to 18. That includes the American River bridge and all the approaches to that bridge, a very expensive construction.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Tuesday, August 9, 1887.

LLOYD TEVIS, being duly sworn and examined, testified as follows:

By the CHAIRMAN:

Question. What is your business?—Answer. I am a banker.

WELLS, FARGO & CO.

Q. Where do you reside?—A. I reside in this city.

Q. Are you connected with the firm of Wells, Fargo & Company?—A. Yes, sir; I am the president of that company. It is an incorporated company, and not a firm.

Q. How long have you been connected with it?—A. I have been connected with it since 1870.

Q. How long have you been president?—A. I have been president for fourteen or fifteen years.

Q. Who are the other general officers of that company?—A. The other general officer of the company is Mr. John J. Valentine, vice-president and assistant manager.

DIRECTORS OF WELLS, FARGO & CO.

Q. Who are your directors?—A. Leland Stanford, Charles Crocker, Lloyd Tevis, Charles F. Crocker, George E. Grey, Oliver Eldridge, William Norris, J. C. Folsom, and John J. Valentine.

Q. What officers of the Central Pacific have an interest in your company, other than those which you have named?—A. None that I know of.

Q. How long have Mr. Stanford, Mr. Charles Crocker, and Mr. Charles F. Crocker had an interest in your company?—A. Mr. Charles Crocker and Mr. Stanford have been interested in the company about 16 years; Charles F. Crocker, a number of years, a small interest, I cannot recall how much.

WELLS, FARGO & CO.'S CONTRACT WITH CENTRAL PACIFIC.

Q. What business relations has your company with the Central Pacific Company?—A. We have a contract for the carrying of our express over the road of the Central Pacific Railroad Company.

Q. When was that contract made?—A. The present contract was made, I think, in 1879.

Q. What are the conditions of the contract so far as the Central Pacific is concerned?—A. I should have to produce the contract. It is too long to state.

Q. Have you the contract with you?—A. I have not.

Q. Will you produce the contract?—A. I think I will. I will take it into consideration.

The CHAIRMAN. The Commission calls for the contract. I understand that that contract was dated in 1879?

The WITNESS. 1879.

A PRIOR CONTRACT DATED IN 1870.

Q. What prior contract had you with the Central Pacific Railroad Company?—A. We had a prior contract dated, I think, in 1870.

Q. What were the conditions of that contract?—A. I should have to refer you to the contract.

Q. Have you a copy of the contract?—A. I have.

Q. Will you produce that contract?—A. I think I will.

Q. How long has your company been carrying on the express business?—A. About 37 years.

Q. When did it commence the express business?—A. In 1850, I think.

BUSINESS CONDUCTED FORMERLY BY STAGES, WAGONS, AND INDIVIDUALS.

Q. I ask, as a matter of history in connection with the road, how the express business was conducted by your company prior to the organization of the Central Pacific Company?—A. It was conducted by means of stages, wagons, and individuals in transporting its freight from place to place.

Q. Were you connected personally with the company at that time?—A. I was not.

Q. Have you any knowledge of their business personally at that period?—A. I have none.

Q. What is your earliest recollection of its business?—A. My connection with the company began in 1869 or 1870.

Q. Was your company a competitor with the Central Pacific Company at any time in the express business?—A. Not at all.

PACIFIC EXPRESS COMPANY.

Q. What other company was organized as a competitor with the company of Wells, Fargo & Co.?—A. A company called the Pacific Express Company.

Q. When, if you know, was the Pacific Express Company organized?—A. In 1869, I think.

Q. Who were the gentlemen who composed the Pacific Express Company?—A. To the best of my recollection, D. O. Mills, Henry D. Bacon, Lloyd Tevis, Leland Stanford, Charles Crocker, Mark Hopkins. Those embrace about all of the company.

Q. Was the Pacific Express Company organized for the purpose of competing for the business that the corporation of Wells, Fargo & Co. had control of?—A. Yes, sir.

CONSOLIDATION OF PACIFIC EXPRESS WITH WELLS, FARGO & CO.

Q. How long did the Pacific Express Company continue as a competitor of Wells, Fargo & Co.?—A. The Pacific Express Company to which I refer never entered actively into business. It was organized, purchased its stationery, prepared to commence business, and then a negotiation took place, which I personally conducted with Mr. Mills and Mr. Bacon, which resulted in a consolidation with Wells, Fargo & Co., or rather in the retiring of the Pacific Express Company from the business, and an arrangement with Wells, Fargo & Co., by which that company conceded to the Pacific Express Company a certain amount of stock in consideration of a consolidation of interest.

Q. Were there written articles of consolidation between the Pacific Express Company and Wells, Fargo & Co.?—A. No written articles of consolidation. There was an agreement under which the arrangement was made, and prepared by myself, I think, at the time.

Q. Was that agreement in writing?—A. That agreement was in writing.

Q. Have you a copy of it?—A. I think not.

Q. Will you ascertain if you have a copy?—A. I will.

Q. Will you produce a copy?—A. I think I will, if I have it.

The CHAIRMAN. The Commission calls for it, if you have it.

GENTLEMEN WHO HAD CONTROLLING INTEREST.

Q. At the time of the consolidation of the Pacific Express Company with Wells, Fargo & Co., who were the gentlemen who had the controlling interest in Wells, Fargo & Co.?—A. Some of them were William G. Fargo, the two Berneys of New York City, and a great number of stockholders whom I personally did not know, all of whom resided in the East.

Q. Were any of the people interested in the Pacific Express Company that you have named, interested in Wells, Fargo & Co. at the same time?—A. None that I know of.

Q. Who brought about the arrangement between the two companies?—A. I was personally largely instrumental in bringing it about.

CHARACTER OF THE ADJUSTMENT.

Q. What was the character of the adjustment between the two companies, as you recall it?—A. An arrangement was made, which was re-

duced to writing and which would be fully explained by that instrument. I think that I had better refer to it than to state the terms of it. It is quite elaborate. If I should go on and state the terms of it according to my recollection that would all be rendered unnecessary if I could produce it.

The CHAIRMAN. Of course, if you have not got it we will take the next best evidence, and get it from your recollection.

The WITNESS. I can give it to you.

The CHAIRMAN. There are three agreements, I understand, the two agreements made by your company with the Central Pacific Railroad and the agreement of consolidation between the Pacific Express Company and Wells, Fargo & Co.

The WITNESS. Yes, sir; that is correct.

By Commissioner LITTLER:

Q. What was the capital stock of Wells, Fargo & Co. when it was first incorporated?—A. I do not know, sir.

Q. What was its capital stock at the time this Pacific Express Company consolidated with it?—A. My recollection is, it was $10,000,000.

Q. Was it part of the terms of that consolidation that the stock of Wells, Fargo & Co. should be increased?—A. I have forgotten.

Q. Do you remember how many shares of the capital stock of that company Messrs. Stanford, Crocker, and Hopkins received as a consideration for going out of the business?—A. I cannot recall the number of shares they received as stockholders of the Pacific Express Company.

PACIFIC EXPRESS FORMALLY ORGANIZED, BUT NEVER DID BUSINESS.

Q. I understand that you say that the Pacific Express Company was merely formally organized, but that it never did any business that you know of: That it bought its stationery, and at that particular point it consolidated with Wells, Fargo & Co.; is that so?—A. Yes, sir; substantially. We proceeded a little further than that; we established offices and got ready to commence business; and at that point we commenced negotiations which resulted in a settlement.

Q. How many shares of capital stock in Wells, Fargo & Co. did you issue to these gentlemen as a consideration for their retirement from business?—A. I can say this to you: my recollection is that the Pacific Express Company received one-third of the capital stock of Wells, Fargo & Co.

TERMS ON WHICH PACIFIC EXPRESS RETIRED.

Q. What did they pay for that?—A. It was distributed pro rata among its own stockholders, of which those gentlemen were a part.

Q. Do I understand you to state that they received one-third of the capital stock of Wells, Fargo & Co. as the consideration for their retirement from business, or did you pay anything for it in money?—A. We paid no money for it, but my answer to the question involves going into my recollection of an agreement which is very elaborate, and which I would respectfully suggest to you the production of the agreement will waive.

Q. Will that agreement show the consideration which Hopkins, Stanford, and Crocker contributed for their stock?—A. I think not.

Q. Then I want to have you state it.—A. If you will allow me to explain, I think that perhaps you will understand more clearly. Under that agreement, as I have stated, the Pacific Express Company received

one-third of the capital stock of Wells, Fargo & Co., and became to that extent interested in Wells, Fargo & Co., in consideration of which it retired from business on receiving that stock, and its officers, or the officers to be named by them, participated in the management of Wells, Fargo & Co. from that date forward. There were various other considerations, all of which are enumerated in this agreement, which I wrote myself, and which is quite elaborate.

SOME MONEY WAS PAID BY PACIFIC EXPRESS.

Q. Were there any money considerations? Did this Pacific Express Company pay into the treasury of Wells, Fargo & Co. any money?—A. Yes; it did pay into Wells, Fargo & Co. some money in order to pay its pro rata of a fund to be provided as a working cash fund for banking purposes. For instance, we established $500,000 as the capital of the bank itself.

Q. What bank?—A. The bank of Wells, Fargo & Co. It had never done a legitimate banking business. It was intended from the date of this arrangement that the banking business should be done, and the Pacific Express Company put up one-third of the cash capital which was required, which was $166,666.66. That was the only cash involved in the transaction.

Q. And that cash represented the sole financial consideration for one-third of the capital stock of Wells, Fargo & Co?—A. The financial consideration, yes.

THE ARRANGEMENT STATED IN FIGURES.

Q. Then it is true that these gentlemen of whom I have made mention received $3,333,333.33 of the capital stock of Wells, Fargo & Co., and gave as a consideration for it the surrender of the Pacific Express Company and $166,666.66 as their share of the capital stock of this $500,000 banking capital?—A. That is true, except that these gentlemen did not do that, but that the Pacific Express Company did, of which company I was one, holding as much interest as any of them did at the time.

Q. But that is true, excepting as you qualify it?—A. With other gentlemen who were associated with us.

Q. What was that stock worth at the time it was issued to you gentlemen?—A. To the best of my recollection it was worth about $15 per share.

WELLS, FARGO & CO. NOT THERETOFORE PROSPEROUS.

Q. What had been the history of Wells, Fargo & Co. in relation to paying dividends on its business prior to this consolidation?—A. It had not paid dividends for many years.

Q. Was it in a somewhat dilapidated condition when you gentlemen went into it?—A. Well, hardly dilapidated. That is too strong a word.

Q. It was not a prosperous concern?—A. It was not a prosperous concern before we went into it.

Q. What has been its history since you gentlemen went in?—A. It has been prosperous ever since.

Q. Has it paid dividends on its stock?—A. It has paid dividends regularly on its stock.

Q. From the time of the reorganization?—A. Yes, sir.

Q. What has been the dividends?—A. I think 8 per cent. per annum on its stock.

Q. That was a good investment, was it not?—A. A good investment; yes, sir.

Q. What were the terms upon which you were allowed to transport your freight over the Central Pacific, if you remember?—A. All that is stated in the agreement, and I think it will be better to wait until I see whether I can produce it.

Commissioner LITTLER: If you cannot produce it you will come back and give us your recollection of it?

The WITNESS. Yes, sir.

LLOYD TEVIS.

The Commission then adjourned to Wednesday, August 10, 1887, at 10 a. m.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Wednesday, August 10, 1887.

The Commission met pursuant to adjournment, all the Commissioners being present.

LLOYD TEVIS, being further examined, testified as follows:

By Commissioner ANDERSON:

Question. I understand you desire to make a statement. Will you do so now?—Answer. I desire to make a statement concerning the relations of Wells, Fargo & Co. with the Central Pacific Railroad Company, if there is no objection to that.

Commissioner ANDERSON. We will hear your statement now.

HOW THE PACIFIC EXPRESS COMPANY ORIGINATED.

The WITNESS. I can answer a little more clearly the questions asked me yesterday in regard to the Pacific Express Company, and Wells, Fargo & Co., and the Central Pacific Railroad Company. In 1869 I conceived the idea myself of organizing an express company over all of the territory west of the Missouri River, in competition with Wells, Fargo & Co., but before doing so I submitted the matter to Governor Stanford and associates, asking them to take an interest in that company. After considerable negotiation they consented to do so, together with D. O. Mills, Henry D. Bacon, and those gentlemen——

Commissioner LITTLER. I do not think this statement is important.

The WITNESS. It is exceedingly brief.

Commissioner LITTLER. It has nothing to do with the question before the Commission.

The WITNESS. I will answer your question.

The CHAIRMAN. You had better make a statement, and then we can examine you as to the statement.

Commissioner LITTLER. There is nothing in this case, except the interest which these gentlemen have in these express companies, and how they acquired it. We have already had that very fully.

Commissioner ANDERSON. You will find that the papers make it somewhat different from the statement made day before yesterday.

The CHAIRMAN. Mr. Tevis asks to clear up his former statement; and I see no objection to that.

Commissioner ANDERSON. Not if there is any muddle in his former statement, but I think his evidence was clear.

The WITNESS. I do not desire to make any statement.

The CHAIRMAN. You had better finish your statement.

The WITNESS. That company was organized, and those gentlemen were interested with me. The Pacific Express Company made a contract with the Central Pacific Railroad Company, precisely similar in terms to the contract subsequently made between the Central Pacific Railroad Company and Wells, Fargo & Co. On October 4, 1869, Wells, Fargo & Co. and the Pacific Express Company were consolidated under the agreement marked "Exhibit 1," of October 4, 1869, which I here hand you. This is a correct copy of that agreement.

The paper was marked "Exhibit 1, August 10, 1887," and is as follows:

AGREEMENT BETWEEN THE PACIFIC EXPRESS COMPANY AND WELLS, FARGO & COMPANY.

This agreement, made the 4th day of October, 1869, between the Pacific Express Company, represented by H. D. Bacon, D. O. Mills, and Lloyd Tevis, party of the first part, and Wells, Fargo & Company, represented by A. H. Barney, W. G. Fargo, and Charles Fargo, party of the second part, witnesseth:

Whereas Wells, Fargo & Company are now engaged in carrying on a general banking and express business in all the States and Territories of the United States south and west of the Missouri River, having offices in San Francisco and New York to facilitate their banking and foreign express and exchange business; and

Whereas the Pacific Express Company have recently organized in the State of California, have purchased property and are now ready to commence a similar business over all the territory occupied by Wells, Fargo & Company, and also have an advantageous contract with the Central Pacific Railroad Company of California for the transportation of freight and treasure over its road and all other railroads which said company shall hereafter own, operate, or control;

And whereas it is manifest that no money can be made and that large losses may be sustained by both of said companies, owing to the competition which must ensue, and in order to prevent this, and to promote largely the interests of both companies, it is deemed advisable to consolidate all their interests, and to unite their efforts and influence for the common good: Therefore it is agreed as follows:

The Pacific Express Company, for the considerations herein mentioned, shall not commence business for which it is prepared as aforesaid, but shall give its good-will and influence to said Wells, Fargo & Company. It shall also, upon the performance of the stipulations and agreements hereinafter stated to be carried out and performed by said Wells, Fargo & Company, procure to be executed and delivered by the Central Pacific Railroad Company a contract with said Wells, Fargo & Company, substantially on the terms and conditions set forth in the letter dated September 25th, 1869, signed by said Bacon, Mills, and Tevis, and Leland Stanford, a copy of which is hereunto annexed.

In consideration of which, Wells, Fargo & Company shall, as soon as practicable and within three months from this date, increase their capital stock from ten million dollars ($10,000,000) as at present, to fifteen million dollars ($15,000,000), and shall issue one-third thereof, to wit, five million dollars ($5,000,000), to the said Pacific Express Company or to such persons as it may designate, or at their option shall assign and deliver within said period of three months to said Pacific Express Company or to such persons as aforesaid the one-third of their present capital stock of ten million dollars ($10,000,000). They shall continue their business with all its existing property, money, assets, and facilities until on or about the 5th day of February, 1870, when their annual meeting and election takes place in the city of New York, at which time the principal office of the company and the place for the future meetings of its stockholders and directors shall be transferred to San Francisco, California, or not, at the option of the board of directors, and from the stockholders representing said one-third and residing in California there shall then be elected at least three of the directors to compose the new board.

At the time of the annual election, or at the said date of the transfer of the principal office to San Francisco, the said company shall be free and clear of all debts and liabilities, except such as shall be provided for to the satisfaction of the stockholders representing said one-third of the capital stock, and shall withdraw from their business, for the exclusive use and benefit of the stockholders representing said two-thirds of the capital stock, all money, property, and assets of every kind, excepting the entire profits from November 1, 1869, to that date, and also excepting the horses, wagons, safes, treasure bags and boxes, office fixtures, furniture, stationery, and other personal property used in and necessary for the prosecution of their legitimate business.

And at the same time, and for the purposes of supplying the deficiency created by the withdrawal of such money and assets, they shall levy an assessment on the entire capital stock sufficient to provide a sum not exceeding five hundred thousand dollars ($500,000.)

At the next annual meeting of Wells, Fargo & Company, in New York the board of directors shall be reduced to seven.

Agreed in duplicate the day and year first herein written.

THE PACIFIC EXPRESS COMPANY,

CHARLES FARGO.

OMAHA, *October* 4, 1869.

TERMS OF A PROPOSED CONTRACT BETWEEN THE PACIFIC EXPRESS COMPANY AND THE CENTRAL PACIFIC RAILROAD COMPANY.

OFFICE PACIFIC EXPRESS COMPANY,
San Francisco, September 25, 1869.

HON. LELAND STANFORD,
President Central Pacific Railroad Company:

DEAR SIR: It may be advisable for the undersigned, representing the Pacific Express Company, or otherwise to make a contract with an express company or with individuals for the purpose of doing an express business, or the organization of an express company, to be in a situation to guarantee that your company will enter into a contract with such party or parties as we may direct, with the following conditions:

(1) That you will furnish such party or parties to such express accommodations as they may require for the period of ten years, for all the express business done on the lines of your road, operated or controlled by your company.

(2) That for such service you are to be paid double first-class rates as charged by you to and from various points on the line of your road or roads, or as prorated with connecting roads, settlements to be made monthly, at which time 10 per cent. shall be deducted and allowed such parties from the gross amount found due to your company.

(3) That no charge shall be made to such parties for the transportation of their messengers, safes, or treasure boxes; also all telegraphic messages connected with their business shall have due dispatch, so far as the same can be done without prejudice to the business of the railroad company, without cost to such parties, over telegraph lines owned or controlled by the railroad company.

(4) That when it may be found convenient or desirable for such parties to appoint the agents of the railroad company as their agents, they arranging for the compensation to be paid such agents, such parties shall be at liberty to do so, first giving the railroad company notice of the same, and receiving its approbation.

(5) That such parties shall take charge of and deliver all letters, messages, and parcels without cost to the railroad company which it may desire to transmit from point to point along the lines of its road or roads.

(6) That a provision shall be incorporated in a contract with such parties that if in the practical workings of a contract with aforesaid provisions should prove onerous upon either party, if they fail to agree mutually upon a change, then on giving notice by either party of a wish that the questions at issue shall be passed upon by others, each party to the contract shall select a disinterested, intelligent superintendent of a railroad, and they to select a like umpire, to whom the questions aforesaid shall be submitted and their decision shall be conclusive and binding upon both parties.

If your company will enter upon a contract with substantially the foregoing provisions, your signature appended hereto will be sufficient.

Your obedient servants,

H. D. BACON,
D. O. MILLS,
LLOYD TEVIS,
Trustees.

The Central Pacific Railroad Company will enter into a contract on substantially the foregoing conditions.

LELAND STANFORD,

SAN FRANCISCO, *September* 25, 1869.

Q. Has this been signed?—A. I think so. Subsequent to that date, the Central Pacific Railroad Company made an agreement with Wells, Fargo & Company on December 9, 1869, a copy of which is herewith handed you, without signature. I have not in my possession the original; but this is substantially the same, if not identically the same. I believe it to be a literal copy. I was familiar with it at that time, and this, I think, is an original copy of that agreement.

Q. Is the original duly executed?—A. The original is duly executed, and I think it is identical with this. I do not happen to have it.

By the CHAIRMAN:

Q. Who were the signers originally?—A. The signers originally were the Central Pacific Railroad Company and Wells, Fargo & Company.

By Commissioner ANDERSON:

Q. After the consolidation?—A. After the consolidation.

AGREEMENT BETWEEN THE CENTRAL PACIFIC RAILROAD COMPANY AND WELLS, FARGO & CO.

(The paper was marked "Exhibit 2, August 10th, 1887," and is as follows:)

Memorandum of agreement entered into this 9th day of December, 1869, between the Central Pacific Railroad Company, a corporation organized under the laws of the State of California, party of the first part, and Wells, Fargo & Company, a corporation created by the legislature of the Territory of Colorado, party of the second part.

Whereas the party of the first part now owns and is engaged in operating a line of railroad extending from San Francisco, California, to Ogden, Utah;

And whereas the party of the second part is an express company, having a large and established business between New York and various places upon the line of said railroad and many other places west of the Rocky Mountains;

And whereas the party of the second part is desirous of securing for the benefit of itself and the persons employing it permanent and reliable facilities for the transportation of its express matter, and the party of the first part is desirious of securing the business and patronage of the party of the second part,

It is agreed as follows:

(1) The party of the first part agrees to provide on each of its passenger trains sufficient facilities of the kind customarily furnished to express companies by railroad companies for the transportation of all freight and express matter which may be tendered to it by the party of the second part for transportation upon any of its said trains at any station at which said train may customarily stop; and to receive and transport such freight or express matter upon the passenger train leaving such station next after such tender; and carry and deliver the same without delay, and so as to enable the party of the second part to make the shortest transit to the point to which such freight or express matter may be destined and the quickest connection with other lines of transportation extending by railroad, steamboat, or otherwise, beyond the lines of the party of the first part.

(2) The party of the second part shall be entitled to send free, both ways, all its safes, the contents thereof, and its trunks and bullion bags; and shall also have the privilege to send free of charge one or more persons on each train as messengers to take charge of its property, and the property confided to it for carriage. Such messenger or messengers shall ride in the car or cars provided by the party of the first part for the carriage of the goods in their charge; and also all agents of the last-named party whenever such agents, other than directors, are traveling on the business of the party of the second part.

(3) The party of the second part agrees to use its best exertions to induce freight and express matter, which it can control, to be sent in its care over the line or lines of the party of the first part.

(4) The party of the first part also agrees to employ the party of the second part exclusively to receive, take charge of, and deliver all letters, parcels, and messages which it may require to have sent or delivered on the lines of its road; such service, to be compensated for as hereinafter provided.

(5) Settlements shall be made monthly between the 1st and 15th days of each month, and the party of the first part shall be entitled to receive quadruple first-class rates

for every ton of freight or express matter transported by it, provided the aggregate amount shall not exceed 100 tons for the month, but if the aggregate amount shall exceed 100 tons for the month then the rate charged upon each ton shall be only triple first-class rates; and if such aggregate amount shall exceed 150 tons for the month then the rate charged for each ton shall be double first-class rates. The rates to be paid shall be local rates upon local business, and through rates as prorated by the party of the first part with other railroads on all through business.

(6) Upon each settlement the party of the second part shall be entitled to a deduction of 10 per cent. of the gross amount due from it as compensation for receiving, caring for, and delivering the letters, parcels, and messages of the party of the first part, and shall not make any other charge for such service.

(7) The party of the second part shall have the right to employ the agents and servants of the party of the first part as its own agents, at such points or stations as it may deem advisable, when such employment will not be to the interruption or detriment of the business of the party of the first part. The last-named party will also transmit free of charge and with due dispatch over its telegraph lines or any lines controlled by it, the messages of the party of the second part or its directors or agents, relating to its business, and will also give the party of the second part the benefit of any contract which it now has or hereafter may have with connecting telegraph lines

(8) This contract shall be binding on both parties for ten years from its date, and shall apply not only to all lines of railroad or telegraph now owned, operated, or controlled by the party of the first part, but also to such as may hereafter be owned, operated, or controlled by it during the period of this contract.

(9) The party of the first part also agrees not to engage during the last-named period in the express business, not to employ another express company in the carriage of letters, parcels, messages, or goods belonging to itself, and that it will not permit any of its employés to receive, carry, or deliver express matter. It also agrees that it will not during such period give to any other person, company, firm, or corporation any better or more advantageous terms, rates, or facilities than it gives to the party of the second part. And it will, so far as it lawfully may, during all such period, protect and forward the interests and business of the party of the second part.

The WITNESS. Another agreement was executed between the Central Pacific Railroad Company, the Southern Pacific Railroad Company, and Wells, Fargo & Co., on October 8, 1878, a copy of which is herewith handed to you.

The paper was marked "Exhibit 3, August 10, 1887," and is as follows:

AGREEMENT BETWEEN THE CENTRAL PACIFIC RAILROAD COMPANY, THE SOUTHERN PACIFIC RAILROAD COMPANY, AND WELLS, FARGO & COMPANY.

This agreement, entered into this 4th day of October, A. D., 1878, between the Central Pacific Railroad Company and the Southern Pacific Railroad Company, corporations organized under the laws of the State of California, for themselves and for all lines owned, operated, or controlled by them, parties of the first part, and Wells, Fargo & Company, a corporation created by the legislature of the Territory of Colorado, party of the second part, witnesseth:

That whereas the parties of the first part now own and are engaged in operating lines of railroad extending from San Francisco, California, to Ogden, Utah Territory, and from San Francisco to Yuma, in Arizona Territory, and diverging lines;

And whereas the party of the second part is an express company having a large and established business between the Atlantic seaboard and various places upon the lines of said railroad and extending throughout the Pacific slope;

And whereas the party of the second part is desirous of securing for the benefit of itself and the persons employing it permanent and reliable facilities for the transportations of its express matter, and the parties of the first part are desirous of securing the business and patronage of the party of the second part,

It is agreed as follows:

(1) The parties of the first part agree to provide on each of their daily passenger trains sufficient facilities of the kind customarily furnished to express companies by railroad companies for the transportation of all freight and express matter which may be tendered to them by the party of the second part for transportation upon any of their daily trains at any station at which said trains may stop, and to receive and transport such freight or express matter upon the said passenger trains leaving such station next after said tender and carry and deliver the same without delay. But the carriage of more than one car-load of express matter by any one passenger train shall, for convenience, be at the option of the parties of the first part.

(2) The party of the second part shall be entitled to send free, both ways, all its messengers, hand-safes, and the contents thereof, and its empty packing trunks and bullion bags, and shall also have the privilege to send free of charge one person on each train as messenger to take charge of its property and the property confided to it for carriage, and when necessary an additional messenger armed as guard for protection against highway robbers. Such messengers shall ride in the car provided by the parties of the first part for the carriage of the goods in charge. The agents of the party of the second part shall be carried free of charge on passenger trains of the parties of the first part, whenever such agents are traveling on the business of the party of the second part.

(3) The parties of the first part agree to employ the party of the second part exclusively to receive, take charge of, and deliver all letters, parcels, and messages which they may require to have sent or delivered on the line of their roads, such service to be compensated as hereinafter provided.

(4) Settlements shall be made monthly, between the first and tenth days of each month, and the parties of the first part shall be entitled to receive quadruple first-class rates for every ton of freight or express matter transported by them, provided the aggregate amount shall not exceed one hundred tons for the month, but if the aggregate amount shall exceed one hundred tons for the month, then the rate charged upon each ton shall be only triple first-class rates; and if such aggregate amount shall exceed one hundred and fifty tons for the month, then the rate charged for each ton shall be double first-class rates. The rates to be paid shall be local rates upon local business and through rates as prorated by the parties of the first part with other railroads on all through business.

(5) Upon each settlement the party of the second part shall be entitled to have a deduction of ten per cent. of the gross amount due from it as compensation for receiving, caring for, and delivering the letters, parcels, and messages of the parties of the first part, and shall not make any other charge for such service.

To increase the business and especially to fill capacity of express cars, the charges by the parties of the first part on fish, vegetables, fruit, and such other freight as may be agreed upon from time to time by the parties hereto, from San Francisco, San José, Oakland, Stockton, Sacramento, Marysville, &c., to Ogden, Utah, and Yuma, Arizona, and *vice versa*, shall be first-class local freight rates on local business, and proportionate through rates on through business, with ten per cent. added, and from the points named to intermediate points one and a half first-class local freight rates. It is understood, however, that these rates shall not apply except on the character of freight mentioned to fill capacity, and are not intended to apply to general merchandise or other matter obtainable at regular express rates.

(6) The party of the second part shall have the right to employ the agents and servants of the parties of the first part as its own agents, when such employment will, in the opinion of the parties of the first part, not be to the interruption or detriment of their business.

The parties of the first part will also transmit, free of charge and with due dispatch, over any telegraph lines now or hereafter controlled by them, the messages of the party of the second part or its directors or agents relating to its business, and will also give their good-will and influence in securing for the party of the second part any other telegraph facilities which may hereafter be desired.

(7) This contract is to supersede all existing contracts between the parties hereto, and shall be binding for fifteen years from January first, eighteen hundred and seventy-nine, and shall apply to all lines of railroad now owned, operated, or controlled by the parties of the first part, and also to such as may be owned, operated, or controlled by them during the period of this contract.

(8) The parties of the first part also agree not to engage during the last-named period in the express business, nor to employ any other express company in the carriage of letters, parcels, messages, or goods belonging to themselves, and that they will not permit any of their employés to receive, carry, or deliver express matter. They also agree that they will not, during such period, give to any other person, firm, company, or corporation any better or more advantageous terms, rates, or facilities than they give to the party of the second part, and they will, so far as they lawfully may, during all such period, protect and forward the interests and business of the party of the second part.

(9) As further consideration for this contract, the party of the second part agrees to pay to the parties of the first part the sum of twelve hundred and fifty thousand dollars: that is to say, eight hundred and twenty-five thousand to the Central Pacific Railroad Company, and four hundred and twenty-five thousand dollars to the Southern Pacific Railroad Company, payable in the capital stock of Wells, Fargo, & Company at par, after the same shall have been increased from five millions of dollars, as at present, to six millions two hundred and fifty thousand dollars. And said last-named party shall have six months within which to increase its said capital stock and deliver the same as herein provided.

And the party of the second part agrees that it will not increase the capital stock of said company during said period of fifteen years, except as herein provided, without the consent of said parties of the first part, but may do so by giving to said parties of the first part one-fifth of such increased capital stock.

This contract to be subject to ratification by the stockholders of Wells, Fargo & Company.

Witness the hands and seals of the parties.

CENTRAL PACIFIC RAILROAD COMPANY,
By LELAND STANFORD, *President.*
SOUTHERN PACIFIC RAILROAD COMPANY,
By CHAS. F. CROCKER, *Vice-President.*

Witness:
A. N. TOWNE.

WELLS, FARGO & COMPANY,
By LLOYD TEVIS, *President.*

Witness:
C. P. HUNTINGTON.

The WITNESS. I am now ready to answer any questions.

WHAT OCCURRED.

By Commissioner ANDERSON:

Q. I noticed in examining the agreement that the consolidated stock appears to have been raised $15,000,000, and the amount paid to the Pacific Express Company, or to its order, was five millions of stock; is that correct?—A. No, sir; that is not correct. It is stated so there in the agreement; but I will tell you what occurred. The fact is, that subsequent to that agreement, and before it was carried out, the capital stock was so increased in conformity with it, and then it was decreased to $5,000,000 before the stock was distributed, and before the Pacific Express Company received its proportion of it. It received $1,666,666.66 in stock, which it distributed among the stockholders of the Pacific Express Company pro rata.

Q. What is your present capital stock?—A. $6,250,000.

Q. When was it raised from $5,000,000 to $6,250,000?—A. It was raised when the last agreement was made, in order to give to the Southern Pacific Company and the Central Pacific Railroad Company $1,250,000 of the capital stock, which was the consideration of that agreement.

TO WHOM THE NEW STOCK WAS ISSUED.

Q. To whom was that $1,250,000 of stock actually issued?—A. It was issued in conformity with that agreement (Exhibit No. 3): to the Southern Pacific Railroad Company, I think, $450,000; to the Central Pacific $800,000. The agreement shows for itself.

Q. Is it not $825,000 to the Central Pacific Railroad Company and $425,000 to the Southern Pacific?—A. Yes, sir; I stand corrected.

Q. Under agreements Nos. 1 and 2, was the arrangement that one-third of the entire capital stock should be delivered to the Pacific Express Company, or its order?—A. Yes, sir.

THE GREAT CONSIDERATION.

Q. I call your attention to the ninth article of the agreement, as made between the Central Pacific Railroad Company and the consolidated Wells, Fargo & Co.:

The party of the first part (that is the railroad company) also agrees not to engage during the last-named period, that is, the ten years during which the contract was to run, in the express business, and not to employ any other express company in the carriage of letters, parcels, messages, or goods belonging to itself, and that it will not permit any of its employés to receive, carry, or deliver express matter.

Now I ask you if that provision was not one of the great controlling and valuable considerations that you received in entering into this arrangement?—A. That was the great consideration. I have not read that agreement, but I think there is a provision there that qualifies that, saying, so far as it was legal for them to do so, they would give us the exclusive right.

QUALIFYING CLAUSE IN SECTION 9.

Q. The qualification you refer to is found in the concluding portion of section 9:

It is also agreed that it [the railroad company] will not, during said period, give to any other person, company, firm, or corporation any better or more advantageous terms, rates, or facilities than it gives to the party of the second part. And it will, so far as it lawfully may, during all of said period, protect and forward the interests and business of the party of the second part.

Is that the qualification to which you refer?—A. Yes, sir.

Q. Is that the only qualification?—A. Yes, sir; that is the section and qualification to which I refer.

Q. As a matter of fact, since these agreements No. 1 and No. 2 were made, has your company had the exclusive express business?—A. It has.

INCREASE OF BUSINESS AND DIVIDENDS.

Q. Have the rates that you have been enabled to charge on business under this arrangement been such as to enable your company to declare dividends; and if so, what?—A. The dividends, as I stated yesterday, declared by this company from that time to the present have been 8 per cent. per annum. This railroad has only a portion of our business. We have had an immense business in addition to this railroad, out of which we have made profits and from which we have declared our dividends.

Q. Over what other roads, from 1870 to 1875, did you do business west of the Missouri River?—A. I cannot recall them without examination.

Q. Is it not true that for a number of years after the contract was made the bulk of the Pacific slope business west of the Missouri River was carried over the Union Pacific and the Central Pacific Railroads?—A. All of the through business was carried so. We had side lines running and ramifying into all of the Territories and States west of the Missouri River, which were very remunerative to us.

THE CASH ASSESSMENT.

Commissioner ANDERSON. I notice that the papers provide for an assessment of $500,000 to take the place of certain earnings, moneys, and properties that were withdrawn.

The WITNESS. Yes, sir.

Q. Is that the only cash payment that was made?—A. That is the only cash payment that was made.

Q. And does that take the place of the subscription of $500,000 for the bank, which you referred to yesterday?—A. Yes, sir.

Commissioner ANDERSON. The bank apparently had nothing to do.

The WITNESS. In this statement I evidently made a mistake. I spoke from memory, not having seen the papers for many years. That money has really been used for that purpose ever since, for the bank.

Q. Was that assessment actually paid in cash, or was it simply charged up?—A. Cash.

Q. Immediately after the formation or soon after?—A. Immediately after.

Q. How soon after the execution of this agreement was the first dividend declared? The first dividend would come within $100,000 of paying this assessment—the first annual dividend.—A. Semi-annual dividends were declared. I cannot recall just when it was declared; you may say the following year.

Q. Is the date of this agreement October 4, 1869?—A. Yes, sir.

Commissioner ANDERSON. Then it was within six months after that?

The WITNESS. I think not; but the following year, in 1870 I should say, a dividend was paid.

Q. And is it your recollection that that first dividend was 4 or 8 per cent.?—A. I think the first dividend of six months—we declared a dividend semi-annually—was 3½ per cent., being 7 per cent. per annum; and subsequently to that it was a 4 per cent. semi-annual dividend.

WHO GOT THE STOCK.

Q. Can you state exactly to whom and in what quantities this $1,666,666.66 of stock was issued?—A. I cannot state positively and definitely, but I can tell you that it was issued equally to D. O. Mills, Leland Stanford, Mark Hopkins, Charles Crocker, C. P. Huntington, and myself, and perhaps one other person, H. D. Bacon, to the best of my recollection.

Q. The assessment of $500,000, as I understand it, was on the stock itself, at such a percentage on the quantity of stock each one held; was it not?—A. Yes, sir.

Q. So that the payments were directly proportioned to their stock interests, were they?—A. Yes, sir.

Q. Was there any stock whatever issued to the Central Pacific Railroad Company itself under the first agreement?—A. None at all at that time.

NOTHING PAID TO THE CENTRAL PACIFIC.

Q. Was there any consideration whatever paid to the Central Pacific Railroad Company, either by those who received the stock from your company or by your company itself?—A. No.

Q. Was there nothing but the consideration of the rates agreed to be paid under the contract?—A. That is all, sir.

Commissioner ANDERSON. The Exhibit No. 3, as I understand it, is intended to extend the application of this method of doing business to the Southern Pacific Railroad Company; and the result of that agreement was that in consideration of such extension your capital was raised to $6,250,000, and $425,000 was issued to the Southern Pacific Railroad Company and $825,000 to the Central Pacific Railroad Company?

The WITNESS. Yes, sir.

Q. Is the same feature of quasi-exclusive business found in the paper marked Exhibit 3, as in the others?—A. Yes, sir.

A MONOPOLY OF THE EXPRESS BUSINESS.

Q. And are you the only express company that does business for the Central Pacific and the Southern Pacific Railroad Company to-day?—A. Yes, sir.

Q. Do you know what has become of the stock which was issued to the Central Pacific Railway Company and to the Southern Pacific Railroad Company?—A. I do not know what has become of it.

Q. Do you know whether they are still stockholders?—A. I think that it has all been sold; that is my recollection.

Q. Do you know who now holds the stock?—A. I do not.

Q. Who receives the dividends from your company; do you know?—A. I do not.

Q. Will your stock transfer books show?—A. Yes, sir.

CONCERNING THE EXECUTION OF "EXHIBIT NO. 3."

Q. Can you state why the execution of the instrument "Exhibit No. 3," on behalf of the Central Pacific Railroad Company is by Leland Stanford as president, and on behalf of the Southern Pacific Railroad Company is by Charles F. Crocker, vice-president?—A. I cannot state with certainty. I think it probable that one of those gentlemen was absent in New York, and this agreement was made in New York City and signed there, and the other gentleman was here. I can only account for it in that way. I have not observed it. I remember that Governor Stanford was in New York when he made the negotiation.

WHO WAS PRESIDENT OF THE SOUTHERN PACIFIC?

By the CHAIRMAN:

Q. Was Governor Stanford the president of the Southern Pacific Railroad Company at that time?—A. I think he was, but I am not sure about that.

Mr. COHEN. No, sir; not of the Southern Pacific Railroad Company.

By Commissioner ANDERSON:

Q. Who was the president of the Southern Pacific Railroad Company in 1878?

Mr. COHEN. Charles Crocker.

The CHAIRMAN (to Mr. Cohen). Is it your recollection that Charles Crocker was the president of the Southern Pacific Railroad Company at that time, in 1878?

Mr. COHEN. Yes, sir.

WHAT THE PROMOTERS PAID AND RECEIVED.

By Commissioner LITTLER:

Q. The facts still remain, as I understand you, that the promoters of this Pacific Express Company received one-third of the stock of Wells, Fargo & Co., and paid therefor $166,000, as you have before stated. Is that so?—A. We did not pay that for it. That was an assessment.

Q. You stated the facts yesterday in relation to it, did you not?—A. Not that we paid that for it. If so I misapprehended your question. Under the agreement an assessment was to be levied of $500,000 upon the entire capital stock of Wells, Fargo & Co., one-third of which we were to pay as owners of one-third of the stock.

Commissioner LITTLER. That is just what you said yesterday.

The WITNESS. I say it again.

Commissioner LITTLER. That is all there is of this matter. That is all I want to ask you.

BANKING BUSINESS OF WELLS, FARGO & CO.

By Mr. COHEN:

Q. Do Wells, Fargo & Co. do a banking business in this city and State?—A. Yes, sir.

Q. And in the Territories also?—A. We have a banking house in Nevada.

Q. At what place in Nevada?—A. At Virginia City.

Q. And in Oregon?—A. None.

Q. Do you do the general business of bankers here in California?—A. Yes, sir.

Q. And draw exchange on New York, London, and Paris?—A. Yes, sir.

Q. And issue letters of credit, and buy and sell bullion?—A. Yes, sir.

Q. And you take deposits?—A. Yes, sir.

Q. And issue certificates of deposit?—A. Yes, sir.

Q. How many offices have you in California?—A. Banking offices?

Mr. COHEN. Yes.

The WITNESS. We have but one.

Q. How many agents have Wells, Fargo & Co. through this State?—A. I cannot remember. We have some fifteen hundred agencies in all.

Q. Do your agents take orders for exchange on the bank in San Francisco?—A. Not ordinarily.

Q. Do any of the agents issue certificates of deposit? How is it at Sacramento?—A. We do not have an office for deposit there.

Q. At Stockton?—A. No, sir; nowhere.

By Mr. BERGIN:

Q. Do you issue money-orders?—A. We issue money-orders all over the State.

By Mr. COHEN:

Q. Are there money-orders in each one of your offices?—A. In every one of our agencies.

Q. Do you receive a commission from that?—A. The agents receive a commission for that. Those are our money-orders that are for sale everywhere.

Q. Does the profit of that business go into the general funds of Wells, Fargo & Co.?—A. Yes, sir.

Q. So that your dividends that you declare are not from the earnings of the express business alone but from the express and banking business combined?—A. Yes, sir.

CHARACTER OF ORGANIZATION AFTER CONSOLIDATION.

By the CHAIRMAN:

Q. How many members of the old firm of Wells, Fargo & Co. remained in the company after the consolidation of 1869?—A. I cannot answer that question. They were stockholders. It was originally a joint-stock company, and it became a corporation, and to-day we have some seventeen hundred stockholders. I cannot answer how many of the stockholders of the original company remain, but great numbers of them did.

Q. How many of the managers of the old firm or company of Wells, Fargo & Co. remained in the new company after the consolidation in 1869?

The WITNESS. In the directory, do you ask me?

The CHAIRMAN. Yes, sir.

The WITNESS. Three or four or five in the directory of nine, I forget precisely how many; perhaps a majority of the old directors remained.

Q. What were their names?—A. I can mention A. H. Barney and William G. Fargo; I cannot recall any others now.

Q. How long did they continue in the management?—A. They continued in the directory for many years. They are both dead now. The business management of the company was transferred in a short time to California, and for purposes of convenience, in order that we might have a quorum here, the majority of directors were selected from San Francisco, five out of the nine; the other four probably being, and I think certainly being, members of the old directory.

The CHAIRMAN. You have named a Mr. Barney and a Mr. Fargo as connected with the old firm, in the directory of 1869, after the consolidation?

The WITNESS. Yes, sir.

Q. Who were the other directors?—A. I cannot recall them now; I can furnish that information.

Q. Were you in the directory of 1869?—A. Subsequent to that I was a director, and D. O. Mills, and Leland Stanford, and Charles Crocker, and Mark Hopkins I think, five here and four there.

Q. Was C. P. Huntington in the early directory of the company?—A. I think it probable that he was, but I cannot recall the circumstances.

By Commissioner ANDERSON:

Q. Do you mean after 1869?

The CHAIRMAN. Yes, sir.

The WITNESS. After the consolidation.

CENTRAL PACIFIC COMPANY NOT A CONTROLLING POWER.

Q. So that a controlling interest, by numbers, in the directory, subsequent to the consolidation and at the consolidation, was in the Central Pacific Railroad Company's interest?—A. I think not, sir. I was a director, and Mr. Mills was a director, and there were several directors of the old management of Wells, Fargo & Co., leaving the Central Pacific Railroad Company in the minority. They never at any time, in all the history of the company, sought to control Wells, Fargo & Co. in any way.

Q. Had you an interest, at the time of the consolidation and when you organized the Pacific Express Company, in the Central Pacific Railroad Company?—A. None at all. I have never had an interest in the Central Pacific Railroad Company.

By Mr. BERGIN:

Q. Do you state the present number of stockholders of Wells, Fargo & Co. at about 1,700?—A. I think so.

Q. Can you state what was the number of stockholders at the time of this consolidation of Wells, Fargo & Co.?—A. I cannot. I should say several hundred—three or four hundred, perhaps.

NO PERSONAL INTEREST IN CENTRAL PACIFIC.

By Mr. COHEN:

Q. You are an old resident of California, are you not?—A. Yes, sir.

Q. And you are a very young-looking man. How long have you lived in California?—A. I have lived here nearly thirty-eight years.

Q. Are you familiar with the general history of the Central Pacific Railroad Company at the time it operated the road and the history of the company during its construction?—A. I know something of it. I

cannot say that I am intimately familiar with it. I lived here at the time.

Q. You said you were never a stockholder of the Central Pacific Railroad Company, did you not?—A. Never a share.

Q. Were you asked to become a stockholder in that company during its early history?—A. I was many times requested to become interested in it, but I declined.

Q. Were you asked to become interested in the contracts that were made to Charles Crocker & Co. and the Contract and Finance Company, and to take part in the Contract and Finance Company?—A. No, sir; I think not. I cannot recall that.

APPOINTED A GOVERNMENT COMMISSIONER.

Q. Had you any interest as a commissioner in the work of construction over the mountains when it was being performed?—A. I had. I was appointed a commissioner by the Government to inspect 300 or 400 miles of the work.

Q. I had an idea that you were offered an interest in the contract that was made with the Contract and Finance Company. Is that so?—A. I was not. I was offered an interest in the Contract and Finance Company, but not in the contract with Mr. Crocker. I understood you yesterday to refer to the contract of Mr. Crocker, a contract made by the company. I presumed that you referred to that.

REASONS FOR DECLINING AN INTEREST IN CONTRACT AND FINANCE COMPANY.

Q. Were you at any time offered an interest in the Contract and Finance Company?—A. Yes, sir; I think so.

Q. By whom?—A. By either Governor Stanford or Mr. Huntington, or some of those gentlemen.

Q. Can you recall about the time that offer was made to you?—A. It was between 1862 and 1865 or 1867; I cannot recall with certainty any nearer than that.

Q. Was it during the time the Contract and Finance Company was endeavoring to construct the Central Pacific Railroad?—A. Yes, sir.

Q. You did not accept that proposition?—A. I did not.

Q. Why did you not accept it? What was your view of the situation of the Central Pacific Railroad Company and the Contract and Finance Company at that time?—A. I looked at it as a business propo sition. I thought it was liable to lead to great embarrassment and I very much doubted their ability to carry out the contracts. I was apprehensive it would involve me. Therefore I declined either to become interested in the road itself or in the Contract and Finance Company.

STOCKHOLDERS' LIABILITIES UNDER THE LAW.

Q. What was the nature of the responsibility you feared to undertake, the liability as a stockholder or that it might require more money than you could command?—A. Both of those things entered into the consideration. I was aware of the fact that under our California laws the stockholders were liable pro rata for the debts of the company, and I was apprehensive——

By Commissioner ANDERSON:

Q. The debts of what company?—A. Of any company; the Central Pacific or any organization under our laws. I was afraid of that lia-

bility; I was also apprehensive that the money could not be raised to prosecute the work, and that the whole thing would break down. The fact is, I thought it would break down.

Mr. COHEN. I believe I may assume, without fear of contradiction, that you have been for many years one of the leading capitalists of San Francisco.

The WITNESS. I have been a capitalist for many years in San Francisco.

FINANCIAL HISTORY OF THE CORPORATIONS.

By Mr. COHEN:

Q. During the time that Charles Crocker & Co. or the Contract and Finance Company were constructing the Central Pacific Railroad, were you familiar with the financial history of these corporations, or of the members controlling either one of them, so as to say what their financial condition was at that time?—A. I had a general knowledge of that matter. Do you refer to their financial responsibility?

Q. I refer to their being constant borrowers, and the difficulty they found in obtaining money necessary for the purpose of construction.—A. I am aware of the fact that the capital of those gentlemen was very limited—I refer to their individual means—because they were borrowing money in the market all the time and of anybody that would loan it to them. They applied to me, I might say, hundreds of times. I occasionally loaned them money, and assisted them in procuring money from others. I know the fact to be that they were exceedingly hard run at times, and I was apprehensive they would fail to procure money in time to meet their obligations.

CURRENT RATES OF INTEREST.

Q. Can you say what rate of interest they paid between 1862 and 1869?—A. I can say that I loaned them money at that time at 3 per cent. per month.

By Commissioner ANDERSON:

Q. At what time?—A. Between those dates he suggests; subsequent to their commencement of the construction of the road. I should say it was after 1863. I think the current rate of interest at that time was about 2 per cent. per month, or 3 per cent., sometimes 3½ per cent.

By Mr. COHEN:

Q. Did the banks of San Francisco charge on their ordinary business, prior to the opening of the Bank of California, in 1864, 1½ per cent. per month?—A. Yes, sir; or more.

Q. The Bank of California reduced the rate of interest here in California to 1 per cent. per month; can you remember what time that was?—A. I cannot.

Q. The rate of interest that the Central Pacific Railroad Company, or its directors, or the Contract and Finance Company would have to pay prior to the completion of the road in 1869 was always 1 per cent. or over 1 per cent. per month, was it not?—A. I cannot say at what rate they procured all of their money here, but I can say that the rates of interest current were that or over.

CENTRAL PACIFIC STOCK UNSALABLE DURING CONSTRUCTION.

Q. What was the availability of the stock of the Central Pacific Railroad Company during all of those years as a means of raising money?—A. It had no value whatever for that purpose, in my opinion.

By Mr. BERGIN:

Q. Was its stock salable at all; or when did it first become salable?—A. My recollection is that it was not salable at all at that time, nor for years afterwards.

By Mr. COHEN:

Q. Do you mean at the time the construction of the road was finished?—A. While they were building the road.

By Mr. BERGIN:

Q. When did it first become salable?—A. I cannot recall.

A SYNDICATE IN NEW YORK.

By Mr. COHEN:

Q. Do you remember when a syndicate was formed in New York for the purpose of putting Central Pacific Railroad stock on the market there?—A. I think it was about 1878 or 1879 or 1880.

Q. Prior to that time was there any sale for the stock of the Central Pacific Railroad Company?—A. I do not think the stock could have been sold here. I never heard of any sales being made in California prior to that date.

DIFFICULTIES OF CONSTRUCTION.

Q. Will you state to the Commission from your own knowledge the difficulties or disadvantages that the constructors labored under in constructing the Central Pacific Railroad?—A. I think the difficulties were extraordinary. The railroad had to be constructed over lofty mountains. Reports had been made by able engineers that it was absolutely impracticable; and a grave doubt existed in the minds of capitalists here as to the practicability of it. These gentlemen had very limited means. They procured some aid from the counties through which the road passed, and also procured from the State of California a loan of $1,500,000 for twenty years, I think it was.

By Mr. BERGIN:

Q. Was it not a guarantee?—A. Yes, sir; a guarantee of their bonds.

Mr. COHEN. A guarantee of interest on the bonds.

Commissioner ANDERSON. It was an agreement to pay the interest.

The WITNESS. It was an agreement to pay the interest upon the bonds.

DIFFICULTY OF NEGOTIATING SECURITIES.

By Mr. COHEN:

Q. Not of the principal?—A. No, sir; not of the principal. The difficulties they encountered were in negotiating their securities. It was at the time when gold was at an immense premium and when the bonds of the Government were at a very large depreciation. They were constantly short of money, and I, with many other gentlemen in the habit of loaning considerable sums of money here, thought that they would utterly fail and break down and never get over the mountains.

FINANCIAL CONDITION OF CONTRACT AND FINANCE COMPANY IN 1869.

Q. We have it in evidence here that at the time the Central Pacific Railroad had been constructed to Promontory Point, the Contract

and Finance Company had expended all the money received for such construction, and had on hand about twenty-three millions of the stock of the Central Pacific Railroad Company, and was in debt three and one-half million dollars, the date being May 10, 1869. What, in your opinion, was the condition of the Contract and Finance Company at that time as to its solvency or insolvency, if it had been called upon at that time to meet its obligations?

The WITNESS. I understand you to say that at that day the Contract and Finance Committee were in debt three and one-half million dollars, and that their assets were twenty-three millions of the stock of the Central Pacific Railroad?

Mr. COHEN. Yes, sir.

Commissioner ANDERSON. I call your attention to the fact that the evidence is that they had fifty-two millions of stock; not twenty-three millions.

Mr. COHEN. I do not understand that to be the case. I understand that some years later when they dissolved they had fifty-two millions, but not at this time.

Commissioner ANDERSON. The Charles Crocker stock was passed to the Contract and Finance Company at the termination of its construction; and it was then fourteen millions.

The WITNESS. I was going to say that, assuming that the Contract and Finance Committee at that day had exhausted its means and its only assets were $23,000,000 of the stock of the Central Pacific Railroad Company, and it owed three and one-half millions of debts, I am not sufficiently familiar with the revenues of the road at that date to answer satisfactorily. I could only tell you my conjecture, from recollection, that I would not be inclined to assume that liability and take that stock.

EFFECT OF INDEBTEDNESS OF CENTRAL PACIFIC UPON ITS STOCK.

Q. What influences were there, in your judgment, which militated against the value of that stock then or thereafter?—A. The indebtedness of the company at that time was very large; but not having examined with a view to answering that question I cannot say with certainty how much, but I suppose, from my recollection, $80,000 or $90,000——

By Commissioner ANDERSON (interrupting):

Q. The indebtedness of what company?—A. Of the Central Pacific Railroad Company; that is, in the stock of the Central Pacific Railroad Company. My objection to the stock would have been the great indebtedness of the road, which I was apprehensive then would render it insolvent and unable to pay dividends to its stockholders.

EFFECT OF LIABILITY OF STOCKHOLDERS ON STOCK VALUES.

By Mr. COHEN:

Q. Under the statute of California fixing the liability of stockholders, what effect, in your judgment, did that have on the value of the stock?—A. Very great, indeed. I have just stated that one of the objections to holding any of that stock was that the stockholders, under the laws of the State of California, were liable for its debts. That was the reason why the capitalists of San Francisco and California always refused to have anything to do with it. It rendered the stock unavailable as a security.

Q. Were you familiar with the travel and transportation being done by the Central Pacific Railroad Company about the time of the completion of its road in May, 1869?—A. Not sufficiently so to answer positively about it.

Q. What has been, in your judgment, the benefit derived by the people of California from the construction of the Central Pacific Railroad as compared with their previous modes of transit?—A. I think the benefit derived by California from the construction of the road has been immense in the development of the country and in the facilities it has afforded for the bringing of immigration.

RATE OF TRANSPORTATION BEFORE COMPLETION OF ROAD.

Q. Do you remember the rate of transportation between New York and San Francisco which was paid before the construction of the Central Pacific Railroad?—A. Not sufficiently so to state definitely.

Q. Some two hundred and fifty or three hundred dollars per passenger, was it not?—A. Yes, sir; I paid $200 for crossing the plains in 1849.

Q. What was the cost by way of the Isthmus of Panama?—A. It was from five hundred to one thousand dollars. I crossed the plains in a mule team.

Mr. COHEN. I mean immediately preceding the finishing of the Central Pacific Railroad.

The WITNESS. Oh, I misunderstood your question, then. I cannot recall what that was.

By the CHAIRMAN:

Q. Do you not think that there are records showing all of these things that would be of more service for our record than the testimony of a gentleman who has doubt about his recollection?

Mr. COHEN. I do not know where you can get the record of transportation charged from year to year except by taking it from old residents.

Commissioner ANDERSON. Take it from the War Department.

The WITNESS. I might have ascertained all of these things.

INTRINSIC VALUE OF STOCK.

Q. Had the stock of the Central Pacific Railroad Company any value until the business of that company was developed some years later, after its construction?—A. I think not, until it was ready to pay dividends, which gave it a value, regardless of any intrinsic value. I never thought of any intrinsic value. But the paying of dividends, which was the result of the income of the road, gave it a marketable value.

Q. You never thought that it had any intrinsic value?—A. I thought not.

MANNERS AND CUSTOMS OF CONGRESSMEN.

Q. You did not follow the manners and customs of members of Congress and sell it short, did you?—A. No, sir; I did not sell it short.

The CHAIRMAN. What members of Congress sold it short?

Mr. COHEN. I think the Commission have been to Washington, and have the same information that I have; that almost every broker shop in Washington, and a great many in New York, were carrying accounts of members of Congress who were selling Central Pacific and Union Pacific stock short for several years past.

The CHAIRMAN. Can you give their names?

Mr. COHEN. I never was familiar with that class of Congressmen. Those that I have known were the ones that did not do these objectionable things. I only knew the good ones.

WHY CENTRAL PACIFIC STOCK WAS WORTHLESS IN 1869.

By Commissioner ANDERSON:

Q. What was the debt of the Central Pacific Railroad Company in May, 1869, when it was completed?—A. I cannot recall that.

Commissioner ANDERSON. I want to test your reason for saying that the stock was worthless. You have stated that reason as being because its debt was so gigantic.

The WITNESS. I remember that was my conclusion at the time. It was its debt to the Government and its debt in 1869 of twenty-seven millions, if I remember rightly, which took priority of the Government claim.

Q. How did the debt to the Government figure; interest was not payable on it, was it?—A. The interest was not payable upon it, but it was an obligation that had to be ultimately met.

Q. But as to the question of earning dividends upon the stock——A. (Interrupting.) That was untried. We did not know whether it would earn a dividend or not at that time.

Q. What other debts besides the Government debt and the first mortgage bonds was the Central Pacific Railroad Company carrying in May, 1869?—A. I cannot recall with sufficient minuteness to state. It had a considerable outstanding debt, I think, but what amount I do not know now.

SURPLUS EARNINGS PRIOR TO 1869.

Q. Do you know what the surplus earnings of the Central Pacific Railroad Company were for the years prior to May, 1869?—A. I do not know.

Q. Did you know then?—A. I think it probable that I did. I was more or less loaning money and observing those things at the time.

Q. Is it your recollection that the Central Pacific Railroad Company had earned several millions of dollars over and above its fixed charges prior to May, 1869?—A. I have no definite recollection on that subject, whether it had or not.

Q. Do you know when its first dividend was declared?—A. I do not.

Q. Did you observe its operations in 1869, 1870, and 1871?—A. I doubtless did observe its operations, but I cannot recall what they were then.

Q. Do you remember whether any of its stock was pressed for sale anywhere during those years?—A. I do not think so.

Q. Is not your conclusion that the stock had no market value simply based upon your general impression without any very well-defined reasons for the assertion?—A. I am speaking now of my convictions at that time. I was here throughout the entire construction of the road, and think I am familiar with the views of moneyed men in regard to the value of this stock as a security. I speak from my general knowledge, without recalling the particular indebtedness at any stated period.

GROUND FLOOR TERMS OFFERED BUT DECLINED.

Q. You have referred to a request that you should unite in these enterprises, and have stated that it was between 1862 and 1865, 1866, or 1867. At the time of that suggestion to you, how far had the road

progressed in its construction; to what point?—A. I was asked and urged many times up to the completion of the road to become interested in it upon the same terms with the original projectors. I was offered to be let into it. Statements were made to me of its exact condition at the time as an inducement to become interested, but I always declined, from the conviction that it was liable to lead to embarrassments.

Q. Was the offer made to you an offer of Central Pacific Railroad Company's stock, or was it an offer of Contract and Finance Company's stock?—A. The offer was, to the best of my recollection, of both.

Q. What disclosures were made to you as to the agreements for the construction of that road between the Central Pacific Railroad Company and the Contract and Finance Company?—A. I have forgotten what they were.

Q. Were any disclosures made to you?—A. Probably statements were made showing the exact condition of things. My impression is that the Contract and Finance Committee were some of them at least stockholders in the Central Pacific Railroad Company.

THE CONTRACT AND FINANCE COMPANY A SEPARATE ORGANIZATION.

Q. Why do you say Contract and Finance "Committee?"—A. I take it that is the name of the organization.

Q. Did you take it that that was a committee of the board of directors of the railroad?—A. It is the company I refer to.

Q. Were you not aware when you made the last answer that it was a separate company? Were you not sure of it?—A. I am sure it is a separate organization distinctly.

Q. Do you know who the stockholders were in that company; who owned all of the stock?—A. I may have been informed at that time.

Q. The question is whether your best recollection is that you were informed who were the stockholders?—A. Some of them.

THE STOCKHOLDERS.

Q. Were you informed that all of the stock was owned by Stanford, Huntington, E. B. Crocker, Hopkins, and Crocker?

The WITNESS. Of the Finance Company?

The CHAIRMAN. Yes, sir.

The WITNESS. I cannot say positively.

Q. Had they informed you that they had themselves voted the terms of the contract on which the construction was being carried on?—A. No, sir; I have no recollection of such specific information. It was not necessary to give me that information. I take it for granted they did not. I cannot remember.

Q. Did they inform you of the price which they had voted was to be paid to the Contract and Finance Company for the work that was being done?—A. I cannot recollect whether they gave me that information or not.

Q. As to the construction done by the firm of Crocker & Co., did you know who were interested in the profits to be made under that contract?—A. I did not.

Q. Were you asked to become associated in that construction?—A. No, sir; I was not.

LARGE FLOATING DEBT AFFECTED VALUE OF STOCK.

By Mr. COHEN:

Q. Was it not well known among all of the bankers in San Francisco, as far as you know, at the time of the completion of the Central Pacific Railroad in 1869, that that company and its directors had borrowed all the money that the banks here were willing to lend them?—A. It was generally understood at that time that they were considerably in debt and hard run for money.

Q. Was it not a matter of common rumor, which affected the value of their stock, that the floating debt of the Central Pacific Railroad amounted to several millions of dollars; a great many millions of dollars?—A. That is my impression, that the floating debt, as I have stated, amounted to a considerable sum at that time; how much I do not know.

LLOYD TEVIS.

PRODUCTION OF AGREEMENT AS TO TELEGRAPHING.

Mr. COHEN. I will say to the Commission that I produce now an agreement between the Central Pacific Railroad Company and other companies and the Western Union Telegraph Company, dated December 14, 1877, which the Commission did me the honor to ask me to produce.

I also desire to put on the record an assignment from D. W. Strong, the gentleman who appeared here from San Diego, of all his stock in the Central Pacific Railroad Company to one O. D. Lambard, to show what became of that stock. That clears up Mr. Strong's testimony. I will read it to the Commission.

The CHAIRMAN. Will you prove Mr. Strong's signature? You know that he denies the making of any assignment.

Mr. COHEN. I will call a Mr. John B. Harmon, a prominent lawyer here, to prove that signature, and he is here. Mr. Strong did deny making any written assignment. I will prove his signature.

Mr. Cohen then read the assignment, which is marked "Exhibit 4, August 10, 1887," and is as follows:

ASSIGNMENT FROM D. W. STRONG TO O. D. LAMBARD.

For value received I hereby sell, assign, transfer, and convey unto O. D. Lambard fifty (50) shares of the original stock of the Central Pacific Railroad Company of California, being the stock for which I am an original subscriber; and also all my rights of property, rights, claims, and demands in law or equity of what name or nature, as a subscriber to said fifty (50) shares of stock and as a stockholder in said company, and also the receipts for installments paid me.

And I hereby appoint the said O. D. Lambard my attorney in fact, for me and in my name to receive and receipt for said stock.

In witness whereof I have hereunto set my hand and seal this 22d day of December, A. D. 1868.

D. W. STRONG. [L. S.]

Witness:
JOHN B. HARMON.

For value received I hereby sell, assign, and transfer to Leland Stanford the above stock.

O. D. LAMBARD.

May 30, 1870.

It is indorsed:

"SACRAMENTO, *June* 21, 1870.

"For value received I hereby sell and transfer the within stock to C. Crocker.

"L. STANFORD."

RESOLUTION TO PAY D. W. STRONG FOR SERVICES AND EXPENSES.

Mr. COHEN. I will also read to the Commission an entry from page 74 from the minute book of the Central Pacific Railroad Company of California, under date of July 1, 1863, which is as follows:

Resolved, That D. W. Strong, in consideration of services rendered to, and expense incurred in behalf of, this company prior to and after its organization, be, and he is hereby, allowed the amount of $2,500; $500 to be allowed in cash and $2,000 to be allowed on his subscription of fifty shares of stock on the books of this company.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Wednesday, August 10, 1887.

J. H. STROBRIDGE, being further examined, testified as follows:

By the CHAIRMAN:

Question. Have you prepared any statement?—Answer. I have not. Data are very scarce, I find; I can state only from recollection.

COST OF CONSTRUCTION.

Q. Will you state to the Commission, from recollection, the cost of construction of the Central Pacific Railroad from the time of your first connection with it as superintendent in 1864 to 1869, giving the cost by sections as you recall them, and as the work, both as to the labor, the grading, the clearing, the filling, and the ties and rails and other materials that enter into the construction of the road?—A. I could not give you anything like a correct detailed statement. It is all from recollection. I saw no books and I kept no books at the time; the clerical work was all done in the office. There were simply reports and payrolls sent in from month to month. We did not expect ever to have such a thing called up again. I have in general a recollection of about the number of men we had, and so forth, but I cannot make anything like such a statement.

Q. Have you talked the matter over with any of the officers of the Central Pacific Railroad Company since you have been upon the stand?—A. I went to Mr. Miller last night to see what data there was and he gave me none.

AVERAGE NUMBER OF CHINESE EMPLOYED, AND THEIR WAGES.

Q. Since sleeping over the question, how many Chinese did you employ in 1864 at the time of your first connection with the road?—A. I do not think we had any Chinese in 1864; if so, but very few.

Q. How many did you have in 1865?—A. In 1865 I think we had as many as eight or nine thousand.

Q. How many months were they continuously employed?—A. For that year there were not as many; not more than perhaps four months. They increased from very early in the year to the end of the year.

Q. How many Chinamen did you continuously employ during the entire year, 1865? State about what you recall.—A. About an average, I should think, of 7,000.

Q. What did you pay the Chinamen during 1865?—A. I think we paid them $30 a month.

Q. Did that include board?—A. Yes, sir; that did. They boarded themselves.

Q. How many Chinamen did you employ in 1866 continuously, just as you have stated it as to 1865?—A. On an average of perhaps 11,000, or something like that.

Q. Did you pay the same wages?—A. No, sir; I think that the wages then were $35 per month, including board.

Q. How many Chinamen did you employ in 1867?—A. I think about the same number.

Q. Under the same conditions?—A. Under the same conditions.

Q. Was it $35 a month, including board?—A. Yes, sir.

Q. How many did you employ in 1868?—A. From 5,000 to 6,000, as I recollect it.

Q. Were there from 5,000 to 6,000 employed continuously during the entire year 1868, under this same arrangement?—A. Yes, sir. Early in the year we had very many more than we had after going on to the desert. I think there was an average of about between five and six thousand.

Q. How many did you employ in 1869?—A. About 5,000 up to the time the work was completed.

Q. At what time of the year was the work completed?—A. It was on the 10th of May.

Q. To what point?—A. Promontory Point.

Q. So that, from 1865 to the point of completion in 1869, did the company average in its employ about 8,000 Chinamen a year, at an average of $33 a month, including board?—A. Yes, sir.

AVERAGE NUMBER OF WHITE LABORERS, AND THEIR WAGES.

Q. How many white men did you employ in 1864?—A. Perhaps 1,200.

Q. What did you pay them?—A. I think the wages then were $30 a month.

Q. And board?—A. And board; yes, sir.

Q. How many in 1865?—A. Perhaps 2,500.

Q. Were they in continuous employment from January to December?—A. Yes, sir.

Q. At the same rate of wages?—A. The wages were raised to $35. I cannot tell whether it was in 1865 or 1866.

Q. Do I understand you to say that the wages were raised in 1865?—A. I am not certain whether it was in the spring of 1866.

Q. How many white men were employed in 1866?—A. I should think from 2,500 to 3,000.

Q. At the same rate of wages?—A. Thirty-five dollars they were paying then.

Q. And board?—A. And board; yes, sir.

Q. How many were there in 1867?—A. About the same number. They ran pretty nearly the same, as I recollect it.

Q. How many were there in 1868?—A. They did not vary very much.

Q. Were there 2,500?—A. We ran along from 2,000 to 3,000 men. I think so.

Q. How many in 1869, up to the point of completion?—A. There were not as many in 1868; I do not think more than 1,500; perhaps 1,500 or 1,600 after July, and until the work was completed.

Q. Sir?—A. I think about fifteen hundred or sixteen hundred from July, 1868, until the work was completed in May, 1869.

Q. At the same rate of wages?—A. The common laborers, yes, sir; but among others were mechanics and tracklayers; and all of that sort were paid very much more. The rate of wages as given is for ordinary laborers.

Q. So that from your recollection the white men employed from 1864 to 1869 averaged continuously during the entire year, at the wages that you have stated, about nineteen hundred; is that correct?—A. I should think so. It is not very far from it.

AVERAGE NUMBER OF MECHANICS, AND THEIR WAGES.

Q. What other labor had you?—A. There were the stonemasons and carpenters and tracklayers, a good many of them.

Q. Can you recall any figures or numbers as to the stone men, and the carpenters, and the masons, from year to year, and their wages paid?—A. I do not think so. During the work across the mountains I suppose there were 400 or 500 mechanics of that kind were employed all the time.

Q. What did you pay the mechanics?—A. I cannot tell; I do not remember; I think from $3 to $5 a day.

By Commissioner ANDERSON:

Q. Were all of those prices in gold?—A. Yes, sir. The men were all paid in gold.

By the CHAIRMAN:

Q. Do you think they averaged three to five dollars a day for the wages of mechanics?—A. I think so. That is as I recollect it.

Q. During the entire time?—A. Yes, sir.

Q. Do I understand you to say that you had a force of from 400 to 500 men?—A. I think so, as I recollect it.

Q. What other labor had you upon the road?—A. I do not think of anything further except the engineer corps.

Q. As you recall, was there no other except the engineer corps?—A. No, sir.

AVERAGE COST OF TIES, AND WHERE PROCURED.

Q. What did you pay for ties in 1864?—A. I do not know; I did not buy them.

Q. Can you recall any price paid for ties in any year from 1864 to 1869?—A. I do not think so.

Q. From where were the ties furnished?—A. Until we crossed the mountains they were pretty nearly all redwood ties and came from up the coast by way of San Francisco. There was some pine and some cedar; a few ties got out as I recollect it now; perhaps 25,000 or 30,000, before we reached the other side of the mountains into Cold Stream.

Q. What was the difference in the prices of redwood ties furnished from this side and the mountain timber ties?— A. My recollection is that the cost was very much more there than the ties that we got later, when we were down the Truckee River. There were saw-mills there and the ties were cut there to go East.

Q. Did the red wood timber ties cost you less than the mountain timber ties?—A. No, sir; they cost a great deal more.

Q. Do you recall the cost of redwood timber ties?—A. I do not.

Q. Do you recall the cost of the mountain timber ties?—A. I do not.

Q. Do you know what was the difference in the prices?—A. I do not; only in a general way. I know that, of course, getting the ties from here, with the transportation over the mountain, it made them necessarily expensive.

Q. What prices do you recall in connection with the ties as to the cutting and delivery of them at different points on the road?—A. I do not recollect much about them. It is a long time ago.

COST OF CLEARING ROAD-BED.

Q. What did you pay for clearing the road-bed as you moved along? I mean clearing away the timber?—A. That was done by the day.

Q. Was that under a special contract?—A. That was one of the items of the contract with C. Crocker & Co. and the Contract and Finance Company.

Q. Did the labor that you have stated was employed from time to time enter into the cost of the clearing of the road-bed?—A. Yes, sir.

Q. Do you recall any other cost in connection with the clearing of the road-bed other than the labor?—A. Yes, sir; we had to shoot some of those stumps and ties.

Q. Do you mean that you had to blast them?—A. Yes, sir.

Q. What were the prices in connection with the blasting?—A. I cannot tell; what do you mean?

Q. You have stated that you used to shoot something?—A. Yes, sir.

Q. And that was an additional cost? I want to know what it was.—A. The powder was expensive. I do not know what it cost, nor how much it cost to blow out those big trees.

Q. Who had that contract?—A. C. Crocker & Co. had a portion of it, and the Contract and Finance Company had the balance.

Q. Did Crocker & Co. sublet the contract for blasting?—A. No, sir.

Q. Or for any part of the clearing of the road-bed?—A. No, sir.

AVERAGE WIDTH OF ROAD-BED.

Q. How much of the road-bed did you clear?—A. We cleared the whole of it.

The CHAIRMAN. I speak of the width.

The WITNESS. It would be wider in some places than in others. In some places we were required to clear off trees that would reach the track if they were to fall; sometimes the track would be 200 feet wide, and perhaps more than that; in other places not as much; some places not more than 60 feet wide.

Q. Was that work a part of the Crocker contract?—A. Yes, sir.

CONDITIONS OF CONTRACT.

Q. Was that one of the conditions in the contract?—A. I think so.

Q. What other instructions did you receive with reference to the clearing of the road-bed, than the cutting of timber that would be likely to fall across the track?—A. The engineer's specifications would give you a detailed idea exactly of what there was to it, if they can be furnished.

The CHAIRMAN. I ask you now for your recollection.

The WITNESS. We were obliged to clear out all stumps and roots until we got two or three feet below the surface of the road-bed where the banks were shallow, and where the banks were deep we were required to cut the stumps off close to the surface, and clear them.

COST OF GRADING ROAD-BED.

Q. What price was paid for grading the road-bed?—A. I think that it was 45 cents per cubic yard for earth; that is my recollection.

By Commissoner ANDERSON:

Q. Do you mean the excavation?—A. Yes, sir.

By the CHAIRMAN:

Q. Do you recall what part of the road-bed was sublet by Crocker & Co., or the Contract and Finance Company?—A. There was none.

COST OF RAILS.

Q. What was paid for the rails?—A. I do not know. I heard it talked of at the time, and that I do not recollect.

Q. What did you hear talked of at the time?—A. I hardly know; it was very high; $100, or something more than $100 was paid for the rails at the time in New York, as I remember it.

Q. Are you a railroad engineer?—A. No, sir.

Q. What office in the railroad company do you hold now?—A. None.

Q. What connection have you with any railroad business?—A. I am superintendent of construction of the California and Oregon Railroad.

Q. Do I understand that you have been engaged in the construction of railroads all your life?—A. A great deal of my time.

COMPARISON WITH PRESENT COST.

Q. How do the prices of rails at the present time compare with the prices paid at the time of the construction of the Central Pacific Railroad?—A. They are very much less now. I do not think they are more than one-third now what they were then.

Q. Is it your recollection that there was paid for rails at the time of the construction of the Central Pacific Railroad while you were connected with it, three times more than the present rates?—A. I think so; about that.

Mr. COHEN. I can give you the cost of rails paid by the Central Pacific Railroad if you want it.

COMPARATIVE COST OF GRADING THEN AND NOW.

The CHAIRMAN. How does the cost of grading to-day compare with the cost paid at the time that you were connected with the Central Pacific Railroad Company?

The WITNESS. Of course it was much greater then.

Q. Will you state in what proportion, as you have stated regarding rails?

The WITNESS. I would like to know if you mean under the same condition now and then. Is that what you mean? Or do you ask me what it would cost to do the work now through this country, compared with the work which we did in crossing the mountains?

The CHAIRMAN. I desire to know how you compare the character of grading a road, such as you built at the time of the construction of the Central Pacific Railroad, with that of the present time.—A. If I were going to build another one over the mountains it would be very much less now. Wages are less, powder is cheaper, hay and grain are very much cheaper, groceries are cheaper, tools are cheaper, and everything used in the construction is very much less now than it was then.

Q. What would be the proportion, in your judgment?—A. If the work were to be forced in the same way that it was then, if we had the same heavy winters that we had then, there would be perhaps a difference of 30 per cent.

PRICES 30 PER CENT. HIGHER THEN THAN NOW.

Q. What other material entered into the construction of the road? You have given the labor, the clearing of the track, and the grading

and the filling, and the rails and the ties.—A. That is pretty nearly all, when you come to take the bridges, masonry, &c.

Q. Do I understand you, then, in all of the construction prices that entered into the Central Pacific Railroad, at the time of your connection with it, there is a difference of 30 per cent., compared with the same character of work to-day?—A. I think so.

By Commissioner ANDERSON:

Q. What section coincided with the State line?—A. I do not know.

Q. Was it the last section under the Crocker contract, section 133?—A. Yes, sir; I think so. I had forgotten what section it was, and I was trying to think.

Commissioner ANDERSON. Please look at the paper I now show you and state what it is, if you recognize it.

(Paper hereafter marked "Exhibit 5" shown the witness.)

The WITNESS. I have not read it for nearly twenty-five years.

Q. This paper is indorsed, "S. S. Montague. Estimate of road from Newcastle to Dutch Flat." You knew Mr. Montague, did you not?—A. Very well.

Q. Was he at this time the chief engineer of the road?—A. Yes, sir.

APPROXIMATE ESTIMATES OF COST OF CONSTRUCTION.

Commissioner ANDERSON. This is an approximate estimate, made by Mr. Montague, of the cost of substantially the work done under the Crocker contract, stating, first, sections 32 to 43, then sections 44 to 50, and then sections 51 to 68, and then giving an approximate estimate of the cost of the railroad from Dutch Flat to the State line. It is taken from Mr. Judah's report on preliminary survey. I find no date on the paper. It was handed to me by Mr. Miller, or by the railroad officials, and it is marked "305."

The paper was marked "Exhibit 5, August 10, 1887," and is as follows:

First division.— Approximate estimate of the cost of grading, bridging, masonry, ties, and tracklaying from Newcastle to Clipper Gap (twelve miles, sections 32 to 43, inclusive).

Description.	Quantities.	Price.	Amount.
Grubbing and clearing.....miles..	9	$150.00	$1,350.00
Earth excavation.....cubic yards..	390,000	30.00	117,000.00
Cement excavation.....do....	3,500	65.00	2,275.00
Semi-solid rock excavation.....do....	107,800	135.00	145,530.00
Solid rock excavation.....do....	55,800	250.00	139,500.00
Excavations in foundations.....do....	1,688	50.00	844.00
Masonry in foundations.....do....	900	18.00	16,200.00
Masonry in culverts:			
Fourth class.....do....	1,272	15.00	19,080.00
Fifth class.....do....	585	8.00	4,680.00
Timber in trestling.....feet board measure..	632,800	60.00	37,968.00
Plank in crossings.....do....	8,160	40.00	324.00
Iron.....pounds..	36,600	12.00	4,392.00
Ties.....	28,600	75.00	20,450.00
Tracklaying (12 miles main, 1 mile side track).....miles..	13	500.00	6,500.00
Depot buildings and water station.....	.....	.....	4,000.00
Turn-table.....	1	.....	1,000.00
Switches, frogs, &c.....	.....	.....	1,500.00
Total.....	.....	.....	522,593.00
Add for contingencies 10 per cent.....	.....	.....	52,259.30
Total Newcastle to Clipper Gap.....	.....	.....	574,852.30

First division.—Approximate estimate of the cost of grading, bridging, masonry, ties, tracklaying, &c., from Clipper Gap to end of first division (7 miles, secs. 44 to 50, inclusive).

Description.	Quantities.	Price.	Amount.
Grubbing and clearing.....miles..	7	$200	$1,400.00
Earth excavation.....cubic yards..	258,340	40	103,336.00
Semi-solid rock.....cubic yards..	15,600	135	21,060.00
Solid rock.....cubic yards..	103,800	250	259,500.00
Excavation in foundation.....cubic yards..	1,850	50	925.00
Masonry:			
Third class.....cubic yards..	553	20	11,060.00
Fourth class.....cubic yards..	2,892	16	46,272.00
Fifth class.....cubic yards..	678	10	6,780.00
Timber:			
In trestling.....feet B. M..	786,000	65	51,090.00
In cattle guard.....feet B. M..	15,000	50	750.00
Plank in crossings.....feet B. M..	3,000	40	120.00
Iron and spikes.....pounds..	56,000	12	6,720.00
Ties.....pounds..	16,500	75	12,375.00
Tracklaying (½-mile side track).....miles..	7½	500	3,750.00
Depot buildings and water station, switches, frogs, &c.....	.....	.....	6,000.00
Total.....	.....	.....	531,138.00
Add for contingencies 10 per cent.....	.....	.....	53,113.80
Total cost Clipper Gap to end first division.....	.....	.....	584,251.80

Second division.—Approximate estimate of the cost of grading, bridging, ties, tracklaying, masonry, &c. (18 miles second division, sections 51 to 68, inclusive).

Description.	Quantities.	Price.	Amount.
Grubbing and clearing.....miles..	18	$200	$3,600
Earth excavations.....cubic yards..	915,600	40	366,240
Semi-solid rock excavations.....do....	165,000	135	223,750
Solid rock excavations.....do....	375,000	250	937,500
Culvert masonry.....do....	11,400	12	136,800
Masonry in foundations.....do....	2,500	18	45,000
Rock excavations in tunnels.....do....	10,400	8	83,200
Timber in trestling.....feet B. M..	2,000,000	65	130,000
Iron and spikes.....pounds..	70,000	12	8,400
Ties.....pounds..	41,800	60	25,080
Tracklaying (including side tracks).....miles..	18	500	9,500
Depot buildings, water stations, &c.....	.....	.....	4,000

Summary of estimates of grading, bridging, masonry, ties, and tracklaying from Newcastle to Dutch Flat, and recapitulation of Mr. Judah's estimate from Dutch Flat to Truckee River.

From Newcastle to Clipper Gap	$574, 852.30
Clipper Gap to end of first division	584, 251.80
Total Newcastle to end of first division	1, 159, 104.10
Second division:	
Sections 51 to 66, inclusive	2, 169, 277.00
Total Newcastle to Dutch Flat	3, 328, 381.10
Dutch Flat to State line	7, 165, 000.00
Total Newcastle to State line	10, 493, 381.10
State line to Stout's crossing of Truckee River	1, 200, 000.00
Total	11, 693, 381.10

MR. MONTAGUE'S REPUTATION.

By Commissioner ANDERSON:

Q. What was Mr. Montague's reputation for experience, intelligence, and capacity?—A. Mr. Montague was a smart man; he had not had a great deal of experience when he commenced on the Central Pacific.

Q. Did you report to him; was he your superior officer?—A. No, sir; I had nothing to do with him.

Q. What had he to do with the preparatory work before these contracts were entered into?—A. He was the chief engineer and had charge of all engineering, and all estimates and classifications, and all that sort of thing.

Q. Did you see the estimate he made at the time?—A. I do not know whether I did or not.

HIS ESTIMATE NOT HALF ENOUGH.

Q. Referring particularly to the estimate from section 51 to section 63 I find this entry, 18 miles grubbing and clearing, price $200; amount, $3,600; what is your judgment as to that estimate for those sections?—A. That depends upon where they are. If you will allow me to ask an engineer here, I think I can state that.

Q. Certainly.

The WITNESS (to Mr. Clement). Will you tell me where these sections were, 51 to 63?

Mr. CLEMENT. Sections 51 to 63 are a little above Colfax and Dutch Flat.

A. I do not think it was half enough.

CHARACTER OF THE COUNTRY.

Q. What grubbing and clearing were required?—A. Much of that portion of the line was heavy timber which had all to be removed for this 200 feet wide, some places, and in some places not more than 60, perhaps. It was not all heavy timber; and where there were any light banks the stumps had to be grubbed out until you could get everything cleared within to 2 or 3 feet below the road-bed; all stumps and everything, of course, had to be removed; that is about what it consisted of.

Q. How did those sections compare with other parts of the work, in difficulty?—A. They were much heavier than they were further west; as we went east it became much heavier.

Q. Was it much heavier than on those that I have specified?—A. Yes, sir.

PROBABLE COST OF CLEARING ROAD-BED.

Q. Referring to that portion between Colfax and Dutch Flat, what, in your judgment, would it then have cost to have grubbed and cleared the road-bed as you did it?—A. It would have cost $800 per mile.

Q. What was the cost of excavating earth on those sections? I will read you from the estimate: "915,600 cubic yards of earth excavation at 40 cents, amounting to $366,240."—A. I do not think the work was done for that money.

Q. How much more do you think it would cost?—A. It was bad weather when we were there; it was in the foot-hills, and the rains were very heavy; that was in the winter of 1865–'66; we worked in that mud there when a dollar a yard did not cover the cost.

By Mr. COHEN:

Q. Was that the winter when the Virginia stage was blocked up for six weeks?—A. Yes, sir; that was when the Dutch Flat stage was stuck in the mud for six weeks in the streets of Gold Run.

A FAIR PRICE FOR EXCAVATIONS.

By Commissioner ANDERSON:

Q. What would have been a fair average price at that time for earth excavation?—A. I think that for the year through that 40 to 45 cents was a fair price. At that particular time, when we were on that work, it was very wet and expensive.

Q. Did the earth excavation that you had to do differ any in quality?—A. Not very materially.

Q. And is the price you give substantially a fair price for all of the qualities of earth that you would meet?—A. There on those sections; yes, sir.

Q. Is not some of it more mixed in with solid matter and stone, so as to require a higher price?—A. No. Oh, well, that might occur, but in a general way the earth would not vary very much on these sections.

Q. Do you remember that there was a division of your excavation into classes; or did you hear nothing of that?—A. Yes, sir; I knew there was.

CLASSES OF EXCAVATION.

Q. How many classes of excavation do you remember?—A. There were four.

Q. Please explain what was meant by that?—A. There would be earth excavation, and, the cement, and, I think, loose rock and solid rock. Then there was then a classification of very hard rock that we had in that country, and in some places it was a blue flint, which was very expensive. I think, perhaps, there were five classes, and that was the fifth class.

Q. What do you mean by "cement"?—A. It would be cemented gravel,

Q. Are you now describing excavation of gravel that was cemented with clay?—A. Yes, sir.

DIFFERENCE IN COST OF EXCAVATING.

Q. Was there any material difference in the cost of excavating these different qualities of earth?

The WITNESS. Between that and what was classed as earth?

Commissioner ANDERSON. Yes, sir.

The WITNESS. Oh, yes, sir; there would be from 25 to 30 cents, probably. We had to shoot that material.

Q. By shoot, you mean blasted? Is that an expression for "blasted" in California?—A. Yes, sir.

Q. Have you stated substantially what the fair difference would be, in your judgment, as to the cost of excavating those different classes of earth—from 45 to 75 cents?—A. Yes, sir; I think so.

COST OF EXCAVATING SOLID ROCK.

Q. Was there much solid rock on these particular sections from Colfax to Dutch Flat?—A. Not a very great deal.

Q. What, in your judgment, was the cost of excavating solid rock to a yard?—A. Two dollars and fifty cents.

Q. And what would be a fair cost of excavating this hard, flinty rock?—A. Eight dollars a yard, and I do not think it was done for that.

Q. Is it your recollection that the fourth and fifth classes were for rock excavation?—A. Yes, sir.

CLASSES OF MASONRY.

Q. Now, as to the masonry, how many classes of masonry did you have?—A. I do not know; I do not remember.

Q. What was the cost to you of building culvert masonry?—A. I do not recollect.

Q. What masonry did you construct there in addition to the culverts; the bridge foundation?—A. The bridge masonry and abutments.

Q. Any others; were there supports?

The WITNESS. Do you speak of that particular section now?

Commissioner ANDERSON. Yes, sir.

The WITNESS. There were some bridge foundations.

Q. Can you not recall what those bridge foundations were worth per yard?—A. I think $12 a yard, perhaps.

CHARACTER OF COUNTRY EMBRACED IN SECTIONS 44 TO 50.

Q. Do you remember the section of road embracing 7 miles, in sections 44 to 50, this side of Colfax?

The WITNESS. West of Colfax?

Commissioner ANDERSON. Yes, sir.

The WITNESS. Yes, sir.

Q. How did that country compare with the country you have described heretofore?—A. The material was much the same.

Q. How much work was required for clearing and grubbing there?—A. There was not as much as there was on the other.

Q. What, in your judgment, would have been a fair cost price per mile?—A. The actual cost, perhaps, $500 per mile.

Q. And as to the earth excavation, was it about the same quality of excavation?—A. That was much the same; yes, sir.

Q. Do you state the prices for the different kinds of earth excavation as being about the same?—A. About the same.

Q. That is 45 cents for the general run of earth, and running up to 75 cents for the more tenacious qualities?—A. Yes, sir.

PRORABLE COST PER MILE OF SECTIONS 32 TO 43.

Q. From Newcastle to Clipper Gap, sections 32 to 43, what was the character of that construction as compared with the road further east?—A. I think the work, the earth work, was much the same as the other.

Q. How about the clearing and grubbing?—A. There was not as much as there was on the other, as I recollect it now.

Q. And what would have been a fair price per mile there to cover the cost?—A. I should think that about $400 per mile would do that work.

FROM DUTCH FLAT TO THE STATE LINE.

Q. From section 68 to section 138, over to the State line, that is from Dutch Flat to the State line, what was the character of the grubbing and clearing required there?—A. That was heavy.

Q. Heavier than any other work you have described?—A. Yes, sir; heavier than any other work I have described.

Q. And what in your judgment would have been a fair price of grubbing and clearing there?—A. Two thousand dollars a mile.

Q. Do you take into consideration that where you had fills to make or tunnels to make there were no grubbing and clearing required?—A. Where the tunnels were would take out some portion of it, but there were some portions that were very heavy, and there was a great deal of work, that would cost more than twice as much—more than $4,000 a mile to do the clearing and grubbing.

Q. How about the earth excavations as compared with the other places? I mean what would fairly cover the cost of the earth excavations?—A. It was much the same as the other. There would not be much difference in the cost for moving the earth.

Q. Would it be from 45 to 75 cents?—A. I think so.

Q. How much would it be for blasting rock?—A. The prices there would be the same as the other; only there was so much more of it. Portions of it were very heavy.

Q. You also had to haul your material farther from your base of supplies, had you not?—A. We followed up pretty closely with the track, going into the mountains.

TRANSPORTATION ON THE EASTERN SLOPE.

Q. Do you state the price as being from $2.50 for ordinary rock, up to $6 and $8 for hard rock?—A. Yes, sir. Speaking of transportation, after we got to Cisco we hauled from there to the State line with wagons and sleighs. That made transportation very much greater on the eastern slope.

Q. Have you any paper or memoranda from which you can furnish us any information as to the amount of this work that was done on these sections?—A. No, sir; I have not.

Q. Have you any pay-rolls?—A. No, sir. The pay-rolls all went into the office, and I never knew what became of them. They passed out of my hands and that is all I had to do with them.

Q. The last portion of the estimate of Mr. Montague refers to that portion of the railroad extending from the State line to Stout's Ferry on the Truckee River. That was not embraced within the Crocker contract, was it?—A. As I recollect it, it was not.

Q. Was that within the Contract and Finance Company's contract?—A. Yes, sir.

SUMMARY OF ESTIMATE FOR CROCKER'S CONTRACT.

Commissioner ANDERSON. I will state for the information of this Commission that the summary of the estimate shows that the work embraced

within the Crocker contract from section 32 to the state line was $
493,381.10.

By Commissioner LITTLER:

Q. How many miles does that embrace?

Commissioner ANDERSON. Sections 32 to 138—107 miles.

By the CHAIRMAN:

Q. Is there anything that you want to say that Mr. Anderson
omitted to ask you?

The WITNESS. With regard to building that road over the mou
ains?

The CHAIRMAN. Any information that you desire to give the C
mission, it will be glad to have it.

GENERAL HISTORY OF DIFFICULTIES ENCOUNTERED.

A. Of course the construction of that road, in doing the work as
did, pushing it, without regard to cost, through the three worst wint
that ever were known in the Sierra Nevada Mountains, made it v
expensive. The winter of 1865–'66 was a very wet winter; it was
ribly muddy. It was impossible to haul goods to the amount requi
for our use, and we were obliged to pack it over the mountain trai
and we had to pack bales of hay, even, a distance of 25 miles on anim
and pretty nearly all of our supplies for four or five months were f
nished them in that way. Then during the two following winters
were in the snow belt of the Sierras, and the entire fall of snow was
least 40 feet.

Q. Will you state whether you constructed snow-sheds as you we
along?—A. None; no, sir.

Q. How did you protect the road from snow as you progressed
that time?—A. There was a good deal of the winter that the road
blocked, and then in those bad winters we did not keep it open.
the last year, when we built to the Summit, we did not pretend to k
it open, but let it block. We hauled over that snow to Donner La
the material for a railroad track of 40 miles, with all of the trimmin
three locomotives and forty cars. We built 40 miles of railroad in
Truckee Cañon before the connection was made by way of the Summ
We took our men to Truckee Cañon during those two last winters,
cepting the men who could be worked in the tunnels. The snow w
not so deep there but that we could grade. We brought them ba
in the spring and cleared away the snow 10 or 12 feet down, and we
to work and graded. In that manner we forced our way across t
mountains at an enormous cost. It cost nearly three times what
would have cost to have done it in the summer-time when it shou
have been done. But we shortened the time seven years from wh
Congress expected when the act was passed. The snows were so gr
that we could not maintain a clear track from the tunnels, and we
compelled to make snow tunnels sometimes several hundred feet fr
the dumps to the face of the tunnels, and also to the camps. The sn
slides carried away our camps, and we lost a good many men in tho
slides; many of them we did not find until the next season when t
snow melted. This material that we hauled from Cisco we hauled
Donner Lake on sleighs, and then reloaded it on to wagons and haul
it over a muddy road to Truckee, and there we commenced laying t
track, and laid 40 miles in that way.

By Commissioner LITTLER:

Q. The cost of this labor in the snow and teaming by wagons was no part of the estimate of the cost of the construction, was it?—A. I do not think it was.

Q. Have you any idea what that item cost the company?—A. No, sir; I have not. It must have been very great.

WITNESS'S STATEMENT ANNEXED TO LELAND STANFORD'S TESTIMONY.

Mr. COHEN. I suggest to the Commission that Mr. Strobridge has made a sworn statement which is annexed to the deposition, if I may so term it, of Governor Stanford, and it is marked "Exhibit No. 10." I will ask to have it noted here, so that it may be referred to.

The CHAIRMAN. Yes, sir; we understood that. I thought perhaps there was something else to add to the statement already submitted.

Mr. STANFORD. Mr. Strobridge is here now on the stand, and do you not want to ask him about the difficulties, after we passed Truckee, in the transportation of men, animals, supplies, and water?

Mr. COHEN. Yes, sir. I will come to that in a minute.

The WITNESS. Excuse me. I understood the Commissioner to say, when he referred to my making any statement, that it was in addition to the sworn statement that I had made. That pretty nearly all enters into that sworn statement.

Commissioner LITTLER. I did not know that you had made that statement.

Mr. COHEN. It is annexed to Governor Stanford's statement, marked "Exhibit 10."

COST OF CONSTRUCTION RECITED IN EXHIBIT 10.

The CHAIRMAN. Have you not set out all the facts in the exhibit that you furnished to Governor Stanford in relation to the construction of the road, other than the facts that you have already stated?—A. I think so.

Mr. COHEN. I think it is pretty much all in there.

The WITNESS. I recollect one item there, where I said we hauled water 40 miles. I neglected to say that we hauled it in wagons. We hauled hay very much farther.

Mr. STANFORD. I would like you to state if we did not do a great deal of night work and in the open air.

The WITNESS. We did in heavy points along the Humboldt; we worked shifts night and day, both in the mountains and in there.

Mr. COHEN. I will call your particular attention to this question, which the Commission have submitted to the Central Pacific Railroad Company——

The CHAIRMAN. Not the Commission; which Congress has submitted in the act.

Mr. COHEN. Which an act of Congress has submitted to be answered by the witnesses who have appeared before the Commission. It is question 51:

Also to ascertain the comparative cost of construction of said roads as compared with what they would have cost with the prices of labor and commodities prevailing five years preceding and five years subsequent to the completion of said road.

ANSWER QUALIFIED AS TO PRESENT COST BEING 30 PER CENT. LESS.

Q. Can you, from your general knowledge of the subject, make any estimate of what the Central Pacific Railroad from Sacramento to Prom-

ontory would have cost five years preceding the time you did the work or five years afterwards? I do not ask you now with reference to the vigor with which the work was pushed, as I will come to that in a separate question.—A. I do not know but that I would qualify one answer I made you this morning about the 30 per cent. less. In answering that question I did not refer to the cost of material. It was in regard to the construction of the work without regard to the cost of rails and material. I did not in that answer intend that that should cover the cost of rails and track materials.

By the CHAIRMAN:

Q. What did you intend that should cover?—A. That that should cover the construction of the work aside from the machinery and track.

Q. What do you mean by machinery?—A. Locomotive.

Q. Aside, then, from the track and equipment?—A. Yes, sir.

By Mr. COHEN:

Q. In the answer you made to the chairman this morning when you said that it cost 30 per cent. more, that was an estimate applying only to the labor, and not to the cost of material?—A. Not to the cost of material; that is to say, it was not intended to cover the track and the rolling stock.

COST FIVE YEARS BEFORE AND FIVE YEARS AFTER COMPLETION.

Q. Coming back to the question I originally put to you: What, in your judgment, would the Central Pacific Railroad, from Sacramento to Promontory Point have cost five years before the time it was constructed, and five years afterwards, with reference to the amount it did cost to construct?

Mr. STANFORD. I take it from what I hear, that in making that estimate you did not take into consideration at all the extra cost consequent upon the rapidity of construction, but merely the cost of labor then, as compared with what it could have been done for since. I wanted that fact understood that in the 30 per cent. they did not take into consideration the rapidity, and the extra cost on account of that.

The WITNESS. I understood that to be the question I answered. The question as I understood it was that it was under the same conditions that that was built, and with the same seasons that we had at that time; and I so answered it. Is not that the way that it appears?

The SECRETARY. I think so. That is my recollection of the testimony.

Q. How, then, will you answer my last question?

Question read, as follows:

Q. What, in your judgment, would the Central Pacific Railroad, from Sacramento to Promontory Point have cost five years before the time it was constructed, and five years afterwards, with reference to the amount it did cost to construct?

The WITNESS. By your question do you mean what it would cost five years before, or five years after it was built?

ESTIMATE OF COST FIVE YEARS AFTER COMPLETION.

Mr. COHEN. We ask for the two estimates.

The WITNESS. I do not know what it would have cost five years previous to the building. I know about the price of labor and everything else five or six years afterwards.

Q. Will you answer that part of it, if you cannot the other?

The WITNESS. Do I understand you to mean from the time that we commenced and extending it five or six years later?

Commissioner LITTLER. The time from the completion is what the act of Congress calls for.

The WITNESS. Five or six years later, the conditions being the same, to work it the same as we did, and in the same kind of winters through the snow? I must know whether we could take our time five or six years later, and build it as we ordinarily would build a railroad, or take it just in the same way we would to build any road.

Mr. COHEN. Take your time to build it, as you ordinarily would build a railroad?

A DECREASE OF 70 PER CENT.

The WITNESS. I think that road could have been built for 70 per cent. less five years afterwards, taking our time to build it.

By Mr. BERGIN:

Q. Will you state in percentages? State what the difference on percentage was on account of the expedition with which the work was done from what it would have been had the work been done in the usual business way?—A. Well, that is taken into account in the former question and in the former answer. If we had our time to build it, five or six or seven years later, I think we could have built it for 70 per cent. less than we did at the time and in the way we did build it.

Commissioner ANDERSON. When you say 70 per cent. less, do you mean cost only 30 per cent. of the actual cost?

The WITNESS. Yes, sir; I think it cost 70 per cent. more to force it through the storms and mud than it would to have taken our time and built it as we might have done and with the decrease in the price of everything. Now comes in the price of material, rolling stock, and everything else, as I understand the question.

COST AFFECTED BY DIFFERENCES IN THE SEASONS.

By Mr. COHEN:

Q. Taking the view that you built it five years later, but that you built it just as expeditiously as you could have built it, what would have been the difference?—A. I cannot tell.

Q. Pushing it just as fast as you push the actual construction when you did construct it, what would it have been?

Commissioner ANDERSON. With the same winters and the same snow.

Mr. COHEN. Taking it five years later, whatever it was. I do not know what Congress means.

The WITNESS. The different winters in those mountains vary greatly in the fall season. In some winters there is very little snow, and in other winters the snow will fall 40 feet. I would want to know whether it was a winter when there was much snow, compared with others, or less.

Q. The estimate that you have made is upon the work that was done up to the laying of the last rail at Promontory Point, in May, 1869, was it not?—A. Yes, sir.

Q. The cost of construction of the Central Pacific Railroad was not terminated with the laying of the last rail, was it?—A. It was not; no, sir.

Q. Was a good deal of work done for several years afterwards?—A. Yes, sir.

Mr. BERGIN. When was it accepted by the Government?

Mr. COHEN. In 1873 or 1874.

MR. MONTAGUE'S QUALIFICATIONS.

Q. You have been asked several questions upon the approximate estimates made by Mr. Montague. You have been asked to express to the Commission your opinion of Mr. Montague. Do you know of any other railroad of this character that was constructed by Mr. Montague before he became chief engineer of the Central Pacific Railroad Company?—A. No, sir; I do not think he ever constructed such a road as that.

Q. Do you know of any road that he did construct as chief engineer before he became chief engineer of the Central Pacific Railroad Company?—A. I do not think he ever was chief engineer. He was a young man when he came here.

Q. Did he become chief engineer after the death of Mr. Judah?—A. Yes, sir.

Q. And acquired a great deal of experience in building this road?—A. Yes, sir.

CONTRACTS WITH DIFFERENT CONTRACTORS UNSATISFACTORY.

Q. So that at the time of his death he was really a very talented and capable engineer, was he not?—A. Yes, sir; and a smart man. He had, from his own statements, no experience in mountain work at the time he commenced that road.

Q. You have been asked various questions about the contracts that were let to Charles Crocker & Co. and the Contract and Finance Company. I will ask you, first, as to the contracts let to Charles Crocker & Co. Would it have been possible for you to have properly performed the work over the mountains, say from Newcastle to the State line, if that work had been let in sections to different contractors, each working independently of the other?—A. The company tried that experiment on the work west of Newcastle.

Q. What was the result?—A. It was not satisfactory, and it became necessary to put the work into one contractor's hands to control the whole of it and control men. Otherwise, when men were scarce one contractor overbids another until there was no end of it.

Q. What was the character of that work in the way of excavation and filling? Was it necessary that it should be all under one management over the mountains?—A. If you were not in a hurry it could be let to small contractors well enough.

THE WORK OF THE CONTRACT AND FINANCE COMPANY.

Q. As to the work let to the Contract and Finance Company, I desire to bring out the fact that you have stated in your last answer, that it would have been impossible to have built that road within the time it was built if you had to rely upon the offers of different contractors?—A. That could not have been done.

Q. I understand that it would have cost more to construct if different contractors were bidding against each other for labor. The same would have been the case with respect to material, would it not?—A. It would with labor.

Q. So that the total cost would have been very much increased?—A. The company would be obliged to furnish the material, even in dealing with small contractors. The great point with small contractors was that one would be trying to get men from the other.

By Commissioner ANDERSON:

Q. The company did furnish the material to Crocker & Co. and the Contract and Finance Company, did it not?—A. I believe so; yes, sir.

NECESSITY OF CONTROLLING THE WORK IN ADVANCE.

Mr. STANFORD. State to the commissioners the fact that oftentimes it was important for the contractors to be able to control the whole work a long time in advance, in order that construction might not be delayed.

The WITNESS. Yes, sir; I would have spoken of that before, but that comes within the statement. For instance, they sent up to Truckee Cañon, to what is called the Palisades, a force of three thousand men, a distance of 300 miles in advance of the completed line, in order to get some heavy work there out of the way before the track could reach there.

Mr. STANFORD. And then the supplies were moved by wagons.

The WITNESS. Yes, sir; everything was moved there by wagons. That is mentioned in my other statement. Everything was hauled there. There was no forage of any kind along the entire road.

HAULING WATER FOR LABORERS AND ENGINES.

By Mr. COHEN:

Q. During the time that you were constructing the road through the State of Nevada, were you compelled the most of the time to haul water for the use of laborers and engines?—A. In places, yes, sir; a good deal, especially across the desert.

Q. How about fuel?—A. Fuel mostly had to go over the Sierra Nevada Mountains.

Q. Was there any drinking water except that which was brought there by train?—A. A part of the time there was not, and a part of the time there was. Water in many places was scarce and was carried a long distance.

TRANSPORTATION OF RAILS, TOOLS, AND SUPPLIES.

Q. During the construction of the road at different places you did not receive rails as fast as you wanted them, and you were compelled to move along and grade the track without completing it, were you not? You had to haul your tools and supplies with wagons, did you not?—A. When we sent a force of men ahead like that, we hauled long distances, but going through the States of Nevada and Utah, I think that the rails, with the exception of delayed trains, came up pretty promptly.

Q. How was it on the mountains? Did you not haul over the mountains by wagon teams?—A. We hauled 40 miles over the mountains, a distance of 28 miles from Cisco to Truckee.

SMALL CONTRACTORS WOULD HAVE DELAYED THE WORK.

Q. Taking a general view of the situation, would it have been possible to have completed the road within the time that you did complete it, or at the same cost, if those contracts for labor and material were made to various bidders?—A. No; it would not. As I think I stated, if the work could have been done slowly there would have been no difficulty in giving the contracts to different contractors, with plenty of time, but for speed the work had to be under the control of one man.

Q. For speed the control of the work should be under one man, and that construction should be left to one solvent bidder?—A. It was so considered at the time.

IMMENSE COST OF SURMOUNTING THE MOUNTAINS.

Mr. STANFORD. You want to bring out one thing here—the immense cost of getting over the mountains and the time expended. If there had been any consideration of expense we would not have gotten over those mountains for two or three years as early as we did; working with a large force of men at every available point, with the long and severe winters, working night and day, so that the road might be completed in the time it was. No small contractors would have done those things or made the sacrifices. Nobody could have made the sacrifices as the contractors made them. But the Central Pacific Railroad Company itself could afford to do those things for the sake of speed. It did not hesitate at any sacrifice. Mr. Strobridge knows all about that, and I wish that you would ask him about it.

SACRIFICES MADE TO OBTAIN SPEED.

Q. You have heard the suggestion of Governor Stanford. Will you give your views upon that situation?—A. Yes, sir. The facts were that we did, at heavy points and on heavy rock, and earth points also, work a force night and day, which was much more expensive than to have done the work in daylight. In this way we forced the work to a completion across the mountains two or three years earlier than we otherwise would have done it.

Mr. STANFORD. Was there not much material wasted and borrowed; more than would have ordinarily been required?

A. Yes, sir; we borrowed and wasted much material in that way for the sake of speed, which increased the cost.

Q. You put on all the men you could obtain, without regard to the economy with which the work could be done, did you not?—A. We put all the men on the work that we could get, and worked them on those heavy points, without regard to economy, in getting out that particular piece of work.

Q. Your mode of construction was such that you were looking more to time than to the cost of the work; is that so?—A. Yes, sir.

By Mr. STANFORD:

Q. That is the main point, but I will ask this: whether, for the sake of speed, economy in the cost of construction was ever considered?—A. No, sir; it was not.

Q. But in every other way, excepting where speed was concerned, you economized as much as possible in every expenditure; is that so?—A. That is so.

THE SUPERVISION OF THE WORK.

By Commissioner ANDERSON:

Q. Had you and Mr. Arthur Brown substantially the supervision of this work?—A. Mr. Brown had the building of the bridges. He had nothing to do with the balance of the work.

Q. But you and Mr. Brown covered the entire supervision, did you not?—A. Yes, sir.

Q. Was there anything that made it impossible for you and Mr. Brown to have conducted this work for the corporation itself, under the direction of its engineers, rendering the bills of actual expense to the Central Pacific Railroad Company instead of rendering them to Crocker & Co.?—A. We could have so done.

Q. And would it have been done just as efficiently under substantially the same instructions?—A. There was no reason why we could

not work for the railroad company as well as for C. Crocker & Co., so far as I was concerned.

THE ROUTE FOLLOWED.

Q. In the Montague estimate that I have referred to I find that his estimate of the cost of a portion of the road from Dutch Flat to the State line refers to the road from Dutch Flat to Bear River, and from Bear River to the South Yuba, and from the South Yuba to Hall's Cañon. Is that the route that was followed?—A. Yes, sir,

Commissioner ANDERSON. From Dutch Flat to Bear River, from Bear River to the South Yuba, from South Yuba to Hall's Cañon, from Hall's Cañon to Summit Valley; in Summit Valley: from Summit Valley to the Sierras, from the Sierras to Strong's Cañon, from Strong's Cañon to Truckee, and down the Truckee to the State line?

The WITNESS. Yes, sir; that is the line that was followed.

CONDITIONS OF CONTRACTS.

Q. You stated that the Central Pacific Railroad Company itself purchased the materials, the locomotives and the cars, that were to be furnished by the Contract and Finance Company and by Crocker & Co., and charged them the cost of the material so purchased. Is that the way you understand it?—A. I understand it that way.

Q. Did you understand that Crocker & Co., or the Contract and Finance Company were to furnish the rails?—A. Yes, sir.

Mr. COHEN. Its rails and equipment in full. It says so in that contract.

The WITNESS. That is my understanding of it.

Q. I refer to the contract from section 32 to 138. Were Crocker & Co., to furnish the rails for that portion?—A. That is my understanding of it, that the company would buy them and furnish them to them at cost.

CONSTRUCTING THE CALIFORNIA AND OREGON FROM DELTA NORTH.

Q. It does not so appear from the books. You are now engaged, are you, on the construction of the California and Oregon from Delta to the north line of the State?—A. Yes, sir.

Q. And how nearly complete is that work?—A. I think it will be completed before Christmas.

Q. How much remains to be done?—A. About 14 miles.

Q. This side of the State line?—A. On the other side.

Q. How much remains to be done this side of the State line?—A. The track is laid to the State line.

Q. Is the grading complete?—A. Yes, sir.

Q. Is the ballasting complete?—A. No, sir; it is not complete.

Q. Are the bridges built?—A. I think they are.

Q. Do cars run to the State line?—A. Yes, sir.

Q. Do they carry passengers to the State line?—A. Yes, sir.

Q. What part of that work have you attended to?—A. I am superintendent of construction, practically the same as it was on the Central Pacific.

Q. Do you employ all of the laborers and mechanics?—A. I employ all of the laborers, not all of the mechanics. Mr. Brown builds the bridges there the same as before.

Q. Do you report to the Pacific Improvement Company?—A. Yes, sir.

Q. How much has it cost so far to build that road from Delta to the State line?—A. I do not know.

Q. Can you approximate?—A. I do not think so, with any accuracy.

Q. What are the difficulties in the construction of that road?—A. It is a very broken country. We follow the Sacramento Cañon for 60 miles, and the work, much of the way, or most of the way, is heavy.

Q. Are there many yards of rock excavation and earth excavation?—A. Yes, sir.

ESTIMATED COST OF CONSTRUCTION.

Q. What does it cost you now per yard to excavate earth upon that road?—A. Well, I do not know that; I reckon 30 cents.

Q. And what does it cost you to excavate rock?—A. Just $2.

What does your bridge masonry cost you?—A. It costs from $12 to $16 per cubic yard.

Q. What do your ties cost you there?—A. I think forty cents now. Many of them we are now having cost, I think, about 50 cents out in the mountains.

Q. In that country?—A. Within 60 miles of where we are working at the present time; about 60 miles, more or less.

Q. Do you have to pay anything for the hauling in addition to the 40 cents, or does that cover the whole?—A. No, sir; they have to be hauled.

Q. What does it cost you per hundred?—A. I do not know that; I I think about 2 cents a tie.

METHOD OF PAYMENT.

Q. Who prepares the estimates, or how is the pay carried on? Is it on pay-rolls and vouchers?—A. Yes, sir.

Q. Who has charge of the auditing of these vouchers and pay-rolls?—A. I do the most of them.

Q. How is the payment made then? Is it by the presentation of these pay-rolls to the officers of the Pacific Improvement Company?—A. Yes, sir.

Q. Who is the person to whom you present the vouchers?—A. Mr. Douty is the secretary.

Q. Can you tell me what that road has cost per mile?—A. No, I cannot.

Q. The construction which you are now carrying on, all of it, has been done since last October, has it not?—A. Oh, no, sir.

DATE OF PACIFIC IMPROVEMENT CONTRACT.

Q. When was the contract made with the Pacific Improvement Company?

The WITNESS. I understood you to say from Delta.

Commissioner ANDERSON. From Delta to the north line of the State, omitting the small portion that had been constructed previously.

The WITNESS. Yes, sir; there was a little piece.

Q. And that was adjusted?—A. Yes, sir.

Q. In October, 1886, was it not?—A. Oh, no, sir.

Q. That is the date of the contract. When do you think you commenced doing that work for the Pacific Improvement Company?—A. I cannot tell.

Q. Why can you not tell us the cost of that road, if you audited all of those bills yourself?—A. I have not been through the books, and I do not keep any accounts, but I can tell by reference to the books.

Q. But as a railroad man, I should judge that, though you could not give the exact dollars, you could say that 104 miles of road cost about

so much per mile.—A. I have not attempted to keep the run of it, and have no data from which to make the statement.

DELIVERY OF ROLLING STOCK

Q. Has the rolling stock called for by the contract been delivered?—A. I do not know whether the whole of it has or not.

Q. Has any of it been?—A. I think so.

Q. Do you not know; you are on the road there.—A. We have lots of rolling-stock which I understand is charged up to the company.

Q. Charged up to what company, the Pacific Improvement Company?—A. Yes, sir.

Q. Delivered by whom? Delivered by the Central Pacific Railroad Company?—A. Or the Southern Pacific.

Q. Is it new or old rolling stock?—A. We have new rolling stock coming all of the time.

Q. Who has charge of that department?—A. That comes into the secretary's department.

Q. Secretary Douty?—A. Yes, sir.

Q. Who has charge of it on behalf of the Southern Pacific Company?—A. I do not know.

ACCEPTANCE OF ROAD WHEN COMPLETED.

Q. Who accepts the road when completed?—A. The commissioners.

Q. I mean who accepts it on behalf of the Southern Pacific Company?—A. I do not know that.

Q. You know that you are building it under a contract between the Southern Pacific Company and the Pacific Improvement Company, do you not?—A. Yes, sir. I infer that when it is accepted by the Government commissioners, it is accepted by the company.

Commissioner ANDERSON. Do not let us get confused. This road is not being built under Government aid at all.

The WITNESS. I know it; but it is accepted by Government commissioners, all the same.

Q. Is your impression then that the action of the Government commissioners with reference to the land grant determines its acceptance by the Southern Pacific Company?—A. I think so.

WHO REPORTS DELIVERY OF ROLLING STOCK.

Q. That would have no relation whatever to the delivery of the rolling stock. Do you know who on behalf of the Southern Pacific Company certifies that the rolling stock called for by the contract has, in fact, been delivered?—A. No, sir; I think not.

Q. Do you know who on behalf of the Pacific Improvement Company is required to report the delivery of the rolling stock and locomotives?—A. I do not.

By Mr. COHEN:

Q. What do you say is the distance from Delta to the State line?—A. I do not recollect.

Mr. COHEN. It is 104 miles, more or less, is it not?

Commissioner ANDERSON. Yes; it is 104 miles.

CHARACTER OF COUNTRY COMPARED WITH THE SIERRA NEVADAS.

Q. What is the character of the country through which this California and Oregon Railroad runs, this side of the State line, with reference to its being mountainous, and with reference to the work to be done upon it?—A. Portions of it are mountainous and portions are not.

Q. As to the work to be done on portions of this line, and the quantity of materials and labor necessary, is it as heavy as the work was that was done in going over the Sierra Nevada Mountains?—A. Some portions of it are as heavy as any of the work on the Sierra Nevadas.

COST OF LABOR.

By the CHAIRMAN:

Q. What are you paying for labor?—A. We are paying to Chinese $26, and we are paying $26 also for white labor. The Chinamen board themselves, and we board the white men. That is, for common laborers.

By Mr. BERGIN:

Q. At the time this contract was let to C. Crocker & Co., and when the contract was made with the Contract and Finance Company for the doing of the work called for in those respective contracts, would it have been of any practical good to have publicly invited or asked bids for the performance of this work?—A. There was no company, I think outside of the company that built it that could have undertaken to do it and carry it through as it was done.

By Commissioner ANDERSON:

Q. Do you mean no company in the world?—A. On this coast. Yes; there are companies in the world who could have done it I have no doubt.

NO INDIVIDUAL BIDS OFFERED.

By the CHAIRMAN:

Q. Were there any individual proposals at the time for the building of the road?—A. Not that I know of. I do not know whether there were or not.

Q. Did you ever hear of any complaint with reference to the rejection of bids?—A. No, sir.

Q. You never heard of any?—A. I never did.

Q. Were any bids called for or invited in any way?—A. I do not know whether there were or not.

J. H. STROBRIDGE.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Wednesday, August 10, 1887.

Afternoon session.

Mr. COHEN. I produce to the Commission the vouchers of the Central Pacific Railroad Company which they asked me for.

LELAND STANFORD, being further examined, testified as follows:

VOUCHER NO. 2569½.

By the CHAIRMAN:

Question. I show you voucher 2569½ for $171,781.89, indorsed as follows:

C. P. R. R.

No. 2569½, $171,781.89.
Name, Leland Stanford.
Disbursed to December 31, 1876.
Chargeable to general expense.
Allowed: February 7, 1876, by the board of directors, folio 163.
"I certify that the within account, amounting to $171,781.89, is correct.
"LELAND STANFORD."

The face of the voucher reads as follows:

Central Pacific Railroad Company to Leland Stanford Dr.

Dec. 31, 1875.	Bill attached	$171,781.89
C. P. R. R. Co. to Leland Stanford Dr.	Cash paid on account of general expense to December 31, 1875	137,365.50
C. P. R. R. Co. to Leland Stanford Dr.	Cash paid on account of general expense to December 31, 1875	34,416.39
Total		171,781.89

Will you please look at the voucher and explain to the Commission in detail the character of the expenditure covered by the amount named in the bill.

Mr. COHEN (to the witness). Have you any recollection of the contents of that voucher?

The WITNESS. No, sir; I do not remember. I presume it was made up of a great many items, but I have no recollection of this particular voucher.

THE WAY VOUCHERS WERE MADE UP.

By the CHAIRMAN:

Q. How did you make up that sum?—A. As to this particular voucher I could not tell you, because I do not remember. But I used to pay out money for the company one way and the other, and after a time I would pass in my accounts or rather vouchers, and it would be made up by somebody connected with the office, presented and allowed to me; and I presume this is one of that kind.

Q. Did you keep an account in your book of the expenditure of sums of money from time to time?—A. No, sir. I used to depend upon my checks for my vouchers.

Q. Have you your check-books showing the expenditure of that sum of money?—A. No, sir.

Q. Have you your check-book with payments made from time to time by you that afterwards were made up in that sum of money?—A. No, sir.

Q. Have you any accounts showing any detailed statement from which you took that sum of money in order to give a voucher to the company?—A. None at all.

PURPOSES OF EXPENDITURES.

Q. For what purpose would you make expenditures?—A. Well, I can tell you generally. Our main offices for a long while were up in Sacramento, and I used to be down here doing business for the company a great deal of the time. In those days I borrowed a great deal—all the money, I think, borrowed on this side I borrowed—and I paid out interest oftentimes, and renewed notes, and sometimes paid commissions for large amounts. Oftentimes I have borrowed millions of dollars down here, and overdrawn at the Bank of California, and they would charge up interest, and such an account as that would make one of the items. My account, when made up, would embrace all such things as that. And everything that I paid out for the interest of the company would be made up at the end of the term and be presented, and I would be credited with it in the aggregate. But as to these particular things during those years, unless I look back at the books showing when the expenditures have been made, I could not tell, nor could I tell the

amount except by looking at the books, and then I could not tell how that amount was made up; that is, I could not tell the items.

HOSTILE LEGISLATION.

Of course we had a good many agents at one time and another. We have had a great deal of legislation aimed at the company prejudicial to its interests. Sometimes if it had been consummated it would have been entirely destructive and the road would not have been able to operate. For the affirmative legislation of the company there was very little expense ever in the way of agents. I think that as to the main aid that we had for the company in the way of county aid and State aid all those years we did not have a single man around the legislature to look after our interests. I myself looked after it. At one time, when there was something pending in both houses of the legislature, Mr. Crocker looked after one. I asked him to come up to the legislature and look after it at the proper time and see about the bill when it came up. But we have not asked for much, I think.

THE MISSION BAY GRANT.

The Mission Bay matter here is all the affirmative legislation we have ever requested for the Central Pacific, and as to Mission Bay there was no material objection to giving it by the legislature, or at least no question, excepting as to quantity. The amount that they gave, the minimum, there was no trouble about. They gave the Southern Pacific before we had any interest in it, and when I say we, I mean myself and associates. Before we had any interest in the Southern Pacific there was an equal amount given to the Southern Pacific as to the Central Pacific in Mission Bay, expecting then that would be the real terminus of the two roads, and for their accommodation. We have used the bay down there somewhat, but it is far off and it is costly to fill it. I don't know how much it will cost, but a great deal of money has been spent on it, and it has been used only to a limited extent.

THE VOUCHER EXPLAINED TO THE COMPANY.

Q. Did you make any explanation to the company at the time that you presented that voucher?—A. I have no doubt that I did.

Q. What explanation did you give to the company?—A. Well, as I do not remember the items of it I cannot remember, of course, what explanation I may have given to the company. I do not think I went into the details of these things to the company further than to say I found it necessary to expend for the general interest of the company so much, and I do not think that they ever questioned me particularly as to the wisdom of the expenditure.

Q. But would you, as a business man, consider that a proper voucher to file for the expenditure of so large a sum as $171,000?—A. That would depend altogether on who the man was who was doing the business for me. There are some men I have entire confidence in; others I should criticise closely.

SPECIAL AGENTS.

Q. What men were doing that business at that time for you in 1875?—A. Oh, I could not tell you; there were different ones, and I don't know whom we had at that time. There were special agents.

Q. What special agents; I do not understand the term?—A. Well, men who would be making expenditures outside. Of course, there were

certain kinds of accounts and expenditures made that went through the books regularly—the books of the regularly constituted officers. Then there were others that I would authorize and accounts would be rendered which I would approve, or perhaps pay. Then I would return to the company the amount I had expended and they would allow me the back interest, whatever that was. I know that there was a time we used to pay 2 and 2½ and even 3 per cent. a month for money here and I think the rate never got down to 1 per cent. until after the Bank of California was established when they brought the rate down to 1 per cent.

OVERDRAWING ON BANK OF CALIFORNIA.

Q. What objection would there be to returning the rate of interest that you had been paying for the company?—A. Well, the only voucher that I would have for it, perhaps, would be this: For instance the Bank of California would charge up once a month the interest on the overdraft. I was almost always overdrawn there. I have been overdrawn in very large amounts in that bank. The bank itself, the principal managers, were very well acquainted with our affairs. They were personally well acquainted with us in our relations. They were sufficiently acquainted to know whether it was safe to lend us money or not, so the only thing that Mr. Ralston used to tell me sometimes was, especially towards the last when there was less money, that if I wanted to draw for large amounts it would be well to let him know in advance. That was about the only limitation that they made. I know that I was overdrawn there once over $1,300,000.

By Commissioner ANDERSON:

Q. Do you mean your own account, or the account of the company?—A. My own account. Of course, it was mostly for the benefit of the Central Pacific Company, or the Contract and Finance Company very likely; I do not remember which now. But I did whatever business those companies had, pretty much, down here. I paid freight sometimes, and I guess I paid damages. I do not know whether in that big disaster I paid the damages down here or not.

HOW WITNESS'S ACCOUNTS AGAINST COMPANY WERE MADE OUT.

By the CHAIRMAN:

Q. Why would you charge that to general expense, and not to the interest account?—A. Without keeping run of the bills, I knew this: I generally made some kind of a mark on my checks to specify what they were given for, so that some one man around the institution would take my whole batch of checks, some of which would be in reference to my private matters, and sort them out. Those that were for the railroad company they would throw out, or put them by themselves, and then figure up the amounts that were due to me. They would then allow me from the date of the check up to the time that the account was balanced interest at the rate the bank had charged. It was 1 per cent. for a part of the time. So that I could settle all my affairs without reference to the bills that I might be carrying around in my hat or in my pocket. I generally had them in my pocket. In that way I generally had credit for the amounts I had paid out. I generally had my book written up, and that will appear by the interest charged there on the over-drafts. For that there is no voucher, excepting, I suppose, the mere entry on

the book for the interest. I do not now remember, but I suppose that to be so.

WAS ANY PART OF THE $171,000 USED TO INFLUENCE LEGISLATION?

Q. Was any part of the $171,000, the sum named in this bill that I have handed to you (and that you now have), paid for the purpose of influencing legislation?

Mr. COHEN. We object to the question, for the reason that the witness says that he does not remember what constituted the items composing this voucher, and upon that point, as to any questions the Commission have asked, or may be disposed to ask, this witness, we shall advise him not to answer. We do it upon this ground:

We are perfectly willing to account to the Government for its proportion of any voucher that is produced, or any entry upon the books of the company that is unexplained, and therefore we cannot see that it will make any difference what we did with the money—whether we threw it into the sea or wasted it in any manner or form. I say for myself, as counsel, and I believe I express the views of my clients, that we regard these questions as simply seeking to pander to a public scandal that cannot have any bearing whatever upon the purposes, or power, or inquiries of this Commission.

Q. I repeat my question: Was any part of the sum named in the vouchers submitted to you paid to any agent or individual for the purpose of influencing legislation?

Mr. COHEN. If you do not know it, you cannot answer the question.

NO DIFFERENCE TO GOVERNMENT WHAT COMPANY DID WITH THE MONEY.

A. I told you I did not know anything about this, but then I shall act upon the advice of my counsel. I do not suppose it can make any possible difference so long as we account for the money. If the Government is not satisfied with the vouchers which we present, whether the money was expended or wasted or anything of the kind, it can make no possible difference, because if it went into the sea, if I had used this money improperly or thrown it away, I might be accountable to the stockholders for my trust, but the Government cannot have any more than the money, and the company is willing to account for that, if you are not satisfied with the action.

Q. Do you decline to answer my question?—A. Under the advice of counsel, I do, any further than I have answered it.

HOW BILL ATTACHED TO VOUCHER WAS MADE UP.

By Commissioner ANDERSON:

Q. In whose handwriting is the bill attached to the voucher?—A. That is Mr. William E. Brown's.

Q. Do you know from what source he derived those figures?—A. He derived them from the papers that I submitted to him.

Q. Do you mean books or papers?—A. As to that I cannot say. I may have had a memorandum book, but the probabilities are it was made up from the checks; it may possibly be from bills. It is a very large amount and I cannot call to mind at all the circumstances connected with that voucher, or why it was; but it was such papers as I had, whatever they were, that it was made up from. I do not think that my account was ever made up without my having at the time a voucher for it.

Q. Where did Mr. Brown make up this bill; at your private house?—A. No, sir; down at the office.

Q. At the office of the company?—A. Yes, sir.

Q. And you delivered to him the material from which he made up these figures, whatever it was?—A. Yes, sir.

Q. What did he do with that material after he had completed the bill?—A. I think, as a rule, he gave it back to me. Almost always when my bank book was written up there would be found checks that were my own, on my own private business. I had a good deal of private business, and he used to separate those checks and give them back to me, I think, after the accounts were allowed.

SORTING THE CHECKS.

Q. And do you think that this sorting of what belonged to you from what belonged to the company was made from your checks or from the stubs?—A. No, not from the stubs; but from the checks themselves.

Q. Would you prepare the account first from the checks or would he?—A. No; I would give the checks to him. Generally I would look them over myself, and I would throw one in one pile and one in another, and then I would give him those that were for the company, and those that were not he had no occasion to examine.

Q. On what bank were those checks drawn?—A. Mostly on the Bank of California.

Q. And were they drawn on your private account?—A. Yes, sir. I do not think in those days that the company had any account at any of these banks. We used to borrow money largely, and we gave our notes for it. I say *our* notes. That is, sometimes it was my individual note and sometimes the note of Mr. Hopkins, or of one of the others.

CHECKS DRAWN ON BANK OF CALIFORNIA.

Q. How does the answer stand as to the name of the bank? The only question is on what bank those checks were drawn which you gave to Mr. William E. Brown.—A. In the earlier days, I think (at any rate, in the earlier history of the road and prior to its completion), most of the money that was borrowed down here, if not all, was borrowed in our individual names.

Q. I am not inquiring about that, but only about the bank on which these checks were drawn which were handed to Mr. Brown.—A. I think at that time the only bank that I drew checks on was the Bank of California; but Mr. Cohen here is familiar with the matter, and he has sometimes paid out money for us. He says that the company itself had accounts here at the bank, but I am not able now to recall that to mind.

Q. Are you positive that the checks which Mr. Brown was in the habit of sorting, and from which he made up this voucher, were the checks of Leland Stanford?—A. There were no other checks—that I am sure of—excepting, I think, there were a few times when Mr. Cohen himself paid out money on account of the company and had it charged to my account.

Q. Was this as early as December, 1875?—A. As early as that, yes, sir. Sometimes when I was not here he looked after the affairs, and sometimes he gave his own check to charge to my account on the Bank of California. Sometimes I would tell Mr. Ralston that I would have such things coming due and for him to take care of them, and he would

take care of them; and sometimes I would give a bank check to b charged into my account.

METHOD OF KEEPING WITNESS'S BANK-BOOK.

Q. How often was it your practice to have your bank-book mad up?—A. That depended very much on whether I needed the money o not.

Q. I mean, how often was your bank-book written up?—A. I woul have it generally written up when I wanted some money for myself, o my account was getting short. What I had paid out for the compan would then be credited to me. I know in one case it was over a yea before the account was written up. But generally, I guess, it was writ ten up about every three or four or five or six months.

Q. You made your deposits in the usual way, on pass-books, I pre sume?—A. Yes, sir.

Q. And who keeps your stub entries?—A. Sometimes one of th clerks. I would tell him to fill out a check for so much money. But as a rule, I filled out my own checks.

Q. How long would a check-book last you?—A. It depended. Ther were different sizes of check-books, and in twenty-five years I shoul not wonder if I had used up a good many books.

Q. Have you in your possession any of the stubs of these check-book that you have used for the last twenty years?—A. I do not think I hav one.

Q. Have you in your possession any of the checks?—A. I do not thin I have any of those.

PASS-BOOKS, CHECK-BOOKS, AND CHECKS DESTROYED.

Q. Have you in your possession any of the pass-books?—A. No. may have one; yes.

Q. That one that you are using now, you mean?—A. Yes, sir.

Q. Did you dispose of those books at one time or at various times?— A. After a time I threw those things generally into the fire. I used t have a cleaning up about once a year, and when I would be going away I would overhaul my papers and things, and what I did not want to keep I would destroy.

Q. When do you recollect destroying your checks?—A. Almost every time when I went away; that is, when I went off to be gone some time and when I was going away to Europe. I have been to Europe three times within the last few years, and in each case I cleaned up, and would keep only such papers as, in case I never returned, I cared that other people might see.

Q. Have you in your possession no returned canceled checks?—A. No. I destroyed some not long since.

Q. How long since?—A. I may have a few since my book was writ ten up, but no considerable number.

Q. Then you make it a practice to destroy the check-books, pass-books, and the checks?—A. Yes, sir.

LAST TIME WITNESS DESTROYED CHECKS AND STUBS.

Q. Please specify when you recollect was the last occasion on which you burned your checks and stubs, or destroyed them in whatever way you selected.—A. Some of them I destroyed since my return from Washington.

Q. When was that?—A. That was in April.

Q. How many checks do you remember then destroying?—A. I do not remember.

Q. Was it a large bundle?—A. I think that it must have been one or two or three writings up; perhaps twenty-five or thirty in a bundle.

Q. Covering a period of how long a time?—A. I cannot say exactly, but probably a year or two. I had not had occasion in the last two or three years to pay out many checks. My private business mostly has been conducted by my general manager, and I have not been giving the active attention to the finances of the company that I used to give, and there have not been so many checks in the past few years.

Q. What particular connection has the fact of your not doing the business of the company with the period at which you destroyed your checks?—A. Because I had no reason to draw checks, and I did not have many. I was not doing much, the financial business of the company being done by others, and my own private business being generally managed, and my accounts being all paid by my general manager.

Q. Can you tell me why this voucher contains two separate items, one for $137,365.50 and the other for $34,416.39?—A. I cannot tell you anything more than what I say. I have not the least recollection of that voucher or when it occurred.

WHERE WITNESS SPENT THE WINTER OF 1875-76.

Q. Do you remember where you spent the winter of 1875-'76?—A. I was here. I might have been over in New York, but I spend most of my winters here in California. Sometimes I was over east. This has been my home during the whole of these years, here at Sacramento and at San Francisco.

Q. Did the legislature of California sit during the year 1875?

Mr. BERGIN. It used to sit annually.

Commissioner ANDERSON. I thought they had biennial sessions.

Mr. BERGIN. They have biennial sessions since the constitution of 1862.

Q. My question is whether there was a session in 1875?—A. There was during the winter of 1876.

Q. Was there in 1875? This voucher is dated December 31, 1875.—A. I cannot remember the fact about the legislature of those times. That is, I do not remember the year. I cannot remember now whether it was the even years or the odd years that it sat.

Mr. COHEN. It used to commence on the first Monday of December.

Mr. BERGIN. That would be called the session of 1875-'76.

PROPOSED HOSTILE LEGISLATION.

Q. Do you remember whether there were any measures pending before the legislature of 1875 that your company had an interest in?—A. I do not remember that particular session, but I do not think that there has been any session—that is, from 1863 or 1864—that there was not some hostile legislation proposed. The fact is, that hostile legislation was proposed almost from the time that we commenced building the road. Even while we were struggling up the mountains there were desperate efforts made to destroy our credit in various ways, and among them was the plan to go to the legislature and offer bills such as probably would injure our credit. I do not think there was any legislation from that time until the legislature appointed a commission.

Commissioner LITTLER. Do you gentlemen agree as to whether there are annual sessions in this State or biennial sessions?

Mr. COHEN. There were annual sessions up to the amendment of the constitution in 1862, and then since that there have been biennial sessions. There was a session commenced on the first Monday of December, 1875, and that lasted until about April, 1876.

The WITNESS. I do not think there was any session up to 1880, at any rate, in which there were not more or less attacks made upon the railroad. Bills were very hostile.

COMPANY REPRESENTED AT SACRAMENTO.

Q. Was it the custom of the company to be represented at Sacramento before committees of the legislature?—A. Yes, sir.

Q. How many representatives did you have there?—A. I used to generally go there and spend a good deal of time when there was any very hostile legislation going on or proposed; I was up there, and I sometimes had one of our people and sometimes another; sometimes one lawyer and sometimes another.

Q. Please name the lawyers who were in the habit of attending the legislature with you.

Mr. BERGIN. I think that is equally objectionable with the other matter.

Commissioner ANDERSON. It is for you to say, gentlemen; I think not.

COMPANY WILLING TO ACCOUNT FOR CERTAIN VOUCHERS AS MONEY ON HAND.

The WITNESS. Unless it is really necessary I do not want to go into the details of anything of that kind. We often employed agents in a confidential character, and it was not advisable that others should know that they were in our service. I do not want to answer unless I am compelled to answer. I want to give you all the information that is in our power, by which you may understand under what obligations we are to the Government. If we have wrongfully disposed of any of the assets of the Central Pacific Company that could possibly affect its relations to the Government, I want you to know it, but where it is a matter merely between myself and my stockholders and directors, and it cannot make any difference in our relations to the Government, or what the Government may want to claim, because of a lack of proper vouchers upon which to base their 5 per cent. or 25 per cent., I do not want to do it. I cannot conceive that the questions that you are asking me can possibly affect our accounting with the Government, as long as we are willing to pay. If you are not satisfied with these vouchers, we say to you, say so, and we will account for them as money on hand.

COMMISSION DIRECTED TO ASK AS TO APPLICATION OF COMPANY'S FUNDS.

Commissioner ANDERSON. We are not at liberty to question the directions of Congress, and those directions require us to ask these questions. I may say, however, that it is not a question of what percentage you may pay to the Government, but it is a question of the effect on the power of the corporation to meet its obligations. These vouchers in all amount to several millions of dollars, and if you have misspent that money or if it has been misapplied, to that extent that decreases the power of this corporation to pay its debt. In addition to that, the

inquiry is addressed by Congress with reference to what it deems to be a misapplication of funds by the directors of this company, which it has a right to know. So that I must respectfully ask you to either answer or decline to answer.

The WITNESS. If you will read to me that command of Congress to the Commission, I can tell better; but I am not aware that Congress has any more to do with this company than any other creditor has who has not a matured debt.

Commissioner ANDERSON. We are directed further to inquire and report whether said companies, or either of them, or their officers or agents, have paid any money or other valuable consideration, or done any other act or thing, for the purpose of influencing legislation. Now, it is for you gentlemen to say what course you will take.

Mr. BERGIN. We have already answered in respect to these matters as specifically as it is practicable to do. Of course, we feel constrained to advise the Governor to decline to answer.

Commissioner ANDERSON. The other question was whether money had been used to influence legislation.

EXPENDITURES ENTIRELY IN INTEREST OF COMPANY—NO ILLEGITIMATE INFLUENCE.

The WITNESS. I must say that I have had many an argument before committees, and had many a talk, too, with the individual members of the legislature on behalf of the company, and I have tried to use all the influence I could in various ways. Now, I do not know that I ever used an illegitimate influence in any instance, and these expenditures, I have no doubt (and I presume every stockholder in the company has the same view), were entirely in the interests of the company; and that the Government has no more reason to find fault with those expenditures, if they knew exactly what they were, item for item, than they would be if we had paid out so much money for ties or iron.

Commissioner ANDERSON. We only ask to be put in possession of that information, and to be told what the moneys were paid for.

The WITNESS. I have tried to put you in possession of every information necessary to meet that requirement of Congress, and if I have not been able to do so, I am very sorry.

DECLINES TO ANSWER UNDER ADVICE OF COUNSEL.

Q. I will repeat the question as it was put before, and let these gentlemen say whether they decline to answer the question specifically or not: "Please name the lawyers who were in the habit of attending the legislature with you."

Mr. BERGIN. Under the advice of counsel, the witness declines to answer.

Q. Is that your answer?—A. Yes, sir. I will say further, that though I decline to give my information in regard to individuals, I do not think it will make any difference, and I know it cannot make any difference, in the result of our accounting with the Government.

Commissioner ANDERSON. I assume that you gentlemen are satisfied with the sufficiency of the refusal to answer.

VOUCHER FOR GENERAL EXPENSES.

By Commissioner LITTLER:

Q. This voucher appears to be a voucher for general expenses to December 31, 1875. What sort of general expenses would naturally be

included in this voucher?—A. I suppose anything for which I have pa out money that did not go through the regular course of the busine If I paid out freight bills, or paid interest accounts, and the intere had been charged to me upon the overdrafts of the bank, or if I ha paid a commission for the borrowing of money and had given my che to the broker or the attorney, I suppose such things as that would in it.

WITNESS NEVER CORRUPTED A MEMBER OF THE LEGISLATURE.

Q. Are you able to state to this Commission that any of this mon was paid for illegitimate or corrupt purposes; that is, to corrupt t legislature of the State of California, or any other State legislature, the Congress of the United States?—A. I have told you what I know that I do not remember about that account; but I can say this, that never corrupted a member of the legislature in my life, and I do n know that any of my agents ever did. So far as Congress is concerne I saw a statement there that the board of directors allowed my accou for expenditures made in Washington, or in various places. I do n know that I ever had any occasion to pay out any money at Washin ton except for my own private expenses.

NEVER WENT TO WASHINGTON TO INFLUENCE LEGISLATION.

Q. Was there any legislation pending before Congress during th session of 1875-'76 in which this company was interested?—A. I ca not remember the date. We have had business there; but I nev went on to Washington for the purpose of influencing legislation.

Q. Was there a controversy pending in Congress between this co pany and the Government about that time in relation to Goat Island?- A. There was no controversy.

Q. Was there a bill pending?—A. There was a bill. I do not kn about the year. We had a bill there, conceding to us the right to onto Goat Island; I do not know how far I ought to tell you, but I kn that if the company had expended money at that time they could ha had Goat Island.

GOAT ISLAND.

Q. Do I understand you that the company did not expend mon corruptly at that time?—A. Yes, sir. A member of Congress told m himself that $10,000 would give us the necessary vote. But I ha always been very glad since of the result. At first there was no co troversy. Goat Island had been regarded for many years as the prop terminus of the road. Let me tell you about this Goat Island matte We thought that we ought to get to Goat Island, so as to be as near this city as possible. There was no objection here by the newspaper There was no objection of any kind until one morning six gentlem met, three of whom happened to own an interest down near Raven wood, where it was supposed we might cross, and the other three h interests over in Saucelito, where it was also supposed that we mig cross. They got to talking and joking each other about being left o in the cold, and then the question was raised whether they could n do something to prevent it, and they did. They stirred up bitter fe ings here, saying that if we had Goat Island the city of San Francis was going to be ruined. That was why we did not obtain Goat Islan It was worth nothing to the Government and is worth nothing now the Government for defensive purposes. General Sherman has te

me that to fortify Goat Island would be about as wise as for a man to plant a cannon on the steps of his house to protect it. He told me that if ever a vessel got into this harbor it would use the city to make Goat Island surrender. That is, it would be in a position to fire into the city and Goat Island could not prevent it.

NO CORRUPTING OF OFFICIALS.

Q. Do I understand you to state to the Commission that from your personal knowledge of the items which go to make up this voucher, no part of it was expended for the purpose of corrupting officials of any kind?—A. To my knowledge there was no such thing. That is, I have no knowledge of corrupting any officials, or that anybody did do it. I certainly never corrupted an official in my life, nor attempted to. I would say that in this State I do not think there was any affirmative legislation sought by the Central Pacific. I do not remember any unless it was about Mission Bay; and there it was a question of amount, and not as to the propriety of it. As to affirmative legislation in behalf of the Central Pacific Railroad Company in Washington, there has been very little of that. I do not know of any, in fact, since the passage of the bill of 1864, and then again of 1866.

VOUCHER No. 1782½.

By the CHAIRMAN:

Q. I now show you voucher No. 1782½; the indorsement is as follows:

No. 1782½, $50,000.
Name, Leland Stanford.
For expenses and disbursements.
September 7, 1876.
Chargeable to expenses and credit Leland Stanford.
I certify that the within account, amounting to $50,000, is correct.
By LELAND STANFORD.
Inside.

Mr. COHEN. What year was that in?

The CHAIRMAN. That was in 1876.

The WITNESS. I suggest to the Commission that there is not, in all that class of bills, to-day a single item which I positively remember. I could not tell the amount, nor when those bills were credited, excepting I went to the books. I cannot tell of a single item that went to make up this amount. Let my answer as to this and to the other vouchers of that class be the same as I have made to this other voucher, and I will take that position generally.

The CHAIRMAN. I would like to call your attention to each one of the expenditures made, by itself, so as to get it on the record. I read now the face of the voucher as to which you have been testifying:

Central Pacific Railroad Company to ——— ———, *Dr.*

Expenses and disbursements..... $50,000

SAN FRANCISCO, *September* 7, 1876.

Received from Central Pacific Railroad Company $50,000 in full for above account.
LELAND STANFORD.

Please state to the Commission in whose handwriting the face of the bill is, and whether you can recall the details of the expenditure.

AN EXPLANATION OF IT.

The WITNESS. The filling in is mine. The other part, I suppose, is by some clerk in the office. Now, as to that I can only give a conjecture,

and that is, that my account needed some money placed to its credit, and that I drew that money, and probably afterwards made up or gave in the vouchers that I had for the expenditures. That is a thought of mine, because the voucher seems to be different from the others, but as to what was done with that money other than perhaps to place it to my credit, I have not the least idea. But I can see that it is different from the ordinary ones. It says on the back: "Chargeable to expenses and credit Leland Stanford." Is not that it?

Mr. COHEN. Yes.

The WITNESS. Does that mean that it was credited to me on the books? I cannot remember anything about the bill any more than by seeing it here, and that it is in my handwriting as to the words "expenses and disbursements."

Q. Do you recall how you made up the items of the bill at the time the voucher was made up?—A. I cannot say, for I do not remember the bill itself. But usually somebody made up my account for me.

Q. Was any explanation asked by the company for such an expenditure?—A. I cannot remember as to that.

Q. Did you give any explanation?—A. No. I do not remember that I gave any explanation. But the probabilities are that my account was short, and I needed the money. And then I furnished an offset to it afterwards in the vouchers such as I usually had.

Q. What objection would there have been to stating in full the purposes of the expenditure?—A. Very likely I was busy and had not time just then. But I do not know.

Q. Was the bill made up in the same way as the voucher that you have already sworn to, by your check book or by stubs?

The WITNESS. For this $50,000?

The CHAIRMAN. Yes.

The WITNESS. I have told you that it was probably not, from the fact that it was different. It appears that it was in my handwriting. If it had been made up by the clerks it would have been in their handwriting. That is all I can tell you about it.

THE MONEY NOT USED TO INFLUENCE LEGISLATION.

Q. Was any part of the sum expended through any agent or individual for the purpose of influencing legislation?—A. Not to my knowledge. I have told you already. I do not know the object of your examining me in this way. I have told you I do not know anything about it; and I have told you that, I think, three or four times.

The CHAIRMAN. I want you to distinctly understand that I am going to ask you as to each one of these vouchers, and I will put it on the record.

The WITNESS. And I want you to distinctly understand that I shall exercise my discretion about it.

The CHAIRMAN. That is your right, and it is my right and duty, sworn to, to ask you.

The WITNESS. It is your right and your duty to be a gentleman in asking your questions.

The CHAIRMAN. Well, if I have not been, I will apologize.

The WITNESS. Well, I think you have occasion to apologize for asking such questions as that over and over again.

OBJECT OF PLACING ON RECORD EACH QUESTION AND REFUSAL TO ANSWER.

The CHAIRMAN. I will repeat my question, and you can decline, just as you have done. I am going through all of these vouchers just in this way, so that there will be no mistake in the future.

The WITNESS. I do not swear positively, because I do not remember the circumstances. But it is my conjecture that the fact is as Mr. Cohen has explained it.

The CHAIRMAN. If you will state positively as to it, then I will not ask you further about it.

The WITNESS. How can I state positively that which I do not know?

Commissioner ANDERSON. If this question is to be presented to the court, the court will require the record to show clearly that you have declined to answer the questions, before it will undertake to say whether you shall answer them or not. Therefore we cannot be satisfied with one answer from you, but must place each question on the record and your refusal to answer it.

The WITNESS. I understand that; but I had thought it would save time if I made the answer to this, so that the answers I have made to all this class of questions might be applicable to each one.

The CHAIRMAN. If you just let us get our record made up we will be satisfied. These lawyers understand the object.

Mr. BERGIN. So far as the form of the question and the proceedings have gone for the purpose of presenting any question to the court, there shall be no question on the score of its efficiency. If that be the purpose of it, then, for all purposes, you can consider it ample and complete, and no objection shall be taken in court.

Commissioner ANDERSON. I know; but the court will require to see the vouchers, and more than one of the vouchers. If the vouchers are presented, and the witness says, "I decline to answer," that will make it complete.

The WITNESS. Of course I do not want to avoid, for the sake of saving time, anything that is necessary to have the case properly presented in court; but I suggest that when you take up one of these vouchers and I decline to answer for the same reason given in the other answer, that that will be sufficient.

The CHAIRMAN. Very well, sir; I will read it, and you can make that answer.

Mr. BERGIN. That is what I suggest.

VOUCHERS RELATE TO MONEY TRANSACTIONS OCCURRING MANY YEARS AGO.

The WITNESS. Bear in mind, gentlemen, that these are really vouchers in relation to money matters occurring a great many years ago, when I was doing a great deal of business, and was very much hurried, and worked very hard. We had our hands full. The whole building of this road devolved upon a few of us at last, and it was a question of how to construct the road and how to get it through.

The CHAIRMAN. I trust you will bear in mind also that this is not a very pleasant duty to us while we are engaged in it.

The WITNESS. I am sorry for that.

VOUCHER No. 21764.

Q. I now show you a voucher indorsed:

C. P. R. R.

No. 21764. $83,418.09.
Name, Leland Stanford.

Paid out for the company.
Month, July 30, 1876, to September 30, 1877.
Chargeable to expenses.
Credit, Leland Stanford.

The face of the bill reads as follows:

Central Pacific Railroad Company to Leland Stanford, Dr.

Nov. 1, 1887. To expenditures from July 30, 1876, to September 30, 1877, for account of legal and other expenses..... $83,418.09
Correct.

LELAND STANFORD.

Mr. BERGIN. The same answers and the same explanations are submitted in reference to that, and the same objections as were made to the last preceding voucher which was produced and exhibited to the witness.

MAY BE MADE UP OF MANY SMALL SUMS.

By the CHAIRMAN:

Q. That is your answer?—A. Yes. Now, I will say this, that that covered a period of some fourteen or fifteen months of expenditures that I may have made during that time.

Mr. BERGIN. An inspection of the voucher shows that.

The WITNESS. Yes, sir. That may have been made up of a great many little sums. I cannot remember about it, but it covers fourteen or fifteen months of the entire expenditures that I made, and it probably covered a great many items.

VOUCHER No. 2549.

Q. I now show you voucher No. 2549, as follows:

Central Pacific Railroad Co. to ——— ———, Dr.

For expenses..... $52,500.00

SAN FRANCISCO, *December 27, 1877.*

Received from Central Pacific Railroad Company fifty-two thousand five hundred dollars, in full for above account.

LELAND STANFORD.

(Indorsement on back:)

C. P. R. R.

No. 2549. $52,500.00.
Name, Leland Stanford.
For expense.
Paid, Dec. 27, 1877.
Chargeable to expense.

Mr. BERGIN. The same explanation, the same answers, and the same objections apply to that as to the last preceding question.

The CHAIRMAN. That I understand to be your answer?

The WITNESS. Yes, sir.

VOUCHER No. 865½.

Q. I now show you voucher No. 865½, for $91,276.69:

Central Pacific Railroad Company to Leland Stanford, Dr.

May 4, 1880. To amount paid for legal and other expenses from October 1, 1879, to May 4, 1880..... $91,276.69

SAN FRANCISCO, *May 4, 1880.*

Received from Central Pacific Railroad Company ninety-one thousand two hundred and seventy-six $\frac{69}{100}$ dollars, in full for above account.

LELAND STANFORD.

(Indorsement on back:)

C. P. R. R.

No. 665. $91,276.69.
Name, Leland Stanford.
Expended for the company.
Month of October, 1879, to May, 1880.
Chargeable to expenses to Leland Stanford.
I certify that the within account, amounting to $91,276.69, is correct.

"E. S. Miller" is written underneath that certificate and then erased, and the words "as per inside" are written,

Mr. BERGIN. The same explanation, answer, and objection are made to that as to the last preceding voucher.

VOUCHER No. 1064.

Q. I now show you voucher No. 1064, for $4,000, which is as follows:

No. 1064. $4,000.
For expense account.
When paid, November 9, 1870.
Chargeable to expense account.
I certify that the within account, amounting to $4,000, is correct.
Allowed.

LELAND STANFORD.

(On the face of the bill it reads as follows:)

Expense account. Check No. 620, on D. O. Mills & Co., to pay draft attached. $4,000.

VIRGINIA, *November* 5, 1870.

At sight pay to the order of the Bank of California $4,000, in United States gold coin, value received, and charge same to account of

WM. SHARON.

To LELAND STANFORD, Esq.,
Sacramento, Cal.

The check is indorsed:

Pay D. O. Mills & Co., or order, for collection account of the Bank of California.
J. G. CLARK, *Cashier.*
D. O. MILLS & CO.
Per JOHN W. PEW, *Teller.*

The WITNESS. I do not remember anything about it. All I know is is that there it is before me, but I cannot tell anything more.

The CHAIRMAN. Then you make the same answer as you made to the others?

Mr. BERGIN. The same explanation, answer, and objection.

SURVEY FROM VIRGINIA CITY TO TRUCKEE RIVER.

The WITNESS. I cannot call to mind anything about it. All I remember is that Sharon and somebody else over there paid the expense of a survey to make a short line from Virginia City to the Truckee River. I was over there once and looked at it. Whether he charged me with those expenses or not I do not know. But that is the only thing that I can remember ever having had to do with Mr. Sharon. It may have been on some account of the Central Pacific that he paid something, but I have not the least recollection of the account other than the fact that I see it there.

VOUCHER NO. 1619.

The CHAIRMAN. I now show you voucher No. 1619, indorsed as follows:

C. P. R. R.

No. 1619. 12,000—Cy.
For expenses.
Paid Sept. 3rd, 1878.
Chargeable to expenses.

The face of the voucher reads as follows:

Central Pacific Railroad Company. For expenses to ——— ———, Dr.

SAN FRANCISCO, *September 3rd*, 1878.

Received from Central Pacific Railroad Company, twelve thousand dollars, in full for above account.

LELAND STANFORD.

Will you please explain that voucher?—A. I make the same answer; I cannot tell.

Mr. BERGIN. The same explanation, same answer, and same objection.

VOUCHER NO. 2265.

By the CHAIRMAN:

Q. I now show you voucher No. 2265, which is indorsed as follows:

C. P. R. R.

No. 2265. $1,500.
Name, Chas. E. McLane.
For salary, 7½ months.
Month, Dec. 1st, 1880.
Paid, Dec. 21st, 1880.
Chargeable to expens
Allowed.

LELAND STANFORD.

The face of the voucher reads as follows:

Central Pacific Railroad Company to Chas. E. McLane, Dr.

Dec. 21, 1880. Salary from April 15th to Dec. 1, 1880, 7½ mo., at $200..... $1,500

SAN FRANCISCO, *Dec. 21st*, 1880.

Received from Central Pacific Railroad Company, fifteen hundred dollars, in full for above account.

CHAS. E. McLANE.

EMPLOYMENT OF CHARLES E. McLANE.

The WITNESS. That is not credited to my account, is it?

The CHAIRMAN. You approved it, sir. I ask for an explanation of it.

The WITNESS. Well, Mr. McLane was in our service for a time. I do not remember how long, but not a great time. I think he died.

Q. What was the character of the service which he rendered?—A. I can not call to mind now.

Q. What was his business?—A. He had been the principal manager of Wells, Fargo & Co's express at one time. I have forgotten now what service specially he was employed in.

Mr. COHEN. I think it was in the Placerville case?—A. I think Mr. Miller probaoly can tell you about that. He was employed at so much a month.

Q. Now I will put my question so that there will be no mistake about it for the purpose of making up the record, with reference to this bill.

Was this expenditure for the employment of Mr. McLane, in reference to any legislation on the part of the company?—A. I cannot think, and I am not able to tell, what employment it was that Mr. McLane had. If somebody here would suggest it to me I have no doubt it would all come to my mind in a moment.

Mr. BERGIN. To make the record straight, I suppose we might as well make the same answer to that as to the last one?

The WITNESS. Very well; because I cannot call it to mind now.

VOUCHER NO. 2571½.

Q. I now show you voucher No. 2571½, which is indorsed as follows:

No. 2571½. $8,911.53.
Name, Leland Stanford.
For charges in his ac., 1875 should be expenses.
Dec. 31, 1875.
Chargeable to expenses and credit Leland Stanford.

The face of the voucher reads as follows:

Central Pacific Railroad Company to Leland Stanford, Dr.

December 31, 1875. Expense account.

1875.			
Jan. 23.	For charge, freight on coal S. F. to Sac., in voucher No. 124. It was a mistake of the company in hauling the coal from Ogden to S. F. The coal should have been left at Sacramento.....	$34.38	
Aug. 13.	For charge cash to S. T. G., $2,500, and int. to December 31	$2,614.16	
Aug. 17.	For charge cash to D. D. C., $5,000, and int. to December 31.	5,221 66	
Aug. 26.	For charge cash to S. T. G., $1,000; int. to December 31.	1,041.33	
			8,877.15
Total			8,911.53

Mr. BERGIN. Same explanation, same objection, and same answer.

The CHAIRMAN. Will you explain to the Commission the items of August 13, for charge cash to S. T. G., $2,500 and the other items by initials to whomever they refer?

Mr. BERGIN. For the reasons already given to the Commission we decline to make further explanation of the vouchers than have already been submitted.

VOUCHER NO. 2567½.

The CHAIRMAN. I now show you voucher No. 2567½, which is indorsed as follows:

No. 2567½. $15,117.33.
Name, Leland Stanford.
For ac. legal expenses.
To Dec. 31, 1875.
Chargeable to legal expenses.
Allowed Feb'y 7, 1876, by board of directors.

LELAND STANFORD.

The face of the voucher reads as follows:

Central Pacific Railroad Co. to Leland Stanford, Dr.

Dec. 31, 1856. Bill attached..... $15,117.33

The bill attached reads as follows:

C. P. R. Co. to Leland Stanford, Dr.

To cash paid on account of legal expenses to December 31st, 1875 ..... $15,117.33

The WITNESS. Allow me to look at that bill. [The bill is handed to witness.] It seems to be different from the ordinary ones, and I cannot tell why that is so.

Q. Do you make the same answer to the voucher presented to you now as to the one preceding?—A. Yes, sir; I have to do so; although it seems to be different from the general form.

VOUCHER NO. 2568½.

Q. I now show you voucher No. 2568½, which is indorsed as follows:

No. 2568½. $8,773.05.
Name, Leland Stanford.
For sc. rents, leases, &c.
Oakland wharf.
When paid, Dec. 31, 1875.
Chergeable to general expens

(Written across back:)

Allowed Feb'y 7, 1876, by board of directors. Folio 153.
I certify that the within account, amounting to $8,773.05, is correct.
LELAND STANFORD.

(The face of the voucher reads as follows:)

Central Pacific Railroad Company to Leland Stanford, Dr.

Dec. 31, 1875. Bill attached $8,773.05

(The bill attached reads as follows):

C. P. R. R. Co. to Leland Stanford, Dr.

To cash paid on account of rents, leases, &c., Oakland wharf, to December 31, 1875 ..... $8,773.05

PAYMENT OF RENT FOR OAKLAND WHARVES.

The WITNESS. I cannot remember about the leases. I paid the rents on leases and such things, but it says Oakland wharf. I cannot call it to mind. I have often paid rents for buildings and offices, but as to the "Oakland wharf" I do not understand that. We had wharves that we rented, I know; and I used to pay Mr. Adams and Mr. Carpenter their rent, and give them my check for it separately, but I cannot remember whether it is that item. I did not pay to the Oakland wharf, for there was no such company; but I paid to individuals who owned wharves in Oakland their rent at different times for years as it became due. There were two parties who owned there, Mr. Carpentier, who is here to-day, and Mr. Adams; and I know they used to take their rent separately, and I paid so much to each one, what their interest was—I believe their interests were an undivided half each, but I may be mistaken about that. I think I paid to one the same as to the other.

Q. Was the entire sum for the rent of wharves? You notice, in addition to the rent of the wharf, it has other charges on it. It says "&c."—A. There was another wharf, and the matter of title was involved. I think that was settled; to indicate which of those properties was meant, or what the rent was for. It is nothing that I can call to mind now.

HOW THE CHARGE WAS MADE UP.

Q. How did you make up the charge in the bill?—A. Well, as to all of my other expenses paid out for the company, it must have been made up from my check-book.

Q. Was it made up in the same way from the stub of your check-book?—A. From the checks themselves. I do not say that positively, but if it be as I suppose, that would be the way it would come; but I have an idea that that was another matter of a wharf and a plot of land that was not settled. I know that we rented a wharf of Mr. Carpentier and Mr. Adams, and I used to give each one of them a check. That brings that thing to my mind, though I do not remember the amount. But I used to pay them myself.

The CHAIRMAN. Well, we will accept that in explanation of this voucher.

The WITNESS. Well, that is all. I cannot say for certain what it was, but I think it was that.

VOUCHER NO. 278½.

Q. I now show you voucher No. 278½, which is indorsed as follows:

No. 278½, $20,000.
Name, L. Stanford.
When credited to ac., Feb. 8th, 1876.
Chargeable to gen'l ex. ac., $20,000.
I certify that the within account, amounting to $20,000, is correct.
Feb'y 17th, 1876.

By BOARD OF DIRECTORS.

Allowed by board of directors Feb'y 7th, 1876.

The face of the voucher reads as follows:

Central Pacific Railroad Company to Leland Stanford, Dr.

Dec. 31, 1875. Gen'l expenses $20,000

A. I have no knowledge of it except what I see here.

Q. Do you make the same answer to that voucher presented as to the former vouchers?—A. Yes, sir; I have no knowledge at all excepting what the voucher shows.

Q. I understand that answer to be the same?—A. Yes, sir.

Q. Because, otherwise, I feel that I ought to question you further upon it.

Mr. BERGIN. It is the same answer.

VOUCHER NO. 1877.

Q. I now show you voucher No. 1877, which is indorsed as follows:

No. 1877. $50,000.
Name, W. D. Co.
For expense ac.
When paid, Sept. 22, 1876.
Chargeable to expense.
I certify that the within account, amounting to $50,000, is correct.
Expense ac.
B. D. D. C.
Allowed.

LELAND STANFORD.

The face of the voucher reads as follows:

Central Pacific Railroad Co. to Western Dev. Co., Dr.

1876. Sept. 21. For cash advanced on your ac..... $50,000

SAN FRANCISCO, *Sept.* 21, 1876.

Received from Central Pacific Railroad Company $50,000, in full for above account.
F. S. DOUTY, *President.*

A. That is Colton's.

Q. That bill is approved by you, and I am asking you for an explanation, if you recall the reasons of your approval?—A. I cannot tell you, because I cannot think of it, but I have no doubt that, because of the indorsement by D. D. C., that was Mr. Colton's, and that he presented it to me and asked me to allow it, but I cannot call to mind anything about my explanation. He likely gave it to me, and he may not; I do not know. But it was evidently done at the request of Mr. Colton. As to my knowledge of it further than what I see I cannot tell you. I have not the least idea what expenses it covered, and I suppose if you want the same answer to take it to the court, then I make the same answer as to the others.

RELATION OF CENTRAL PACIFIC TO WESTERN DEVELOPMENT COMPANY.

Q. Let us understand first what was the business transaction between the two companies that would lead you to advance or approve of the advance of $50,000 to the Western Development Company?—A. The Western Development Company was one of those contract companies the accounts of which I think have been before you. As to what its nature was, probably it was for some services that they did; some work, very likely.

Q. How would the Central Pacific know that the Western Development Company had properly expended $50,000, unless there was some voucher presented which would give in detail the character of the work done by the Western Development Company?—A. General Colton, at that time, was the financial agent of the Central Pacific Railroad Company, and it is quite possible that I did not ask him anything about it; but that he wanted I should allow it; but I have no recollection of the bill itself excepting as I see it here.

Q. I ask you the question, Was any sum of money paid through the Western Development Company for the purpose of influencing legislation?—A. Not to my knowledge, and I do not believe it. It is mere belief, but it is my belief that it was not used for any such purpose as you mention. I do not think they ever spent any money that way.

Q. Have you any knowledge, directly or indirectly, whether any sums of money were paid through the means of the Western Development Company for the purpose of influencing legislation?—A. Well, I will make the same answer to that as to the other questions.

Q. I understand you make the same answer to my question. You decline to answer on the ground stated in the former answer?—A. Yes, sir.

VOUCHER NO. 281.

Q. I now show you voucher No. 281.
The voucher is indorsed as follows:

No. 281, $26,000.
Name, W. D. Co.
For payment made for company.
Paid February 6, 1877.
Chargeable to expense.
Allowed.

LELAND STANFORD.

The face of the bill is as follows:

Central Pacific Railroad Company to Western Development Company, Dr.

1877. Feb. 5. For cash advances on your account..... $26,000

Charge to expense, order of L. S.
Charge to expense acc't.

SAN FRANCISCO, *Feb.* 6, 1877.

Received from the Central Pacific Railroad Company $26,000, in full for above account.

F. S. DOUTY, *President.*

Do you make the same answer in regard to that?—A. Well, I would like to take this. I want to see if I cannot see where that money went to; who received credit for it.

The CHAIRMAN. Very well; I will just show you another voucher.

The WITNESS. I want to say in regard to this voucher No. 281, that I have to make the same answer to it as to the other. I cannot give the explanation, but what I merely want to see is to whom this account was credited. I have an idea that it should have been placed to my credit, and that it never was so done, but I do not want to say anything about it until I can examine it.

Q. Then I understand that the same answer is made to No. 281 as was made to the former voucher?

Mr. BERGIN. Yes, sir.

VOUCHER NO. 1878.

Q. I now show you voucher No. 1878, which is indorsed as follows:

No. 1878. $29,974.13
Name, W. D. Co.
For legal expenses.
When paid, Sept. 22, 1876.
Chargeable to legal expense.
I certify that the within account, amounting to $29,974.13, is correct.

To legal expenses, pr. D. D. C.
Allowed.

LELAND STANFORD.

(The face of the voucher reads as follows:)

Central Pacific Railroad Co. to Western Dev. Co., Dr.

1878, Sept. 21. For cash advanced on your account..... $29,974.13

SAN FRANCISCO, *Sept.* 21, 1876.

Received from Central Pacific Railroad Company twenty-nine thousand nine hundred and seventy-four dollars and 13-100 in full for above account.

F. S. DOUTY,
Pres't.

Will you please explain that voucher?—A. This, I see, is for legal expenses certified to by D. D. Colton, financial agent, and it is approved by me. But that is all I remember about it, what I see here on the voucher itself.

Q. Then, do I understand that the same answer is made to that voucher as to the others?—A. I have to make the same answer.

Mr. BERGIN. We make the same explanation, answer, and objection.

VOUCHER NO. 307.

Q. I now show you voucher No. 307, which is indorsed as follows:

No. 307. $10,000.
Name, Leland Stanford.
For expenses.
Paid Feb'y 14, 1878.
Chargeable to expense.

(The face of the voucher is as follows:)

Central Pacific Railroad Co. to ——— ———, *Dr.*

Charge to expense account.

SAN FRANCISCO, *Feb'y* 14, 1878.

Received from the Central Pacific Railroad Company $10,000 in full for above account.

LELAND STANFORD.

The WITNESS. I know nothing further about it than what I see on the bill, and I suppose I must make the same answer, as I cannot call it to mind.

The CHAIRMAN. Then you make the same answer to it?

The WITNESS. Yes, sir.

The CHAIRMAN. And I understand, Mr. Bergin, that you enter the same objection?

Mr. BERGIN. Yes, sir; the same objection, answer, and explanation.

VOUCHER NO. 1052.

By the CHAIRMAN:

Q. I now show you voucher No. 1052. The voucher is indorsed as follows:

No. 1052. $13,000.
Name, Leland Stanford.
For expenses.
Paid June 7, 1878.
Chargeable to expense.

(The face of the voucher reads as follows:)

Central Pacific Railroad Co. to ——— ———, *Dr.*

Expenses $13,000

SAN FRANCISCO, *June* 7, 1878.

Received from Central Pacific Railroad Company thirteen thousand dollars in full for above account.

LELAND STANFORD.

Mr. BERGIN. We make the same explanation, answer, and objection to this as to the last.

VOUCHER NO. 2094.

Q. I now show you voucher No. 2094, which is indorsed as follows:

C. P. R. R.

No. 2094. $46,816.94.
Name, Leland Stanford.
For expenses.
Paid, Nov. 12, 1878.
Chargeable to legal expenses.

(The face of the voucher reads as follows:)

Central Pacific Railroad Company to Western Dev. Co., Dr.

1878, Nov. 12. For bill attached..... $46,816.94

SAN FRANCISCO, *Nov.* 12, 1878.

Received from Central Pacific Railroad Company forty-six thousand eight hundred and sixteen and 94-100 dollars in full for above account.

F. S. DOUTY, *Pres't.*

(The bill attached is as follows:)

C. P. R. R. Co. to Leland Stanford, Dr.

To sundry cash payments for legal and other expenses from Nov. 22, 1877, to Nov. 12, 1878..... $46,816.94

SAN FRANCISCO, *November* 12, 1878.

(In pencil:)

Cr. L. S. Chg. C. P., Nov. 12.

(Indorsed in ink across face:

Correct.

LELAND STANFORD.

The WITNESS. This is a bill made out by Mr. Douty. I do not remember anything about that, and I will have to make the same answer to that bill.

Mr. COHEN. Answer, then, that you don't remember about it.

The CHAIRMAN. Then you make the same answer?

Mr. BERGIN. We make the same answer, explanation, and objection.

VOUCHER NO. 1746.

Q. I now show you voucher No. 1746, which is as follows:

Central Pacific Railroad Co. to Leland Stanford, Dr.

Sept. 27, 1879. To amount paid for legal and other expenses for account of C. P. R. R. Co. from Nov. 25th, 1878, to Sept. 27, 1879..... $38,156.03

Correct.

L. S.

SAN FRANCISCO, *Sept.* 27, 1879.

Received from Central Pacific Railroad Company thirty-eight thousand one hundred and fifty-six and 3-100 dollars in full for above account.

LELAND STANFORD.

Credited.

(The indorsement is as follows:)

C. P. R. R.

No. 1746, $38,156.03.
Name, Leland Stanford.
For expenses.
Paid September 27th, 1879.
Chargeable to legal expenses.

The WITNESS. I cannot remember anything about that. It is not made in my handwriting. I will have to make the same answer, explanation, and objection.

VOUCHER NO. 1308.

Q. I show you voucher No. 1308, which is as follows:

Central Pacific Railroad Co. to ——— ———, *Dr.*

Expense..... $500,00

SAN FRANCISCO, *July* 23, 1879.

Received from Central Pacific Railroad Company five hundred dollars in full for above account.

LELAND STANFORD.

(Indorsement on back:)

C. P. R. R.

No. 1308, $500.00
Name, L. Stanford.
For expenses.
Paid July 23rd, 1879.
Chargeable to expense acc't.

Mr. BERGIN. Same explanation, same objection, and same exception.

Q. I ask you, and probably your counsel can answer, if you have produced all the vouchers called for with reference to the general expense account and legal expense account?—A. Well; I do not know.

Mr. BERGIN. All have been produced that have been called for, that we are aware of.

The CHAIRMAN. Well; have all been produced that were in the call the other day?

Mr. MILLER. My clerk told me that there was one or two missing that he could not find.

The WITNESS. I do not suppose that I have ever seen one of these accounts from the day they were filed.

A MISSING VOUCHER, DATED 1878, JUNE 28, L. STANFORD, $111,431.25.

The CHAIRMAN (to Mr. Miller). Do you recall a voucher dated 1878, June 28, L. Stanford, $111,431.25? That is a voucher that we called for. What do you state with regard to that?

Mr. MILLER. It appears upon the books of the company precisely the same as all the other vouchers of the company do, but my clerk could not find the voucher.

Commissioner ANDERSON. It appears on the accounts.

Mr. MILLER. Yes.

By the CHAIRMAN:

Q. How are the entries set out in the account?

Mr. MILLER. They are just charged to expense; that is all. I looked at that personally.

Q. Who made the entry?—A. Some one of my bookkeepers.

Q. What is the name of the clerk who made the search for the record?—A. George F. Klink.

Q. Will he be able to find it?—A. I cannot tell you.

Q. He had better come here so that we can examine him as to search for the voucher.—A. Very well, sir.

VOUCHERS FREQUENTLY EXAMINED BY COURTS AND COMMITTEES.

Mr. COHEN. Mr. Miller, these vouchers have been gone over by several commissioners, referees, and court commissioners from time to time, have they not?

The WITNESS. The whole list of vouchers has been gone over. The whole of our vouchers have been gone over, but these vouchers were gone over by Mr. French. Of course he had that voucher and every voucher.

Mr. COHEN. Many of your vouchers have been produced in court from time to time, within the last few years, have they not?

Mr. MILLER. Yes.

Mr. COHEN. And you are not quite sure whether you got them all back again or not?

Mr. MILLER. We never have received all of our papers back.

Mr. BERGIN. We will make a search, and of course if the voucher is there it will be furnished to the Commission. We will give you the best we can; if we have it we will produce it; if not, we will explain it.

The CHAIRMAN. We want the voucher if you have it. If not, we want you to show that it is missing and what efforts you made to find it.

WAS ANY MONEY GIVEN S. T. GAGE TO INFLUENCE LEGISLATION?

By Commissioner ANDERSON:

Q. Governor Stanford, I would like to ask you a few questions in regard to the moneys generally represented by the vouchers which have been presented to you and as to which you have stated that with the exception of the explanation you have made you decline to answer. Did you ever give any portion of the moneys covered by these vouchers to Mr. S. T. Gage for the purpose of using the same in connection with measures pending in the legislature?

Mr. COHEN. We think that that question is included in the various questions that have been put.

Commissioner ANDERSON. I simply want to know whether he declines to answer.

Mr. BERGIN. That question has been already covered by the chairman's questions, and for the reasons already stated the witness declines to answer.

Commissioner ANDERSON. I must respectfully ask the witness whether he declines to answer the question.

Mr. COHEN. We desire to be as respectful as possible to the Commission, and we want to give our reasons why he declines to answer. We say that the question you now ask is included in the questions already asked by the chairman, and for the same reasons we decline to answer.

Q. Did you ever give any money, which was expended without requiring any detailed account of the manner in which the same should be expended, to Mr. S. T. Gage?

REFUSAL TO ANSWER UPON ADVICE OF COUNSEL.

Mr. BERGIN. That we decline to answer for the reasons already stated.

Commissioner ANDERSON (to the secretary of the Commission). You enter these remarks of Mr. Bergin as the answers of Mr. Stanford, do you not?

The SECRETARY. No; I enter them as the statements of Mr. Bergin.

The WITNESS. I adopt Mr. Bergin's remarks.

Commissioner ANDERSON. We want to present the matter to the court, and therefore desire to have it in proper form.

Mr. BERGIN. I should think it was sufficiently specific already.

Mr. COHEN. If you will write exactly what you want we will put it in that form.

Commissioner ANDERSON. I simply want Governor Stanford to say I decline to answer that question.

NO MONEY GIVEN HENRY VROOMAN TO INFLUENCE LEGISLATION.

Q. Did you ever give any money to be used in connection with measures pending in the legislature to Mr. Henry Vrooman?

Mr. BERGIN. We decline to answer for the reasons previously stated.

The CHAIRMAN. We must ask the witness to decline, and then the attorneys can make as many speeches as they please.

Mr. COHEN. We do not want to make any speeches.

The CHAIRMAN. Then let the witness say yea or nay.

The WITNESS. I desire to answer that question. I never gave him any money for any such purpose, and I do not know that I ever gave him anything unless I may have paid his salary.

By Mr. COHEN:

Q. Who is this Mr. Vrooman that Commissioner Anderson inquired about?—A. He is one of our attorneys.

Q. Regularly retained by the year?—A. Yes, sir; at so much a year.

Mr. COHEN. Then, upon that further ground, I advise you to decline to answer.

Commissioner ANDERSON. The witness has already answered, and therefore cannot now decline to answer.

Mr. BERGIN. I suppose Mr. Cohen's view is that whatever is paid to an attorney is privileged.

NO MONEY PAID BY WITNESS TO FRANCHOT.

By Commissioner ANDERSON:

Q. Did you ever give any money to be used with reference to pending legislation to General Joseph R. Franchot?

The WITNESS. I, personally?

Commissioner ANDERSON. Yes.

The WITNESS. Why, I never gave him a dollar that I know of for any purpose.

Q. Do you know of his having received Central Pacific money for any purpose?—A. All I know is what appears there on the papers that you have. I have no knowledge except what appears on the papers.

Q. Were you acquainted with General Franchot?—A. Yes, sir.

EMPLOYED BY HUNTINGTON TO REPRESENT COMPANY AT WASHINGTON.

Q. What was his business?—A. Well, he had business of his own, I suppose, but he was employed, as I understand it, by the company. I cannot say that I never talked with him or anybody else on the subject, but my idea is that he was employed by the company. His immediate employer was Mr. Huntington. He had been employed to represent us at Washington.

Q. Employed at Washington for what purpose?—A. To represent the interests of the Central Pacific.

Q. Before whom?—A. Well, I do not know of any one in particular.

Q. Who was there in Washington that the Central Pacific matters were discussed before?—A. Well, we had a great deal of business, and always had some business there.

Q. Was it not either with the Departments of the Government or before committees of Congress?—A. I think he went before committees

of Congress and also before the Departments. He was there generally representing our interests. We had always more or less matters before the Departments there.

Q. Were you not aware while he was receiving this money which appears in the books of what these payments amounted to?—A. I will make answer to that as I have to these other questions.

NO MONEY PAID BY WITNESS TO SHERRILL.

Q. Did you ever give any money, for the purpose of being used in connection with measures pending in Congress, to Colonel Sherrill?

The WITNESS. Myself, personally?

Commissioner ANDERSON. I ask you the question as to yourself personally.—A. I never did.

Q. Do you know of Central Pacific moneys having been paid to him?—A. I understand that he was there on a salary. The last year, I think, his salary was $20,000. Before that it was less, but I do not know what it was.

Q. Do you not know that other moneys beside the salary were paid to him?—A. I have no knowledge of any.

Q. Not even from the books?—A. I do not remember that I have ever seen it on the books. I do not think that I went over the accounts myself.

WITNESS DECLINES TO ANSWER QUESTIONS AS TO PAYMENTS TO VARIOUS OTHER INDIVIDUALS.

Q. Did you ever pay any money to W. B. Carr for the purpose of being used with reference to legislative matters pending in the California legislature?

Mr. BERGIN. For the reasons already stated we decline to answer that question.

The WITNESS. I adopt the answer given by my counsel.

Q. I ask you the same question with regard to W. W. Stow.

Mr. BERGIN. We make the same answer in regard to that.

The WITNESS. I make the same answer to that that I made to the other question.

Q. I ask you the same question as to R. B. Mitchell.

Mr. BERGIN. So far as this chain of inquiry is concerned, you might as well make the same answer with regard to every one, because suspicion will be cast upon every gentleman whose name is mentioned in this connection, and in addition to the reasons already stated I advise you to make the same answer in regard to any names that the company may mention.

Commissioner ANDERSON. Do you mean that if the witness discriminates as to one by saying that he did not give him money for the purpose named it would give rise to the idea that he did not admit it as to the others?

Mr. BERGIN. Yes.

Commissioner ANDERSON. That is a perfectly just criticism. We desire to be understood as casting suspicion upon no one.

Q. I ask you the same question as to W. H. Stewart.

Mr. BERGIN. The same answer. Governor Stanford adopts the answer that I make in each case unless he expressly says to the contrary.

Q. I ask you the same question as to S. W. Kellogg.—A. I make the same answer.

Q. I ask you the same question as to Lyman Trumbull.—A. I ma
the same answer.

Q. I ask you the same question as to John P. Jones.—A. I make t
same answer as to him.

Mr. COHEN. Do you wish to ask the same question as to every me
ber of Congress and every Senator?

Commissioner ANDERSON. No.

SUFFICIENT TO RAISE THE POINT.

The CHAIRMAN. Do I understand you, Mr. Bergin, to apply the sa
objections to all the vouchers that have been called for as you ha
made to the questions put regarding the vouchers that have been p
sented to Mr. Stanford, and that in order to fix the record for the co
you take the position that they are equally objectionable?

Mr. COHEN. We have not seen them all.

The CHAIRMAN. We have them and were going to produce th
and put them in. I have not taken up the time by reading them al

Mr. COHEN. We would rather look at the voucher and see what i
that you are asking about.

The CHAIRMAN. I am prepared to go through them all. I took two
and went through them for the purposes of illustration.

Mr. COHEN. I should think those twenty would be sufficient to m
the point.

The CHAIRMAN. I desire for my part to spread upon the record
the Commission all these vouchers that have been called for. I am t
ing to save time that would be consumed in reading them separat
by asking the witness if he makes the same answer with regard to
the vouchers that have been called for and produced, upon twenty
which the witness has been examined in detail.

Mr. BERGIN. So far as I understand it I make that statement, as
a mere matter of form.

The following vouchers were then put in evidence:

(Voucher No. 2569½.)

Central Pacific Railroad Company to Leland Stanford, Dr.

Dec. 31, 1875. Bill attached..... $171,78

(The bill attached is as follows:)

SAN FRANCISCO, *October* 6, 1879.

Received from Central Pacific Railroad Company four thousand one hundred and forty-five and 20-100ths dollars, in full for above account.

LELAND STANFORD.
Per SHAY.

THE "S. H. H. & C." BOOKS

By Commissioner ANDERSON:

Q. With regard to the "S. H. H. & C." books, those books contained, as I understand, the accounts of yourself, Mr. Huntington, Mr. Hopkins, and Mr. Crocker, or some accounts in which you were all interested?

Mr. COHEN (to the witness). Did you ever see those books?

The WITNESS. I do not think that I ever saw the books.

Mr. COHEN. Have you ever looked over them to see what was in them?

The WITNESS. No, sir; I never did.

Commissioner ANDERSON. Well, that does not prevent an answer to my question. I merely want to raise the jurisdictional question as to the production of the books.

CONTRACT AND FINANCE BOOKS TO BE PRODUCED.

Mr. COHEN. You have called for certain information from those books, confessedly given by Mr. Brown. He said that he could not give you

the books of the Contract and Finance Company from which the entries were taken; but if you get the original entries on the books of the Contract and Finance Company you do not want the books of "S. H. H. & C.," and if you did, they being private books, so far as I am concerned, I should advise that they be not produced. But I am informed that we will be able to produce to you the books of the Contract and Finance Company that you have been asking for.

Commissioner ANDERSON. Which ones? All of them?

Mr. COHEN. All that we can find. I was hunting for some other papers and I found some of them when I was there yesterday, and we are now hunting for some others, and I will be able to tell you in the morning just exactly what we will produce.

Commissioner ANDERSON. It will save time as to the "S. H. H. & C." matter, for me to develop my present inquiry.

Mr. COHEN. Your record here is correct as far as it goes, but it does not disclose the present condition of things. You have asked for certain information from those books, because the books from which certain entries in the "S. H. H. & C." books were taken were the Contract and Finance Company's books. Now we will produce you the original entries.

Commissioner ANDERSON. I think I had better go on with my questions.

WHAT THE "S. H. H. & C." BOOKS SHOW.

Q. Do the books of "S. H. H. & C." contain a statement of the dividends received by these four gentlemen which have been declared at different times by the Contract and Finance Company, the Western Development Company, and the Pacific Improvement Company?—A. They only show balances between ourselves. They are entirely private. I do not think if you would go over them all that they would throw any light at all upon these railroad questions.

Q. In what book, containing your own private transactions, will be found entered the dividend declared by the Western Development Company?—A. The Western Development Company books will, I presume, show the dividends declared, but as to what entries may have been made in the private books, that is another matter entirely. I do not think that, on reflection, you will press the question, Mr. Anderson, as long as you can find out from the Western Development Company's own books the amount of dividends declared, and to whom declared.

Commissioner ANDERSON. If you want me to explain why I ask the question, it is because, in all probability, that same book would contain the dividend declared by the Contract and Finance Company, and we consider that this Commission is entitled to see such books.

WHEN THEY WERE OPENED.

The WITNESS. No; I do not think it will. When Mr. Brown comes here he will tell you when those books were opened, and the object for which they were opened.

Q. Did Mr. Brown keep your accounts from the time that the Contract and Finance Company's contract was made, in October, 1867?—A. No, sir; these books, if I remember rightly, were opened after Mr. Brown's return from Europe.

Q. You mean the "S. H. H. & C." books?—A. Yes; he opened those books to keep the accounts as between ourselves—how we stood with reference to the different companies, and he at different times furnished

to us statements. The books themselves I do not suppose I ever looked into, and I doubt if one of us four ever looked into them.

BOOKS SHOWING DIVIDENDS OF CONTRACT AND FINANCE COMPANY.

Q. Can you inform this Commission what books contained the dividends declared by the Contract and Finance Company, and its distribution to the stockholders?—A. I cannot tell you about those books, because I do not suppose that I ever looked at them, except seeing them lie on the desk. The Contract and Finance Company made a dividend some time after the work was completed, of stock. That was divided up; but what other dividends they made I am not now able to recall, if any.

Q. Are you not able to state who kept the books in which those dividends were entered?—A. I think it was done during Mr. Brown's time. I am quite sure of it, on reflection.

Q. If the books were kept by Mr. Brown, then, would it not be the "S. H. H. & C." books?—A. No, sir; the "S. H. H. & C." account was not opened until after Mr. Brown went away and returned, according to my recollection, and that must have been about 1874, 1875, or 1876.

Q. What is the title of your book kept by Mr. Brown, in which the dividends of the Contract and Finance Company were entered?—A. He did not keep any books at that time for me personally, except the "S. H. H. & C."

Q. Do I understand you, then, that there is no book of account of your own, journal or ledger, or cash book, in which dividends received by you from the Contract and Finance Company would appear?—A. No, sir; there is none.

Q. There is no such book?—A. No such book, excepting what was in the Contract and Finance Company's books, and I suppose that would show exactly what dividends were made.

DIVIDENDS IN STOCK—NO MONEY.

Q. Yes, if they were extant. On the receipt, then, of the thirteen millions of stock, and whatever dividends, if any, were made in money, what would you do; simply deposit the money in bank and the stock in the safe?—A. Well, if I ever had any money I have no doubt I would have deposited it, but the stock I think I threw into the safe.

Mr. COHEN. There is no evidence that they declared any dividends in money.

Commissioner ANDERSON. I do not say that there is.

The WITNESS. I have never had any dividends in money.

Q. Whatever the dividends were they were not entered in any book of the company?—A. No, sir; I do not know when. I suppose when the stock began to become of some value or we wanted to sell it—then I think it went into the books to show what I had, but for a long time it merely lay there in the safe as paper that was not very much needed.

ACQUISITION OF WELLS, FARGO & COMPANY STOCK.

Q. In regard to the acquisition of the stock of Wells, Fargo & Co., who paid this $166,000?—A. Without refreshing my memory (it is rather dull to me), my impression is that we formed an express company called the Atlantic and Pacific, and got ready and appointed our general manager, and were about prepared to do business. Then I think it was consolidated with Wells, Fargo & Co. Then there was a certain

amount of money that each one of us paid in, Mr. Mills, Mr. Tevis, Mr. Hopkins, and Mr. Crocker, and myself, and I presume, Mr. Huntington. I may be mistaken about Mr. Crocker. I know there were two years there that Mr. Crocker was away, and if it occurred in that time he would not be there. I will not be certain about Mr. Crocker, whether he was one of the parties or not. Wells, Fargo & Co. needed money and we gave in or paid so much in apiece.

Q. You paid who?—A. We paid into the concern of Wells, Fargo & Co. I do not remember the exact amount, but I know there was some considerable sum that we wanted to raise. I think the company's needs were about $500,000, and we paid that money.

Q. You mean to say that you paid it, each paying his share individually?—A. Each individually, whatever it was. Mr. Mills and Mr. Tevis, I think, have the same interest as the rest of us.

CENTRAL PACIFIC'S STOCK IN EXPRESS COMPANY.

Q. Was the money so paid by these gentlemen ever charged to the Central Pacific?—A. No. There were two classes of stock. One was our individual stock, and then the Central Pacific, itself, received a large amount of stock in some way. I cannot tell you now how the Central Pacific came to receive that stock, but they had that stock, several hundred thousand dollars. How they became possessed of that stock I cannot tell.

Q. Did they not become possessed of the stock that they held at a period ten years later when the arrangement with Wells, Fargo & Co. was extended to the Southern Pacific?—A. That may be. I remember the fact of their having the stock, but I could not have said but what the transactions were all nearly at one time.

Q. I simply ask whether the $166,666 which was paid by the seven gentlemen that you have enumerated, each paying his share, was charged to the Central Pacific, and that money collected from the corporation?

The WITNESS. Our individual interests?

Commissioner ANDERSON. Yes.

A. No; whatever individual interests we had, we paid for ourselves.

Q. But did you collect it back from the Central Pacific Company by a charge?—A. No, sir; they never bought it from us; it was our own individual stock.

STATEMENT OF C. P. HUNTINGTON'S DISBURSEMENTS.

Q. I will ask you to examine this statement of Mr. C. P. Huntington, dated February, 1870, and explain an item of disbursements charged to the Central Pacific Railroad Company:

Leland Stanford,	7,000	shares	Wells, Fargo & Co	$23,333.33
C. P. Huntington,	7,000	do.	do.	23,333.33
Mark Hopkins,	7,000	do.		23,333.33
Charles Crocker,	7,000	do.	do.	23,333.33
E. B. Crocker,	7,000	do.	do.	23,333.33
D. O. Mills,	7,000	do.		23,333.33
Lloyd Tevis,	7,000	do.		23,333.33
Mark Hopkins, in trust for self,	1,000	do.		3,333.33

The WITNESS. Is that charged to us?

Commissioner ANDERSON. It appears to be charged to the company, and in the margin are the words: "The Contract and Finance Company."

Mr. MILLER. It is not charged to the company. It is charged to those individuals.

Commissioner ANDERSON. Done through the company, then?

Mr. MILLER. No, sir; it is charged to them as individuals on Huntington's statement, and I suppose the whole amount is charged to the Contract and Finance Company and collected from the Contract and Finance Company.

The WITNESS. I do not remember those things. I know we had a certain amount of stock. That was our own stock that we paid for, but how those accounts were charged backwards and forwards I cannot tell you.

HIS METHOD OF KEEPING ACCOUNTS.

Commissioner ANDERSON. Mr. Huntington's statement enumerates these items among his disbursements?

Mr. MILLER. Yes, sir; the same as he did when I was in New York, and I drew $3,000 from him for my personal use, and I came home and found that it was charged to me on the books here. These amounts would have been charged to those individuals, but it seems that they were charged in a lump, judging from that statement, to the Contract and Finance Company. Mr. Huntington paid for it in New York, and it was charged to the Contract and Finance Company here.

Commissioner ANDERSON. What was the necessity for passing it through your accounts at all if it was a transaction that the Central Pacific had no concern with?

Mr. MILLER. You will find many transactions there that the Central Pacific had nothing to do with. Huntington paid them out there, but he had no books, and he just kept his receipts and disbursements and sent them here to be charged up or credited up, as the case might be.

Q. And your explanation is, that on the books of the Central Pacific we will find these items charged to the Contract and Finance Company as of that date?—A. I judge so from that entry there.

NO EXPENDITURE BY COMPANY ON ACCOUNT OF INLIVIDUALS.

The WITNESS. There is one thing I will say, the Central Pacific never paid out any money for us individually that was not charged to us. Did it, Mr. Miller?

Mr. MILLER. No, sir.

The WITNESS. Neither on this or my other account?

Mr. MILLER. No, sir.

VOUCHERS WAIVED AND RELEASES GIVEN.

Commissioner ANDERSON. I would like to put on the minutes the resolution referred to by Mr. Charles F. Crocker, and ask this witness the same question which we put to Mr. Crocker, so that the same question may be before the court as to both witnesses. At a stockholders' meeting held February, 1885, a long set of resolutions were presented. Resolution No. 3 recited that "Leland Stanford, C. P. Huntington, and Charles F. Crocker have made various payments of money in the interests of the company, for which they have given their individual receipts, but no vouchers have been received from the parties to whom the sums were paid; also reciting that the nature and amount thereof have been exhibited and fully made known to us: Therefore, resolved that the stockholders waive the filing of vouchers and authorize the delivery of the releases." In relation to the matter referred to in the resolution, I

ask you to please state the payments of money which were referred to in this resolution and which are alleged to have been made by you in the interest of the company, stating in detail the nature and amount of such payments and all the explanations that were made to the stockholders at that meeting.

Mr. COHEN. Were you present at that meeting?

The WITNESS. Well, I do not know whether I was or not. I think there were things similar to that passed at meetings. Sometimes I was present and sometimes I was not.

Mr. BERGIN. Does that purport to show who were present at that meeting?

Commissioner ANDERSON. The record does.

The WITNESS. I do not know whether I was present or not, but there have been several of those resolutions passed at different times. I think I was present in 1885 at the meeting; I might have been in and out, but I am not sure.

Commissioner ANDERSON. Whether you were present or not, the recital is doubtless true that various payments have been made in the interests of the company for which no vouchers were taken from the parties to whom the sums were paid, and therefore you may consider the question properly put, so far as that is concerned.

THE VOUCHERS EXPLAINED TO THE STOCKHOLDERS.

The WITNESS. I have no doubt that I made such explanation in regard to those different vouchers or those different payments, but I do not remember it now. That is a fact, that at different times either myself or some of the others explained, and there were such resolutions passed to cover the class of cases where we had not the ordinary vouchers.

Q. The resolution stated that "the nature and amount of these payments have been exhibited and fully made known and explained to us." Now I ask you to make known to this Commission the nature and amount of those payments for which the vouchers are insufficient, and explain them to us as you did to the stockholders.—A. I cannot. I cannot tell you about those amounts. I could only tell you by going to the books and finding out. That is as near as I can tell. I have no doubt that the books are correct.

WERE ANY OF THE PAYMENTS MADE TO INFUENCE LEGISLATION.

Q. As to any of the sums referred to in the resolution which I have just read to you, and which refer to payments made by you and the other gentlemen without taking a sufficient voucher therefor, were any of these payments made by you to be used by those to whom the money was given for the purpose of influencing legislation?

Mr. BERGIN. For the reasons already stated the witness declines to answer.

The WITNESS. For reasons above stated I decline to answer.

The Commission then adjourned until Thursday, August 11, 1887, at 10 a. m.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Thursday, August 11, 1887.

The Commission met pursuant to adjournment, all the Commissioners being present.

GEORGE T. KLINK, being duly sworn and examined, testified as follows:

By the CHAIRMAN:

Question. What is your business?—Answer. I am a clerk in the employ of the Central Pacific Railroad Company.

Q. In what department are you employed?—A. In the secretary's office.

Q. Were you requested by Mr. Miller, the secretary of the company, to make search for a list of vouchers in the general expense and legal expense accounts?—A. I was.

FAILS TO FIND TWO VOUCHERS.

Q. Did you find the vouchers set out in the list which was handed to you?—A. Not all of them.

Q. How many vouchers did you fail to find?—A. Two, I think.

Q. What vouchers were they?—A. One was for an item of $5,000.

Q. In whose name?—A. In the name of either N. T. Smith or H. S. Brown; and the other one, I have forgotten the exact amount, but I think it was for $111,000.

Q. In whose name?—A. Leland Stanford.

Q. Of what year?—A. The year 1878.

Q. Where did you look for the missing papers?—A. I looked in the place where they should have been.

Q. Have you made any subsequent search for them?—A. I have.

Q. Have you been able to find them?—A. I have not.

GEORGE T. KLINK.

Commissioner ANDERSON. I have a report here from E. C. Wright, general auditor of the Southern Pacific Company, in regard to a number of questions which we asked him. He answers some, but in regard to most of the questions he refers us to Secretary Miller. I think that the proper course would be to hand this report to Mr. Miller, and ask him to supplement it as to the matters which are not completed, more especially in regard to the comparative statement of the operation of the road before the making of the lease of 1885, and afterward, which is the question that I would like to have answered more particularly.

So ordered.

Mr. BERGIN. I beg to state to the Commission that Mr. STEPHEN T. GAGE is here, in compliance with a request received from the Commission, and I would ask if the Commission now desires to examine him.

The CHAIRMAN. In regard to the examination of Mr. Gage the same questions will be asked, and I presume that the same course will be pursued as in the cases of Governor Stanford and Colonel Crocker.

Mr. BERGIN. The same objections will be taken, and the same course will be pursued with respect to Mr. Gage as taken in the case of Governor Stanford.

Commissioner LITTLER. If you are going to examine Mr. Gage let us examine him, and then let counsel take such course as they please.

The CHAIRMAN. Our examination of Mr. Gage will be precisely the same as the examination of Governor Stanford and Colonel Crocker, for the purpose of having the record prepared for the court to compel answers to the questions.

Commissioner LITTLER. Then I think that you had better put him on the stand and swear him.

Commissioner ANDERSON. I do not.

Commissioner LITTLER. I do not see how you are going to make Mr. Gage's case a part of this record unless you put him on the stand. If you are not going to make it a part of the record, why not let him go.

The CHAIRMAN. What does the Commission desire?

Commissioner ANDERSON. Unless you desire something particularly to go on the record, I move that Mr. Gage be excused for the present, on the statement of Mr. Bergin that the same objections will be made and the same course pursued as in the other cases. It would be a waste of time to go over all these objections.

The CHAIRMAN. We will put Mr. Gage on the stand, ask him these questions, let Mr. Bergin make his objections, and then let Mr. Gage go.

Commissioner ANDERSON. I move that Mr. Gage be excused. He is here in San Francisco, and we can secure his attendance if we desire him.

The CHAIRMAN. Is that the judgment of the Commission?

Commissioner LITTLER. Yes, sir; that is my judgment.

The CHAIRMAN. Mr. Gage, you are excused for the present. I think it is a mistake, however.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Thursday, August 11, 1887.

LEWIS M. CLEMENT, being duly sworn and examined, testified as follows:

By Commisioner ANDERSON:

Question. What is your occupation?—Answer. I am a civil engineer.

Q. Where do you reside?—A. At Oakland, Cal.

CONNECTION WITH CENTRAL PACIFIC RAILROAD.

Q. What connection have you had with the Central Pacific Railroad Company?—A. I entered the service of the Central Pacific Railroad Company in 1862 as an assistant engineer. I was afterwards chief assistant engineer, and after the completion of the road the duties of the superintendent of track were added, and this continued up to 1881.

Q. During Mr. Judah's lifetime, did you serve under him?—A. Yes.

Q. What was the exact date of his death?—A. I think it was in the summer of 1863.

Q. Did you accompany him in the various surveys that he made for the purpose of reporting upon or locating the proposed routes?—A. No.

Q. Did you assist him in preparing the reports and the estimates for that purpose?—A. Those estimates that were made, I think, were all made before I entered the service.

Q. After Mr. Judah's death, what was your occupation in connection with this railroad?—A. Assistant engineer, and afterwards chief assistant.

Q. Who was the chief engineer under whom you served after Mr. Judah's death?—A. S. S. Montague.

CONNECTED WITH CONSTRUCTION FROM SCCTION 1 TO PROMONTORY POINT.

Q. Were you actively engaged during the entire period of construction from section 1 to Promontory Point?—A. Yes, sir; all the way through to completion.

Q. Were you there constantly during all the time, winter and summer?—A. On the line of the road; yes, sir.

Q. Did you become entirely familiar with the whole line of construction from the beginning to the end?—A. I cannot say entirely familiar.

Q. What particular portion of the construction came under your supervision?—A. I had direct charge, from the seventy-fifth mile bevond Sacramento, to Truckee, and afterwards from Ogden about 200 miles west.

Q. Was it part of your duty between the seventy-fifth and the one hundred and twentieth sections to measure the amounts of work done by the contractor, as to excavation of earth, rock, &c.?—A. It was, sir.

HOW ESTIMATES OF MEASUREMENT WERE OBTAINED.

Q. How were those estimates obtained?—A. They were obtained as the usual estimates are, by first cross sectioning the line——

Q. Before any work was done?—A. Yes, sir; before any work was done.

Q. So as to get a permanent plan of the original surface?—A. Yes, sir.

Q. Please continue and describe how the subsequent estimates were made out.—A. The work was laid out as near as could be judged from the surface or from test pits as to the character of the material, so as to arrive at approximately the slope at which the material would stand. So far as embankments were concerned on slopes there were none. Earthen material was laid out so as to have a slope of 1½ horizontal to 1 vertical, and on earth-work excavations the slopes ranged between 1¼ horizontal to 1 vertical and 1½ horizontal to 1 vertical.

ORIGINAL SURVEYS IN CHARGE OF CHIEF ENGINEER.

Q. Where are the original surveys, the surveys on which you started work, showing the original surface of the ground?—A. I assume that they are in the engineer's office.

Q. When did you last see them?—A. The last that I saw of them was twenty years ago.

Q. In whose custody?—A. In the custody of the chief engineer.

Q. Who was then the chief engineer when you last saw them?—A. S. S. Montague.

Q. When did he die?—A. I think in 1883.

Q. Who succeeded him?—A. No chief engineer succeeded him as chief engineer of the Central Pacific, that I know of.

PRESENT CUSTODIAN OF THE PAPERS.

Q. Who has charge of his papers; not his individual papers, but of the papers belonging to the Central Pacific Railroad Company which were in his charge?—A. I think that William Hood is the present custodian.

Q. Is he in San Francisco?—A. I do not know that he is here, but his headquarters are in San Francisco.

Commissioner ANDERSON. Can any one present tell us whether Mr. Hood is in this city?

Mr. COHEN. I think he is up on the work.

Q. Have you access to the papers yourself, so that you could tell us whether the original surveys are still on hand?—A. No, sir. I have not had anything to do with them for twenty years.

THE PAPERS WOULD NOT STATE TOTAL EXCAVATION.

Q. Those papers, if examined by a railroad engineer and compared with the present location of the road-bed, would inform him correctly of the total amount of excavation taken away and the total amount of filling done. Is not that so?—A. Not altogether so.

Q. In what respect would they fail to do so?—A. They would fail to do so probably at Secret Town cut. That was a cut where thousands of yards had slid down and the original surface of the ground was lost there. Again, at Gold Run the original surface has been destroyed by slides. The original surface immediately about Alta has also been destroyed. But in the majority of cases the engineer could tell pretty closely.

Q. Then, do I understand that on those sections where you were employed the determination of the quantity of work done was effected by you by measurements, at given periods, of the surface, as you found it, and then by obtaining an estimate of the amount done up to the date of your examination?—A. Yes, sir.

Q. By whom were these measurements made?—A. By my assistants and myself.

Q. And, of course, no matter what distribution of the classes of excavation might be made, when you get through and completed the work, the aggregate of all the classes of excavation would equal the entire excavation, and that could be obtained by an engineer who would compare the original survey with the final location of the road?—A. If the measurements were correctly made and could be made.

FIVE CLASSES OF EXCAVATION.

Q. Who had charge of distributing the various classes of excavation?—A. I had.

Q. How many classes of excavation were there?—A. I have not seen those specifications for twenty years, but my recollection is that the classifications of excavation were divided into five.

Q. Please enumerate them as you remember them?—A. The first class included sand, earth, loam, clay soils, and loose gravel. The second class was loose rock and material which could be moved without the use of powder. The third class was indurated gravel and soft rock. The fourth class was a hard rock, and the fifth class was exceedingly hard rock.

Q. Was it flint rock?—A. Flint rock; that is my recollection.

MEASUREMENTS BOTH VERTICAL AND HORIZONTAL.

Q. When you prepared to make an estimate, and made your measurements showing the amount of material that had to be removed between the date of one estimate and the date of the following estimate, how could you determine how much of that belonged to the first class, of earth, how much to the second class, of clay, gravel, and earth, and how much to the third class, of indurated earth?—A. That was determined by measurements both vertical and horizontal.

Q. The measurements, of course, were made before the material was removed?—A. Certainly. The original cross-sections will give you the surface of the ground. Now, if that surface was soft material, it could be moved, down to the rock, and on the rock would be taken another cross-section.

DETERMINING BETWEEN TWO CLASSES OF EARTH.

Q. That I understand, it being the usual course of distinguishing between rock and earth; but I do not yet see how, exactly, with any precision, you could determine between two classes of earth, one being what you call sand and loose gravel, and the other earth somewhat hardened by the admixture of clay?—A. Loose gravel, and earth, and sand were one class.

Q. Define your second class again.—A. The second class would be loose rock and material that could be removed without the use of powder.

Q. Do you say that that was the same class as earth and sand?—A. No; I did not say that.

Q. Then tell me, if both classes were mixed loosely together, and without a defined surface passing one into the other, how could you, by measurement before the work was done, or by examination after the work was done, distribute them?—A. That material was usually stratified so that it could be easily measured.

NO RECOLLECTION OF COST OF REMOVING EARTH.

Q. Do you know what, at that time, was the current price for removing earth under such circumstances as you worked?—A. No; I do not. Engineers, usually, for their own information and to use in the future to assist them in determining the cost of similar works, endeavor to arrive at the cost, but the cost of all that work was beyond any use of any engineer. There was no valuable data in it for any engineer.

Q. Do you know what was the agreed price between the contractors and the railroad company for each class of work?—A. I did know, but the engineers on the line had so much to do, that I arranged with the chief engineer to take the estimates as I sent them down to him and work them out in his office, so that I had very little to do with extending the prices.

Q. What is your present recollection of these prices?—A. I have no recollection of them at all.

Q. Do you remember what the price was per mile for grubbing and clearing?—A. No.

GRUBBING AND CLEARING ON SECTIONS 75 TO 100.

Q. How much work was there of that character on the sections that you were on—75 to 120?—A. All the way; the whole distance.

Q. You saw all of that work from section 1 to the State line?—A. No, sir; from 75 to 120.

Q. How much of that work was there?

The WITNESS. Do you mean grubbing and clearing?

Commissioner ANDERSON. Yes.

A. All the way; some of it was very heavily timbered, the trees ranging from 2 to 4, 5, and 6 feet in diameter.

Q. Where you had to fill, all the grubbing and clearing that you did was to cut the trees down, was it not?—A. That was clearing, not

grubbing; excepting, my recollection is, that fills of 4 feet or less were to be grubbed, and over that and under 8, I think, close cutting.

Q. So far as the timber was concerned, would that not always pay for itself?—A. It would if there was a market for it.

Q. As things were in 1868, when you were there, how was it?—A. It would not pay for itself, because there was no market.

COST OF PART OF GRUBBING $5,000 A MILE.

Q. Have you any idea what it cost per mile to do that grubbing and clearing?—A. I think that some of it cost as high as $5,000 a mile.

Q. How many miles would cost that sum?—A. There would not be much; probably 4 or 5 miles where there was the heaviest timber.

Q. How wide did your operations extend—what was the width of the clearing?—A. The width of the clearing was usually 100 feet on each side of the line, but in many cases where there were very tall trees—trees that would reach the line—they were required to be cut down outside of this limit.

Q. What was the width of the grubbing?—A. The grubbing was only the width of the embankment.

Q. How wide was it, 22 to 25 feet?—A. Yes, sir; from 20 to 25 feet.

"NOT YANKEE FORESTS."

Q. Will you please describe how cutting down the trees, no matter how thick, for the length of a mile and grubbing for a width of 20 feet through that mile could cost $4,000 or $5,000?—A. My recollection is this, that at the time they were clearing that away there was snow on the ground, probably to a depth of 1½ to 2 feet, and I think that there were over 300 men at work fully ten days clearing off a mile. Those are not Yankee forests, but forests with trees 4, 6, and 8 feet in diameter.

Q. Taking your average work there of the width of your clearing, what distance would give you an acre?—A. About 7 chains.

Q. About 400 feet?—A. About 400 feet.

Q. That would be about 13 acres to a mile, if you cleared the whole width of 200 feet?—A. Yes, sir.

Q. That would be an allowance of $400 an acre for grubbing and clearing?—A. At your figures, yes, sir.

Q. Is that the usual cost of grubbing and clearing in rough country here?—A. Oh, no. I do not think that you understood one of my answers.

Mr. COHEN. There are different modes of grubbing and clearing.

The WITNESS. You do not understood, I think, one of my answers. One of my answers was that the clearing was a hundred feet on either side of the road, not that the clearing was a hundred feet wide.

Commissioner ANDERSON: I simply ask you, as the clearing progressed, how many acres there would be to a mile of clearing.

The WITNESS. About 24 acres.

Q. That would be about $200 an acre for grubbing and clearing, would it not?—A. Yes, sir.

PRICES RANGED FROM $200 TO $4,000 OR $5,000.

Q. Describe the rest of this grubbing and clearing. What was the average cost of it in those sections?—A. There was some of it probably that cost from $200 to $300 a mile, and probably 2 or 3 miles of it cost $150 a mile.

Q. So that it ran all the way from $200 to $4,000 or $5,000 a mile?—A. Yes, sir.

Q. According to the character of the country and the timber?—A. According to the character of the country and the size of the trees.

Q. In regard to this excavation, was there any serious difference between the cost of removing the different qualities of earth?—A. Yes; very much.

CANNOT COMPARE PERCENTAGES OF COST.

Q. How much more would it cost to remove class No. 3 than class No. 2 or No. 1?—A. I do not know just what it would cost.

Q. I ask you to compare the percentage of cost. Do you know it?—A. I do not know it.

Q. Assuming that $100 would remove a certain quantity of earth of class No. 1, how much would it require to remove the same quantity of class No. 2 or class No. 3?—A. I do not know their relative cost.

Q. Can you give no figures or approximation?—A. No.

Q. Would it cost more to remove class No. 3 than it would to blast solid rock?—A. It would depend a good deal upon the character of that solid rock. There were some rocks there so hard that the ordinary powder with from, as near as I could recollect, three to five shots fired would not have any effect as to blasting it or breaking it up.

Q. Do you remember whether there was a very material difference between the price allowed for class No. 3, for earth, and the price allowed for class No. 1?—A. I could not say.

Q. Who else assisted you in determining how much of class No. 3 there was in this work?—A. I usually made the classifications myself.

MR. CROCKER INTERESTED IN CLASS 3.

Q. Was Mr. Crocker there frequently?—A. Not when I made my measurements.

Q. Was he not there frequently during that work?—A. Oh, yes.

Q. Every day?—A. No. He was there very often. He was a very hard-working man.

Q. Were you not aware at the time that he had a strong direct interest in the increase of class No. 3?

The WITNESS. That he had such an interest, do you mean?

Commissioner ANDERSON. Yes.

The WITNESS. He was one of the contractors, and it is quite natural that he would have.

Q. That is not answering my question. Why does it follow that as he was one of the contractors he had an interest in making class No. 3 as large as possible?—A. He could not make class No. 3 as large as possible, because that was in my hands.

Q. I asked you whether you were aware that he had an interest at the time, or would receive more money by making class No. 3 as large as possible, that if there were any doubt as to the earth belonging to class No 2 or class No. 3, it would advantage Mr. Crocker to give the benefit of the doubt to class No. 3. Were you aware of that at the time you were doing this work?

(Question repeated.)—A. That idea never struck me at all.

Q. It never struck you?—A. No; Mr. Crocker had nothing to do with the classification of the work.

Q. Does my question say that he had?—A. It infers it.

Q. I asked you simply if you knew when you were making those estimates that it would benefit Mr. Crocker's pocket to make the estimate for class 3 as big as you could?—A. No, sir; I never had any such ideas.

Q. You did not know that at the time?—A. I never thought of it.

Q. Do you know that the allowance for class No. 3 was three or four times as much as the allowance for class No. 1?—A. No; I do not.

Q. Did you ever know it?—A. I knew the prices at one time, but I do not now know what they were.

Q. You did know the prices at the time, did you?—At one time, I did.

CHIEF ENGINEER MADE THE FINAL ESTIMATES.

Q. Were the final estimates for your sections kept separate or were they combined with the final estimates for preceding sections?—A. I do not know how the final estimates were made. I did not make the finals.

Q. Who made the finals?—A. I think that the finals were made by the chief engineer—what there was left of them.

Q. Are you able to state from your recollection, as that land lay there in your sections, whether it contained more excavation of the first or of the second or of the third class?—A. No; I cannot state. There was a large amount of third, fourth, and fifth class.

Q. The fourth class, I understand, is rock; am I correct?—A. Yes, sir; I think there were five classes.

Q. There is a sixth class entered here on the estimate, besides tunnels. I think there are six classes on all of them. Is there anything peculiar about the disposition of this earth that calls to your mind that in some parts the third class was overwhelmingly greater than the first and second?—A. Sections 106 to, I think, 113 or 114 were nearly all rock.

EXCESSIVE AMOUNT OF THIRD CLASS MATERIAL.

Q. Please examine this final estimate, to which I call your attention. It includes some sections which were not directly under your supervision—sections 68 to 92—state whether you have any recollection as to the material removed there which will explain why the third class, as to which the price is $1.47½ a yard, appears to have been removed to the extent of over 800,000 yards; while the first class, at 45 cents, appears to have been removed only to the extent of 280,000 yards, and of the second class, at 65 cents, but 168,000 yards were removed?—A. I cannot tell anything about that.

Q. Is that because the sections are mingled together?—A. Yes, sir.

Q. If you had the individual reports of your own sections, could you give some explanation?—A. I can give you now, from recollection, a general idea.

Commissioner ANDERSON. You may give it.

WORK ON SECTION 83 TO SECTION 114 DESCRIBED.

The WITNESS. From section 83 to section 114, with the exception, probably, of 3 miles, are all one class, of the most expensive material.

Q. Do you mean rock?—A. Yes, sir; rock. There was some exceedingly hard rock above Cisco. From the summit of the Sierra Nevadas and including the summit, for about, I think, 5 miles, it was bare granite bluffs.

Q. Do you mean 5 miles going east?—A. Yes, sir; going east. From there to Truckee, or rather up to section 113, it was granite and conglomerate rock, all going under the head of the more expensive classification.

Q. Would that conglomerate rock come under the third class of earth, excavation, or of rock excavation?—A. My recollection is that it would come under the third class; it may have been the fourth class.

Q. The price of the third class appears as $1.47½. The fourth class which you describe as rock, is $2.50. Does that aid your recollection?—A. Some of that would come under the fourth class, then.

SECTION 75 TO SECTION 83 DESCRIBED.

Q. Please describe in the same way from section 75 to section 83.—A. From section 75 there were a great many cubic yards of material, mostly of clay slate. There was some very hard conglomerate rock, and some very hard solid rock, and the quantities moved were very large. In one of the largest cuts, one that is locally termed Prospect Hill, the earth was taken out by washing it. Large mining ditches were put into it, and it was washed out after the ground had been loosened with powder and carried out down the slope with water. It was broken up and carried out in that way.

Q. How extensive was that excavation?—A. That was only in the one cut. Below, at Gold Run, the slides were moved by breaking the material up and washing it also.

Q. Washing it down the side of the mountain?—A. Yes, sir; washing it down the side of the mountain.

Q. Do you recollect the length of those cuts?—A. No; I do not. The profile would show, however.

DUTIES CONNECTED WITH THE MASONRY.

Q. Did you have any connection with the masonry?—A. Yes, sir; I had direct charge of the masonry.

Q. About this masonry, what were your duties?—A. My duties were to have the masonry laid out, to supervise it, and to see that it was properly built.

Q. Was it also a part of your duties to measure the work done for the purpose of making estimates for payment?—A. Yes, sir.

Q. Do you remember what was paid per yard for masonry—bridge masonry?—A. Not distinctly.

Q. Do you know what were fair prices for that kind of work at that time?—A. As nearly as I can recollect, I think that what was called first-class masonry was worth either $14 or $16 then. I do not remember. In fact, I am not clear about that at all.

STONE ALONG THE LINE USED FOR BRIDGES.

Q. Where did the material that was used come from?—A. Usually along the line, where it could be had.

Q. Did you not find plenty of stone between sections 75 and 120?—A. Yes, sir.

Q. I think that you described several miles of solid granite, did you not?—A. That was from the summit east.

Q. Did you use the stone which was found on the line of the railroad for the purpose of constructing the masonry part of the bridges?—A. Usually; yes.

Q. And your recollection of the average cost is that it was from $14 to $16?—A. For the first class; yes, sir.

CLASSES OF MASONRY.

Q. How many classes of masonry were there?—A. I think there were ashlar, rubble in course, dry culvert and paving, retaining-walls.

Q. Rubble in course, what would that cost, about, per yard on the line of that work?—A. I do not know what it would have cost.

Q. It was less than the ashlar, I presume?—A. Yes, sir; because the ashlar was required to be bedded—uniform beds.

Q. Sufficiently dressed to admit of one stone lying squarely on another?—A. Yes, sir.

Q. What is the next class after rubble in course?—A. Dry culvert.

Q. The stone that you used for dry culverts, what was that worth per yard?—A. That was stone with split corners laid square on the face of the wall. That was probably worth in the neighborhood of six or seven dollars.

Q. What do you refer to by paving?—A. Paving was the foundation for the culverts.

Q. It was simply gathering the paving stone together and making a fair bed for the water to flow on, was it?—A. Yes, sir; and to prevent washing out.

Q. As to the retaining walls; how much was that worth, per yard?—A. Under ordinary circumstances, the retaining-wall material was worth, probably, four and a half or five dollars.

WOOD-WORK IN CHARGE OF ARTHUR BROWN.

Q. Had you any connection with the wood-work—timber?—A. No, sir; not directly. That was in charge of the superintendent of bridges.

Q. Who was he?—A. Mr. Arthur Brown.

Q. Did you take any part in the location of the base line of the mountains, the point at which the $48,000 per mile was to commence?—A. No, sir; I had nothing to do with it.

Q. Did you know of the investigations that were made at the time for the purpose of determining that point?—A. No; I did not know that there were any investigations.

ARCADE CREEK THE GEOLOGICAL BASE OF SIERRA NEVADAS.

Q. Do you know the point that was selected as representing the foothills of the mountains, 7 miles from Sacramento?—A. I understood that Arcade Creek was selected as the geological base of the Sierra Nevada Mountains. Beyond that, I know nothing about it,

Q. As a matter of fact, is that the point where the more difficult and mountainous construction of the road commences, or can be said to fairly commence?—A. The ground there is rolling.

CONSTRUCTION MORE DIFFICULT EAST THAN WEST OF THE BASE.

Q. Is it any more difficult for construction on one side, east of that point or west of that point for a distance of 4 or 5 miles, than on the other?—A. The work is heavier east of Arcade than it is west of it.

Q. I mean, limiting yourself to 5 miles on each side of Arcade and bearing the American River in mind?—A. I cannot recall the profile in mind now.

Q. Can you recall any special difficulty which would justify you in saying that, on the whole, the one was difficult and mountainous construction and the other was not?—A. The work east of Arcade is far more rolling than it is west of Arcade.

Q. Does that feature commence immediately or after a lapse of 7 or 8 miles after you leave Arcade going east?—A. I would not say now, but it seems to me that the work is comparatively light there for 2 or 3 miles just immediately east of Arcade.

Q. You say it is comparatively light?—A. Yes, sir.

NO FILL MORE THAN 22 FEET HIGH.

Q. What is the highest cut, measuring the cutting height, or the highest fill as you proceed eastward from Arcade for a distance of from 10 to 14 miles?—A. I do not think that there is a fill there that is more than 22 feet high.

Q. More than what?—A. Twenty-two.

Q. Twenty-two feet, is that what you mean?—A. Yes, sir; and I do not think that there is a cut deeper than 10 or 12 feet.

Q. Is there a fill of over 8 feet in height for 14 miles east of Arcade?—A. My recollection is that there is; yes, sir.

Q. Can you mention it or locate it?—A. I can locate it on the profile.

Q. Can you locate it now from memory?—A. No; I cannot locate it now—to give you that point. After a road is built of course we pay no attention to heights, but I remember setting the grades for the track over there beyond Arcade, and I recollect climbing up a bank. My recollection is that it is about 22 feet. It may not be.

TWO HUNDRED MILES OF NOT THE MOST AVAILABLE LINE.

Q. In regard to the line which was selected, was it, in your judgment, on the whole, the best and shortest line that could have been obtained?—A. I believe that the line over the Sierra Nevadas was the best line.

Q. Is it your judgment that the location of the line from Truckee to Promontory Point was the shortest that could have been selected with reference to engineering questions and other advantages of location?—A. I do not think that about 200 miles of that line was the best that could have been secured.

Q. Between what points?—A. Between Ogden and Toano.

Q. Is it your judgment that the line selected was longer than the line that you would consider the best line?—A. I do not think that there was much difference between the two lines. I cannot recall it now—the lines that were compared.

LINE SURVEYED BY UNION PACIFIC THE BEST.

Q. You mean the line actually selected and the line that you would have selected, those are the two lines that you refer to, are they?—A. No; I have reference to two lines, one line surveyed by the Union Pacific and the other was surveyed by the Central Pacific. I thought that the line of stakes as laid out by the Union Pacific was a better line than the Central Pacific was building on.

Q. Which line has ultimately been adopted and is now in operation?—A. The line, as I understand it, was accepted and adopted by the Secretary of the Interior.

Q. Is it the Union Pacific or the Central Pacific line?—A. The Central Pacific line to Promontory, or the line to a little east of Promontory.

Q. I want to know if that line, as now in operation, is longer than the line which you would have considered the best line between the same points?—A. I do not remember that point.

Q. How much did you say you were in charge of at the east end of the road? How many sections?—A. This way, about 200 miles from Ogden.

Q. From Ogden west?—A. Yes; from Ogden west.

CHARACTER OF COUNTRY FROM OGDEN WEST.

Q. Please describe the character of that country.—A. Coming west from Ogden, the line crosses Bear River near Corinne; then it follows over a comparatively flat country to Blue Creek.

Q. How many miles from Ogden to Bear River?—A. I cannot remember all those things.

Q. From Bear River, coming west, what is the character of the country?—A. Coming west to Blue Creek station, Blue Creek station must be about 43 or 44 miles from Ogden; then the ascent over the Promontory Mountains is through a gravel country, and considerable limestone, until you reach the summit of the Promontory Mountains.

Q. How long an ascent is that? How many miles do you keep going up?—A. Eight or ten, I think.

Q. And how far is the summit of the Promontory Mountains from Ogden?—A. About 53 miles.

Q. Then continuing west to the end of your work, what is the character of the country?—A. Continuing west, the lines cut through some limestone rock, quite a number of cuts, till you reach the western slope of the Promontory Mountains, and then the work is comparatively light until you reach the base. From the base of the Promontory Mountains to the base of the Ombey Mountains the work is comparatively light.

Q. What is the name of the valley or depression between these two ranges which is crossed by the road?—A. I do not recollect the name.

Q. What is the distance?—A. It must be about 20 or 21 miles. There is some heavy work getting over the Ombey Mountains, and more or less all the way to Terrace, about 124 or 126 miles west from Ogden. Then from Terrace for 24 miles, I think, the work is comparatively light till you reach the Toano Mountains. The material in the Toano Mountains, as I recollect it, was partially indurated gravel and limestone. From there to Wells there is a series of cuts. There are some heavy cuts and some heavy embankments, but no very heavy material.

Q. How far did that bring you?—A. About 200 miles.

Q. Did that bring you to the end of your division?—A. There was no definite point to the end. I was to come this way as far as I could.

ENGINEERS WHO HAD CHARGE.

Q. Who had charge of the division between the point you have mentioned and the Truckee River, or the end of your other division, section 120?—A. There were several engineers. One was named McCloud.

Q. Is he living?—A. He is dead. I think Mr. Phelps was another. He is dead.

Q. Do you say that he is dead also?—A. Yes, sir; and a man by the name of Haslett, I think, had a division there. He is dead.

Q. Do you remember any engineer now living who had charge there?—A. Just now I cannot recollect any. Mr. Ives was there. He is also dead. Mr. Hutchinson was also there. He is dead.

ENGAGED IN THE WORK FROM 1863 TO 1869.

Q. How long did the work on that 200 miles take?—A. I really cannot tell you.

Q. You finished in May, 1869, did you not?—A. I left there before it was finished.

Q. When did you go there?—A. According to my recollection, I went there in June, 1863, and I think that I left there in February, 1869.

Q. Did the work commence immediately after you went there?—A. Very soon afterwards.

Q. When you say that the work commenced shortly after you went there, do you mean the work at the State line or the work at the 200-mile point?

The WITNESS. What State line?

Commissioner ANDERSON. The State line of the State of California; section 138.—A. I was not there at all.

Q. You do not know anything about the work between section 138 and the end of your division?—A. I did not have immediate charge of the work between Truckee and Wells.

Q. Still you went over the line occasionally; you had to go over it to reach Wells, did you not?—A. Not always.

COMPLETED ROAD EXTENDED TO RENO.

Q. Where did you live then?—A. In the State of California. I lived at Ogden after I left here in 1868. I remained on the work until 1869.

Q. When you left here in 1868 in order to go to the work east, had the work proceeded at all between the Truckee River and Wells?—A. I went to Reno on the completed road.

Q. Did the completed road extend to Reno?—A. Yes, sir; I think that was on the 6th day of June.

Q. East of Reno, what had been done?—A. I do not remember just what was completed.

COMMENCED AT OGDEN AND WORKED WEST.

Q. To come back to your portion between Wells and Ogden, did they commence work at Wells—I mean the work of grading and laying the track—before the road directly west of it had been completed to that point?—A. Oh, yes; they worked from Ogden west.

Q. Do you say that they commenced at Ogden and worked west?—A. Yes, sir; they worked west from that point.

DRIVING THE LAST SPIKE.

Q. Then the last spike was only metaphorically driven at Ogden. As a matter of fact, was not the junction made some distance west by the working parties coming together?—A. Oh, no.

Q. Please explain how the work progressed.—A. They do not drive spikes usually until they get together with the track. The work that I have reference to from Ogden west was the grading. We could not get rails over there. This last spike was driven by connecting the track of the Union Pacific with the track of the Central Pacific.

Q. What I am getting at is that the work as it progressed westward, I suppose, consisted of preparing the soil, grading, building embankments and making fills, and making cuts—all that work, you say, proceeded from Ogden, and went towards the west?—A. We worked west; yes, sir.

Q. And that is the main work of building a railroad?—A. Yes, sir.

Q. That work you supervised from June, 1868, until the following February?—A. I think that it was February, 1869; yes, sir.

Q. Was it substantially completed when you left?—A. No; there was considerable yet to be done. I think that the greater portion of the hard material was left after I came away.

RAILS LAID IN 1869.

Q. When was the rail laid on your division—your 200 miles?—A. I think that it was laid in 1869.

Q. You left in February, 1869; did you?—A. Yes, sir.

Q. It was laid between that time and the following May; it was laid between the time you left and the time that the union was made which was in May, 1869?—A. I think about the 1st day of March, 1869, the end of the Central Pacific track was about 200 miles from Ogden.

LABORING MEN IN CHARGE OF BENSON AND WEST.

Q. Who had charge of the laboring men, the men who were removing earth and rock on your division while you were there?—A. There were two men had charge of it; a Mr. Benson was one, and another was a man by the name of West. Benson and West were the men, I think.

Q. Are they living?—A. No, sir; they are both dead.

Q. For whom did you work on this division; in whose employ were you?—A. In the employ of the Central Pacific, I think.

Q. Do you know? Who paid you?—A. I am not positive just now. There was a change made there some time, but I do not know whether it was made then or not.

Q. Did you deal substantially with the same people with whom you dealt before?—A. I dealt with the Central Pacific people usually.

WITNESS EMPLOYED AWHILE BY CONTRACT AND FINANCE COMPANY.

Q. Do you not remember that you were employed by the Contract and Finance Company?—A. I was for awhile; yes, sir.

Q. To whom did you report?—A. I received my instructions from the chief engineer.

Q. From Mr. Montague?—A. Yes.

Q. Did you also prepare the preliminary surveys showing the lay of the ground there, and the original surveys for this 200 miles?—A. Not the original. I surveyed a line following the route which I understood, and was so informed by the chief engineer, had been accepted by the Secretary of the Interior, and the instructions were, I think, to hold to the line as it had been located.

Q. Is that the line which you cross-sectioned?—A. Yes, sir; excepting the portion immediately on the Promontory Mountains, which it was afterwards decided to change for 5 or 6 miles.

Q. Who cross-sectioned that 5 or 6 miles?—A. It was under my charge.

ORIGINAL CROSS-SECTIONS IN CUSTODY OF CHIEF ENGINEER.

Q. Do you know where those original cross sections are?—A. No, I do not; those cross-sections were all put in a book, I think cross-linked and lettered, to be put away for the future.

Q. Do they belong with the cross-sections for sections 75 to 120 also? Do they belong in the same custody?—A. They belong in the custody of the chief engineer.

Q. And if they can be found now, they should be amongst his papers?—A. Yes, sir.

INTERIOR DEPARTMENT FURNISHED WITH PROFILES AND MAPS.

Q. Do you know whether copies of those original cross-sections were furnished to the Interior Department at Washington?—A. I never heard of it.

Q. You never heard that they were?—A. No, sir. They were furnished with profiles, I think. That was usual, and they were also furnished with maps. I think that was the requirement. So far as the cross-sections are concerned, however, I never heard of their being furnished.

Q. Do you mean that the Department of the Interior was furnished with maps and profiles?—A. Yes, sir.

Q. That would only give you the ultimate location of the railroad as constructed, but would not inform you as to the amount of work that was done to change the natural surface of the ground to an artificial surface?—A. No, sir.

DESCRIPTION OF SECTIONS BETWEEN 120 AND WELLS.

Q. Can you give us a description applicable to sections between 120 and Wells, such as you have of the sections of which you had immediate direction?—A. Only generally. The work all done through the Truckee Cañon to Wadsworth, with probably an exception of 8 miles, was all heavy work. From Wadsworth to Brown's Station, the country was rolling, with some rock and a little conglomerate and loose gravel. From Brown's Station to the Humboldt River, or the first crossing of the Humboldt ——

Q. How many miles?—A. I do not remember. This work was comparatively light. The soil was an alkaline soil.

Q. It is quite a long stretch there, is it not?—A. Yes, sir. From the first crossing of the Humboldt for about 6 miles the work is comparatively light. It requires a gradient of 1 per cent. per mile to get over the Oreana Summit. There was considerable material removed there, but the work was inexpensive. From there to Winnemucca the line is carried over a rolling country without any rock.

GRADES REDUCED BY CUTS AND FILLS.

Q. Do you remember whether the line was made to follow the slope of the hills, or whether the grades were reduced by cuts and fills?—A. They were reduced there by cuts and fills.

Q. Was this to any material extent?—A. No; there was no heavy work there; no comparatively heavy work. The heaviest work probably on that portion was in the Palisade Cañon, and there there was considerable rock work; and there is rock work east of Elko.

FROM WINNEMUCCA TO WELLS DESCRIBED.

Q. Please continue your description from Winnemucca?—A. From Winnemucca to Wells the heaviest work was in the Palisade Cañon and I think that about 20 miles east of Elko there was some rock work. The last 30 or 40 miles to Wells was comparatively light. There was light grading.

Q. Are you in the employ of the Central Pacific Railroad Company now?—A. No, sir.

COULD BUILD THE ROAD FOR $22,000 A MILE.

Q. From your general knowledge as an engineer, having had supervision of work of this character, what do you believe it would cost to-day to build that road as it stands, from Wadsworth to Ogden, per mile?—A. You could build that road from Wadsworth to Ogden, as roads are ordinarily built, I suppose, for $22,000 a mile.

By Commissioner LITTLER:

Q. Does that include equipment?—A. That would take a moderate equipment.

By Commissioner ANDERSON:

Q. Would that take $2,000 or $3,000 for equipment?—A. Yes, sir.

Q. Do you mean that it would cost as much as that, averaging the hard with the easy?—A. Yes, sir.

PRICES THEN BEYOND ANYTHING EVER HEARD OF.

Q. From your knowledge of the circumstances under which that road was actually built, can you form an estimate as to what the actual cost of construction of the 200 miles of which you had supervision was from Wells to Ogden?—A. No, I could not; and for this reason: The prices then were away beyond anything that I had ever heard of. I bought and paid for it myself; oats at 14 cents per pound. We had very little barley. I paid 6 cents a pound for hay; and anything that we wanted or needed over there in the way of tools had to be hauled from California. I could not, therefore, give you any idea.

CHIEF ITEMS OF EXPENSE OF CONSTRUCTION.

Q. What were the chief items of the expense of construction?—A. Labor, transportation, and pushing on the work as rapidly as it was pushed.

Q. Will labor, material, and transportation cover everything?—A. Yes, sir.

Q. Can you tell me how they figure in the result, what proportion each of those three items bore to the other?—A. No; not accurately.

Q. Was there more labor than material, I mean as expressed in dollars?—A. There was a great deal of labor lost in carrying the men forward. There was a large expense in that.

Q. You are then unable to state with any degree of accuracy, so that you would allow it to be put upon the record as your deliberate judgment, what the cost was to build that 200 miles of road?—A. No, sir.

Q. How many men were engaged there during the period that you were there?—A. I do not remember. I had nothing to do with the men directly, further than to see that the work was pushed through.

A GREAT MANY TEAMS EMPLOYED.

Q. Do you not recall how many men there were on each section; how many men were actually engaged in doing this work?—A. No. The force there was more in teams. A great many teams were employed. Some camps would have fifty or sixty teams. I never counted the teams, never took any particular interest in them, never cared about them so long as we got the work done.

Q. If there is any general information as to the character of the work and the manner in which it was carried on which you can give us, in addition to what you have already stated, we should be very much pleased to hear it. I desire to say that you have given a more connected story and a more vivid description than we have been able to get from anybody else. Are you aware that within a few years a representation was made to the board of equalization of one of the counties in the State of Nevada, in which some of the company's engineers represented that the road could be built for $9,000 per mile?—A. I suppose that for equalization purposes that would be the superstructure.

Q. Do you think it would have no reference to the grading or preparation of the road-bed?—A. I do not know; but I think not.

Q. Do you know who the engineers were who made that statement?

The WITNESS. What year was that?

Commissioner ANDERSON. 1880.

The WITNESS. No, sir; I do not remember.

Q. It was at Winnemucca. Mr. Ryan appeared for the company, but the names of the engineers who made these statements are not given. Do you recollect anything about it?—A. No, sir; I do not recollect.

DID NOT FORM ANY CONTINUOUS ESTIMATE.

By the CHAIRMAN:

Q. Did you, as an engineer, at the time form any estimate as to the cost of the construction of the road, including the stations and depots, switches, turn-tables, side tracks, water tanks, water stations, platforms, warehouses, round houses, machine shops, repair shops, &c.?—A. I did not form any continuous estimate. Mr. Judah and myself would work in the office at Sacramento sometimes until midnight or 1 or 2 o'clock in the morning making estimates of the cost of shops at one point, and shops at another point, and buildings at different points, but no continuous estimates.

SACRAMENTO BRIDGE COST OVER $100,000.

Q. Is it true that the first 7 miles from Sacramento eastward could have been actually constructed for less than $11,500 per mile, based on any estimates that you know of?—A. Oh, no. My recollection is that the bridge cost over $100,000.

Q. How would you place such an estimate in comparison with any estimate that you made?—A. Eleven thousand dollars the bridge alone, let me understand your question.

The CHAIRMAN. I refer to the first 7 miles from Sacramento east.

The WITNESS. Do you mean they were estimated to cost $11,500 per mile?

Q. Could the cost of construction under any estimate that you made or considered be less than $11,500 per mile?—A. My recollection is that the charge to that estimate alone for bridging would be thirteen or fourteen thousand dollars.

Q. How much under the actual figure would you regard such an estimate? I am asking you now as a railroad engineer; having had experience at that time, how much under the actual figure would you regard $11,500 per mile as the cost of the construction of that section of the road?—A. I should consider that, at the prices then paid, $30,000 a mile too little.

ESTIMATE AS TO COST OF CONSTRUCTION.

Q. Then your estimate, based upon what you recall as to the circumstances at the time, would be about $41,500 per mile for that part of the road?—A. That is, taking into consideration the cost of rails, and of course every mile must bear its proportion of the equipment.

The CHAIRMAN. I am excluding rolling stock, and including all equipment except rolling stock. I believe that I named to you what I wanted taken into the estimate is considering the cost of construction.

Mr. COHEN. You mean machine shops, &c.

The CHAIRMAN. Yes, sir.

The WITNESS. That estimate would be about $3,000.

Q. So that $11,500 as the cost of construction would be about $27,000 too little. Is that correct?—A. Yes, sir

Q. Could the next 150 miles east have been constructed for less than $42,000 per mile?—A. That is so much below the figure that I can safely say no.

SOME MILES COST FROM $200,000 TO $300,000.

Q. How much below the figure is the estimate of $42,000 per mile for the next 150 miles?—A. I could not say exactly. There were some miles there that must have cost from $200,000 to $300,000 a mile.

Q. As an engineer, and as an engineer at the time of the construction, I ask you how much less do you regard this estimate of $42,000 per mile than the estimate which you placed upon it?—A. I never placed any particular estimate on the cost of the road, only relatively.

Q. Speaking relatively, how much less would the $42,000 per mile for the next 150 miles be under any estimate that you have considered in any way?—A. If I were going to make a guess at that, I should at least double that estimate.

NEXT SIX HUNDRED AND TWENTY-SEVEN MILES MUST HAVE COST $56,000 PER MILE.

Q. Taking the next 627 miles, could the bed portion of the road have been constructed for $21,000 per mile?

The WITNESS. Have you reference to the time it was constructed?

The CHAIRMAN. Yes; I am speaking of the cost of construction.

The WITNESS. No, sir; it could not.

Q. In your judgment, as an engineer, how much below the actual cost is the estimate of $21,000 per mile for that portion of the road?—A. For that portion of the road in the way it was pushed forward, and everything of that kind considered, it must be in the neighborhood of $35,000 per mile.

Q. Do you mean $35,000 too little?—A. Yes, sir.

By Commissioner ANDERSON:

Q. Do you mean to say that it would have cost $35,000 per mile more than $21,000?—A. Yes, sir.

By the CHAIRMAN:

Q. Then I understand that your estimate for the next 627 miles—your estimate formed from your knowledge as an engineer, you having been present at the time—is about $56,000 per mile?—A. In the manner in which it was built; yes, sir.

NOTHING TO ADD TO THE STATEMENT EMBRACED IN GOV. STANFORD'S TESTIMONY.

By Mr. COHEN:

Q. You have made a statement in writing to Governor Stanford about your connection with the construction of the Central Pacific Railroad, which is annexed to his answer submitted to this Commission, and marked "Exhibit No. 8." Have you anything to add to that statement at this time for the information of the Commission?—A. I do not know that I have anything particularly. The Central Pacific Railroad Company was, in fact, forced to this heavy expenditure in getting over the Sierra Nevadas for this reason: that if it had been a year and a half longer in getting over the Sierra Nevada Mountains it was very likely that the Union Pacific would have met the Central Pacific at Wadsworth. The Union Pacific was endeavoring to get as far this way as it could. It had started and was grading at Wells.

NOT PAYING EXPENSES FROM SACRAMENTO TO WADSWORTH.

By Commissioner LITTLER:

Q. How far is that west of Promontory?—A. That is about 160 miles. They were grading at Grouse Creek, which is about 60 or 70 miles west of Promontory. Of course, if the Central Pacific had been met by the Union Pacific at Wadsworth, its road would have been valueless. Any company meeting it there could have forced the Central Pacific to sell its road at any price which the other company might choose to fix. I have never thought, and I do not think now, that the Central Pacific will come anywhere near paying operating expenses from its local business between Sacramento and Wadsworth.

Mr. COHEN. I would like to have it noted there that the statement in writing made by the witness to Governor Stanford, marked "Exhibit No. 8," and attached to the answer of Governor Stanford, is shown to the witness, and that it is verified under oath.

CLASSIFICATIONS RIGHT AND JUST.

By Mr. COHEN:

Q. During the time that you were assistant engineer, or assistant chief engineer, did Mr. Charles Crocker, or anybody in his interest, directly or indirectly, seek to control your action in the classification of the work, or in the measurements?—A. No, sir.

Q. You made the classification and measurements as appeared to you to be right and just?—A. I did in every case.

WAGES TO CHINAMEN AND WHITE MEN.

Q. What were the wages, if you know, that were paid to the men employed in the grubbing and clearing?—A. I am not clear on that. I think that it was $35 a month to the Chinese who were grubbing and rolling off the logs. The trees were all felled by white men.

Q. What did the white men get?—A. My recollection is that the wood-choppers received $40 a month and their board.

Q. Boarding was somewhat expensive at that time, was it not, in that locality?—A. Yes, sir; it was at that time. It was necessary to take in provisions and whatever was necessary on mule-back by pack-trains.

Q. It would be fair, then, I suppose, to average the wages of men and their board while employed in grubbing and clearing at $2 per day?

Commissioner ANDERSON. You had better ask him what he thinks.

The WITNESS. No; that is too high.

Q. You were paying Chinamen how much?—A. Thirty-five dollars a month, and they boarded themselves.

Q. And the white men?—A. The white men, I think, received $40 per month, and were boarded.

Q. What would you estimate the average wages paid to the men employed in grubbing and clearing, including board, where you boarded them?

Commissioner ANDERSON. Do you mean white men?

Mr. COHEN. All of them.

Commissioner ANDERSON. We cannot average those who boarded themselves and those who were not boarded.

Commissioner LITTLER. You cannot average Chinamen with white men.

Mr. COHEN. Not for political purposes, but in the work of constructing a railroad you have got to average them sometimes.

Commissioner ANDERSON. If you average the cost of boarding the white men, you will have all the elements.

Mr. COHEN. Taking the number of Chinamen and the number of white men employed, what was the average wages?

Commissioner ANDERSON. You have not given him the number of men employed.

Mr. COHEN. Let him get my question down.

Commissioner ANDERSON. I object to your giving him a sum in arithmetic.

A SUM WHICH SOMEBODY ELSE MUST SOLVE.

By Mr. COHEN:

Q. Taking the number of Chinamen employed and the number of white men, what would be the average per day to each of the men employed in grubbing and clearing, so as to get at the cost of the 300 men which you said were employed at one time in grubbing and clearing?—A. That is a little sum in arithmetic which you must get somebody else to solve. We paid Chinamen at $35 per month, and allowed one white wood-chopper to ten Chinese at $40 a month and board.

Q. You spoke of 300 men being employed for ten days in grubbing and clearing a mile. I want to get at the cost of the labor of those 300 men during those ten days.—A. I have given the cost.

COST FOR 10 DAYS FOR 300 MEN.

Q. I want the cost of those 300 men for those ten days. Therefore I ask you what the average wages would be that would be paid to the whole force. How much a day would you estimate was paid to each man?—A. The clearest way that I can answer it is that the Chinese received $30 a calendar month and the white men received $40 a month and board, and there was about one white man to ten Chinese.

By Commissioner ANDERSON:

Q. What was the board worth per day to each man?—A. It was then worth from 75 cents to a dollar a day.

By Mr. COHEN:

Q. Then, according to your figures, there would be about 270 Chinamen and 30 wood-choppers out of the 300?—A. About something like that.

Q. From the way that I figure it out, the cost of ten days' labor and board would be about $4,500 dollars; is not that correct?

Commissioner LITTLER. No; it would not be correct.

Commissioner ANDERSON. It would be between three and four thousand dollars.

Mr. COHEN. Suppose we put it at $4,000. Would that be too high, according to your estimate?

The WITNESS. Not for some of the miles there.

POWDER FOR GRUBBING.

Q. In addition to the wages of the men, what other expenses were there in the way of powder, teams, &c.?—A. Powder was used in the grubbing. Holes were dug out underneath the stump, and from 2 to 10 kegs of powder would be put under the stump.

By Commissioner LITTLER:

Q. Do you mean under one stump?—A. Yes, sir.

Mr. COHEN. All those calculations go to support your statement that some of these miles did cost $5,000 for grubbing and clearing. Then there was the expense of tools, &c.

The WITNESS. It was usually assumed that the men had tools in working. They must have axes, wedges, mauls, and handspikes.

By Mr. BERGIN:

Q. Of course they furnished their own tools, did they not?—A. No, sir; the company furnished the tools.

By Mr. COHEN:

Q. Do you stick to your estimated cost of $5,000 per mile in some instances?—A. Yes, sir; I do.

WORKED FROM 1862 TILL DEATH OF MR. JUDAH.

Q. How long were you on the work during the time that Mr. Judah was chief engineer?—A. From 1862 until his death.

Q. After his death, I think you said Mr. Montague was appointed chief engineer?—A. Yes, sir.

Q. What was the age of Mr. Montague at that time?—A. He must have been about thirty years of age.

Q. Did you assist in making up any of the reports made either by Mr. Judah or Mr. Montague to the directors of the Central Pacific estimates of the cost of work?—A. In parts, I did; not continuous.

Q. I inquire more particularly about the estimates before the work was commenced?—A. No; those estimates were made by Mr. Judah.

Q. Were you engaged in the survey of the route up the Feather River to determine whether it was better to build that way, or by the Dutch Flat route?—A. I made a recoinnaissance over a part of that route.

RECONNAISSANCE OF FEATHER RIVER ROUTE.

Q. On the 30th of August, 1862, Mr. Judah reported to the board of directors of the Central Pacific Railroad Company that he had made a reconnaissance of the Feather River route and the Feather River Cañon, but was not at that time prepared to submit a written report, but would submit a full report soon. He stated that he found the distance by that route more than he expected, probably 80 miles more than by the Dutch Flat route, and believed that it would cost more than double the amount required to construct the railroad over the Dutch Flat route. He recommends the Dutch Flat line as preferable for the construction of the Central Pacific, and that it should be adopted. Was that report made on work done by you?—A. No, sir.

Q. Do you know what it cost to construct the first 18 miles of road from K street in Sacramento eastward?—A. I do not.

Q. Do you know what it cost to construct the road from the eighteenth mile to the State line?—A. No, sir.

Q. In these questions that I am putting to you I am also including the equipment. Do you know what the cost was to the Contract and Finance Company for constructing the road from the State line to Promontory Point?—A. No, sir.

Q. I think that you are in the record as stating that 627 miles of road could have been built for $56,000 a mile. Have you any data from which you made up that estimate? That would be from Reno east 626 miles?

FROM RENO EAST COST $56,000 A MILE.

Commissioner ANDERSON. From Reno east 627 miles would be substantially to Ogden?

The WITNESS. I have answered that question.

Commissioner ANDERSON. I would like to hear the answer again.

By Mr. COHEN:

Q. I would like to know whether you have any positive knowledge whether that would be the cost of the work, or whether you state that from your general knowledge?—A. From my general knowledge I thought that it would cost $35,000 more than $21,000.

By Commissioner ANDERSON:

Q. That is not intended as a close calculation, is it?—A. No, sir.

By Mr. COHEN:

Q. Does that include equipment?—A. No, sir.

COST OF EQUIPMENT PER MILE.

By the CHAIRMAN:

Q. What do you estimate as the cost of the equipment per mile? I judge from the answer that you made, about $3,000.—A. That would be probable, under ordinary circumstances. It is usual to allow one locomotive for every 5 miles, a passenger-car—whether it be a day coach, a baggage-car, a mail or an express car—one in 10 miles, and so far as the freight-cars are concerned, one, two, three, or four per mile.

Q. In estimating the cost of the first 7 miles, you reduce it $3,000 per mile, because rolling-stock is excluded. I ask you if that would be your estimate of the cost of equipping a road with rolling-stock?

Mr. COHEN. He said with moderate equipment.

The WITNESS. At present rates, of course, that would furnish a moderate equipment. A very good locomotive can now be purchased for $7,000 or $8,000, and even less.

SIMPLY AN ESTIMATE AS TO COST.

The CHAIRMAN. I am speaking of the estimate of the road at the time.

The WITNESS. For that part of the road, it would cover it.

Q. Do you include in your estimate that you have given in answer to my questions as to the cost of construction the profits to Crocker & Co. and to the Contract and Finance Company?—A. I have no idea what they were; I know nothing about them.

Q. Do you include in your estimated cost of construction the margin of profit for the contractor?—A. No, sir; I do not know anything about those margins. I am simply making an estimate as to about what it would cost.

Q. The actual cost of material, supplies, and labor?—A. Yes, sir.

Q. Without regard to any profits?—A. I do not know anything about the profits.

COST FROM SECTION 1 TO SECTION 18.

By Mr. COHEN:

Q. While the Commission is asking you on that subject, I will put a question somewhat in the same connection. The first contract let to Crocker & Co. for the construction of section 1 to 18 was for $400,000, to be paid $250,000 in cash, $100,000 in bonds of the Central Pacific Railroad Company, and $50,000 in stock. Assuming that he got the $250,000 in cash, and had sold the bonds at 50 cents on the dollar, and realized at that time from the pay he received $300,000, was that sufficient at that time to have built that 18 miles, including the cost of the American River bridge? This makes $300,000 net cash.

The WITNESS. Three hundred thousand dollars net cash for 18 miles?

Mr. COHEN. Yes, including the American River bridge.

A. No, sir; that is not too much.

Q. Would it have paid the cost of construction for those 18 miles?—A. No, sir.

By Mr. BERGIN:

Q. Was it a reasonable or an unreasonable charge?—A. I would consider that a reasonable charge.

By Mr. COHEN:

Q. Do you know, being an engineer at the time, that Mr. Crocker lost money in performing that contract?—A. No, sir; I do not know anything about it.

SAME CONDITIONS WOULD NEVER OCCUR AGAIN.

Q. You speak of the experience derived in building the Central Pacific Railroad as not of much practical use to an engineer. I would like you to explain that answer a little, if you can.—A. I had reference to the values—the cost. If an engineer were called upon to make an estimate for another road, he certainly would not take into consideration the circumstances and conditions that occurred on the Central Pacific, unless they were identical. The chances are many to one that the same conditions would never occur again.

Q. What was your experience as to obtaining the labor required for the construction of the Central Pacific Railroad at that time?—A. We had a great deal of difficulty in getting labor. The labor was not in the country, and had to be imported.

NOT FEASIBLE TO DIVIDE CONSTRUCTION AMONG DIFFERENT CONTRACTORS.

Q. What is your judgment about the feasibility at that time of dividing up the construction of the different sections of the road generally in your charge, into small contracts and letting them to different bidders, as compared with the mode in which it was constructed, namely, letting the road in the State of California to Charles Crocker & Co. and the road in Nevada to the Contract and Finance Company?—A. The labor and the contractors should be entirely under the control of the company, and in this case they were. If the work had been taken by smaller contractors, say at the rate of 10 or 20 miles, it would have yet been necessary for the Central Pacific to have maintained a large force so that in case of the failure of the contractors in any way, or in the case of any difficulties with their men, which would be sure to occur, labor being scarce, they would endeavor to bid to rob each other of men, the company could in such case continue construction. I do not think that it would have been possible to have carried on the work in that way.

Q. Labor being scarce, if there had been a number of contractors, would they have bid against each other and raised prices?—A. They would have raised prices and disorganized labor.

By the CHAIRMAN:

Q. Did you know of any bids at the time, other than Mr. Crocker's?—A. No, sir.

Q. Did you hear of any proposals to do any of the work?—A. No, sir.

By Commissioner ANDERSON:

Q. Did you hear of any invitations from the company for proposals?—A. I did not.

THE RAILROAD COMPANY COULD HAVE BUILT THE ROAD.

Q. Was there anything that would have made it difficult or impossible for the company itself to have employed yourself, Strobridge, Montague, and Brown and to have conducted that work for itself at cost?—A. No; I do not think there would have been. It was practically done in that way.

Q. And could it have been done just as efficiently as it was done?—A. Yes, sir.

Q. You see no reason why it could not have been done?—A. The railroad company could have built the road.

By the CHAIRMAN:

Q. In that way, according to your estimates, it could have been built at 10 per cent. less than it was built, on the cost of materials, could it not?

The WITNESS. I do not remember making any such statement.

The CHAIRMAN. That was what they added to the cost of the material.

Mr. COHEN. Oh, no; not in the construction of the road.

THE 10 PER CENT. A PROPER THING.

That 10 per cent. is a perfectly proper thing. The 10 per cent. covers the use of tools, and repairs to tools, and the loss of tools, and it is what is usual among contractors. A contractor will very frequently make a bid saying, "I will do so and so, and charge you 10 per cent. over actual cost." In fact, a few days ago, we let a contract on the same plan to a gentleman here in San Francisco. He was to keep an accurate account of the cost and add 10 per cent. That was to be the estimate.

By Commissioner ANDERSON:

Q. But is it not true that if the company had conducted this work in the way I have suggested it could or would have saved whatever profit was made by the contractors?—A. If there was any profit at all, of course the company would have made it; but to all intents and purposes the road was built in that way.

CANNOT SPEAK AS TO PROFITS.

Q. Do you know anything about the profits?—A. I do not know anything about the profits. But so far as efficiency and the control of the company over its contractors was concerned it was just as well as it was, outside of any profits, as to which I cannot speak.

By Mr. COHEN:

Q. You could not have built it as speedily, within several years, if you had let the work to contractors and let them go on with it?—A. I would look upon that as impracticable.

SIMPLY REFERS TO ACTUAL DOING OF THE WORK.

By Mr. BERGIN:

Q. When you say that you suppose the company could do the work as readily as the contractors in the way in which it was done, you do not take into consideration any financial problem, do you?—A. No, sir.

Q. Or any other embarrassments or obstacles that there might be to prevent the adoption of that course?—A. No, sir.

Q. You simply refer to the actual doing of the work, supposing that the company had full means and was at full liberty to adopt one course or the other?—A. Yes, sir.

Mr. COHEN. Mr. Bergin's question explains the reason why it was done by the Contract and Finance Company, instead of by the Central Pacific.

Q. How long have you lived here in this State?—A. About twenty-six years.

MINING CRAZES.

Q. You have had some experience of the effect of mining crazes upon labor in this State, have you?—A. Yes, sir.

Q. Do you remember the Fraser River excitement?—A. I remember the Fraser River excitement, and the White Pine excitement, and the Caribou excitement. These different mining excitements have occurred here from time to time.

Q. And the Washoe excitement?—A. The Washoe excitement was a permanent one.

HOW LABOR IS AFFECTED BY THEM.

Q. Will you state to the Commission how those excitements, occurring as they did from time to time, affected the facilities for getting labor?—

A. Laborers could always secure better wages, twice as much as railroad contractors or corporations could afford to pay, and then there was a possibility of a fortune in the future. They could expect to get rich at it.

IMPOSSIBLE TO GET WHITE LABOR.

Q. Did that operate at all in the calling into service of Chinese labor?—A. It was the direct cause. It was impossible to get white labor. In my own recollection, I remember of hearing it talked of at the time that the Central Pacific had sent to Wells and a little beyond something like two thousand men before they could get one hundred. That was during the White Pine excitement. They would be passed out there free, and would leave immediately and go down to the mines.

By Mr. COHEN:

Q. In the course of your experience as an engineer on the work of construction, did you ever know either of these contractors, Crocker and Company or the Contract and Finance Company, to take any advantage whatever of their connection with the Central Pacific Railroad Company to the disadvantage of the latter?—A. I do not know of any.

FURTHER EXPLANATION OF THE 10 PER CENT.

Q. I would like you to explain to the Commission a little further about this 10 per cent. charged by the construction company; in this respect, for instance, if a bridge burns down and has to be constructed in a hurry, in all such cases the construction company usually has on hand the material for doing the work, so that they are enabled to do it very much quicker than the railroad company could. It is engaged in constructing railroads, and therefore has on hand material that the railroad company itself would not be likely to keep in stock. How is that?—A. They would have the material and the men.

Q. The construction company would have the material and the men, would it not?—A. Yes, sir; and the tools. Their men would also be experienced, trained men. They would understand the character of the work that was to be repaired.

RAILROAD COMPANIES NOT SO WELL EQUIPPED AS CONSTRUCTION COMPANIES.

By Commissioner LITTLER:

Q. Does not every well regulated railroad company have experienced men and material on hand for just such emergencies?—A. Yes, sir; but they do not usually keep as many men as the contracting firm would.

By Mr. COHEN:

Q. Would they have men enough in an emergency of that kind without stripping the road of its usual operatives, the men belonging to the operating department and who are required for the immediate care and protection of the track?—A. No, sir; it would not be economy to maintain that force. For instance, the American River bridge burned down. It caught fire accidentally and was destroyed. If the railroad company had had only its employés to call upon it would have taken a long time to repair that bridge, and if they went on the outside to hire men they would have had to hire whoever they could get, men they did not know, and of course they could not have repaired that bridge so quickly.

Q. How long did it take the Contract and Finance Company to replace that bridge?—A. I do not remember.

WHAT IS ECONOMICAL RAILROAD MANAGEMENT AS TO CONSTRUCTION?

By Commissioner LITTLER:

Q. From the time that this road was completed until the present I suppose that the company has had its chief engineer, its master mechanics, its superintendents of track and its section men, as other roads have had. Is that true?—A. Up to 1873 that was true, except as regards the superintendent of track. Afterwards it was true altogether.

Q. It is also true that they had their own shops at Sacramento, is it not?—A. Yes, sir.

Q. It is also true that those shops contain all the machinery and tools requisite for carrying on the road, is it not?—A. Since the completion of the road; yes, sir.

Q. Do you consider it good railway management for a railway company which has at its disposal all these implements and all those officers to sublet the contract for keeping up the repairs and putting in new work where it is destroyed by fire, flood, or otherwise, and paying another company 10 per cent. net profit on such work. Do you consider that economical railroad management?—A. In some cases it would be.

Q. In what cases?—A. Where there is a great deal of work to be done, where there would be more work than the company had men to spare to execute that work.

COMPETENCY OF CHIEF OFFICERS FOR CONSTRUCTION PURPOSES.

Q. If the company was paying the chief officers that I have mentioned large salaries, I would like you to explain the use which those officers are to the company, unless it is to procure men and materials for carrying on the work of repair and construction as needed.—A. Most of the men that you have mentioned are not competent for that kind of work.

Q. Is it not good sense and good railway management for a company to secure the services of men who are competent for that kind of work?—A. Yes. Did you mention a master mechanic?

Commissioner LITTLER. Yes.

The WITNESS. The master mechanic, as I understand it, is the man who keeps in repair the locomotives or who constructs them. He would be of no use in repairing bridges.

Q. That does not include all his duties, however, does it?—A. If you extend his duties any further, you would give him more than he is competent to attend to.

Q. Do you know of a great railway company anywhere in the United States which carries on the work which you have described through a subcontractor or a contracting company?—A. I cannot name any now.

POOR ECONOMY TO EMPLOY CONTRACT AND FINANCE COMPANY.

Commissioner LITTLER. I do not know either, and I think it was poor economy to employ the Contract and Finance Company to furnish all the materials and pay 10 per cent. net profit. In this investigation we have found that the Central Pacific has paid the construction company $2,000,000 for construction and repairs in a year, or the snug little sum of nearly $200,000 a month. That sum would pay for the services of quite a number of efficient officers, fully competent to construct any kind of work, and to manage any number of men. Do you not think so?

The WITNESS. The Contract and Finance Company were large contractors, I presume, and it is possible that they might have purchased

their material in larger quantities than the railway company would care to keep in stock.

ABILITY OF CENTRAL PACIFIC EQUAL TO THE REQUIREMENTS.

Commissioner LITTLER. It is apparent from the testimony in this case that the Central Pacific always had the financial ability not only to construct the road, but to keep on hand all the material of every kind requisite to keep the road up and to employ all the men that would be required in any emergency that might happen. In other words, the solvency and the ability of the Central Pacific for that business has been quite equal to the requirements of this construction, and quite equal to that of this Contract and Finance Company, which had a capital stock of only $10,000,000.

Commissioner ANDERSON. Not paid in.

Commissioner LITTLER. Not paid in; not a dollar of it.

Mr. COHEN. If the Central Pacific Railroad Company undertook to do all the repairs and new construction and betterments that were necessary, would not the superintending forces of the company have to be increased?

The WITNESS. The company would have had to have men to supervise the extra work. Of course the men who were in the operating of the road, if they had spare time for that, it would be better to give them additional duties.

ADVANTAGES OF CONTRACTS.

By Mr. COHEN:

Q. Then would not the cost to the Central Pacific have been increased in going into the market to hire men every time that it needed them in an emergency, as well as in being compelled to employ new men for repairs, and would not the character of the work done by such men as hired have been of less value and efficiency than if done by the construction companies?—A. In some cases I think it has its advantages. Take work like Clipper Gap where the line was changed; again in Clipper Ravine where the line was changed; also at Secret Town where there were large trestle-work fills; the same way at Colfax, and quite a number of changes that were made down the Truckee River. I am inclined to think that if the Central Pacific only paid 10 per cent. upon the actual cost of that work it certainly did not lose any money.

Q. Would not the Central Pacific have been required to keep a large plant in tools, &c., ordinarily used in the construction of a railroad which they were not required to keep in letting their work in the way that they did?—A. Of course they would have to have tools, and when they would get through with them those tools would be on their hands. Going outside to employ labor, skilled or unskilled, you do not know what you are getting. You have to try them, and the company, of course, would lose the cost of trying all those men.

THE WORK BETTER DONE BY CONSTRUCTION COMPANIES.

Q. Is it not the opinion of the engineering force of the Central Pacific and the track superintendents of the Central Pacific, so far as you know, that that company gets its work better done (and at about the same cost that it would be required to pay if it did the work itself) when it is done by the construction company at a charge of 10 per cent. above the actual cost to the construction company?—A. I have already indirectly answered that question.

Q. I am asking for the opinion generally of the engineers of the department, whether the work could have been done better by the railroad company and at about the same cost?—A. I do not know what the other engineers think.

Q. You have answered for yourself?—A. Yes, sir; I have answered for myself.

PLANT OF THE CONTRACT AND FINANCE COMPANY.

By Commissioner ANDERSON:

Q. Did the Contract and Finance Company have any shops?—A. It only had its work shops for its carpenters.

Q. Did it have any expensive plant, such as you refer to?—A. I did not refer to any plant.

Commissioner LITTLER. Mr. Cohen did.

The WITNESS It had tools. You do not mean machine tools—tools for the construction of machinery, do you?

Mr. COHEN. I mean tools for the construction of a railroad. They had a large shop at Oakland.

The WITNESS. They had shops and tools.

Q. Who had?—A. The Contract and Finance Company, and they had shops along the road.

Q. Were not those simple camps where they kept materials?—A. They kept materials and tools. They did not have any machine tools except at Oakland.

WHO PURCHASED THE MATERIALS?

Q. Was it not the practice of the Central Pacific itself to furnish substantially all of that material that was needed by the Contract and Finance Company to that company, and charge the cost of it to the Contract and Finance Company?—A. I have understood that as being done in some cases, but I do not think that it was the rule.

Q. Did not they furnish all the locomotives and all the cars?

The WITNESS. As I understand it we are now talking about repairs.

Commissioner LITTLER. Yes.

A. I do not know about that.

By Mr. COHEN:

Q. Did not the Contract and Finance Company buy its own lumber, brick, and all things used for repairs?

Commissioner ANDERSON. Is that what you understand?

The WITNESS. It bought its own lumber, and all of that kind of material. I do not know what the Contract and Finance Company may have bought in the way of locomotives and cars, but I think that, as a rule, the Central Pacific purchased them.

Q. Were they bought through Mr. Huntington in New York?—A. Yes, sir; as I understand it.

THE CONSTRUCTION OUTFIT.

By Commissioner LITTLER:

Q. Is it not true that this Contract and Finance Company had to rely upon the railroad company for its construction outfit? I mean its cars and engines to transport its men, and is it not true that it had to rely upon the main shops of the company where it had any large construc-

tion to make? Did not the Central Pacific furnish those appliances and tools to this Contract and Finance Company?—A. I do not think that I can answer that question clearly, but my understanding is this, that whatever the Contract and Finance Company used in the way of rolling stock or motive power it was charged for it by the Central Pacific.

Q. Yes; but did not the Central Pacific have those things on hand, and furnish them to the Contract and Finance Company?—A. It did.

Q. Now, did the Contract and Finance Company have anything on hand in the way of tools and shops except those simple tools which are used in grading, and the simple tools which are used by carpenters and masons in the construction of their work?—A. I do not remember of their having had any machine tools.

Q. Were not those tools of very small value, which would not require a very large investment to keep on hand constantly that sort of an outfit?—A. They were tools that could be replenished very quickly.

Q. Five thousand dollars would buy more tools than the Contract and Finance Company could use in ten years, would it not?—A. Oh, no.

Commissioner LITTLER. I believe it would.

The WITNESS. It would cost that much every ten or twenty days.

CLASS OF EQUIPMENT REQUIRED.

Mr. COHEN. I was not asking about that class of equipment. I was referring as well to construction cars, dumping carts, wagons, teams, horses, &c.

Commissioner LITTLER. There is no proof that they had anything of that sort. There is no proof that tools of that kind were required in the repairing of a railroad.

Mr. COHEN. They are all required in the repairing of a railroad.

METHOD OF SUB-LETTING REPAIRS AN EXCEPTION.

Q. You were asked whether it was not the opinion of the general officers of this Central Pacific Railroad Company that it was economy to sublet this work at 10 per cent. profit. I will ask you to state whether you know of any officer of any other railroad whose opinion is valuable on a question of that kind, who would favor such a means of carrying on the work of repairing a railroad? Do you know of any such officer anywhere?—A. No; I do not know of any.

Q. Do you not know that this mode of repairing the work of this company is an exception to all well-regulated railway companies?—A. I do not think that you quite understand that.

Commissioner LITTLER. Answer my question, please.

The WITNESS. I do not know of any other companies which have the same system.

Q. Is not that fact of itself enough to condemn this mode? Is not the experience of all the railway companies in this country in opposition to this mode enough to cast suspicion upon it and to condemn it?—A. No, sir; I do not think so. Here is a company of contractors who were practically under the control of the railroad company——

Commissioner LITTLER. Yes; and that is one objection to it.

FOR LARGE CONSTRUCTION THE CONTRACT PLAN PREFERRED.

The WITNESS. The contractors have a large number of men, and they are competent to take hold of work. I do not mean little ordinary re-

pairs, such as putting a timber into a bridge, or repairing a plank in a platform, or any of that minor work; but for large work I think it is about as cheap a way as it could be done. They have the experience of such men as Strobridge and his assistants, and such men as Brown and his assistants, men whom you can not pick up every day. I think that if those men will do the work as cheaply as they can do it and only add 10 per cent. upon the actual cost, the railroad company could not get the work done any cheaper. Of course, this is only for larger work, for instance, embankments ten, fifteen, twenty, or fifty thousand cubic yards, or a hundred thousand cubic yards, boring tunnels, &c., which they have done.

Commissioner LITTLER. That is new construction.

The WITNESS. It is classed under repairs sometimes.

PROPOSED TUNNEL THROUGH THE SIERRA NEVADAS.

By Commissioner ANDERSON:

Q. Have you given any attention to the subject which has been suggested here of the construction of a tunnel through the Sierra Nevada Mountains for the purpose of avoiding that portion of the route which requires the protection of snow sheds, and reducing the grades of the road?—A. Yes, sir; I had indirect charge of the surveys of the line which we ran over the summit, and at one time intended to complete the surveys. I believe that that would be the proper thing to do. It would certainly be a great advantage to the State of California. They could have the tunnel made large enough for a railway and for hydraulic purposes, so as to bring water enough to supply the whole State with water—Sacramento, Marysville, Stockton, Oakland, San Francisco, &c. We must eventually go there for water.

SIZE AND LENGTH OF TUNNEL.

Q. What size tunnel would it require?—A. I would not recommend a tunnel wider than for a single track and carry the water underneath it.

Q. What would be the height and what the width?—A. Probably 32 feet; say roughly 32 feet by 16.

Q. Do you mean 16 feet high and 32 feet wide?—A. No, sir; 32 feet high and 16 feet wide.

Q. Thirty-two feet high, so as to leave room for the water?—A. Yes, sir.

Q. How long would that tunnel require to be in order to give the best possible reduction of grades and the avoidance of as much snow-shed construction as possible?—A. Somewhere near 5 miles, is my recollection.

ONE ROUTE OF PROPOSED TUNNEL.

Q. At what point on the east would it enter the mountains?—A. It would come out at Cold Stream. That is one route.

Q. Is that between Truckee and the summit?—A. Yes, sir.

Q. How far beyond the summit?—A. That would be south of the summit probably 10 miles. That would avoid all the heavy snows.

Q. That is on the east side of the Serra Nevada Mountains that you are speaking of now, is it?—A. I am speaking of where it would penetrate the Sierra Nevada Mountains, and this would be about 10 miles.

Q. Would it penetrate from the east side or from the west side?—A. It would penetrate from the east.

Q. How far from the summit would the point of penetration be?—A. About 3 miles probably, where you would enter the tunnel from the east going west.

Q. And where would it emerge on the west side of the mountains?—A. It would emerge on one of the branches of the American River.

Q. How far from the summit on this side would that be?—A. I did not understand you before. The summit which I thought you were speaking of is the summit made by this tunnel. I infer now that you mean "summit" of the Central Pacific.

Commissioner ANDERSON. I do.

The WITNESS. It would be about 10 miles to the south and west.

SOUTH OF RAILROAD LINE.

Q. Would that line be anywhere under the present location of the railroad?—A. No, sir; it would be in an entirely different location.

Q. It would be south of it, as I understand it?—A. Yes, sir. It would probably start from the head, or nearly the head, or rather where the Central Pacific now crosses Cold Stream, following up what was called the old emigrant trail, then going through the mountains and coming out at this end at one of the branches of the American River.

By Mr. COHEN:

Q. What would be the length of that tunnel?—A. About 5 miles.

By Commissioner ANDERSON:

Q. What would be the highest altitude of the tunnel?—A. I am not clear about that. I think over a thousand feet.

Q. Do you mean a thousand feet above the sea?—A. No, sir. I mean a thousand feet below the level of the present line.

A THOUSAND FEET OF MOUNTAIN OVER THE TUNNEL.

Q. You mean that there would be a thousand feet of the mountain over the tunnel?—A. Yes. That would bring it to about 6,000 feet above the level of the sea. The present elevation is something over 7,000 feet.

Q. That would be a thousand feet lower than the present line?—A. Yes, sir.

Q. Would that be sufficient to obviate the necessity for snow-sheds?—A. That would take it out of the snow, and would bring it down low enough so that there would not be any more snow than what a snow-plow could handle.

OTHER ROUTES.

Q. Is there no other suggested route for a tunnel with a length, perhaps, of 10 or 15 miles that would carry the level down still further and reduce the grades?—A. Of course it would reduce the grades if we added length to the tunnel, and I think that a little further south from that, with that length of tunnel, we could get lower than we could where we made our surveys.

ESTIMATES OF COST.

Commissioner LITTLER. I would like to know what that tunnel would cost.

By Mr. COHEN:

Q. What estimates have been made for the change that would be required to construct the tunnel that you speak of?—A. I think there

have been estimates made, but I do not remember now. The surveys were all run.

By the CHAIRMAN:

Q. Was there a report made upon it?—A. Yes, sir.

By Commissioner LITTLER:

Q. I would like to have your opinion as to the aggregate cost of such a tunnel.

The WITNESS. The estimate was made several years ago, and the estimate now would probably be still lower. I do not remember what the estimate was.

Q. How much a mile does it cost to tunnel in the Sierra Nevada Mountains?—A. It costs from a quarter of a million to a million dollars a mile.

ORIGINAL CROSS-SECTIONS CALLED FOR.

Commissioner ANDERSON. Mr. Cohen, I call for the original cross-sections of the Central Pacific Railroad.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Thursday, August 11, 1887.

JOHN B. HARMON, being duly sworn and examined, testified as follows:

By Mr. COHEN:

Question. I show you a paper purporting to be signed by D. W. Strong, conveying certain stock to O. D. Lambard, and by yourself as witness to the signature of Strong. Is that your signature?—Answer. Yes, sir; it is.

D. W. STRONG'S SIGNATURE PROVED.

Q. Did you see Mr. Strong sign that paper?—A. Yes, sir; that is my signature. What Strong is that?

Mr. COHEN. Daniel W. Strong.

The WITNESS. Of Sacramento?

Mr. COHEN. Yes.

The WITNESS. Lambard used to be in Sacramento. That is my signature, and, of course, I saw Mr. Strong sign that paper.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Thursday, August 11, 1887.

Afternoon session.

HORACE W. CARPENTIER, being duly sworn and examined, testified as follows:

By Mr. BERGIN:

Question. When did you come to California?—Answer. In 1849.

Q. How long have you resided in California?—A. Mostly since that time until within the last three or four years.

Q. What part of California did you particularly reside in?—A. In the neighborhood of San Francisco mostly.

FACILITIES FOR TRANSPORTATION FROM 1860 TO 1870.

Q. Were you familiar with the facilities for transportation and transit in California, say from 1860 to 1870?—A. I think I was; like other people here.

Q. Will you state to the Commission what those facilities were for passenger, freight, and general traffic?

The WITNESS. I hardly know the scope of the question, or what to state.

Mr. BERGIN. Say, from the Atlantic to the Pacific States.

The WITNESS. During what time?

Mr. BERGIN. From 1860 to 1870, on the completion of the railroad.

A. From 1860 until 1869, when the railroad was completed across the continent, I believe it is notorious and known to everybody that the means of transportation between here and the Atlantic States were mostly by vessels by Panama or around by Cape Horn.

RATES OF INTEREST.

Q. Were you familiar, during those years, with the ruling rates of interest?—A. Somewhat.

Q. Will you state to the Commission what they were?—A. In the early part of that period, about 2½ to 3 per cent. per month.

Q. Was San Francisco the principal financial center of the State of California?—A. It was. Nearly all the money of California was concentrated in San Francisco and Sacramento and one or two other places.

DIFFERENCE IN RATES ON CITY AND COUNTRY PROPERTY.

Q. Was there any difference observed in the lending of money in those early days between loans made in the city and loans made on property outside of the city?—A. A very great difference.

Q. Will you state to the Commission how that was?—A. It was almost impracticable to borrow money on outside property. When I say outside property, I mean that which was not within one or two cities—San Francisco and Sacramento. Those that had money to loan were very much averse to loaning on country property. Whenever they did it, I think it was almost universally at a higher rate of interest and with a very large margin.

Q. Were you, during those years, connected with the telegraph company?—A. I was; that is to say, I was from before 1860 to 1867. I was president of the California State Telegraph Company.

DIFFICULTIES AND EXPENSES OF TELEGRAPH LINE CONSTRUCTION.

Q. Are you familiar with the difficulties and expenses of construction?—A. Yes, I was president of the Overland Telegraph Company from the organization of the company until its virtual disincorporation after the construction of the line across the continent in 1861.

Q. Will you just state to the Commission what the difficulties and the expenses were?—A. It was very difficult to get people to join in the enterprise, and but very few did join, although now it could be considered an almost trifling matter to build a like telegraph line from here to Salt Lake. Then it was considered a very formidable undertaking and really was so. We had, for instance, to haul our material and outfit from the

Sacramento by ox teams across the mountains and clear across to Salt Lake City. I remember that although we started late in the spring we were met with a snow storm in the mountains in which I feared that all our stock and cattle would perish. We sometimes, on the plains, had to haul water a long distance even for the cattle to drink that were hauling it, and the cost of everything was very large. I hardly think that the work could have been done that season, except with extraordinary and disproportionate expense, if we had not had the good fortune to secure the friendship of Brigham Young and his active assistance. The Indians, I know, were hostile, and we bought their friendship and assistance with blankets and clothing and food.

OBSTACLES SURROUNDING CONSTRUCTION OF CENTRAL PACIFIC.

Q. Are you familiar with the construction of the Central Pacific Railroad generally?—A. I can hardly say that I am familiar with it, but I know something of it.

Q. Do you know of its inception and progress?—A. Yes, sir.

Q. Will you state to the Commission the obstacles and embarrassments surrounding the carrying out of that enterprise?—A. In the first place, I think that there were very few that believed that it was practicable or ever would be accomplished; and I think it is notorious that those that took it in hand requested and solicited almost all the men of means that were here to join with them in the matter. I can hardly say that they ever solicited me, although they several times suggested the matter to me. They probably would have done so more strongly if I had had more money to put into it, but the fact of knowing how difficult it was for them to do it deterred me, and I consider that I had less foresight, or less courage, or whatever it may be, but it never made me envy their great success.

INDIVIDUAL LIABILITY OF STOCKHOLDERS.

Q. Was the individual liability of stockholders any deterring cause to parties from connecting themselves with that enterprise?—A. It undoubtedly was, both to their becoming parties in the matter and to their loaning money. I know that whenever it was suggested to me or to any of my friends to loan money on the stock it would be absolutely declined as being worse than no security.

MARKETABLE VALUE OF STOCK.

Q. Do you know, as a fact, whether or not the stock of the Central Pacific Railroad Company, during the years that I have named to you, was available as a collateral or means of security on which to borrow money?—A. It was not much of the time, and if at all, at a very low rate.

Q. Do you know whether it had any marketable value?—A. Scarcely any, I think.

EFFECT OF MINING EXCITEMENTS UPON COMMUNITY.

Q. You recollect the different mining crazes that have occurred here from time to time?—A. Yes, sir.

Q. The Frazer River, Cariboo, Washoe, and other different mining excitements?—A. Yes, sir.

Q. Will you state to the Commission what, if any, effect they had on making it difficult to get labor or to retain the service of laborers?—A.

At the time of those excitements I know that nearly all available labor wanted to go to the mines. Sometimes they quit everything, and at the time of the Frazer River excitement so many people left here, and such was the effect upon the public mind, that it produced a very great depreciation of property in San Francisco—greater, I think, than any other depreciation that has ever occurred since.

Q. Will you just state in round numbers the percentage of depreciation?—A. That would be a mere matter of opinion and just on the spur of the moment. I could not say, although I think in a great many instances from 30 to 50 per cent.

OPPOSITION FROM RIVAL INTERESTS.

Q. Were you familiar, during the progress of this work, with the rival interests that were opposed to its construction?—A. Yes, I knew them. There were interests that were opposing it bitterly. When it seemed that there was a chance of success it was a matter of the most bitter opposition, and especially in a number of newspapers that seemed to devote their attention chiefly to that subject.

Q. Will you name some of those companies; was the Pacific Mail Steamship Company one?—A. I think so, sir.

Q. Will you name some more?—A. Yes, sir. Before the road was completed some roads that had grown to be very profitable between Sacramento and Washoe, whose business was likely to be destroyed by the completion of the road.

SOME OF THE RIVAL INTERESTS.

Q. Please name over some of them to the Commission, some of those rival interests that would be affected by the completion of the road.—A. There was that road from Placerville to Carson City. The California Steam Navigation Company, which owned vessels on the rivers and on the bay, and, of course, the Pacific Mail Steamship Company.

Q. And Wells, Fargo & Co.?—A. Yes, sir; also Wells, Fargo & Co. and numerous stage routes which just at that time were valuable and profitable.

Q. And turnpike interests?—A. I know when it was suggested to me to go into the matter I talked with older and more experienced men than myself and I came to the conclusion, at least I formed the opinion, that the road when it was completed, if it ever was completed, would not pay its fixed charges and current expenses. I even think now, with all the experience of the past before me, that I was not far wrong then, provided that the unexpected discoveries of coal on the route and the unexpected developments of the mining interests and regions had not taken place, and the influx of people along the line of the road that were reached by it, which then could not perhaps be reasonably anticipated.

EFFECT UPON REAL ESTATE OF COMPLETION OF ROAD.

Q. Can you state to the Commission what, if any, effect the completion of the road had upon the landed interests here and landed values?—A. It had undoubtedly a very large influence. I am far from believing that because Columbus discovered America that we, as his descendants, should own the whole continent; but I think that it is an undoubted fact that the first great and general increase in value in the State were coincident in time with the building of that road. I be-

here that a very large percentage of the present wealth of California would not exist to-day if a transcontinental road, this or some other transcontinental road, had not been built. In many places the completion of the road far more than doubled the value of the surrounding real estate.

Q. Is that the case particularly with reference to rural lands, farming lands?—A. I do not know that it was much more the case as to farming lands than it was of city lands. It was in both instances where they came within the more immediate reach and influence of the road. I think more perhaps with regard to farming lands, because up to that time their values had advanced but very little.

Q. Let me ask you, did these rival interests that I have referred to, actively or at all oppose the construction of the Central Pacific?—A. That has been my understanding of it.

EFFORTS OF PROJECTORS TO RAISE MONEY.

Q. Will you state to the Commission what, if anything, you know of efforts by the promoters of the Central Pacific, Governor Stanford and his associates, to raise money to pay the expenses of the construction?—A. I understand that they made the utmost exertions to do it, but they found it very difficult to raise any money. There were, I think, but few, very few people here that they applied to that would advance any sum.

Q. Do you know as to whether or not capitalists and men of means here would loan their money to the company as a company?—A. As a company, I think not.

Commissioner ANDERSON. Ask him to state a little more definitely what years he is speaking of.

Mr. BERGIN. He is speaking of from 1860 to 1870.

The WITNESS. From the commencement of the road until its completion, I understand.

Q. Do you know, as a matter of fact, that those gentlemen had to raise whatever money they did raise on their individual obligations?—A. As a matter of fact—perhaps I hardly ought to say this—because I did not see it done, but I know from common report, and I know from one or two instances where I have talked with them myself about it; I remember one case in which the governor was in the last extremity to raise some money, and finally succeeded.

CORNERS IN MERCHANDISE.

Q. Do you know of there being such things as corners in merchandise in the market here before the completion of the railroad?—A. I think that was very common before the completion of the railroad.

Q. Will you explain how that was to the Commission?—A. I am not a merchant, and have not been very familiar with those things; but I know that it was quite common for our merchants in a certain line of business to buy up, accumulate, or hold in some way about all the goods that there were here, and advance the prices, relying on the difficulty and the length of time that it would take to get a new supply.

By the CHAIRMAN:

Q. While on the subject let me inquire what is the difference between the corner of the olden times and the present railroad pool?—A. Well, they seem to me to be very much of the same kind.

EFFECT OF RAILROAD ON SUCH "CORNERS."

By Mr. BERGIN:

Q. Will you explain to the Commission, if you know, what effect the railroad has had in stopping that condition of things?—A. It seems to me that that is a thing that does not need the explanation of a witness. It is a matter of common observation and common sense, that when upon the completion of the telegraph and railroad a supply of anything can be gotten at any time from the Eastern States at a week's time or a little over that, there cannot be much of a corner in merchandise.

MARKET VALUE OF STOCK.

Q. When this road was completed can you state to the Commission, what, if any, market value its stock had in California?—A. Any statement that I might make would be entirely negative; I did not know of its having any market value and I cannot say that it did have.

Q. I will ask you have you at any time been in the employ of or connected with the Central Pacific?—A. Never. I have never received a dollar from them for any services of any kind or nature.

Q. During the years in respect to which I have asked you, gold coin was the current medium of trade here in California, was it not?—A. It was so from the beginning of the State and it was made so by a law of the legislature in, I think, 1862, after the breaking out of the war.

By Mr. COHEN:

Q. By contract?—A. By contract; yes, sir.

APPRECIATION OF GOLD.

By Mr. BERGIN:

Q. Do you remember how low greenbacks were sold here during some of the years that I have referred to?—A. At the same rate that they were in New York, or with a very small difference for exchange. I think at one time down as low as 37 cents.

Q. Can you state to the Commission what you would have been willing to have given for the stock of the Central Pacific in the years 1869 and 1870?—A. No, I could not, for I never thought of it.

By the CHAIRMAN:

Q. How familiar were you with the business of the Central Pacific at the time of its organization?—A. I do not think that I was ever familiar with it. I knew of it generally.

Q. Had you any business transactions with it?—A. None, in early times.

Q. Did you loan them any money in early times?—A. No; I never loaned the Central Pacific Company any money.

OFFICERS OF CALIFORNIA STATE TELEGRAPH COMPANY.

Q. Who were the officers of the California State Telegraph Company?—A. I was the president of the company and J. Mora Morse was vice-president for ten years or more.

Q. What was the extent of the line?—A. Capt. James M. McDonald and R. H. McDonald and Fred McCrellish and others were directors. All the lines on the Pacific coast were owned by that telegraph company, and after the building of the overlond telegraph line that was sold out and consolidated with the State Telegraph Company.

Q. What was the year of the consolidation?—A. I do not think that there was a consolidation; I think that all the stock was transferred, and I think that that was in 1861, at the date of the completion of the overland line, or perhaps in 1862.

OFFICERS OF OVERLAND COMPANY.

Q. Who were the officers of the Overland Company at the time of the consolidation?—A. I was the president.

Q. Who were the other officers and directors?—A. I think they were substantially the same as of the California State Telegraph Company.

Q. Did you read the reports of President Stanford, of the Central Pacific, from time to time as they were issued, from 1863 and 1864 up to 1869, the period you speak of?—A. I do not think I ever read one of his reports.

REPORT OF PRESIDENT OF CENTRAL PACIFIC IN 1865.

Q. I call your attention to a report of the president of that road, published in July, 1865, in which he says:

In consequence of the suppression of the rebellion, the Government bonds are appreciating in value from the prosecution of the work and our other bonds are also appreciating, consequently we have not thought it advisable to sell this class of bonds to prosecute the work. Aside from the proceeds of the bonds sold we have made loans. With the means on hand and the Government bonds to be derived as the work progresses, and the first-mortgage bonds of the 100 miles in advance of construction, at the will of the company, it is fully warranted in considering itself able to overcome the Sierras as rapidly as possible, and in undertaking the work beyond. It is not to be expected that there will be in the future any delay in obtaining the Government bonds when due. The general business of the road is constantly increasing; the gross earnings for the month of June amount to $131,456.66, though we were not fairly in condition to do a freighting business to Clipper Gap until within the middle of the month. The road is daily increasing in its local business, as also the business over the mountains.

OPINION OF WITNESS AS TO THE REPORT.

Do you recall any of those facts?—A. I have no doubt that his statement and opinion are far more valuable than mine. He had the data and knowledge, and I had not.

Q. Would you regard such a statement, if you had that information at the time, as an evidence of the general financial depression of the road?—A. No, sir. If that does not go beyond your question, I would say that I should regard it as a report that was probably intended to help increase their credit. I should have to look at it in that light.

Q. Do I understand you to say that it would not be based upon the facts and would not be warranted by the condition of the company?—A. I have no doubt that the facts and statements would be reliable, but inferences might be inferences.

Q. Are you acquainted with the gross earnings of the company from year to year from that period?—A. I am not. I have occasionally noticed them, but I have never had any interest in them, and therefore they had no lodgment in my memory.

Q. Are you aware that from year to year from that period they increased until 1873, when a dividend was declared?—A. I am not aware of that fact.

Q. Would that indicate any financial depression?—A. No, sir.

DEFINES A "CORNER."

Q. What do you mean by a "corner" in early times?—A. As I stated before, I am not a merchant, and am not much acquainted with those

things, but as I understood it from the general course of my business here sometimes, a merchant here would find that there was a certain amount of a certain kind of goods in the market, and he would manage to buy up nearly all of that article, or he would join with two or three others and buy it up, so that there was none in the market, and then advance the prices sometimes three or four times over.

Q. Was that done through any controlling influence of the stage line or other means of communication at that time?—A. I think not, sir; it was done from the difficulty of getting supplies from the Eastern States, from which they mostly came, and from the length of time it took to get them here. The first one that I ever remember to have heard of in the State was a corner on flour, when the flour was all brought here from Chili, and one or two firms here connected with the South American trade, as it was understood, had bought up all the flour that was here or that was about to arrive, and advanced the prices three or four times over, and so it went on from time to time with almost every article of merchandise.

LIKE TENDENCY OF POOLS AND CORNERS.

Q. The effect, then, as I understand, of a corner was to fix prices at the will of the people who were in the corner, and hold them?—A. Yes, sir.

Q. Is not that the same effect as of a modern railroad pool as to prices so far as freights are concerned?—A. I s[illegible]stand it.

Q. Does it not control merchandise in proportion as it controls the freight rates?—A. It seems to me that it has that tendency.

EFFECT OF ROAD UPON STAGE AND EXPRESS COMPANIES.

Q. What became of the stage lines and express companies after the organization, construction, and opening of the Central Pacific?—A. Some of the stage lines became no longer profitable, and transferred their stock and their stages and property to other roads, or at any rate went entirely out of the business. Some of the express companies entered into new combinations and new arrangements. I think at the time of the construction of the Central Pacific Railroad the main express company was Wells, Fargo & Co.; I was not intimate with those things nor a part of them, but I knew generally that after the construction and completion of the road the railroad interest formed a new express company or new express companies; I believe that two were formed, one by each of the roads, and that then, by some arrangement or compromise, they disincorporated, and took interests in other companies that were then in existence.

Q. Did the Central Pacific Railroad Company buy any stage lines?—A. Not that I know of.

Q. Did they buy any express companies?—A. Not that I know of.

Q. Did they come into possession of any express companies, their rights and privileges?—A. I think that they did; I think that the Central Pacific Railroad or its managers came partly in control or perhaps absolutely in control of Wells, Fargo & Co., but when it was I can say only from my general impression.

Q. So that the effect was either for the stage lines to go out of existence or, if they could make terms, go into the possession of the railroad company, and the same condition of affairs existed as to the express company; and all the business of all the lines at that time passed into the hands of one company, the Central Pacific Company. Is that

time?—A. I do not think that the Central Pacific Company ever bought any stage lines. They might have done it without my hearing of it, but I don't think they ever did. Of course the stage lines went out of existence or transferred their stock when a better means of transportation took their place.

A "FAST FREIGHT" LINE.

Q. Do you recall hearing of a fast freight line in those days?—A. Yes, sir.

Q. Who were the owners?—A. I do not know; I cannot tell; I never knew anything about it.

Q. What was the character of it, if you recall it?—A. I do not think that I knew enough about it to express its character; I know that I heard generally that there was a fast freight line.

Q. Was it located here—I ask for information; was it operated from here to the east?—A. That I am unable to say; I have understood that it was.

RATES OF INTEREST DURING CONSTRUCTION OF ROAD.

Q. Do you know what rates of interest the Central Pacific paid, and to whom during their troublesome times?—A. I know nothing about what the Central Pacific have paid. Perhaps I cannot say that I know, because I have never seen the paper nor seen it paid; but I knew as a general fact in business that the principal men in the Central Pacific borrowed a good deal of money and paid very high rates of interest, as high as 3 per cent. per month, and I think sometimes there was a bonus beyond that.

Q. How long did those rates of interest continue?—A. They continued pretty well during the early years of the construction of the road. I think that before they completed the road the rates of interest were reduced to 1 per cent. and possibly, even below that.

Q. That was down to 1869?—A. 1869. I doubt if my knowledge of it is sufficient to say one way or the other; I doubt if they borrowed money up to that time at less than 1 per cent. at any time.

A STOCKHOLDER IN THE BANK OF CALIFORNIA.

By Mr. BERGIN:

Q. Were you a director in the Bank of California during those years?—A. Not at that time.

Q. What years were you a stockholder in that bank?—A. I was a stockholder from the organization of the bank to the present time.

Q. That occurred in 1864?—A. July, 1864.

AVAILABILITY OF SECURITIES.

By Commissioner ANDERSON:

Q. Has there ever been any trouble here in borrowing money on Government bonds?—A. Never.

Q. Or on the first-mortgage bonds of a constructed railroad?—A. I think not; though it would have been difficult at some time to borrow much money here on that security because of the limited supply of money here.

Q. Was there any trouble in a large enterprise like the Central Pacific borrowing on first-class collateral in New York?—A. I suppose

not; but here the supply was limited and we did things in such narrow ways that there were times when the withdrawal of a very few hundred thousand dollars would have affected the market and would have affected the rates of interest.

Q. Do your remarks in regard to the straits in which these gentlemen were put in their efforts to borrow money apply to the period when they had Government bonds and first-mortgage bonds at their command, or to a period anterior to that?—A. Mostly to a period anterior to that, or when their Government bonds were not sufficient for their needs.

By Mr. COHEN:

Q. During the construction?—A. During the construction.

PRESIDENT STANFORD'S REPORT OF 1865 QUOTED.

By the CHAIRMAN:

Q. I wish to read another portion of President Stanford's report concerning the financial condition of the Central Pacific Railroad, on July 13, 1865: "Much of what we had hoped then has been realized. The financial problem which was then pressing upon us for solution has been solved, and the result is abundant financial means to press forward the work to its utmost development."

That was in 1865.

Mr. COHEN. Where do you take that from, Mr. Chairman?

The CHAIRMAN. If you wish to verify it you can do so by a witness.

Mr. COHEN. You are reading from a newspaper paragraph and I wish to know where it came from.

The CHAIRMAN. I have already stated that I read from the report of the president of the company, and I do not think it is a proper thing to be called upon three or four times for a statement of that character. I stated in the opening that I read from the report of President Stanford made to the Central Pacific Railroad Company in July, 1865.

Commissioner ANDERSON. Mr. Cohen's question was addressed to possible inaccuracies in a newspaper slip.

The CHAIRMAN. If it is not correct they can prove it. It is an exhibit that is furnished by the railroad company itself and it is indorsed, "Leland Stanford, president; report made at the annual meeting of stockholders, July 13, 1865," and is given to this Commission on call as an exhibit.

Commissioner ANDERSON. If it is furnished by the company, that is sufficient.

Mr. COHEN. That is sufficient. If the chairman had kindly made that statement at the beginning, we would not have had any further question.

NO DIFFICULTY IN RAISING MONEY ON GOVERNMENT BONDS.

By Mr. BERGIN:

Q. I understood you in your last answer to have reference to the period of construction of the railroad. Is that so?—A. During the earlier period; yes, sir.

Q. And that during that period and when the company had not Government bonds and it had to raise money on its own bonds or obligations, then it was difficult for it to raise money?—A. Of course when it had Government bonds everybody knows that there was no difficulty in raising money on them at the lowest current rates of interest.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Thursday, August 11, 1887.

MOSES G. COBB, being duly sworn and examined, testified as follows:

By Commissioner ANDERSON:

Question. Where do you reside?—Answer. In this city.

Q. What is your occupation?—A. I am a lawyer.

Q. How long have you been in practice here?—A. Since 1862.

Q. Did you know Mr. John B. Felton?—A. Very well, sir. He was educated with me.

SUIT OF SAMUEL BRANNAN AGAINST CENTRAL PACIFIC.

Q. What assistance, if any, did you render him in preparing the complaint in the suit of Samuel Brannan against the Central Pacific Railroad Company of California?—A. I rendered him none. I prepared the complaint without him.

Q. You prepared the complaint entirely?—A. Entirely, in that suit. I may answer, more fully, that he and Mr. Patterson, after I had drawn the original complaint, came into the matter (not the case) with me, and we three redrafted the complaint, and some articles were added to it, some allegations added to it that were within the knowledge of these other gentlemen and not within mine. So reformed, the complaint was ultimately cast.

Q. Where did you draft the complaint?—A. In this city.

UPON WHAT INFORMATION CERTAIN ALLEGATIONS WERE BASED.

Q. I should like you to state to the Commission the sources of your information, where they are not personal, as to some of the salient features in the complaint. You stated among other things the value of the lands granted to the railroad by the United States to be $50,000,000. On what information did you base that allegation?—A. I think that item, that round sum, was given to me by Mr. Brannan, the plaintiff.

Q. Had you personally any knowledge of the value?—A. I had none except his information, gathered I do not know how.

Q. You state in the complaint that the value of other lands granted to the road by various corporations situated within the State of California is $5,000,000. What information had you as to other lands than those granted by the United States?—A. I think there is a schedule attached to the original complaint covering that allegation, and I think that the values were given by Mr. Brannan in the same way as before.

Q. (Showing witness a copy of the complaint in the Brannan suit, from the record in the Stewart case). Please look at Schedule C annexed to the complaint and say if that schedule contains what you intend to refer to as lands donated by various corporations.—A. I think that is what is referred to in Schedule C.

Q. That schedule has the following items:

Upland, 490 acres in the city of Oakland, at $5,000	$2,450,000
Overflowed flats, 2,500 acres, at $2,500	6,250,000
Land in San Francisco, 30 acres	9,500,000

What land is referred to in San Francisco? Is that the land where the Mission Bay property is?—A. Yes, sir; in that section granted by the State.

Q. As to lands referred to in the complaint as lands granted and donated by the various corporations and individuals situated within the State of Nevada, what property was referred to by that description?—A. I do not remember any schedule about that. I think that referred to town sites and depot sites, and roadway lands.

Q. How is it as to "lands granted and donated by various corporations and individuals within the Territory of Utah"?—A. The same way as to that.

NO DEFINITE INFORMATION.

Q. You had no definite information?—A. No, sir; I do not now recall any, and yet I may have had. Let me say here that I was months in collecting these facts and corresponding with various parties. It may be that some of those were gleaned in that way.

Q. As to any record of property donated within the State of Nevada or within the Territory of Utah, can you refer us to any persons who gave you any information that would trace such property?—A. I cannot. My general recollection is that I wrote to the registers or recorders in those various places, and I may have their letters now, and from them might be able to ascertain these values.

"DONATION BY THE STATE OF CALIFORNIA."

Q. "Donation by the State of California, $1,500,000." What does that refer to?—A. That refers, I think, to the statute on the subject, in which they granted certain aid to the company. I do not know but what that is scheduled.

Q. Do you refer to a donation of that amount of bonds, or to an agreement to pay the interest on bonds?—A. I do not know but that it was that. I do not now recall what that was. I have a vague recollection of a statute on the subject. Remember that I have not thought of this case for years, that is, the details of it; I thought that was scheduled, however, and that the act referred to was in the exhibits at the end of the complaint.

Commissioner ANDERSON. It may be.

Mr. BERGIN. You have reference to the same subsidy, the validity of which was passed upon by the supreme court of this State?

The WITNESS. In what case?

Mr. BERGIN. In the case, I think, of the People against Pacheco, or the case of the People against the Central Pacific Railroad in the 26th or 27th California.

The WITNESS. I think likely.

GUARANTEED INTEREST ON BONDS.

Q. "Bonds on which the State of California guaranteed the interest." What bonds? $12,000,000 is the amount stated here.—A. I cannot tell now what I referred to in that $1,500,000.

Commissioner ANDERSON. This is $12,000,000.

Mr. COHEN. On what page is that?

Commissioner ANDERSON. On page 180 of this book. Were there any $12,000,000 of bonds?

The WITNESS. Undoubtedly whatever was stated there was taken from either the statutes or records, and can be verified.

Q. Is there any act by which the State of California guaranteed the interest on $12,000,000 of bonds to this company?—A. I cannot say at this date, but there is an act guaranteeing interest on bonds.

Q. One and a half millions?—A. Yes, sir; it may be.

Q. There are two stated here. One is called a donation and the other is the one in which the State guaranteed interest, and we merely ask for information whether you can refer us to the acts containing those provisions?—A. I cannot at this moment, but I no doubt can hereafter.

THE CORRECTNESS OF OTHER ITEMS.

Q. As to the items, "Bonds of Placer County, $250,000," and "Bonds of the city and county of San Francisco, $400,000," and "Bonds of the city and county of Sacramento, $300,000;" do you remember whether they are correct?—A. I do not remember whether those are the amounts. Are those the amounts, Mr. Cohen?

Mr. COHEN. I do not remember.

The WITNESS. I think those items are correct.

Commissioner ANDERSON. Do you remember about that, Mr. Bergin?

Mr. BERGIN. I do not recollect, but probably the items are correctly stated.

Mr. COHEN. In that statement which Governor Stanford gave you I think they were mentioned.

COMPLAINT REFERS TO SECOND MORTGAGE BONDS.

Q. Your complaint refers to second-mortgage bonds issued by the Central Pacific, amounting to $15,601,741.83. Can you tell from what source those figures were obtained?

The WITNESS. Is there not some conditional statement about that?

Commissioner ANDERSON. I will read you the statement:

That as plaintiff is informed and believes, and therefore avers upon and according to his information and belief, the said C. P. issued and delivered on or about the —— day of ——, 186–, and on divers other days prior to the 1st day of March, 1870, to said defendants, Leland Stanford, A. P. Stanford, E. B. Brocker, Charles Crocker, Huntington, Hopkins, Miller, Marsh, and their confederates, to plaintiff unknown, its second mortgage bonds to the amount of $27,387,120, payable in United States gold coin, with interest at 10 per cent. per annum; that said second mortgage bonds, with the exception of $11,787,378.17 of the nominal value thereof, and all of the said first-mortgage bonds, have been, as plaintiff is informed and believes, and therefore so avers, delivered by the said Central Pacific to the said persons [repeating their names], and that they have kept and retained the same.

The WITNESS. What allegation is there about the eleven millions?

Commissioner ANDERSON. The allegation is that the second-mortgage bonds, amounting to $27,387,120 were issued, and that the second-mortgage bonds, with the exception of $11,787,378.17, were delivered to these gentlemen and retained and appropriated to their own use in violation of their duties as directors and in fraud of the rights of plaintiffs and the other stockholders of said Central Pacific, and that the said second-mortgage bonds, amounting to $11,787,378.17, which were excepted from the other allegation, have been sold by the said defendants and the proceeds thereof realized. The amount that I first mentioned to you is evidently that portion of the twenty-seven millions exclusive of the eleven millions.

The WITNESS. Yes.

INFORMATION RECEIVED FROM AN EMPLOYÉ OF COMPANY.

Commissioner ANDERSON. We have no information as to these second-mortgage bonds or any mortgage bonds bearing 10 per cent. interest, except the convertible ones.

The WITNESS. The facts as to those bonds, I think, came from an employé of the company to Mr. Brannan. He is a man by the name of Ralph Smith.

Q. Is he at present in their employ?—A. I do not know, sir.

Q. Is he living?—A. That I do not know. He was in the employ of the company, I think, at that time. At any rate, we got suggestions from that gentleman.

Q. When did you last hear of him?—A. I have not heard of him for years.

Q. Can you mention any of his associates in this city?—A. He was in Sacramento, in their employ there.

Mr. COHEN. I think I can save time by making an explanation. At the time Mr. Cobb drew that complaint those were second-mortgage bonds, so called, but that complaint, you see, was drawn prior to the act of Congress of 1864.

Commissioner ANDERSON. Oh, no.

Mr. COHEN. Oh, I see; that complaint was drawn in 1874. I thought it was drawn before, and that they had confounded the bonds of the company by calling them second-mortgage bonds as being second, in lien, as they supposed, to the Government bonds, whereas they were not. They were the first bonds.

Commissioner ANDERSON. But this complaint mentions the first bonds in addition.

Mr. COHEN. Then my explanation would not apply.

The WITNESS. My impression is that some of the details about those bonds were got from this official connected with the company. I think his name was Ralph Smith.

STATEMENT REGARDING BRANNAN'S COMPLAINT.

Q. Have you ever received any further information as to those bonds?—A. I do not think I ever did. I think these same items, in detail, have been carried into subsequent complaints; but that, perhaps, is not a right expression. I would state that this complaint of Brannan's was drawn up, and after it was drawn up, as I said before, Mr. John B. Felton and Mr. William H. Patterson, both now dead, called on me and said that they represented parties similarly interested. Mr. Patterson represented Mrs. Judah, and Mr. Felton, who was a Boston man, represented certain Boston stockholders, Mr. Samuel Hooper, Benjamin T. Reed, Orville D. Lambard, Charles A. Lambard, and I think others; at any rate these names are mentioned, if I remember rightly, in the Brannan complaint, and they represented 725 shares. They asked to see my complaint, and after seeing it and reading it we then met and reformed it; and then at that time, as I remember, Mr. Tevis, who had got wind of it—I was Mr. Tevis's attorney at that time—borrowed the complaint, and after reading it negotiations were commenced, Mr. Felton being the negotiator on our part and Governor Stanford on the part of the Central Pacific Railroad, which resulted in a settlement with Mr. Felton's clients and Mr. Patterson's. That complaint, which had been in the mean time printed, some 500 copies of it, was retired, and ultimately the copies were burned. In the mean time Mr. Brannan, my client, was not satisfied with the settlement. He wanted more. He wanted a round sum of $200,000. They offered him $150,000. They not being willing to come to his terms, this complaint then was reprinted, *mutatis mutandis*, and filed. So that these items went into that original complaint, in which we all joined. Myself, Mr. Felton, and Mr. Pat-

terson were the attorneys in that case, and when that was retired I remained Mr. Brannan's attorney, and ultimately filed this complaint, adopting these same allegations and changing, as I have said, what I thought should be changed.

THE SUIT DISMISSED.

Q. And his suit was finally settled?—A. His suit was set off to his wife's suit. Soon after this suit was commenced Mrs. Brannan sued him for a divorce, and that action was set over to her at a valuation of $103,000.

Q. How many shares were involved?—A. Two hundred shares; and I ultimately dismissed the suit at the request of David D. Colton, who, in a letter filed, told me that he had been appointed assignee in the case. How he had got it I do not know.

Q. You do not know what he had paid for it?—A. No, sir; I heard, but I do not know.

Q. In regard to the allegations contained in that complaint relating to the Crocker contract and the Contract and Finance Company contract, the general substance being that those contracts were used as a means for making large amounts of money out of the company; what persons can you refer us to as having original information?—A. That same gentleman that I have referred to, Mr. Ralph Smith.

Q. Did you yourself ever see any books containing entries relating to the Crocker contract?—A. No, sir.

Q. Or any books containing entries relating to the Contract and Finance Company?—A. No, sir.

Q. You have never seen these books?—A. Never.

EFFORT IN THE ROBINSON SUIT TO PROCURE THE BOOKS.

Q. Do you remember whether at the time you filed the complaint for Mr. Brannan these books were in existence or not?—A. I do not. I know that subsequently, as late as 1876, in a suit brought by Mr. Cohen here (Messrs. Cohen & Lake), the Robinson suit, I was present, I think, in the police court when there was an attempt to get possession of those books. Governor Stanford and Mr. Miller were arrested and brought up under a section of our penal code to show cause why they should not produce those books. It is a misdemeanor under our code, and they were complained of there. I remember being present, and I think these books were inquired for and were among the books that were sought; that was resisted upon technical and general grounds, not that the books were lost, but upon technical grounds.

Q. On the ground that their production could not be enforced that way?—A. Yes, sir.

Q. Was Governor Stanford present in person?—A. I do not remember as to that. I remember that he was there by counsel.

Q. Was Mr. Miller present in person?—A. I do not remember about that. That was in 1876. It was after this suit was brought by Messrs. Cohen & Lake.

Q. Who was present at these proceedings in the court when the demand for the books was made?—A. I think Mr. Lake was there, and I think Mr. Cohen was there, but I cannot state positively.

Q. Who was present on behalf of the company?—A. I think Mr. Robert Robinson.

Mr. COHEN. I suppose that I may say that I was not there.

The WITNESS. I do not know that Mr. Cohen was there, but I know that Mr. Lake was.

Q. Somebody represented the company?—A. Somebody represented the defendants, I would not say the company, I think it was Mr. Robert Robinson.

SUIT DISMISSED ON A TECHNICALITY.

Q. Do you recall what answer was made on behalf of the company in regard to the whereabouts of the books?—A. I do not think it reached that point. My recollection is that it was dismissed on technical grounds. I cannot recall the ground at this moment, but I know that I was somewhat interested in that Robinson suit. I held shares at one time myself in my hands, and I was somewhat interested in that inquiry, and therefore it made an impression on me that there was no denial of the possession of the books. I know that my friend Cohen was very certain that the books were there, and he was determined to have them, and he is a power when he starts in. [Laughter.]

Q. Before what court was this proceeding?—A. It was one of our police courts. I think Department One.

Q. Do you file papers containing the charges on which complaints are issued?—A. Yes, sir; there is a complaint made and a warrant issued, and the party is arrested on that warrant.

MR. COHEN ASKS FOR COURT RECORD.

Mr. COHEN. I would like to have that record.

Q. Is that complaint on file and accessible to-day?—A. I have no doubt of it. I have not seen it since that time.

Mr. COHEN. I would like to get it for the purpose of showing the witness how badly he is mistaken.

The WITNESS. Maybe I am. It is a long time since I thought of it. You asked me about the existence of those books. I know we thought at that time they were in existence and could be had.

Q. What I want to know is, whose affidavit charged the loss of the books, and what charge was made in regard to their disappearance?—A. I think Mr. Robinson, the plaintiff in the case, made the charge. Mr. Robinson had been my client, and is now.

Q. Can you tell me a little more definitely where to look for this complaint?—A. I think you will find it some time in the summer of 1876.

WHERE THE COMPLAINT CAN BE FOUND.

Q. Where?—A. In department one of the police court of this city, if the departments had then been established. At any rate, department one represents the old police court, and you will find it in that department, without a doubt. I will state furthermore that my recollection is that in the civil suit, after the criminal matter was abandoned, there was an attempt made to get possession of the books. If I mistake not, Mr. Robinson filed affidavits and parties were brought up for contempt with reference to the non-production of these very books. A long list of books were detailed, I believe, in those affidavits.

Q. Where are those affidavits to be found?—A. They would be found in the old city hall. I think that is in the old fourth district court. Those courts are now all abolished and a new system has come in.

Q. The files are preserved, so that we could find the affidavits or complaint?—A. I have no doubt of it.

TITLES OF PROCEEDINGS.

Q. Can you give us the titles of the two proceedings so that we can make a requisition for the papers?—A. I think that proceeding was John R. Robinson against the Central Pacific Railroad Company and others; a long list of others.

Q. And how would the criminal proceeding be entitled?—A. That would be entitled The People against Stanford and others.

Q. (Showing the complaint in the Robinson case to the witness.) Is that the complaint?—A. This is the suit that I referred to in the fourth district court. My recollection is about right; it was the 15th of March, 1876, that that complaint was sworn to, and I think it was filed about that time.

MATERIAL FROM WHICH CONCLUSIONS WERE DRAWN.

Q. Coming back to the allegations contained in your complaint as to the manner in which the contracts were made between the Central Pacific and Mr. Crocker, or Croeker & Co. and the Contract and Finance Company, what material did Mr. Ralph Smith have from which he derived his figures and conclusions?—A. That I do not know. I think that these were suggestions made by Mr. Smith. Mr. Smith lived in Sacramento and Mr. Brannan did also. He knew Smith, and I did also, and it was on frequent occasions that these data were given us.

Q. I want to know whether anything was put in writing—whether you have any letters from him?—A. No, sir; it was by word of mouth generally.

Q. Did Mr. Smith represent that he was placing before you conclusions that he derived from any books?—A. I do not know; I know that I thought so. I do not know whether I asked him every time or at any time whether these were facts derived from the books, but they were suggestions and figures.

Q. What was the scope of Mr. Smith's duties?—A. That I cannot tell. I know that he was in the employ of the company, and I think he was a book-keeper.

Q. Have you any other sources from which you derived the material contained in your complaint except the general information you have referred to, and Mr. Ralph Smith?—A. No, sir; except Mr. Brannan.

Q. Had Mr. Brannan any position in the Central Pacific, or any position which would enable him to acquire these facts accurately?—A. No, sir; I do not think he was in any way employed in that company. He was a stockholder and was intimate with these other gentlemen. They were all Sacramentians, you know, at one time—Governor Stanford, Mr. Hopkins, and the Crockers.

ALLEGATIONS AS TO ACTUAL COST OF ROAD.

Q. Your complaint contains allegations setting forth the actual cost of construction of so much of the road as was constructed under the Crocker contract, and also of so much of the road as was constructed under the Contract and Finance Company's contract; from what source did you derive those allegations?—A. I think from the same source.

By Mr. COHEN:

Q. That is, from Mr. Smith?—A. From Smith and Brannan.

By Commissioner ANDERSON:

Q. Then you have enumerated to us in full all the sources of information on which this complaint was based?—A. I think so. My atten-

tion is more particularly addressed to those items of subsidy, and forth, but some of the allegations in the complaint were furnished Mr. Patterson. I think all that about the San Francisco and San J Railroad was Mr. Patterson's information. He had been in that and Mr. Felton had some special knowledge, also.

Q. From what sources did you derive your information as to the crease of Wells, Fargo & Co.'s stock?—A. I do not remember.

MR. COHEN THE AUTHOR OF THE ROBINSON COMPLAINT.

By the CHAIRMAN:

Q. As to the Robinson complaint, where did you get the facts r tive to the construction of the Central Pacific?—A. Mr. Cohen m answer that.

Q. Which Mr. Cohen?—A. This gentleman here.

Q. Mr. A. A. Cohen?—A. Yes; Mr. Cohen is the father of that co plaint, I believe.

Q. Did he furnish the data at that time?—A. I think so; at any r he took the responsibility.

Q. Had he that part of the work in charge?—A. No, not that; drew the complaint, and he had the Brannan complaint undoubted before him, for many of the allegations are identical. I know he ha printed copy which I furnished him. And whatever there is beyo the Brannan complaint undoubtedly Mr. Cohen can give the sour At least so far as it coincides with the Brannan complaint, he took from that.

By Mr. COHEN:

Q. Are any of the facts stated in this complaint of Brannan agai the Central Pacific Railroad Company within your own personal know edge?—A. No.

Q. None whatever?—A. None whatever.

WHEREABOUTS OF BRANNAN, SMITH, AND OTHERS.

Q. Where is Mr. Brannan; is he living?—A. I think so; the l I heard of him he was in Mexico; in one of the northern states the I do not know where; I think in Sonora.

Q. Can you get him up here before this Commission adjourns?— I think so; I do not know whether I can or not. He is to be got if is desired.

Q. Is Mr. Ralph Smith living?—A. As I told the Commission, I not know.

Q. Where was he living when you last heard of him?—A. I thi near Sacramento.

Q. Mr. Felton, I believe, is dead; is he not?—A. Yes, sir.

Q. Mr. Patterson is dead?—A. Yes, sir.

Q. Are there any other gentlemen whom you have mentioned fr whom you derived your information who are living?—A. Those are t only gentlemen, whom I have named.

Q. Mr. Robinson is living?—A. Yes, sir.

By the CHAIRMAN:

Q. You derived information from Mr. Cohen, and he is living, is h not?—A. Yes, sir.

By Mr. COHEN:

Q. What information did I ever give you in regard to the facts in the Brannan case?—A. Nothing. I did not mention you as giving me any information. I mentioned you in connection with the Robinson complaint.

THE CASE OF STEWART AGAINST HUNTINGTON.

Q. Were you a witness in the case of Stewart against Huntington, in a commission issued by the supreme court of the State of New York to take testimony in California?—A. I think I was.

Q. I believe I had the honor of examining you in that case, had I not?—A. I think so.

Q. You were asked in that case:

Q. 3. Did you know to whom that stock was sold and what was paid for it [referring to the Brannan stock]?—A. I do not know, of my own knowledge; all I know is that the stock passed under that decree, and I was a mere *locum tenens* in the case for some months and years, I think.

Was that question put to you, and the answer made as read?—A. I think that is correct, sir.

Q. I will read you one or two more questions, so as to put the Commission in possession of all the information on that point:

Q. Did you ever see the stock?—A. I think I did.

Q. Do you know what company it was in?—A. I think the original two hundred shares of the eight and a half million issue of the Central Pacific Company of California. I saw that and I knew the history of that. I think that was passed into Mr. Tillinghast's bank, or the Bank of British Columbia, and then there was an increase of capital. Then he got a new certificate of stock. I do not know, except as he told me.

Were those questions put to you and the answers made as I have read them?—A. That is correct, sir. Mr. Brannan borrowed $10,000 on those two hundred shares of stock some time before this complaint was passed.

PERSONAL KNOWLEDGE OF THE BRANNAN STOCK.

Q. Do you know of your own knowledge that he borrowed $10,000 on those 200 shares?—A. No, sir; I cannot say that I do, if you are technical in the question.

Mr. COHEN. I am technical, because my information is to the contrary.

The WITNESS. No, sir; I do not know it of my own knowledge, but I arranged to take that $10,000 up.

Q. It was not on that and other securities?—A. No, sir; because we had trouble about those very 200 shares. They were issued to Mr. Tillinghast, 200 shares of watered stock, and Mr. Brannan complained that it should have been 200 shares of the eight and a half million issue of stock.

Q. I ask you that because I did not think there would be any one outside of the insane asylum who would lend $10,000 on 200 shares of that stock at the time. Therefore I ask you if you know it of your own knowledge?—A. No, sir; all I know is that I was employed by Mr. Brannan.

PENAL STATUTE UNDER WHICH PROCEEDINGS WERE BROUGHT.

Q. In the case of that complaint in the police court, I will ask you some questions further in regard to your knowledge of those proceedings. Was not that an attempt on the part of Mr. Robinson as a stock-

holder of the Central Pacific Railroad Company to have furnished to him and his counsel the books of the Central Pacific Railroad Company and not of the Contract and Finance Company?—A. I think the penal statute under which the proceedings were instituted are in favor of stockholders as against companies. I have not the statute and I have not seen it since that time, but the substance of it is, that if any officers of any corporation shall refuse to exhibit to any stockholder, when they desire, any books of the corporation, it shall be a misdemeanor. In general terms, that is it.

THE BOOKS SOUGHT TO BE REACHED.

By Commissioner ANDERSON:

Q. Mr. Cohen's question is, what books were sought to be reached? Can you tell what the books were?—A. I think the Contract and Finance Company's books were among the specified books; that is my impression, but at the same time the complaint may show differently. I did not make the complaint and I was not present through all of the proceedings, but I was there on the first day.

HOW THE PROCEEDING WAS BROUGHT.

By Mr. COHEN:

Q. I undersigned the law as you do, but I want to ask you how Mr. Stanford could have been proceeded against in the police court in such a proceeding as that when he was not an officer of the Contract and Finance Company?—A. That I cannot say, but I am very certain the complaint was against Mr. Stanford and Mr. Miller.

Commissioner ANDERSON. That is probably why the pleading was dismissed.

Q. Was it not against them as president and secretary of the Central Pacific Railroad Company?—A. It may be so; I cannot particularize about that. I know it was a novel proceeding and excited a good deal of comment at the time.

By Commissioner ANDERSON:

Q. Have you given us the date?—A. I think it was in the summer of 1876. I only get at the date from the fact that it went along with the Robinson suit, and I think that was instituted in March, 1876, and right along, a few months afterwards, this other proceeding was had.

Mr. COHEN. Is there any fact within your knowledge that you can state to the Commission that will bear in any way upon the subject committed to their investigation by this act of Congress?

A. I do not know that there is, sir.

PAPERS CONNECTED WITH THE BRANNAN CASE.

By the CHAIRMAN:

Q. Have you any papers, books, affidavits, or agreements of any kind in your possession growing out of those suits, from time to time, that you could give to the Commission?—A. I have, undoubtedly, many papers connected with that Brannan suit, but whether they come home to the Central Pacific Railroad Company, or any of their officers, I cannot say.

Q. Will you examine and ascertain?—A. I will look and see.

Q. And will you furnish to the Commission any testimony that you may have to throw light upon the subject of investigation?—A. I will

THE ROBINSON CASE.

Q. Was Mr. Cohen the attorney for Mr. Robinson in the Robinson suit?—A. Yes, sir; he was a very active attorney, too.

Q. Was Mr. Robinson the only plaintiff interested in the suit?—A. No, sir.

Q. Who else was interested?—A. I think there was a gentleman by the name of Collet and a gentleman by the name of Eggel, or some such name as that, I know it is a very peculiar name. I do not know that there were any more than those two. Mr. Cohen will recollect better than I do about it.

Q. You have named, as far as you can remember, all those interested in the Robinson suit as plaintiffs?—A. Yes.

Q. Do you know whether Mr. Cohen had any interest, as a plaintiff, in the Robinson suit?—A. No, sir; I do not.

THE $400,000 OF BONDS ISSUED BY SAN FRANCISCO.

By Mr. BERGIN:

Q. In referring to the different subsidies, you spoke of the $400,000 bonds issued by the city of San Francisco. Was there not a bitterly-contested litigation in regard to the constitutionality of the law itself, in the first instance?—A. I think there was a compromise, was there not, by the city.

Mr. BERGIN. Yes; but let us dispose of one thing at a time. Do you not know that that question was taken to the supreme court?

A. I think so.

Q. And do you not know that after the supreme court passed upon the constitutionality of the law the company again had to institute proceedings to compel the delivery of the bonds?—A. I think so. You are right about that.

Q. And do you not know that it was after the end of all that litigation that the compromise was finally reached?—A. Yes, sir; that is my recollection.

Q. And do not you know that one of the strong grounds of objection urged as to the validity of those proceedings was the liability of the stockholder for the debts and obligations of the corporation?—A. Yes, sir; I think so.

Q. Now in regard to the subsidy from the State, referred to there, do you not know that that was also litigated?—A. I think it was.

Q. And the company never got the bonds until after the supreme court had finally determined the constitutionality of the law?—A. That I cannot say, but I presume so. That would be my presumption.

VALUE OF THE BONDS.

By the CHAIRMAN:

Q. Were you a resident of San Francisco in 1863 and 1864?—A. No, sir; I lived in San Joaquin County.

Q. Were you familiar with the bonds that were issued by the city and county of San Francisco under the act of 1870?—A. I cannot say that I was, sir. Not being a financial man, I do not know.

Q. Were you acquainted at all with the value of the bonds at the time issued for the purposes of the sale?—A. I was not; I have always considered that the city and county bonds were first class.

Q. Have they ever sold below par?—A. I do not know that they have.

Q. Do you know whether they were ever quoted, from the date of issue, below par?—A. No, sir; I do not think they ever were, although I cannot say; I am only speaking from a general impression.

Q. The interest had always been paid regularly, the seven per cent?—A. Yes.

The CHAIRMAN (to Mr. Miller). Do you recollect the city bonds of San Francisco as selling below par?

Mr. MILLER. Yes, I think they sold below par. I can easily ascertain the prices, if you desire.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Thursday, August 11, 1887.

F. S. DOUTY, being further examined, testified as follows:

By Commissioner ANDERSON:

Question. I produced before the Commission a statement, furnished by its accountant, Mr. Stevens, taken from the books of the Western Development Company, and showing the cost of construction of the Northern Railway; also showing the stock and bonds of the Northern Railway issued against such construction. Before entering it upon our records we desire to give you the opportunity of stating, after examination, whether it is correct or not. You may take it, if you desire. I want you to verify it, so that before we put it on our record the gentleman in charge of that department of your company shall be satisfied that it is accurate.—Answer. I will do so.

INTEREST CHARGED ON CONSTRUCTION OF NORTHERN RAILWAY.

Q. I notice that in stating the cost of construction, interest on construction is charged. What was your practice in that matter?—A. It was the custom to charge interest.

Q. You charged interest up to the time that you got the bonds; is that what it means?—A. That is what it means. It is interest on the money expended in constructing the Northern Railway, and it also includes the Berkeley Branch.

Q. The stock and bonds are uniformly stated at par in your accounts?—A. Yes.

Q. I hand you, for the same purpose, an account showing the cost of construction of the San Pablo and Tulare Railroad?—A. The same course.

Q. Also an account showing the cost of construction of the Amador Branch and of the stock and bonds issued against the same.

Also a statement showing the cost of construction of the Southern Pacific of California.

COLORADO RIVER BRIDGE.

Also the Southern Pacific of Arizona, and also the Southern Pacific of New Mexico; also the cost of construction of the Colorado River bridge. In regard to the Colorado River bridge you gave some testimony some few days since. What corporation holds the title to that property?—A. The Pacific Improvement Company.

Q. Do you know yourself what the rental paid for it is?—A. I do, sir.

Q. You are also secretary of the Pacific Improvement Company?—A. Yes.

Q. What is the rental paid for the Colorado River bridge?—A. $1,000 a month.

Q. $12,000 a year?—A. Yes.

Q. Has that always been the rent?—A. Yes; that is, it was washed out once and burned once. And pending that time, of course, no income was received from it.

Commissioner ANDERSON. I hand you a statement of its cost of construction, and I beg you also to verify that. There is one other statement which is about being prepared by the accountant which will show the cost of construction of so much of the California and Oregon as has been affected by the Pacific Improvement Company. That I will hand you between now and the next time that you appear as a witness, and will ask you to complete the verification of that statement also?—A. I will verify them as to this Colorado bridge. In the first place, it was washed out and rebuilt; then it was burnt down and rebuilt, and the property stands the Pacific Improvement Company about four times what that statement amounts to.

Mr. COHEN. Over $200,000?

The WITNESS. Yes. And the question with me is whether you desire me to show the cost at the different times of building and rebuilding.

Commissioner ANDERSON. Yes.

WESTERN DEVELOPMENT COMPANY.

I desire now to read to the Commission the following extracts from the proceedings of the Western Development Company, dated September 4, 1877:

OFFICE OF THE WESTERN DEVELOPMENT COMPANY,
San Francisco, September 4, 1877.

A special meeting of the directors of the Western Development Company was held this day.

Present, F. S. Douty, H. K. White, D. T. Phillips, E. C. Wright, C. E. Green.

The president, F. S. Douty, then offered the following resolution:

Resolved, That the following securities of the surplus profits of this company now on hand be distributed and divided between the stockholders of this company in proportion to the amount of stock held by each, to wit:

Southern Pacific Railroad stock	$13,500,000
Southern Pacific Railroad bonds	6,300,000
Amador Branch Railroad bonds	675,000
Berkeley Branch Railroad bonds	100,000
Los Angeles Bridge bonds	13,500
Amador Branch Railroad stock	674,000
Berkeley Branch Railroad stock	100,000

And that the same be delivered to them in person, or to their agent or attorney duly authorized to receive the same.

On motion of E. C. Wright, seconded by H. K. White, the above resolution was adopted.

THE STOCKHOLDERS WHO RECEIVED THE DIVIDEND.

Who were the stockholders of the company at the time this dividend was declared?—A. The stockholders were those named there.

Q. I mean who were the owners of the stock of the company at that time?—A. Messrs. Stanford, Crocker, Colton, Huntington, and Hopkins.

Q. There had been no change, then, since the organization of the company in the actual ownership?—A. None to my knowledge.

PACIFIC IMPROVEMENT COMPANY.

Q. I now read you from the minutes of proceedings of the Pacific Improvement Company, at page 106 of the minute-book:

OFFICE OF THE PACIFIC IMPROVEMENT COMPANY,
San Francisco, Cal., April 11, 188[illegible].

A meeting of the board of directors of the Pacific Improvement Company was held this day at 1.30 p. m., pursuant to call duly had and made.

Present, Arthur Brown, B. R. Crocker, and F. S. Douty.

Absent, J. H. Strobridge and William E. Brown.

In the absence of both the president and the permanent president *pro tem.*, Arthur Brown was, on motion of F. S. Douty, duly seconded, elected president *pro tem.*

The minutes of the previous meeting were read and approved.

On motion of F. S. Douty, duly seconded, the following resolution was unanimously adopted:

Resolved, That the following securities of the earnings of this company, now on hand, be distributed and divided between the stockholders of this company in proportion to the amount of stock held by each, to wit:

Southern Pacific Railroad Company of Arizona, stock	$19,994,000
Southern Pacific Railroad Company of Arizona, bonds	2,572,000
Southern Pacific Railroad Company of New Mexico, stock	6,688,000
Southern Pacific Railroad of New Mexico, bonds	4,180,000
Monterey Railroad Company, stock	234,000
Monterey Railroad Company, bonds	248,000
Total	33,917,000

And that the same be delivered to them, in person, or to their agent or attorney duly authorized to receive the same.

THE STOCKHOLDERS WHO RECEIVED THE DIVIDEND.

Q. Who were the owners of the stock of the Pacific Improvement Company at the time of the declaration of this dividend?—A. Messrs. Stanford, Huntington and Crocker, and I think Mrs. Hopkins. She came in after the others at some time; I do not remember the date. Whether she was an owner at that time I do not remember.

Q. Are these the only dividends declared by the Western Development Company and the Pacific Improvement Company?—A. Yes, sir.

Q. These two?—A. Yes; these two.

LEASE OF THE SOLANO.

Q. Do you know anything of the circumstances of the lease of the boat Solano by the Western Development Company to the Southern Pacific Railroad Company?—A. I do not recollect any of the circumstances connected with it. I know there was such a lease.

Q. Do you know what rental was received?—A. Yes.

Q. How much was it?—A. It was $7,500 a month.

Q. Have you a copy of that lease?—A. Not with me; I have a copy of it at the office.

Q. How long did it run?—A. Till some time last year, I think.

Q. And always at the same rate?—A. Always at the same rate; yes, sir.

By Mr. COHEN:

Q. The lease has expired now, has it not?—A. Yes, sir; I think so.

ITS COST.

By Commissioner ANDERSON:

Q. Do you know the cost of the boat, or who it was purchased or built by?—A. It was begun, I think, by the Western Development Company, and completed by the Pacific Improvement Company.

Q. Do you remember the cost of it?—A. I do not remember the exact figures; no, sir.

Q. Can you sufficiently approximate it so, that we may not have to make up another construction account?—A. Yes, sir, something over $500,000.

Q. Over $500,000 and under $600,000?—A. Under $600,000.

OWNED BY NORTHERN RAILWAY AND OPERATED BY SOUTHERN PACIFIC.

Q. Does the Pacific Improvement Company still own it?—A. No, sir.

Q. To whom was it sold?—A. To the Northern Railway Company.

Q. When was that sale?—A. Some time last year. The lease terminated at that time. I think it was October 1, 1886.

Q. By what corporation is that boat now operated?—A. By the Southern Pacific Company.

Q. And the arrangement for the present operation is between the Southern Pacific and the Northern Railway?—A. I so understand it

NO COAL LANDS OWNED BY PACIFIC IMPROVEMENT ALONG CENTRAL PACIFIC.

Q. Does the Pacific Improvement own coal property in the Territory of Utah?—A. No, sir.

Q. Have they owned any?—A. No, sir.

Q. In Box Elder County. Where is that?—A. It sounds something like Wyoming.

Q. Is it in Wyoming?—A. I do not know.

Q. Do you own any coal property there?—A. The Pacific Improvement Company has no interest in coal property in Wyoming or Utah or anywhere along the line of the Central Pacific Railroad Company. We thought we had a coal mine at one time, I think, at a place near Terrace. We organized a small force to develop it and it did not amount to anything, and it was abandoned.

NO PROPERTY RENTED TO CENTRAL OR SOUTHERN PACIFIC.

Q. Is there any other property held by the Western Development Company, or the Pacific Improvement Company, for which you received rent from the Central Pacific or the Southern Pacific? For example, are there any hotels?—A. No, sir; none renting to the Central or to the Southern Pacific.

Q. Are they hotels that are used in connection with the operation of the road in any way, or in which the Central Pacific figures at all?—A. No, sir.

Q. Have you any other property whatsoever as to which the Western Development derives an income from the Central Pacific or the Southern Pacific?—A. No, sir.

By Commissioner LITTLER:

Q. Does either of these companies own any other property which was acquired through the dividends or profits made out of work done for the Central Pacific or the Southern Pacific companies?—A. They do not own any property that I am aware of arising from profits derived from the Central or Southern Pacific.

WHAT THE DIVIDENDS REPRESENT.

Q. Do the dividends whose amounts have been recited in your hearing represent all the profits of those companies, up to the time that they

were declared?—A. They do not represent profits at all, according to my understanding of it. They represent so much bonds and so much stock, having no value at the time the dividends were declared. Of course they cannot be said to be profits or losses. They were just so much paper.

Q. Do you undertake to say now that those securities are worth nothing?—A. I do not, sir; but I say that they have no market value and no ostensible value. They were sufficiently lacking in value to render me unable to say whether they were profits or not. In other words, I do not know whether we could dispose of those things and get our money back.

ROCKY MOUNTAIN, IONE, AND CARBON HILL COAL COMPANIES.

Q. My recollection is that Governor Stanford in giving a schedule of his property in the several corporations connected with the Central Pacific mentioned stock in two or three coal mines in Wyoming, perhaps the Rocky Mountain Coal Company and the Ione Coal Company and the Carbon Hill Coal Company. Do you know anything of those companies?—A. Yes, sir.

Q. I wish you would state whether those companies or either of them have been in the habit of furnishing coal to the Central Pacific?—A. Yes. sir.

PRICES AND QUALITIES OF COAL FURNISHED.

Q. In what quantities and at what prices?—A. As to the Ione Coal and Iron Company I cannot say in what quantities or at what prices, but as to the Rocky Mountain Coal and Iron Company they have supplied more or less coal to the Central Pacific and its successor, the Southern Pacific, and it is still supplying.

Q. Who keeps the books of those companies?—A. I keep the general books, or they are kept under my supervision.

Q. Will you furnish a statement to this Commission of the total amount of coal furnished and the prices at which it was furnished to the Central Pacific from those companies?—A. I can give it possibly as to the price, but not the quantity. It would take some time to furnish the quantities.

Q. You can furnish the prices too, can you not?—A. It will take some time to furnish them.

Mr. COHEN. The Commission's accountant can take the books and furnish their own statement. We will let you have the books.

VOUCHER NO. 1878.

By Commissioner ANDERSON:

Q. Please look at the Central Pacific Railroad voucher No. 1878 for $29,974.13, and state whether the money therein referred to was received by you?—A. It must have been, as it has my receipt attached.

Q. Is this voucher the only voucher which you delivered to the railroad company?—A. It is possible there may have been more. I have no recollection on that subject. The passing of receipts between the railroad company and that company was a very common occurrence.

Q. Is it all in your handwriting?—A. The face of that voucher is in my handwriting.

Q. The statement on the face of the voucher is that the money was paid you for: "Cash advanced on your account." To whom did you

advance this cash?—A. I have no recollection, independent of the voucher.

Q. Is it your practice to receive as large amounts of money as this without any statement in detail showing the person to whom the money was paid or the object to which the money was applied?—A. It is my practice to get the money on vouchers allowed in that manner in favor of the company I represent.

"LEGAL EXPENSES."

Q. Without stating the name of the person to whom the payment was made on the face of your voucher?—A. I do not know who it was paid to. That was evidently a transaction in which I was governed by the directions of General Colton.

Q. And how do you identify it with General Colton?—A. I identify it by his indorsement in the words, "legal expenses."

Q. In whose handwriting are the words, "legal expenses"?—A. In the handwriting of General Colton.

Q. What had General Colton to do at the period of this voucher, September, 1876, that would call for $29,000 for legal expenses?—A. General Colton was practically the manager of the Western Development Company. It was from him that I received nearly all, if not all, of my instructions as to the management of the company. He was particularly the financial man at that time of the Western Development Company.

HOW THE VOUCHER WAS MADE UP.

Q. Does this voucher then, as you interpret it, mean that you had given $29,974.13 to General Colton for account of the Central Pacific Railroad Company?—A. It seemed to be that way.

Q. Or does it mean that you had simply expended it as General Colton had directed?—A. I have no recollection of it independent of the voucher, but I have the impression that the voucher was made up under the dictation of General Colton. He prescribed the form and I presume had the information which warranted him in giving that direction.

Q. Did the Western Development Company receive this payment simply by a credit in account?—A. I am unable to say without reference to the books.

Q. Have you any recollection at all with reference to this transaction?—A. I have not the slightest.

Q. Are there many of the same form?—A. As I said before, there may be. I have no recollection of any at this moment.

VOUCHERS PREPARED UNDER GENERAL COLTON'S DIRECTION.

Q. Do you recall the fact of preparing this voucher under General Colton's direction?—A. I recall the fact of preparing vouchers under his direction; a voucher or vouchers I am unable to say which. I remember that circumstance.

Q. On such occasions, did General Colton make any explanation to you as to the object for which the money had been spent, for which he was seeking reimbursement?—A. He did not.

Q. Did you have or ask for any knowledge in regard to that subject?—A. I did not.

"INFLUENCING LEGISLATION."

Q. Do you know whether any portion of this sum of $29,974.13 had been used for influencing legislation?

Mr. BERGIN. That, of couse, is precisely in the same line as the questions asked of the other witness yesterday.

Mr. COHEN. He does not know and so he might as well answer.

Mr. BERGIN. There is no use in wasting time over it.

Commissioner ANDERSON. We are satisfied with the statement of counsel.

By Mr. COHEN:

Q. You do not know?—A. I do not know anything about it.

VOUCHER NO. 1877.

By Commissioner ANDERSON:

Q. Now I show you voucher No. 1877 for $50,000, dated September 1, 1876. Please look at that voucher and state the circumstances under which you prepared it?—A. I will make the same answer in all respects, except that the words "expense account" are written here in General Colton's writing, instead of "legal expenses," as in the other voucher.

Q. I call your attention to the fact that both these vouchers bear the same date. Does that recall the circumstances of that transaction to you?—A. I have no recollection whatever about it. As I said before, I did prepare a voucher or some vouchers under his direction.

DIFFERENCE BETWEEN "LEGAL EXPENSE" AND "EXPENSE ACCOUNT."

Q. What signifies the difference between the direction that one should be charged to "legal expense" and the other should be charged simply to "expense account"?—A. I am aware of no significance.

Q. You know of no difference intended by those words?—A. I know of no difference. He wrote down what he happened to think of first, probably.

Q. Is the account the same?—A. There may be two accounts in those books; that I am unable to say. The distribution of that voucher will show that.

Q. Have you any knowledge as to the person or persons to whom this $50,000 was paid?—A. I have not.

Q. Or the objects to which it was applied?—A. Not the slightest idea.

Q. Do you know whether this money, or any portion of it, was used for the purpose of influencing legislation?—A. I do not.

Q. Who got President Stanford's approval of the bill?—A. That I am unable to say.

Q. Do you know whether you did or General Colton did?—A. I do not think I did. I do not think I ever had anything to do with Governor Stanford at that time, except casually.

VOUCHER NO. 2094.

Q. Please look at voucher 2094 for $46,816.94, dated November 12, 1878, and state the circumstances under which that voucher was paid?—A. I have no knowledge of this other than what appears upon the face of the voucher.

Q. And do you know at whose request you prepared it?—A. I think the paper attached is in the handwriting of Mr. W. E. Brown, and I think that it was through his direction or request that that money was collected from the Central Pacific.

Q. Was he then Mr. Leland Stanford's secretary or book-keeper?—A. I am not aware that he was Mr. Stanford's book-keeper.

Q. He was the book-keeper of "S., H., H. & C"., and attended to business for Mr. Stanford?—A. I so understand it; yes, sir.

Q. And he did not attend to any personal business of General Colton's; or did he?—A. Well, at this particular time General Colton was dead.

Q. Do you know the names of any person to whom this money was paid, or any part of it?—A. I do not.

Q. Do you know to what object it was applied?—A. I do not.

Q. Do you know whether any part of the money was used to influence legislation?—A. I do not.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Thursday, August 11, 1887.

S. T. GAGE, being duly sworn and examined, testified as follows:

By Commissioner ANDERSON:

Question. What is your occupation?—Answer. I am connected with the Southern Pacific Railroad Company.

"ASSISTANT TO THE PRESIDENT."

Q. In what capacity?—A. I am assistant to the president and also a director of the company.

Q. Have you been in years past connected with the Central Pacific?—A. Yes.

Q. In what capacity?—A. Practically in about the same capacity. I was a director, at times, in the Central Pacific.

Q. What do you mean by assistant to the president?—A. That is the definition of the office, or position, that I hold. Instead of being vice-president, the office of assistant to the president was created.

Q. Do I understand you that you discharged the executive duties of the president in the absence of the president?—A. Hardly; I do not understand it so—not absolutely.

Q. I merely ask a question because I follow your own definition for vice-president. You mean that you assist him in any way that may be found desirable to help him to discharge his duties?—A. I think so. I try to do so.

Q. Is the assistance of a personal nature, in writing his letters or conducting his correspondence for him?—A. Nothing of that kind.

DUTIES OF THE POSITION.

Q. Please define it by illustration, so that I can understand what you mean.—A. It is very difficult for me to define, sir. It is a position that is attached to some few railroads in the United States. Very few have the office of assistant to the president.

Q. Are your duties solely rendered to the president as president and not rendered to any special department of the railroad company?—A. Generally to the railroad company.

Q. But always under the direction of Mr. Stanford?—A. I should think that if he gave directions that I would be under his directions; I should consider it so, at least.

Q. To reach it by process of elimination, have you any thing to do with the freight department?—A. I have had a good deal to do with all the departments, at one time or another.

Q. Under your position as assistant to the president, do you have any thing to do with fixing the rates of freights, for instance?—A. Fixing the rates of freight? I should think that was a question that had never come before the directory.

Q. Except as Mr. Stanford might talk with you about it, or advise with you, you take no active part in the regulation of freight?—A. No.

Q. And is the same true of the passenger service?—A. We have departments especially created for those particular branches of the service. Freight matters more particularly come under the head of the general freight department.

Q. In charge of Mr. Stubbs?—A. Mr. Stubbs is the general traffic manager.

Q. And you have a passenger department, in like manner?—A. A passenger department in like manner.

Q. And you have a construction and repair department?—A. Yes, sir.

Q. Now, please tell the Commission in which of these departments you figure, or if not in any of these departments, what line of business you do?—A. I do a great variety of business. I am an exceedingly busy man, I think. I have thought so for some time.

Q. Do you occupy a room adjoining the president's room?—A. There is a small room between his room and mine.

RELATIONS TO PRESIDENT STANFORD.

Q. Does he advise with you on all subjects relating to the interests of the road?—A. Possibly not on all subjects. He does on many subjects.

Q. I refer more especially to the years that you were connected with the Central Pacific. Was Governor Stanford in the habit of conferring with you upon all financial questions in which the road was interested?—A. I should think not.

Q. Was he in the habit of discussing questions of construction and improvement?—A. Occasionally.

Q. Was he in the habit of conferring with you upon subjects affecting the general policy of the railroad company with reference to the communities which the railroad undertook to serve, and how it was best to benefit the people by giving them such facilities as would promote their interests and those of the road?—A. That was a subject of great concern always with President Stanford.

Q. Was it one of the subjects which he used to discuss with you?—A. I think so occasionally, and perhaps frequently.

Q. Was he in the habit of discussing circumstances which seemed to threaten the useful operation of the railroad in any way by interfering with its full power of discharging its duties to the community?—A. Such questions were a subject of discussion.

Q. What subjects did Mr. Stanford regard as more especially threatening the usefulness of the railroad and its successful operation?—A. I am hardly prepared to answer so general a question as that.

Q. Did he discuss the question of threatened competition from other roads as being one of the dangerous elements?—A. The question of competition was a subject, and always is, of interest for a transportation

company, and of course is one that is looked after. It would be a natural one for discussion.

OPPOSITION OF THE PRESS.

Q. Did the subject of the occasional opposition of the press to the position held by your railroad company come up for discussion between you?

Mr. BERGIN. Is it of any particular moment to know what was the subject of discussion between Governor Stanford and the witness?

Commissioner ANDERSON. I will come to the more important subject in a moment or two. This gentleman has been somewhat indefinite about his relations to Mr. Stanford, and I want to get some idea what it is that he does and what Mr. Stanford does.

A. A great many questions have been subjects for discussion in the last sixteen or seventeen years between Governor Stanford and myself, and I presume the press has been, or certain newspapers have been, the subject of discussion at times.

Q. Was the subject of the granger laws commonly discussed?—A. We have had no granger laws here.

Q. But was the subject discussed as being one that might affect the operations of railroads either in this State or Nevada or in the Territory of Utah?—A. I am not aware of that; I have no recollection particularly of such a discussion as that.

Q. Was the subject of measures pending in the legislature of the State of California a matter of frequent discussion between Mr. Stanford and yourself?—A. Yes, sir; frequently.

Q. It was a matter in which he took a very deep interest, I presume?—A. Naturally, of course, at times.

LOOKING AFTER LEGISLATION IN NEVADA.

Q. Is it true that at almost every session of your legislature measures affecting the interests of your road have been pending?—A. I presume nearly every session of the legislature since I have had any relations with the company. I will say that in California I have not attended a session of the legislature, I think, since the adoption of the new constitution in 1879. I devoted my time previous to that alternating between Nevada and California somewhat. The new constitution brought the two sessions of the legislature together in the same winter, and since that time I have in a measure looked after Nevada, and in doing so I have not attended the legislatures, or the sittings of the same, in Sacramento.

Q. Do I understand, then, that it has been your custom to attend legislatures either of the State of California or Nevada for many years past, representing the interests of the Central Pacific road?—A. Looking after their interests. I attended one or the other of those legislatures.

Q. Do you draw any distinction between representing and looking after?—A. No; I will allow you to do that.

ATTENDANCE ON CALIFORNIA LEGISLATURE.

Q. How intimate have you been with the members of the California legislature?—A. On friendly terms with a great many of them.

Q. And this has been so for very many years?—A. No, I just stated in my answer.

Q. Before 1879?—A. I have not attended a legislature in that capacity in California since the adoption of the new constitution, hardly even

for the purpose of looking in upon the legislature in California then,

Q. Before 1879 were you in the habit of attending California legislatures?—A. Yes, sir; from 1871 to 1879 or thereabouts.

Q. Did the legislature always meet at Sacramento?—A. Yes, sir; during all that time.

Q. Did you stay there continuously or quasi continuously during their sessions?—A. A great deal of the time I was there.

Q. Where did you stay?—A. I stayed in Sacramento.

Q. At what hotel?—A. Various hotels during those 6 or 7 years, and sometimes not at the hotel. I had sometimes private rooms, not in the hotel. If it is of importance to the Commission, I think I could recollect every place that I had quarters in Sacramento during those 7 years.

Q. Was it your practice to have members of the legislature visit you at your rooms?—A. If they did not, it was my practice to visit them wherever I could find them.

Q. I presume so, but I am asking you as to their practice of visiting you?—A. Some of them would come there.

Q. Would they take meals there?—A. I did not have any meals there. If I had I would have invited them to eat.

VOUCHER NO. 2571½.

Q. Please look at the voucher No. 2571½, for $8,911.53, bearing sundry dates from January 23, 1878, to September 2 of the same year, containing on its face an entry—"Cash to S. T. G., $2,500, and interest to December 31" (carried out), "$2,614.16," with a memorandum in pencil reading, "Vouchers 1491, 1510, 1558." State whether that sum of $2,500 was money which had been paid to you.—A. I have no recollection of ever seeing that voucher before to-day.

Q. In whose handwriting are those initials "S. T. G."?—A. I could not say.

Q. "S. T. G."—I should say, whose initials are those?—A. They would be mine if I made them.

Q. Well, they "would be" yours if anybody else made them, would they not?—A. They might belong to some other man with the same initials.

Q. Do you know of any other man with the same initials who has business with the Central Pacific?—A. I do not know; it does not occur to me; but then there may be such a man out of the thousands in their employ.

Q. Do you not think you are possibly the person intended?—A. Possibly.

NO KNOWLEDGE OR RECOLLECTION OF IT.

Q. Did you receive that money at the date of that voucher or during that year?—A. I have no knowledge or recollection of any such receipt. I am quite sure I never saw it; I say I am quite sure I have no recollection of ever seeing that voucher before; still I may have seen it. If I had receipted for it, it would have been a different proposition.

DID WITNESS RECEIVE MONEY FROM GOVERNOR STANFORD?

Q. Did you ever receive money from Governor Leland Stanford without receipting for it?—A. I have no recollection of it.

Q. Do you recollect of no occasion where he paid you money without taking a receipt from you?—A. I have no such recollection.

Q. How do you know that you did not give a receipt for this $2,500?—A. If I had, it should have been attached to that as a voucher. There should have been a receipt, and the receipt should have been appended to that voucher.

Q. Suppose that Governor Stanford omitted to attach that receipt or lost it, is it not entirely consistent with the fact that you gave him a receipt and received that money?—A. It is not consistent with my method of doing such things. I have no recollection of ever having seen that before. Still I may have seen it, but I have no recollection. There is no reason why I should. If my receipt was there, if I had receipted it, and my signature was there, I should very readily recognize it as my signature.

Q. Has Governor Stanford given you any money, or have you received through Governor Stanford any money other than such money as might be due you for your salary or your compensation?—A. The governor and I have had very little personal business during the twenty years that we have been acquainted and associated, in which it was possible that there were some moneys that I received from him. I hardly recollect of a business transaction of that kind.

RECEIPTS WITH COMPANY WOULD SHOW.

Q. Have you not on many occasions expended money for account of the Central Pacific and received the same from Governor Stanford?—A. I do not understand that question. That is to say, that Governor Stanford gave me the money?

Commissioner ANDERSON. Yes; money, or check, or order for money.

The WITNESS. Well, if so, my receipts for the same would be with the company.

Q. I did not ask you whether the receipts would be with the company, but I ask you whether the transactions had occurred?—A. Possibly and very probably, but if so it would show upon the books of the company, and my receipts in every instance would be given for such moneys.

Q. How often would such transactions occur?—A. The books will show that, and you have perfect and free access to the books, gentlemen, as I understand it.

Q. Still, I would like you to tell me how often it happened that Governor Stanford would give you either money or an order for money in order to reimburse you for moneys that had been expended in this way?—A. I am doing a good deal of business for a man of my estimated capacity of myself, and the idea that I should be put to the recollection of a thing of that sort when the books of the company show every dollar that I have ever taken from the company!

Commissioner ANDERSON. I do not ask you as to the amount.

COMMISSION REFERRED TO BOOKS OF COMPANY.

The WITNESS. This Commission has free access to the books and has examined them. Our offices are filled now with your men, and to put me to the task of recollecting how often Governor Stanford has ever given me money, when he has never given me any in the sense of "giving," when it all has been a business transaction of the company, seems to me to be a waste of the valuable time of this Commission, if you will allow me to say so, and I know the chairman is getting very uneasy to get back to Pennsylvania. You have free access to the books. Your people are filling the office with their work. I never received a dollar

from the company that the books do not show, and I am hungry to-night and want to get over the bay to my family, where I belong.

Commissioner ANDERSON. You are making a very long answer to a very simple question. I want to know whether Governor Stanford was in the habit of having these transactions with you as often as once a month.

The WITNESS. I think not; not nearly so often as once a month.

VOUCHER NO. 1625 AND OTHER VOUCHERS.

Q. Please look at the voucher I now show you and state by whom the receipt is signed; it is Voucher No. 1625, for $3,000, dated September 4, 1878.

The WITNESS (looking at the document). Now, that begins to look like business.

Commissioner ANDERSON. I am very glad it meets your approbation.—A. That is my signature.

Q. Please look at the other vouchers I now show you, No. 513, for $800, dated March 12, 1879; No. 568, for $800, dated March 22, 1879; and No. 570, for $700, dated March 27, 1879, and state by whom those receipts are signed?—A. The money for the four vouchers that I hold here was received by me, and those are my signatures attached.

Q. Where were you in March, 1879?—A. These vouchers say that I was in San Francisco in March.

Q. Well, I do not ask you what the vouchers say; I ask you from your memory if you can give it. Where were you in March, 1879?—A. I presume I was here.

Q. Had you, during the spring of 1879, attended the legislature either of California or of Nevada?—A. I cannot say. The new constitution came in about that time, and whether I was at a legislature and whether there was a meeting of the legislature in 1879 I am not able to state.

WHAT THEY REPRESENT.

Q. Were the moneys described in the vouchers which you hold in your hand paid to you by way of compensation for any service rendered by you personally for the Central Pacific Railroad Company?

The WITNESS. Do you mean for salary?

Commissioner ANDERSON. Salary or compensation?

A. I had no compensation beyond my salary.

Q. Those items do not represent salary—three such items in one month?—A. No, sir; they do not.

Q. Was this money given you in check or in bills of the company?—A. I have not the slightest recollection of that.

Q. By whom was the money given to you?—A. I have not the slightest recollection by whom.

Q. For what object did you receive this money?—A. I have not the slightest recollection for what object.

NO LEGISLATURE IN SESSION AT DATE OF VOUCHERS.

Q. Did you receive any portion of this money for the purpose of using the same in influencing pending legislation?—A. I presume not.

Q. Why do you presume not; can you not be more positive than that?—A. Well, first, I do not think that there was a legislature in session at that time, either in California or Nevada.

Q. How much money have you received on vouchers of this character, chargeable to "expense account," from Mr. Stanford?—A. I cannot tell; I do not think I received that from him; that is my impression.

Q. How much have you received through officers of the Central Pacific Railroad Company, coming from that company?—A. The books of the company will show.

Q. Did you receive so much as two or three hundred thousand dollars?—A. I could not say, for I kept no note of matters of that sort.

INFLUENCING LEGISLATION.

Q. Have you ever received any moneys from the Central Pacific Railroad Company for the purpose of using the same in influencing legislation?—A. It depends a good deal on your definition of "influencing legislation." My personal expenses were always paid by the company when I was attending a legislature, and in that sense my personal expenses might be regarded by some people who were technical as moneys received "in influencing legislation." My personal expenses were always paid.

"PERSONAL EXPENSES."

Q. Do you include in the words "personal expenses" anything beyond the expense of lodging and of the table for yourself alone?—A. I have a recollection of exactly what I did in the State of Nevada for the first eight years that I was with the company. Nevada was my old State, and I took a good deal of pride in it. I liked the boys and they liked me pretty well, some of them. I kept a detailed account and statement of the first eight years that I was with this company, so far as the State of Nevada was concerned. We had a good deal of legislation over there.

KEPT ACCOUNT OF WHAT THE CENTRAL PACIFIC PAID IN NEVADA.

Q. You kept a detailed account of what?—A. Of the entire expenses of the Central Pacific Railroad Company within the State of Nevada for eight years, and there was a good deal of adverse legislation introduced there.

Commissioner ANDERSON. You say that you kept an account; of what kind of expenses, your personal expenses?—A. It included everything that the Central Pacific Railroad Company paid in the State of Nevada for eight years, including my personal expenses during the sessions of the legislature.

Q. Does this account cover expenditures other than your personal expenses?

Commissioner LITTLER. He has said so.

Commissioner ANDERSON. Not with sufficient definiteness to satisfy me.

The WITNESS. To what account do you refer?

Commissioner ANDERSON. The account you refer to as having kept for eight years.

The WITNESS. It includes every dollar of expense that the Central Pacific Railroad Company was put to for eight years within the State of Nevada.

THE "ROTTEN BOROUGH" IN AMERICAN POLITICS.

Q. Well, I ask you if it includes items other than your own personal expenses?—A. It only includes the aggregate for eight years.

Q. Is the aggregate made up of anything besides your own perso hotel bills?—A. It was the entire expenditure of the Central Pacif Railroad Company within the State of Nevada for those eight yea Nevada has, with some people, rather an unsavory reputation on th question of legislation. I have heard it spoken of in the East, when have been there, greatly to my dislike, as the "rotten borough" i American politics, and I think very unjustly—very unjustly. Hence was that I kept an exact account. You will pardon me for making s lengthy a statement on that subject, but I have now got to the point Information is what you are after, and, as you have kept me here be yond my dinner hour, I would just as soon stay here now until 7 or half past 7 o'clock.

Commissioner ANDERSON. We are willing to stay here as long as may be necessary.

COMPLAINTS OF DISCRIMINATION IN NEVADA.

The WITNESS. Nevada is very peculiarly situated, geographically. It is, as it were, between the upper and the nether millstone so far as freights and fares are concerned. The people of Nevada thought that they were discriminated against. "Discrimination" is a favorite word over here. They were without any competition, and hence they claimed that they were at the mercy of this "great monopoly," this "anaconda," this "boa constrictor," that was "endeavoring to swallow the universe," and all that sort of thing. I found myself in the predicament at one time of defending our charges for local rates from San Francisco or from California to Reno. Those rates to them seemed high. I talked about 116-foot grades and 10-degree curves and a mile of tunnel and 40 miles of snow-sheds and all that sort of thing in explaining to the people of Nevada and justifying the high rates of freight which we were charging locally from California to Nevada. On the other hand I was met by the good people there saying: "That is all right, no doubt, but how do you justify it? How do you get over the fact that you bring goods from the east, from Chicago, for instance, by the car-load and charge more to dump it down anywhere in Nevada—charging double, if you please—than you would charge to carry it over this big mountain that you are talking about, through these snow-sheds? You carry it to San Francisco for half the rate at which you bring it to Nevada." I found it a very difficult position, and I have nearly worn out perhaps the best pair of lungs that a man ever had in trying to justify that condition of things. I have finally done so to their satisfaction. Convincing a man's intellect against his pocket interests is rather difficult to do, the most so of anything I have ever undertaken. Having no competition they were charged and ought to pay fair and reasonable rates regardless of competing points.

Commissioner ANDERSON. Well, when are you going to get back to the question?

The WITNESS. I will get back pretty soon. I am giving you a little information, and that is what you are after.

"REASONED WITH THE BOYS" IN REGARD TO HOSTILE LEGISLATION.

Q. What I want to know is whether the account of expenses that you kept included other than your own personal expenses.—A. I am getting to that point soon. There was a good deal of hostile legislation regarding railroads introduced in Nevada under that condition of things. At every session of the legislature we had to meet hostile legislation

and they sometimes carried it so far that they became retaliatory. For instance, they introduced a fence bill. They could not think of anything else to introduce. They felt badly about it and wanted to compel us to fence the line along the road. I had to meet that and similar legislation when they got a little ugly. I did that for eight years, keeping an exact account of the entire cost under such circumstances to the Central Pacific Railroad Company. Not a scratch got on the statute-books against us during those eight years. Our opponents frequently thought they were going to succeed, and I sometimes did not know but that they would, but I reasoned with the boys and at the end of eight years I knew just exactly the cost, so to speak. I had an exact account of legislative expenses of all characters, including all my personal expenses within the State. I kept an exact account of it and know just what it was.

"LEGISLATIVE EXPENSES OF ALL CHARACTERS."

Commissioner ANDERSON. You have used the expression that this account covered "legislative expenses of all characters."

The WITNESS. Legislative, because while I was there my personal expenses were for pending legislation. If I attended conventions in the State, which I sometimes did, it would be a legislative expense, for I was over in the State of Nevada upon business pertaining, as I think, to the Central Pacific Railroad. As I say, I kept an exact account of it, and it amounted to a little less than $2,000 for the eight years, or a fraction under $250 for each year. There was not a dollar paid by the Central Pacific Railroad Company during those eight years, to my knowledge, over and above that sum, and if there was it was wrong; it was a mistake, and I will pay it out of my own pocket.

Commissioner ANDERSON. You have made quite a long speech.

The WITNESS. Thanks. I could make a longer one. [Laughter.]

Commissioner ANDERSON. I have no doubt of it.

The WITNESS. And I could tell facts all the time.

WHAT THE ACCOUNT CONTAINED.

Q. Do you say that the account which you kept contained all forms of legislative expenses which you had incurred in addition to your personal expenses, whatever they were?—A. Yes. In other words, no man saw the color of the Central Pacific Company's coin during those eight years. My personal expenses were my board at the hotel. If I charged the company for a few cigars—because I was in the habit of smoking in those days; I have reformed now—my bill included those; and that was every dollar. Notwithstanding that, the good people over there and the newspapers would assert, "Look out for that man Gage; he is here corrupting the legislature," which charge I am suffering under and I am afraid my children will. I am now raising a family of children. [Laughter.]

STARTED IN LATE, "BUT GOT THERE ALL THE SAME!"

Commissioner ANDERSON. It is a very healthy occupation, and I wish you success in it.

The WITNESS. It is one of the most perfect successes you ever saw. [Laughter.] I have got the best record on that of any man I know of in the State. I started in late, but I have kept up a fine rate of speed. [Renewed laughter.]

ONLY $2,000 SPENT SINCE 1871.

Q. Do you state under oath that $2,000 represents all the money which you have received from the Central Pacific Railroad Company, outside of your regular salary, since the new constitution of 1879?—A. No; I do not say any such thing. I referred to the first eight years that I was in the employ of the company (I have been with them not a little over sixteen years). What I have said is all true, and I take pleasure in swearing to it.

Q. What eight years do you refer to? Please define them.—A. From 1871 would be, according to Daboll, to 1879.

Q. And the legislature which you attended during these years was always in the State of Nevada?—A. That I am speaking of; yes, sir.

Commissioner ANDERSON. I had understood that it was after '79 that you went to Nevada.

Mr. COHEN. He said that before that he alternated between the two States.

The Commission here adjourned to Friday, August 12, 1887, at 10 a. m.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Friday, August 12, 1887.

The Commission met pursuant to adjournment, all the Commissioners being present.

Commissioner ANDERSON. We would like to have the three vouchers recited in the voucher of December 31, 1875. They are numbered 1491, 1510, and 1558.

BOOKS OF CONTRACT AND FINANCE COMPANY PRODUCED.

Mr. COHEN. I produce to the Commission the books of the Contract and Finance Company, which were in use at the time of the disincorporation of that company.

Commissioner ANDERSON. From what time; commencing when?

Mr. COHEN. They appear to commence in 1873, as far as I have examined them, and to have been kept up to the date of the disincorporation of the company.

Commissioner ANDERSON. We will examine them at our leasure.

Mr. COHEN. I would like it noted that the books produced are the ledger, journal, and cash book.

DATE OF ORGANIZATION OF THAT COMPANY.

The CHAIRMAN. When was the Contract and Finance Company organized; what was the date?

Mr. COHEN. I do not remember.

The CHAIRMAN. Was it in the year 1867?

Mr. COHEN. That is my impression.

The CHAIRMAN. So that all the books from 1867 to 1873 are missing?

Mr. COHEN. Yes, sir.

The CHAIRMAN. You do not pretend that among these books presented to the Commission there are any books from 1867 to 1873, do you?

Mr. COHEN. I have stated exactly what I produce, and I cannot enlarge the terms of the offer in any way.

NO BOOKS PRODUCED SHOWING ENTRIES BETWEEN 1867 AND 1873.

The CHAIRMAN. Do I understand that you produce any books showing entries between 1867 and 1873?

Mr. COHEN. I did not say so.

The CHAIRMAN. Do I understand you to produce any books showing any entries between the period of 1867 to 1873? I ask you to answer that, or to say that you will not answer it.

Mr. COHEN (to the secretary). Will you read, for the information of the chairman, what I said as to the books I produced and the dates that they covered?

The CHAIRMAN. I ask you to answer the question I put, or to say you will not answer it.

Mr. COHEN. I object very much to the efforts of the chairman to put counsel in a false position. I object to the question that he puts to counsel about the papers which he produces as tending to force counsel into a false position.

The CHAIRMAN. As president of the Commission, I rule your objection out of order, and ask for an answer to my question.

Mr. COHEN. I insist upon my objection appearing on the record. I say further, that I do not pretend to anything. I produce the books here, and they speak for themselves. If I am summoned as a witness to explain the books, after I have carefully examined them and mastered their contents I will give the Commission the best information in my power, but it seems to me that it is the effort of the chairman at all times to force all the parties that appear before him, either as counsel or as witness, into a false and untenable position.

The CHAIRMAN. Mr. Cohen, I ask for an answer to my question.

Mr. COHEN. I can answer it no more. I have given a full and complete answer, and one, I think, that would be considered satisfactory by any court or by any impartial judge.

The CHAIRMAN. That is all. I am much obliged.

Mr. COHEN. You are welcome.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Friday, August 12, 1887.

STEPHEN T. GAGE, being further examined, testified as follows:

By Commissioner ANDERSON:

Question. Yesterday I understood you to say that it is quite probable, as you put it, that from time to time you received money from Governor Stanford, and that such payments were always accompanied by receipts given by you. Is that correct?—Answer. I do not think that I answered exactly in that form. I remember the question being pressed by yourself.

DID WITNESS RECEIVE MONEY FROM GOVERNOR STANFORD?

Q. Have you received money from Governor Stanford for the account of the Central Pacific Railroad Company other than your compensation or salary (which latter I presume came from another office)?—A. If I ever have, it would appear upon the vouchers.

Q. That is to say, upon the receipts signed by you?—A. Yes, sir.

Q. At the time that you received the money?—A. Yes, sir.

Q. And delivered to the person who paid you the money?—A. Yes, sir; that is, delivered to the person to whom application was made for the money.

Q. If the person who received the voucher from you should fail to file it with the company, it would not be found on the files of the company, would it?—A. I do not understand the question; that is, under my idea of vouchers, with all due respect to Commissioner Anderson, I do not understand the question.

Q. You have stated that you delivered vouchers to Governor Stanford when he gave you money, if he ever gave you money. If he should retain the vouchers or burn them up you could not expect us to find them on the files of the company, could you?—A. No, sir.

"IF SO, IT WOULD APPEAR ON THE VOUCHERS."

Q. I ask you again if it be true that Governor Stanford has from time to time made you payments of money for account of the Central Pacific Railroad Company?

The WITNESS. If it be true?

Commissioner ANDERSON. Yes, sir.

A. If so, it would appear on the vouchers themselves.

Q. I ask you the question whether he has paid you the money?—A. So far as paying over any money to me is concerned, I have no recollection of Governor Stanford ever paying over any.

Q. Or giving you any check?—A. No, sir; nor giving a check. The vouchers themselves explain this thing. That is all the paper that I know of between the company and any member of the company and myself relating to money.

Q. When you gave vouchers you received something, did you not?

The WITNESS. From whom?

Commissioner ANDERSON. From the person to whom you gave the voucher.—A. If I did, those vouchers would show it.

Q. The vouchers would not show what you received. The vouchers will only show what you receipted for, will they not?—A. That is what I received.

Q. In what form did you receive it, in bills or a check?—A. I cannot say. I presume in the equivalent of coin. I have no recollection whether it was in bills or checks, but I presume in the equivalent of coin.

THE BOOKS WOULD SHOW WHEN VOUCHERS WERE GIVEN.

Q. On how many occasions have you given vouchers for moneys?—A. The books of the company will show every occasion.

Commissioner ANDERSON. I must beg you to answer the question. The books do not show, because the vouchers have been destroyed.

Mr. COHEN. I would like to have an understanding about that. What evidence is there that any of the vouchers of the Central Pacific have been destroyed?

Commissioner ANDERSON. If you prefer it, I will put the question in another form.

Q. Assuming, for the purpose of showing you the necessity for answering differently, that vouchers have been lost or destroyed, I beg you not to refer to the vouchers as the evidence, but simply answer my question. On how many occasions have you received the money for the account of the Central Pacific?—A. I could not answer that question.

Q. Has it not been a common occurrence?—A. Not very.

Q. Has it not occurred on an average once a month during many years?—A. No, I should think not; not nearly so often.

DOES NOT REMEMBER NUMBER OR SIZE OF PAYMENTS.

Q. Are there not many months when you have received four, five, or six payments?—A. Possibly; I can come no nearer telling you than if you should ask me the question how many times I have visited Sacramento during the last sixteen years.

Q. In answer to the question, you might say quite frequently, might you not?—A. Not very frequently.

Q. In regard to these payments, do you recall anything relating to the amount of these payments?—A. No, sir.

Q. Do you not recall the amounts—that they were more than five or ten dollars?—A. Probably if you would show me a voucher—what I call a voucher—where I have receipted to the company for money, so far as that specific voucher is concerned I might be able to give you some idea as to how many payments were contained in that voucher; possibly I could do so, but I do not know.

AS MUCH AS $5,000 RECEIVED AT A SINGLE PAYMENT.

Q. I simply ask you to give us the best of your recollection as to the limits of the amounts which you received at given times?—A. I have no recollection at all.

Q. Did you ever receive so much as $100,000 in a single payment?—A. No, sir; not that I remember.

Q. Did you ever receive so much as $50,000?—A. I should think not.

Q. Did you ever receive so much as $5,000 in a single payment?—A. I should think so.

Q. Did I understand you to say that your presence at the Nevada legislature included the years from 1871 to 1879?—A. That I gave you in my testimony mostly yesterday; yes, sir.

Q. And that before that period of 1871 you alternated in attending the sessions in California and Nevada?—A. Before that period of 1871 I had nothing to do with the Central Pacific Railroad Company.

ATTENDED SESSIONS OF CALIFORNIA LEGISLATURE BETWEEN 1871 AND 1879.

Q. When was it that you attended the legislatures in the State of California—during what years?—A. Alternating between 1871 and the adoption of the new constitution in the State of California.

Q. When was this?—A. In 1879, I think; then we had a legislature one winter in California and the next winter in Nevada, and during that time I think that I was more or less at the sessions of the California legislature, while in session, and always during the entire session in Nevada on the alternate year.

Q. And since 1879, do I understand that you have attended no session of the legislature in either State?—A. In which State?

Q. In either California or Nevada.—A. I have not attended sessions in this State; I have attended sessions in Nevada.

ATTENDED SESSIONS OF NEVADA LEGISLATURE SINCE 1879.

Q. Since 1879?—A. Yes, sir; in Nevada.

Q. Since 1879, did you attend continuously in Nevada?—A. No, sir; I would hardly say that.

Q. How many times?—A. For instance, at the last session of the legislature in Nevada I went over, according to usual custom. I was an old resident of Nevada, and had seen every legislature organized that ever convened in the State, and some of the Territorial legislatures. Therefore, I went over at the last session of the legislature. I think that I remained there but two days and did not again visit the last session in Nevada while it was in session.

Q. Since 1879 have you always attended the sessions in Nevada?—A. Yes, sir.

Q. So that your entire career in attending a legislature somewhere extends from 1871 to date; does it?—A. From 1871 to date.

MEMBER OF CALIFORNIA LEGISLATURE AND CITY MARSHAL AT PLACERVILLE.

Q. Have you ever been a member of the legislature, either in Nevada or California?—A. Yes, sir. I was a member of the California legislature when a youth.

Q. In what year?—A. I was elected in 1855. I was the youngest member of the Sixth Legislature of California.

Q. Have you held any other public office either in California or Nevada?—A. Yes, sir; in both States.

Q. In what years?—A. I was elected to the legislature in 1855. In 1857, I think, I was elected city marshal of Placerville, a very lively town in those days, a mining town in El Dorado County.

IN EMPLOY OF CENTRAL PACIFIC SINCE 1871.

Q. Have you held any public office in either of these States since 1871?—A. No, sir; not since 1871. Since that time I have been constantly in the employ of the Central Pacific and Southern Pacific Companies. I have been so employed since July 1, 1871.

Q. Are you able to refer the Commission to any other papers on the files of the Central Pacific office, signed by you, which can be found, other than those which were shown to you yesterday and introduced in evidence, and which I again show you now, being vouchers number 1625, for $3,000; number 568, for $800; number 513, for $800; number 579, for $700; and number 2,571½, containing the initials S. T. G., for $2,500 and interest?—A. No, sir.

Q. Do you say that those are the only vouchers you know of on the files of the company?—A. No, sir. I presume there are others.

Commissioner ANDERSON. We call for them.

The WITNESS. The company will produce them if it has them.

Commissioner ANDERSON. Please take note of the call for all vouchers relating to the expense account signed "S. T. G."

KNEW A. C. CLEVELAND, OF NEVADA.

Q. Do you know Mr. Cleveland, of Nevada?—A. A. C. Cleveland; yes, sir.

Q. Where does he live?—A. He lives in White Pine County, Nevada. He is interested in a large stock ranch.

Q. Was he present with you at many of the sessions of the Nevada legislature?—A. He was present at many of the sessions of the Nevada legislature.

Q. Were you in the habit of conferring with him with reference to measures pending in that legislature?—A. I presume so.

NEVER PAID HIM ANY MONEY.

Q. Did you ever give him any money?—A. I never did.

Q. Have you ever made any payment of any money to A. C. Cleveland?—A. I have no recollection of ever having had any dealings with A. C. Cleveland, or paying him a dollar of money in my life.

Q. Have you ever spoken to him with reference to the use of any money with members of the Nevada legislature?—A. It is possible. He was representing there a number of sessions in Nevada the interests of the local railroads in Nevada, and I was there in the same capacity representing, if you please, the interests of the Central Pacific, and it would be very natural under such circumstances for me to have conferred with Mr. Cleveland very frequently upon bills that mutually affected us, if there were such, and sometimes there were bills affecting the local roads and our transcontinental roads.

Commissioner ANDERSON. The reporter will please read the question that I put to the witness, so that he may see exactly what he is answering.

(Question repeated.)

A. I thought that I had answered that question in a previous inquiry as to whether I had ever paid Cleveland any money.

Mr. COHEN. The question goes a little further than that.

Commissioner ANDERSON. Read the question again, if the witness does not understand it, and I would like the record to show that it was put to him three times.

(Question read.)

NO MONEY PAID TO MEMBERS DURING ENTIRE ATTENDANCE.

Q. I take your answer, then, to mean that in your conversations with Mr. Cleveland you did confer with him in relation to measures that you have referred to, and that that conversation also embraced the question of the use of money with reference to such legislation. Is this correct?—A. Of course I am bearing in mind the answers which I made to your inquiries yesterday. I thought that I established the fact that for the first eight years that I was with the company, representing its interests there, no considerable amount of money was used on behalf of the company, and that in the use of that, which I explained at the time, no member of the legislature received a dollar thereof; and I stated yesterday that I never had paid, or caused to be paid, a dollar to any man in the legislature of Nevada for the sixteen years during which I represented the company there, for any vote which he gave on matters pending in which we were interested.

DISCUSSIONS WITH REGARD TO USE OF MONEY.

Q. I beg you to answer the question without reference to anything that occurred yesterday. In your conversation with Mr. Cleveland was the subject of the use of money discussed?—A. The subject of the use of money was a matter of general discussion. At that time the newspapers were constantly asserting—that is, the anti-railroad newspapers, so termed—that Cleveland, if you please, on behalf of the local road, and that Gage on behalf of the Central Pacific roads, were there with their sacks to corrupt the legislature. I have no doubt but what I talked with Cleveland upon that subject, and frequently, as I did with the men who were members of the legislature and with men who were representing the press at that place. It was a subject of general dis-

cussion every day and evening. The papers of that character would come out in that shape, and I have no doubt that it was a subject of talk and discussion frequently between Cleveland and myself, for it would be a general topic after an onslaught of that sort.

Q. Mr. Cleveland was familiarly known as Gage's chief agent, was he not?—A. No, sir.

Q. He was not?—A. Not that I ever heard of. He represented the local railroads in Nevada.

Q. Have you never heard that expression applied to Mr. Cleveland?—A. Not until now.

IMPUTATIONS ON WITNESS.

Q. Have you heard that Gage was known as the "King of the lobby"?—A. I have already stated to you, and I would like to produce to you the files of the newspapers in order to show the existence of the misapprehensions that existed among the good people of Nevada, as indicated by their press, concerning my relations with the legislature of Nevada session after session for the sixteen years. I remarked yesterday that it was one of the greatest sources of regret that I had, the imputations which were cast on my character, and which I feel I have not deserved, and which I feel I may not live long enough to outgrow. One of them is that I have spent money in the Nevada legislature for the Central Pacific like water; and those things were constantly asserted, and I believe frequently believed by a good many good people in the State, but they were not true. As I asserted to you yesterday, I have kept an accurate account of the expenses for the first eight years that I was attending the sessions of the Nevada legislature, which included my personal expenses during that time, and they figure up $2,000, or a fraction under it, as it was. Now, if any one thinks that $2,000, or less, could corrupt a legislature for eight years, including the personal expenses of myself, he must invoice members of the Nevada legislature at a very low price, and "buy them by the string." [Laughter.]

"PERFECTLY OBLIVIOUS TO WHAT WAS SAID."

Commissioner ANDERSON. Mr. Gage, I think you misunderstand me. I do not intend to assert that you were the king of the lobby. I only ask the question whether some familiar title of that kind was not sometimes given you when you attended the sessions of the Nevada legislature.

The WITNESS. I told you that I had become perfectly oblivious to what was said, knowing the absolute honesty of the course that I was pursuing.

Q. As a matter of fact, you did continue your visits to the sessions of the legislature from year to year?—A. As a matter of fact I did, and would do so again if I thought that my duties to the company required it. I could get along with the boys over there first rate.

MR. TWIST, OF NEVADA.

Q. Do you know Mr. Twist, of Nevada?—A. Yes, sir.

Q. Did you also confer with him about measures pending before the legislature?—A. He was a member of the legislature as long ago as 1868.

By Mr. COHEN:

Q. Will you give his full name?—A. I cannot spell so well as I can pronounce.

Mr. COHEN. I mean his Christian name.

Commissioner LITTLER. It is Oliver, I guess.

Commissioner ANDERSON. Oliver always wanted more, you remember.

The WITNESS. No; it was not Oliver Twist. You asked me a question yesterday as to what my duties were with the company. I am neglecting them this morning, and I neglected them yesterday. I was thinking about it last night, and I woke up this morning still thinking about it, and I know that I ought to have been at the office at 9 o'clock this morning.

Q. Who was Mr. Twist?—A. I think that Mr. Twist was a member of the legislature in 1868 from one of the eastern counties of the State. He was again a member of the last legislature. I believe that he was only a member, according to my best recollection, at those two sessions—that is, the winter of 1868-'69 and the last session of the legislature.

KNEW ALL THE MEMBERS OF NEVADA LEGISLATURE.

Q. Did you discuss legislative measures affecting the Central Pacific with Mr. Twist?—A. Frequently, I reckon, as with every other member of the legislature that I could get to, and I could get to all of them.

Q. Name those with whom you frequently conferred.—A. I will say that in the legislature of Nevada for sixteen years there was not a member, except at the last session, with whom I did not get acquainted. At this last session I was there but two days, and I did not try to meet all of them. The population of the State had changed a little, and some of the members were strangers to me; but excepting the last session, I was acquainted with every member of the legislature, we will say, for fourteen sessions—that would be fourteen years.

TALKED MORE WITH THOSE IN FAVOR OF HOSTILE LEGISLATION.

Q. Did you talk more with those who were in favor of hostile legislation or those opposed to hostile legislation?—A. I talked more with those in favor of hostile legislation.

Q. And the object of your conversation with them was to convert them to a healthier view?—A. Certainly. I had no other object.

Q. And did you use the best arguments available to you to produce that result?—A. Yes, sir; always. It put me right up to my speed.

Q. In any of these interviews did you refer the persons with whom you were talking to any other officer of the Central Pacific for any purpose whatever?—A. I never did.

Q. Do you know whether any of the persons with whom you conferred subsequently had interviews with Governor Stanford?—A. I do not think they did. I never heard of such a thing.

AN "ORIGINAL PIUTE."

Q. Do you know whether they had interviews with any other officers of the Central Pacific charged with its business interests?—A. I do not; but I think that they never did. I am the only officer connected with the Central Pacific who can give you the number of counties in Nevada and tell you the county seats. Our people have left those matters solely to me. I was an "original Piute." An "original Piute" is a man who went there in early days. It is a misnomer, probably, but is applied to those who went there in 1859, very much like we call our old pioneers here, those who arrived in 1849 or the spring of 1850.

OTHER RAILROAD OFFICERS AT CARSON CITY.

Q. What other officer of the company did you see at Carson City during your stays there?—A. According to my best recollection, I do not think that there was any officer of the company there with the exception of an occasional call upon request from me by some freight department officers, whom I would ask to go over there and explain matters before a committee, which I did not perhaps consider myself capable to satisfactorily explain.

Q. Name the officers who went there.—A. I think it was Mr. Stubbs. I sent for him once to come over there on some freight matters, there being a freight and fare bill pending. I sent for Mr. Stubbs to come over, and he did come over and went before the committee upon one occasion—and I am not certain but what he did on two occasions.

Q. Was there any one else?—A. I do not remember that any other officer of the company came over there; and I do not think that I ever sent for any other member of the company.

REGULAR ATTORNEYS THERE ATTENDING SUPREME COURT.

Q. Did any of the other attorneys of the company appear in the State of Nevada, while you were at Carson City, to your knowledge?—A. I do not remember. I am trying to recall whether any came or not. It seems to me that I had an attorney of our company come over from here to make an argument before a committee, but I am not certain about that. Sometimes the regular attorneys of the company would be in Carson City during the session of the legislature attending the supreme court, which held its session there.

Q. Name the attorneys who were there.—A. I think that at one time I met Judge McFarland, now a judge of the supreme bench of California, who was acting in the capacity of attorney for the railroad company.

Q. Who else?—A. I do not really remember that there were any of the California attorneys over there during the session of the legislature, except Judge McFarland, who had a case pending, and I think that perhaps he was there more than once—once or twice—arguing cases in the supreme court.

KEEPS NO BANK ACCOUNT.

Q. Do you keep a bank account?—A. No, sir. Personally, do you mean?

Commissioner ANDERSON. Yes.

The WITNESS. No, sir.

Q. Have you ever kept one?—A. I never have. I think it is a useless waste of a man's life, keeping a personal account, or a bank account, or a book account.

Q. Do you keep any books?—A. No, sir.

Q. Do you keep any memorandum of moneys received by you?—A. No, sir; no memorandum of moneys received.

Q. Do you keep any memorandum of moneys paid out by you?—A. No, sir; I do not. As you are talking of my personal matters, I would like to say that I keep no accounts whatever of what I pay out. I do not know anything about what I pay out in the course of a year on personal accounts. I keep no account whatever.

Q. Do you keep any trust bank account?—A. No.

Q. Do you keep any books showing the disposition of moneys belonging to other people?—A. No, sir; or for myself either.

CONSIDERS WRITTEN RECORDS A WASTE OF TIME.

Q. Do you keep a written record of your transactions?—A. None at all. I think it is a waste of valuable time.

Commissioner ANDERSON. I have not asked you whether you thought it a waste of time.

The WITNESS. You talk of my personal way of doing business, and I want to give an excuse for my manner of doing business. I repeat that I think keeping books and writings is a useless waste of time.

Q. You think it needs an excuse then, do you?—A. No; but I was going to give it to you. I think it a waste of time for a busy man to keep a forced balance between himself and the world. There are no books kept by us in our every-day life which do not require the balance to be forced. What money I get I get honestly. I spend it economically, and when it is gone I want to forget it.

WITNESS'S RIGHT TO DEFEND HIS PERSONAL CHARACTER.

Commissioner ANDERSON. I insist upon answers to my questions.

Mr. COHEN. I understand that where the character of a witness is attacked, he should have the right to answer.

Commissioner ANDERSON. He can make his explanations afterwards.

Mr. COHEN. He has a right to make them at the time. It is his right in answer to your questions. Where his character is attacked, as it is being attacked here to-day, he has a right, in answer to every question asked him, to defend his personal character. It is the right of every citizen of the United States at all times and in all places.

Commissioner ANDERSON. Excuse me. I am not going to have explanations made in that way. He has a right to defend his character as much as he pleases, but he must wait until afterwards.

Mr. COHEN. If he chooses to make full answers and full explanations, he has a perfect right to do so.

Commissioner ANDERSON. I desire an answer to my question. After we get through, you shall have abundant opportunity to make all the explanations you please.

Mr. COHEN. He will consult his own convenience as to that.

Commissioner ANDERSON. You can take your position as counsel, but I decline to be directed in this manner.

MONEY NOT RECEIVED UNTIL IT WAS TO BE DISPOSED OF.

Q. What disposition have you made of the moneys received by you from the Central Pacific Railroad Company, which are referred to in the vouchers that have been shown to you?—A. Why, Mr. Anderson, I told you yesterday that I had not the slightest idea on earth what disposition I made of them. I repeat it to-day.

Q. I did not ask you for the ultimate disposition. I asked as to the custody of the money. Did you have it in your vest pocket?—A. No, sir; if I had, the demand would not have been approved by any officer of the company.

Q. You say you did not keep a bank account?—A. No, sir.

Q. Did you carry the money around with you?—A. No, sir.

Q. It must have been with you at one period, must it not?—A. Not necessarily.

Q. What disposition did you make of it at any such time that you had it in your possession?—A. When I say to you that I do not have

any idea what that money was received by me for, or for what purpose it was put out, and then you want me to recollect all the facts relative to the disposition of it, and all the items and all that sort of thing, possibly a gentleman from New York may answer, but one from the Pacific coast would be unable to answer correctly.

Q. The question is not addressed to the disposition made of the money, but as to your practice as to the money, the manner in which you took care of the money; can you recall it? If you should receive to-day the sum of $5,000 from the Central Pacific, and you were not to dispose of it for four or five days, where would you carry it?—A. I would not carry it at all. I would not receive it until I was going to dispose of it.

Q. Suppose you received it at the office of the company, and you were not to dispose of it for two days, can you not tell me what your habits of disposing of it would be? Would you keep it in a safe, or in a chest, or in the bank?—A. Neither.

Q. Where would you keep it?—A. I would not keep it at all. I would simply pay it out for specific purposes.

HOW IT WAS PAID OUT.

Q. In order to pay it out, must you not have it under your control, or in your hand?—A. Hardly; hardly for any length of time. Suppose I had, to-day, $5,000 and I wanted to pay it out on behalf of the Central Pacific. I would go and get a voucher for the $5,000. Then I would go and get it allowed by the company. When it was in that shape, I could go to the treasurer and draw the money. In order to do that, I would have to have an approved voucher. You ask me where I carried the money. I should not carry it at all.

Q. Would you not carry it from the treasurer to the place you were going to pay it?—A. I might not.

Q. How would you pay the money?—A. The man to whom I was to pay it might be in the building, or he might be in the treasurer's office, and I might hand it over the counter to him then and there, and that would be the end of it.

WHAT VOUCHER NO. 1625 REPRESENTED.

Q. In regard to these vouchers that have been shown you—I will first take the three-thousand dollar voucher, No. 1625. Would that represent a single item of disbursement by you, or a number of them?—A. It might have represented a number of them.

Q. Is it your best impression that it did represent a number?—A. My impression is that the probabilities are that it did represent a number. I have no recollection of that voucher.

Q. Do you believe that it represented a number of payments, all made to the same person, or to different persons?—A. Probably to different persons.

Q. Is it your best impression that those payments were all made at one place, or different places?—A. I have no impression about it.

Q. Do you believe that all that money was paid out by you to these persons at the office of the company, corner of Fourth and Townsend streets, this city?—A. If not there, I do not know where it could have been.

Q. Can you mention the name of a single person to whom you have made payments for account of Central Pacific, at the corner of Fourth and Townsend streets?—A. I do not know that I can on this voucher.

Q. I ask you again, where did you keep the money which aggregated $3,000 during the period that you were engaged in making the payments which are represented by the voucher in your hand?

The WITNESS. Where did I keep it?

HOW VOUCHERS WERE MADE UP.

By Commissioner ANDERSON:

Q. Where did you keep it? Either on your person, or in a box, or in the bank?—A. In neither. I see what you are after now.

Commissioner ANDERSON. I am glad to hear it.

The WITNESS. It is just beginning to dawn upon me. Where did I keep it? Here is a voucher for $3,000 which seems to have been drawn at one time. If this represents a half a dozen or a dozen different payments, I, more than likely—for I did that sort of thing sometimes—would go to the treasurer of the company and put in my tag temporarily. I do not know that he had any right to take my tag, and I do not know but what he had been instructed by the company what to do; but he would take my tag at times until I could get to a voucher; that is, small items, small amounts that were paid, and my tag would be the treasurer's personal receipt from me for the money. When it got up to a sum sufficient I would, in order not to incumber the business of the company, put it in the shape of a voucher and take up my tags. For instance, like this, this probably might have been one of those, and I would go and get a voucher allowed by the company covering the entire amount of several items.

WHAT THE "TAGS" REPRESENTED.

Q. You have told us where the books would be, and where the vouchers would be. What I want to know now is where the money would be?—A. That is what I do not know.

Q. Then these tags would represent the account of the transaction, if they could be found?—A. The vouchers would.

Q. The tags would represent the individual amounts drawn by you, would they not?—A. The tags have nothing to do about it. Those would be only temporary during the pendency of the small voucher like that.

Q. Would they not represent the individual amounts of money paid to you at the time you gave the tags?—A. A voucher like that——

Q. Not the voucher here, but the tags that you have referred to. Would they not make this showing?—A. For instance, it is like this: If I had tags in there with the treasurer amounting to $3,000, he would naturally be punching me up a little about it, because it is not a systematic way of doing things, and it is not done very much. He would say: "Gage, I want a voucher for that," and then I would go and see the amount of my tags there and get a voucher to cover them. As I hold this voucher right before me, I may assume that it is made up of a dozen, fifteen, or twenty items, more or less, which would be represented by these small tags which I had with him. I would see what they all amounted to, and go and get an approved voucher and put it in there with the treasurer. That is the way you get hold of these things. Those are the treasurer's vouchers to the company.

Q. Please answer my question. Would not the individual tags represent the amount of the separate payments made to you on account of the Central Pacific Railroad Company? Would not each tag represent a payment?—A. Yes, sir; they would represent the amounts.

Q. And if you had all the tags together so as to aggregate them, that would in effect be an account of the amount covered by the voucher, would it not?

Mr. COHEN. That and the last payment?

The WITNESS. Yes, sir.

TO WHOM GIVEN.

Q. To what officer did you give these tags?—A. To the treasurer.

Q. What is his name? What is the name of the person to whom you have been in the habit of giving these tags?—A. I think that Mr. Hopkins is treasurer of the company.

Q. What is his name?—A. Timothy Hopkins.

Q. How long has he been there?—A. Four or five years, I should think.

Q. Can you name any officer of the company who was in the employ of the company, at the date of the voucher for $3,000, September 4, 1878, to whom you were in the habit of giving tags?—A. I was trying to ascertain the date of the death of Mr. Mark Hopkins, who was treasurer of the company about that time.

Commissioner ANDERSON. He died in 1878.

The WITNESS. It was 1878, I think; and then I think that the successor to Mark Hopkins, as treasurer, was E. W. Hopkins.

Q. Were you in the habit of giving tags to E. W. Hopkins?—A. I do not remember that I was.

Q. Were you in the habit of giving tags to Mark Hopkins?—A. Not very much, if at all; I do not remember to have been.

Q. Can you name any person at the period covered by this voucher to whom you were in the habit of giving tags?—A. I really cannot tell you who was the treasurer at the time of that voucher, the 4th of September, 1878.

Q. Is that the only answer that you can give with regard to this practice of giving tags, to which you have referred?—A. So far as it relates to this voucher; yes, sir.

OTHER VOUCHERS.

Q. As to any other vouchers given at or about that time what can you say?—A. I do not know that there were any others at or about that time.

Q. I have shown you three others this morning. Will you please look at them and state what happened in regard to them; they are dated March, 1879?—A. That is not at or about September 4, 1878.

Commissioner ANDERSON. We are not quibbling about that.

The WITNESS. You desire to be accurate, I suppose.

Commissioner ANDERSON. It is a difference of only six months; it is within six months of it.—A. These vouchers seem to be in 1879—April and March, 1879. According to best recollection and belief, I would think that E. W. Hopkins was the treasurer of the company at that time.

Q. Do you think that whatever dealings you had with regard to those vouchers were with E. W. Hopkins?—A. If he was the treasurer of the company, and I think that he was in 1879.

Q. When you attended before the legislature of California, what other officers of the Central Pacific were present in attendance before that legislature?—A. All the officers. Our officers were all in Sacramento at that time that I began my work there.

RAILROAD OFFICIALS IN ATTENDANCE ON CALIFORNIA LEGISLATURE.

Q. What officers were prominent in interviewing or conversing with members of the legislature besides yourself?—A. I do not think that we had any officers of any influence but what were as prominent as they could be.

Q. Was hostile legislation as prevalent in Sacramento as it was in Carson City?—A. I should think very much more so at some sessions.

Q. What attorneys of this company were engaged in the work of attending the legislature?

The WITNESS. Of California?

Commissioner ANDERSON. Yes. I mean arguing before committees, talking to members, and seeking to prevent the enactment of hostile bills.—A. I really do not know; I presume that all of our attorneys were more or less at times engaged in that business of arguing before committees.

Q. Name those who were chiefly engaged.—A. When I went into the employ of the company and went to Sacramento in 1871 to attend the session of the legislature, our chief attorney was S. W. Sanderson, now dead. Another was Robert Robinson, now retired; and they constituted about our only attorneys at that time. Afterwards, as the business increased, our attorneys increased. We had various attorneys until we got a large number of attorneys now in the employ of the company.

Q. My question does not call for the attorneys, all of them in the employ of the company, but for those engaged in this legislative work at Sacramento.—A. We had to avail ourselves of all the available material for combating the hostile legislation that was introduced there from time to time. You open up a subject that has been one of the most prolific subjects of discussion that ever inflicted a State, or afflicted it—that of hostile legislation towards the Central Pacific Railroad.

EVERYBODY EMPLOYED WHO "COULD PULL A POUND."

Q. I have only asked you for the names of the attorneys; I have not asked for the details of the discussion and do not want them.—A. It was without a parallel in the history of the nation; and when you ask me to name the attorneys we had, I answer that we had to employ everybody who could pull a pound, morally.

Q. Can you not give me the names of some of the generals and colonels in that army of lawyers?—A. We did not want generals or colonels. All that we wanted was good square work, to labor with the legislature.

Q. Can you not give me any of the names?—A. Plenty of them, who have been there for the company, according to our needs, from time to time.

Commissioner ANDERSON. Please give me some names.

The WITNESS. I think that when I first went there, in 1871——

Commissioner ANDERSON. I do not confine you to any year.

WILLIAM B. CARR AND W. W. STOW.

The WITNESS. There were a good many of them. In 1871 I think that Mr. William B. Carr was looking after our interests there as well as he could, but not much after the session of 1871; I do not remember exactly. Then later, along in 1873 or 1874, Mr. W. W. Stow was generally in attendance during sessions of the legislature, and he had other

assistants, all the assistants that he could bring to bear to help him, and it required them all. I was there myself, feeble as I was, trying to convince the honest yeomanry from the country that they were dead wrong—dead wrong, off altogether. You see, they had partaken a good deal of the anti-railroad legislation from the other side. It was only after we got a railroad that we had this trouble. If we had never built a railroad across the plains I do not believe that our people would have caught the disease over here. It was like a hydrophobia; you fellows on the other side got it, and then it spread. It seemed to follow the iron right over.

Commissioner ANDERSON. Please continue with the names.

The WITNESS. Our attorneys would be there sometimes when arguing before committees.

Commissioner ANDERSON. I have only asked you to give us the names of the attorneys that you have had there.

The WITNESS. I was just going to do that.

Commissioner ANDERSON. I do not want to know anything about what they did.

NAMES OF RAILROAD ATTORNEYS ENGAGED IN LEGISLATIVE WORK.

The WITNESS. There were Judge Sanderson and Judge Robinson, and latterly I have not been around the legislature, and do not know anything about it; but our attorneys since the death of Judge Sanderson have been Colonel Creed Haymond, and Judge McKisick and Judge Harvey S. Brown, and Mr. Foulds. I can hardly pronounce Mr. Foulds' name, and I know I cannot spell it. I have seen him around there for the last fifteen years, but cannot pronounce his name. Then we have at times various other attorneys. I will name Mr. Cohen, here now, and Mr. Bergin, who has been here. Then we employ the firm of Wilson & Wilson, and I have known General Barnes as an attorney for the company. Then there are Garber, Thornton & Bishop, as attorneys for the company, whom I recognize. I have also known Mr. Wigginton to have cases, but whether as a regular employed attorney or not I do not know.

Commissioner ANDERSON. Remember that my question refers to the attorneys before the legislature at Sacramento City, the attorneys of this company who have been in the habit of so appearing.

The WITNESS. I do not know but what they all have appeared there. I presume that each one of them would, if asked to do so, have appeared for the company.

EXTENT OF PROPOSED HOSTILE LEGISLATION.

Q. Have you named all those who, as a matter of fact, have been present at Sacramento in attendance upon the legislature?—A. I have not begun. I tell you that we pulled everybody that we could, and there was necessity for all the strength that we could get to avert hostile legislation. I doubt whether you gentlemen would have been here at all to investigate the Central Pacific if the legislation which was pending there from time to time had become law. The Central Pacific would have been bankrupted the first year under the operation of any of those bills, and it would have saved you gentlemen the trouble of coming over here to make this investigation. You have no idea of the hostility which once existed here in this State against this same institution which we like so well, we who are connected with the old Central Pacific.

A SUPPOSITITIOUS CASE.

Q. According to your views, if, while you were in attendance in Sacramento, it was reported to you that a certain member of the legislature was pushing a hostile bill that you thought totally unfair, and it was represented to you that a friend of that member would change his views, or get him to vote right, but that he would need, or have to use, without stating the purpose, five hundred or a thousand dollars for that object, and that money was given to the friend of the legislator for that purpose, would you consider that an act of corruption?—A. I will leave that to you to construe. I never was placed in that position.

Commissioner ANDERSON. I ask you so that I may understand your answers. If you prefer not to answer, I will excuse you.

The WITNESS. I had an entirely different way of meeting members of that sort, a little peculiar.

Q. Would you consider such an act as I describe an act of corruption?

The WITNESS. Do you mean the purchasing of a member?

Commissioner ANDERSON. No. The reporter will please read the question as I put it. [Question read.] If you do not desire to answer the question, say so.

The WITNESS. Read the question again. I do not want to answer the last half of a question. That which you have read appears to be the last end of the question.

(Question repeated.)—A. I should. It would be the purchase of a vote.

WITNESS'S METHOD OF PROCEEDING.

Q. So that, according to your view, the giving of the money to the friend is just as reprehensible as giving it to the member of the legislature?—A. I should think it was giving it to the member of the legislature, the way you put it, whether it was taken through me myself for your friend or through a friend of mine; but I had an entirely different way of putting in my time, whether it counted for much to the company or not, in and about legislatures. I tried to explain that to you yesterday, so far as Nevada is concerned, and the same tactics that I employed in Nevada with such great success, as I think, I demonstrated to you gentlemen, I hope, I applied in California whenever I was about the legislature.

WITH WHOM WITNESS CONFERRED.

Q. Please tell us with what gentlemen you more especially conferred in the sessions of 1871, 1872, and 1873?

Mr. COHEN. Can you not be a little more definite?

Commissioner ANDERSON. I will confine my question then to 1871.

Mr. COHEN. Do you speak of gentlemen connected with the company or members of the legislature?

Commissioner ANDERSON. I mean the gentlemen connected with the Central Pacific with whom you conferred about pending hostile legislation in 1871 and 1872?

The WITNESS. In 1871 and 1872 I presume that the directors of the company were the ones with whom I conferred more particularly than with anybody else at that time.

Commissioner ANDERSON. I mean the persons engaged in the same work that you were—of attending before the legislature.

The WITNESS. I do not remember who had the general charge at that time; that is to say, to whom I looked. I am inclined to think that it was Mr. Carr, as I have said. I think that he was in Sacramento in 1871 and 1872.

Q. When Mr. Carr was there, did you confer with him?—A. I presume I did. I presume that I compared notes with him.

NO ALLUSIONS MADE TO MONEY.

Q. In those conferences, was any allusion whatever made to the use of money?—A. Not that I remember at all. The offices of the company at that time were in Sacramento, and hence the officers, Governor Stanford and the entire list of officers, were at Sacramento, and I conferred with them. I was green in the business in 1871 and 1872 and in the affairs of the company and in legislation of this character. It was new to me, and I conferred with Governor Stanford and Uncle Mark Hopkins frequently upon bills that were pending that session.

Q. In conferring with Mr. Hopkins, was the necessity for the use of money in order to bring about the desired result—I do not confine myself to the use of money in the shape of bribery, but to the use of money—a subject of discussion?—A. I have no recollection of ever discussing it. I may have done so, but I have no recollection of it. I was not on the money lay, and never believed in that way of meeting a legislature.

Q. Do I understand that the fact of the defense of the company against hostile legislation would cost a great deal of money was never the subject of discussion?—A. I have no recollection of its ever having been. That it did cost in one way and another an immense amount of money, for time is money, I have no doubt.

"EXPENSE" AND "LEGAL EXPENSE" ACCOUNTS.

Q. Have you any doubt but what it did actually cost an immense amount of money, without reference to the question of time?—A. It may have done so.

Q. Have you any doubt on the subject?—A. Yes; I have doubts.

Q. Have you doubts that it cost any money?—A. That it cost an immense amount of money, I have doubts, from my experience in Nevada.

Q. Have you knowledge of the fact that there stands on the records of this company over $2,000,000 of unexplained vouchers charged to the expense and to the legal expense accounts?—A. I have heard it stated.

Q. Have you heard it stated by officers of the company so that you are satisfied that it is a fact?—A. No, sir; I have not heard it stated by officers of the company. I have heard it stated by this Commission since it reached here.

UNEXPLAINED VOUCHERS.

Q. Have you not seen many of the vouchers, and heard them enumerated around this table?—A. I came here one day, and Governor Pattison was reading from what I afterwards learned was the New York World, a long list of vouchers of that character which I had never seen. I heard Governor Pattison reading a portion of them, and I do not know but what that was the most information that I ever had upon this subject. I never saw that publication, I have not seen it yet, except in the governor's hands here at that time, and I then understood that it was a supplement or something from the New York World.

DECLINES TO ANSWER UNDER ADVICE OF COUNSEL.

Q. Have you on any occasion since 1871 paid any money to a member of the legislature, either of California or Nevada?

Mr. COHEN. We have objected to that class of questions heretofore, and while I am perfectly satisfied that the witness has never made any such payments, yet to be consistent, as my associate is not here, I will advise the witness not to answer that question.

Q. Do you decline to answer?

The WITNESS. Under the advice of counsel, I decline to answer. I shall be directed by his advice.

CONCERNING PROMISES OF REWARD, ETC.

Q. Have you ever made any promise of advantage or reward of any kind, nature, or description to any member of the legislature of the State of California, or of the State of Nevada?

Mr. COHEN. We make the same objection.

Q. Do you also decline to answer, Mr. Gage?

Mr. COHEN. Although I am advised that the witness will answer all these questions in the negative, yet to be consistent I shall make the same objection to that question as was made to like questions put to the other witnesses, and advise him not to answer.

CONCERNING OTHER OFFICERS OF THE COMPANY.

Q. Do you know of any money having been paid by any other officer of the Central Pacific to any member of the legislature of the State of California or of the State of Nevada?

Mr. COHEN. We make the same objection.

Q. Do I understand you to decline, under the advice of Mr. Cohen, to answer the second question?

The WITNESS. Yes, sir. I shall decline under the advice of counsel. I am guided always by my attorney.

Q. Do you decline to answer the last question under the same advice?—A. I shall be guided by my attorney always.

CONCERNING PERSONS NOT MEMBERS OF THE LEGISLATURE.

Q. Have you yourself ever paid any money to any person not being a member of the legislature for the purpose of having the same used in influencing the vote of any member of the legislature of the State of California, or of the State of Nevada?

Mr. COHEN. The same objection.

Q. Do you also decline to answer?—A. Yes, sir; for the same reasons.

Q. Have you ever directly or indirectly made promise of compensation or reward, such promise being given to a person who was not a member of the legislature, but intended to affect in any way the vote of a member of the legislature, either of the State of California or of the State of Nevada?

Mr. COHEN. The same objection.

A. If left entirely to myself, I would like to answer all these questions; but I shall have to be guided by the attorney of the company.

Mr. COHEN. We make the same objection.

AS TO INFLUENCING ELECTIONS OF CALIFORNIA AND NEVADA LEGISLATURES.

Q. Have you ever paid out any money of the Central Pacific Railroad Company for the purpose of influencing the election of a member of the legislature of the State of California?

Mr. COHEN. The same objection.

Q. And do you decline to answer?—A. Yes; for the same reason as before given.

Q. I ask the same question as to the State of Nevada.

Mr. COHEN. The same objection.

A. The same answer for the reason already given.

Q. Have you ever paid out any of the moneys of the Central Pacific Railroad Company for the purpose of affecting the election of a member of Congress?

Mr. COHEN. We make the same objection.

A. The same answer and for the same reason.

Commissioner ANDERSON. I lay before the Commission a statement which has been prepared, showing the cost to the Pacific Improvement Company of the construction of the California and Oregon Division of the Central Pacific Railroad from Delta to the State line, which I will hand to Mr. Douty for the purpose of verification.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Friday, August 12, 1887.

JOHN C. STUBBS, being duly sworn and examined, testified as follows:

By the CHAIRMAN:

Question. What is your occupation?—Answer. I am general traffic manager of the Southern Pacific Company.

POSITIONS OCCUPIED BY WITNESS.

Q. How long have you been connected with the Southern Pacific Company in that position?—A. I think about three or four years as general traffic manager. I do not remember the exact date of my appointment.

Q. What position did you hold prior to that time?—A. Just previous to that time I was freight traffic manager previous to that I was general freight agent.

Q. Will you give us the year as you go along?—A. I cannot do it.

Q. At what period were you freight manager?—A. I took service with the Central Pacific Railroad Company as chief clerk in the general freight agent's office on October 1, 1870. In the latter part of 1871 I was appointed assistant general freight agent. About two years later I was made general freight agent. About 1882, I think, I was made freight traffic manager, which was merely a change of title, and I think that in the fall of 1884 I was appointed general traffic manager.

Q. Of the Southern Pacific Company?—A. At that time it was the Central Pacific; and after the Southern Pacific came into the control I continued in the same relation to that company.

GENERAL SUPERVISION OF TRAFFIC ON CONSOLIDATED ROADS.

Q. Under the consolidation have you charge, as an officer of the Southern Pacific Company, of all the business that comes under the control of the general manager of the Central Pacific?—A. The business of the Central Pacific, that is, the traffic of the Central Pacific, is immediately under my supervision, and has been, you may say, continuously, with

the exception of the passenger department and that only since 1884. The freight business has been under my control since 1871.

Q. How is your department technically designated in the company? I mean, now, as to the operating department?—A. The organization of the company is practically this: There is an executive department; that practically belongs to the president. Then there is the accounting department, and that is under the controller. Then there is the operating department, which is under the general manager. The traffic is included in the operating department, and is under the general control of the general manager. The traffic department is composed of the passenger and freight department, and I have the immediate supervision of it; the general passenger and the general freight agent, respectively, reporting to me, and I reporting to the general manager.

DAILY CONFERENCES WITH MANAGER—REPORTS TO MANAGER.

Q. Who is the general manager to whom you make your reports?—A. A. N. Towne.

Q. How often do you report?—A. I make no formal report. There are daily conferences, may be every five minutes, and I may not see him for two or three hours, and then again I may see him for two or three hours in a day. On all important matters relating to the general policy I would confer with the general manager, and possibly with him confer with the president of the company.

Q. Do you make any formal reports to the general manager at any period of the year?—A. No, sir; I have not since I have been general traffic manager. When I was in the general freight department, at the end of the year I would make brief showing of the operation of the freight department, which would be incorporated into the annual reports.

Q. Do you make any reports from time to time, during the year, in writing, to the general manager?—A. No, sir; not what you would call a report. I might have occasion to write him in answer to inquiries from him, or might have occasion to submit propositions to him in writing, but our communications are generally oral.

OUTLINE OF DUTIES.

Q. What are your duties in detail? I mean will you generally outline what you have to do?—A. The general freight agent has immediate charge of the conduct of the freight business of the company. The general passenger agent has the immediate charge of the conduct of the passenger business. These two gentlemen report to and confer with me, and take my advice and instructions regarding matters.

Q. What control have you over the supplies of the company?—A. None whatever.

THE PURCHASING DEPARTMENT.

Q. How are the supplies of the company procured—through what department?—A. The purchasing department.

Q. Who is at the head of that department?—A. At present Timothy Hopkins, the treasurer, has the general supervision of it.

Q. How are requisitions made upon the supply department for your department?—A. For my own office, I make a written requisition for what I want in the way of stationery and supplies. The general freight agent does the same. So, also, would the general passenger agent. Each station agent would do the same thing, and his requisition would

not pass through my office, but would go direct to the purchasing agent, possibly passing through the office of the division superintendent. As to the details of that, however, I am not a competent witness.

Q. Do you conduct the business with the shippers over the road?—A. The freight and passenger agents come more directly into contact with the public at present, but my office is open and I am frequently interviewed personally regarding matters.

METHOD OF FIXING FREIGHT RATES.

Q. How are your freight rates fixed?—A. Any general change in freight tariffs would be worked up in its details by the general freight agent and submitted to me. I would probably confer with the general manager, and then it would have to be submitted to the president and board of directors for their ratification.

Q. Who fixes the freight rates?—A. Naturally, by that method you will see that they are fixed by the president and board of directors.

Q. That is to say, after you had determined upon the rate in the event of a change, the schedule of the new rate would be furnished to the president, and if he returned the schedule to you approved, it would become the rate of the company; is that it?—A. In my answer, I spoke with special reference to the general tariffs. They would be made up, or any changes in the general tariff once adopted would be made up, in its details by the general freight agent and the general passenger agent, respectively, according as to whether it was a freight or a passenger tariff. From time to time, during the construction of that tariff, these officers would report to me, and I might, during the process of construction, consult with the general manager about it. Then, after the thing would be in shape, it would have to be submitted to the president and board of directors for their approval.

Q. How long has that been the method of fixing the freight rates?—A. That has always been the method.

METHOD OF MAKING THROUGH TARIFFS.

Q. During all the time that you have been connected with the department, have you ever known a schedule submitted to the board of directors or the president to be disapproved, or returned with such an indorsement?—A. That formality has never been pursued. The discussions have been altogether oral. Let me say, in order that you may have a perfect understanding of it, that I was speaking with regard to the general and local tariffs. The through tariffs are tariffs that are used in connection with other lines, and are generally made up as the result of a joint conference with those lines. If I were present at that conference, or if the general freight agent or the general passenger agent were present, his action would be ratified with, probably, simply an oral report of the fact.

FINAL DECISION AS TO RATES.

Q. So that as a matter of fact, as to all the rates during the years that you have been connected with the company, has your decision, with that of the general manager, as to the rates been final?—A. No, sir; not altogether. I have very frequently made suggestions that have been disapproved. They may have been disapproved by the general manager, and even after approved by him, may have been disapproved by

the president; but the disapproval would not be made in the formal manner in which you express it, that is, that the president would take the schedule and write across it his disapproval. I would probably go into the president's office with the general manager and talk the matter over, and he would say that he would not approve it, and that would end it. I may say that generally speaking my recommendation with regard to tariffs would have great weight and perhaps as a rule would carry. Still, there are exceptions to the rule, and there have been tariffs and changes made that did not originate with me. At times, our president has dictated changes without consultation.

METHOD OF PUBLISHING RATES.

Q. After you had determined upon the rate, how was it published to the community at large? I am speaking of the time prior to the 1st of April.—A. In the State of Nevada, I believe, we post the tariffs at every station. I think that we do also in California. I think that that is required by law. In the absence of any legal obligation to post or to publish they are simply distributed to our agents.

Q. How do you distribute them to the agents, by circular or pamphlet?—A. They are put in printed form, as a rule, and sent to the agents. Sometimes they are in book form.

Q. Has that been your method during your connection with the Central Pacific?—A. Always.

Q. Have you furnished to the Commission, or if not, will you do so, a list of the freight rates so established from time to time and issued to the community?—A. I do not believe that I can do it. The tariffs that go out of force are of no value to us. I suppose that all you would want would be the present tariff now in force.

THE TARIFF FILE NOT COMPLETE.

The CHAIRMAN. We want all the rates. If you have duplicates for the months issued from time to time, as you fixed the rates—any circular or pamphlet—the Commission would like to have them.—A. I do not think that it would be possible for me to get you a complete list of tariffs from 1870 up to date.

Q. How complete can you give it?—A. I cannot tell you. I had occasion the other day to look up some tariffs which I wanted to give the Interstate Commerce Commission, and I found, as is usually the case, that the thing that I wanted they had neglected to keep on file. We endeavor to keep a file of the tariffs, but it is not a perfect one, and we never attempt to keep any in our office except the one file which we want for our records.

BOOKS AND PRINTED SHEETS AT DISPOSAL OF COMMISSION.

Q. Will you furnish to the Commission, so far as your records will show, a list of the freight rates and passenger rates from year to year as they appear in the office of your company? The act of Congress calls for this.—A. There is a good deal of clerical labor there. I should greatly prefer to open our books and let your accountants do that work. If you do this, I will give them all the aid that they want.

Q. How many of the printed circulars or pamphlets that you have spoken of have you on the records of the company or on the files?—A. I cannot tell you that. But if I have anything in the nature of extra copies, printed sheets of rates, I shall be very glad to furnish them to you.

FULL SETS OF RATES FILED IN WASHINGTON.

The CHAIRMAN. We will call for the rates from year to year, both freight and passenger.

The WITNESS. I think that there have been from time to time filed with the Second Comptroller and with the Third Auditor of the Treasury full sets, and also in the Quartermaster General's Office in Washington. I suppose that you can get a better record there than we have here. Every time they want to pass on accounts they would send for a set of tariffs. Sometimes we have even robbed our own files in order to furnish them.

Q. After you had published your rates and circulated them, were the rates so published known as the open tariff rates and charged to all shippers alike?—A. Not always.

THE RATES CHARGED TO THE GOVERNMENT.

Q. Was the Government charged the open tariff rate as published to the community?—A. I think so. I have never had charge of making up the accounts against the Government. Those accounts have been made up under the direction of Mr. Miller.

Q. If the Government had been charged any other rate, would not the application for such reduced rate have been made to you or to your department?

The WITNESS. Do you mean if the Government had been charged any other than the open tariff rates?

The CHAIRMAN. Yes, sir.

The WITNESS. I do not understand that the Government had asked for rates at any time. The Government officers simply make their requisition for transportation and it is furnished. We file with the Government an account of the service rendered on that requisition, and the Government checks our account by the tariff on file with the proper officers of the Treasury Department, and allows or disallows that account in accordance with the checking. That is my understanding of it.

Q. Do you know whether the charges made by your company as against the Government, which enter into the Government account, in the freight department, have been different from the open published tariff rate?—A. I do not know of my own knowledge that that has been the case. I think that it has not been.

Q. What rates have been charged by the company other than the open public rate?—A. A tariff would scarcely be in force ten days before the necessity for changes would be apparent, and those changes would be made by written instructions to agents.

CHANGES IN RATES QUICKLY MADE.

Q. What would be the cause of such a change so quickly after the promulgation of the rate fixed by the company?—A. The ascertainment of the fact that the tariff as issued was not productive of business.

Q. After a change such as you have named would the rate then be published to the world as the tariff rate of the company?—A. Wherever it was required by law to be posted, it would be posted. Wherever not so required, the notice would be given or the instruction would be given to the agents. It would be like this: If there was a change made in the rate between San Francisco and Ogden, the agents at San Francisco and at Ogden and the freight auditor would all three be instructed as

to that, and it would take the place of the tariff and be the same as the tariff, with the exception that the tariff would be printed and this would be written; that is all.

Q. Would that new rate, or special rate be charged to all shippers alike?—A. As a rule, yes.

SPECIAL RATES DEFINED.

Q. As an exception, when would there be a different charge?—A. That I cannot tell you. There have been special rates made.

Q. When were special rates made?—A. All along through my connection with the company.

Q. What would be the cause of a special rate? What am I to understand by special rates?—A. A special rate, as we use the term, means a rate not printed in the tariff. A special rate would be special in the sense that it is not printed in the tariff, but general as a rule in its application.

Q. With whom would you make your special rate?—A. With nobody in particular. It might transpire that you were a shipper along the line of the road, and found that at the printed tariff rate you could not do business; that is, you could do more business at a lower rate, for instance. You might write to the general freight agent, or see him personally, and if the general freight agent became satisfied of that fact he would make a reduction and give instructions accordingly; but as a rule that change would apply generally; it would go on the books; and while you yourself might be the only one having a knowledge of that fact at the time it was made yet, Mr. Anderson, intending to ship that kind of freight at the same station, would get that rate, because it is a general rate and special only in the sense as not being printed.

Q. How long has that been the practice of the company?—A. As far back as I can remember.

SPECIAL RATES UNDER WRITTEN AGREEMENT.

Q. Were there any written agreements with reference to special rates as to particular shippers?—A. I think there have been some; yes, sir.

Q. Have you the copies of the agreements?—A. That refers almost altogether, I guess, to through business, and I think that we can find the copies of the agreements.

Q. Will you produce the agreements in relation to special rates that have been made by the company at any time with any particular shippers?—A. If you will call for any particular agreement I will produce it.

The CHAIRMAN. I call for all the agreements in writing.

Q. What other rates had you? You have named the open published tariff rate and the special rate made from time to time which was enjoyed generally by all the shippers, and the special rate which was given to particular shippers under an agreement. This makes three classes of rates. Had you any other rate?—A. I really do not see the room for any other rate. I do not know of any.

REBATES.

Q. Were rebates allowed from time to time on any of the roads that have been named?

The WITNESS. What do you mean by rebates?

The CHAIRMAN. That is not an answer to my question.

The WITNESS. I must know what you mean by the term rebates, before I can answer.

REBATES ALLOWED FOR OVERCHARGES.

Q. Were rebates allowed from time to time by the company from the special rates and from the general rates?—A. Whenever a given lot of freight was overcharged, the difference between the charges as billed and the charges as they should have been was rebated.

Q. Was a rebate allowed only in cases where there was an overcharge beyond the general tariff rate or the special rate that you have named?—A. No, sir; not from the special rates that I have named; not to my recollection.

Q. Were shippers allowed at any time by the company, upon application, a percentage off from the open-tariff rates?—A. I do not remember of any such proceeding as that.

TO WHOM APPLICATIONS FOR OVERCHARGES IS MADE.

Q. To whom would application be made for an overcharge; for the return of an overcharge?—A. It might be to the agent who delivered the goods, and it might be directly to the general freight agent; but all these applications find their way to the general freight office.

Q. Have you received applications for an allowance of a percentage on the open-tariff rate, from any shipper?—A. It is quite a common occurrence for shippers to ask for lower rates—rates lower than the tariff, but it is not ordinary that they would ask me.

REQUESTS FOR LOWER RATES GENERALLY REFUSED.

Q. What do you do with such applications?—A. We generally refuse them.

Q. Have you forwarded any such application to the president of the company?—A. I do not remember ever having done so.

Q. Have you received orders at any time for the allowance of a special rate to particular shippers in San Francisco?—A. I do not remember that I have.

HUNTINGTON, HOPKINS & CO. NOT SPECIALLY FAVORED.

Q. Have you charged the firm of Huntington, Hopkins & Co. on all their shipments the same as you charge other shippers?—A. Always.

Q. Have they always paid the open-tariff rate?—A. Always, so far as I know. It may not be the open-tariff rate, but they have always been charged the full rates charged to others in the same line of business. They never have received any special favors in any way, shape, or form, to my knowledge.

Q. Have Huntington, Hopkins & Co. from time to time received rebates from the Central Pacific Railroad Company on shipments made by them to San Francisco?—A. They never have received any concessions, rebates, or whatever you may term it, in any shape, to my knowledge.

Q. Have they received the return in money of overcharges that have been made from time to time on freight?—A. I presume that they have. I presume that their freight has been overcharged and that the money has been returned to them.

OVERCHARGES ON THROUGH BUSINESS.

Q. Would there be many overcharges likely to occur in shipments of that one firm in a year?—A. There might be a great many. At one time all of our through business came here overcharged. It got to be a crying evil.

Q. What period was that?—A. I think it was previous to 1880 that we had a great deal of trouble, the fault being with our eastern connections.

Q. Since 1880, have you any knowledge of many overcharges arising to any particular shippers, especially the firm that I named, Huntington, Hopkins & Co.?—A. Not more than ordinarily, such as would arise from errors of the bill-clerks from an erroneous construction of the tariff.

VERY FEW ERRORS UNDER PRESENT MANAGEMENT.

Q. Would it be likely that there would be many errors in a year?—A. It would depend very much on what you would regard as many. By a comparison with previous experience, and taking into consideration the amount of our business, I think that we are now conducting it with comparative freedom from errors, more so than has been the case for several years.

Q. Would you regard it as an extravagant number of errors if four or five hundred overcharges should be made for one firm, and that firm Huntington, Hopkins & Co., in the period of fourteen months?—A. It would depend somewhat on the amount of business, the number of shipments that they made, and the general management of the business during that period. Such a thing might occur. As I have said, there was a time when our through business, nearly all the west-bound freight, was overcharged; but with regard to Huntington, Hopkins & Co., it has never been more the case with them than with Dunham, Carrigan & Co., Carolan, Cory & Co., or any other firm in the same line.

REGULARITY WITH WHICH ERRORS MAY OCCUR.

Q. Would such errors in the settlement of accounts regularly occur from month to month, or from day to day?—A. If the system were wrong and the shipments were made regularly from day to day, or from month to month, the errors would be bound to occur with the same regularity.

Q. Has your attention been called to the fact that during the year 1884 and two or three months of 1885, a period of fifteen months, more than three hundred and fifty errors in overcharges, as you designate them, occurred with reference to the charges to the firm of Huntington, Hopkins & Co., representing a sum of nearly $60,000?—A. My attention has not been called to it, but I will venture to say that those errors, if the Commission will examine the vouchers, will be found to be legitimate overcharges, and that Huntington, Hopkins & Co. did not get a rate one cent less than their competitors in the trade.

NO DISCRIMINATION IN FAVOR OF HUNTINGTON, HOPKINS & CO.

Q. What am I to understand by what you designate as legitimate overcharges?—A. The term "legitimate" is unfortunate. I mean by that that there was nothing irregular about it; that there was no evasion of the tariff; that there was no discrimination in favor of Huntington, Hopkins & Co., either sought or worked by those overcharges. Of

course, an overcharge is not legitimate. There is a defect in the system of handling the traffic wherever it arises. Such errors will arise so long as man is fallible. I meant to convey the impression to this Commission that in no way or shape was there ever a discrimination in charges made in favor of the firm of Huntington, Hopkins & Co. I want to make that as clear and emphatic as language can put it.

Q. Then am I to understand that the rate charged to Huntington, Hopkins & Co. for shipments made by that firm was the open, published tariff rate?—A. Yes, sir; or the special rates as I have explained.

Q. Have you a special rate with the firm of Huntington, Hopkins & Co.?—A. We have not.

CONTRACT RATES IN THE PAST.

Q. Then if you have not a special rate with Huntington, Hopkins & Co., do they pay the open-tariff published rate?—A. I am speaking of the present when I say that they have not; but there have been times in the past when all the hardware firms here had special rates, which we called contract rates, which were not open-tariff rates; but wherever that was the case, they were the same under like terms and conditions to all the firms.

Q. Prior to 1885, did the firm of Huntington, Hopkins & Co., on their shipments, pay the open-tariff published rates?—A. Prior to 1885? I think I may answer yes to that with this reservation, that an explanation of what we may call the contract plan, which was in force on our through business, may be necessary in order to qualify my statement.

CONTRACT RATES EXPLAINED.

Q. What was the contract plan?—A. The contract plan, as it is known here in California, was a policy that was adopted by all the transcontinental roads to secure an increase of traffic by offering to any firm in California which would agree to ship exclusively all rail, and give the business for twelve months to the all-rail lines, lower rates than the open tariffs and lower rates than would be given to the men who did not agree to ship exclusively by rail, but elected to take their chances in the open market and use Cape Horn, Pacific Mail, or the railroads accordingly as they might choose from day to day.

Q. Have you a written contract, or had you a written contract, prior to 1885, with Huntington, Hopkins & Co. as to the shipment of their freight over the Central Pacific Railroad?—A. With respect to through business, I think that Huntington, Hopkins & Co. were under contract with us just the same as Dunham, Carrigan & Co., Carolan, Cory & Co. and other large merchants who shipped exclusively by rail. I think we had such an agreement.

HARDWARE FIRMS WHO HELD WRITTEN CONTRACTS.

Q. You have named two firms; are there any others?—A. Yes, sir. I will name all of them.

Q. I wish you would. Is the firm of Hawley Brothers a hardware firm?—A. They are not exactly a hardware firm. They are not men in the same line with Huntington, Hopkins & Co. I refer more especially to Dunham, Carrigan & Co. and Carolan, Coy & Co. Then there are men who deal in agricultural implements.

Q. Will you give us the hardware men?—A. Let me explain to you. There are some men who deal in agricultural implements as well as hardware, and their lines interlocked and would compete in some things with these hardware firms; Baker & Hamilton and Hawley Brothers Hardware Company would be examples of dealers in agricultural implements and some lines of hardware; Holbrook, Merrill & Stetson would be an example of a stove and tinware house carrying some goods in the hardware line; and then there were iron houses, like George W. Gibbs & Co. and Selby & Co., who also carried some lines of heavy hardware. I do not recall them all, but those named are sufficient to give you a general idea. W. W. Montague & Co. is also a prominent stove and tinware house carrying some lines of hardware.

Q. Have you named all the firms in San Francisco engaged in the same line of business with Huntington, Hopkins & Co.?—A. I have named all the principal ones that I recall. I suppose that there are others.

PLAN OF ARRANGING CONTRACT RATES.

Q. What rate off of the open tariff rate did you allow to these firms?—A. I cannot tell you. The method pursued in these rates for through business was to visit the merchant and make him an offer to contract for the transportation of all his goods from the East to California on practically the same terms that he would enjoy if he used all three routes. We reasoned that we could afford to carry the whole at a very much lower rate per unit of service than we could carry the part. It was the custom of the California merchants, the large importers as we call them, to divide their shipments. The high-priced and seasonable goods that must be moved quickly, or upon which the items of interest and insurance counted largely, they would ship by rail; or if they ran out of a certain line of their stock and required to fill it up quickly, they would ship that by rail; but for all low-cost and heavy goods, and those that were not needed for immediate sale, they would ship, some by the Pacific Mail, but the larger part by way of Cape Horn. The result was that we got but a small traffic. We got the high-class goods, the high-priced goods, on which the interest and insurance would amount to a good deal, and such goods as were needed for immediate consumption, and such goods as were by their nature not capable of Cape Horn transit. The rates by Cape Horn were very much lower than our own rates. It was a profitable thing for the merchant to do. It occurred to us that we could take the whole of the traffic upon terms that would be satisfactory to the merchant and which yet, upon the average, would be remunerative to the railroad lines.

WITH WHOM THE IDEA ORIGINATED.

Accordingly, the general freight agent of the Union Pacific, with whom the idea originated, came here to San Francisco, and with him I visited the merchants. I suppose that we tramped the streets here for a couple of months, explaining our ideas to the principal importers. By some we were met with cordiality and approval. Others were a little indifferent. Where a merchant liked the scheme, we would sit down with him and, by examining his bills of lading by Cape Horn and his insurance policies, we would get an idea of the quantity that he would ship by the several routes and the cost to him by the use of the several routes. We would then aim to make the rate so that upon the whole it would average about the same. We would average the rate while he was using the three routes.

Q. Were all these agreements in writing by which these rates w given?—A. Yes, sir.

Q. Will these agreements that were in writing show the rates?— Yes, sir.

CONDITIONED UPON AMOUNT AND CHARACTER OF BUSINESS.

Q. Were the rates the same to all the merchants?—A. Not altogeth so. We could not make them the same to all the merchants, becau we discovered that there was a very great discrimination in the charg made by our competitors. At the beginning we dealt with each m chant individually. For example, we would go into a hardware sto and ascertain about the quantity of freight that they were shippi the quality, the kind and the class of freight that they were shippi via Cape Horn and by the Pacific Mail, if any, together with what th were shipping by rail, and what the cost had been to the firm in usi the several routes. After we had ascertained that, we would ma them an offer. We would make out a list of rates to be governed the showing that the merchant in our presence had made in the cas the past. We never came down to the dead-level cost, because th were willing to pay us something more. As a rule, the merchant w had been accustomed to ship a portion of his goods via Cape Ho could say to us, after we figured up the amount paid for freight, intere insurance, and so forth on those goods, even interest at the rate of 1 p cent. per month, "Well, there is an advantage to me in shipping v all rail that is worth something more than that, and I will give y from 15 to 20 per cent. advance over those rates."

OPEN RATE TO ALL SHIPPING EXCLUSIVELY BY RAIL.

Q. Did you actually visit those different merchants with regard the size of their business?—A. We usually tried to get to the larg firms. We made our attacks upon the strongest forces.

Q. So that under such an arrangement would the smaller dealer be co pelled to pay the open tariff rate as against the special contract r which you had given to the larger shipper?—A. This contract plan w evolved through two or three years, and eventually, after we had tri it, tested it, and approved it, and it began to be generally adopted, published a list of rates which we would give to all shippers who wo agree to ship exclusively by rail, and we threw that open to anybo no difference whether he shipped 100 tons a month or a year, or whet he shipped 10,000 tons a year.

Q. After you had made that publication did you make any agr ment for a rate under that published rate?—A. No, sir; I think not.

Q. With any of the merchants?—A. I think not; not that I reme ber of.

A LARGE PERCENTAGE OF MERCHANTS ACCEPTED THESE TERMS.

Q. What percentage of the merchants of San Francisco in that p ticular line of business which you have mentioned enjoyed this spec rate under contract?—A. I think that before we got through we h 95 per cent.

Q. How long did it take you to get through?—A. I presume that ran that plan something like five years. I cannot be exact about it.

Q. In the mean time, however, shippers who failed to make spec contracts paid the open rate, did they?—A. Yes, sir; they paid

open rate. That is a matter of public knowledge here. I do not pretend to be giving you anything new regarding this, because everybody knows it here in this State. I shall be very happy to give you all the information that I can regarding it.

Q. How are the rates billed under these special contracts; how is the work done?—A. At the beginning, if I remember correctly, we billed all freight at the full rates and refunded the overcharge in cases where there was a contract.

"OVERCHARGES" AND "REBATES" INTERCHANGEABLE TERMS.

Q. Would you regard that as an overcharge or a rebate on the general rate?—A. I think that the terms are interchangeable.

Q. Did you instruct the shippers who had special contracts to make out their bills at the full rate?—A. I gave them no instruction whatsoever; and it was not always necessary for them to make out a bill. We would do it ourselves. If you want my idea of what a rebate is I will give it to you.

Q. We will give you an opportunity to explain that after a while. Who instructed the merchants who had special contracts to make out their bills at the full open tariff rate?—A. I see that you do not understand the method. If you will permit me I will explain it fully, so that you will understand it, and then I can answer your questions more definitely.

The CHAIRMAN. I want to know about it.

AN ILLUSTRATION.

The WITNESS. I will give it to you. Suppose that you were a merchant, and I should go to you to make a contract for the rail lines—because all the lines were parties to it between New York and San Francisco. It was not a Central Pacific affair. You understand that all the lines between San Francisco and New York, probably embracing all the roads in the East, shared in this reduced rate that was given to the merchant in consideration of his exclusive patronage—I should go to you and make a contract, and should say that it is impossible for us in billing to bill this to you at the net rates. We will bill it at the full rates, and when you receive your goods at the depot you pay the full rates, and we will refund to you the difference between the agreed rates under the contract and the rates which you have paid. Of course that is an overcharge. We overcharged those goods above the price that you had previously agreed to pay for the transportation of them.

OVERCHARGES BY ERROR AND DELIBERATE OVERCHARGES.

Q. Would that be an error of overcharge?—A. No, sir; that is not an error.

Q. What is the difference between an error of overcharge and an overcharge made deliberately?—A. The difference consists in that one is an error, and the other is done deliberately.

Q. How many of the overcharges that you have named under the contract were made to the firm of Huntington, Hopkins & Co. from time to time?—A. I cannot tell you. They were right in the same line with others.

Q. How do you distinguish between the overcharges entered on your books here, as overcharges made by error in the charge made through the clerk, and the overcharge which you designate as having been

made under instructions?—A. I do not know that there is any distinction made on the book.

Q. How do you distinguish the entries in the books between overcharges of that kind, by error, and overcharges under instruction?—A. So far as the books are concerned, I cannot tell you whether it furnishes any distinction between them or not. I presume that in order to determine what was an overcharge by error and what was an overcharge purposely made, I should have to examine each individual voucher.

TOTAL REFUNDS FOR 1884.

Q. I want to call your attention to the fact that during the year 1884 the books produced by you show a total of refunds of $1,060,275.92. Can you divide this sum during the year into overcharges by error and overcharges by way of arrangement?

Mr. COHEN. What year was that?

The CHAIRMAN. 1884.

The WITNESS. I suppose that by examining each individual voucher it could be divided. You can do that as well as I can, or your accountants can. I do not think that it would be possible to do it otherwise than by an examination of each voucher. You understand that that does not mean $1,000,000 paid out of the Southern Pacific treasury. That represents the entire amount paid to the consignee or to the shipper, and perhaps not a third of it came out of the Southern Pacific, or the lines west of Ogden—the Central Pacific.

Q. This was before the consolidation in 1884, was it not?—A. The Central Pacific—I suppose that includes everything. That amount includes the sum paid by all the lines interested in the traffic. Possibly it includes only the lines west of Ogden, but I am pretty sure that it does not.

The CHAIRMAN. It was taken from your refund book, as produced here, for 1884?

The WITNESS. I suppose you mean the claim register?

Mr. NORRIS. It is the book containing a statement of the refunds of overcharges, rebates, and loss and damage.

The WITNESS. That is the claim register.

Mr. COHEN. Over what roads are you inquiring about?

The CHAIRMAN. The Central Pacific.

Mr. COHEN. The local lines or the through lines?

The CHAIRMAN. The general Central Pacific account taken from the book produced here in answer to a call for the refund book showing overcharges from time to time, and the different claims paid.

ALL OVERLAND LINES SHARED IN THE REFUNDS.

By Commissioner ANDERSON:

Q. The question is whether the Central Pacific refunded only its own share, or the share of all the lines. How is this?—A. I am quite clear that no such amount as that was paid out for overcharges out of the revenue of the Central Pacific or of the Southern Pacific. That represents the entire amount paid out for account of all the lines participating in the overland business.

By Commissioner LITTLER:

Q. As I understand you, this cut rate, if you please, was prorated between the Central Pacific and every other line between San Francisco and New York?—A. That is it. It embraces all the roads, and I fancy

just the sum that is named that that was the sum total of the overcharge to be distributed to all the roads.

THROUGH AND LOCAL FREIGHT REFUNDS.

The CHAIRMAN. I call your attention to the further fact that of this sum, $238,000 was refunded from through freight earnings, and $324,000 was refunded from local freight earnings.

Mr. COHEN. How much was the local?

The CHAIRMAN. The local was $324,000. Can you say with regard to the difference between the through and the local, as to what proportion of the total sum of $1,000,000 was an overcharge by way of error, or an overcharge by way of arrangement under the contracts that you have named?

The WITNESS. I cannot tell you what proportion. It would be impossible for me to tell you without looking over each individual voucher. I doubt very much whether that statement is correct, in its division between the through and the local. It may be, but I think not. There must be some explanation. That is 1884, is it?

The CHAIRMAN. Yes, sir.

The WITNESS. I should think it very strange that the overcharges on local freight amounted to $324,000, and only $238,000 on the through freight. There is something wrong there sure.

ARRANGEMENTS WITH THE STANDARD OIL COMPANY.

Q. What arrangements have you made with respect to overcharges by way of error, or overcharges by way of arrangement, with the Standard Oil Company on their shipments?—A. We have no arrangements at present with the Standard Oil Company.

Q. What arrangements had you prior to April 1, 1885, at any time, with the Standard Oil Company, or the Continental Oil Company, which was afterwards merged into the Standard Oil Company?—A. I desire, after I answer this question, to explain the reasons for what was done in connection with the Standard Oil Company. I believe from the time that the Standard Oil Company took charge, or acquired the oil business on this coast, it had lower rates than the general tariff provided, or than other shippers paid on coal oil. I think that it was the subject of written agreement. The reason for that was, that previous to the Standard Oil Company's coming into business here, the oil was almost wholly transported via Cape Horn. It was chiefly controlled by Alvinza Hayward, who employed a man by the name of Blake as his agent. The tonnage was very large, and not only went itself via Cape Horn, but was an inducement to the laying on of ships which would offer to take other freight, having a partial load of oil. We endeavored to secure the transportation of that oil by rail. I had frequent interviews with Mr. Blake on this subject in the early 70's, and I believe that I once offered him a rate of 80 cents per 100 pounds if he would agree to ship by rail from New York, but he would not do it.

Afterwards the Standard Oil Company came over here, and I think that they bought out Hayward's business. We approached the Standard Oil Company, looking to the transfer of that business from the Cape Horn route to our line. We gained some advantage from the change in the control of the business by reason of the fact that the Standard Oil Company wanted to supply this coast from Cleveland, which brought the point of production several hundred miles nearer San Francisco than when shipments came from New York, but at the same time took it

several hundred miles away from the Atlantic coast and from the vessels there.

CONTRACT MADE.

We made a contract with the Standard Oil Company to bring all of its oil by rail. I think the first rate we made was somewhere in the neighborhood of $200 a car-load from Cleveland to San Francisco.

Q. What was the date of the agreement?—A. I would not be sure about that, but I think some time in 1876.

Q. Have you a copy of it?—A. Yes, sir.

Q. Will you produce a copy of the Standard Oil Company's contract?—A. Yes, sir; that arrangement has been continuous, or was continuous, up to the date of the dissolution of the transcontinental association, which was an association of all the overland railroad lines, and it was a contract in which all the lines between Cleveland and San Francisco were concerned. The written instrument, while made between the Pacific roads, or their representatives and the Standard Oil Company, was really between all of the railroads between San Francisco and Cleveland. The lower rates were participated in by all the lines between these points. I think that the original contract was made in New York by the agent of the Union Pacific Railroad.

CONDITIONS REGARDING TANK CARS.

Q. Was there any condition in the agreement with reference to the deduction of $200, or whatever rate was allowed for the return of empty cars?—A. I think not; I do not remember anything of the kind.

Q. Did you make any contract subsequently with the Standard Oil Company with reference to the return of empty tank cars?—A. I do not think so.

Q. Was there any condition with reference to sending them back without charge?—A. I do not remember it. I think that few, if any, boiler tank cars were ever used by the Standard Oil Company. It was certainly understood at the time that the contract was made that they would not use boiler tank cars. That was one of the great obstacles in the way of competing with the Cape Horn route. In the meantime, some one had patented a box tank car, putting tanks in the end of the car, so that while it was able to carry a full load of oil, it was available for the use of ordinary freight returning. My recollection is that while it was not specifically stated in the contract, it was the understanding that that class of cars must be used by the Standard Oil Company in order that we might return them loaded, if we could get loads for them. If we could not get loads for them, we would have to return them empty. In returning them we always load them, and instead of charging for their return, we would naturally pay mileage as we do on all foreign cars. We would treat them as though they were the cars of a connecting line.

INSTRUCTIONS TO FREIGHT AGENTS AS TO UNION PACIFIC.

Q. Are the freight agents of the Southern Pacific Company under your control?—A. In some respects, they are.

Q. Have you instructed them at any time as to shipments over the Southern Pacific, or the securing of shipments over the Southern Pacific, as against the Union Pacific?—A. I do not remember giving any special instructions. It is more than likely that instructions going to the agents would relate more particularly to the Southern route, for the reason that

the Central Pacific route we do not work so closely. The Union Pacific looks out for our interests in that direction, and the interests of the Northern line generally are the particular care of the connections of the Union Pacific.

RELATIONS OF SOUTHERN PACIFIC WITH CENTRAL AND UNION PACIFIC.

Q. Have you allowed rebates in order to secure shipments to the East over the Southern Pacific as against the Central Pacific and the Union Pacific?—A. I think not.

Q. Do you know whether your agents have offered inducements in the way of reductions of rates to secure traffic to the Southern line, as against the Central and Union Pacific?—A. I might say no, as against the Union and Central Pacific. There was another route opened before what you call the Southern route. I presume you mean by Southern route, our line via New Orleans.

Q. What inducements have you offered to shippers to secure their traffic over the Southern Pacific?—A. Good service.

Q. Do you give better service than is given by the Central and Union Pacific?—A. Not better than the Central Pacific Company's service; but better than the Union Pacific, or any line connecting with the Union Pacific.

Q. Are there any other inducements that you have offered?—A. I believe none whatever.

CUT RATES ORIGINATE WITH NORTHERN LINES.

Q. Do you know whether your agents have allowed from time to time special rates to shippers who would send their freight over the Southern Pacific?—A. I will answer that question broadly, if you will permit it. I think that rates have been higher and better maintained since the opening of the line via New Orleans, on that line, than on any other line doing business across the country. If any cutting has been done, it can be proved that it originated with the Northern lines, or with the lines in competition with the Southern Pacific. It can be shown that cutting by way of special rebates and concessions have always originated with these other lines, and that the lines via New Orleans has simply met these cuts.

Q. What did you do to meet the cuts?—A. By reducing our rate to the "cut" rate of other lines. That was the rule where necessary.

COMPARATIVE MILEAGE RATE.

Q. How would the mileage rate of the Central Pacific compare with the mileage rate of the Southern Pacific on freight?—A. I think that, of course, the Southern Pacific would be a little lower per mile.

Q. What would be the difference?—A. I can scarcely tell you. There are so many things that would enter into the consideration that it would be difficult for me to give you an accurate answer to that question. I might approximate it, however, by saying that if you assume the rate from Omaha to San Francisco via Ogden to be $1, which is practically a cent a ton per mile—really a little more than that, but the fraction would be very small, and if you assume that the rate from Houston, which we would rate as a common point with Omaha, would be a dollar, and the distance practically the same, the mileage rate would be almost the same, practically a cent a ton a mile. It is 2,034 miles from Houston, as against 1,915 miles from Omaha. There would not be a great deal of

difference, and I do not know but that on the New York business the rate west of El Paso would be greater per mile than it would be west of Ogden. That, however, would grow out of the fact that the proportions given to the lines east of the Missouri River are greater than the proportions given to the steamers between New York and New Orleans.

MERCHANTS COULD TESTIFY AS TO RATES.

Q. Did you issue at any time written or printed instructions, or verbal instructions to your agents of the Southern Pacific Company to secure shipments over the Southern Pacific by favorable rates?—A. No more favorable than the rates made by the other lines. If you will pardon me for making a suggestion, if you want information on that subject, I should think that the very best source for getting it, one which would be the most convincing to the Commission and the public, would be the merchants here in this city. We would like to appeal to the merchants who pay these freights to know whether the rates via the Sunset route, as we call the Southern Pacific Company's line from New York, have been lower than they have been by the other lines.

PROPORTION OF BUSINESS ON COMPETING LINES.

By Commissioner ANDERSON:

Q. Is it not true that for some reason the through business that goes by the Southern route has largely increased and exceeds the business that goes by the Central and Union Pacific?—A. On the contrary; the business that goes by the Central Pacific and Union Pacific is the largest, always has been the largest, and in my judgment always will be.

Q. Is that true of the line for the last four or five years?—A. Yes; ever since the line was opened.

By Commissioner LITTLER:

Q. Is it true now?—A. Yes, sir.

By Commissioner ANDERSON:

Q. What are the proportions?—A. I presume that the line via Ogden carries 50 per cent. or more of all the freight business, and it carries a greater percentage of the passenger business; while I presume that the line via El Paso will not carry more than 35 per cent., and upon the whole I do not think that it carries that much.

Q. Are you speaking exclusively of freight?—A. Yes, sir. For passengers the proportion would be very much more in favor of the Union and Central Pacific line.

THE SOUTHERN PACIFIC AS A COMPETITOR.

By the CHAIRMAN:

Q. Have lower rates, either by special rates or by rebates, by way of the Sunset route, between the Atlantic and the Pacific ports, been given than were made at the same time by the Union and Central Pacific?—A. No lower rates have been made via the New Orleans route between the Atlantic coast and the Pacific coast than the line west of Ogden has been willing to prorate over that line. In order to give you as much light on this question as possible, I would like to explain that at the time the route via New Orleans was opened, in 1883, of course it was a new line—a mixed water and rail line. We did not count much on its efficiency as a competitor of the all-rail lines. The business was

ted to the Central Pacific and Union Pacific line. I think that the first tariff was put in force along about March, 1883, and it was a lower tariff than was then in force from New York direct, all rail, to San Francisco. As nearly as we could make it, without attempting to very closely approximate it, this difference was equal to what the insurance would be for the sea service between New York and New Orleans. In fact, we made it so that there was a differential through rate put in force. The other lines made no complaint, and did not take any notice of us. They had a sort of contempt for that line, and did not think that it could get any business.

TRUNK LINES OBJECT TO DIFFERENTIAL THROUGH RATE.

Later, however, I think in June, the trunk lines—that is, the lines leaving New York City—objected, the ground of their objection being that they being parties to the special contract plan, which was then in force, and which I have tried to explain to you, were entitled to that business. They were inclined to make trouble.

The result of it was that I went to New York and had a conference with the trunk lines and their western connections. They said that they would be satisfied if the line via New Orleans would remove the differential rate and charge the same tariff that was charged by the all-rail lines. We agreed to do that, and we did so do it, and have always done it since that time, so far as my knowledge goes. There was a time, I think last year, and probably for the year previous, when the trunk lines refused to co-operate with the lines west of Chicago on a through tariff. The cause of that difference between them was that they thought that they ought to have a greater percentage of the through rate than they had been getting east of Chicago. The proportion allowed was 22 per cent., and they wanted 27½ per cent., which would be somewhere in the neighborhood of an actual prorate. The lines west of Chicago were unwilling to concede this demand. The trunk lines dropped their interest in the business, and made no effort, and were of no assistance whatever to the lines between Chicago and Ogden, to get the Atlantic coast business for California. In fact, the action of the trunk lines practically forced these western lines out of the business, and it was the action of the trunk lines which, during the latter part of 1885 and 1886, gave the Sunset route the large proportion of the traffic from the Atlantic coast to the Pacific coast.

FREIGHT TRAFFIC VIA NEW ORLEANS.

In 1886 the freight traffic via New Orleans ran up to a very large percentage of the New York City business, although not of the total business. Of the business between New York and San Francisco, which amounts to only about 30 per cent. of the total through business, the Sunset route carried somewhere in the neighborhood of 85 to 95 per cent. While you hear the statement that that route takes from 85 to 95 per cent. of the through business, it does not mean the total freight business, but simply the New York City business, which amounts perhaps to less than 30 per cent. of the total business. As I have explained, the effect of that action of the trunk lines last year in drawing out of this business and refusing to have anything to do with it, was to throw the traffic to the Sunset route.

The contract with the Pacific Mail Steamship Company had been annulled, and that company was in the open market for freight. The transcontinental association had dissolved. and there was no agreement

as to the maintenance of rates. The Northern Pacific and the Canadian Pacific were completed and entered the market, so that rates were reduced to an unprofitable basis between New York and San Francisco. The lines via Chicago dropped out of the business, and left to the Sunset route the burden of fighting against the Pacific Mail, Cape Horn, the Northern and Canadian Pacific.

DIVERSION OF TRAFFIC BY "SUNSET" ROUTE.

Q. What percentage of the traffic going west has been diverted by the Sunset route from the Central and Union Pacific?—A. I do not understand your use of the term divert.

The CHAIRMAN. I want to know, since the construction of this line, what percentage of the freight has taken that course as compared with the time when it was seeking the Central and Union Pacific going east.

The WITNESS. Do you want to know what percentage has gone that way?

Commissioner ANDERSON. Yes.

The WITNESS. I do not understand your use of the term divert. However, will you permit me to answer that by referring to one of the communications of Governor Stanford? He has made you a statement which will show you all these things. I cannot answer from memory.

Q. Is it stated in full in Governor Stanford's communication?—A. I think it is. You can get it accurately there.

Q. What percentage of the business that used to come over the Central and Union Pacific now comes over the Sunset? If I remember your statement, it shows the percentage of the Central and Union Pacific which comes over the other transcontinental lines.—A. It includes every line, and gives them separately. There is a table there which gives each route separately and the amount of tonnage. My recollection is that that is just as full and complete an exposition as you want. If you find that it is not I will try and give it to you.

By the CHAIRMAN:

Q. Does that show the percentage for each line?—A. Whether the percentage is figured out or not I do not know. It shows the charges and the tonnage. It shows how much went by the Northern Pacific, how much by the Oregon Short Line, how much by the Union and Central Pacific; in fact, I think it gives you just what you want to know.

STATEMENT REGARDING TRANSCONTINENTAL LINES.

By Commissioner LITTLER:

Q. I wish you would state to this Commission the number of through or transcontinental lines having direct connection between San Francisco and New York, giving the names of the lines and the several roads which go to make up the lines, and the number of miles of each road, so that we may be able to understand which is the shortest route from San Francisco to New York, and so that we may be able to understand the important intermediate points at which through freight touches between here and New York. Can you do that?—A. Yes; I can get it up. It is very easy so far as west of Chicago is concerned, but rates are made sometimes over routes which are very circuitous.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Friday, August 12, 1887.

Afternoon session.

JOHN C. STUBBS, being further examined, testified as follows:

CANADIAN PACIFIC AND CONNECTIONS.

By the CHAIRMAN:

Question. Can you answer that last question now?—Answer. We will begin on the north. We will call the first line the Canadian Pacific line. The Pacific Coast Steamship Company operate vessels between San Francisco and Port Moody, British Columbia, there connecting with the Canadian Pacific proper, which connects at the boundary line between the United States and Canada or thereabouts with the Manitoba road running north from Saint Paul. The latter road connects at Saint Paul with the northwestern lines, principally the Chicago and Northwestern Railway, the Chicago, Milwaukee and Saint Paul, the Chicago, Burlington and Northern, and the Chicago, Rock Island and Pacific. The latter road has not its own road clear through to Saint Paul, and I cannot give you the little roads that it connects with. These are the principal ones. That will make the line to Chicago, and, of course, at Chicago it connects with all the trunk lines, which I will describe hereafter.

By Commissioner LITTLER:

Q. Let me ask you, before passing, what is the length of that line?—A. I cannot give it to you without referring to the Guide.

Q. Is that the longest line from here to New York?—A. Let me go on with that first line. The Canadian Pacific, the line I have described, would be used for Chicago and the West and Northwest. Its New York line would be continuing on the Canadian Pacific proper, on to Montreal, thence down to a connection with the Utica and Black River Railroad.

NORTHERN PACIFIC AND CONNECTIONS.

Line No. 2 we will call the Northern Pacific line, which would commence at San Francisco by the steamers of the Pacific Coast Steamship Company, the Oregon Railway and Navigation Company to Tacoma, and then the Northern Pacific road from Tacoma to Saint Paul, there connecting with the northwestern roads that I have named, running between Chicago and Saint Paul, and at Chicago connecting with the great trunk lines East. They also make a line by running to Duluth on Lake Superior.

THE OREGON SHORT LINE AND ITS CONNECTIONS.

Q. Does the Northern Pacific road touch the Pacific coast?—A. Yes, sir; it has completed recently a line to Tacoma on Puget Sound.

The third line we will call the Oregon Short Line. It will be made by steamers and railroad as follows: The steamers of the Oregon Railway and Navigation Company between San Francisco and Portland, and the Oregon Railway and Navigation Company's railroad from Portland to Huntington, Idaho, there connecting with the Oregon Short Line to Granger, Wyo., and there connecting with the Union Pacific

road from Granger to Omaha or Council Bluffs, where it conne with the Iowa lines, namely, Chicago, Milwaukee and Saint Pa Chicago and Northwestern, Chicago, Rock Island and Pacific, Chica Burlington and Quincy, and other routes that could be made by goi south; but those are the principal ones running between Council Blu and Chicago. There they connect with the trunk lines East, which shall name hereafter.

CENTRAL PACIFIC, UNION PACIFIC, IOWA, AND OTHER CONNECTION

The fourth line is the Central Pacific Railroad, San Francisco to O den; the Union Pacific Railroad, Ogden to Council Bluffs, there co necting with the Iowa lines that I have named, running between Cou cil Bluffs and Chicago, and at Chicago connecting with the trunk lin

CENTRAL PACIFIC, DENVER AND RIO GRANDE AND CONNECTIONS

The fifth line would be the Central Pacific, from San Francisco Ogden; the Denver and Rio Grande Western, from Ogden to the li between Utah and Colorado; the Denver and Rio Grande Railroad, fr that line to Pueblo and Denver. At Pueblo, Colo., it connects with t Atchison, Topeka and Santa Fé, and at Denver it connects with the B lington and Missouri River of Nebraska, between Denver and the M souri River, the latter road connecting at the Missouri River with t Iowa lines that I have already described; the Atchison, Topeka a Santa Fé running from Pueblo City to Kansas City and Atchison, the connecting with the roads I have described running from that poi to Saint Louis and Chicago.

ATLANTIC AND PACIFIC AND CONNECTIONS.

The sixth line would be the Atlantic and Pacific line, made up follows: Central Pacific road, San Francisco to Goshen; Southe Pacific Railroad, Goshen to Mojave; the Atlantic and Pacific road, fr Mojave to Albuquerque, in New Mexico; the Atchison, Topeka a Santa Fé, from Albuquerque to Kansas City, principally, but to Atc ison also, there connecting with the Chicago, Rock Island and Pacif for Chicago; the Chicago, Burlington, and Quincy, for Chicago; t Chicago and Alton, for Chicago; the Missouri Pacific, for Saint Lou and the Wabash, Saint Louis and Pacific, for Saint Louis. Those a the principal lines.

Q. Where is Mojave?—A. It is about 383 miles south of San Fra cisco. It is the junction point of the Atlantic and Pacific with t Southern Pacific road.

CENTRAL PACIFIC, SOUTHERN PACIFIC OF CALIFORNIA AND ATCH SON, TOPEKA AND SANTA FÉ.

The seventh line would be the Central Pacific Railroad, from S Francisco to Goshen, Cal.; the Southern Pacific of California, fr Goshen to Deming, N. Mex.; the Atchison, Topeka and Santa Fé ro from Deming, N. Mex., to Kansas City, Mo., and Atchison, Kans.

CENTRAL AND SOUTHERN PACIFIC AND CONNECTIONS.

The eighth line would be the Central Pacific Railroad, from San Fra cisco to Goshen; the Southern Pacific road, from Goshen to El Paso.

the State of Texas; the Texas and Pacific road, from El Paso to its connection with Gould's southwestern system; the Missouri Pacific lines, running from Sherman, which I think is the principal point in Texas, to Saint Louis; then they also have a line—call it the same line—from El Paso, on the Texas and Pacific road, to New Orleans, there connecting with steamers, principally the Cromwell line, between New Orleans and New York; they also have a line, the Texas and Pacific, to its connection with the International and Great Northern, running south to Galveston, on the Gulf of Mexico, and there connecting with steamers between Galveston and New York, notably the Mallory line.

THE GREAT "SUNSET" ROUTE.

The ninth through line would be what is known as the Great Sunset route; the Central Pacific Railroad, from San Francisco to Goshen; the Southern Pacific Railroad, from Goshen to El Paso, Tex.—I am giving you the names of the roads proper—the Galveston, Harrisburg and San Antonio road to Houston, Tex.; the Texas and New Orleans road, from Houston to its connection with the Louisiana Western; the Louisiana Western, to Lafayette, La.: Morgan's Louisiana and Texas Railroad, from La Fayette to New Orleans; Morgan's Louisiana and Texas steamships, between New Orleans and New York.

PACIFIC MAIL STEAMSHIP LINE.

By Mr. COHEN:

Q. Is that all?—A. Those are all the railroad lines. The next line is the Pacific Mail Steamship Company, operating vessels between San Francisco and Panama, then over the Panama Railroad to Aspinwall or Colon, and then by steamer from Aspinwall or Colon to New York. Then the worst of the whole crowd is the line made by sailing vessels following the Cape Horn route between San Francisco and New York.

By Commissioner LITTLER:

Q. Do you mean the worst competitor?—A. The worst competitor. That is the controlling factor in rates. From Chicago to New York the principal lines are what are known as the Pennsylvania lines. Do you want the roads named particularly?

Commissioner LITTLER. No, sir; I think the average member of Congress will understand how freight gets from Chicago to New York.

The WITNESS. Very well; I need not state them.

THE SHORTEST LINE.

Commissioner LITTLER. The object is to inform members of Congress as to how freight is transported from the Pacific coast to New York by the different routes.

The WITNESS. The shortest line in point of mileage—I have forgotten the number of the route, but I think it is No. 4—is composed of the Central Pacific, Union Pacific, Chicago and Northwestern, Pittsburgh, Fort Wayne and Chicago, and Pennsylvania Central.

Q. Is that the shortest road?—A. That is the shortest road.

Q. Can you give the number of miles right there?—A. Will you foot it up for me? From San Francisco to Council Bluffs is 1,915 miles; Council Bluffs to Chicago, 488 miles; Chicago to New York, 913 miles; total, 3,316 miles. Now, that can be reduced by the difference between

33 and 83 miles. That is, the Central Pacific distance is based on 883 miles between San Francisco and Ogden. That is the aided line, while the actual distance via Benicia and Sacramento would be 833. But all divisions of rates are based upon the first mileage I have given you. The shortest route in the matter of economy and cost of carrying freight is, of course, the sailing vessels. Next to that is the Pacific Mail Steamship Company.

Q. Will you give us the lengths of these other railroad routes that would be entirely by rail?—A. I cannot give you that without referring to the Guide, but I will have it made up.

CENTRAL PACIFIC AND UNION PACIFIC CAN COMPETE WITH OTHERS.

Commissioner LITTLER. What Congress will want to know is whether the Central Pacific and Union Pacific occupy such relations to the traffic of the Pacific coast that they can compete successfully with any other road from here to New York.

The WITNESS. It does it and has done it.

Commissioner LITTLER. That is one of the important questions to be considered in any further legislation that may take place in relation to this matter.

The WITNESS. It is the shortest route, and, in my judgment, with proper management, it is the best route, and always will be.

NOT THE MOST ECONOMICAL ROUTE.

Q. Is it your judgment that it is the most economical route?—A. I think not.

Q. Barring the water routes?—A. No, sir; it is not. The cost of the management of that road will be greater perhaps than any other road that I know of. There is no line that has any such work to do as the Central Pacific has in crossing the Sierra Nevadas. There is no other line except the Denver and Rio Grande that has any such work as the Union Pacific has to do in crossing the Rockies. But that is a matter that in going over the road you can determine better than I can tell you.

RELATIONS OF THE GOVERNMENT WITH CENTRAL PACIFIC.

By the CHAIRMAN:

Q. During the time that special rates were being offered to shippers under special contract for the purpose of securing their business as against the water line, and in order to secure the control of their freight, can you recall whether the Government was notified that special advantages would be given to it by reason of shipping by rail?—A. I never gave the Government that notice, and I do not know that any one did.

Q. Do you know at that period whether the Government shipped by any other way except by rail?—A. I would not state definitely, but I am under the impression that there has been no time but what the Government has brought supplies by way of Cape Horn or by other routes.

Q. During that period while you were offering special rates under contracts and agreements with shippers at a lower rate than the open public rate, you were charging the United States Government the open public tariff rate, were you not?—A. I cannot tell you whether we did that or not. I did not make up the accounts. I do not know whether we did or not.

Q. Do you recall any period when the Government was charged a less rate for which the Central Pacific was credited in their accounts than the open public tariff rate?—A. I never made up an account against the Government, and never saw one after it was made up. I never have seen the vouchers or the settlements for any period, or for any service between our company and the Government, so I am not able to answer that question.

AMOUNT OF GOVERNMENT FREIGHT.

Q. The Government freight over the Central Pacific during the past years has amounted to millions of dollars, has it not?—A. Really I could not give you any definite answer to that question. I do not know what it has amounted to.

Q. Do you know whether it has amounted to more than $1,000,000?—A. I could not say. I could not tell you whether it was more than $100,000 to my own knowledge. It is a matter that has not been in my charge, and I have had no occasion to refer to it or consider it at all.

Q. Is not the Government freight placed under your department?—A. You may say, practically, that it is not. In some respects I might have occasion to give instructions about it, but so far as the rates charged to the Government or the settlements made between the company and the Government are concerned I am not able to testify. My impression is, and it is gathered from other sources and hearsay, that the Government has generally settled pretty much on its own terms with us.

Q. Do you regard an overcharge by way of arrangement, such as you stated this morning in your testimony, as a rebate?—A. I do not know any other distinction to make between overcharges and rebates than that.

MEANING OF "REBATE."

Q. Will you please define to the Commission what you understand by the term "rebate," as it is understood by railroad men?—A. I should understand that to be the reduction of charges that have been billed at open or general tariff rates to a rate or an amount previously agreed upon. That is what I mean when I use the word rebate. To give you an illustration, if I should make a contract with you, that in consideration of your shipping 10,000 tons of freight over our road between certain points for a certain sum, say $20 a ton, and that was $1 a ton less than the ordinary rate, I would not bill that freight at the net rate agreed upon, because I have no security that you are going to perform your part of the contract; therefore would bill it at the full rate and you would pay the charge on it, and after you had shipped your 10,000 tons and performed your part of the contract then a voucher would be made and the difference, or the rate of $1 a ton between the charges as billed and the charges as agreed upon, would be refunded to you. That I would call a rebate of $1 a ton.

OVERCHARGES ARE REBATES.

Q. Then do I understand that the overcharges that are entered in the refund books by way of arrangement under contract that you stated this morning are in the nature of rebates?—A. Certainly. Please read that question again. I want to be a little exact about terms. I think that I have made sufficiently clear what I call a rebate. I do not know whether I want to adopt your language or not.

(Question repeated.)—A. Permit me to say that I do not know that any entries are made of moneys returned by way of arrangement as overcharges; but if there are any such entries in the book, if there are any overcharges made and refunded by previous arrangement, that is an understanding previous to the shipping of the freight, that the charges were to be less than the charges as they were billed. I should call that a rebate.

REBATES ARE DEDUCTED FROM GROSS EARNINGS.

Q. Then we understand each other, I think. Are the rebate settlements deducted from what are denominated as gross earnings before the gross earnings are reported for the purpose of making up the net earnings?—A. I do not make up those accounts, but I should say certainly they are. They ought to be if they are not. As I understand it, overcharges and rebates are chargeable to freight account. The freight earnings accounts would be debited with any rebates or overcharges there were, so that by the annual reports where it says "gross earnings," that means earnings less the rebates that are paid.

Q. I call your attention to the annual report in 1884. Gross earnings, $22,166,108.28; also the statement of gross receipts as furnished to the Commission in an exhibit, 1884, same year, $28,977,877.14, or a difference of nearly $7,000,000. Can you say from your knowledge what proportion of that difference was made up of rebate payments?—A. I could not give you the least idea. I should say a very small proportion of it, but I would not pretend to be accurate about it. Mr. Wright would be a better witness.

LARGEST PROPORTION OF OVERCHARGES IS ON THROUGH FREIGHT.

Q. Would the sum that I read to you in the paper handed to you this morning of $1,060,275.92 be a fair proportion of the charge for rebates deducted before the gross receipts are made up?—A. No, sir; in the first place I do not believe that in 1884 the Central Pacific paid any such sum as $1,000,000 in overcharges or rebates. I may be mistaken about that. It may be, but I cannot tell. It must include other charges. You will understand this, that my impression is that by far the largest proportion of the overcharges or rebates paid by the Central Pacific Railroad Company, or the Southern Pacific Company, or by whatever company controls these lines now, is on the through freight, and, as a rule, when they pay they advance the money for the whole line, from New York or from the shipping point to destination, and then distribute that money on the voucher, and charge back to each of the connecting lines its proportion of such overcharge. When it is first entered in our accounts it would appear on the claim register, and it would appear that the whole amount was paid by the Central Pacific.

Q. What item would enter into the difference in the sum of $7,000,000 other than rebates?—A. I think that the auditor would be the best man to answer that question. I can give you my impression, however.

CHARGES AGAINST EARNINGS ACCOUNT.

Q. Are not such things as freight charges by way of rebates, pool settlements, and terminal settlements and settlements by way of agreements with other roads all under your department?—A. Practically, yes, sir. I will say that I would not pretend to account for that differ-

ones. A very simple explanation no doubt can be had by calling on the general auditor, or whoever made that statement for you, to explain it; but as I read that he says that no charges to earnings account of any kind had been considered. I have already explained that overcharges and rebates would be a charge against earnings account; so would any pool settlements that we have made. For instance, in the transcontinental pool, if these lines had carried more than their allotment, and they had to pay $100,000 of their earnings into the pool, to be distributed to the other parties in the pool, that would be a charge to the earnings account. Likewise, payments to the Pacific Mail Steamship Company, under the agreement with the Pacific Mail Steamship Company, as you perhaps know from the contest between the Union Pacific road and the Government, would be charged against earnings account.

RETURNS MADE TO THE GENERAL AUDITOR.

Q. Are the returns from your department made to the general auditor of all these differences?—A. Yes, sir; after the freight is delivered or the passenger landed I have nothing to do with the accounts. When it is turned into money, then it becomes a question of accounting with the treasurer's department, and I have nothing to do with that. I do not handle any coin except my own, and that is very little.

Q. What arrangement had you, if any, with reference to the freight of the Contract and Finance Company as to rates?—A. I never had any arrangement; that is, I never made any arrangement with the Contract and Finance Company.

SPECIAL RATES TO CONTRACT AND FINANCE COMPANY.

Q. Was there an arrangement with the Contract and Finance Company for the shipment of its material?—A. I believe that the Contract and Finance Company had rates, special rates.

Q. Was there a written agreement?—A. That I do not know.

Q. What was the difference between the rate of the Contract and Finance Company and the general open public rate?—A. I cannot tell you that. The closest approximate that I could make to a fair answer to your question would be that, as I understand it, the Contract and Finance Company's freight was billed at the rate of 2 cents per ton per mile.

Q. Who made the rates for the Contract and Finance Company?—A. I think that the directors of the company made them.

Q. Did the directors of the company issue an order to you?—A. I think my orders either came from the controller or the general manager directly.

Q. What kind of an order did you get?—A. I think it was oral in every case.

WESTERN DEVELOPMENT COMPANY'S RATE.

Q. What contract with the Western Development Company had you?—A. As I understand it, the Western Development Company's freight was carried at the Contract and Finance Company's rates, 2 cents per ton per mile.

Q. Was there any written order with reference to the rates charged the Western Development Company?—A. I think not. I think I never got a written order. In fact, it is very seldom that I get written orders on anything.

SOUTHERN DEVELOPMENT COMPANY'S RATE.

Q. What was the arrangement, if any, as to the freight with the Southern Development Company?—A. I do not know as to that, but my impression is it was the same as the Western Development Company and Contract and Finance Company. I do not know that the Southern Development Company ever did any work on the line west of El Paso. I guess that was altogether east.

The CHAIRMAN. I do not know how far they have entered in the construction of branch lines.

The WITNESS. I think it was altogether east of El Paso. I would not be certain about it, however.

Q. However, the rates given by the Central Pacific Company to the Southern Development Company are the same as those given to the Contract and Finance Company, are they not?—A. That is my impression. I think I am almost sure of that, so far as my memory goes. I think it has always been 2 cents per ton per mile, and that is the last I know of it; and that, by the way, is a pretty good rate.

PACIFIC IMPROVEMENT COMPANY'S RATE.

Q. What was the arrangements with the Pacific Improvement Company?—A. I think the same as with the Western Development Company.

Q. Were the rates that you have named lower than the special contracts that you have made as distinguished from the open published rate?—A. I think so far as through freight is concerned that those companies, if they ever did import anything, paid the open tariff rate, although I am not sure about that. Probably the difference between the open tariff rate and 2 cents per ton per mile was refunded afterwards, but I cannot imagine their importing any freight on which the rate from the East would amount to 2 cents a ton per mile.

Q. If there were special rates, as we understand there were, allowed from time to time to the companies, and you billed the freight at the full rate, was the same process observed as in other cases?—A. So far as I know anything about it the freight was billed at the net rate in the case of these companies that you have named. There may have been some others.

ORDERS ISSUED BY CONTROLLER OR GENERAL MANAGER.

Q. We will come down to that in a minute. We want to get this matter settled first. Were all orders with reference to the companies that you have named received from the president or board of directors?—A. I am under the impression that all orders that I received regarding the rates to be charged to these companies came from the controller, Mr. Miller, or from Mr. Towne, the general manager. I do not think that they ever came to me from the directors or the president.

TRANSACTIONS WITH SISSON, WALLACE & CO.

Q. Have you had as freight manager of the Central Pacific business transactions with Sisson, Wallace & Co.?—A. Sisson, Wallace & Co., I think, have always been shippers over the roads. I do not remember any particular transaction, but I suppose I have come in contact with them.

Q. In what kind of business are they engaged?—A. As I understand it, they furnished supplies to the laborers along the road while we were constructing it. They supply the Chinamen with food, clothing, &c. They are storekeepers along the line of the road. They furnish the general supplies that gangs of laborers would require for their support.

Q. Have they a place of business in San Francisco?—A. I understand that they have an office here.

Q. Do they furnish supplies to these men?—A. I understand that is the arrangement.

Q. Do they furnish the men?—A. I could not speak positively, but I think that they have been in that sort of a business.

Q. Have you a special arrangement with them as to passenger and freight rates?—A. I do not know as to passenger rates. I do not know that there have been any rates made to them for transporting laborers or Chinamen that would not be made with anybody else carrying the same number and the same class of laborers, and I do not remember of their ever having any special freight rates. I do not think that they ever had.

Q. Have you had a contract with them as to rates of freight on their supplies?—A. I never have; no, sir.

Q. Have they made application to you for special rates? I am speaking of the time prior to the 1st of April.—A. They may have done so, but I cannot remember it. I do not remember of there being any reasons why we should make any special rates for them. I do not know that we have ever done it.

The CHAIRMAN. I am not questioning the reason of it; I only want to know the fact.

The WITNESS. I cannot remember. You know my experience with this railroad covers a great number of years and I have met with all classes of shippers, and it would be utterly impossible for me to recall everything.

NO CONTRACT WITH SISSON, CROCKER & CO.

Q. Are you acquainted with the firm of Sisson, Crocker & Co.?—A. That is the successor to Sisson, Wallace & Co. I understand.

Q. In what kind of business are they engaged?—A. Whatever I have said with relation to Sisson, Wallace & Co. applies equally to Sisson, Crocker & Co.

Q. Who is the Crocker member of this firm?—A. I believe it is Mr. Clark Crocker.

Q. How is he connected with Mr. Charles F. Crocker, the director of the Central Pacific?—A. Really I could not say. I understand that he is a brother, but I could not swear to it.

Mr. COHEN. To Charles F. Crocker?

The WITNESS. Did you say Charles F. Crocker?

The CHAIRMAN. Yes, sir.

The WITNESS. If current report is true he would be his uncle.

Q. Have you made any special contract or agreement with Sisson, Crocker & Co.?—A. I think not.

Q. Have Sisson, Crocker & Co. had any special rates at any time below the opened published rate?—A. I cannot remember that they have had. If they had it is not within my knowledge.

VOUCHER 1960 OF PACIFIC IMPROVEMENT CO.'S ACCOUNT.

Q. I call your attention to an entry in the book of "disbursements of overcharge and loss-and-damage vouchers" for the month of Febru.

ary, 1884, page 24, voucher 1960, March 3, Pacific Improvement Company account, $621.06. Will you please examine and say whether that is an overcharge or a rebate on the open-tariff rate?—A. I never saw the voucher. It is entered as an overcharge, and all the information that I have regarding it you have in this book.

Q. Would the entry be made if it was a rebate in any other way than an overcharge?—A. My impression is that it may be freight that was billed at a higher rate than the 2 cents per ton per mile that I spoke of, although I could not say positively.

NO SPECIAL RATE TO BALFOUR, GUTHRIE & CO.

Q. Do you know the firm of Balfour, Guthrie & Co.?—A. I do.

Q. Are they wheat dealers?—A. Yes, sir.

Q. Have you made a special contract with that firm as to freight rates?—A. I do not know of any.

Q. Are they shippers of wheat?—A. They are receivers of wheat; they are dealers in wheat.

Q. Then would their freight charges be largely for the shipment of wheat?—A. Yes, sir; on wheat. Whatever charges they paid would be on wheat. I do not understand that they paid the charges. I suppose that the farmers paid the charges on consignments to them.

Q. Have you given to that firm any special rate?—A. I think not; I am not aware of any at all.

"LOSS AND DAMAGE" VOUCHERS 5, 6, AND 7.

Q. I call your attention to, and I ask you to explain, an entry in book No. 1 of the same title as the book quoted above for the month of January, 1884, page 1, vouchers 5, 6, and 7.—A. That explains itself—"loss and damage." We paid a claim for damaging the wheat, I suppose.

The CHAIRMAN. Let me read it and then you can explain it.

The WITNESS. I beg your pardon, sir.

The CHAIRMAN. I am asking you for an explanation. "Balfour, Guthrie & Co., L. D., wheat, $1,487.81, voucher No. 6." "January 10, Balfour, Guthrie & Co., L. D., wheat, $3,624.17." "January 10, Balfour, Guthrie & Co., L. D., wheat, $492.63." Will you please examine the entry and explain it?—A. All the explanation that I can give is the fact that, in the column of on what account this was paid, it was entered L. D., wheat, which means loss and damage to wheat.

Q. What would be the character of the damage or loss?—A. I never saw the vouchers. It might have been a total loss, or it might have been a partial loss.

ENTRIES MADE FOR DAMAGES.

Q. Could it have been a wreck?—A. It might have been. I cannot give you any further information on the subject. Show me the voucher and I can explain it to you.

Q. Then the entries made in this book are not only the overcharges, by way of error and by way of rebate, but for damages arising by way of wreck. Are those also entered in here?—A. As I understand it.

The CHAIRMAN. Whatever the damage may be, we want to know what is in the book.

The WITNESS. As I understand it, the book which you show me exhibits the disbursements of overcharge and loss and damage to freight, vouchers for the month of January, 1884, on that page.

Q. So that such entries would be made in here, would they?—A. Yes, sir.

CONTRACT WITH HAWLEY BROTHERS.

Q. Do you know the firm of Hawley Brothers?—A. I do not know of any such firm now, but I know the firm which you mean. It is the Hawley Brothers Hardware Company.

Q. When were you acquainted with them?—A. I know them now.

Q. When were they a firm.—A. I want to be certain. Hawley is a common name here. There has been a Hawley a grocer, and I could not remember whether it was Hawley Brothers or Hawley, the grocer. The style of the firm that I know, and to which I think you refer, was Marcus C. Hawley & Co. Within a few years it has been made a joint-stock company, under the title of "The Hawley Brothers Hardware Company."

Q. In what business are they engaged?—A. They are dealers in agricultural implements, hardware, and wagons.

Q. Have you a special contract with that firm or company with respect to rates?—A. No, sir; we have not.

Q. Have you ever had?—A. We have had.

Q. When did that contract terminate?—A. I think it ended with December 31, 1884. I think that was the time that we abandoned what we called the contract plan, and this firm had one of those contracts.

Q. What rate had the firm under the open published rate?—A. I could not tell you; it was the rate that others in that line had. I am not sure now that Hawley Brothers & Co. had a contract with us in 1884; I am trying to recall whether they did not refuse to contract during the last year; I am not sure about that.

"OVERCHARGE BY WAY OF ERROR."

The CHAIRMAN. I call your attention to the same book, January, 1885, page 164. January 8, Hawley Brothers, $448.20, and I ask you to examine and say whether that is for a rebate, overcharge, or an overcharge by way of error.

The WITNESS. My impression would be that that would be an overcharge by way of error; I would not swear to it, though, without looking at the voucher.

Q. How would you distinguish in this book, if you can, what are overcharges by way of error?—A. I could not possibly do it; I would have to see the voucher itself in order to determine that question.

Q. Can you determine by the voucher whether it is an overcharge by way of rebate or by way of error?—A. I think I can.

CONTRACT WITH J. W. DOANE & CO.

Q. Was the firm of John Doane & Co., shippers over the Central Pacific, allowed a special rate?—A. I do not know the firm; I have forgotten them if I ever did know them.

Q. Had you any special contract with any such firm?

The WITNESS. Do you mean J. W. Doane & Co., of Chicago? We had years ago a special contract with J. W. Doane & Co. for teas between China and Japan ports and Chicago, conditioned on their shipping 50,000 packages of tea per year over our road. Our rate on a certain number of packages was so much, and on a larger number of packages would be so much less; on a still larger number of packages a still less rate would be charged. On performing their contract to ship

the full number of 50,000 packages in any one tea season, the lines between Chicago and Yokohama, Japan, and Hong Kong and Shanghai, China, refunded a certain rate according to the amount.

Q. Was that agreement in writing?—A. I think it was; yes, sir.

Q. How long did the arrangement continue?—A. Two years, I think; possibly three. I do not think it was longer than that.

Q. What was the difference in the rate charged under the arrangement and the public rate?—A. I could not tell you, for there was never any public rate on teas. We must take what we can get from our competitors, the English lines, the Suez lines. We made that contract, the object being this—will you permit me to explain?

The CHAIRMAN. Certainly.

ARRANGEMENTS AS TO TEA TRAFFIC EXPLAINED.

The WITNESS. At the time we entered this Asiatic trade New York was the tea market for the United States. All teas reaching the United States had to go through New York, either via Suez or via the Pacific Mail Steamship Company, to San Francisco, thence via Panama to New York. We met the conditions as we found them, and I believe for awhile carried a lower rate to New York than to Chicago, because Chicago was a thousand miles inland and we could get a higher rate. The rates, we will say, for example, from Shanghai and Hong-Kong to New York were governed by the rates via Suez or by sailing vessels to New York. To reach Chicago, of course the tea had to pay an additional rate for rail service between New York and Chicago. That gave us by so much an advantage in reaching Chicago. I believe we charged a slight advance for direct shipments to Chicago over the rate for direct shipments to New York, although the New York tea was carried through Chicago and a thousand miles farther. After awhile it was decided that that was not good policy, and we adopted the plan of making the rates to Chicago no higher than those to New York. Thereafter we charged the same rates to Chicago as to New York. About the time that we entered into this contract with Doane he represented that he was, and I guess he was, the largest tea importer in Chicago, and that he was getting the largest proportion of his teas via Suez and through New York. He would ship what he needed for immediate consumption by the short route via San Francisco, and then later in the season, when the low-priced teas came into market, he would ship via Suez, but that was some disadvantage to him and he thought he could not only increase his shipments through San Francisco but largely assist in making Chicago a distributing tea market as against New York if we would make him lower rates. It was to our interest, that is, the interest of the lines west of Chicago, to have Chicago become a tea distributing market as against New York, because we removed the tea a thousand miles from our water competitors; hence we made the contract with J. W. Doane & Co., fixing the rate upon the amount of tea that they shipped. I believe there was to be one rate charged to them in case they shipped 20,000 packages within the tea year. That, we will say, would run from May 1st to April 30th. Then it was graded up to 50,000. There was another rate for 30,000, and another rate for 40,000, and still another rate for 50,000. That is my impression.

Q. Did the larger shipper therefore receive a more advantageous rate than the smaller shipper?—A. During that time J. W. Doane & Co., I believe, in every case shipped their full quota and did receive a lower rate than the ordinary rate or than the other consignees at Chicago

who shipped a smaller quantity and who were free to avail themselves of the other routes.

READY TO GIVE THE SAME CONTRACT.

Q. Can you name any other firm in Chicago that received that rate?—A. I do not know whether we made that contract with any other firm or not. I think not. I think there was one firm there, perhaps two, that wanted the same rates as Doane, but they were not able to comply with the conditions, or refused to comply with the conditions of the Doane contract. We were always ready to give any man the same sort of a contract.

Q. The failure to comply was because the applicant was limited in the quantity, as I understand, that he desired to ship, and it did not reach your figures. Is that the case?—A. Yes, sir; he did not wish to ship that quantity by this route, but whether that quantity was beyond his reach or not I am not able to state. He may have wanted to ship the larger portion of his goods via Suez.

ARRANGEMENT WITH CALIFORNIA SUGAR REFINERY.

Q. Had the Central Pacific Railroad Company a contract with the California Sugar Refinery as to freight rates?—A. I do not remember whether we had a written contract or not. We had an arrangement with the California Sugar Refinery, at the time when it was the only refinery doing business here, whereunder we took sugar from San Francisco to the Missouri River at, I believe, 50 cents a hundred pounds, conditioned upon their shipping 5,000,000 pounds the first year, I think. I would like to explain that.

The CHAIRMAN. Certainly.

HISTORY OF THE SUGAR TRAFFIC.

The WITNESS. For a long time the California Sugar Refinery was the only refinery in operation here at San Francisco. It was the only refinery in operation on the Pacific coast. Previous to the Hawaiian treaty, which admitted sugar from the Hawaiian Islands duty free, they got their supplies of sugar from the Sandwich Islands and from Asiatic ports, but only in sufficient quantity to supply the Pacific coast. After the treaty was made it stimulated the production of sugar in the islands so that the output all sought a market in the United States because of its adjacency and because of the duty-free privilege granted by the treaty. The Pacific coast demand, that is, west of the Rocky Mountains, was not sufficient to take the supply. Sugar is a very low-class article, put down fourth or fifth class and sometimes into special class rates. The ordinary rate for sugar from New York to the Missouri River was about 50 cents a hundred pounds. That was at a time when they were maintaining rates during the peace period between the lines east of Council Bluffs, but there has scarcely been any long period during any year since I have been connected with the railroad business when they have maintained those rates; so I suppose that on an average—and we have acted on that presumption, which is very nearly correct—the cost of transporting sugar, that is, the amount charged for transporting sugar from New York and Boston and Philadelphia to the Missouri River points was about 40 cents per hundred pounds. The refiners of California, which was then the California Sugar Refinery, had to find a market for this sugar, else it would be transported in

the raw state direct from the islands to New York and there be refined and distributed back. That market had to be found east of the Rocky Mountains, and they represented, and I believed it, that it was necessary that we should put the sugar there at a rate of $10 a ton, which is about one-half a cent a ton per mile. In order to open the market east of the Rocky Mountains, and to make sure that we were going to get some business out of it that would amount to something, I believe we offered the owners of the California Refinery that if within twelve months they would ship 5,000,000 pounds (I believe they guaranteed five and did ship ten) we would carry sugar to the Missouri River at 50 cents per 100 pounds. They met the conditions of the rate, and we have continued it right along from that date. We gave the same rate to the American Sugar Refinery as soon as it was opened. We made no discrimination between the refineries, but continued the rate to both refineries until the passage of the interstate commerce act. Then we discontinued the rate, pending the action of the United States Commission in suspending the operation of the fourth section of that law. In the mean time, during the period that we withdrew that rate, the Canadian Pacific came into the market and took the sugar which had formerly gone over our road to the Missouri River at, say to Saint Paul, 50 cents, and to Omaha and Kansas City at 50 cents. We at first thought they could not do it, but they did it. They moved 900 tons in one month to Kansas City and Omaha and Saint Joseph. The fourth section of the law was suspended, and then we put in a rate of 60 cents per 100 pounds, thinking that we would get a little more money out of the business than we had been doing before, and that rate is now carried. This voucher I suppose represents the difference between the charges as billed and the contract rate.

Q. That is to say, you charged the full open rate and then the refund was made here as appears from time to time?—A. I do not remember the rate at which the sugar was billed, for this reason: That possibly when that sugar business was first inaugurated, we did not have any rate in our tariff because there was no such business. There was no need of providing for it. I think it is more than likely that we billed it at some higher rate, because we did not propose to accept the 50-cent rate unless they (the refineries) performed their part of the guaranty and shipped the quantity stipulated.

OVERCHARGES ON SUGAR EXPLAINED.

Q. I call your attention to the entry in the same book mentioned above for the month of January, 1884: February 6, page 23, "California Sugar Refinery, O. C., on sugar, $1,452.64;" February 6, "California Sugar Refinery, O. C., on sugar, $4,841.12;" February 6, "California Sugar Refinery, O. C., on sugar, $283.05;" vouchers Nos. 2,029, 2,030, and 2,031. Can you explain whether they were refunds made in consequence of agreements with the California Sugar Refinery?—A. My impression is that those amounts paid are the difference between the rate guaranteed under that arrangement and the charges as billed, although I would not be sure about it. We also, I think, gave them a lower rate to Denver, Colo., but it was higher than the 50-cent rate. I cannot remember exactly just what that rate was to Denver, Colo. That is on the other side.

FROM NOTHING UP TO 59,000,000 POUNDS OF SUGAR.

Q. The rate under the open, published rate was given by the Central Pacific as an inducement to secure the business, as I understand, based

upon future shipments?—A. Yes, sir; and the result of that was that the sugar business to the Missouri River has grown from nothing up to last year, I believe, there was shipped 59,000,000 pounds. I do not remember about 1884, but there was a time when we were at loggerheads with the Union Pacific on the Utah business, but whether it was in 1884, or not, I do not know.

Q. Then what did you do?—A. I do not remember whether or not it was 1884. We took all the business that we could get, and made such rates as were necessary to take it.

BUSINESS SENT OVER CENTRAL PACIFIC.

Q. Where did you send the business during that period?—A. We sent it over the Central Pacific road, of course. You must understand that Salt Lake City is between the two lines. It is considered as common territory to the two lines, the Central Pacific on the west, and the Union Pacific and the Denver and Rio Grande and the Burlington and Missouri River on the east; each strive to get that business.

Q. Did you reach Salt Lake City by way of the Central Pacific line or the Denver and Rio Grande?—A. The Central Pacific to Ogden.

Q. Then from Ogden to Salt Lake you used what line?—A. I think we have divided the business half and half between the Denver and Rio Grande and the Utah Central. I am not sure about that.

USED DENVER AND RIO GRANDE TO FORCE DOWN RATES.

Q. Has that continued since your disagreement with the Union Pacific?—A. I think that has been a rule since the opening of the Denver and Rio Grande. At the time of the opening of the Denver and Rio Grande road, or until the opening of the Denver and Rio Grande road, the only line between Salt Lake City and Ogden was the Utah Central. They had a fixed tariff at high rates—no higher than you and I would have charged if we managed the road, though, but they were arbitrary, as, perhaps, anybody would be justified in being, having a road of that character. The Union Pacific had an interest in that road. Our impressions were that they favored the Union Pacific road and charged us more for getting our freight down from Ogden than they did the Union Pacific; but as soon as the Denver and Rio Grande road was completed we used the Denver and Rio Grande road to force down the rates, and there may be a short period after the time of the opening that we gave the Denver and Rio Grande road all the traffic between Ogden and Salt Lake City. For how long I do not know, but I think it was a very short time. The Utah Central people said they were willing to do what was right, and then we divided the business. These vouchers may represent overcharges, or rebates as you call them, on Utah business that were necessary at that time.

REBATES GRANTED TO SECURE BUSINESS.

Q. Is the purpose of granting rebates on the part of railroad companies to secure the favor of shippers?—A. It is always to get business which they could not otherwise get; never to favor particular shippers as against others. I never knew a railroad company to pay a rebate when it did not have to. I am sure I never did.

By Commissioner LITTLER:

Q. Do you mean to say that that rule has no exceptions in the operations of the Central Pacific?—A. I think so. I can answer positively in my hands it never had an exception.

CONTRACT WITH BOCA BREWING COMPANY.

By the CHAIRMAN:

Q. Have you had a special contract with the Boca Brewing Company?—A. Yes, sir.

Q. When did you make a contract with that company?—A. I do not remember when it was. A gentleman by the name of Hess came here from the East some years ago. He was up on the mountains and saw the facilities for making ice there, and appreciated the fine water that is there, and conceived the idea of establishing a brewery. Of course it is in such a situation that every pound of his supplies had to go over our road, and every pound of his output had to go over our road. It had to compete here, in the San Francisco market, and elsewhere with the local brewing companies. We made the Boca Brewing Company special rates for the purpose of inducing them to erect that brewing establishment at Boca and to make business for the railroad. It was all clear gain to the Central Pacific aided line, like so much money picked up out of the ditch.

LESS THAN THE OPEN-TARIFF RATE.

Q. What was the rate to the brewing company under the general open-tariff rate?—A. I cannot tell you, but I think it was considerably less. I cannot tell you without referring to the books what the rate was.

Q. Were there any conditions as to the amount of freight that he was to ship over the road in consideration of the rate?—A. No, sir; there were none, because it was not necessary. He had to ship over the road.

Q. Were the rates fixed so that he could deliver his manufactured article of beer in this market so as to compete with the other brewers?—A. That was the object of it; but the object was to sustain that brewing establishment there in order that we might have the carriage of the barley and hops that were taken there and of the beer taken out.

Q. How long is the haul?—A. I suppose that in making the rates we were controlled almost wholly by his statement as to what was necessary. The haul is about 220 miles, something like that, from Boca to San Francisco. I would not be certain about it.

COULD COMPETE WITH LOCAL BREWERS.

Q. So that under the railroad arrangements he could manufacture beer 200 miles away from here and put it in this market and compete with every brewer here, could he?—A. We tried to effect that result.

Q. Was that the purpose?—A. Yes, sir; that was the purpose of it. At the same time the beer, such as they manufactured there, was coming in large quantities from Milwaukee, and Saint Louis, Mo., and as I remember it, Hess had an ambition to shut them out. The rates that we made on his beer would pay us better than our proportion of the through rates on this Milwaukee beer. His idea at first was to sell bottled lager beer, but the enterprise did not succeed, and with all the help that we could give him it failed.

NO CONTRACT WITH W. H. PERRY.

Q. Had you a contract with W. H. Perry of the Smelting and Mining Company?—A. I do not know of any such man.

Q. (Reading) W. H. Perry, L. & M. Co. Perhaps it is Lumber and Manufacturing Company?—A. Lumber and Milling Company, I guess it is. I think that is a lumber firm at Los Angeles.

Q. Have you had a contract with that firm?—A. I do not think we have had a contract with that firm, that related to aided lines at all. I do not remember of any.

Q. Have you given any special rates to that firm on the aided lines?—A. No, sir; I think not.

Q. Have you given any on the aided or unaided lines in the Central Pacific system?

Mr. COHEN. Do I understand that the jurisdiction of this Commission extends over the unaided as well as the aided lines?

The CHAIRMAN. You can object to my question if you wish.

The WITNESS. I will answer this question. I do not think that we ever had any contract with the W. H. Perry Lumber and Milling Company that affected either the aided or unaided portion of the Central Pacific Railroad Company's roads.

Commissioner LITTLER. What books are those?

The CHAIRMAN. The refund books of the Central Pacific Railroad. I call your attention to the entry in the same books. The Central Pacific Railroad books I am referring to.

Mr. COHEN. I made the objection because I thought the Commission has so much to do that, for the purposes of the Commission, it is hardly worth while going outside the objects and purposes for which it was appointed.

ENTRIES IN REFUND BOOKS OF CENTRAL PACIFIC.

By the CHAIRMAN:

Q. In this book on page 38, March, 1884, I find—

Voucher No. 529, March 14th, W. H. Perry, L. & M. Co., O. C. on lumber.	$2,016.91
Voucher No. 530, March 14th, W. H. Perry, L. & M. Co., O. C. on lumber.	210.08
Voucher No. 531, March 14th, W. H. Perry, L. & M. Co., O. C. on lumber.	355.80
Page 39, same book, March 14th, W. H. Perry, L. & M. Co., O. C. on lumber	148.00
March 14th, W. H. Perry, L. & M. Co., O. C. on lumber	75.00
March 14th, W. H. Perry, L. & M. Co., O. C. on lumber, &c	24.01
March 14th, W. H. Perry, L. & M. Co., O. C. on cement	500.00

Will you please examine the entries and say whether they were on account of contracts or were special rates by way of rebate allowed by the Central Pacific Freight Department or by any officer of the company in the management?—A. I am unable to say without reference to vouchers themselves whether they are overcharges in the nature of rebates, as we understand them, or overcharges the results of errors in billing.

WRITTEN CONTRACT WITH REDINGTON & CO.

Q. Have you made a contract with the firm of Redington & Co.?—A. We did have, under that general contract plan. Will you please repeat that question?

Q. Have you made a contract with the firm of Redington & Co. with reference to freight charges on shipments by them?—A. Yes, sir. Redington & Co. is a wholesale jobbing druggist firm, importers of drugs and medicine and supplies belonging to that line of trade, and is one of the firms that enjoyed the benefits of the contract plan.

Q. Had you a written contract with them?—A. I think so; yes, sir. We had printed forms that were filled up by the firms.

Q. About what time?—A. The particular years I cannot name, because I think this was one of the firms that held out for some time, previous to 1885, I think, for three and perhaps more years.

SYSTEM OF CHARGES TO DRUGGISTS.

Q. Had all the druggists the same rate?—A. I think that all the wholesale drug firms were under contract. As to whether the rates were the same to all I cannot testify definitely, because as I explained to you this matter of contract was at the beginning a dicker between the merchant and the freight agent, and we determined what rates should be charged by the showing they made as to what they were paying by all routes, including interest and insurance. I have no doubt that the first contracts that we made very often showed on the same article different rates of freights for different firms here from this fact: the interlocking of different lines of freight. Take a firm like Huntington, Hopkins & Co., for example. The item of shovels might be a very important and heavy item with them, while with Marcus C. Hawley & Co., who also carry agricultural implements and wagons, it was not so important. Then, again, some would get their shovels—I may not be happy in the choice of the articles for illustration—or whatever it might be in the West, and they could afford to pay at a higher rate than other men who got the same goods from the East. What we aimed to do was to approximate rates which upon the average would enable them to use the all rail route exclusively and to their advantage, under a guarantee of a year, rather than to take their chances in the open market and employ the three routes. That was an arrangement with each individual firm.

SPECIAL CONTRACT RATES MADE GENERAL.

Q. What was the objection to publishing the special rate if it was extended to all alike?—A. As I was saying, at the beginning the rates were not all alike, and I was trying to explain why they were so. After a time, when the contract plan became general, we published them; that is, we made a list of special contract rates, and then they became general to any one who would sign, great or small, agreeing to ship exclusively by rail.

NO ARRANGEMENT WITH WELLS, FARGO & CO.

Q. What arrangement had you with Wells, Fargo & Co. on their freight rates?—A. None whatever on their freight rates.

Q. Did you carry coke for them at the open published rates?

The WITNESS. Coke for Wells, Fargo & Co.?

The CHAIRMAN. Yes.

A. I do not remember anything of the kind.

Q. Do you recall an application, or an order, with reference to Wells Fargo & Co. on coke?—A. No, sir.

Q. I call your attention to an entry in the book of disbursements, of overcharge, loss and damage, voucher No. 2, for the month of December, 1884, voucher No. 1120, Wells, Fargo & Co.'s O. C. on coke, $1,158.03. Will you explain it?—A. I cannot explain that except upon the theory that it was a claim collected through Wells, Fargo & Co. It may be a claim assigned to Wells, Fargo & Co. They were never shippers of coke.

I think that very likely is a rebate voucher, and relates to shipments of coke to Utah. In order to compete with the coke produced upon the line of the Denver and Rio Grande road we have to carry it at very low rates. It may be possible that that was collected through Wells, Fargo & Co. or assigned to them, but I am quite positive that Wells, Fargo & Co. never shipped any coke, or could not have any interest in coke, except in that way.

Q. I find a number of entries here, that run generally through here from time to time, of the Standard Oil Company, "O. C. on empties." To what does the term "empties" refer?—A. I do not know whether it refers to empty packages or empty cans.

STANDARD OIL COMPANY'S SHIPMENTS.

Q. Did the Standard Company have many empty packages pass over your line?—A. I think they have shipped boxes. They would ship the oil in bulk and then ship the empty boxes and cans to be filled, but I cannot be sure about that. It may be possible that it related to refund charges on empty tank cars. They may have sent out here some few empty tank cars.

Q. Would that be part of the agreement made with them in 1876 that you referred to this morning?—A. As I explained this morning, or, if I did not I ought to have explained that, I do not think there was any such consideration in the contract that we should return them free. If we did return them free it was under some subsequent agreement or some understanding reached for some reason or other. We did everything that we could to encourage the Standard Oil Company in getting their business here, because it was a case of "ground hog." We must either have their business or we would not have any oil business.

DEFERRED TO THE JUDGMENT OF UNION PACIFIC.

Q. If the Union Pacific had entered into an agreement for the return of empties free, and that was a part of their agreement, it is likely that the through arrangement would be extended to the Central Pacific, is it not?—A. As a rule we have always deferred to the judgment of the Union Pacific upon western-bound freight rates and west-bound through business, and, unquestionably, if any of the chief officers of the Union Pacific had made a contract of that kind with the Standard Oil Company we would have shared in it just as the lines east of Council Bluffs would be likely to do. It was a matter of joint interest to us all, and we endeavored to confine the business to our line by all necessary concessions.

Q. The explanation that you have given with reference to the entries that appear from time to time on the books that have been shown to you would apply to the eighty six payments in the nature of rebates, amounting to over $12,000 during fifteen months—twelve months of 1884 and three months of 1885. Would that be the explanation of these entries?—A. Generally to the Standard Oil Company. It is altogether a matter of contract with them.

NO SPECIAL ARRANGEMENT WITH GRAYSON, HAROLD & CO.

Q. Did you contract with the firm of Grayson, Harold & Co. during the period you were making the contracts?—A. I do not think so. They were wholesale butchers, and I don't think they ever imported anything from the East. They may have done so.

Q. On account of what would you allow as an overcharge or rebate to that firm—what kind of a charge?—A. Possibly on cattle shipments from Nevada and Arizona, but I do not remember any special arrangements with them. I could not answer you without looking over it.

Q. Was there any competitor in business with them at the time?—A. They have never had any favors or anything that any other man did not have at the same time. There was no special arrangement with Grayson, Harold & Co. that I know anything about.

Q. What other competitors had they from points in Nevada here on actual shipments?—A. They would have as competitors all those wholesale butchers, such as Miller & Lux, Dunphy & Hildreth, and others.

The CHAIRMAN. It amounts to $3,633.

The WITNESS. It may have been on the cattle they shipped east to Chicago. We may have had to make special rates to keep them from driving to the terminus of the Union Pacific road.

The CHAIRMAN. April 2, voucher No. 1. They are all overcharges except one or two damage and loss.

Q. Voucher 196, "Grayson, Harold & Co., O. C. on cattle, $3,633." Does that recall any fact in connection with the shipment?—A. No, sir; it does not. I would have to see the voucher.

Q. Would the leading "local freight earnings" give any explanation?—A. There is no doubt of its being local business, that is, as contradistinguished from through business. It is susceptible of an explanation, if I had the voucher here. I know that it does not represent any peculiar or special favor to that firm.

SHIPMENTS OF CATTLE.

Q. If that firm had a rate was it a rate that was extended to all the firms in that line of business?—A. It would have been under the same circumstances. The cattle business is very peculiar. It is not infrequent that a dealer in cattle here may have in view the purchase of a large lot of cattle in Arizona or in New Mexico, which may have been brought across the Mexican line or may have been produced there. The question is whether he can buy those cattle and ship them here, or whether they will be shipped to the eastern market. We treat with him on the rates to move those cattle here. In Nevada the movement of cattle for the regular supply of the San Francisco market is constant, and the rates are regular and open. They are regular in the sense that they apply to all shippers, but they are special in the sense that until the passage of the interstate commerce law they were not printed.

SPECIAL RATES ON STOCK CATTLE.

I do not know of any special rates made on cattle from Nevada to San Francisco, that is, to individuals, except in some cases where they want to ship stock cattle, and want to ship them to some point in California and turn them out to fatten them and then ship them into the city. The combination of the local charges will make a very high rate and they could not do it. In such cases we would agree upon a price and when the transaction was completed we would refund the difference between the price agreed upon and the rate charged. The only other form of cattle shipment that would have to be settled by rebate is the shipment of cattle to a point in Nevada, say Reno, or in that

neighborhood, where they produce a very fine quality and abundance of hay which is cheap. Sheep and cattle taken to Reno are unloaded there and fed with hay for a month or two, perhaps longer, and then they are reshipped to market. We would bill them at the tariff rates to Reno and from Reno, and the combination of those rates would be greater than if they were shipped from the original point direct to their ultimate destination, but I believe we always charge something like $5 a car over and above what the through rate would be, for their stopping off, the final item of settlement, if it would appear in the nature of an overcharge or a rebate on our books, being a refund of the difference between the charge from the original point of shipment to Reno plus the charge from Reno to the destination, and the regular or general rate from the original point of shipment to their ultimate destination, if they had been shipped directly through without stopping off, perhaps plus $5 to the car. That explanation, I will venture to say, will cover that claim of Grayson, Harold & Co., but to say specifically what it was I could not without the voucher.

Q. We will show you the voucher. Were all cattle-shippers treated alike with reference to this rate?—A. Yes, sir; I believe there was no discrimination.

RATE MADE AT TIME OF APPLICATION.

Q. If it was not published, how did they get notice that you were engaged in that kind of business?—A. Wherever there was a special arrangement, like the shipment of a large lot of cattle such as I illustrated to you, it was so unusual and uncommon that no man would ever think of shipping without first coming and getting a rate; and the rate would be made to him at the time of his application.

Q. The rate fixed in that case would be based upon the number of cattle he was shipping?—A. That would, perhaps, have some influence in determining the rate; but I doubt if the condition of things down in Arizona and New Mexico was such as to permit us to make any wide distinction between the shipment of one car-load and one thousand, although we might undertake to do it.

WAS THERE A SPECIAL CONTRACT WITH CALIFORNIA WOOL CO.?

Q. Had you a contract with the California Wool Company?—A. I do not know of any such contract.

Q. Had you an arrangement with reference to a special rate with that company?—A. Taking the question broadly, as you ask it, I could not answer it. We may have had.

Q. Did you make a special rate on wool?—A. I never have made a special rate with the California Wool Company. The wool business to the East is very large. Previous to last year I think the rates were always the same, and open and regular to everybody.

Q. Prior to January who were your principal wool shippers?

The WITNESS. In this market?

The CHAIRMAN. Yes.

The WITNESS. I could not tell you. I am not familiar with the names. The packers change every year. Sometimes the packers ship in their own name and sometimes in the name of the owners of the wool.

RATES ON WOOL.

Q. Did you allow to any shippers a special rate as distinguished from the open rate?—A. I think not. Previous to last year I may, generally

speaking, answer no. There may have been cases where a mill-owner was out here and was likely to ship via Cape Horn and we had to shade something off in order to get him to ship by rail. You understand that the man who buys wool here for a mill is not particular about the time that he gets it all forward. He will ship, ordinarily, sufficient by rail to keep his mill running and keep up his supplies until the remainder, which usually constitutes the bulk of his purchase, arrives via Cape Horn. There may have been circumstances like that in the past when we have made special endeavors, special rates, in order to get a particularly large lot of wool that would have otherwise gone via Cape Horn. I have not any doubt that in my experience there have been frequent instances of that kind.

Q. Was that special rate given to all those shippers?—A. Under like circumstances; yes.

Q. What would be the difference that you made, if you can recall it, between the general public rate on wool and the special rate?—A. I cannot recall a single instance where that thing was done; but I have no doubt there were cases of that kind.

Q. How does the principal part of that wool business go; over what line?—A. At the present time I could not say; but I think that since the opening of the route via New Orleans it has mainly gone that way; the larger portion of it has, because it is all destined to New York and New England points.

VOUCHERS 1195 AND 1196, CALIFORNIA WOOL CO.

Q. I read from book No. 1, the same book, page 183, vouchers 1195 and 1196, March 31, 1885, California Wool Company, $1,830.41. It is entered in this account as "the Southern Pacific Company, a system account." Will you please look at the entry and explain it to the Commission?—A. I cannot explain it without reference to the voucher. That entry would indicate to me that it went via the New Orleans route, that is all. Possibly that it was all paid by the line east of El Paso. I think that is what that means. In March, 1885—during January, February, and March the rates were very much demoralized here by all the lines cutting rates. Rates were not stable at all. They were being cut as much as 40 per cent. by all the routes from day to day, and it was done by all the lines, as I understand it, by vouchers; that is, bills of lading were taken at the full rate and the difference refunded.

Q. Can you give an estimate of the amount of rebates or overcharges, during the year that you had the contract system, that was refunded?—A. I could not form any estimate whatever without referring to the books.

POOL BUSINESS IN CHARGE OF WITNESS.

Q. Who had charge of the arrangement of the pool business of the Central Pacific Railroad Company?—A. You may say I was practically the negotiating agent. Sometimes the general manager was with me at those meetings and sometimes he was not.

Q. When did you take charge of that branch of the business?—A. I always had more or less charge of it. I suppose that was the reason they made me general traffic manager, in order that I might attend to our relations with other connecting lines. I pay more attention to that than anything else.

Q. Have all of your pooling arrangements been printed or written?—I think all the important ones have been; yes, sir. We have not been

as much in that trouble as our Eastern friends. We have had very few of them. The principal pool was the transcontinental pool, and next to that was the Utah pool. Aside from that there were no pools that amounted to anything in which we were interested.

Q. What is the purpose, as you understand it, of the formation of a pool?—A. To maintain rates and to make revenue and to neutralize competition.

Q. What effect had the formation of a pool and the maintenance of rates upon the general community and the public at large?—A. Beneficial.

COMPETITION NOT DESTROYED BY POOLS.

Q. If the rates were made higher by the formation of a pool, would they be of benefit to the people or to the road?—A. It would be of mutual benefit. There is a mistaken idea that pools effect an advance in rates.

The CHAIRMAN. That is what I want to know.

The WITNESS. That is not true. The tendency of rates is downward. It always has been and always will be. You cannot control it. Under the best arrangement you can possibly make in the nature of a pool you do not destroy competition. The competition still continues, but in a modified form. The best you can say of the best pool with which I am acquainted or have been acquainted is that it averts a war of rates, which, of course, is destructive to railroad revenue, and is a very great injury to the community at large. The thing of perhaps the greatest importance to the merchant, the man who pays freights, is to have reasonable rates, equality of rates, and stability of rates; and those conditions are more nearly approximated by the pool arrangement than by any other scheme that so far has been devised.

Q. How far is the merchant a party to the fixing of a rate under a pool arrangement?—A. In a large measure the merchant makes his own rates.

CARRIER AND MERCHANT EQUALLY CONCERNED.

Q. How can a merchant get a rate at any point that is under a pool contract?

The WITNESS. Get a rate? You mean get a lower rate?

The CHAIRMAN. Yes.

The WITNESS. Simply by showing the necessity for it. If there is any reason for the rate being reduced, because the rate that is enforced is restrictive of trade or bears hard upon the merchant in his relation to other communities or to other territory, all he has to do is to make that evident to the carrier. The carrier is equally concerned with him that that business should be fostered and promoted.

EXCEPTIONS ARE MADE.

Q. Do all pools with reference to freight make such exceptions in their agreement?

The WITNESS. What exceptions?

The CHAIRMAN. Exceptions based on the necessity of trade, so as to disturb the pool that has been agreed upon between them.

A. I do not believe I understand your question. Wherever there is any pool it must be between several carriers; and one of the prime conditions is that the tariffs or rates must be agreed upon, jointly. No

carrier goes into a pool with any idea that he is going to lose any of his natural advantages. Every carrier through its agents has its clientage, and is just as jealous of the interests of that client and to see that he is not prejudiced by any act of the pool and that his friendship is not alienated, as he could possibly be if there were no pool at all. A client of any railroad company, a patron of it, is looked upon as a friend of that particular line and has always access to the officer having the rate-making power. He reaches that officer and represents the effect of the tariff, and states what it ought to be and what the effect of the change would be on his interests and consequently upon the interests of the road that he patronizes and the effect on the pool as a whole, and that officer brings the matter to the attention of the other companies, and very likely at the next meeting the proposition is made to make the change that is asked for. As a rule those changes are made because there is no way and never has been any way of maintaining a pool, except upon the good faith of the parties interested, and therefore you cannot resist a reasonable application, or one that is apparently reasonable, from any man, for it would endanger the whole fabric.

POOLS RARELY MAINTAINED.

Q. Are the pools strictly maintained?—A. They are rarely strictly maintained, in my judgment. There is always some agent that thinks he can make a reputation or get business for his road by a little sly piece of work; and he generally gets his work in. In about twenty-four hours the other fellow hears of it and there is a row. The result of it is that there is a meeting called and the thing is patched up again. The transcontinental pool was in force up to December 31, 1885, and yet during the last three months of that pool the rates were cut from here to the East as much as 40 per cent. The cutting began covertly, but of course was discovered, and then every fellow went in. There was a defect in the organization; everybody knew that one party to the agreement was dissatisfied, and that there would soon have to be a meeting. I believe there was a notice for the dissolution of it pending. It was expected that when the various parties met to readjust the pool the record of the past, that is, the relative amount of business carried by each party, would have great force and influence in determining the shares of the pool in the future. Because of this some of the agents tried to make as large a showing as possible, and did it by cutting the rates.

Q. If at any point the freight rates are pooled by the railroad companies running into a particular point, how is it possible for the merchant to get any rate pending the arrangement, other than the rate agreed upon by the pool?

The WITNESS. Pending the next meeting, you mean, when they come together?

The CHAIRMAN. Yes.

A. They go to work with the wires and try to get an agreement before that. He may not be able to get it immediately. He may not get it as soon as he could if they were out of the pool.

MERCHANTS WANT STABILITY OF RATES.

Q. Is not the effect on that particular point to place the freight rate at the command of the railroads instead of where it would be placed by the natural competition of trade and the demands created by such competition?—A. No; I think not.

Q. Why not?—A. I will tell you why. The merchant, as a rule, would rather pay a reasonable rate for freight; that is, a rate that will pay upon the average a fair profit for the transportation of his freight and be protected, as he is, against discriminations and against constant fluctuation in the rate, than to have the demoralization that would ensue in case each road worked independently and each was trying to grab all it could get. His compensation for the temporary inconvenience, supposing that he had a case where the tariff was not altogether what it should be, is in the fact that he is guaranteed against instability of rates and against inequality of rates.

THE POOLING SYSTEM THE BEST SYSTEM.

Q. Does not the pool system lead to rebates that are allowed from time to time to particular merchants or traders in order to take advantage of their pool agreement and cut the rates unknown to their competitors?—A. On the contrary the pooling system is the very best system that I know anything about to secure stability in rates and equality of rates. It is the very best system so far found to remove these discriminations between individuals and discriminations between localities. After an experience of some seventeen years in handling the traffic between the Atlantic coast States and the Pacific coast States—and I presume that I have had as much to do with it as any other man in the United States, and I do not own a dollar's worth of railroad stock or a dollar's worth of railroad bonds, and it is not of the slightest moment to me whether these roads make money or lose money, so far as my personal income is concerned—I believe that the only solution of this question, or that the true solution of this question is the legitimating of pools, and I believe it will be done. I expect to live to see it, and I would recommend the legitimating of pools if I were before Congress and they were taking my testimony as an expert as to how best to serve the community.

Q. Do I understand you to say that from your experience pools are not maintained?—A. I say they have not been always kept.

Q. Did you ever know of a pool in the seventeen years of your experience that was maintained twenty-four hours after it was agreed upon?—A. I think there have been pools maintained for a certain period. I think our Utah pool was quite well maintained.

Q. For how long?—A. For a year at a time. I think that we had a pool with the Union Pacific and Central Pacific road that run for a year without any great outbreak. I only learned from Pete Shelby's testimony before this commission that he was cutting rates during that time, but that we did not know anything about.

POOLING CONTRACTS SHOULD BE LEGALIZED.

Q. You do not know whether it was maintained or not, do you?—A. The beneficial results to the community and to the railroad were certainly obtained; and let me explain this, that the reason that the pools are not maintained and have not been maintained is because the idea has generally obtained before our courts and our legislatures and the public that pools are unlawful. I make a contract with you and I have got to trust to your honor for your performance of that contract. The ordinary man will do it under those circumstances if he thinks it is to his interest to do it. If a pooling contract between carriers were legalized and made lawful, and could be enforced before the courts, just as a contract

between individuals, we would remove that trouble. In the first place they would be more careful about making their pools, and in the second place they would be very careful about maintaining them after they were made. Pools could be made subject to the approvals of courts or of commissions, and if they were they certainly would be beneficial to the public at large.

Q. Have you ever been in a freight pool where the freights were raised?—A. Where the normal rates were raised, no. Where the rates were advanced over the cut rates or war rates that may have obtained for a period preceding the organization of the pool and which perhaps brought about the pool, yes. Take, for instance, the transcontinental association. Rates were not raised when that pool was formed and the rates constantly tended down during the whole continuance of the pool.

INTERESTS OF RAILROADS AND COMMUNITIES IDENTICAL.

Q. Is it in the power of a railroad pool to fix the rates at any price that they may agree upon for any given point?—A. The pool has no greater power over the combined roads than the officers who are charged with management of the individual roads have over the individual road. With a railroad manager there is the restraint of self-interest, which is more powerful than any agreement which can possibly be made, holding him in check. Pools are made to conserve the interests of the railroad companies. The interests of the railroad companies and the communities they serve are identical. You cannot make a tariff that is restrictive of trade that will diminish production and that will not encourage and foster production and serve the company that employs you well; and no president or general manager could sustain himself if he would order anything of the kind.

EFFECT OF POOLS ON MERCHANTS.

Q. Is it your experience that the merchants of a community are better satisfied with raised rates of a pool because of the stability afforded by the pool than they would be if they received lower rates under competition?—A. I do not like the term "raised rates" because I think that it is likely to create a misapprehension of the facts. I think that, for example, that there is not a merchant of any considerable importance in San Francisco that would not have preferred the continuance of the transcontinental pool during the year 1886 to the demoralization in rates that ensued after its disruption. There may be some modification of that. The dissolution of the pool and the war of rates that followed of course affected some people advantageously; but take the opinion of the people who pay the largest freights and I venture to say that they would support my view. I know that I have had some very heavy merchants in town ask me when we were going to patch this thing up, speaking of the war of rates of last year. They were demoralized; they could not tell where they stood; they could not make any forecast of their business at all, and they wished that we would fix the matter up; that it was hurtful to them.

Q. Is it not because the larger merchant or shipper had special rates and under the competition the smaller merchant got the benefit of the competing rate and therefore enjoyed the benefit of trade to that extent?—A. No, sir; because in the year 1885 I do not think there were any special rates. There may have been cases of the kind.

CONTRACTS NOT AFFECTED BY AMOUNT OF SHIPMENTS.

Q. Were not your contracts for special rates based upon and measured largely by the amount of the shipments?—A. No; they were not.

The CHAIRMAN. I understood you to say that.

The WITNESS. Not with respect to this through business that was involved in this war. In these special contracts originally the amount of the shipment had something to do with it, but only because the man who was the larger dealer would get lower rates of insurance than the small dealer and his interest account was smaller than the small dealer. He would get lower rates by vessel, and when we dickered with that merchant upon a proposition to bring his goods here, upon the whole, or upon the average, he would figure on the cost he had to pay when using all three routes, and we had to take those things into consideration. The difference there was in interest and insurance and the rates paid to Cape Horn vessels made for the time being a difference in our rates. I do not pretend to say that when we started on this contract plan the rates were equal in all respects; on the contrary they were not. It was a matter that we did not like and we tried to get out of it, and did get out of it as soon as we could; but as a rule there is no distinction made between the large and the small shipper. The merchants who pay the freights would like to see that policy adopted. I think I can produce petitions to that effect.

PETITION TO ADOPT THE CONTRACT PLAN.

Q. Of what policy are you speaking?—A. That the rates should be based upon the amount of tonnage. I think we have had an official communication addressed to us by a body of merchants and shippers recommending that we adopt that plan and make one rate to a man that would ship 10,000 tons per annum and another for a man that would ship 5,000 tons per annum, and so on. That may not be the right gradation, but that is sufficiently illustrative. We denied it, and one of the principal objections upon the part of our largest shippers to the contract plan was the fact that as soon as we got it running there was equality of rates and the small shipper got the same rate as the large shipper.

EFFECT OF CONTRACT PLAN TO EQUALIZE RATES.

Q. Was not the effect of the contract rate to enable the large shipper by reason of special rates based on the quantity he shipped to undersell the small shipper in the retail market?—A. On the contrary, it had no such effect. It had the effect of equalizing the rate between the small shipper and the large shipper. You must bear in mind, Mr. Chairman, this fact: I started to explain the beginning and the growth of this contract system. At the beginning we met the merchant individually and dickered with him on his particular trade, just as I have explained, examined his bills of lading, his insurance policies, &c., and made the best contract we could with him, aiming to bring his goods here at about what it would cost him to use all three routes. We perhaps the first time did not get more than one or two large shippers in, and then the next attempt we got a half a dozen and perhaps got all of one line of trade, and so on. It was the work of two or three years to make the contract plan general, and when we accomplished that we made a list of contract rates and published it and said:

Here, anybody, the small merchant here or at Santa Cruz, if you will sign a contract to ship exclusively by rail, you shall have the benefit of these contract rates.

The merchant in San Francisco said:

That is not fair; you are discriminating against us. You are destroying our trade. You are taking away from San Francisco the advantages of location and of established trade and of the sea-port. We carry large stocks of goods. We have been accustomed to import these goods by sea, and by reason of our capital, which is the product of our industry and enterprise, we were able to carry a six months' stock on water and a six months' stock in store. The little man who has not got the capital, who has not got the industry or ability, who has not applied himself to gain the capital, which is the just product of labor, cannot do that. He must ship by rail, and here after I have gone and made a contract with you to ship all my goods by your line you give him the same advantages that I have and deprive me of my custom and turn it over to the Eastern man and destroy my business.

They urged that with great force as the principal objection to the contract plan by which we equalized the rates between the large and the small shipper. That was the condition of things in the last years during the operation of that contract plan.

FREIGHT RATES ON MERCHANDISE AND STAPLES.

Q. Coming back to pools. If a pool fixing the rate for a given point is made, is not the merchant governed in the prices of his merchandise somewhat by the rate of freight he pays upon it?—A. There are some articles into the cost of which the freight rate enters largely; there are other articles as to which it does not amount to anything. If you go into a clothing store to buy a suit of clothes, whether the merchant paid 12 cents a pound or 6 cents a pound for bringing out the goods that entered into the construction of that suit, or whether he paid 3 or 1, would not be noticeable in the price you paid for it. But when you get down to staples, of course it does have some influence, and a very slight difference in the freight rate will very often determine the sources of supply. It may be from one place or it may be from another.

Q. So that, then, in proportion as the pool arrangement controls the freight rate of a community and the price for that freight enters into the merchandise, the railroad company, through its pool arrangements, controls the price of merchandise and of supplies to the community. Is that so?—A. You may think so, but I do not.

Q. Will you explain that?—A. I will give you all the information I have. But do not commit me to a proposition that is not mine and that cannot be defended.

The CHAIRMAN. I do not want to do that.

MUTUALITY OF INTERESTS OF CARRIER AND SHIPPER.

The WITNESS. In the first place I hold this—and so far as my authority has gone it has been my practice in the conduct of the traffic of the company that has employed me—that there is a mutuality of interest between the carrier and the public it serves. I am announcing that as a general proposition. Of course there are individual exceptions to it as there are to all cases. An enlightened self-interest moves the carrier to make the lowest rates necessary to move the largest traffic. If you have a village on the line of your road that, by a careful consideration of all its advantages, is a point eligible for manufacturing, your own interest is going to move you to give that village all the facilities that you can possibly give it in order to develop its resources and to make business for yourself. In other words, the policy of every railroad company ought to be, and I believe according to the degree of intelligence that is possessed by its management it is the practice, to move the max-

maximum tonnage at the maximum price but at the minimum cost. Now, I would call a normal rate a rate that suffices to move the products of any agricultural community to the general market under such favorable conditions as to stimulate the production in that neighborhood; and I think that a rate that did not encourage the farming industry or productions was an abnormal rate, was too high, and ought to be changed; and I think that a railroad company or a railroad manager that had any sense at all would certainly reduce that rate as quickly as possible. On the other hand, taking our own State, where the price of wheat is governed by the price of wheat in Liverpool, then the price in San Francisco would be the price in Liverpool, less the cost of freight from San Francisco to Liverpool; and the price, say, at Merced, in the San Joaquin Valley, would be the price in San Francisco, less the freight from Merced to San Francisco. Now, the farmer, of course, would not take into consideration that the railroad company is at some cost in performing this service and must produce some revenue. He would aim to get the lowest possible rate he could. He would not hesitate to "jew" the railroad down. I would not if I were a farmer. The railroad company therefore does not favor such applications as that, and is continually in the attitude of resistance, and must necessarily be. But if the railroad company finds that the rate it charges from Merced to San Francisco is such that where there are a thousand acres in that neighborhood tilled and producing grain no more is put under cultivation because the rate is too high, if that company is under an enlightened management, it will reduce that rate.

THE HERESY THAT RAILROADS ARE PUBLIC PROPERTY.

Q. Do you not in each case, or in the cases that you have cited, make the railroad the judge of the stimulant to be applied to any community?—A. Quite true; there is no doubt of that. I hold that the railroad is the property of its owners. I do not believe in the heresy that it is public property. If I put a dollar into a railroad I think it is just as good and I am as much entitled to the return of it as if I put it into a farm, and I believe that I ought to have the protection of the law. I believe that the railroad owners ought to manage their property, and I believe that the community is better protected in giving that management to the owners of the road, because their interests will carry them farther towards developing the resources of the community which the road serves than will any legislation or court proceedings.

Q. Am I to understand that you would consign the general business of the country and the movement of freight from one community to another to the control, management, and protection of the railroad companies?—A. I would. The laws of trade would govern them in the matter. Wherever the rate is too high another railroad is sure to be built alongside of it.

Q. Is it not true that the very moment that the railroad is built and completed and the last spike is driven a pool is formed?—A. So I have said. In that case the pool does not advance the rate, and it does not destroy the competition. Rates will be continually downward, and I defy any man to show me an instance to the contrary.

THE CASE OF LEADVILLE.

The CHAIRMAN. I call your attention to Leadville, where there are two roads and where the citizens are now building a third road, hoping that

they may be able to break the pool that a second road was built to break when there was a monopoly of one road, and their fear is now that the railroad interests will get the third road and there will be a pool and the rates will be about the same.

The WITNESS. Take the case of Leadville; the mining interest decayed and business depreciated. You never heard any complaint from Leadville of the rates charged while business was booming and they were taking out immense amounts of bullion; but that time has passed away. People have made their investments. They have paid high prices for property and paid high prices for mines, and now that the bullion output has decreased in value they want the railroad companies to suffer the loss since the mines have petered out, and wish to compel the railroads to perform the transportation at a price that will pay the mine-owner a profit.

By Commissioner LITTLER:

Q. Do you know that the product of Leadville last year was equal, with one exception, to any year since it has had an existence, and greater than the year preceding?—A. Possibly in value, but it took a greater number of tons to make that value than it did in any preceding year. Is not that so?

CONSTANT DOWNWARD TENDENCY IN RATES.

Commissioner LITTLER. Yes; but that would be against your argument, because it would furnish that many more tons to be moved.

The WITNESS. Not at all, because freights may have been down, by reason of former competition, to a minimum rate. Now, I venture to say this, and it is right in the line of my argument, originally there was but one road to Leadville. When the second road was completed, assuming that the two companies immediately pooled, I will venture to say that there was no advance over the rates that were in force on the one road, but that since the completion of the second road, notwithstanding the pool, there has been a constant downward tendency in rates. That is what I have said and all that I have said, and I believe that without any special knowledge concerning that place or those points the history of the case will prove it.

PROPORTION OF POOL BUSINESS TO TOTAL BUSINESS.

By the CHAIRMAN:

Q. Is not the effect, however, of the pool, under those circumstances, to stop any too sudden fall of freight rates?—A. Certainly; the railroads are entitled to some protection in the matter, are they not?

Q. I am asking you. What proportion, if you recall, of the estimate of the business of the Central Pacific from year to year during the formation of the pools you have spoken of was pool business?—A. That I cannot tell you without looking it up.

Q. Would it be 50 per cent. or 75 per cent.?—A. I would not like to hazard an answer. That is something I would not like to state.

The Commission then adjourned to Saturday, August 13, 1887, at 10 o'clock a. m.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Saturday, August 13, 1887.

The Commission met pursuant to adjournment. all the commissioners being present.

JOHN C. STUBBS, being further examined, testified as follows:

By the CHAIRMAN:

Question. Will you furnish to the Commission a statement showing the total amount of rebates allowed by the Central Pacific Railroad Company from the organization of the road down to date?—Answer. I understand that that has already been asked of our controller, who is at the head of the accounting department. I think that his reply was to the effect that as the books of the company were open to the accountants, it would be a good deal better for them to do that for you. I do not regard that I have the authority to promise anything more than that.

Q. Then do I understand that you offer to the Commission the accounts showing the rebates from the organization of the road to date, so that the accountants of the Commission can take off the totals?—A. I understand that that has been tendered to the Commission.

Commissioner LITTLER. Let me make an inquiry before you proceed. If you are making calls, do you not want to call for a statement of the pool balances paid by the Central Pacific?

Mr. COHEN. We have that prepared. Mr. Miller has prepared such a statement. He thought that you were going to examine him yesterday, and he was here with it ready to proceed. When he is put on the stand he will produce this statement.

The CHAIRMAN. The reports showing rebates have not been furnished. I understood Mr. Miller to say that he was unable to furnish them, and referred us to Mr. Stubbs, the general traffic manager. I thought perhaps he had some account by which he could make up the statement.

Mr. COHEN. I think probably that you are mistaken in the term when you say that we are unable to make such a statement. It is simply a question of time and expense for us, and we thought that as you had so many accountants paid by the Government, you would do it yourself.

The CHAIRMAN. You mean that you are unable in the sense of time and expense required?

The WITNESS. Not only that. If I understood Mr. Miller correctly when he gave me the information in the office, he thought it would be accepted by the Commission and by the public generally as more accurate and subject to less criticism if made by your accountants. It would leave no room for saying that we had misrepresented or twisted or turned the accounts, so as to make a different showing from what the real facts were.

WOULD HAVE TO EXAMINE EACH INDIVIDUAL VOUCHER.

Q. Have you examined any of the vouchers since you were here yesterday?—A. I have not.

Q. Are you positive that the vouchers will show the character of the payment—whether it is an overcharge or a rebate?—A. With respect to the overcharges to which you called my attention yesterday, I cannot make any different answer this morning than I did then. As a rule, it would require the examination of each individual voucher for me to answer you definitely as to the nature of it.

Q. Would the general auditor know whether it was a rebate or an overcharge by any indication on the voucher?—A. I do not think that there is any man who could tell without examining each individual voucher. You ask me in respect to claims that cover a period of sixteen or seventeen years, and inquire about vouchers of that character. Vouchers of that character sometimes aggregate six thousand a month, and it would be impossible for me to make the examination which your inquiry demands.

WAS THE REBATE ACCOUNT BALANCED DURING SIXTEEN YEARS.

Q. Did not the company, during sixteen or seventeen years, balance the account at any time?—A. I do not think that it made up any account segregating the charges and balancing them up.

Q. How were the directors informed as to the amount of rebate business that they were doing in a year?—A. I do not think that they were informed at all. I do not think that they ever asked a question. I have no knowledge of their ever having done so.

Q. Is there anything on the face of the voucher which will indicate to the general auditor whether it was an overcharge or a rebate?—A. If you will excuse me, I do not wish to offend any person here, or to be regarded as being disrespectful to the Commission in any way, but it seems to me that the general auditor would be the best witness as to what his knowledge would be. I could not say.

The CHAIRMAN. The general auditor has already stated that he would be unable, as I recall it, from the voucher itself to tell the nature and character of the overcharge, and he has referred the Commission to the general freight agent.

The WITNESS. It is possible that the general auditor, by examining the voucher, could not give you as accurate information regarding the character of that voucher as I could. There is not a voucher that you can present to me in the nature of an overcharge or rebate that I can not explain to you, and make a rational explanation of it. There may be some, but I think not.

Q. Is that due to any mark on the voucher, or to the fact that you recall the nature of the transaction?—A. It would be owing to the statement of facts that would be made upon the face of the voucher, and from any external evidence.

The CHAIRMAN. Mr. Cohen, we will have to have these vouchers and have Mr. Stubbs go over them as well as he can. That is the only way to do.

FIVE OR SIX THOUSAND CLAIMS A MONTH.

By Commissioner LITTLER:

Q. Can you not go over those vouchers at the office and save a great deal of time to yourself and the Commission, or have some clerk do so?—A. I could not undertake to go over all of those vouchers. It would take a year to do it. As I have already stated to you, these claims amount to five or six thousand a month that we have paid, and in a great many instances they are paid for account of connecting lines.

By the CHAIRMAN:

Q. Were there so many transactions by way of rebates in one year that it would require considerable time to determine the number and amount?—A. I should have to go over and examine each voucher in order to segregate what you call rebates from what you would call

overcharges, as I understand your use of the terms. That would require, in my judgment, the handling of every voucher.

Q. How do I use the term rebate differently from what you use it, as you defined it yesterday?—A. I do not know. I have given you my definition of it, and when I use the term I use it in accordance with that definition. Whether you agree with me or not I have not yet been informed.

ONLY CONCERNED IN THE NET RESULTS.

Q. Regarding freight transactions, what percentage of business by way of rebate, as you understand it, did you do in one year?—A. I cannot give you the least idea of that. It is a matter of utter indifference to us what the rebates amount to. We are only concerned in the net results—the money that is paid into the treasury.

Q. When do you ascertain the net results?—A. They are ascertained in the auditor's department. When a claim is paid by the paymaster, or whatever agency is used to pay it, it is sent in to the auditor and charged against the earnings account.

Q. How often do you ascertain net results?—A. I never ascertain them myself. The auditor does that.

Q. How often did the auditor ascertain net results?—A. So far as I know, he makes a monthly showing, as nearly as he can, of the earnings.

Q. In showing the earnings in the monthly statement does he deduct the amounts that have been allowed during the month by way of rebate?—A. Just how he does it I am unable to state. The presumption is that he balances his books.

THE VOUCHERS FOR FEBRUARY, 1884, CALLED FOR.

The CHAIRMAN. Mr. Cohen, we call for the production of the rebate vouchers for the month of February, 1884, and ask that as many of them as possible be produced to the Commission now, so that this witness may be examined. If you send a messenger, or we will send a messenger or subpœna either, we will be obliged, because the witness cannot intelligently go on without them. What is your answer?

Mr. COHEN. I did not make any answer. I will produce the vouchers as soon as possible.

The WITNESS. Let me suggest a question to you as to whether the chairman means the vouchers paid during the month of February, or whether he means the rebate vouchers paid on business transactions during the month of February. Some of those vouchers paid in February, 1884, may have been for account of 1882.

The CHAIRMAN. I mean the vouchers as represented in the book which you have produced—the refund book.

Mr. COHEN. That is a little indefinite, Mr. Chairman. Can you put it more particularly than that?

The CHAIRMAN. I call for the vouchers for the month of February, 1884, represented by the charges in the refund book for the month of February, 1884, and produced to the Commission. The entries in the book the witness is unable to explain unless he has the presence of the vouchers.

Mr. COHEN. I will produce all the vouchers called for as soon as it is possible for me to do it. As we are nearly a mile away from the place where they are kept I cannot do it this morning. After a reasonable adjournment I shall be prepared to deliver to the Commission

all such vouchers called for as may be in the possession of the company.

The CHAIRMAN. I shall ask for a session this afternoon at 2 o'clock and shall be here in session myself, if the other Commissioners are not able to be here, and finish this matter.

Mr. COHEN. I cannot produce them without some reasonable adjournment to permit me to get them. I cannot undertake to say that I can produce them between 12 o'clock and 2. If the Commission will give me time, I will get the vouchers. Where there are no physical difficulties in the way I will accommodate the Commission in every way in my power. I wish to say further, however, that I have been at the service of this Commission every hour of the day from Monday morning to the present time. I have had no time even to take lunch. I have been subject to its calls and have done everything in my power to facilitate the business of this Commission from 7 o'clock in the morning until 10 o'clock at night. I have done all that I can do, and I can do no more.

Commissioner LITTLER. I wish to ask the witness how long it would take by the exercise of ordinary diligence to assort those papers and to get them here?

The WITNESS. I really cannot say. We will try to do it by 2 o'clock, if that is possible. There is no intention on our part to keep these vouchers from you, Mr. Chairman. As far as I am personally concerned I wish to say that this is Saturday, a short day in San Francisco. I am accustomed to quit work at 3 o'clock on Saturday, but if you desire it I will stay all night.

By Commissioner ANDERSON:

Q. How long would it take you to go to your office now and get them?—A. I cannot give you any idea. It will take from fifteen to twenty minutes to go there, and it will take about the same time to return. How long it would take the auditor, in whose custody those vouchers are, to gather them together and check them off from the book I cannot say.

The CHAIRMAN. The reason why I insist upon this to-day is that the other side desires all of next week in which to introduce testimony, and the Commission has set apart next week to hear that testimony.

Mr. COHEN. If the Commission will name Monday for the purpose of going over the vouchers I am perfectly willing to have them here Monday morning at 10 o'clock. I understand that the Commission has laid out work enough for us all next week in the United States courts. It will take our time there. Whatever the order of the Commission is we are here to facilitate it in every way that we can.

The CHAIRMAN. You are not doing it.

Mr. COHEN. We are trying to do it, Mr. Chairman, and will do it if you will be a little mite reasonable with us. We cannot do impossibilities.

Commissioner ANDERSON. Personally, I am willing to stay over week after next, if you are not through with your case. If necessary, I will stay in San Francisco for a month.

Mr. COHEN. There is another thing. I want to try and deal fairly with the Commission. So far as I am concerned, I do not intend to produce to this Commission any book, paper, or voucher from this time forward that I have not had an opportunity of examining before it comes here. Considering my duty as counsel for the company, it is necessary for me to inform myself as to the evidence that is coming

here, so that I may be prepared to meet it, and take advantage of it, and put it in a proper way before the Commission, so that it shall not be used as was attempted to be done—I will not say attempted to be done, because I do not think that there was any intention about it, but as was done with the report of Mr. Huntington the other day, which I had not examined, and which came very near prejudicing the case which I represent. It was attempted to be shown through that paper, which I had not seen, that the stock held by Messrs. Stanford, Hopkins, Huntington, and Crocker in Wells, Fargo & Co. had been paid for by the Central Pacific.

Commissioner ANDERSON. I do not think that that is a fair statement.

Mr. COHEN. If Mr. Miller had not been here to explain it it would have been thought that such was the case, and the case of my clients would have been prejudiced. I myself would have been deceived as to the real facts in the matter.

Commissioner ANDERSON. I do not think so.

Mr. COHEN. That would have been the result.

Commissioner ANDERSON. The only result would have been a delay of an hour or two to get Mr. Miller's explanation.

Mr. COHEN. The use that was made of that report showed me that I was not doing my duty to my client in producing anything here that I had not first seen before it came here.

Commissioner ANDERSON. That is quite reasonable. You should see everything.

NO OBJECTION TO SUBMITTING VOUCHERS.

The WITNESS. I would like to have it placed on record, that so far as I know there is not the slightest objection on the part of the company to submitting to you those vouchers giving everything in detail; there is no evasion of the matter at all; counsel is simply contending for the necessity for time.

Mr. COHEN. I will produce to the Commission all documents called for, if it will give me time to do so. To find them and bring them here will take some time, and it will take some further time to look them over. A great many of the employés of the Central Pacific leave their work on 12 o'clock on Saturdays, and it may be impossible to find these papers in time for an afternoon session to-day. You can do just as you please about it, however; it makes no difference to me. If you adjourn now until Monday morning, I will undertake to have here at that time every book, document, and voucher that you call for, and which I am able to produce. If I do not produce them, I will give you the reason why I do not. I think that will facilitate the business of the Commission. I am ready to attend here. It makes no difference to me how I put in my time, whether here or down at the office. I shall be in the service of the Commission whether here or there.

The CHAIRMAN. I am satisfied to postpone this examination until 10 o'clock Monday morning.

Mr. COHEN. I will give you everything you call for at that time.

Commissioner LITTLER. In order to test the sense of the Commission, I will make a motion. I move that Chief Accountant Stevens be required to examine the books of the Central Pacific Railroad Company, from the time it began business up to the end of the last fiscal year, and report to this Commission the total amounts of rebates and overcharges as shown by the books of the company, yearly, and that the railroad company have leave to make any explanation in relation to said ac-

counts which it may deem proper or necessary. I think that puts the explanation where it belongs, and will save us an immense amount of trouble and wrangling.

The CHAIRMAN. I do not think that that will be a full compliance with the act of Congress, but am not prepared to vote no. I see no objection to the motion being placed upon the minutes, and I approve the motion to the extent of requiring the accountant to make this examination and prepare this statement.

(The motion was carried.)

Mr. COHEN. Does that take the place of your call?

The CHAIRMAN. I am not prepared to withdraw my call, but shall insist upon it.

Commissioner LITTLER. I am willing that one month's vouchers shall be produced.

The CHAIRMAN. I shall insist upon my call for the vouchers for February, 1884, in order to have the witness explain to the Commission the difference between an overcharge and a rebate, as they appear upon the vouchers. I will call for that Monday morning at 10 o'clock.

Commissioner LITTLER. I suppose that the further investigation of this branch will pass over until Monday next?

The CHAIRMAN. Yes, sir; that is the order.

Q. Was Mr. C. J. Wilder connected with your department?—A. He is the freight auditor, and belongs to the accounting department, which is under the direction of the comptroller.

Q. Is he subordinate to the comptroller?—A. Yes, sir.

Q. Is he not under your immediate control?—A. No, sir.

BOOK OF INSTRUCTIONS AS TO FREIGHT RATES.

Q. Was there a book of instructions kept by that department with reference to freight charges and freight rates?—A. I think so; I am not sure.

Q. Have you ever seen the book?—A. They have books of instruction; yes, sir.

Q. How are the books of instruction issued?—A. I think that Mr. Wilder has prepared the instructions for issue. As a rule, the general instructions, the instructions to agents, and the instructions to conductors are printed in the local freight tariff; and then perhaps Mr. Wilder would have some special instructions that would relate to the manner of reporting. I think that he has compiled a book of instructions that embraces the instructions from the freight department and from the auditing department relating to accounts.

Q. Is that a printed book?—A. I think so; yes, sir.

Q. Are your instructions numbered?—A. I think so; yes, sir.

FREIGHT CIRCULAR OF CENTRAL PACIFIC.

Q. I call your attention to the following circular, and ask you if you recall it:

Circular No. 55.

CENTRAL PACIFIC RAILROAD, OFFICE OF FREIGHT AUDITOR,
San Francisco, July 7, 1882.

To AGENTS:

Your attention is called to rule 13, page 46, fourth paragraph, in book of instructions, which was: "In every case where the rate used (in billing) is different from the tariff rate, give the number and date of the order and the authority for such special rate, and where the rate is issued to some particular party his name must also appear upon the way-bill." Hereafter a strict compliance with this rule is expected.

C. J. WILDER, *Freight Auditor.*

Q. Do you recall such a circular?—A. I do not know that I ever saw it.

Q. Do you recall any such instruction issued to the agents?—A. Only as you have read it to me.

Q. Do you recall any such instruction as in charge of the general freight agent sent to the agents along the line?—A. No, sir. Such instructions would go direct from Mr. Wilder.

Q. To whom would these agents report?—A. It would be Mr. Wilder's duty to see that they complied with their instructions.

MANNER OF HANDLING BUSINESS.

Q. Would Mr. Wilder have entire knowledge of the character of instructions which I have read to you?—A. The duties of Mr. Wilder are to audit the accounts of agents. The manner of handling business is this: For all property that is transported, a way-bill is made out by the forwarding station. The original of that way-bill goes with the car in charge of the conductor to the agent at destination; an impression copy of that way-bill is sent to the freight auditor. The agent at destination is required to examine that way-bill to see whether the weight at which the property billed is correct; to see whether the rate used is the correct one, according to the tariff or instructions which he has received, and to see whether the charges are extended correctly. If everything is correct, he debits his station with the amount of the charges, and when he collects the money he credits his station with the remittance, which he sends to the treasurer. The freight auditor has a force of clerks and independent of the action of the receiving agent; he also is charged with the duty of examining that way-bill to see whether the freight is correctly billed and the charges extended properly, and he makes a debit against the receiving agent. Now suppose that there is a change in the tariff. Suppose the rate on lime, for instance, between any two stations is reduced. An order is given by the general freight agent changing the rate from the tariff rate to the reduced rate. He sends a copy of that order to the forwarding agent at the shipping station; a copy of that order to the receiving agent at delivering station, and a copy to the freight auditor, so that if any one of them makes a mistake there is a perfect check to correct it. Mr. Wilder's circular, which has been read, requires the agent who bills the freight at reduced rate—what we call a special rate, as I explained it yesterday—to note on the way-bill the number of the order, because the general freight agent numbers his orders so that he can with ease refer to his files and distinguish what order was issued. What is the date of that circular?

The CHAIRMAN. July 7, 1883.

The WITNESS. He also states that when that annexed rate is a special rate to some particular party, the name of the party shall be put on the way-bill.

Q. What other inducements to shippers are given in order to secure this business different from special rates?—A. I do not know of any.

Q. Have you power to issue passes?—A. No.

PASSES TO SHIPPERS.

Q. Did you ever issue passes to shippers?—A. Never. Passes are issued by the general manager, by the general superintendent, and by the directors. I do not know of anybody else.

Q. Have you referred shippers to the authorities who issue passes?—A. During the year 1886 I obtained passes from the general manager, in some cases, for shippers. Upon representing the facts of the case to the general manager, I obtained and delivered such passes.

Q. Have you offered passes to shippers as an inducement to secure their business?—A. Scarcely; I do not recall any individual case, but there have been cases where shippers using our line have received passes. This relates almost wholly, if not altogether, to through business, when we were quarreling with each other and the competing lines were all fighting. It was done in cases where shippers have come to us and represented that they were offered, by our competitors, transportation over their lines. They were our patrons, shipping our way, and I may say that wherever we were satisfied that the statement was true, we generally met the case by giving a pass. The instances, however, have been comparatively few. The evil has not been carried to the extent on our line that it has been carried on the lines at the East.

CUT RATES—TICKETS CHARGED TO FREIGHT ACCOUNT.

Q. What other advantages that have been offered to shippers to induce them to ship their business by your competitors have you been compelled to meet?—A. Wherever they cut the rate we had to cut the rate and follow them. I do not know of anything else. I do not think of anything else. Sometimes on through business, instead of giving a pass, which we did not like to do, we would give a ticket, and charge it off to the freight account. I believe that covers all.

Q. Have you any knowledge of the telegraph business in connection with the company?—A. No; I have no knowledge, except a general knowledge, as anybody connected with the company would have.

CONTRACT WITH WESTERN UNION.

Q. Have you any knowledge as to the arrangements between the telegraph company and the railroad company as to their rates and charges and to the division of their earnings?

The WITNESS. Do you mean as to the telegraph rates?

The CHAIRMAN. Yes.

A. I do not think that there is any arrangement between the railroad company and the telegraph company as to what rates shall be charged for telegraphic service. There is a contract between the Western Union Telegraph Company and our company under which the Western Union Telegraph Company uses our lines, and which provides for certain free service. That is, they provide free telegraphic service for us, in consideration of what we do for them. I am not familiar enough with that contract to give it to you in detail, but I know of the contract, and have read it two or three times, and I sometimes have to deal with it.

Q. Have you any knowledge outside of the contract as to the percentage of profit which the telegraph company has paid to the railroad company?—A. Under the provisions of the contract I think the telegraph company pays to the railroad company a certain round sum.

Q. Do you know the amount?—A. I do not.

HOTEL BUSINESS CONNECTED WITH THE CENTRAL PACIFIC.

Q. How is the hotel business along the line of the road in connection with the stations conducted; are you familiar with it?—A. Until quite

recently, I believe, it was conducted altogether by private parties. I think that the company now owns the Humboldt station.

By Commissioner LITTLER:

Q. Do you mean the Humboldt eating-house?—A. Yes; but I think that it is leased and run by the lessee. I do not think that the company has anything to do with the running of the station. I would not be sure of it, because I am not altogether familiar with it. I believe that the company employs an eating-house superintendent, Mr. Clawson, who simply looks after them to see that they are kept properly, and that the service is done satisfactorily. Our eating-house arrangements have never been satisfactory to me, and have never been satisfactory to the public. I think that they should be owned by the company, and run by the company, regardless of cost, because they are so intimately connected with the passenger traffic.

Q. How many other eating-houses, if you recollect, does the company own?—A. I am sure that we own the Humboldt House, and I am not sure but we own the Reno House, as well. We own the building at Ogden, but the privilege of keeping an eating-house is leased. Of course we own the station at Sacramento, but the eating-house is run by another party.

Q. Do I understand that where you have these eating-houses they are under lease?—A. Yes, sir; I think so.

Q. How many do you recall?—A. As a rule, the eating houses are owned by the company, and I think that in every case they are leased. I would not be positive about that, however. The general superintendent or the general manager would be a better witness on that point.

PAST HISTORY OF THE TRANSCONTINENTAL TRAFFIC.

By Commissioner ANDERSON:

Q. Are you very familiar with the past history of the through business, or what is known as the transcontinental traffic?—A. I suppose that I have that reputation.

Q. What has been the general course of that business, stated both with regard to the volume and to the amount in dollars during the last ten years? I refer to the whole business between the Atlantic coast and the Pacific coast.—A. I cannot tell you off-hand as to the volume of that business.

Q. I mean, is it increasing or decreasing in quantity?—A. It is increasing.

Q. Is it increasing in volume?—A. Yes, sir.

Q. Is it increasing in amount, stated in dollars?—A. I think that it is increasing in value.

Q. In amount stated in dollars?—A. Yes, sir. We have not, however, gone far enough under the operation of this interstate commerce law to determine what the prospects are, but up to date we can say that there is an increase, speaking now of the business generally.

Q. Which increases at the greater rate, the volume or the amount in dollars?—A. The volume.

INCREASING IN VOLUME.

Q. Is the increase in dollars important, or does it remain substantially at about the same limit?—A. Up to January 1, 1886, or you may say February 18, 1886, the increase in volume was simply the natural

increase proportioned to the slow growth and development of the country here, and there was an increase in dollars, although not in the same ratio. During the year 1886, when there was a war of rates between the various railroads, there was a very large increase in the passenger and freight traffic, but in freight, judging from our own interests, there was a reduction in the revenue derived from it. I think that there was a slight increase in the revenue from passengers, but not commensurate with the increase in volume.

BUSINESS OF CENTRAL AND UNION PACIFC.

Q. Please pass to the business of the Central and Union Pacific, and state its history from 1882 to the present time. What have been the changes in the volume of business?—A. I would not undertake to state that off-hand. In Governor Stanford's testimony you have a statement which I caused to be prepared, and which I have attested before a notary, which will give you the very best evidence on that point. In 1882 the Atchison, Topeka and Santa Fé Railroad was completed to a connection with the Southern Pacific at Deming, and immediately took a share of the traffic. After that the Texas and Pacific Railway was completed, and after that the Denver and Rio Grande Railway was finished. The completion of this latter road affected the Union Pacific, but did not affect, except beneficially, the Central Pacific and the Southern Pacific.

EFFECT OF COMPETING LINES.

Q. Please explain the distinction that you make. Why did it not also draw business away from the Central Pacific?—A. Because the Denver and Rio Grande Railway did not compete with the Central Pacific. It was a connection of the Central Pacific at Ogden.

Q. I understand that; but how about the Atchison, Topeka and Santa Fé road?—A. That road drew business from the Central and Union Pacific line. The completion of the Denver and Rio Grande Railway drew from the Union Pacific but not from the Central Pacific. The completion of the Texas and Pacific Railway, of course, draw from the Central Pacific line.

Q. So that immediately after these through lines were established, did the actual volume of business done over the Central and Union Pacific decrease?—A. Yes, sir; and the revenue also.

Q. Did not the revenue decrease faster than the volume, on account of the fall in rates?—A. Not immediately, because at the time that the Atchison, Topeka and Santa Fé road was completed that company made a contract with the Union Pacific, which had the effect of maintaining rates temporarily, but there has been a decrease and a sharp decrease in the revenue, as well as in the tonnage, by reason of the competition.

ANTICIPATED COMPETITION FROM PROPOSED LINES.

Q. What other transcontinental lines are reported as about to be established in competition with the Union Pacific and Central Pacific than those existing to-day?—A. I do not know of any others than those existing to-day. The Canadian Pacific, of course, is new, and has not done a great deal so far with respect to California business. Of course, the longer they work the line through the more mischief they will do.

The Northern Pacific has now completed its line to Tacoma, but hitherto has practically kept out of the California business. The Oregon Railway and Navigation Company and the Oregon Short Line have, in the past, practically kept out of California business, but that was owing to the existence of the transcontinental association. The Canadian Pacific is here, and is bound, I think, to increase its traffic. It seems to me that the Northern Pacific is bound to come here, and is now working for business to and from California. In my judgment, and in fact it has been threatened, the Oregon Railway and Navigation Company will work more of this business.

THE CHICAGO AND NORTHWESTERN EXTENSION.

Q. How about the Chicago and Northwestern Railway? Please follow them down.—A. Of course, we have nothing but rumor about the Chicago and Northwestern. Its road now is out as far as Fort Fetterman.

Q. In what Territory is that?—A. I think in Wyoming. They have graded beyond Fort Fetterman, and the rumor is that they are coming west to Boisé City, or to a connection with the Oregon Pacific, which is a little road started from Yaquina Bay up north.

Q. Is that in California?—A. No, sir; it is in Oregon. That road is being built eastward. They are now building, and announce it as their intention to build eastward, at least as far as Boisé City.

CHICAGO, BURLINGTON AND QUINCY AND ATCHISON, TOPEKA AND SANTA FÉ.

Q. If that road is carried through you will have another competitor to participate in this business, will you not?—A. Certainly, and a very strong competitor. If the Northwestern road should go as far west as Boisé City, of course it would continue on to California. It is rumored that the Chicago, Burlington and Quincy road is being extended west from Denver. What truth there is in the rumor, and how far they propose to extend their line, I am unable to say. The Atchison, Topeka and Santa Fé Railroad Company, which has leased the Atlantic and Pacific, is in Southern California. It has a line to San Diego, and an independent line to Los Angeles, as well as a line to Mojave, which is 383 miles south from San Francisco. It is my judgment that sooner or later it is bound to come here.

Q. Do you mean that it is bound to come to San Francisco?—A. Yes, sir; I think so. Then there is what is called the Colorado Midland road, building from Colorado Springs towards Utah. The current report says that this is an Atchison concern, and I believe it. The rumor is that it will be built at least to a connection with the Denver and Rio Grande Western in Utah, and that it will lease and possibly buy the Denver and Rio Grande Western road. That would make a competitor with the Union Pacific for all the Utah trade.

Q. The general tendency, then, of these lines would be to increase the number of sharers in the through business, and to cause the volume and the amount received by the Central Pacific of the through business to decrease, would it not?—A. Largely decrease.

PROSPECT GOOD FOR LOCAL TRAFFIC.

Q. What is the prospect for local traffic on the aided portion of the Central Pacific between Ogden and San José?—A. For that portion

of the aided line in California the prospect, in my judgment, is good. I think that the unprecedented prosperity which Southern California has enjoyed will spread throughout the whole State of California, and I think that there is no question but what that section through which the aided portion of the line runs will receive its share, although it is not the best portion of California. That line runs from San José to Niles, through the Livermore Pass, to Lathrop, Stockton, and Sacramento. That is not the best portion of the State.

CONDITION OF REGION EAST OF SACRAMENTO.

Q. That is the old Western Pacific, is it not?—A. Yes, sir. I think that the whole region east of Sacramento on the main line will be much slower of development, but as it is capable of producing citrus fruits equal to anything produced in Southern California, and has unlimited resources for the production of deciduous fruits, it is going to be in time a very rich and a highly productive region. We have but little traffic in the mountains, except lumber, and as the years go on they are cutting the timber farther back from the railroad, and the expense of getting it to the railroad is increasing in proportion, so that it is more difficult to compete with the Oregon lumber, which comes here cheaply by sea, and with the lumber districts that will perhaps be opened up by the extension of the Oregon Division.

TRANSPORTATION OF MINERAL PRODUCTS AN UNIMPORTANT FACTOR.

Q. Do I understand that the transportation of ore and mineral products in the district to which you have alluded has ceased to be a factor of any importance?—A. Yes, sir; altogether, so far as California is concerned. I do not suppose that the lumber interests on the Sierra Nevada Mountains, that is, on the aided line, are going to increase very largely. When we get east of the State line there is little business. Of course every one knows the condition of the Comstock lode, and that that business has fallen off very largely. I think that there has been a reduction in the revenue and the business taken up and laid down in the State of Nevada, comparing 1876, which was, perhaps, the best year, and 1886, equal to something like 50 per cent. I do not know but what it would go over 50 per cent.

The agricultural resources of Nevada are improving, but I think that the cattle interests are at about a standstill. I do not wonder that people smile when I speak about the agricultural interests. When I first went over that road there was not a spear of grass to be seen anywhere.

Commissioner ANDERSON. I should infer from your last remark that there was a time when it was worse than it is now.

IRRIGARION INTRODUCED AT LOVELOCKS STATION.

The WITNESS. I think there was. I do not know but that your attention was called to Lovelocks Station when you came to California. They have put water on the desert, and by this mode have been enabled to raise barley in abundance, and get very rich crops. As far out as the neighborhood of Golconda, which is in the vicinity of Elko, there is a large ranch, where they have put water on the desert, and have pretty well washed out the alkali. It takes three or four years to wash the alkali out of the soil. Here they raise barley in abundance. The Nevado potatoes raised on the Humboldt cannot be beaten anywhere; in

fact, they cannot be equaled anywhere. The trouble, however, is that there is no market for these products. They go east to Utah and Utah produces everything, and more than it needs. Coming west to California, the same condition of affairs exists.

HUMBOLDT VALLEY—NEED OF A MARKET.

By Commissioner LITTLER:

Q. Is not the great trouble in the Humboldt Valley the want of sufficient water with which to irrigate?—A. I think that is so. Of course, the expense of putting water on the soil has something to do with it, but in my judgment the prime trouble is the want of a market. If you raise wheat, barley, and potatoes there, the result of irrigation, after washing the soil for three or four years in order to get the alkali out of it, and then have no market, you would be at a very great disadvantage. Your products are in competition with the produce of California, and in competition with the products of Utah, and there is not much field for what is raised in Nevada.

REDUCED MINING RESOURCES OF NEVADA.

The mining resources of Nevada have very greatly fallen off. There is some low-grade ore still produced there, and possibly there may be a larger business worked up as methods are invented for reducing the cost of milling and separating the precious metals. I suppose that there are millions of tons of ores in Nevada that could be mined which would produce from $5 to $10 a ton if it could be reduced at a cost of about $3 a ton as I have heard they do it in Wales.

POOR PROSPECTS FOR ROAD FROM SACRAMENTO AND OGDEN.

By Commissioner ANDERSON:

Q. Is your general conclusion that so far as the road between Sacramento and Ogden is concerned the future promises no increase in the through business and but a slow increase in the local business?—A. It promises no increase in the through business, and very little, if any, increase in the local business. The latter increase will be slow, if it increases at all.

PACIFIC MAIL COMPANY SUBSIDY.

Q. What is your judgment as to the policy which was pursued for a number of years of subsidizing the Pacific Mail Steamship Company?—A. I think that it was the wisest thing that our companies ever did.

Q. Will you please state in brief your reasons, comparing the amount paid with the amount saved?—A. During the greatest part of the period when we were under contract with the Pacific Mail Steamship Company, and previous to the time when the other competing railroad lines were created, we got all the way from 2½ to 5 and 6 cents a pound for the transportation of dry goods from New York to San Francisco. In 1886, the principal competitor for the New York business was the Pacific Mail Steamship Company. The rail lines, as I explained yesterday, with the exception of the Sunset route, dropped out. The rates got to be so low that the trunk lines would not share in them. We carried during that year dry goods at from 50 to 60 cents a hundred pounds, at an actual loss

Q. Is it your judgment that the amount of advantage was greater than the aggregate of the subsidy paid?—A. There is no question about that. Until the Pacific lines are allowed to arrange with the Pacific Mail Steamship Company, there will be no profit whatsoever in the through business.

By Commissioner LITTLER:

Q. Taking the Central Pacific all in all, and taking into account what you have said about it, it has not a very great future before it, has it?—A. Commissioner Anderson was speaking of the Southern Pacific, without reference to the aided lines.

CONDITION OF COUNTRY EAST OF RENO.

Q. I am speaking now with reference to the aided lines. What is your opinion?—A. I should say that there is no future for it at all east of the California State line; say east of Reno.

Q. Is it not your opinion that the fact that that road has been in active operation for over twenty years and that no agricultural resources of consequence have been developed during that time, and that only a limited amount of stock-raising has been carried on, shows that the country really is not adapted to agriculture or stock-growing to any great extent?—A. I think that one can easily see that the country is not especially adapted for agriculture. I do not think that you need to do more than look at it to determine that. Production to some extent can be forced. Lying off toward Oregon and back from the road there are many valleys which furnish very good stock ranges. The cattle feed on the white sage, and thrive upon it, but there are no such ranges as exist in Texas, New Mexico, or in Wyoming and Montana upon the line of the Union Pacific road.

Q. Is it not a fact that no town of any considerable importance has grown up along the line of that road anywhere between Ogden and the top of the Sierra Nevada Mountains, and is not this also conclusive evidence that there is not much in that country?—A. The facts must speak for themselves. There is no town of any considerable importance east of Reno. Elko, I think, has retrograded rather than advanced. Reno is quite a flourishing town, and I think has a future.

POPULATION OF NEVADA DECREASING.

Q. Is it not a fact that the country is practically uninhabited to-day, and is not that good evidence that the country is not of any considerable importance?—A. There has been a falling off in the population of Nevada between the census of 1880 and 1885. I believe that the statistics show that. That fact must speak for itself. To my mind, it is evidence that the country has not been progressing.

APPOINTMENT OF TRAFFIC AGENTS.

Q. What general officer of your company appoints the traffic agents? Who determines the necessity for their appointment and fixes their salaries?

The WITNESS. Do you mean soliciting agents, or do you mean myself?

Commissioner LITTLER. I do not mean yourself; I mean agents who occupy a lower round on the ladder than you do.

The WITNESS. When you say traffic agents, I understand that you mean commercial agents.

Commissioner LITTLER. I mean soliciting agents; solicitors of freight.

A. As a rule, I would recommend and the general manager would appoint.

Q. To start with, who determines the necessity for the appointment of an agent?—A. That is a matter of conference between the general manager and myself.

TRIED TO PREVENT HOSTILE LEGISLATION.

By the CHAIRMAN:

Q. What part have you taken in preventing hostile legislation in the several States through which the road passes?—A. I have on several occasions appeared before committees and showed them that our tariffs were just and that we furnished the cheapest transportation in the world; at least, I attempted to do it.

Q. Were you ever there at the request of the authorities of the Central Pacific Railroad Company?—A. Always.

Q. What legislatures have you visited?—A. On one occasion I visited the Nevada legislature at Carson, and on several occasions I visited the California State legislature.

Q. When did you commence to visit a legislature?—A. I do not remember. I never went unless I was sent for. I do not remember what specific sessions I attended. The principal one that is now in my mind was when I met my friend Mr. Cohen on the field of battle at Sacramento. That was on the Archer bill.

Q. Was he on the same side with you?—A. He was on the other side.

MR. COHEN'S CHARGE THAT $300,000 WAS SPENT TO DEFEAT ARCHER BILL.

Q. What was the Archer bill?—A. It was a bill fixing our tariffs absolutely.

Q. Did you ever hear a charge of corruption in the legislature during the pendency of that bill?

The WITNESS. What do you mean by corruption?

Q. Did you ever hear of Mr. Cohen in an open speech alleging that $300,000 was paid to defeat the Archer bill?—A. I never heard so.

Q. Have you ever read any of his speeches?—A. No, sir.

Mr. COHEN. There is a charge made against me. Do you state as a fact that I said that $300,000 had been used for that purpose?

The CHAIRMAN. It is printed in one of your speeches and I will read it to the witness.

Commissioner ANDERSON. I object.

SIMPLY STATED FACTS TO THE COMMITTEES.

Q. Was your business there with reference to explaining to the committees?—A. Altogether; simply stating the facts.

WAS ELECTED SCHOOL DIRECTOR.

Q. What part did you take in securing proper representatives to the legislature from the several districts?—A. I never took any part in politics in my life, except to run for school director once in this town.

By Commissioner ANDERSON:

Q. Did you get elected?—A. Yes; I headed the ticket. I got more votes than any other fellow.

By the CHAIRMAN:

TOOK NO PART IN POLITICS.

Q. Did you at any time participate for the purpose of securing proper representatives in the several legislatures?—A. I never paid any attention to that at all. It was not my business. I never, in any respect, with the exception of the one occasion that I mention to you, when I ran for school director, participated in politics, except to perform my duties as a citizen, as I understand them, without regard to the railroad company or my employment by it.

Q. Have you paid attention to the railroad legislation during the time that you have been connected with the company? I mean the legislation in California and Nevada.—A. I have had a current knowledge of it.

Q. Have you paid special attention to what has been regarded as hostile legislation?—A. I should regard anything as hostile legislation which pretended to regulate our freights and fares.

The CHAIRMAN. I mean the term "hostile legislation" as used by the act of Congress.

The WITNESS. I suppose it means that.

PASSAGE OF HOSTILE LEGISLATION.

Q. Have you any knowledge of the passage of any hostile legislation in the State of California or in Nevada?—A. Yes, sir. There have been enacted bills which change the maximum rate from 15 cents per ton per mile on freight and 10 cents per mile for passengers to the rates that were in force on the 1st day of January of the year in which the enactment was made. I cannot give you the exact date. Then there were commissioners appointed.

Q. How long ago was that?—A. I would have to hunt it up to tell you. Provisions were made previous to 1880 for a railroad commission. Afterwards the new constitution of the State of California provided for a permanent board.

THE FREEMAN BILL.

Q. Was there any other bill that you recall that you would regard as legislation hostile to railroad interests?—A. I cannot recall all of them. The earliest bill in my mind was the Freeman bill, which was defeated.

The CHAIRMAN. I am speaking of enacted legislation.

The WITNESS. Those are all that I recall.

DEFEAT OF HOSTILE BILLS.

Q. Were all the hostile bills defeated?—A. Except those that I have named.

Q. How many were there?—A. I cannot tell you. I think that they defeated themselves.

Q. How many bills that you regarded as hostile bills were enacted into laws?—A. I cannot tell you. I think that the only bills that have been enacted are those that I have described. How many bills it took

to provide for the railroad commissions which we had previous to the board that is established by the new constitution, I cannot tell you without referring to the records.

DEFINES "HOSTILE LEGISLATION."

Q. Would you regard as hostile, if enacted into laws, the bills that you have named?—A. I certainly would call them hostile legislation, as I should regard anything as hostile that would pretend to interfere with the right of the owners of the railroads to handle their property as you handle yours.

Q. Were there many bills of a hostile character, such as you describe, introduced into the legislature from time to time?—A. I have understood that there never has been a session of the legislature since the road was started but what there were bills of that character introduced. I think that seldom since I have been in California has there been a session of the legislature when there was not some such proposition.

Q. Were they supported by any large numbers in the legislature?—A. It is difficult for me to say. As they were defeated, I should say no.

SENTIMENTS OF THE PEOPLE OF CALIFORNIA AND NEVADA.

Q. Were the bills as introduced into the legislature of the States of California and Nevada a fair representation of the sentiment of the people throughout these States upon this question?—A. That is merely a matter of opinion with me.

The CHAIRMAN. That is what I am asking.

The WITNESS. If you want my judgment on it, I should say no, except perhaps when the anti-railroad fever, which at one time convulsed this continent, prevailed here. It spread from the East and from Iowa and Illinois to California, and the community here was excited. There were many matters which tended to excite our people here, and among them was what was known as the Goat Island scheme, which met the antagonism of a good many reasonable men. At one time during one session of the legislature I think that there had been quite an antagonism created against the railroad company by means of the newspapers and public debates.

ANTAGONISM DUE TO "WANT OF INFORMATION."

Q. To what do you attribute the sentiment that led up to these bills which were introduced from time to time?—A. Ignorance upon the part of the majority of the people concerning the facts.

Mr. COHEN. Will you put that "want of information"?

The WITNESS. Want of information may be better. I believe in using one word when it is better than several. It resulted from want of information on the part of the general public as to the facts, and from misstatements and misrepresentations on the part of those who thought that they had grievances against the railroad company, as well as from the general disposition of human nature to hit something.

Mr. COHEN. I would like to have the chairman justify the unfounded statement which he made a few moments ago. Will he please refer to my statement that the railroad company had paid $300,000 to the legislature?

EXTRACT FROM ARGUMENT OF A. A. COHEN.

The CHAIRMAN. I will read a paragraph from your argument in the case of the Central Pacific Railroad Company *vs.* Alfred A. Cohen, in

the twelfth district court, in the city and county of San Francisco, where you appeared in person before the honorable W. P. Daingerfield, presiding judge, without a jury, page 22:

This was the case it originally attempted to establish, but its witnesses lacking either the intelligence or the unscrupulousness necessary for that purpose, it was compelled to abandon its original position and amend its complaint. That remark does not do justice to the subject. Amend its complaint, do I say? Why, the practice that has been adopted by the pleader in this case might, by a mixture of mining and legal terms, be called prospecting practice. The plaintiff and its counsel have been sinking shafts, and have been running drifts in every direction, and have amended its complaint at every term. They have worked from the wall rock to the hanging rock, they have reached bed-rock, and have not found pay ore anywhere. What its next amendment will be, when we finish our argument, no living man can say. It may so amend as to state its real cause, not of action, but of complaint, and ask damages for losses and disbursements to the extent of three hundred and odd thousand dollars, said to have been made in the senate of the State of California last winter to offset my efforts on the question of railroad fares and freights.

Mr. COHEN. That is very different from the statement made by the chairman, that I said that of my own knowledge.

The CHAIRMAN. I did not state it of your own knowledge.

Mr. COHEN. That is the substance of your statement to the witness. My criticism upon the complaint in that case might be correctly applied to the proceedings of the Commission here. It is prospecting.

Commissioner ANDERSON. Let us cut this short. You have your complaint. The question that the chairman put you thought did not state your position correctly. Your statement has been read and is on the record.

Mr. COHEN. If the chairman, or the judge, goes outside of the record in the case to attack counsel, I want him to justify his statement.

The WITNESS. If I may be allowed to make the suggestion, what is the use of putting such stuff as that on the record?

The CHAIRMAN. As you are not the Commissioner, and I am, I must be the judge as to the record.

The WITNESS. Certainly. I was asking for information, as you were asking me a while ago.

By Mr. COHEN:

Q. You prepared two statements which appear as exhibits to the testimony of Governor Stanford, Exhibit No. 7 and Exhibit No. 12. Those were sworn to by you, were they not?—A. Yes, sir.

Q. As to Exhibit No. 7, do you wish to add any further explanation to the matters therein contained?—A. I do not know of anything that I can add to it.

Mr. COHEN. Look at Exhibit No. 12 and see whether that does not more completely answer many of the questions that have been addressed to you by the Commission.

EFFECT OF COMPLETION OF COMPETING LINES UPON RECEIPTS.

The WITNESS. Exhibit No. 12 shows the decrease in the tonnage and charges on the Central and Union Pacific line by reason of the completion of other roads to which I referred in my testimony. It shows this: Taking the period from January 1, 1874, to March 31, 1881, when the Central and Union Pacific line was the only line, the volume of the through traffic interchanged by California with the Eastern States passing over that line would be represented by 100 per cent. For the next period succeeding March 31, 1881, say from April 1, 1881, to December 31, 1881, which immediately succeeded the opening of the Atchison, Topeka and Santa Fé Railroad, the proportion of the total ton-

nage and charges carried by the Central and Union Pacific line was 94½ per cent. instead of 100 per cent. The next succeeding period was from January 1, 1882, to January 31, 1883, succeeding the opening of the Texas and Pacific line. The tonnage carried by the Union and Central Pacific line is represented by 69¼ per cent. and the earnings by 72¼ per cent. The next period was from February 1, 1883, to May 31, 1883, immediately succeeding the opening of the Galveston, Harrisburg and San Antonio Railway to a connection with the Southern Pacific Railroad. It shows the proportion of the Union and Central Pacific line tonnage to have been 57⅜ per cent. and charges 57½ per cent. The next period, from June 1, 1883, to September 30, 1883, succeeding the opening of the Denver and Rio Grande Railway, shows the proportion of the Union and Central Pacific line to have been 48¾ per cent. tonnage and 49.7 per cent. charges. The next period, from October 1, 1883, to September 30, 1884, succeeding the opening of the Atlantic and Pacific Railroad to a connection with the Southern Pacific, shows the proportion of the Union and Central Pacific line to have been, for tonnage, 42½ per cent., and for earnings, 43¼ per cent. The next period, from October 1, 1884, to December 31, 1885, immediately succeeding—the Northern Pacific was opened during the period October 1, 1883, to December 31, 1884. The next period was from October 31, 1884, to December 31, 1885, succeeding the opening of the Oregon Short Line in connection with the Union Pacific, and this statement shows that the proportion of the Union and Central Pacific line was 35¼ per cent. of the tonnage and 35.61 of the earnings. From January 1, 1886, to December 31, 1886, last year, the statement shows the proportion of the Union and Central Pacific line to have been 31.18 of the tonnage and 32⅜ per cent. of the earnings; showing an average reduction in the five years and nine months, beginning with March 31, 1881, and ending with December 31, 1886, in the proportion of traffic carried by the Union and Central Pacific line, from 100 per cent. to 48.35 per cent. of the tonnage and 52.46 per cent. of the earnings. This was all owing solely to the completion of competing railroad lines, which were in almost every case aided by the Government with a larger land grant than was received by the Union Pacific and the Central Pacific Railroad Companies.

Q. Is there any other information in the Exhibit No. 12 which you can briefly state for the information of the Commission?

BASIS OF CLAIM AS TO DIVERTED TRAFFIC.

By Commissioner ANDERSON:

Q. Before you leave that point, I would like to ask a question. In estimating what you call the falling off, or diverted traffic, do you make it the basis of your claim that the Union and Central Pacific Companies were entitled to the whole?—A. I make it upon this basis: that if the other lines had not been built, the Central and Union Pacific would have taken all of this traffic. They did have it all when they were the sole line.

Commissioner ANDERSON. I want to understand if the basis of Governor Stanford's claim is that the Government and the people ought to recognize this as an injury inflicted on the Central and Union Pacific; that the country owed to the Central and Union Pacific the duty of building no other through railroad until they had the permission of the Central and Union Pacific. If that duty does not exist, then your figures appear to have no point.

Mr. COHEN. We are not attempting to prove any such matter by this witness. We are undertaking to inform the Commission what has been the falling off of business and how it has been caused. I suppose that that is competent testimony to give to this Commission.

Commissioner ANDERSON. I was seeking to understand what your tables amounted to.

OBJECT OF THE ROAD IN MAKING THE CLAIM.

The WITNESS. As I understand it, you ask me the object of this, and you state that you do not think that the figures mean anything. I want to show you that it is your duty, and that it is made your duty under the act of Congress, to examine into this very question.

Commissioner ANDERSON. I know that it is put into the act for us to examine with regard to whether any earnings have been diverted, but I do not think that the earnings of a great country like the United States can possibly be divided in that way.

The WITNESS. I understand that it has been made the duty of the Commission to inquire if the United States, since the Union and Central Pacific Railroad Companies accepted the terms proposed by Congress for the construction of the Pacific railroads, has granted aid in lands for building competing parallel railroads to said Pacific railroads, and if so, how many such roads, and to what extent such competing lines have impaired the earning capacity of the Pacific railroads. That schedule is prepared to answer that question, and I regard it as your duty to receive and consider it.

Commissioner ANDERSON. I think that it will be the unanimous opinion of the Commission that you are the most intelligent witness that has so far appeared before it.

By Mr. COHEN:

Q. Will you kindly examine this exhibit and see what further information there is in it that you have not already given to the Commission?—A. There is nothing more in there that I care to speak of at present, except to call the chairman's attention to the fact that in my testimony I have referred to this exhibit as fully answering some questions that he asked. This is the exhibit to which I referred.

Mr. COHEN. We ask the Commissioners here to refer to and note the testimony of the witness on Exhibits 7 and 12 attached to the statement of the witness Leland Stanford.

The WITNESS. I have not been asked any questions upon the points contained in Exhibit No. 7.

Mr. COHEN. If you wish to explain anything on Exhibit No. 7, do so now.

IMPOSSIBLE TO FURNISH COMPLETE FILE OF TARIFFS AND RATES.

The WITNESS. The chairman asked that we produce a complete file of the tariffs and rates in force from the beginning of the road. I ascertained this morning that that is not possible. We have not got such a thing as a complete file of all the tariffs.

The CHAIRMAN. The call was for all of your rates, both passenger and freight.

The WITNESS. It is impossible to furnish them. I would like you to understand that we have no objection to so doing, if we could possibly do so. If we had them I should be very glad to give you these tariffs.

EXHIBIT 7, WITH PRESIDENT STANFORD'S TESTIMONY, ILLUSTRATES RATES OF FARE.

By the CHAIRMAN:

Q. Will you prepare them so far as they can be prepared?—A. I will make the very best compilation for you that I possibly can. No. 39 provides that this Commission shall inquire as to the rates of fare. This Exhibit No. 7 was prepared by me as an illustration of our rates of fare, and shows comparisons. It ought to be considered, and I think ought to go on the record, and so much of it as is possible ought to be published. I think it ought to go into the papers. I would like to have our side appear.

By Mr. COHEN:

Q. Do you wish to add anything to Exhibit No. 7?—A. No; I do not wish to add anything to it at all.

HUNTINGTON, HOPKINS & CO. COMPLAIN OF ILL-TREATMENT.

Q. You were asked as to the business of the firm of Huntington, Hopkins & Co., with the different roads under your charge. I want you to say briefly whether that firm ever had any advantage in any manner or form over and above other people engaged in the same line of business with them?—A. Never. As I said yesterday, I want to make that clear and emphatic. The suspicion has been abroad time and again, I have heard it from merchants here, that such was the fact; but in no case has there ever been any discrimination in their favor, or any favoritism of any nature whatsoever shown that firm. Indeed, they have complained that they were not as well treated as some other firms.

THE GENERAL CONTRACT PLAN.

By the CHAIRMAN:

Q. Let us understand your answer; let us see if you mean exactly what you say upon this question of advantage being give that firm. Has not the firm of Huntington, Hopkins & Co. always had a special contract as to their freight rates?—A. No, sir; the only special contract that Huntington, Hopkins & Co. ever had was made under the general contract plan, when the others had the same thing.

Q. Whom do you mean by the others?—A. I mean other houses doing the same kind of business.

BASIS OF PLAN.

Q. Do you mean doing a proportionate amount of business?—A. No, sir. I attempted to make that very plain yesterday, that the contract plan was not based upon the amount of business done at all, with this qualification: that when we inaugurated that system of doing business, we visited the merchants and stated to them practically as follows: You are now shipping a portion of your goods via Cape Horn. You use the Pacific Mail route for another portion. Those two routes get the largest proportion, as a rule. You use the rail line for another portion. As the capacity of our roads to do this business has not begun to be taxed, and because you divide your traffic in that way, it is necessary for us to agree on relatively low rates, based upon what you have been paying. We do not increase our expenses in the same ratio

with the increase of traffic carried. We would like to do all your business. We think that practically, upon the whole, or upon the average, we can carry all your traffic at no greater cost to you than you are subjected to by using all three routes.

THE PLAN APPROVED BY MERCHANTS.

There was scarcely a merchant that we submitted that proposition to but what would say, "I would rather do all my business by rail, but I doubt your ability to do that thing." Our answer would be that we would try it. We would then sit down in the merchant's office and endeavor to ascertain what proportion of his business he shipped by each route, and what his cost was by each route. Of course the cost of water carriage is determined not only by the freight rate charged by the carrier, but also by the items of insurance—because the railroad company is an insurer of goods and you do not have to insure when you ship by rail—and interest for the difference in time. The time required for the transportation of goods around Cape Horn ranged all the way from four months to six months, so that the item of interest was of considerable value to the merchant. We would endeavor to ascertain upon that basis the cost of using the three routes, the cost of freight, insurance, and interest aggregated, and then we would make an offer as to what we would do in the premises. Of course, it was in the nature of a dicker.

ADVANTAGES OF THE RAIL OVER WATER ROUTES.

The merchants were always ready to pay us more for shipping by rail, because there were many advantages which the rail route enjoyed over the route via Cape Horn. I cannot explain these advantages, and the merchants can scarcely explain them themselves, although they fully understand them. The advantage can scarcely be computed in dollars and cents. They were able to get their goods once in twenty days, or once in thirty days, instead of having to forecast their business and carry a six months' stock on water and a six months' stock in store. We had to go through and make a list of rates, and we would treat each article separately on information that we got from the merchant. We would then make a contract with such merchant. Dunham, Carrigan & Co., in the same line of business with Huntington, Hopkins & Co., made such a contract with us.

Q. Did you actually go to Huntington, Hopkins & Co.?—A. We did.

Q. Were they shipping by the water route?—A. Certainly, just as largely and perhaps more largely than any other firm in town. They never showed the railroad company a particle of preference. They were just as keen to get the lowest rates of freight as any other merchant.

THE PRIVILEGE EXTENDED TO ALL MERCHANTS.

Q. Did you visit all the hardware merchants and extend them the same privilege?—A. All. At the beginning we visited the large jobbing merchants. Why? Because the smaller dealer was not a shipper by sea. It was not necessary, therefore, to visit him. The small dealer did not have the capital to carry a six months' stock of goods in store and a six months' stock on the water, and therefore did not ship via Cape Horn. We got his business, if he imported anything. In the great majority of cases, however, the small dealers would buy from the jobbers in town, and it was not necessary for them to import anything.

I cannot tell you from memory all of the merchants that we visited. At the first, we confined our operations to two or three in each line of trade. They held out for a long time, as they were afraid to change their method of doing business. The merchant is conservative about changing his method of doing business, and the system was worked for a year or two before we got well started. After some time, when we demonstrated that what we had promised could be done, we managed to secure nearly all the business. We succeeded in getting 95 per cent. at least of it, and then it was thrown open to anybody and everybody.

JOBBERS OBJECTED TO OPEN RATES.

We made a list of rates which anybody who signed a contract could get whether he was a small merchant at Santa Cruz or a big jobber here; and that developed the most serious objection to this business with which we had met at any time. The jobbers here said that we were depriving them of advantages which they had before. They said that they had had great advantage in the matter of shipping by the Cape Horn route, and that we had no right to deprive them of it; that in throwing these rates open to everybody, we took away from them the advantages to which they were entitled by enabling every small dealer in the State to import his goods at as low rates as were enjoyed by the larger dealers.

MEMBERSHIP OF HUNTINGTON, HOPKINS & CO.

By Mr. COHEN:

Q. Will you explain who compose the firm of Huntington, Hopkins & Co.?—A. As near as I know, since my connection with the railroad company, it has been composed of Albert Gallatin, Charles Miller, W. R. S. Foye, and H. H. Seaton.

Q. How many years is it since either Mr. Huntington or Mr. Hopkins have had any interest in that firm?—A. I do not know. I have understood that they have no interest in it at all. Then, again, I have understood from other sources, that for a time they received a bonus for the use of the firm name, but that I am not competent to say anything about. My belief has been that neither Mr. Huntington nor Mr. Hopkins of late years has had any interest in the establishment, although, of course, they may have had. I am not sure. Governor Stanford never had any interest in that firm. He would not allow them to be discriminated in favor of. He was always sensitive on that point, and has frequently asked me, when he would hear remarks made that that firm was being favored, if anything of the kind was done. This has occurred several times, and his instructions upon this point have been most positive that no favoritism of any kind should be shown that firm or any other.

WERE OVERCHARGES ALLOWED TO PRESIDENT STANFORD.

By the CHAIRMAN:

Q. Have you ever allowed overcharges to Governor Stanford on shipments of grapes?—A. I do not know that he ever shipped any grapes.

Q. There appear several items in the refund book, to the extent of $1,800 to $2,000. Do you know anything about them?—A. It is very likely that overcharges have been returned to him, but I know nothing about them.

OBJECT OF SYSTEM OF SPECIAL CONTRACTS.

By Mr. COHEN:

Q. In arranging this system of rebates and special contracts, did you, at any time, do it with reference to the particular advantage of any one person or firm, or simply as a means of getting business from your competitors?—A. It was not done under a bushel. It was open and above board. Everybody in this community knew all about it. It was discussed in the newspapers, and the declared object and the sole object was to benefit the rail lines and divert to them a larger portion of the traffic than we had up to that time been able to secure. There seemed to be some necessity for a special plan, for the reason that our competition is peculiar. Vessels would come, some from New York and some from Europe, in ballast for the purpose of carrying the wheat cargoes for Europe, and they would have come for this wheat crop even if they had had to buy ballast. For this reason they would take freight at almost anything. The merchant here, and especially the large merchant, was always in a position to avail himself of opportunities for making shipments of that nature. As a rule, the large jobber here would divide his business. The high class and seasonable goods, and those that he wanted for immediate use, he would ship by rail, and would not inquire particularly as to what the rate was. The bulk of his tonnage, however, he would ship by sea.

NO DISCRIMINATION AGAINST SMALL DEALERS.

It has often been said that there was a discrimination worked by this contract plan, but we have never been able to see it in that way. We will say, for instance, that there was a small dealer here in San Francisco—a dealer in hardware—and that by reason of his small capital he was unable to use the long route, and shipped exclusively by rail. We will suppose that we gave the large jobber this special contract, and did not give it to the smaller dealer. Did we put that smaller dealer at a disadvantage as compared with the large jobber? No. We did not give the jobber anything that he did not possess. In fact, we brought them more nearly to the level in the cost of transportation than they were previous to our making the contract, because we tied the jobber up to exclusive shipments by rail, and gained from him more in the way of charges than he was accustomed to pay previously. I would like to say this, regarding the contract plan, and I think that it is just that I should do so. I stated yesterday that the scheme originated with the general freight agent of the Union Pacific, who, at that time, was Mr. E. P. Vining. Our people did not approve it at first, and I did not approve it, but after getting to work I did approve it, and I have been told by merchants here who were the last to go into it that it was the very best scheme ever adopted for handling this traffic, and that is perhaps more true of the smaller merchant than of the larger.

A JOINT AGENT.

Q. The Union Pacific and Central Pacific have always maintained a joint agent in the city of New York, have they not?—A. From the time of my connection with the road the Union and Central Pacific have had a joint agent in New York City.

Q. And have they one still?—A. I am not sure whether Mr. Knowland is now a Union Pacific agent proper, or whether we still share his

expenses. My impression is that we still pay our mileage proportion of his expenses.

SHIPMENT OF CALIFORNIA PRODUCTS TO THE TERRITORIES.

Q. You have been asked about the diversion of business from the Union Pacific road to other roads controlled by the Central Pacific. I would like to have you explain to the Commission what was the action of the Union Pacific towards the Central Pacific in the shipment of the products of California to the Territories controlled by that company—Montana, Idaho, and so forth. I would like to have you state whether they did not seek to take that business to the Eastern States and to shut the California people out of those markets?—A. I will state that fact, but I would want it to be understood that I do not state it as complaining of the Union Pacific.

Mr. COHEN. Merely state the facts.

The WITNESS: They were actuated in their policy by the rule that would govern any of us who would endeavor to get the business over the longest haul for the line. Previous to the passing of the Utah and Northern line under the control of the Union Pacific people, and previous to the completion of that road, the Montana business was, for the most part, transported by teams from Corinne, a station on the line of our road 24 miles west of Ogden. Montana was largely settled by Californians, and they are quite clannish; and so far as they could they used California goods. We had quite a considerable business with Montana.

Mr. COHEN. In canned goods, and so forth, I presume?

The WITNESS. In canned goods, coffees and teas, whisky, and so forth. After the control of the Utah and Northern passed into the possession of the Union Pacific, the road was extended to Butte City, and the Union Pacific endeavored to shut us out of Montana business in order to force those dealers there to ship exclusively from the east. I cannot describe all the methods which it pursued, but I remember that in some cases it charged for the service from Ogden to Butte City—Ogden is the point where we would have to deliver the goods to the Utah and Northern—almost the same price that the Union Pacific charged for the transportation from Omaha to Butte City. I believe also that I discovered cases where the rate from Omaha to Butte City was lower even than the rate which we had to pay from Ogden to Butte City.

REFUSAL OF UNION PACIFIC TO PRORATE.

Q. Did the Union Pacific refuse to prorate with you on Idaho and Montana business, and charge you local rates?—A. They charged us local rates for a long time, and doubled the local rates on us. Up to the time of the passage of the interstate commerce bill, or at the time that it went into effect, they would permit us to do business in Montana only upon these terms: That we should charge from San Francisco to Butte City the same rates that they charged from Omaha to Butte City, and give them for the 400 miles of service from Ogden to Butte City 75 per cent. of the through rate, while for the 833 mile haul from San Francisco to Ogden we got but 25 per cent. of the through rate.

EFFECT OF COMPLETION OF OREGON SHORT LINE.

Q. Will you please explain the effect on the business that the Central Pacific used to bring through to San Francisco for Oregon by the

building of the road known as the Oregon Short Line, which leaves the Union Pacific line at Granger?—A. The building of the Oregon Short Line and the Northern Pacific has diverted that traffic entirely, and taken it away from the Central Pacific.

By Commissioner ANDERSON:

Q. It came to San Francisco and went to Portland by steamer, did it not?—A. Yes, sir.

REASON OF PREFERENCE FOR "SUNSET" LINE.

By Mr. COHEN:

Q. You were asked about the business of the Southern Pacific Company and the advantages between that line and the Central Pacific. Has not the time in which goods are transported here from New York by the Southern Pacific as against the time used in bringing them over the Eastern trunk lines to Chicago, and from Chicago to the Missouri River, and then over the Union Pacific and Central Pacific, had something to do with the preference of shippers for the Sunset Line?—A. I think that the matter of improvement in time, that is the regularity of time, and the cessation of overcharges which had become an awful burden on the Union and Central Pacific line, perhaps is the sole reason why the route via New Orleans was able to do such a large share of the New York business. At the same time, I wish it understood that the fault with the Union and Central Pacific line did not lie with either the Union Pacific or Central Pacific Company. The trouble was all east of us. The lines east of the Missouri River took no interest. Our business was a mere bagatelle compared with their great intermediate business. Our business had to be done on a peculiar classification, something different from what they were using, because the rates were based on Cape Horn charges. We had to take many classes of freight at very low rates, and they regarded their proportion of these rates as being non-paying to them. They were dissatisfied with the divisions of the through rate, because of the lowness of the rates, and were constantly obstructing our business. As a rule, they paid very little attention to it, so that it took from four to six days to get freight through the city of Chicago. Then they would bill it without any regard to the tariff, so that there was—and that will perhaps explain something that I have been asked about—a time when there was scarcely a shipment from the East that did not reach here overcharged.

DELAY OF FREIGHT IN CHICAGO.

Q. How long did it take to get freight through the city of Chicago?—A. As a rule from four to six days.

Q. I mean to get it through the city itself?—A. That is what I mean. It took from four to six days. For instance, our freight would reach there to-day by the Lake Shore Line, and it would be necessary to transfer it over to the Northwestern depot. To get it there would take from four to six days. You know that there are seasons of the year there when they are crowded and jammed with traffic, and cannot furnish cars. All their switches and side tracks are full, and their lines are taxed to their fullest capacity. Of course their own particular traffic would have the preference, and they would slight our freight.

Q. What is the length of time taken by the New York Central, or by the Pennsylvania road, in carrying freight from New York to Chicago during the busy season?—A. They can usually take it in four days.

Q. What time do they take?—A. It is hard to say. It ranges all the way from four to ten days. The Union and Central Pacific line made a very fair average of ten days between Omaha and San Francisco. When the freight got to be neglected, and no special attention was paid to it on the other side, so that we had to follow the car in almost every case with a tracer, and it took from thirty to forty and forty-five days to get it from New York to San Francisco, except in rare cases, the delay and trouble were all charged to the Union Pacific road, but this charge was unjust. As I have said before, the considerations which influenced the merchants of San Francisco to patronize the line via New Orleans could be proved very easily by calling on those merchants.

EFFECT OF JOINT OWNERSHIP OF CENTRAL AND SOUTHERN PACIFIC.

Q. What, in your judgment, would have been the effect on the business interests of the Central Pacific if the Southern Pacific Railroad had been built by those not having any interest in the Central Pacific, but had been in the adverse ownership of others than the owners of the Central Pacific?—A. I think that is a proposition which is very clear to anybody. The joint control of the Central and Southern Pacific lines, of course, has been beneficial to both, but as the Central Pacific was the original line and enjoyed the larger traffic, and continues to enjoy the larger share of the traffic, the benefit to it was greater than to the Southern Pacific. If the Southern Pacific Railroad had not been built by our people, the Texas and Pacific road would have been extended through to California. They had their line surveyed, and had done some grading through the Soledad Cañon, which is between here and Los Angeles. If you take that trip, you will see their grade above ours in the Soledad Cañon. If the Texas and Pacific line had been built through to California, of course there would have been no check whatsoever. We would have had to deal with a competitor all the way from the tide-water on the Pacific coast through to the Missouri River.

By Commissioner ANDERSON:

Q. In the answer where you stated that the advantages have been both to the Central Pacific and the Southern Pacific, do you refer to the Central Pacific with reference to all of its branches, and the access to San Francisco, or do you refer to the aided portion of the Central Pacific?—A. I am referring to the through business. That would, of course, mean the aided line of the Central Pacific between Ogden and San Francisco.

THE AIDED LINE BENEFITED.

Q. Your answer is that in your judgment the aided line has been benefited by the construction of the Southern Pacific Railroad under the same general ownership; is that correct?—A. My answer is that both the Union and Central Pacific lines have been largely benefited by the fact that the line of the Southern Pacific road from El Paso to San Francisco has been controlled by the same parties who control the Central Pacific.

Q. Do you not perhaps mean that they have been less injured than they would have been if the ownership had been different?—A. Yes, sir, that is a better expression—they have been less injured.

By Mr. COHEN:

Q. If the Southern Pacific had not been built, then I understand you that the business now done over it would have been controlled by Mr.

Gould through the Texas and Pacific Railway and the other lines that he controls?—A. Yes; if he controlled the Texas and Pacific, he would have done it in that way. Tom Scott, however, is the man who would have built the Texas and Pacific.

Q. What part, if any, has Leland Stanford, the president of the Central Pacific Railroad Company, taken in regulating the traffic arrangements between the two roads, or controlling the traffic that should go on either road?—A. He has had nothing whatever to do with it.

THE COLORADO RIVER STEAMBOAS.

By Commissioner ANDERSON:

Q. Do you know the steamboats on the Colorado River that run up from Yuma?—A. Yes, sir; I know there are such.

Q. Take the traffic that comes from San Francisco to points on the Colorado River above Yuma; that will be carried over the railroad to Yuma, and then by the steamers to the points of destination, and the traffic going the other way would leave the points on the river, come to Yuma by the steamboats and thence by rail to California or other points; is that the case?—A. Yes; that has been the practice.

DIVISION OF RATES BETWEEN STEAMERS AND RAILROADS.

Q. Who controlled the prorating of rates as between the steamers and the railroads?—A. I do not remember whether I fixed those divisions without any conference with the general manager or whether I did it after a conference with him. My impression is that they originated with me.

Q. Do you remember what the divisions were?—A. I cannot tell you now. Of course I could tell you by looking at the books.

Commissioner ANDERSON. I would like to be informed.

By Mr. COHEN:

Q. You are now speaking of the Colorado Steam Navigation Company, are you not?—A. Yes, sir.

DIVISION OF PRORATES MADE BY AUDITOR.

By Commissioner ANDERSON:

Q. Who fixed the prorates for traffic interchanged between the Central Pacific main line and the leased lines, like the Northern Railway, the San Pablo and Tulare Railroad, the Amador Branch Railroad, and the other branches that were leased?—A. I do not understand that there has been any division made of the revenue between these roads and the main line.

Q. How are the earnings divided?—A. We will say, for example, that there have been times when some of these branches have been operated separately. My impression is that wherever there was an interchange of business between a branch line like the Amador Branch, or a purchased or leased road, like the Stockton and Copperopolis, or an acquired road, like the California Pacific, or a built road, like the Northern Railway and the San Pablo and Tulare Railroad—wherever there has been any division made other than that which would be made by local rates, or by straight mileage, it has been done in the auditor's office, and without any consultation with me. I think that Mr. Miller is responsible for those divisions, but I am not sure about it.

TERMS OF DIVISIONS.

Q. As matter of fact, do you know upon what terms such divisions were made, or what were the factors?—A. I do not believe that I can tell you what the divisions were. I have understood that as between the Stockton and Copperopolis road and the main line there was a constructive mileage given the Stockton and Copperopolis of 50 per cent., or double, I do not know which; and as between the Amador Branch and the main line I believe it was constructive mileage for a while.

Q. Is it not true that it was the practice to change the leases from time to time, and that the actual business or value represented in dollars done by the leased lines was used as a basis for fixing the changes in the rentals?—A. I have no information whatever upon that subject.

Mr. COHEN. He had nothing to do with leases.

DIVERSION OF TRAFFIC.

Q. Is it not true that the California Pacific Railroad has been used as the main line for the transportation, first of passengers and then of freight, from Sacramento to San Francisco; and that that diversion has very largely decreased the earnings over the line formerly known as the Western Pacific Railroad?

The WITNESS. Are you speaking now of any particular traffic, or only of the traffic between San Francisco and Sacramento?

Commissioner ANDERSON. I speak mainly of through traffic.

A. It has been sent latterly via the California Pacific.

Q. Is not the tendency of that to decrease the traffic actually done over the Western Pacific?—A. Whatever was credited to the California Pacific for the service between Sacramento and San Francisco would be taken from the line between Sacramento and San Francisco via Stockton.

Q. In regard to passenger and freight traffic going in the other direction, from points at and south of the Western Pacific at Niles, is it not true that it is now largely carried over the San Pablo and Tulare route to its junction with the Western Pacific?—A. From San José and south of Niles, whether the traffic is hauled over the Livermore Pass, or not, I cannot tell you. I do not know which way the freight is carried.

Q. To whom do you refer us for information on that point?—A. The general superintendent can tell you.

Q. What is his name?—A. J. A. Filmore.

Q. If that is done it would also tend to decrease the business actually done on the Western Pacific, would it not?—A. It would tend to decrease the business done over the section of road between Niles and Tracy, which is a portion of the aided line.

LONGER IN MILES, BUT SHORTER AS TO ECONOMY AND TRANSPORTATION.

Q. Would not the mileage by this new route be longer than it would be if run over the Western Pacific?—A. It would be longer in one sense—in the sense of miles—but shorter in the sense of economy and transportation.

Q. What do you mean by "in the sense of economy"?—A. Because it is a dead-level road, and the other is a mountain road, where we have a maximum grade, I think, of 50 feet to the mile.

Mr. COHEN. I think the grade is 90 feet to the mile.

The WITNESS. No, it is less than 60 feet, I think. There is something here from the general manager showing everything concerning that.

FACTORS OF THE PRORATE.

Q. Who fixes the prorate as between the different branches of the Southern Pacific Railroad and the Central Pacific as to the interchange of traffic?—A. I think that it is done now on actual mileage.

Q. Who fixed them from 1876 to 1886?—A. I think that distribution is made altogether in the auditor's office, and I presume that it would be done under the direction of Mr. Miller.

Q. Do you know what are the factors of the prorate?—A. Our system is composed of different roads. I do not take into account any of the different roads composing the entire system. The billing is all made as though it were one road.

Commissioner ANDERSON. I was talking of the distribution.

The WITNESS. Wait a moment. The segregation of those charges for the purpose of accounting is made altogether in the auditor's office, and I do not know anything about it except from hearsay.

EFFECT OF AN ARBITRARY FACTOR.

Q. What would be the effect of favoring the Southern Pacific by an arbitrary factor, on the apparent earnings of the Southern Pacific as compared with the Central Pacific, on the interchanged business?—A. The question answers itself. The effect of favoring it would be to favor it.

Q. The effect would be to increase the apparent revenue, would it not?—A. Certainly.

Q. And if the apparent revenue for a given time was used as the basis for altering or amending the leases it would tend to draw out from the Central Pacific its earnings and award them to the Southern Pacific, would it not?—A. It would certainly give the Southern Pacific an advantage. That is evident.

Q. Can you furnish us with the figures relating to the prorate between the Southern Pacific Railroad Company and the steamers on the Colorado River?—A. I will do so. I can furnish you with the divisions that have been used in apportioning charges.

Q. As to the other traffic that I have inquired about I understand that you refer us to the auditor, do you?—A. I refer you to Mr. Miller. I have heard that the mileage account is being made up by your experts, and I think that you will find Mr. Stevens thoroughly informed upon it.

RELATIVE COST OF CARRYING FREIGHT VIA CALIFORNIA PACIFIC AND WESTERN PACIFIC.

By Mr. COHEN:

Q. What is the relative cost of carrying a ton of freight from Sacramento via the California Pacific and via the Western Pacific to Oakland?—A. Without presuming to rate myself as an expert I should say that the difference in the cost of operating the line between Sacramento and Oakland via Semicia and via the Western Pacific, or the line between Sacramento and Oakland via Stockton and Niles, or even via Stockton and Tracy and Antioch and Martinez, would be 50 per cent. in favor of the short and level line of the California Pacific.

There is a difference in mileage of 58 miles in favor of the California Pacific as against the Stockton-Livermore line. There is a difference of about 69 or 70 miles in favor of the California Pacific as against the Stockton-Tracy-Martinez line. The total distance via the California Pacific line is about 84 or 85 miles.

Q. What saving is there in the operating expenses in the travel going from the Southern Pacific and going over the San Pablo and Tulare?—A. I should think 50 per cent. Of course there must be regard in all these things for the question of public convenience as well as economy. This company could not force passengers or traffic over the long line if it has a short line, against competition.

CAUSE OF COMPLAINT AGAINST THE GOVERNMENT.

By Commissioner ANDERSON:

Q. How do you distinguish between the cause of complaint, which you claim to have against the Government in the matter of its permitting the construction of other transcontinental lines, and your own acts in the opening up for the accommodation of the whole public the Southern Pacific system of roads, the San Pablo and Tulare Railroad, the California and Pacific Railroad, and the Northern Railway?—A. I do not question the wisdom of the Government in subsidizing with lands other roads which have been built in competition with the Union and Central Pacific line. I do not know but what you might say that it was the part of wisdom for the Government to do it, and open up to settlement that great portion of our country embraced within the Territories of Kansas, Nebraska, Montana, &c.; but the point of our complaint, as I understand it, is this: The Union and Central Pacific line is a debtor to the Government in a very large sum of money, a sum perhaps in excess of the value of the line. I doubt whether, even if these competing roads had never been built, the Union and Central Pacific roads would have been able ever to pay their debt to the Government. That was a thing that was obvious, or which should have been evident to every man in the United States who inquired into it. If the Government, being a creditor, gives larger land subsidies to other lines to be built in competition with this line, which certainly impair the earning power and reduce the value of the Central and Union Pacific line, it reduces the value of its own security, and when the Central and Union Pacific lines go before Congress and ask for an extension of the credit for a reasonable time, I think that it should be regarded as going there with a very strong equity case.

SOUTHERN PACIFIC NECESSARY TO CENTRAL AND UNION PACIFIC.

Now, the difference in our case is this: In the first place, the California Pacific road was not built by the Central Pacific. It was an older road than the Central Pacific between San Francisco and Sacramento, it was built first, it was the shorter line, and a line that would naturally take the business, and it is a line that any company operating it, having also a line east of Sacramento, would be required, with a due regard for public convenience, to send its traffic over. It was necessary in my judgment for the Central Pacific to control the California Pacific, because it got rid of a very well equipped competitor, because it neutralized or reduced competition between that line and its own line, because it stopped the extension of the California Pacific into territory that would hurt the Central Pacific, because it made it forever im-

possible for the California Pacific to become the nucleus of a trans-continental line, which was in my recollection discussed, and at one time seriously thought of. With respect to the local traffic on the line of the Western Pacific, barring San Francisco and Sacramento traffic the California Pacific is no competitor whatever. With respect to the traffic of the Oregon division north and the local traffic east of Sacramento, the California Pacific was the original rail line, and the business of the Western Pacific done with that territory, after it was completed, was business diverted from the California Pacific to the Western Pacific. So far as that business is concerned, there has never been any diversion to the California Pacific.

SAN PABLO AND TULARE AND NORTHERN RAILWAYS AS FEEDERS.

With respect to the San Pablo and Tulare Railroad and the Northern Railway, those roads were built to occupy territory which was productive, and which, if not occupied by our people and made feeders to the Central Pacific, would have been occupied by other railroad companies which would become competitors. If there is any fault to be found with our people, it is, in my judgment, because they have not built more lines through California as feeders. I think that if they had had a little more money, and been a little more active in Southern California, we would not be in the embarrassing position we occupy there to-day, and the whole property of the company would have been largely increased in value.

ROCKY MOUNTAIN COAL AND IRON COMPANY.

By Mr. COHEN:

Q. While I was on the question of the Union Pacific, I should have called your attention to the matter of the Rocky Mountain Coal and Iron Company. The Central Pacific for a long time, as I understand it, has obtained its coal for the operation of its road through the State of Nevada, from Evanston, which is on the line of the Union Pacific. What influence did that fact have upon the business transactions between the Union Pacific and Central Pacific? Was it used as a means of intimidation or coercion to control the Central Pacific and compel it to meet the views of the Union Pacific?—A. I do not think that the Union Pacific ever treated us very badly on that business. I would not like to testify as to that.

Q. Were not the rates on coal advanced from time to time by the Union Pacific?—A. I do not know. The question of rates between Evanston and Ogden has always been a moot question between the Central Pacific and the Union Pacific. In that respect we were in the position of shippers, and we growled, just as shippers ordinarily do. We always thought that we had to pay more than we ought to have paid.

A BENEFIT TO THE CENTRAL PACIFIC.

Q. What would have been the relations between the Central Pacific and the Union Pacific if this mine had been owned by the Union Pacific, instead of by the Central Pacific; in other words, if you had had to rely upon the Union Pacific for your supply of coal instead of mining it from a mine owned by yourself?—A. That is purely a matter of conjecture. I regard the owning of the Evanston mine by the Rocky Mountain Coal and Iron Company as having been of very great and material benefit to the Central Pacific. If I had been the manager of the Union Pacific and owned that mine, and the Central Pacific could not get coal from

any other mine, I should have got out of the Central Pacific all that I could. I could not tell you what the Union Pacific people would have done.

Mr. COHEN. I suppose that Mr. Towne can answer that question more fully than any other man.

PLAN OF SETTLEMENT.

Q. The Commission is charged by Congress, under question 58, to inquire what sums the Pacific railroads and their branches can severally pay annually on account of their indebtedness to the United States, without imposing such burdens on the people, and practically upon the localities through which the roads pass, as to retard the development of the country. Can you give any information to the Commission upon that question, other than you have testified to already?—A. Nothing more than what I have generally outlined in my testimony. I have never studied the question with reference to answering it in that form upon that point.

THE ARCHER BILL.

Q. You were asked about hostile legislation, and you spoke of a matter in which you met myself at Sacramento in the discussion of the Archer bill. I have already stated to the California commission, as the result of my recent experience, that if that bill had passed, it would have been a very unfortunate matter for the people of the State of California. What is your experience on the same subject?—A. I think that there would have been a special session of the legislature called to repeal it. If that Archer bill had passed, it would not have been possible for the railroad people to have constructed the Southern Pacific, or to have continued the construction, or to have built any other roads in the State of California.

Q. What would have been the effect on the people?—A. The effect upon the people would have been disastrous. The passage of such a bill as that, if it had remained in force, would, of course, have retarded all development. The bill was an absurdity in itself.

EFFECT ON CENTRAL PACIFIC OF INTERSTATE COMMERCE LAW.

By Commissioner LITTLER:

Q. Will you please state to the Commission what effect the interstate commerce law has had upon the Central Pacific road, if any?

Mr. COHEN. I suppose that you mean the recent bill?

Commissioner LITTLER. Yes.

The WITNESS. I am unable to give any fair idea at present of the probable effect of the bill. The first effect was to throw the Central Pacific out of all through business. That, perhaps, arose from the misconstruction of the provisions of the bill, or of the intent of Congress, a misconstruction that originated with the Eastern roads, and which was very general. Our people contended against it, but because the concensus of railroad opinion at the East was against them they had to submit to it. That has particular reference to the long and short haul clause in the fourth section. For the reasons I have stated, we had to practically abandon the through business, until we were able to present to the Commission a petition for the suspension of the operation of the fourth section. The Commission suspended the operation of the fourth section for seventy-five days, but in the mean time a large portion of our traffic had been diverted to other lines. It enabled the Canadian Pacific to get a foothold here that I do not think it otherwise would

have gotten. It gave them traffic and advertised them. It threw business to the Pacific Mail steamships, and to the Cape Horn vessels which we would have carried ourselves, but the extent and value of that business so diverted I am unable to tell you. The suspension that the Commission gave us was temporary, in order to give it time to examine the complaint; but since July 7, the Commission has decided in the case of the Louisville and Nashville Railroad this question generally. They said that they would grant no more suspensions, but gave it as their opinion that there were circumstances and conditions such as would justify the charging of a higher rate for an intermediate or short haul than for a longer haul, and used some illustrations which practically justified us, or confirmed the construction which our attorneys had previously placed upon the bill, and satisfied our Eastern connections, so that to-day we are continuing precisely as we did during the term of the suspension.

Commissioner LITTLER. And before the act was passed.

The WITNESS. And before the act was passed, except with respect to some methods of doing business at points where the competition was with railroads instead of with the clipper lines.

CONCEDE THAT CANADIAN PACIFIC IS HERE, AND TAKE CARE OF IT BY POOLING.

Q. Can you give the Commission any suggestion as to how this Canadian Pacific Company, which is a foreign institution, can be cut off and the traffic originating here or elsewhere in the United States diverted from it and be kept and carried by our own line?—A. You cannot cut them off completely. I suppose that Congress could pass a law which would prevent any duty-paying goods taking that line by not allowing it to operate under the immediate transportation act concerning bonded goods. That would help somewhat.

Q. Would it not, as to all duty-paying goods, operate as an embargo upon it?—A. Yes, sir; it would be an embargo upon all goods going that way. I suppose that if Congress would desire to do it, it might pass a law which would not permit goods to pass over that line from a point in the United States to another point in the United States. I suppose that Congress could put on such restrictions as would prevent what we might term domestic goods from going through this foreign country. The better way, in my judgment, however, would be to concede the fact that that line is there, and one of the permanent features of the country, and let the railroads take care of it by pooling.

The Commission then adjourned to Monday, August 15, 1887, at 10 a. m.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Monday, August 15, 1887.

The Commission met pursuant to adjournment, all the Commissioners being present.

JOHN C. STUBBS, being further examined, testified as follows:

Mr. COHEN. I produce the overcharge vouchers of the Central Pacific Railroad Company for the month of February, 1884.

CONCERNING OVERCHARGES PAID ON ACCOUNT OF ENTIRE LINE.

The WITNESS. There is one thing that I omitted to state when I was on the stand on Saturday last, owing to forgetfulness, and that was

with respect to overcharges that are paid on account of the entire line—amounts which are paid on account of other roads. In such cases the original papers all go to the other roads and rest in the hands of the first carriers. In such cases we file with our auditing department nothing but a receipt with reference to the numbers, and so forth; but on the books of the general freight office we keep an impression copy of the originals, so that you can get full information from them.

VOUCHER NO. 926—ROCKY MOUNTAIN COAL AND IRON COMPANY.

By the CHAIRMAN:

Q. I hand you voucher No. 926, amounting to $799.97, in the name of the Rocky Mountain Coal and Iron Company, overcharge on coal for the month of February, paid February 21, 1884. Will you please examine the voucher and say whether the charge there is an overcharge by way of error or an overcharge by way of rebate, and how you distinguish from the face of the bill?—A. That is what I call a rebate voucher. I distinguish from the fact that it says upon its face "as per agreement," and from the fact that we have a contract with the Rocky Mountain Coal and Iron Company, by which we give it a rebate on coal.

Q. Have you a contract during this year—the year 1884, named in the voucher—with the Rocky Mountain Coal and Iron Company?—A. I do not think that there was a written contract.

REBATES TO ROCKY MOUNTAIN COAL COMPANY.

Q. What percentage of rebate was allowed?—A. It was not a percentage. The rebate allowed is stated on the face of the voucher. The statement on the face of the voucher would be good evidence to a railroad accountant, such as I understand Mr. Stevens to be, that it was a rebate voucher.

Q. How long had the rebates been allowed prior to this year, 1884?—A. My recollection is that they existed from the beginning, say from the year 1870.

Q. Are all of the rebate vouchers distinguished by the mark "as per agreement"?—A. They are distinguished by the words "as per agreement" or its equivalent. In some of them you will find the letters "S. C.," which mean special contract.

Mr. COHEN. While the chairman is looking up that matter, you may as well state, and save cross-examination, as to the arrangements between the two companies as to the cost of fuel.

EXPLANATION OF THEM.

The WITNESS. I desire to explain the Rocky Mountain Coal and Iron Company's rebate. On none of the roads that our people have built have they found coal. On all of their lines, with the single exception of the Sierra Nevadas, there is a scarcity, if we might not fairly say an entire absence, of fuel, so that the companies were dependent for fuel upon supplies to be furnished off the line of the road. On that account, as I understand it, the company had an understanding with the Rocky Mountain Coal and Iron Company to the effect that the latter company should furnish coal for the use of the railroad company, delivered on board cars at a certain rate per ton. What that rate is I do not know. I cannot tell you. They use that coal for the main line of the Central

Pacific east of the Sierra Nevadas, never, I believe, using it in California. For California they obtain coal by purchase, the coal being brought from Europe, from Australia, or from Washington Territory. As I understand it, it was a part of the consideration for furnishing the company with coal at the prices stated, that the Rocky Mountain Coal and Iron Company should be assisted in supplying the commercial communities along the line of the road in Nevada with coal for domestic and commercial purposes, and this rebate is in pursuance of that understanding.

Q. Who compose the Rocky Mountain Coal and Iron Company?—A. I cannot tell you.

Commissioner LITTLER. We have that in evidence, Mr. Chairman.

The CHAIRMAN. I understand that we did not have it. If we have it I will not insist upon the question.

Commissioner ANDERSON. That has been very clearly stated.

The CHAIRMAN. I do not at all recall that we have had it.

WITH WHOM THE CONTRACT WAS MADE.

Q. With whom did you deal in the Rocky Mountain Coal and Iron Company in making this contract; who arranged it?—A. Whoever was in charge. At one time, the earliest name that I recollect is Mr. Diefendorff. After that it was General Colton, and after General Colton it was H. K. White, the secretary of the company; I believe that H. K. White is the name. I think latterly Mr. Douty, although I do not remember ever having had an interview with Mr. Douty upon the subject. This rebate was established very early in the history of the road, and has been continued without any change, according to my recollection. There has been no need of a conference, or debate, or interview upon the subject.

RELATION OF COAL AND IRON COMPANY TO CENTRAL PACIFIC.

Q. Has the Central Pacific Railroad Company, through its officers and directors,, a controlling interest in the Rocky Mountain Coal and Iron Company?—A. That I do not know.

Q. Is the General Colton whom you have named the General Colton who was a director in the Central Pacific?—A. The same.

Q. What other officers of the Central Pacific were interested in the company?—A. I do not know, except from hearsay. I know nothing about it from any actual knowledge. At the time that I dealt with General Colton I believe he was president of the Rocky Mountain Coal and Iron Company, and that he had nothing whatever to do with the Central Pacific, so far as my knowledge goes.

EXPLANATION OF VOUCHER.

Q. Does the voucher which is presented to you indicate the total amount of the freight bill represented in coal?—A. I do not understand your question. In order that you may fully understand, I will explain the voucher. You will find the first division of the voucher is for coal shipped from Ogden to Battle Mountain, Nevada, from January 4 to January 21, 1884. That presumably is all the coal that was shipped to Battle Mountain during that month. The amount was 245,600 pounds.

Commissioner ANDERSON. It does not state the charges.

The WITNESS. No; it does not state the original charges. Down under the total, under the words "should be refunded," you will find it

stated "on 245,600 pounds of coal to Battle Mountain, $3.89 per ton of 2,240 pounds," and, if you will figure that out, you will find that it exceeds $426.50, and that is the amount refunded on the shipments to Battle Mountain.

The second division of the voucher is for one shipment, on January 4, 1884, from Ogden to Palisade, 39,800 pounds. Presumably, that was all the commercial coal that was shipped to Palisade during that month. Under the head of "should be refunded" you will find it stated "should be refunded on 39,800 pounds of coal to Palisade at rate $2.25 per ton of 2,240 pounds," or $39.98, which was the amount refunded on that shipment.

THE BILL ONLY SHOWS AMOUNT OF REFUND.

Commissioner ANDERSON. We understand that. What the chairman said was that the bill does not show what the total amount of freight charged was, so that we can compare the amount of the refund with the amount of the charge, to see what proportion it is. He wants to see how the freight bill compares with the refund.

The WITNESS. It does not show that. It simply shows the amount of the refund. I did not understand the question.

Q. Are all of the rebate bills made up after the bill that you have been explaining to the Commission?

The WITNESS. Do you mean in this form?

The CHAIRMAN. Yes.

The WITNESS. They differ in accordance with the circumstances. Wherever the rebate was a specific rate per ton, or per hundred pounds, it would be shown in this form, and the voucher in the case probably would not show the amount of the freight charges collected.

The CHAIRMAN. As I understand your former explanation, the words "as per contract" would be written on all bills?

The WITNESS. Something to that effect.

The CHAIRMAN. I ask you especially, so that when I hand these bills to the accountant he will know how to distinguish them from the marks upon their face.

OVERCHARGE AND REBATE VOUCHERS.

The WITNESS. I thought that I understood why you wanted to examine these vouchers. I say that there is no difficulty at all, in my judgment, in a man like Mr. Stevens determining what is an overcharge voucher and what is a rebate voucher in examining these vouchers. The only difficulty that we would be likely to encounter, but that we could remove, would be in a case like that—like vouchers from 156 to 157, which is a duplicate voucher for shipments of through freight, the refund being divided between the several companies that participated in the transportation of the freight. In that case you will find that there are no subvouchers—no explanatory statements—nothing on the face of the duplicate that is at all explanatory of the nature of the claim. The reason for that is, that the original voucher which bears such explanation and the papers in support of it, if there are any, are transmitted by the Central Pacific to its next Eastern connection, or to the company from which it received the freight, in order to collect the proportion of the refund of that company and its Eastern connections. We can supply that omission by referring to the general freight agent's impression copies of the original vouchers, referred to by num-

bers. You will observe that on the duplicate the numbers on the bill are 158 to 187. Those are the auditor's numbers. You will also find the "G. F. A." (general freight agent) number 117616. By reference to the impression copy book in the office of the general freight agent any one can readily find "G. F. A." voucher 117616, which will give the explanation. I have it here, if you want to see it.

A SPECIAL CONTRACT WITH HUNTINGTON, HOPKINS & COMPANY.

Q. Was not the voucher which you have just named a voucher under the contract with Huntington, Hopkins & Co.?—A. The voucher, G. F. A. voucher 117616, is a voucher under the special contract with the firm of Huntington, Hopkins & Co., which I have heretofore explained as having been made in consequence of the adoption of what is generally known as the special contract plan for handling the through freight from the East to San Francisco and to other points in California.

Q. Why, then, are the words "as per contract" omitted from that voucher and placed upon a voucher such as that of the Rocky Mountain Coal and Iron Company?—A. They are not omitted.

Q. Where do they appear?—A. On the original voucher.

Q. Where is the original voucher?—A. It is impossible for me to say. It is in the possession of some Eastern line, some line east of the Union Pacific.

WHO MADE CONTRACT.

Q. Who made the contract?—A. The contract is in the name of the Union Pacific, Atchison, Topeka and Santa Fé, Texas and Pacific, and the other companies east of the line of the Central Pacific, forming parts of through lines.

Q. Was not the contract with Huntington, Hopkins & Co. made by your agent at the time that the contract system was in vogue?—A. No, sir; I think not.

The CHAIRMAN. I understood you to say that they went to Huntington, Hopkins & Co., as they did to other hardware men, and executed this contract.

The WITNESS. I think that if you will refer to my testimony you will find that I did not say that.

HOW MADE.

The CHAIRMAN. Please explain now what you mean.

The WITNESS. I stated distinctly that the general freight agent of the Union Pacific came to San Francisco and that with him I visited all of these firms and made these contracts; and I think that this is especially true of the hardware firms, because they were very large importers, and had goods that were peculiarly susceptible to shipment by the Cape Horn route. It was a class of business that we did not carry to any large extent, and which we were very anxious to get fixed onto our line.

Q. Did your road make a contract with them at the same time as the agent of the Union Pacific?—A. As I think I explained, on west-bound business we always deferred to the Union Pacific or to our Eastern roads. The Eastern companies were supposed, in accordance with a general custom, to be responsible for the handling of the west-bound business. We, of course, shared in the contract, and in my opinion were just as much parties to it as the Union Pacific.

A DUPLICATE VOUCHER.

Q. By what mark on this voucher do you determine it to be a rebate voucher?—A. As I have already explained, there is no mark on the paper which you have in your hand which indicates that it is a rebate voucher.

The CHAIRMAN. So that all of the rebate vouchers that appear here, represented by the different numbers, are not represented by the words "As per contract"?

The WITNESS. Those that you have before you are the duplicate vouchers that are filed in the office of the general auditor, and do not bear that notation.

Q. How do you determine that this is a duplicate voucher?—A. It is marked duplicate.

Q. Where?—A. There on its face.

Q. Then all vouchers marked "duplicate" and so printed we are to conclude are to be designated as rebate vouchers, are we?—A. No, sir.

DEFINITION OF A DUPLICATE VOUCHER.

Q. What other vouchers are distinguished by the term "duplicate"?—A. Every duplicate voucher is so distinguished. Wherever an overcharge, or rebate, if you prefer the term, is paid on account of other railroad companies, in whole or in part, the paper on file with the Central Pacific will simply be a duplicate. The original voucher, with all the evidence in support of the claim, will have passed to the connecting roads and rest in the hands of the first carrier transporting the freight.

Q. Would that word "duplicate," indorsed on the voucher, be any guide to the accountant in distinguishing the rebate vouchers?—A. Not a particle. To explain, or to repeat, we have impression copies of all the original vouchers, for which you will find duplicates on file in the auditor's office, which can be readily referred to. They are kept in the general freight agent's office for just such reference. If you want an illustration of it, I am prepared to treat the paper which you have in your hand and show you an impression copy of the original voucher, which will give you as much information as if you had the original voucher in your possession.

ORIGINAL AND DUPLICATE VOUCHERS.

The CHAIRMAN. We will have the impression of the original voucher. We simply want it explained so that we can distinguish these vouchers.

The WITNESS. If you will look at the book containing an impression copy of this voucher, you will find it distinguished. The total sum paid to Huntington, Hopkins & Co., is $1,010.59. On the back of the voucher appears the distribution of that sum, namely:

Central Pacific freight account	$276.08
Union Pacific	324.02
East	410.49

By "east" we mean the roads east of the Union Pacific which carried the freight. The duplicate voucher that we have been discussing, namely, 117616, embraces several vouchers which I have not noticed, namely, from 117616 to 117645.

Central Pacific Railroad Company to Huntington, Hopkins & Co., Dr.

For overcharge on freight in transportation from Pittsburgh to Sacramento: November 15, 1883, No. of way bill 23172, 221 reels of B. F. wire (which means barbed fence wire), weight 22,510 pounds. Total charges collected were	$263.30

The special contract that I refer to with Huntington, Hopkins & Co. provided for a rate on barbed fence wire from Pittsburgh to San Francisco of 90 cents per 100 pounds, so that under the words "should be" it reads: 22,510 pounds at 90 cents per 100 pounds, totaling $202.59, making an overcharge of $80.44, which is distributed as follows:

To the Central Pacific	$17.06
Union Pacific	20.05
East, that is, between Council Bluffs and Pittsburgh	43.31

The letters "S. C." on the face of the voucher indicate that the overcharge is by reason of that special contract referred to.

MEANING OF THE LETTERS "S. C." ON VOUCHER.

Q. Am I to understand that all vouchers marked "As per contract" on their face, and all vouchers indicated in the letter book, and explained by the letter book and marked "S. C.," are overcharges by way of rebate?—A. According to the definition that I have given you of rebates, my answer would be yes; but there is an explanation that should be borne in mind, or should be received, or else the Commission will not only be misled, but the public will be misled. The letters "S. C." as appearing on these vouchers, you will probably find on every voucher, with but few exceptions, for overcharges on west-bound through freight, because at that time I presume not less than 95 per cent. of the entire through business from the East to California and to Oregon was done under the special contract plan, so that the whole overcharge business, under the definition—all the overcharges paid on west-bound freight—would go into the accounts as rebates.

SPECIAL CONTRACTS NOT REBATES.

The CHAIRMAN. We want to get the total of rebates; that is what we want.

The WITNESS. I think that you are under a wrong impression, because really the business was done at the special-contract rates. There were very few people that did not have a special contract.

Q. That is, by way of rebate?

Mr. COHEN. They are not rebates.

The WITNESS. They are not rebates in the sense that the payments to the Rocky Mountain Coal and Iron Company are rebates, or rebates as understood by Eastern railroad companies. It was a peculiar condition. I do not suppose that there ever was any company, or any set of companies forming a line, that found it necessary to adopt a special plan of this sort, and to show all their business to have been done on a rebate plan.

The CHAIRMAN. The act of Congress calls for rebate or special contract. These are the terms that are used.

The WITNESS. I have no objection to whatever interpretation you put upon them. I only desire to make my explanation and put it on the record, so that you will know exactly what was done.

"RELIEF VOUCHERS."

By Commissioner LITTLER.

Q. In the history of the road, did you ever pay a rebate, except under a special contract? Does not a rebate necessarily imply a special contract?—A. Yes, sir. Sometimes, however, what are called "relief vouchers" have been made.

Q. It is not a rebate within the proper meaning of the term, is it?—A. You might say it was a rebate, but the general idea that attaches to the term "rebate," as understood by railroad companies, is where there is a contract, in consideration of which a lower rate will be accepted than the one at which the freight is billed, or with the understanding that a portion of the charges paid shall be refunded in consideration of certain things. We never paid a rebate but for the purpose of getting business for the company.

Q. Did you ever pay a rebate voluntarily and without any consideration?—A. Never, to my knowledge. I think the best evidence on that would be the statements of the importers in this city.

RATES FIXED BY SPECIAL CONTRACTS BECAME REGULAR RATES.

Colonel HAYMOND. Let me make one suggestion here for your benefit. The prices fixed by these contracts became the regular prices accepted by the roads doing the business. All the business was done at these rates, whether a man had one ton of freight to carry or a thousand tons. If he would make a contract he would get those rates, and they thus became the regular rates for the transportation of freight, and the object of those contracts was to secure to the rail lines the goods that had theretofore been carried via Cape Horn.

Commissioner ANDERSON. In other words, the exception became the rule.

The WITNESS. What is ordinarily the exception became the rule with us.

Commissioner LITTLER. As I understand it the published tariff rates of this company were chiefly intended to mislead your competitors and the public, and you did business chiefly under the contract system?

SPECIAL CONTRACTS NECESSARY TO SECURE BUSINESS.

The WITNESS. I would not state it in that way. In this particular case, as I have tried to explain, we had to meet very peculiar conditions of competition, and we could not put in an open tariff and secure the bulk of the through business against our competitors. Why? The difference between the cost of carriage via Cape Horn and overland was very material. If we reduce the open tariff our competitors would reduce their rates, the merchants would still go on assorting their business, and we would get but a trifle more. The result would be a reduction, and would show a loss, on business which we could just as well have secured at the higher rate. In order, therefore, to get the low-class business, we pursued this contract plan, and bound the merchant to ship exclusively by rail, and we tied him up just as tight as we knew how.

Q. This published tariff was the pool tariff agreed upon, and your agents, of course without the knowledge of the company, made cuts in freight rates to get trade, and the refunds were made through the aid of rebate vouchers. Is not this the case?—A. Originally; that is, before the contract plan was adopted, while we had a published tariff, it would, as a railroad man would state, amount to very little more than a maximum from which to cut.

SPECIAL CONTRACT RATES UNDERSTOOD.

By Mr. HAYMOND:

Q. Were not these contract rates as public as your other rates?—A. I think that the special contract plan was better understood than the

other tariff, because it was discussed here, the attention of every merchant was brought to it, and we invited everybody to come in.

The CHAIRMAN. I hand you voucher No. 536, in favor of the Boca Brewing Company, and I ask you to explain how you designate the voucher, as to whether it is a voucher by way of error, or a voucher by way of rebate under the special contract. It seems to be in a different form from the other.

The WITNESS. That is a local overcharge voucher. It is an overcharge voucher.

SPECIAL RATES TO BOCA BREWING COMPANY.

Q. Is it a voucher by way of error, or a voucher by way of rebate?—A. I will have to explain that, I guess, as I understand it. As I testified to the Commission the other day, we gave the Boca Brewing Company special rates on all their stuff, in order to induce them to establish a brewery at Boca. The rate upon rice was $15 per ton. My recollection is that at times when they wished to ship they would notify us, and a rate order would be given, so as to have the freight billed at the net rates. Sometimes they did not do so, and freight went forward billed at regular rates, and then the refund would be made by voucher, as we term it. There is nothing on the face of this voucher that indicates that it is a rebate voucher. There is no special contract—nothing of that sort.

VOUCHERS SHOULD INDICATE DIFFERENCE BETWEEN REBATES AND OVERCHARGES.

Q. Am I to understand from you that there are classes of vouchers which appear from time to time upon the face of which are no indications, or any marks, or any writing to indicate whether they are vouchers by way of rebate or by way of overcharge?—A. I have not intended to create any such impression on your mind. At the time that I made the statement I meant it. I believed it, that there was no voucher but what would indicate on its face to a railroad accountant whether it was a rebate voucher or simply an overcharge. Why that voucher does not do so I cannot explain. It is simply an oversight, and there may be others the same way. While there may be cases where it is not so, as a rule you may say that overcharges to the Boca Brewing Company would be what might be called rebates.

Mr. COHEN. There is nothing on the record to show that there is any writing on this voucher to indicate that it is an overcharge.

The WITNESS. I will only say that an accountant seeing a statement of that kind would probably understand that it was a rebate, or he would ask questions about it. We will give information whenever anything of that kind comes up. This is an exception, but I think that you will find such instances are very rare in the whole history of the road.

VOUCHER NO. 935.

By the CHAIRMAN:

Q. I hand you voucher No. 935. Will you please from its face indicate how you determine whether it is a voucher by way of error, or a voucher by way of rebate?—A. It says, "Should be as per general freight agent's letter to August Weihe," which indicates that it is a special rate.

AN OVERCHARGE NOT A REBATE.

Q. Was that a special rate by way of contract, or was it simply an individual case where the agent communicated by letter that a rebate would be allowed to that shipper?—A. It was undoubtedly an arrangement in advance of shipment. The explanation of this voucher is that it is not a rebate. As I read it, it makes the rate on pickets the same as on lumber, $40 per car. I presume that an examination will show that the tariff did not provide for any special rate on pickets, and it had to be done by an arrangement of that sort. I could not testify definitely about it without going back to the records, but my opinion is that it is not special in the sense of being a rebate.

Commissioner ANDERSON. That is another case, then, in which you cannot tell from an inspection of the voucher to which class it belongs, but must look to the records.

The WITNESS. I say that it is an overcharge.

HOW DETERMINED.

Q. Can you tell from the face of the voucher, or will you have to look at the correspondence?—A. I think that the correspondence attached to the voucher indicates that.

Q. Can you tell from the face of the voucher?—A. You cannot tell from the face of the voucher whether it is a rebate or an overcharge, except that the voucher says that it is an overcharge.

Commissioner ANDERSON. I only say that you must refer to the records for an explanation, or to your own personal knowledge.

Mr. COHEN. The explanation is that the papers attached to the voucher show what it is.

Commissioner ANDERSON. They make a reference to where the explanation can be found. I have not the slightest doubt in the world but that there is an explanation to every one of these vouchers.

The CHAIRMAN. We want to know only about the face of the voucher.

Mr. COHEN. We will give you the explanation.

Commissioner ANDERSON. We do not want it. All that we are driving at is to get the matter so arranged that our accountant can have intelligent information as to what he is to do. If it cannot be gathered from the face of the voucher, he will find it almost impracticable to get at the facts. In fact, he would never get through.

ANY RAILROAD ACCOUNTANT CAN DISTINGUISH.

Q. Are there any other indications on the vouchers presented to you that would show to the accountant what to write off as overcharges by way of rebate?—A. I cannot give you any further light on that subject than I already have. I do not know Mr. Stevens, but I understand him to be a railroad accountant, and I still insist that he, or any accountant, if you charge him with that work, can determine the difference between overcharge and rebate vouchers; and where there is any difficulty in the case, so that he would have to go outside of the evidence attached to or accompanying the voucher, the cases are so rare that they would not bother him much.

VOUCHER NO. 926.

By Commissioner ANDERSON:

Q. Will you please look at this voucher, No. 926, and give me the mileage of the different shipments indicated?—A. I cannot give it to

you from memory. If you have a railroad guide, I can work it out. The distance from Ogden to Elko is 276 miles. From Ogden to Palisade it is 306 miles. From Ogden to Reno, which is the point where the Virginia City freight leaves our road, the distance is 589 miles. From Ogden to Winnemucca it is 420 miles. From Ogden to Battle Mountain it is 360 miles.

Q. Has the rate of rebate any relation to the number of miles which the freight is carried?—A. I think not. I think that is an arbitrary rate. I think that that rebate was made by my predecessor, C. W. Smith, now vice-president of the Atchison, Topeka & Santa Fé Railroad Company.

DIFFERENCE IN REBATE ON COAL.

Q. Why is the rebate on coal carried to Battle Mountain more per mile than on coal carried to Palisade?—A. I do not know. I cannot explain the reasons for these rebates at all. I do not know anything about them, except what I have already given you.

Q. Has it any relation to possible competition with other coals?—A. I think not. I think that perhaps it is determined by the price necessary to lay coal down at these places, and I am not sure but what the fact that this coal is for the Nevada Central Railroad has something to do with it; that in order to supply coal for the Nevada Central Railroad the rate had to be reduced.

Q. What are the limits of the rebates allowed to this company; that is, the smallest rebate that you know of?—A. I cannot tell you. I can give you a list of them. I think that it is so much per ton for the several stations.

Q. I would like a list of the rebates allowed at the various stations. Will you furnish it?—A. I can give you that.

LIMITS OF COMMERCIAL PRICES OF ROCKY MOUNTAIN COAL.

Q. Do you know the limits of the different prices at which the Rocky Mountain Coal and Iron Company sells commercial coal per ton?—A. No; I do not know anything about that.

Q. Have you not agents at certain stations who sell coal?

The WITNESS. Do you mean agents of the Central Pacific?

Commissioner ANDERSON. Yes.

A. I believe not. I do not know of any such case.

Q. What is the price at which they sell coal to the Central Pacific?—A. I do not know.

Q. Do you refer us to Mr. Towne for that?—A. No; I do not refer you to anybody. I do not know who would be the best authority. I suppose that Mr. Douty would be the best authority on that point. He is now secretary of the Rocky Mountain Coal and Iron Company.

Q. Do you know whether these allowances have ever been the subject of discussion in your board?—A. I do not. I do not think that they have been changed since my connection with the road; they may have been. I am not sure about that, but I think there has been no change.

Q. Have you any idea how many tons of coal per annum you carry for the Rocky Mountain Coal Company upon which these allowances are made?—A. I have not; but of course I can easily ascertain.

Commissioner ANDERSON. Please furnish us with a statement of all the rates of rebates allowed to the Rocky Mountain Coal and Iron Company for the various stations upon the Central Pacific at which coal is

delivered, together with the prices at which coal is sold by that company and the amount sold per annum to the Central Pacific.

The WITNESS. Will you please call for some specific year?

Commissioner ANDERSON. Say 1885 and 1886. Give the total amount of coal carried by the Central Pacific for this coal company for commercial purposes during the same years, and the prices charged per ton for commercial coal.

The WITNESS. Do you want me to furnish that?

Commissioner ANDERSON. Some one else can furnish that, and you can give it to us, and then we will not have half a dozen papers to refer to. If you cannot get it I will get it from somebody else.

The WITNESS. You want the price charged by the Rocky Mountain Coal Company, do you not?

Commissioner ANDERSON. Yes, for commercial coal.

The WITNESS. I will answer one of those questions now. The price charged——

The CHAIRMAN. It is better to put it all in one statement.

MONTHLY AVERAGE OF REBATE VOUCHERS OF CENTRAL PACIFIC.

By the CHAIRMAN:

Q. How many vouchers, by way of rebate, will the Central Pacific average for a month?—A. According to what we have been discussing as rebates I suppose that in some months the number will run as high as four or five thousand.

Q. Would that be a fair average throughout the year?—A. No, sir.

Q. What would be an estimated average of the vouchers to be examined?—A. I could not say. You would have to examine all the overcharge vouchers, and they run up pretty high. They would amount to from 2,000 to 6,000 a month.

Q. Would the average be about 3,000?—A. It is a mere guess.

The CHAIRMAN. I am asking you for an estimate.

The WITNESS. It would be a mere guess. I could not give you any idea.

By Mr. HAYMOND:

Q. Would it not go into the thousands?—A. It would be at least from 2,500 to 3,000 a month. That would probably be what he would have to examine.

GREATER NUMBER ON THROUGH FREIGHT.

The CHAIRMAN. So that a large percentage of the 2,500 or 3,000 vouchers would be vouchers by way of rebate?

The WITNESS. Yes; I should think the larger percentage. The greater number of those vouchers would be on through freight, and the larger percentage of the claims paid on through freight would be under this special contract plan, and therefore rebates, as they have been termed.

HOW THE RATES WERE FIXED.

Q. Who determined the rate of rebate under this special-contract system for the Eastern companies? Who determined the percentage?—A. That was determined by the regular divisions. There was not any specific rebate provided for. If you will remember, I explained to you that we visited the merchants and dickered with them as to the rates

that we would take, and that we finally got settled down to a pretty general list or scheme of rates. Those rates were divided between the lines that carried the freight in certain proportions, and the difference between these open-tariff rates and these special-contract rates, whatever it might be, was charged up to these lines in the same proportion as they shared in the revenue as billed.

PROPORTIONATE SHARES FIXED BY THE DIVISIONS.

By Commissioner ANDERSON:

Q. Who fixed the proportions in which they shared?—A. They were fixed by the divisions.

Q. Who fixed the divisions? Were they fixed by a conference between all the railroad companies interested?—A. I may have taken part in it, but these general freight agents of Eastern lines change very often, so that I cannot answer that question. The representatives of the various lines fixed the divisions.

WHO FIXED THE DIVISIONS.

By the CHAIRMAN:

Q. Was it always done after consultation?—A. Yes, sir; necessarily so. To explain my answer: If you represent the Pittsburgh, Fort Wayne and Chicago Railroad, and Commissioner Anderson represents the Chicago and Northwestern, and Commissioner Littler represents the Union Pacific, and I represent the Central Pacific, and we wanted to arrange a through tariff between Pittsburgh and San Francisco, we would have to agree as to how we would divide the through rates, and that would be an agreement for divisions. That agreement for divisions would determine the share of each individual company.

The CHAIRMAN. I understand your meaning about through rates and fixing divisions, but I do not exactly understand how you held consultations upon the subject of rebates that were allowed on the several lines on through freight.

HOW CUT RATES WERE FIXED.

By Commissioner LITTLER:

Q. Who fixed the cut rates?—A. The general freight agent of the Union Pacific and the general freight agent of the Central Pacific—I was at one time the one who practically handled it—after a conference with various roads connecting with the Union Pacific at Council Bluffs, were authorized to make these contracts; that is, they were authorized to make rates which would take the business. That would not change the percentages at all. Those rates were divided between the several carriers precisely as the original open-tariff rates were divided.

EVERY MERCHANT VISITED.

By the CHAIRMAN:

Q. Did each agent, for his particular line and locality, select the merchants to whom rebates or special contracts were to be given?—A. No, sir.

Q. How were they selected?—A. There was not any selection made.

Q. Who was it that determined what particular merchants were to be visited?—A. We visited every merchant. At that time Mr. Vining was general freight agent of the Union Pacific, and he and I visited every merchant that we could think of in the city.

Q. Suppose you did not think of every merchant?

Mr. COHEN. Then they did not see them, I suppose?

The WITNESS. In that case, I suppose that we did not call on them, but they found it all out very soon.

Q. How did you inform the merchants upon whom you did not call?—A. They were notified through the press.

SMALL MERCHANTS GETTING SPECIAL CONTRACT RATES UNKNOWINGLY.

Q. And were their applications considered?—A. Yes, sir; and there were a great many smaller merchants in the interior who never had a contract, but to whom we gave the special contract rates without their knowing it.

Q. Did they make application?—A. No, sir.

Q. How did you discover them?—A. I think very likely that the order went out from me to place them all upon equal footing.

Mr. COHEN. The witness told all that three days ago.

The CHAIRMAN. I want him to repeat it again. I give you my word that I will not disturb you when you are cross-examining the witness.

Mr. COHEN. I do not wonder that you forget what he said; it was so long ago.

SPECIAL CONTRACTS OPEN TO EVERYBODY.

The CHAIRMAN. I simply want the method of doing business. First, I want to know how he designates rebates in order that the accountant may sum up the total. That was but fair and just. The second point was whether the consultations on rebates were not the same as the consultations on through freight rates, and how he distinguished them, and whether there have been special conferences called in order to determine the divisions of the rebates. I want to know whether the rebates were made after consultation as to through rates.

Mr. COHEN. The question that you want to have answered is whether the special contracts were open to everybody. Is not that it?

The CHAIRMAN. That is what I want.

The WITNESS. They were open to everybody on the same terms. In order, perhaps, that you may have a better understanding, I will say that I suppose that I have met Eastern railroad men in some years as often as six times a year, and sometimes two or three times a year. I am away from home, for no other purpose than to confer with them, more than half the time. This contract plan has been a matter of discussion between railroad companies and the merchants from New York to San Francisco, and is a matter of public knowledge.

DEDUCTIONS FROM GROSS EARNINGS.

By Mr. COHEN:

Q. I will call your attention to one of the branches of inquiry submitted to this Commission, as expressed in the printed question No. 10, which reads as follows:

And what amounts have been deducted from the gross earnings of any of said railroad companies, by their general freight and passenger agents or auditors, by way of rebate, percentage on business done, constructive mileage, monthly or other payments on any pooling or rate arrangement, contract, or agreement.

Now I will ask you in that connection whether the vouchers concerning which you have been testifying show the amount that is to be deducted from the gross earnings of the railroad companies or from the gross receipts of the railroad companies?—A. They are to be deducted from the gross receipts. This money was never earned and never was a part of the gross earnings of the road.

Q. Therefore, before these vouchers become of any practical benefit in this inquiry you must first separate from the amounts that were earned the gross receipts of the Central Pacific Railroad Company and the amount which came to it as gross earnings?

The CHAIRMAN. We had that some two weeks ago, in detail for each year.

OVERCHARGES OR REBATES NEVER A PART OF EARNINGS.

The WITNESS. An overcharge or rebate is never a part of the earnings of the road, and it never appears in its statement of gross earnings. It is a part of the gross receipts, just as the advances paid by the Central Pacific to the Union Pacific at Ogden, and collected here from the consignee, are a part of the gross receipts. All of these refunds are charges against freight account, and are made from gross receipts in order to determine gross earnings.

WHAT CONSTITUTES GROSS EARNINGS.

Q. Borrowing the language from the eminent jurist from Illinois, as he expressed himself on Saturday, I will ask you, for the information of the average Congressman, to explain what portion of the gross receipts, from goods transported from New York for instance, form the gross earnings of the aided portion of the line of the Central Pacific Railroad.

Commissioner LITTLER. Would not that depend on which end of the line the payment was made?

Mr. COHEN. Sometimes it does not.

The WITNESS. A fraction over 29 per cent.

By Commissioner LITTLER:

Q. I suppose that that is assuming that the freight bill was paid at this end of the line?—A. Yes, sir; Mr. Cohen asked for the percentage from New York to San Francisco. All of that money, the 100 per cent., would be collected by us and go into our accounts under the head of receipts; but in order to determine what the earnings would be, we must deduct from it in the monthly settlement, if we make a monthly settlement, or from the daily settlement, what we paid out as advances to the Union Pacific and the roads east of Omaha.

Q. What roads east of Omaha?—A. The Union Pacific would pay out for the roads east and add it to its own charges, and we would pay the sum total of all of these advances.

AN ILLUSTRATION.

By Mr. COHEN:

Q. In order to further illustrate that proposition, I will ask you, relating to this voucher for an allowance of $1,000 made to Huntington, Hopkins & Co., what portion of that $1,000 was paid by the Central Pacific?

The WITNESS. Do you mean charged off to the Central Pacific?

Mr. COHEN. Yes.

The WITNESS. As I remember, it was $276.08. The voucher itself shows the amount.

Q. The printed question No. 10, which I read to you, charges the Commissioners to inquire what amount has been deducted from the gross earnings by way of rebate. Can you explain any more fully to the Commission the term "rebate," as it is used by the act of Congress, as distinguished from overcharges which originate by the mistakes of freight clerks in the East, or of the freight clerks here, or allowances made under the special contract system, of which everybody had full and equal benefit?—A. I gave an illustration of what was ordinarily meant by the term "rebate."

The CHAIRMAN. I think that the witness went fully over that question on Friday.

Mr. COHEN. I want that term "rebate" defined, as ordinarily understood in commercial language.

DEFINITION OF THE TERM "REBATE."

The WITNESS. As generally used by railroad men, it means a refundment of the nature that we have made to the Rocky Mountain Coal and Iron Company—when it is made to an individual and is exclusive. Sometimes, however, it is employed—which is an inaccurate use of language—for the purpose of defining an arrangement like the one which I illustrated to the chairman. For example: If a man should agree with a railroad agent to ship, say, 10,000 tons of coal to a certain point within a given period, and in consideration of his shipping that amount of coal the railroad agent would give him a discount from the regular rate, that discount might have been a percentage off, or it might be, as in the case of the Rocky Mountain Coal and Iron Company, an arbitrary deduction. Now that would be entered on the rebate book in the freight office—for they keep such a book—and yet at the same time that contract rate would be open, and any other man or any other firm could get it upon the same terms; but if you boil it down to the idea that generally attaches to the word "rebate," and I think that is the public idea rather than the railroad man's, it is a private payment for the benefit of one person, or for the benefit of a particular firm or shipper.

A REBATE IS NOT A SPECIAL CONTRACT.

By Commissioner ANDERSON:

Q. Or to a class of firms or shippers?—A. No; I do not know that I would say a class of firms or shippers, because there would really be no conflict of interest between one class of firms and another class of firms.

Commissioner ANDERSON. I mean a limited class. For instance, all the smelters in a locality may be allowed a rebate for the purpose of advancing their own business as against the smelters in other localities.

Mr. COHEN. That is a special contract as distinguished from a rebate.

The WITNESS. I do not think that that is the public idea of a rebate.

Mr. COHEN. As I understand it, a rebate is a special allowance made for the benefit of a particular individual to whom it is made, and it is given to that individual alone, and to no other person.

The WITNESS. That is my idea of what the public think a rebate means.

Q. And is it not also what the railroad men think it means?—A. I did not say so.

Q. I ask you if it is not so?—A. No, sir. I will explain that. I said that it was often used by railroad men to mean a transaction such as I illustrated in the case of the coal shipment of 10,000 tons.

CONSTRUCTIVE MILEAGE.

By Mr. COHEN:

Q. You have not testified, I believe, as to any deduction from the gross earnings, by way of constructive mileage. Have you anything to state on that proposition?—A. I have not. I think that all the constructive mileage arrangements between the several parts of our road have been fixed in the auditing department; I think by Mr. Miller.

Q. Is it a mere matter of accounting?—A. Yes; it is a mere matter of accounting. I do not understand that there is any such thing on our road, or has been for some time.

DEDUCTIONS OF POOLING ARRANGEMENTS.

Q. The Commission is also charged to inquire into the deduction from gross earnings by pooling arrangements. Has there been any deduction from gross earnings by that means, or have not your gross earnings been increased by the pools to which you have belonged?—A. In every case our judgment is that our pools have increased our gross earnings over what they would have been had there been no pool. Our experience teaches us that fact beyond peradventure.

DIVERSION OF BUSINESS.

Q. As to other matters contained in the question, you have already testified so fully that I will not ask you anything more. I go back however to question 9, which reads:

Whether any traffic or business which could or should be done on the aided lines of said companies has been diverted to the lines of any other company, or to non-aided lines.

Q. Can you say anything more upon that subject than you have already said?—A. I cannot say anything more than has been said in the communication which I addressed to Governor Stanford, and which is made a part of his testimony here, and what has been said in a communication which, I think, the general manager has addressed to the president of the company, and which has been made a part of his testimony in this matter.

RELATIONS OF COMPANY TO COMMUNITIES.

Q. There is one question contained in this printed list of questions, concerning which I think perhaps you can give some valuable testimony to this Commission. It is question 36, which reads as follows:

Said Commission shall also inquire into and report upon the relations of said railroads to the interests of the communities through which they pass.

A. My answer to that question would be that, so far as I know, they are very pleasant. I do not know of any friction anywhere.

Mr. HAYMOND. The question covers a very broad ground.

Mr. COHEN. Think it over, and tell us how the railroads serve the interests of the communities through which they pass, what their condition was before the railroads were constructed, and what it is now. If you want time to think of that, we can call you at a later stage.

The WITNESS. I might make a twenty-four hours speech on that if I had the time.

Mr. COHEN. Then we will waive it.

Commissioner ANDERSON. Let him go ahead now.

GOVERNMENT TRANSPORTATION BEFORE AND AFTER COMPLETION OF ROAD.

Mr. COHEN. I call your attention also to question 47, which reads:

The Commissioners shall also ascertain the average cost per annum of Government transportation in the region now traversed by the Pacific railroads, between the year 1850 and the completion of said roads.

And also to question 48, which reads as follows:

And also the average cost per annum since such completion.

Have you considered the matters contained in these questions so that you can answer them?

The WITNESS. I have not figured them at all. I believe that Governor Stanford has taken up and exhausted those questions. I do not know anything about them.

COMPANY UNABLE TO PAY ITS DEBT TO GOVERNMENT.

Q. I will ask you to examine them, so that we can call you again on these points. I now call your attention to question 58, reading as follows:

Also, to inquire what sums the Pacific railroads and their branches can severally pay annually on account of their indebtedness to the United States, without imposing such burdens upon the people, and particularly upon the localities through which the roads pass, as to retard the development of the country.

Mr. HAYMOND. Before you can answer that question you will have to find out whether the Central Pacific Railroad Company is indebted to the Government. That is a matter which I do not admit.

Commissioner LITTLER. Suppose we assume that to be the fact.

The WITNESS. My opinion is that the Central Pacific Railroad Company will never be able to pay its debt to the Government, or any part of it.

By Commissioner ANDERSON:

Q. Is it your assertion that it can pay no part of it?—A. That is what I mean.

Q. Do you mean not half a million of dollars?—A. Not even that; it cannot afford to do it.

WILL REQUIRE ALL ITS RESOURCES TO PAY FIRST-MORTGAGE INTEREST AND OPERATING EXPERSES.

By Mr. COHEN:

Q. The question is what it can pay annually on account of its indebtedness to the United States without imposing such burdens upon the people, and particularly upon the localities through which the road passes, as to retard the development of the country. What is your knowledge with regard to the business of the roads upon these points?—A. My judgment is that, with the condition of things as they are at present, it will require all the resources of the Central Pacific Railroad Company to pay its obligations to the first-mortgage bond holders and the oper-

ating expenses of the line. I am speaking now of the aided portion of the road.

Q. Could it pay operating and fixed charges as they now exist?—A. Yes, sir.

Commissioner ANDERSON. I thought that the fixed charges had been assumed by the Southern Pacific Company.

The WITNESS. We are speaking now of what the Central Pacific can pay from its own earnings. That is quite distinct from what the Southern Pacific Company may do.

Commissioner ANDERSON. I am talking of what the Central Pacific can do with its proportion of the net rental under the lease.

The WITNESS. I do not know anything about that.

Commissioner ANDERSON. I did not understand the answer of the witness, as I knew the Southern Pacific Company made some payments.

Mr. HAYMOND. He did not understand that.

ONLY FIRST-MORTGAGE INTEREST AND OPERATING EXPENSES COULD BE PAID UNDER GOVERNMENT MANAGEMENT.

Q. Supposing that the Central Pacific is receiving $1,200,000 a year permanently with a chance of receiving more, do you think that the Central Pacific will be able to pay all its fixed charges and any portion of the Government debt?

The WITNESS. I have not gone deeply enough into the matter to answer that question. My answer, with my present knowledge, is this: From its earnings and from its probable future earnings, how much can the Central Pacific line, and by that I mean the aided line, pay to the Government towards liquidation of the debt? That is what I understand the question to be. My answer that I did not believe it could pay any portion of it was made in that sense.

By Commissioner ANDERSON:

Q. In other words, if the Government would take the aided road subject to the first mortgage, all that it could with the best management get out of it would be the interest on the first-mortgage bonds, and its operating expenses, and never gain anything on its debt. Is that what you mean?—A. I think so. That is my judgment, but my opinion might be changed after an investigation. The Government could do some business, but it would have less money at the end of the year than when it went in.

By Mr. HAYMOND:

Q. As against the competition, for instance, of the Atchison road, could it under Government management do any business?—A. Very little. I would like to operate the Atchison line against the Government operating the Central Pacific.

ADVANTAGES OF A TUNNEL FROM SODA SPRINGS TO COLD STREAM.

Q. Suppose that the grades on the mountain were reduced by a tunnel, say, from about Soda Springs to Cold Stream, what advantage do you think that would be?—A. It would give the owner of the road no advantage except in the reduction of operating expenses.

Q. Would not that be great?—A. It is very evident that it would decrease the expenses very much. It would do away with the snow sheds,

which are a very great expense, and we could carry across the mountains double the number of cars, perhaps, with one engine that we now carry.

MUTUAL ADVANTAGES OF LEASE OF CENTRAL BY SOUTHERN PACIFIC.

Q. Suppose that the Central Pacific was protected by a lease, a protection which it now has by its lease with the Southern Pacific Company, by which all of the roads between here and New York could be operated in harmony so that one road would protect the other, and that the Government would protect such a through line, what in your opinion under such an arrangement would be the value of the Central Pacific?—A. I can hardly say; I have already testified that it was my judgment that the control of what we call the Southern Pacific road by the same parties who control the Central Pacific Railroad was a very great advantage to the Central Pacific. It was of mutual advantage to the Central Pacific and the Southern Pacific, but as the Central Pacific has the larger share of the traffic, of course it has the larger share of the benefit. I want to add to that, that had it been that the Southern Pacific was under a separate control we would have had several years ago the condition of things with respect to through freight that existed last year, and it would have continued more or less up to the present time. That is, we would have had so much more difficulty in making the pools, if there had been divided interests west of the meridian of Ogden; in fact, in my judgment it would have been impossible to have made a pool in the past. Furthermore, if the Southern Pacific road had been under other control it would have occupied territory now occupied by the Central Pacific, it would have taken the Central Pacific business, and it would have affected the local business of the Central Pacific very materially.

EFFECT OF COMPETITION OF SOUTHERN PACIFIC UNDER HOSTILE MANAGEMENT.

Q. Suppose that the Southern Pacific road had been built by men hostile to the Central Pacific, instead of by men who are friendly to it, and the Oregon line had been left out, and that the Southern Pacific had been operated in hostility to the Central Pacific, do you suppose that the Central Pacific could have paid expenses under the state of affairs existing, with the competing lines of the Union Pacific and the other roads extending to the west, and the Atlantic Pacific paralleling it on the south? In other words, was not the power which the directors of the Central Pacific held in the Southern Pacific the only thing that saved the Central Pacific from extermination? I am now asking your opinion as a railroad man.—A. Deprive the Central Pacific of its non-aided feeders, and, I think, that would be the effect.

Q. If you deprive the Central Pacific of the non-aided lines, and put the Southern Pacific in hostility to it, would it not cease to exist as a railroad?—A. It would hardly cease to exist; but I know what you mean. I do not think that it could have been kept out of the hands of the first-mortgage bondholders.

Mr. HAYMOND. The Southern Pacific, as I understand it, and have always insisted, was built to protect the Central Pacific.

GROSS EARNINGS AND GROSS RECEIPTS.

By Commissioner LITTLER:

Q. What officer of the Central Pacific makes up the account of gross earnings?—A. I may say the general auditor. Possibly, the final ac-

count is made by the controller; if not made by him, it is so much under his supervision that I should be inclined to think him responsible for it.

Q. Do you know personally what sums of money of the gross receipts are eliminated from the accounts before the gross earnings are declared?—A. I do not.

BENEFIT TO CENTRAL PACIFIC OF CONTROL OF ROCKY MOUNTAIN COAL AND IRON COMPANY.

Mr. HAYMOND. Did Mr. Stubbs explain to the Commission the benefit which the Central Pacific derived from controlling the Rocky Mountain Coal and Iron Company?

The CHAIRMAN. There was an explanation made, but whether by Mr. Stubbs or not I do not remember. There was a full explanation made here in connection with the Rocky Mountain Coal and Iron Company.

Mr. HAYMOND. Please state what you have to say on that subject.

The WITNESS. In justification of the rebate which we have paid to the Rocky Mountain Coal and Iron Company, I would like to have it go upon the record that the railroad company would very likely have been at an expense for fuel of four or five times the amount that is paid for coal to the Rocky Mountain Coal and Iron Company. It would have had to depend upon other coal mines in Utah and in Wyoming for its fuel east of the Sierra Nevada Mountains. The owners of those coal mines would have understood that east of Reno the Central Pacific had 600 miles of road that was absolutely barren of fuel, and which could be supplied from no source except from California, and that in order to supply it from California the coal would have to be purchased in Europe or Australia, or in Washington Territory, and brought here in ships at a cost of all the way from six to eight dollars per ton put aboard cars at Oakland wharf; that it would then have to be transported over the Sierra Nevada Mountains at a very much greater expense for carriage than for carrying it west from Ogden. Under these circumstances there is no question in my mind but what this arrangement with the Rocky Mountain Coal and Iron Company was the very best investment that the Central Pacific people ever made. In fact, it was necessary in self-defense.

COST OF OBTAINING COAL FROM ROCK SPRINGS.

By Commissioner ANDERSON:

Q. Do you know what it would have cost to obtain coal over the Union Pacific from Rock Springs?—A. I know, as we know a great many things, from observation and human nature.

Q. I am asking you if you know from having made any negotiation?—A. I am answering your question.

Q. I am asking you if you know from having dealt with the officers of the Union Pacific, or from any propositions made to them asking for a specified price at which coal would be furnished?—A. If you ask me whether I know of any negotiations with the Union Pacific or any other coal company, or if such negotiations were ever had looking to getting a supply of coal from them, my answer is no.

Q. Do you know whether any public advertisement for proposals to furnish coal to your company was ever made?—A. My answer is no.

ARRANGEMENT WITH ROCKY MOUNTAIN COAL COMPANY PREVENTS EXCESSIVE CHARGES.

Q. Does it not suggest itself to your mind that in face of the contract made by your own directors, by which they voted to themselves

prices at which coal should be furnished by themselves to the Central Pacific, something more definite than the general proposition you make in regard to the difficulties that the Central Pacific might have encountered ought to be furnished before we can assume that the action of the directors in voting themselves these rebates on the prices at which they should furnish coal to the company should be accepted as sufficient explanation?—A. I cannot tell what influence my statement would have upon the Commission. I should judge from what I have seen that it would have very little effect. At the same time, however, I say that from my knowledge of human nature, of business men in the conduct of their business, from which I think they are no exceptions, it would certainly result that if any owner of a coal mine, whether a railroad company or a private individual, knew that there was a railroad company as absolutely cut off from a supply of fuel as is the Central Pacific, or as it would have been had it not made the arrangement with the Rocky Mountain Coal and Iron Company, that other coal company or individual would have endeavored to get the highest price possible for its coal, and the general commercial law of supply and demand would determine that price. A man situated in Wyoming or in Utah, having coal to sell, and with the Central Pacific seeking for coal in that Territory, would charge a price very little under the price at which the company could purchase its supply from other sources; and the only other source from which this supply could be obtained would be the English market, or Australia, or Washington Territory, which would have had to be brought to this country, paying transportation of from a thousand to several thousand miles, and then have to be transported by rail over the Sierra Nevada Mountains. It does not require any argument or explanation to prove that, as against any price that the Rocky Mountain Coal and Iron Company charges, the Central Pacific Railroad Company, without the control of this coal company, would have been at a cost four or five times greater than the present cost.

Q. Do you assert that there is but one person selling coal in Wyoming, Utah, or in the other States adjoining the line of the Union Pacific Railway?—A. I have not asserted that. On the contrary, I have been careful to say "other coal," while you have used the term "Union Pacific." Those coal mines, however, belonging to other companies are of comparatively recent development.

FOR MANY YEARS NO COMPETITION IN COAL PRODUCTION.

Q. Would not the Central Pacific have had the advantage of the competition naturally existing between the different producers of coal, so that it would have been protected by some competition other than that which you have referred to as existing from Australia and Europe?—A. When there was such competition, it certainly would have had the advantage, but it must be borne in mind that for many years there was no such competition. The coal mines of Utah were not accessible by rail until quite recently; all the coal that could be gotten was upon the line of the Union Pacific, and whether controlled or not by the Union Pacific, there would have been the question of transportation charges concerning which we would have had to deal with the Union Pacific. While I believe that the Union Pacific is fair, at the same time it would not have been regarded as unreasonable for them to have gotten a comparatively high rate of freight for transporting the coal to Ogden; it would have been governed by the consideration, "How much can we get? We will get all that we can."

FIRST RECEIPTS BY COMPANY OF ROCKY MOUNTAIN COAL.

By Mr. COHEN:

Q. At the time that the Central Pacific was completed to Promontory Point, did not the Union Pacific control all the coal mines within three or four hundred miles of the eastern terminus of the Central Pacific, excepting those coal mines which subsequently became the property of the Rocky Mountain Coal and Iron Company?—A. I cannot answer that; I can say this, however, that until the completion of the Utah and Northern road—and that fell into the hands of the Union Pacific—and the extension of the Utah Central road into southern Utah south of Salt Lake City, and the building of the Park City road, there was no coal accessible to the Central Pacific except the coal directly upon the line of the Union Pacific and owned by that company.

Q. And did not these mines furnish the coal for the use of the Union Pacific solely?—A. That is as I understand it.

Q. When did the Central Pacific first receive coal from the mines which are now owned by the Rocky Mountain Coal and Iron Company?—A. It has been receiving coal from those mines as far back as I can remember—ever since my connection with the company.

Q. As early as 1870?—A. Yes, I think so.

OWNERSHIP OF THOSE COAL LANDS.

Q. At that time did the directors of the Central Pacific own any portion of the coal lands that now belong to the Rocky Mountain Coal and Iron Company, or were they owned by other parties?—A. My understanding is that originally the coal lands which now belong to the Rocky Mountain Coal and Iron Company were not owned by the Central Pacific or by any of the parties interested in that company; I do not know definitely as to that, however, and I could not swear to a positive statement.

Q. When did you come on the road?—A. October 1, 1870.

Q. You do not know anything about the ownership of these coal lands at that time, do you?—A. I do not.

RATES CHARGED ON MATERIAL FOR SOUTHERN PACIFIC.

By Commissioner ANDERSON:

Q. Did I ask you the other day if you made special rates at which material used in the construction of the Southern Pacific Railroad was carried over the Central Pacific road? I mean freight rates.—A. I was examined on what the rates have been for the Pacific Improvement Company, the Western Development Company, and the Contract and Finance Company, and I stated them.

Commissioner ANDERSON. I mean the rates at which material used by the Western Development Company and by the Pacific Improvement Company was carried over the Central Pacific.

Mr. COHEN. I suppose that you mean over the whole of the Central Pacific?

Commissioner ANDERSON. Over any part of it; over the part on which it was carried.

The WITNESS. I think that the question which I remember I did not answer was about the Southern Development Company.

Q. Can you state the rates at which material intended to be used in the construction of the different branches of the Southern Pacific and

of the other auxiliary branches of what was known as the Central Pacific before the lease of 1885 was carried over the Central Pacific line or any portion of it for delivery to the construction companies charged with the building of the Southern Pacific Railroad or the branches aforesaid?—A. My recollection is that we charged 2 cents per ton per mile. That is the regular rate to those construction companies. I do not remember whether there was any special deduction made from that or not. I would have to look that up.

Q. Can you readily ascertain?—A. I will try.

Q. Will you ascertain at what rates material for the construction of the Southern Pacific or other roads leased to the Central Pacific was carried over the Central Pacific, and also the rebates allowed on such freight?—A. Yes, sir.

J. C. STUBBS.

The following papers were subsequently received from Mr. Stubbs:

[Southern Pacific Company, Office of the General Traffic Manager. J. C. Stubbs, General Traffic Manager.]

SAN FRANCISCO, *August* 17, 1887.

Hon. ROBERT E. PATTISON,
Chairman United States Pacific Railroad Commission:

DEAR SIR: In response to your request for the rates and divisions of the rates on traffic interchanged by the Southern Pacific Railroad with the Colorado Steam Navigation Company, I beg to hand you herewith—

(1) Joint through tariff (No. 1) of Southern Pacific Railroad and Colorado Steam Navigation Company, taking effect May 21, 1877, between San Francisco and Colorado River landings named on the tariff;

(2) Local freight tariff (No. 1) of Colorado Steam Navigation Company, taking effect May 21, 1877, showing the rates between Yuma, Ariz., and the Colorado River landings named on the face of the tariff;

(3) Special ore tariff (No. 1) of Southern Pacific Railroad and Colorado Steam Navigation Company from the Colorado River landings named on the tariff to San Francisco, Sacramento, Melrose, Oakland, and Oakland Wharf, California;

(4) Exhibit of rates and divisions on merchandise between San Francisco and points on Colorado River, with a comparison of Colorado Steam Navigation Company's share of said rates with its local rates from Yuma.

On the last-described exhibit you will observe, under the head of "Maximum rate per 100 pounds from San Francisco," the rail proportion is $5.394, being the maximum rate chargeable by law for 719.2 miles at 15 cents per ton per mile. Under "First-class rate" you will observe that the steamer proportion to Castle Dome, Eureka, and Chimney Peak landings is 25 cents per 100 pounds, which is the local rate of the Steam Navigation Company, shown on the local freight tariff, the remainder being given to the railroad, while for Rood's, Redondo's, and Camp California the steamer proportion is 25 cents per 100 pounds, or two-thirds of its local rate, the remainder being given to the railroad company. Above Camp California you will observe that the proportion of the railroad is fixed at $2.25 per 100 pounds, the remainder of the through rate being given to the navigation company.

In making these divisions the object in view, and which I think was approximately gained, was to make each company share the reductions from the combined local rates required to make the necessary through rate in the same ratio; that is to say, if the through rate was 10 per cent. less than the sum of the locals to and from the Colorado River, the shares of each company were fixed at 10 per cent. less than its respective local rate. This could only be approximately done for the reason that the through tariff was based upon a classification different not only from the railroad classification, which governed local traffic to and from the Colorado River, but also from the navigation company's tariff, which governed its local traffic on the river, the railroad company's tariff on merchandise being divided into seven different classes, and the navigation company's tariff rating measurement goods by the foot and weight goods per ton of 2,000 pounds, while the joint through tariff is a weight tariff having but two classes.

The divisions of the rates on the special ore tariff were made by giving the railroad company its local rates from Yuma, the navigation company taking the balance.

Very respectfully, your obedient servant,

J. C. STUBBS.

P. S.—The rates and divisions aforesaid were fixed by the undersigned.

J. C. STUBBS.

J. C. STUBBS,
General Traffic Manager, Southern Pacific Company.

[Central Pacific Railroad Company, Office of the General Traffic Manager. J. C. Stubbs, General Traffic Manager.]

SAN FRANCISCO, *October* 9, 1884.

Mr. E. H. MILLER, Jr., *Secretary:*

DEAR SIR: I beg to hand you herewith copy of pooling agreement between the Atlantic and Pacific and the Central Pacific and Southern Pacific Companies, made September 18, 1884.

This agreement, while executed at Chicago on the date above named, was really made in New York at the time of the making of the contract for the lease and purchase of the Colorado Division and the traffic arrangement with the Atlantic and Pacific from Mojave to San Francisco, and was one of the considerations for said contract and agreement.

Yours truly,

J. C. STUBBS.

Memorandum of agreement, made this 18th day of September, 1884, between the Atlantic and Pacific Railroad Company, party of the first part, and the Central and Southern Pacific Railroad Companies, party of the second part (referring to an agreement made between the above-mentioned companies under date of August 20, 1884).

It is mutually agreed by the parties hereto that it is to their best interests that an understanding be had for the purpose of securing to each of the parties a fair and equitable revenue from the business carried. It is therefore agreed—

(1) That the earnings from through traffic, described in section 7 of the agreement dated August 20 1884, above referred to, shall be pooled by the lines west of Og

Albuquerque, El Paso, and Deming, respectively, on the basis of the rates charged and collected for like services between Ogden and San Francisco, that is to say, 46 per cent. of the rates or proportions of through rates between Kansas City and San Francisco shall be contributed to the pool by each of the lines. The sum so contributed shall be redistributed between the lines as follows:

To the Central Pacific line west of Ogden and the Southern Pacific line west of El Paso and Deming, jointly, 73 per cent.

To the Atlantic and Pacific line west of Albuquerque, 27 per cent.

The contributions to the pool and the amounts to be drawn from the pool by the Atlantic and Pacific line shall be subdivided between the roads west of Albuquerque, forming said line, in proportion to the earnings of each road.

(2) Settlements under the agreement shall be made by exchange of balances monthly.

Necessary ticket, freight, and other reports, as may be required for the full and proper information of either party as to the business subject to this agreement, shall be promptly and regularly exchanged between the parties hereto.

(3) It is also agreed that all subsidies agreed to be paid with steamship or other competing lines, which are at this date acknowledged by the Transcontinental Association, are hereby acknowledged and confirmed by the Atlantic and Pacific Company, and said Atlantic and Pacific Company agrees to pay an increased share of said obligations in proportion to its increase of interest in the traffic by reason of the extension of its line to Mojave, Cal.

It is further understood and agreed that the Central Pacific Company shall, according to its ability, cause to be routed over the Atlantic and Pacific Company's line, via Mojave, a share of the unconsigned east-bound through-freight traffic, as defined in section 7 of the agreement of August 20, 1884, equal to the proportion of same traffic west-bound carried by the Atlantic and Pacific Company, provided that in no case shall that share exceed twenty-seven (27) per cent. of the whole unconsigned east-bound freight traffic.

This agreement shall take effect October 1, 1884, and be subject to ninety (90) days' notice by either party to the other of its intention to withdraw therefrom.

[Copy.]

Whereas the Atlantic and Pacific Railroad Company, party of the first part, and the Central Pacific Railroad Company and the Southern Pacific Railroad Company, parties of the second party, on the 18th day of September, 1884, entered into an agreement to pool certain traffic described in the written instrument of date September 18, 1884, said pool to run from October 1, 1884, until either party should give to the other ninety (90) days' notice of its intention to withdraw; and

Whereas said pooling agreement is mutually unsatisfactory to the parties hereto, it is hereby mutually agreed and understood that the said ninety (90) days' notice required to terminate said agreement is waived and said agreement terminated with this day.

Dated Windsor Hotel, New York, February 17, 1886.

ATLANTIC AND PACIFIC RAILROAD COMPANY,
By D. B. ROBINSON,
General Manager.

THE CENTRAL AND SOUTHERN PACIFIC RAILROAD COMPANIES,
By J. C. STUBBS,
General Traffic Manager, Southern Pacific Company.

From J. C. Stubbs, February 22, 1886.

PALACE HOTEL, SAN FRANCISCO, CAL.,

THE HUNTINGTON-COLTON LETTERS.

Mr. COHEN. If the Commission please, there is a gentleman here, G. Frank Smith, who is attorney for Mrs. Colton. Mr. Smith says that Mrs. Colton has been subpœnaed to produce certain letters written by Mr. Huntington to General Colton.—She is unwell, and does not desire to attend, unless it is imperative.

Mr. G. FRANK SMITH. Mrs. Colton is at Santa Cruz. She is there for her health, which is not very good. She has telegraphed me saying that she has been subpœnaed, and that of course if you insist upon it she will come.

Commissioner ANDERSON. Mrs. Colton told the officer who served the subpœna that she would give instructions to have all the letters called for produced.

Mr. SMITH. Those letters have all been printed, and you can get all you want from the printed document.

THE ORIGINALS CALLED FOR.

Commissioner ANDERSON. We want the letters themselves.

Mr. SMITH. They are in my custody.

Commissioner ANDERSON. We want all of them, for two or three reasons. In the first place, they have not been all printed. In the second place, those printed have not the names printed; and in the third place, the printed copies are not admissible in evidence in the absence of the originals, unless the originals are accounted for.

Mr. SMITH. I will give you the originals. The question is whether you want Mrs. Colton to come here.

Commissioner ANDERSON. We want the letters.

Mr. SMITH. I will undertake to produce them at any time that you designate. Mrs. Colton telegraphs me that she is subpœnaed for the 17th instant. On the 17th I will come here, and produce all the letters.

Commissioner ANDERSON. In all, I believe there are three or four hundred letters, are there not?

Mr. SMITH. There are a great many.

Commissioner ANDERSON. It is very likely that there are not over fifty letters there that we would require, and I would suggest that a great deal of time might be saved if I could go over the list or the index of the letters with you, and select those that are in point.

Mr. SMITH. How will you arrange for the selection to be made?

Commissioner ANDERSON. I will call at your office, if you will name a time. Where are the letters?

Mr. SMITH. Some are at my office, and some are at Mr. Hayes's office.

Commissioner ANDERSON. Where can I see them, and when, if I go to your office, or to Mr. Hayes's office, so that I can go over them and select them?

COUNSEL FOR MRS. COLTON AGREES TO PRODUCE THEM.

Mr. SMITH. I will give you all the letters that I have in my possession and take your receipt, and you can assort them.

Commissioner ANDERSON. Where shall I go?

Mr. SMITH. I will bring them here. I will give you the whole of them, and you can assort them yourself.

Commissioner ANDERSON. Is there not an index to them? If there is that might facilitate us.

Mr. SMITH. No, sir; they are not in book form.

Commissioner ANDERSON. I thought that an analytical index of them had been prepared.

Mr. SMITH. There is a printed index of those that have been used. If you use the printed copies you can use the printed index also.

Commissioner ANDERSON. The printed letters, so far as I know, do not contain the names.

Mr. SMITH. They were omitted by order of court.

Commissioner ANDERSON. I understand that; but that is the essential difference, so far as the object of this Commission is concerned.

Mr. SMITH. I have no feeling in the matter one way or the other. I am willing to meet your convenience in any manner that you may designate.

Commissioner ANDERSON. If you will send the letters here this afternoon we will give you a receipt, and return those which do not concern us.

COUNSEL FOR COMPANY INSISTS ON PRODUCTION OF ALL THE LETTERS.

Mr. COHEN. We have something to say about that. If a subpœna has been issued to produce those letters, we want all of them, because those that you may select, which you think will do damage to our case, may be explained by others which you do not select.

Commissioner ANDERSON. You do not understand. The purpose of my motion is not to select those which will damage, or those which will not damage, but to omit those which have no possible relation to the United States.

Mr. COHEN. Those which you may put in may probably be explained by those which you do not put in.

Commissioner ANDERSON. They will all be at your service. We call for all of them.

Mr. HAYMOND. Do I understand that the letters written by Mr. Huntington are to be introduced in evidence, when he is not upon the stand, in a proceeding to which he is not a party? I do not think that they are admissible.

Commissioner ANDERSON. The only question now is as to a convenient method of going over the letters, and, if you choose, rejecting those which are mere surplusage.

Mr. HAYMOND. I should object on the ground that they are not admissible.

Commissioner ANDERSON. Sufficient for the day is the evil thereof. Do you think that you can get those letters here this afternoon at 1 o'clock?

Mr. SMITH. I will endeavor to send them here as soon as I can. Some of them are at the office of Stanly, Stoney & Hayes, and I do not know that I shall be able to get access to them. If I should not, I will send them to you as soon as I can. I will forward you all the letters that we have, but I would like to get a receipt for them from somebody.

Commissioner ANDERSON. We will give you the receipt of the Commission. I will select such letters as we want and return the rest to you.

Mr. SMITH. I should not like to have those letters filed in this matter, because they are evidence in another case, and we would like to have them ourselves.

Commissioner ANDERSON. They will be marked, and will be well cared for.

Mr. SMITH. You can take copies of all of them. You can take the printed copies and fill in the blanks, and this will give you all you want. This ought to answer all your purposes.

Commissioner ANDERSON. As I understand it, all the letters in print are collected in one volume, are they not? Are they printed together?

Mr. SMITH. Yes. They were originally all pasted in a book, but in order that they might be printed they were taken out of the book and divided for the benefit of the printer, and they have not been put together again.

RIGHT TO SUBMIT THE LETTERS WITHOUT MR. HUNTINGTON'S CONSENT.

Mr. BERGIN. Do you think that Mrs. Colton has any right to submit to this Commission, or any one else, this correspondence between Mr. Huntington and General Colton without Mr. Huntington's consent.

Mr. SMITH. I do not know. I am not passing upon any legal proposition, of course. My object in appearing here is simply to save Mrs. Colton from coming.

Commissioner ANDERSON. This is really an *ex parte* proceeding between the witness subpœnaed and the Commission.

Mr. HAYMOND. If we knew that she was going to produce such letters, we might have a right to get out an injunction. If Mr. Smith, as her attorney, tells us that he intends to produce those letters without the consent of Mr. Huntington, that would be the course that I would advise.

Commissioner ANDERSON. I presume that that is Mr. Huntington's affair.

The CHAIRMAN. That is your right. This gentleman has been subpœnaed to produce certain papers, and he says that he will produce them. When they are produced you can get out an injunction if you wish.

Mr. HAYMOND. Will you give us time, after the letters are produced, to institute proceedings in the Federal or State courts?

Commissioner ANDERSON. We cannot rule on such a question as that. The only question now before us is whether Mr. Smith will kindly bring those letters here this afternoon or to-morrow morning. Before they are passed in evidence you will have an opportunity to object.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Monday, August 15, 1887.

FRANK S. DOUTY, being further examined, testified as follows:

"SURPLUS PROFITS" OF WESTERN DEVELOPMENT COMPANY.

By Mr. COHEN:

Question. Will you turn to the minute book of the Western Development Company, of date September 4, 1877?—Answer. I have the page.

Q. There is a resolution entered there, under date of September 4, 1877, "That the following securities of the surplus profits of this company now on hand be distributed and divided between the stockholders of this company in proportion to the amount of stock held by each." I suppose that those minutes are in the handwriting of the secretary, Mr. Butler, are they not?—A. They are.

Q. Did you offer that resolution as president of the company?—A. That is my recollection.

RESOLUTION FOR THEIR DISTRIBUTION INTRODUCED AT COLTON'S REQUEST.

Q. From whom did you receive that resolution?—A. From General Colton.

Q. Did you introduce that resolution at his request?—A. I did.

Q. Is the statement there made that those securities were surplus profits of the company at that time true or not?—A. It is an incorrect term to apply to what we sought to divide.

Q. Were you asked to introduce that resolution by any other of the stockholders or parties controlling the Western Development Company, Governor Stanford, Mr. Huntington, Mr. Hopkins, or Mr. Crocker?—A. No; I had no conversation with any of them other than General Colton.

Commissioner ANDERSON. Does the record show who voted for it?

Mr. COHEN. It does not show that either of these parties was present. None of them were directors of the company.

Q. Did either of these gentlemen signify to you at the time that they desired to have this resolution passed?—A. They did not. I had no talk or conversation with anybody, except General Colton, in regard to that dividend.

DISSATISFACTION OF OTHER STOCKHOLDERS.

Q. Do you not know that at the time that the knowledge of the passage of this resolution came to the attention of Governor Stanford, Mr. Huntington, and Mr. Crocker, they expressed great dissatisfaction with it and desired to have the declaration of that dividend canceled?—A. I have since understood that to be the case. I have talked with them in regard to it.

Q. Is it not the fact, as developed by your examination for the purposes of the Colton case, that some portion of the dividend embraced in the bonds of the Southern Pacific Railroad Company had been used by General Colton, prior to the passage of this resolution, as security for the raising of money for his own uses?—A. It was so developed in the trial.

EFFECT OF DECLARATION OF DIVIDEND.

Q. It was claimed, as I understand it, upon the part of Governor Stanford, Mr. Huntington, Mr. Crocker, and the representatives of Mark Hopkins, that the declaration of this dividend left the Western Development Company insolvent.—A. It was.

Q. And was not such the finding in the case of Colton *vs.* Stanford, by Judge Temple, of the superior court, at Santa Rosa?—A. That is my impression. I do not recollect the particular points.

Mr. COHEN. There are several findings in this case of Colton *vs.* Stanford which I want to read. They were made by Judge Temple, who was then a superior judge, but who is now a justice of the supreme court of the State of California.

FORTIETH FINDING IN COLTON VS. STANFORD.

The fortieth finding is as follows:

The defendants Stanford, Huntington, and Crocker did state and represent to said Tevis and Wilson that the Western Development Company was insolvent and unable to pay its debts, if an immediate liquidation was necessary, but they also stated to said Wilson and Tevis that in their judgment and opinion the Western Development Company could pay its debts without a return of the dividend theretofore declared by said company, by taking sufficient time judiciously to realize its securities, and by nursing them as they should be nursed, and that in their judgment if the Western Development Company were forced at once into liquidation, and its assets at once forced into the market and sold without proper management and delay, it would be rendered insolvent. That the value of its assets were mainly speculative, in their opinion, and if immediately sold and realized might and they thought would fall short of paying its debts.

FORTY-EIGHTH FINDING IN COLTON VS. STANFORD.

I also refer to the forty-eighth finding, which reads as follows:

The plaintiff did not, after the making of said contract, Exhibit F, discover, nor is it true, that between the date of the incorporation of the Western Development Company and the death of said Colton, or at any time, that said Western Development Company divided $21,000,000, or thereabouts, in dividends between the five owners of the stock thereof, or between any other person or persons, or that it made any dividends, except as in this finding hereinafter set forth.

Nor did the ignorance of the plaintiff thereof prevent her from exercising an intelligent judgment, or lead her, through mistake or under duress, to execute said agreement, Exhibit F, or subsequently to surrender property thereunder.

On the 4th day of September, 1877, the Western Development Company owned and was possessed, among other property, of the assets in the resolution in this finding hereinafter set forth and described, and on the last day aforesaid, F. S. Douty, H. K. White, E. C. Wright, D. T. Phillips, and C. E. Green were the directors of the said company; and said Colton, without the knowledge or consent of the defendants Stanford, Huntington, and Crocker, or of Mark Hopkins, or of any or either of them, caused said directors to adopt a resolution as an act of the said corporation, declaring and dividing the said assets, which resolution was in the words and figures following:

"OFFICE OF THE WESTERN DEVELOPMENT COMPANY,
"*San Francisco, September* 4, 1877.

"A special meeting of the directors of the Western Development Company was held this day.

"Present, F. S. Douty, H. K. White, D. T. Phillips, E. C. Wright, and Charles F. Green. The president, F. S. Douty, then offered the following resolution:

"*Resolved*, That the following securities of the surplus profits of this company, now on hand, be distributed and divided between the stockholders of this company in proportion to the amount of stock held by each, to wit:

"Southern Pacific Railroad stock	$13,500,000
"Southern Pacific Railroad bonds	6,300,000
"Amador Branch Railroad bonds	675,000
"Berkeley Branch Railroad bonds	100,000
"Los Angeles Bridge bonds	13,500
"Amador Branch Railroad stock	674,000
"Berkeley Branch Railroad stock	100,000

"And that the same be delivered to them in person, or to their agent or attorney duly authorized to receive the same.

"On motion of E. C. Wright, seconded by H. K. White, the above resolution was adopted."

In fact, said securities did not constitute any portion of the surplus profits arising from the business of said corporation, but were part of the assets thereof.

The estimated value placed upon the said stock and bonds as set forth in that resolution was their face par value and not their actual value. In pursuance of said resolution, said Colton, intending to distribute said dividend among the stockholders, took from the archives of the said company the bonds and the certificates of stock mentioned in said resolution and divided them into nine parts, delivering to each of the defendants, Stanford, Huntington, and Crocker, and to Mark Hopkins, deceased, or to their agents, two of said parts thereof, and retaining in his possession one of said parts. The stocks named in said resolution were at the time of said dividend without any market value, and none of said stocks have ever at any time since that dividend was made had any market value, nor have any of said stocks at any time since said dividend was made and prior to said compromise, evidenced by "Exhibit F," had any market or ascertained value. The said Colton did not inform the said defendants, Stanford, Huntington, and Crocker, and Mark Hopkins, deceased, or any of them, of his said action, or the action of said board in declaring said dividend, until about the month of August, 1878, nor did they know thereof until such time, and when they were so informed by said Colton, and for the first time had knowledge thereof, they and each of them remonstrated with said Colton against his said action, and insisted that the said resolution should be revoked and the said assets so divided should be returned to the said company, assigning as a reason therefor, which reason was true in fact, that the withdrawing of so great a portion of the assets would leave the company without the means of paying its debts and largely insolvent; that the company was engaged in enterprises, the success of which was involved in very great doubt, and its success should not be jeopardied by the withdrawal of assets which were of present value, or which, if its enterprises were successful, would

have value in the future, as the defendants expected the stocks divided would have. At the earnest solicitation of the said Colton the defendants and the said Hopkins agreed to allow said dividend to stand under a promise made by each of the parties to the others that in case any or all of said bonds or stock should thereafter be required by the said company they would and should be returned, and that on that understanding the said dividend was allowed to stand.

CALIFORNIA LAW ON DIVIDENDS.

By Commissioner ANDERSON:

Q. Does the court find that the corporation was absolutely insolvent after paying that dividend?

Mr. HAYMOND. Under our law there cannot be any dividend made unless the corporation is solvent, and made out of the assets above insolvency. Under our law you cannot make a dividend except there is a surplus.

Commissioner ANDERSON. I understand that the Western Development Company did have this surplus, and that it has from twelve to fourteen million dollars on hand to-day.

Mr. COHEN. I have put in the whole of the forty-eighth finding, and that will explain fully to the Commission.

Mr. HAYMOND. Of course these findings all relate to the date of the transaction, as to how things looked then, and as to whether it was then a fair transaction. Of course the assets might be worth nothing to-day and might be worth millions. That would not affect the question to which the mind of the judge was directed.

FORTY-NINTH FINDING IN COLTON VS. STANFORD.

Mr. COHEN. I will also read the forty-ninth finding, which is as follows:

That at the time of the death of the said Colton said Western Development Company, in addition to the dividends set forth in the last preceding finding, had earned and did have on hand stocks, lands, and other property of the par value of $30,065,191, and that the actual value of the same was not greater than $10,915,092.85, and they could not by any possibility then have been converted at or near their actual value, and were subject to an indebtedness of $17,856,958, $12,208,238 of which was claimed to be due the defendants and Hopkins and the said Colton, and that said last-mentioned claims were correct and properly charged.

By Mr. COHEN:

Q. From your knowledge of the affairs of the Western Development Company, at the time the dividend was declared, could that company, from its then assets, have paid its indebtedness if that indebtedness had been called for?

The WITNESS. In my opinion it could not.

F. S. DOUTY.

PALACE HOTEL, SAN FRANCISCO, CAL.,
August 15, 1887.

Afternoon session.

ALBAN N. TOWNE, being duly sworn and examined, testified as follows:

GENERAL MANAGER OF CENTRAL PACIFIC.

By the CHAIRMAN:

Question. What position do you hold in the Central Pacific?—Answer. I am general manager.

Q. How long have you been general manager?—A. Since May, 1882.

Q. What position did you occupy prior to 1882?—A. I was general superintendent for thirteen years.

Q. Is that the next position to general manager?—A. Yes, sir.

Q. Is that in the line of promotion in the organization of the road?—A. Yes, sir.

Q. What position did you hold prior to that of general superintendent?—A. None here. I was identified with the Chicago, Burlington and Quincy road for fourteen years.

Q. When did you come from the Chicago, Burlington and Quincy road and enter on the duties of general superintendent?—A. Eighteen years ago.

Q. What are your duties as general manager?—A. My duties are of a general nature.

Q. Have you submitted a statement in the nature of an exhibit that has been attached to Senator Stanford's testimony?—A. Yes, sir.

Q. Have you anything to add to that statement?—A. Very little, unless something occurs to you gentlemen that you would like to ask me.

LETTERING ON ROLLING STOCK SUBSEQUENT TO LEASE.

Q. Subsequent to the lease of the Central Pacific to the Southern Pacific was there any order as to the designation of the title to the property of the Central Pacific as indicated by the lettering on the cars?—A. I do not remember any now; no, sir.

Q. Did you issue an order changing the lettering on the rolling stock from "Central Pacific" to "Southern Pacific"? A.—It is possible I did; however, I know the rolling stock is *not* changed. It was soon countermanded if such an order was given, but I do not remember issuing the order.

Q. Was any rolling stock of the Central Pacific changed in its lettering from the Central to the Southern Pacific?—A. I do not think there was.

Q. Would you not know if such a thing had taken place?—A. I would, I think, have heard of it if it had happened. I am very confident that none of it is changed to Southern Pacific.

Q. Was any of the Central Pacific rolling stock ever lettered "Southern Pacific"?—A. Possibly, though I do not think it was.

Q. Who would have charge of that work?—A. I can tell by inquiring at the office, and by looking at our books, but I think my answer is correct.

WHO WOULD HAVE CHARGE OF THE LETTERING.

Q. Who would have charge of the work of lettering?—A. The superintendent of car repairs.

Q. What is his name?—A. Benjamin Welch.

Q. Would he do such work without an order from you?—A. He might on the order of the superintendent; yes, sir.

Q. What superintendent?—A. The general superintendent.

Q. Who is the general superintendent?—A. J. A. Fillmore.

Q. Could it have been done without your knowledge?—A. Possibly.

APPOINTMENT OF SOLICITING AGENTS.

By Commissioner LITTLER:

Q. I will ask you a question or two. Who has the appointing of the soliciting agents of your company? I mean agents to represent the

company in soliciting traffic.—A. The general traffic manager recommends and I approve if any changes are necessary.

Q. What changes, if any, have taken place in regard to these soliciting agents since the Central Pacific was leased to the Southern Pacific?—A. Well, I do not remember of but one such having been made. Mr. Mosher, of Los Angeles, resigned, and his place was filled by the gentleman now occupying the position.

Q. Do the present soliciting agents represent distinctively the Central Pacific, or do they represent the Southern Pacific Company?—A. They represent both.

DIRECTIONS TO SUCH AGENTS.

Q. What direction, if any, has been given these soliciting agents in relation to the traffic of these two companies since the lease of the Central Pacific to the Southern Pacific?—A. I am not able to tell you what specific directions have been given them. Their general order is to obtain traffic for the longest lines. Illustration: From Los Angeles to Ogden. The Central Pacific has all its mileage nearly in that line.

Q. Has the Central Pacific its independent agents in the Eastern cities?—No, sir; not an independent agent. The agents of the various roads, such as the Union Pacific, the New York Central, the Erie, all working on this line, do soliciting for the Central road when they do it for their own road, and the same is true at Chicago, Saint Louis, and other points.

Q. How many general soliciting agents are now in the employ of the Central Pacific charged specially with the duty of soliciting traffic for that road?—A. I am unable to tell you the number.

Q. Are they numerous?—A. Not as numerous as the majority of the roads have employed for the reason explained. The west-bound business is solicited by others having eastern connection with us.

GENERAL SOLICITING AGENT IN SAN FRANCISCO.

Q. Have you a general soliciting agent in this city?—A. Yes, sir.

Q. Is his special business to solicit business for the Central Pacific?—A. No, sir; not specially. Our object has been from the beginning to centralize and get along with as few officers as possible, one agent acting for both lines.

Q. You had such an agent, doubtless, before the leasing of the Central Pacific to the Southern, did you not?—A. No, sir. One agent acted for both lines then, same as now.

Q. You had not?—A. No, sir; we had a joint agent then.

Q. How was the traffic of the road prior to the lease? How did the Central Pacific secure its share of the traffic from San Francisco without somebody to look specially after it?—A. There are many connecting roads each having offices and soliciting agents in San Francisco, representing, if you choose, ten or twelve different lines east of our own that are working for the Central just as much as though they were under pay by the Central.

Q. Do you mean to convey the idea that you have running arrangements with the lines east of you, extending east to New York, and that the through line is represented by its agent?—A. Yes, sir; their agents are acting indirectly for us in soliciting traffic via the Central line.

Q. I suppose that the pro rata share of the salary of such an agent would be paid by the Central Pacific, would it not?—A. No, sir; it

would not; since they opened their own offices they have maintained them at their own expense.

Q. I want to call your attention to a few figures furnished to the Commission by your auditor. This is a statement purporting to show the gross receipts of the company as contradistinguished from the gross earnings of the company. I do not use it for the purpose of asking an explanation of you, because I think you are not the proper officer. I want to call your attention to the remarkable falling off of the earnings of the Central Pacific and ask any explanation you may have to give.

The WITNESS. For what period, sir?

DECREASE OF GROSS RECEIPTS SINCE LEASE.

The CHAIRMAN. I will call your attention to several years, commencing with 1878. The gross receipts of that year—I will give the figures in round numbers—were $19,000,000, and in 1879 $20,000,000; in 1880, $23,000,000; in 1881, $27,000,000; in 1382, $30,000,000; in 1883, $28,000,000; in 1884, $28,000,000, and in 1885, $15,306,092.57. There is a falling off, and I will ask you to give any information you have to the Commission explanatory of this wonderful decrease of the receipts of the Central Pacific in one year.

The WITNESS. I am unable to give you a clear explanation of this, except that this was the year that the lease was changed, and instead of being a lessee of all the roads in California, including the Southern Pacific as far east as El Paso, the earnings of which were formerly shown as receipts of the Central Pacific, it now became a lessor. Therefore, the earnings given in 1885 represent only those strictly accruing to its own mileage.

Q. Is it not true that from the very day that the Central Pacific was leased to the Southern Pacific its gross receipts, as well as its gross earnings, have fallen off, and will not your books show that fact?—A. It is possible they may, but the facts explained in my answer to the foregoing question must always be borne in mind.

ADVANTAGES OF LEASE.

Q. What explanation have you to give of such a state of things in view of the testimony of other officers of this company, asseverating that that leasing was a good thing for the Central Pacific?—A. I should not attempt any explanation until I could get the facts before me, other than this: So far as leasing the Central to the Southern was concerned it was a good thing, and will be a good thing for all time, in my judgment, for the reason that both are under one management instead of the Southern being under an alien management directly cutting into the earnings of the Central and forever competing with it.

Commissioner LITTLER. The answer to that position would seem to be found in the fact that while there were two managements, and the last year that the Central Pacific had an independent management, it earned nearly $2 for $1 under the present management. There are the figures from your own officers, Mr. Cohen.

The WITNESS. It is purely a question of book-keeping which can be clearly and satisfactorily answered by our auditors.

Mr. COHEN. The explanation is that in one year the earnings of the leased lines were counted in the receipts and in the other year they do not so appear.

THE SOUTHERN PACIFIC NOT INTERESTED IN KEEPING DOWN EARNINGS OF CENTRAL PACIFIC.

Q. I want to ask you if it is not true that by reason of a provision in the lease of the Central Pacific to the Southern Pacific the latter company is directly interested in keeping down the earnings of the Central Pacific road? I call your attention to that provision of the lease which provides that until there is an increase in the earnings it shall be leased for, I think, $1,300,000 a year. Have you had occasion to examine that provision?—A. I have examined it, but I cannot recall it now.

Q. I will get you to state whether it is not for the interest of the Southern Pacific, under the provisions of that lease, to so manage the joint property as to prevent the emergency arising contemplated in the lease, namely, that when the earnings of the Central Pacific increase there is to be a readjustment and the Central Pacific is then to have a greater sum of money as rental than under the present arrangement?—A. No, sir; I do not think so.

Q. The lease had better speak for itself, I presume.

Mr. COHEN. I will get the lease.

Mr. HAYMOND. Has not that lease been offered in evidence?

The CHAIRMAN. The lease was offered and discussed here for three days.

THE FALLING OFF IN RECEIPTS A MERE MATTER OF BOOKKEEPING.

Commissioner ANDERSON. Then, as I understand you, you do not at this time attempt to explain the great falling off as shown from the figures of your road taken in 1886 as compared with 1885.

Mr. COHEN. We will explain it and show that it was a mere difference in the way of keeping the accounts. There was no such falling off, in reality, as shown by this paper.

The WITNESS. The Central Pacific took into its accounts previous to this time the earnings of all the side or leased lines. It does not now. That which belongs to the Central Pacific is alone credited to it.

FUTURE PROSPECTS OF CENTRAL PACIFIC.

By the CHAIRMAN:

Q. Are you a railway engineer, Mr. Towne?—A. I am not.

Q. What is your opinion with reference to the future of the Cen ral Pacific, especially as to its earning capacity and as to its ability to meet its obligations to the Government at some future time?—A. The traffic through Utah and Nevada at the present time is very light. It is essentially a grazing and mineral country for 600 or 700 miles, but should there be mines developed there by and by, we may consider the future of the Central road more favorable than at present. Without further development it seems now that the future of the road depends wholly upon Congressional action.

PLAN OF SETTLEMENT.

Q. Suppose Congress were to take action, what kind of action would you suggest?—A. I would suggest a very liberal action, such as there should be between man and man in the settlement of an account of such magnitude, concerning the equities of which so much can be said on the part of the debtor.

Q. It is a part of our duty under this act of Congress to recommend an adjustment of this matter, and we want to share the responsibility of that with you as general manager. What recommendation have you to make?—A. I have no doubt that you would be disposed to make recommendations toward the company on the part of the Government. If payment be insisted on, there should be a long time provided for, covering many years, to enable the company to work its way out. It has lost business largely in consequence of other lines being built to the Pacific coast. It once enjoyed all the Pacific coast business except what went by sea, and the competition then by ocean was not as great as at the present time, when it has so many other land lines to compete with.

COMPANY'S ABILITY TO PAY DEBT.

By Commissioner LITTLER:

Q. Do you concur with Mr. Stubbs, that this property cannot pay any portion of this debt now or at any future time?—A. I am not quite clear what Mr. Stubbs's opinion might be on that subject.

Q. That is the substance of it, given under oath here this morning. Do you, as general manager of this company, say that this is so, or do you qualify it?—A. I should qualify it, if he refers to the Central Pacific and its unaided feeders.

Q. Do you think that if you have a fair chance you can work it out?—A. I do.

Commissioner LITTLER. We are glad to hear you say that.

By Mr. COHEN:

Q. I will only ask you a few questions, because I propose to call you again when we put in our part of the case; that is, with respect to the question that has been asked you with reference to the report made by Mr. Wright. When was the Southern Pacific first leased to the Central Pacific so that its gross receipts went into the gross receipts of the Central?—A. I do not now remember the date.

Mr. COHEN. I want you to explain this apparent discrepancy between 1884 and 1885. That is the point I want to examine you on, just to explain that discrepancy, or rather the change in the mode of book-keeping——

I will have to leave the examination of Mr. Towne until I can produce the lease. I do not want the Commission to be under any misapprehension with regard to that difference. There was no such decrease in earnings as shown by the figures given here between 1884 and 1885. It is simply that the accounts were differently kept.

Commissioner LITTLER. We will be very glad to get any information.

EFFECT OF CONSTRUCTION OF OTHER TRANSCONTINENTAL LINES.

By Mr. HAYMOND:

Q. Do you know that since this road was constructed there have been several other transcontinental roads constructed, most of which, and I suppose all of which, have had greater aid from the Government of the United States than this road had?—A. Yes, sir.

Q. Now, whether that was a breach of contract between the United States and this company remains to be discussed, and we will leave that out and for the moment consider that it was not; at least it was an injury to the Central Pacific, and diverted the greater portion of its through traffic, and reduced the price of the balance, did it not?—A. The earnings show that manifestly.

COST OF ROAD.

Q. The road of the Central Pacific over the Sierra Nevada Mountains probably cost more than the whole road from Truckee to Chicago from the eastern boundary of the State, did it not?—A. I have no doubt that the road from Sacramento to the eastern boundary of the State cost more money than it would cost now to lay a steel rail from the State line to the Missouri River, crossing the rivers and mountains.

Q. Do you know the character of the snow sheds that there are upon the Union Pacific line, and do you know the difference in the character of the snow sheds that are upon the Central Pacific?—A. Yes, sir.

Q. And the difference in cost?—A. Yes, sir.

Q. Have you any knowledge of the cost per mile of the heaviest miles of snow sheds on the Central Pacific?—A. I do not know the aggregate cost. They were very large.

ABILITY OF COMPANY TO PAY ITS DEBT IN CERTAIN CONTINGENCIES.

Q. Supposing that the Government, in consideration of the injuries it has done this company, were to agree to furnish money or to furnish its bonds for a sum necessary to throw that line below the snow sheds, and then the road should afterwards, by some contract with a company, be operated together from Ogden to Portland, Oreg., and from Portland, Oreg., to New Orleans, under some such contract as this, under Government supervision—in that event do you believe that it would be able eventually to pay its indebtedness to the Government at the rate of 2½ per cent., allowing them to take up the bonds when they matured?—A. Possibly, if prudently managed.

Q. That would be pretty near such an arrangement as has been made between the Southern Pacific and the Central, and that was made, as I understand, entirely for the protection of the Central. Was not that your understanding, after frequent discussions?—A. Yes, sir; for the further protection of the Central.

PROBABLE EFFECT OF A HOSTILE MANAGEMENT OF SOUTHERN PACIFIC.

Q. What, in your opinion, would be the state of the Central Pacific to-day if the Southern Pacific had been built by the United States or by parties to whom large grants of land were made to construct it, and it were operated in hostility to the Central Pacific? What do you believe would have been the condition of the Central Pacific to-day?—A. I have no doubt that it would have been in the hands of a receiver, for it would not have been able to have earned sufficient money to pay its operating expenses and fixed charges. The competition has been very considerably neutralized by the road having been managed by one head and under one direction.

SOUTHERN USED AS A DEFENSE TO CENTRAL PACIFIC.

Q. In other words, the Southern Pacific, in the hands of the same directory, has been used as a means of defense to the Central, has it not?—A. Yes, it has been.

Q. And that has been your action as the general manager of the company under the direction of the directors of the Central Pacific Railroad?—A. Yes.

AMOUNT OF INDEBTEDNESS OF COMPANY TO GOVERNMENT.

Mr. HAYMOND. Now, I am asking this: What do you claim, Commissioner Anderson, to be the indebtedness to the United States? Mr. Norris probably knows.

Commissioner ANDERSON. You mean as of to-day? It has the present value of $60,000,000, discounted at such a rate of interest as would be just, for ten years, less the sinking fund.

Mr. HAYMOND. I deny that the Central Pacific Railroad Company owes the Government anything, and I do not believe that they could recover a cent in any court in Christendom; but admitting the fact that it does owe that amount, then is your opinion the same?

The WITNESS. I do not understand the question.

Q. Can it be liquidated in ten years?—A. It cannot be liquidated in ten years.

Q. In how many?—A. Not in a hundred if the debt is $60,000,000.

REDUCTION OF EXPENSES IN CROSSING SIERRA NEVADAS MIGHT ENABLE COMPANY TO PAY DEBT.

Q. With the combination of all these roads, operated together, and the Sierra Nevadas removed so that you did not have to pay that heavy charge for carrying freight across the mountains, what reply can you make?—A. If that expense could be reduced across the Sierra Nevada mountains and the Southern and Central systems worked in harmony, possibly the property could work out its indebtedness, and the amount claimed by the Government saved to it. I would not be prepared to-day to tell you how many years or what rate of interest I would recommend; it would have to be a very long payment, gentlemen, with a very low rate of interest.

Mr. HAYMOND. Mr. Littler has asked for that.

COMPETING LINES.

The WITNESS. There are other lines now contemplated in California that will still further divide the business. The Northern Pacific took from us the business of Oregon and Washington Territory, and of British Columbia, which we once enjoyed east and west over the Central Pacific line. The managers of the Union Pacific have built and acquired a line from Granger (a point east of our connection with them at Ogden) to Portland, Oreg., which not only takes from us the Oregon and Washington Territory business, which we formerly enjoyed, but parallels for a long distance our road west of Ogden. The Union Pacific, through the Oregon Railway and Navigation Company's property, which it has recently acquired, now has its own line not only to San Francisco but to all points on the coast of California. The Atchison, Topeka and Santa Fé and the Atlantic and Pacific came in and have taken a large share of the traffic. The Texas and Pacific was on the way to California, and would have come through but for the Southern covering that territory. The Canadian Pacific is completed, and an active competitor. The Pacific Mail and Ocean line of clippers are still very strong and active competitors, taking a large amount of business that should legitimately be considered as railroad traffic.

Q. Mr. Littler has asked you one question which I would like you to answer on your direct examination, or that you should be able to answer. It is this: Could the Central Pacific under this lease with the

Southern Pacific be worked at any time? Your opinion is that it could?—A. I think so; yes, sir.

Q. Will you give some estimates that have been asked for by Mr. Littler? We all want to get your opinion.—A. I will look it over later, and let you know my views on the subject.

EFFECT OF PAYMENT OF $33,000,000 OF DIVIDENDS.

By the CHAIRMAN:

Q. Suppose that a reasonable part of the $33,000,000 voted by the directors to the stockholders of the Central Pacific from 1873 to 1884 had been applied to a sinking fund to meet the indebtedness that they knew must mature in 1896 and 1897, would not the Central Pacific be in a better condition to-day financially to have settled with the country, anticipating the maturity of the bonds?—A. If no money had been paid out for anything, there would have been more left.

Q. I am speaking of the dividends $33,000,000, nearly $10,000,000 more than the principal that they got.—A. The amount of money paid out in dividends was natural to the road or to the stockholders. It enjoyed the traffic at that time that is now divided up, as I have just now remarked, by various lines.

The CHAIRMAN. There lies the difference between dividends and paying debts; the one is natural and the other is unnatural.

By Mr. COHEN:

Q. Can you state or approximate the amount of dividends that was earned from the aided road and that portion of it earned by the non-aided road to which the United States did not contribute any portion of the cost of construction?—A. I cannot; possibly the controller can.

BENEFITS TO GOVERNMENT FROM ROAD.

By Mr. HAYMOND:

Q. It is conceded by the officers of the Government of the United States, and it has been established in its courts, that the United States has gained from this road over a hundred millions of dollars. Do you not consider that it would be justice on the side of the country that the stockholders should have at least one-third of that when the Government had not risked a cent?—A. I do, when you consider that the country has gained so largely by the construction of the road.

Mr. HAYMOND. Of course the country has gained very largely by it, but I am talking simply of what the Government has gained.

PLAN OF SETTLEMENT.

By Commissioner ANDERSON:

Q. Will you submit in writing the details of the scheme under which you suggest that by a general and harmonious action of all the interested roads the obligations to the United States could in a period of time and at a given rate of interest be worked out?—A. I will.

A. N. TOWNE.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Monday, August 15, 1887.

WILLIAM W. STOW, being duly sworn and examined, testified as follows:

By Commissioner ANDERSON:

Question. Mr. Stow, where do you reside?—Answer. In San Francisco.

Q. What is your occupation?—A. At present I am principally engaged in mining.

Q. Have you had any acquaintance with the officers of the Central Pacific for a number of years?—A. I have.

Q. Have you attended at sessions of the legislature of the State of California?—A. I have attended some of them.

Q. When you were there, were you there for much time continuously?—A. I was there off and on, according to circumstances.

Q. Did you have a general acquaintance with members of the legislature?—A. I did.

Q. Were you quite intimate with some of them?—A. I was.

HOSTILE RAILROAD LEGISLATION.

A. Were you at Sacramento when what are known as hostile measures, that is, measures hostile to the Central Pacific, were pending in the legislature?—A. It depends on what year you allude to.

Commissioner ANDERSON. I mean in some of the years that you were there.

The WITNESS. In some of the years; yes, sir.

Q. Have there been what were known as hostile measures pending?—A. Yes sir; many of them.

Q. Has the subject of such legislation been a matter of discussion between you and the officers of the Central Pacific?—A. They have.

Q. Between you and Mr. Leland Stanford?—A. Between Mr. Stanford and myself; yes, sir.

CONCERNING INFLUENCING LEGISLATION.

Q. Did you ever receive from Mr. Leland Stanford any money or stock or other thing of value which it was understood between you and him should be used in influencing legislation?

Mr. BERGIN. That is objected to on two grounds. Mr. Stow, you were a practicing attorney then, and are now?

The WITNESS. I am, and as such have been in the employ of the company. I decline to answer that question.

Q. Did you receive any money or stock or other thing of value from any officer of the Central Pacific, other than Mr. Leland Stanford, for the purpose of influencing legislation?—A. I make the same answer.

Q. Have you ever offered any money or thing of value to any member of the legislature for the purpose of influencing his vote?—A. Now you have gone about far enough with me, sir.

MAKING A RECORD FOR THE COURT.

Commissioner ANDERSON. You can decline to answer it.

The WITNESS. I will take care of my business.

Commissioner ANDERSON. You will please answer, or not answer, as you please.

The WITNESS. You must not undertake to cast any aspersions on me. I will take care of myself, and I suppose you will take care of yourself.

Commissioner ANDERSON. I will try to.

The WITNESS. Yes; and I shall try and take care of myself.

Q. Do you decline to answer?—A. You have no business to ask me that question after the answer I have given you.

Commissioner ANDERSON. I will repeat the question, sir, at the risk of your displeasure. We want to get a record for the court.

The WITNESS. You have got a record now, and if you are a lawyer you know it.

Mr. HAYMOND. There is a provision of the code of this State which absolutely forbids an attorney from disclosing anything he may acquire from his client, and he cannot do it even with his client's consent. It is a part of his oath.

WITNESS DECLINES TO ANSWER.

Commissioner ANDERSON. We will not discuss this. The question was between you and the officers of the company, and the question I now put is as between you and the members of the legislature. I must insist, of course, upon the witness answering. If the witness sits there and does not answer, by and by I will take it as a refusal; and with that explanation I will again put the question to you, respectfully, Mr. Stow, and ask you if you have at any time paid any money or given anything to any member of the legislature for the purpose of influencing his vote?

The WITNESS. I decline to answer, sir.

Commissioner ANDERSON. That is sufficient.

The WITNESS. I should like to inquire if the Commission wants me any more?

The CHAIRMAN. Not until the court says so.

Mr. COHEN. We would like to have you ourselves in a little while.

The WITNESS. You will have to send me an invitation, for I do not come without.

The CHAIRMAN. We are trying to get a decision with reference to you and the other gentlemen.

COUNSEL REQUESTS A COPY OF PETITION TO COURT.

Mr. HAYMOND. It would be advisable to serve us with a copy of your petition. I have not seen it. I will ask the Commission if they will give us a copy of that petition.

The CHAIRMAN. This is taking up time.

Mr. COHEN. It is a demand we have a right to make, and we insist upon it. We ask the Commission if they will give us a copy of the petition they have filed with the circuit court.

Commissioner ANDERSON. The papers are in the hands of Mr. Cary, who has a copy of it for the other side, and he will serve the papers in due course of legal proceedings.

Mr. COHEN. If it is a private and a secret matter, very well.

Mr. CARY. May I speak? The petition was not filed in court and did not become a public matter till this morning at 11 o'clock. It was not filed owing to the absence of Judge Sawyer, but I filed it at 11 o'clock to-day and procured an order returnable on Wednesday morning. I left it with the clerk, and you will be served with a copy probably during the course of the day, as soon as the records can be made.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Monday, August 15, 1887.

DANIEL Z. YOST, being further examined, testified as follows:

By Commissioner ANDERSON:

Question. Have you made search for the memoranda that you referred us to in your previous examination?—Answer. Yes, sir.

Q. Where have you searched?—A. I searched where I thought it was, but I could not find it.

SEARCH FOR MEMORANDA.

Q. You say "it"; was it a single memorandum?—A. My memoranda, whatever they were.

Commissioner ANDERSON. I ask you where you searched.

The WITNESS. At the store where I thought they were.

Commissioner ANDERSON. Please give the number of the store, and let us know where it is.

The WITNESS. I do not know the number.

Q. Where is the store?—A. On Bush street, between Sansome and Montgomery.

Q. Whose store is it?—A. H. S. Crocker & Co.

SEARCHING WHERE THERE HAD BEEN A FIRE.

Q. Why did you search there?—A. I did not search very long. Because there is where I supposed my books and memoranda were. After my examination the porter informed me about the fire, which I had not thought of in the mean time. The fire occurred about two years ago, I think.

Q. What connection had the fire with your memoranda?—A. Simply consumed them, that is all.

Q. Had you not heard of that fire before?—A. Yes, sir.

Q. And how did you expect to find your memoranda if you knew they had been burned up?—A. I did not know positively whether they were or not, but the books and memoranda were left there.

Q. What did you do when you got to the store? Did you talk to the man about the fire?—A. Yes, sir; he spoke about my books being stored in the third story, &c. He saw the report of my evidence, and wondered if I remembered it.

Q. Is that the only search you have made?—A. That is about all the search that I made.

Q. Have you any memorandum in your possession now relating to the subject-matter of your evidence?—A. Not that I remember.

CONCERNING THE USE OF MONEY IN INFLUENCING LEGISLATION.

Q. Have you stated within a year that you had a memorandum or a stub referring to the use of money for the purpose of influencing certain officers in this community?—A. Not that I remember.

Q. Have you not offered to make an affidavit to that effect?—A. No, sir; not that I remember.

Q. Have you a stub removed from a check-book showing the use of money for the purpose of influencing an officer of this community?—A. None that I remember.

Q. Have you had such a stub within the last two years?—A. No, sir; I do not think that I remember having any such stub.

Q. Have you any other paper, check, or copy of a check referring to money used for the purpose of influencing an officer?—A. No, sir; I do not think that I remember of any that I have.

Q. And you deny ever having stated within the last year or two that you had such a paper?—A. If I have I have forgotten it.

By Mr. COHEN:

Q. Is a member of the firm of H. S. Crocker & Co. a brother of yours?—A. Yes, sir; he is a partner in that firm.

Q. And is that the reason that you stored your books and papers there?—A. Yes, sir; I stored them there for safekeeping.

The CHAIRMAN. Have you any witnesses whom you wish to examine, Mr. Cohen?

Mr. COHEN. No, sir; I did not understand that you would be through to-day. I will ask the Commission to swear the chairman on behalf of the Central Pacific Railroad Company.

Commissioner LITTLER. We will take his official statement.

A REQUEST FOR LETTERS ADDRESSED TO THE CHAIRMAN.

Mr. COHEN. Then would you believe him just as much as if he were sworn? Very well. I will ask the chairman if he will produce, for the purpose of putting on this record, the letters and communications that have been addressed to him as chairman of this Commission.

Commissioner ANDERSON. I think the chairman will have to refer questions of that kind to the Commission.

Mr. COHEN. If he declines to answer we will have to ask the United States court to compel him to answer. I would like to have the chairman sworn.

Commissioner LITTLER. The chairman has been sworn.

The CHAIRMAN. I must say that the chairman has certainly done it in a more polite way than you have. For a man of your experience and age, and who has been before the court as often as you have, you should know the proper position to take before this body.

Mr. COHEN. We think we are doing it. Of course we made up our minds some time ago that whatever might be said about the chairman's knowledge of law and his mode of cross-examination, he certainly was a most polite gentleman, and that nothing could be said against him in that regard.

The CHAIRMAN. We are perfectly willing to hear any of your witnesses, if you have them.

Mr. COHEN. I would like to have the chairman say whether he will produce any such correspondence.

THE HEIGHT OF IMPERTINENCE.

The CHAIRMAN. The chairman at present declines to entertain any such proposition, and he thinks it is the height of impertinence on your part to ask it.

Mr. HAYMOND. That is a matter of opinion. Has the Commission at any time received any propositions outside of the testimony?

The CHAIRMAN. It is hardly the thing for this Commission to be interrogated about. Its communications are hardly proper to be handed to you.

Mr. COHEN. As to the question of impertinence or not, I do not think if I were inclined to gauge my conduct I should take the opinion of the

ex-governor of Pennsylvania upon that point, but the chairman said, himself, that he would not receive any communications which would be private from the world. Now he has received those communications. They are in his possession, and I ask that they be produced and spread upon the minutes.

The CHAIRMAN. I have not in my possession, I want to say to you, any communication whatever addressed to me as chairman of this Commission. I have handed all of such to the secretary of this Commission, and not one have I in my possession. I never retained them a moment.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Monday, August 15, 1887.

FRANK S. DOUTY, being recalled, was further examined, as follows:

By Mr. COHEN:

Question. Will you look at the record book of the Pacific Improvement Company, under date of April 11, 1882? You have stated that there was a dividend declared on April 11, 1882, amounting at its par face value to $33,917,600?—Answer. Yes, sir.

PACIFIC IMPROVEMENT COMPANY'S DIVIDEND OF BONDS AND STOCKS.

Q. How much of that was in bonds and how much in stocks?—A. Seven millions was the par value of the bonds.

Q. And what was the balance?—A. The balance of $26,917,600 was in stock.

Q. What was the cash value of the stock at that time?—A. It had no cash value at that time.

Q. What is its cash value now?—A. I should say nothing.

By Commissioner ANDERSON:

Q. Is that the Southern Pacific?—A. The Southern Pacific of Arizona and New Mexico.

By Mr. COHEN:

Q. What was the cash value of the seven millions of bonds at that time if they had then been offered for sale?—A. There was no market value whatever for them at that time.

Q. Could you have found a market at that time for any considerable number of those bonds, or for half of them?—A. I think not. There was then no market or demand for them.

Commissioner ANDERSON. Right there I would like to ask the witness a question.

Mr. COHEN. Wait till I get through with this point and you can have him.

Mr. HAYMOND. What is the question, Mr. Anderson?

THE STOCK EXCHANGED FOR STOCK OF SOUTHERN PACIFIC OF KENTUCKY.

Commissioner ANDERSON. I hope it will save time to ask my question in this connection. I wanted to ask the witness when he said the stock had no value, whether it was not true that some time ago that stock was converted into the Southern Pacific Railroad of Kentucky.

The WITNESS. It was exchanged for Southern Pacific Company of Kentucky stock.

Q. Does your answer then that the Southern Pacific stock has no value at present refer to the Southern Pacific stock of Kentucky or to the other stock?—A. The Southern Pacific stock of Arizona.

Q. If there is no stock what application can your answer have?—A. The stock is in existence and is owned by the Southern Pacific Company of Kentucky, and whatever value they see fit to put upon it I believe would be the value.

Q. Simply for the purpose of controlling the road?—A. Controlling the road.

WHO FURNISHED THE MONEYTO BUILD THE NORTHERN RAILWAY.

Q. You have been asked concerning the building of various branch roads by the Western Development Company and the Pacific Improvement Company. From what sources did you obtain the money to construct these roads. Take, for instance, the Northern Railway. Who furnished the money to build that road?—A. The money came from Mr. Stanford and his associates, Messrs. Huntington, Hopkins, Crocker, and Colton.

Q. That road was constructed by the Western Development Company, was it not?—A. The major portion of it was constructed by the Western Development Company.

Q. And was it finished by the Pacific Improvement Company?—A. By the Pacific Improvement Company.

Q. At the time that road was finished could you have reimbursed the contractors out of the bonds and stock they had received for its construction for the money they had expended?—A. If they were willing to take the securities at par value probably we could.

Q. I mean could you have raised the money in the market on the bonds and stock so as to have paid them their money and ordinary interest?—A. In my judgment we could not.

OTHER ROADS BUILT BY STANFORD AND ASSOCIATES.

Q. I will ask you the same question in reference to the San Pablo and Tulare Railroad Company?—A. I make the same answer.

Q. And the same with reference to the Amador Branch Railroad?—A. The same answer.

Q. Was the money to construct the Southern Pacific of California, the Southern Pacific of Arizona, and the Southern Pacific of New Mexico furnished by the same persons?—A. With the exception that Messrs. Colton and Hopkins were dead at the time the roads through New Mexico and Arizona were built.

Q. Did Messrs. Colton and Hopkins furnish a portion of the money to build the Southern Pacific of California?—A. Yes, sir.

Q. But not for the Southern Pacific of Arizona or New Mexico?—A. No, sir. The estate of Hopkins—Mrs. Hopkins—came in afterwards.

Q. In all these cases were the payments made to the contractors in the stock and bonds of the railroad?—A. Yes, sir.

CONTRACTORS PAID IN STOCKS AND BONDS OF ROADS.

Q. So that it depended upon the amount of business that might be created by these lines whether they ever got their money back or not?—A. It depended entirely upon the capacity of the road for development.

Q. Did they take their chances upon the development of the country and the amount of business that might be created by those lines?—A. Yes; to make it a paying property.

Q. At the time that either of those roads of the Southern Pacific system was finished could you have paid back the money used in the construction of the road—the money used to construct them by the sale of bonds and stock—as received by the construction company?—A. In my judgment we could not.

Q. In each case the contractors had to wait for the development of a road and the creation of a market for the security to become of value—was not that so?—A. They had to create a market for their securities.

THE FRANKFORT SYNDICATE.

Q. Was there any market for any considerable portion of the bonds of the Southern Pacific of California before the year 1880 or 1881?—A. I think about 1880 or 1881 they began to have a market value, and they were more or less sold.

Q. Was there a syndicate formed in New York in the year 1880 through the medium of the house of Speyer & Co., Frankfort bankers, to place those bonds on the market?—A. Yes, sir.

Q. They bought a small quantity and took an option on a large portion of that issue, did they not?—A. That is my recollection of it.

Q. And was it about the year 1881 before any considerable portion of those bonds could be sold?—A. It was before any were sold. I would not say that they could not be.

NO MARKET FOR SOUTHERN PACIFIC BONDS FOR SEVERAL YEARS.

Q. Do you not know from the correspondence that you saw between Huntington and Colton, that they were all the time, for five or six years before that time, trying to make a market for the Southern bonds in New York and elsewhere, and were unable to do so?—A. That was my information at the time. I knew General Colton used to speak frequently about it.

Q. So that in all these cases if the business of the road constructed had not developed, or the turn in the state of financial affairs had not been such as to make a market for the bonds there would have been a large loss to the contractors instead of a profit?—A. There certainly would have been.

COLORADO RIVER BRIDGE.

Mr. COHEN. You were asked the other day about the Colorado River bridge and a statement was put in here by one of the Commissioners, I believe, that that bridge had cost about $50,000.

Commissioner ANDERSON. The statements were only handed to the witness to verify.

The WITNESS. They were handed to me to verify.

Q. Yes, sir; and that the rent was a thousand dollars a month. What has been the actual cost to the Pacific Improvement Company for that bridge to the present time?—A. Two hundred and six thousand and some hundred of dollars.

Q. So that the rent you are getting for it is about 6 per cent. per annum on the amount of cost?—A. A trifle under 6 per cent. per annum.

ITS DESTRUCTION BY WATER AND FIRE.

Q. Is not that a very peculiar piece of property so far as its security and safety are concerned, and especially at this time of the year when the stream is high and liable to go away if it is not watched, is it not?—A. Yes, sir; it has been destroyed twice, washed away once, and burned once.

Q. Both this Colorado River bridge and the bridge crossing the same stream belonging to the Atlantic and Pacific Railroad have been swept away by floods, have they not?—A. That is the information I have as to the Atlantic and Pacific.

Q. Under the present state of affairs it would look as though that rent ought to be raised, would it not, instead of remaining at the present figure?—A. It would look as though we had a just claim for an increase.

Q. Do you know what is the average cost of repairs and depreciation of a steamboat in these waters?—A. I do not.

Q. Have you no information on that?—A. No, sir.

Q. Do you know how much a year it cost to keep up the steamer Solano?—A. I do not.

Q. I thought you had some knowledge.—A. No, sir.

WESTERN DEVELOPMENT BANKED WITH CENTRAL PACIFIC.

Q. I think you have testified once about this, but I will ask you one question about it. You have spoken about using the Central Pacific as a bank. The Western Development Company and the Pacific Improvement Company I believe kept no bank accounts in any bank, did they?—A. No other than that. They had no account with any bank.

Q. When you received any money from any of your depositors, you turned it over to the Central Pacific or Southern Pacific, did you not?—A. I did.

Q. And it stood there to your credit?—A. It did.

Q. At times when you needed money you have drawn on the Central Pacific for more money than you had to your credit, have you not?—A. It is possible that we may have done so. I do not remember of any such occurrence.

Q. You do not remember doing it?—A. No, sir; I do not. The Western Development Company borrowed money, I think, but I do not recollect that they ever overdrew.

BORROWING OF THE CENTRAL PACIFIC.

Q. When you wanted money, did you make arrangements with the Central Pacific people to lend it to you?—A. We did.

Q. And did you give a note for it?—A. I did.

Q. And was the amount of that note put to your credit with the Central Pacific Railroad?—A. It was.

Q. On all the moneys of the Central Pacific that you used, you paid them the current rate of interest, did you not?—A. I think so; that was invariably the case, but I really do not remember what the arrangements were.

Q. Did you pay them interest?—A. Yes, sir; it was the same rate of interest that the account called for, if I remember.

Q. When you wanted to borrow money from the Central Pacific, with whom did you make the contract for its use, with what officer of the

Central Pacific, speaking of the Western Development Company, first?—A. I was trying to think. I do not remember of more than one transaction, in fact, of borrowing money of the Central Pacific, and I think that was made with General Colton.

Q. Was it between General Colton and the Central Pacific?—A. And the Western Development Company.

GENERAL COLTON WAS FINANCIAL DIRECTOR OF CENTRAL PACIFIC.

Q. General Colton was the financial director of the Central Pacific at that time, was he not?—A. I think he was at that time.

Q. And he had charge of the finances of the Western Development Company?—A. He did.

Q. As well?—A. Yes.

Q. Did you manage those finances under his direction?—A. Under his direction—yes.

Q. Did the Western Development have a separate banking account during the time that its destinies were being controlled by John Miller?—A. Yes, sir; I think it did with the railroad.

Q. I mean did it have a separate bank account other than the Central Pacific?—A. No, sir.

Q. How was it with respect to the Pacific Improvement Company? Did that company have a separate bank account or did it bank with the Central Pacific?—A. It banked with the Central Pacific and Southern Pacific. Both those roads were used for that purpose.

THE ACCOUNT AN INTEREST-BEARING ACCOUNT.

Q. In both those cases, did you pay interest on the moneys that you have borrowed?—A. We did. The account was an interest-bearing account.

Q. Did the Central Pacific allow you interest on the amount to your credit?—A. It did.

Q. And when you borrowed from them did you pay them interest?—A. We paid them interest.

Q. The same rate of interest in both cases?—A. The same rate.

OUTCOME OF LEASES TO CENTRAL PACIFIC.

Q. What has been the outcome of the leases made to the Central Pacific of the different roads that you have constructed? Have they proved profitable, or the reverse, to the Central Pacific?—A. I have always understood that they were profitable.

Q. Do you not know that the Central Pacific has made from the leases of the roads that have been constructed under your management and with the companies with which you have been president and secretary, the Western Development Company and the Pacific Improvement Company, a profit exceeding three millions of dollars?—A. I do not know that, but I have understood that the leases of these feeders were profitable.

Q. But you do not know the amount?—A. I do not know the amount.

RENTALS PAID DIVIDENDS AND INTEREST ON BONDS.

By Commissioner ANDERSON:

Q. On that question of leases, is it not true, as a matter of fact, that the rentals received for the leases of these various roads, constructed by the Western Development Company and by the Pacific Improvement

Company, have paid the entire interest on the bonds issued by those respective roads?—A. There has been enough derived from the leases to accomplish that result.

Q. Has there not also been enough derived from the leases of these roads to declare dividends on their stock?—A. In some cases.

Q. Will you please name the roads which have declared dividends on their stock?—A. The Northern Railway and the San Pablo and Tulare Railway.

PRICE OF CENTRAL PACIFIC STOCK IN 1886.

Q. Do you know what Central Pacific stock was worth in October, 1886, when the contract for the completion of the California and Oregon was made?—A. I could not say. I think that it has been about $38.

Commissioner ANDERSON. I inquire about the time when the contract was made by which the Pacific Improvement Company was to receive 80,000 shares.

The WITNESS. I really do not know when I noticed it. It has been somewhere between 38 and 40.

VALUE OF CALIFORNIA AND OREGON BONDS.

Q. Do you know the value of California and Oregon first-mortgage bonds in 1886?—A. I do not.

Q. Is the interest on those bonds regularly paid?—A. We have not held any long enough to see; I presume it will be regularly paid.

Q. The California and Oregon bonds have been in existence for a number of years, have they not?—A. I do not think we ever held any of those bonds until recently.

Q. Do you know that the interest on those bonds has been regularly paid from the first?—A. I never heard of any default, and I assume that they have been, like every other obligation against the company.

SECURITY OF THE "SIXES" OF 1886.

Q. Are you familiar with the security for the "sixes" under the mortgage of October, 1866?—A. I am familiar with it to the extent of being one of the trustees.

Q. Are you familiar with the security, have you been over the inventory, and do you know what property is covered by the mortgage, and what the earning power of that property is?—A. I only know in a general way that it is covered by all the property of the Central Pacific Railroad Company.

Q. Exclusive of the aided portion?—A. Exclusive of the aided portion.

Q. Can you state of your own knowledge of that property and of the undertakings of the Southern Pacific whether the mortgage represents a security on which the interest will be regularly earned and paid?—A. I do not know.

SOUTHERN PACIFIC BONDS.

By Commissioner LITTLER:

Q. Is it not true that these Southern Pacific bonds were considered good security for the loan of the money, and is it not true that the Central Pacific took them at 90 cents on the dollar in a transaction with your company?—A. I know that our people had confidence in them which was not shared by the general public.

Q. Is it not true that both the Central Pacific and the Western Development Company valued these bonds in a transaction at 90 cents on the dollar in cash?—A. In 1879 they so regarded them. It was a transaction by which certain indebtedness was wiped out at that rate.

Q. Has there ever been any default in the payment of the interest on these bonds which were divided under the resolution which you offered and to which reference has been made by Mr. Cohen?—A. There has been no default.

Q. Then has the interest so far as you know on these bonds, which you say had no market value, been paid right along?—A. It has.

VALUE OF STOCK FOR PURPOSES OF CONTROL.

Q. Then is it not true that notwithstanding they may not have a quotable market value, they are valuable property?—A. They are valuable so long as the interest is paid, and there is a fair assurance of the principal being paid. That, of course, depends on the earning capacity of the roads.

Q. Is it also true that this stock may have no market value and yet may have a real value and it would take money to buy it?—A. Whatever the value of the control would be that would be the value of the stock.

By Mr. COHEN:

Q. Has the Southern Pacific system earned enough over and above the operating expenses and fixed charges, interest, and so forth, so as to have left a balance that could be used as a dividend upon the stock?—A. It has not.

Q. Has there ever been any time at which any considerable portion of the stock of the Southern Pacific of California and Arizona and New Mexico could have been marketed?—A. I do not think so.

By Commissioner LITTLER:

Q. Is it not true that all railway stock, although it has no property behind it after paying existing prior liens, and although it may have no quotable value, is always of substantial value when it comes to controlling the corporation?—A. Yes, sir. It is indispensable in order to control the corporation.

Q. And is it not always valuable for that purpose?—A. It has more or less value.

By Mr. COHEN:

Q. If all the stock is held by one person, five shares has the same value as the entire capital stock?—A. To that person; yes, sir.

F. S. DOUTY.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Monday, August 15, 1887.

MARCUS D. BORUCK, being duly sworn and examined, testified as follows:

By Mr. COHEN:

Question. Where do you reside?—Answer. In San Francisco.

Q. How long have you lived here?—A. Since 1850.

Q. Are you acquainted with a corporation called the Central Pacific Railroad Company, and before that time with a corporation known as the Central Pacific Railroad Company of California?—A. Yes, sir.

COMMISSIONER TO SOLICIT SUBSCRIPTIONS TO CENTRAL PACIFIC STOCK.

Q. Were you one of the commissioners appointed in the early history of the Central Pacific Railroad Company of California to receive subscriptions of stock for that company?—A. Not under the title of commissioner. I was requested to do so by Governor Stanford, with Mr. Judah, the engineer, and Mr. Bailey, the secretary of the company at that time.

Q. Did you open an office for that purpose?—A. Yes, sir.

Q. Where?—A. In the building at that time known as "Music Hall," corner of Bush and Montgomery streets.

Q. In San Francisco?—A. Yes, sir.

Q. Was it a public place in San Francisco?—A. Yes, sir.

Q. And on a leading thoroughfare at that time?—A. Yes, sir.

Q. How long did you keep an office open for that purpose?—A. Off and on for about twenty-two days, I think.

Q. How much were the subscriptions that you got? State them day by day.—A. I cannot. I think there were altogether three subscriptions and, I think, twelve or fourteen shares were subscribed.

Q. And that was the entire subscription?—A. Yes, sir; possibly there might have been fifteen, but no more.

Q. In what year was that?—A. That was in 1862, I think.

Q. What time in 1862? Was it after the passage of the Act of Congress, or before?—A. I do not know as to that. I think it was in November—the last of November—and in December again for a few days, and a few days in February.

Q. In February, 1863?—A. Yes, sir.

FINANCIAL DIFFICULTIES ATTENDING THE CONSTRUCTION.

Q. Were you familiar with the history of the construction of the Central Pacific Railroad?—A. Not as to the details of the construction, but only as to the difficulties which they had so far as finances were concerned.

Q. Will you give your knowledge to the Commission very briefly?—A. It can be given very briefly that it was very difficult to get any aid of a financial nature to build the road at that time.

By the CHAIRMAN:

Q. At what time? Will you give the years?—A. I do not think I can do it; I can only say, to make it comprehensive, that there were a great many things and a great many obstacles in the early construction that they had to contend with. In the first place, there was but a single newspaper in the city of San Francisco which favored them and, I think, one or two outside of San Francisco. It was a very difficult matter for them to raise money among monied men, and they had to go along very slowly and do the best they could. As to the inside details, as to how they secured money to carry on the road, that I do not know anything about; they had a great many obstacles to contend with. The Telegraph Company was opposing them because they had to construct a telegraph line. The Stage Company opposed them, and the Pacific Mail Company opposed them, and the newspapers, from some reason or other, did so. I know at one time it was a close call whether they would be able to prosecute the work at all. I know at one time that for, I think, seventeen days they had not a dollar in their treasury with which to prosecute their work.

NOT A DOLLAR IN THE TREASURY FOR SEVENTEEN DAYS.

By Mr. COHEN:

Q. In what year was that?—A. Well, I do not know the time. I was informed by Governor Stanford during the early building of the road that for seventeen days they had not a dollar in their treasury to draw from and did not know where to get the money.

By the CHAIRMAN:

Q. Was that prior to 1864 or subsequent?—A. Yes, sir; that was prior to 1864.

"THE SPIRIT OF THE TIMES."

Q. What is your business?—A. I am the editor of a newspaper.
Q. What is the name?—A. The Spirit of the Times.
Q. How long have you been editor of the Spirit of the Times?—A. About thirty-three years. I established the paper about thirty-three years ago.
Q. Are you the owner of the property?—A. Yes, sir.
Q. Have you always been the owner?—A. I had a partner for a number of years.
Q. Are any of the officers of the Central Pacific interested in the paper?—A. No, sir; I wish they were.

CIRCULATION OF THE PAPER.

Q. What is the present circulation of your paper?—A. It varies, sir.

By Mr. COHEN:

Q. How does it compare with the Chronicle or Bulletin?—A. It has not quite as large a circulation as the Chronicle and is a little less than the Bulletin.

By the CHAIRMAN:

Q. It varies from what to what?—A. I sometimes get out very large editions of my paper and sometimes I do not turn out so large an edition.
Q. Well, what is your average circulation?—A. I should think the average would be 5,000, and probably more, taking into consideration the extra editions of the paper.
Q. Is it a weekly paper?—A. Yes, sir.
Q. What is the character of the publication?—A. Miscellaneous.
Q. Is there any special line? Is it agricultural?—A. Yes, sir.
Q. Or is it devoted to stock?—A. Yes, sir; and insurance.
Q. Where is your principal circulation?—A. In the interior.

BUSINESS TRANSACTIONS WITH CENTRAL PACIFIC.

Q. Have you had any business transactions with the Central Pacific?—A. Yes, sir.
Q. Does the Central Pacific advertise in your paper?—A. Yes, sir.
Q. What do they advertise?—A. Their schedule of their cars and their steamers.
Q. Do they advertise anything else?—A. No, sir; I think not.
Q. Have they advertised only the schedule of the cars and the steamers during the time since they have been transacting business with you in that line?—A. I presume if they had anything they wanted to pub-

lish they would publish it outside of the advertisement. I have no doubt about that.

THE ONLY PAPER THAT ADVOCATED CONSTRUCTION OF THE ROAD.

Q. What have they had specially outside of that to publish?—A. In early days the advocacy of the road, and I presume that was the reason—not to trespass upon your time—that Governor Stanford selected me to assist in receiving subscriptions for the stock, that my paper was the only one in San Francisco that advocated the construction of the road.

Q. During later years, since '84, or '85, or '86, what has the Central Pacific advertised other than the time-table?—A. I cannot tell you; probably they have had some articles published, but I cannot recall them to my mind.

Q. Will your business transactions with them exceed $10,000 a year?—A. I think not, sir. I am not positive, however, as to that. I could not answer.

Q. Would the payment during the year of 1884 of over $12,000 be an excessive charge or price paid for advertising?—A. It would depend exactly on what was done.

Q. Would that be an excessive charge for publishing the time-table of the cars and the steamboats?—A. Yes, sir; it would.

Q. Do you recall the fact of receiving at any one time in 1884 more than $1,300 in one sum?—A. No, sir.

Q. Do you recall the fact in 1885 the payment of $1,200 in one voucher?—A. No, sir.

Q. Do you recall receiving in March of the same year $1,200 in one voucher?

The WITNESS. Ask me that question again, please.

PAPER FURNISHED TO STATION AGENTS.

Q. Do you recall a payment by the Central Pacific to you in March, 1885, of $1,200, on account of advertising the schedule of the boats and cars?—A. No, sir; that was not for advertising the schedule of the boats or cars. That was for papers furnished.

Mr. COHEN. State what was the purpose.

The WITNESS. The purpose was for the circulation of the paper.

Q. How many papers did the Central Pacific take?—A. Those papers were taken for their station agents throughout their lines.

Q. Have they continued regularly the subscriptions for their station agents?—A. Yes, sir.

Mr. COHEN. State the purpose.

The WITNESS. Because it contained matters pertinent to the railroad and it was sent out in that way.

Q. Then, in addition, for the fifteen months from January, 1884, to March, 1885, was the sum of $12,000 paid to you either for the schedule of the cars and boats or for subscriptions to the papers?—A. Whatever money you have a schedule there of, taken from the books of the Central Pacific or the Southern Pacific Railroad Company, was for materials furnished so far as my newspaper was concerned.

Q. For what purposes other than I have named to you—for the schedule and the subscription list?—A. I told you they have frequently had articles published and papers have been printed for circulation throughout the East and throughout this coast in large numbers.

Q. How many papers do you deliver to the Central Pacific and its agents?—A. Between three and four hundred.

Q. What is the cost of your paper per annum?—A. It has been $5 a year. It was reduced by the number that they took.

Q. If they took 400, then, at the rate of $5, the charge would be $2,000, would it not?—A. Yes, sir.

Q. Then that would leave the sum of $10,000 to be accounted for. Would that be the sum paid to you for advertising the schedule time of the boats and cars?—A. It would be for just the purposes which I have stated to you and for no others.

Q. What was the nature of the special articles?—A. I cannot recollect; I have published so many.

SPECIAL ARTICLES.

Q. Have you published any lately?—A. Yes, sir.

Q. When did you publish the last?—A. Week before last.

Q. What was the nature of it?—A. It was in reference to this Commission.

Mr. COHEN. I am sorry to say I have not seen that article. I understand you to say that you were employed to print and publish a number of articles in the interest of the Central and Southern Pacific Railroad Companies?

The WITNESS. Yes, sir.

ENCOURAGING IMMIGRATION.

Q. Was not that distributed for the purpose of inviting immigration to this coast, and setting forth the resources of the coast and State?—A. Yes, sir; almost entirely so.

Q. Who wrote those articles?—A. I wrote some of them, and other parties wrote some.

Q. And they all tended to the purpose of encouraging immigration to California and inducing travel upon the Central and Southern Pacific Railroad, did they not?—A. Yes, sir.

Q. And they were circulated in large numbers for that purpose?—A. Yes, sir.

Q. How much of an edition have you printed at one time containing that class of information?—A. I have been in the habit of getting out from year to year, principally on holidays and in the middle of the year, very large pictorial papers setting forth the advantages of California, county by county, giving full descriptions of the characteristics of all the different counties. There have been papers ranging from 100 to 150 pages, highly illustrated and very expensive, which have been largely circulated by the railroad company in the interests of the State. Those papers have been sold all the way from 2 bits to 50 cents apiece, and very large editions have been printed. There is one now in the process of being printed.

By Commissioner ANDERSON:

Q. All about the Commission?—A. No, sir, not that; because it is an illustrated paper.

COST OF ILLUSTRATED EDITIONS.

By Mr. COHEN:

Q. Has the cost of getting up these large editions been somewhat expensive?—A. Yes, sir; very, very expensive.

Q. Therefore, assuming that you did receive $12,000 for advertising, paper and material for one year, the profit is not to be estimated by those figures, is it?—A. No, sir; the profit has been very small on some of those papers, and some have been a heavy loss. The one gotten out a year ago was a loss of $1,200. That was the largest one I ever got out.

Q. I am sorry to say that in attending to the business of this Commission I missed your literary effort in its behalf, and therefore I do not know what view you have taken of the labored and patriotic services of the gentlemen composing this Commission, but I want to ask you whether that article was written by any officer of the Central Pacific Railroad Company or by anybody in its behalf, or if it was dictated by any officer of the railroad company or suggested by any such officer, or was shown to him before its publication?—A. In all my editorial experience they have never written a line for my paper or sought to warp my judgment in anything which I wrote or published.

AUTHORSHIP OF ARTICLES RELATING TO COMMISSION.

The CHAIRMAN. Now let us understand who brought you this article to put in the paper.

Q. Who wrote that article?—A. I did, sir.

Q. Was it your own dictation and composition?—A. Yes, sir.

Q. And was it not suggested by Governor Stanford, Mr. Hopkins, or Mr. Crocker, or any one of the officers of the Central Pacific Railroad Company?—A. Not in any manner, shape, or form. They knew no more about its coming out than you did.

Q. I want to ask you one other question. Did Col. Creed Haymond write that article?—A. I only wish he could write as good a one.

COMPENSATION FOR PUBLISHING ARTICLES.

By the CHAIRMAN:

Q. Were the articles paid for?—A. No, sir; not this article. Articles were paid for that were written and published in the interests of the State, but not an article of that kind.

The CHAIRMAN. I called your attention to the fact of the different articles that were paid for from time to time, and you said that the last was published a week ago, in reference to the Commission.

The WITNESS. Then I answered your question under a misapprehension. You are a lawyer and I am not. You did not put your question so that I understood it.

The CHAIRMAN. I am sorry I did not make it plainer, and I will have to ask you over again. On the first page of the paper which I call your attention to was the answer of Mr. Stanford.—A. Yes, sir.

Q. Was that publication made free?—A. Yes, sir; entirely so.

Q. And you received no compensation for it?—A. Not one farthing.

Q. And was the editorial of five columns published the same way?—A. The same way, sir.

SUBSCRIPTION OF CENTRAL PACIFIC.

Q. What has been the subscription for the last five years of the Central Pacific to the paper?

The WITNESS. In what way?

The CHAIRMAN. Was it an ordinary subscription? I do not know what you call it. What has been the subscription of the Central Pacific?

Mr. HAYMOND. How many papers have they taken?

A. I think 333 or 332. I am not positive which.

By the CHAIRMAN:

Q. Do you usually consult with the officers of the Central Pacific concerning the papers other than as to the schedule for the cars and boats as to time?

The WITNESS. For what purpose?

The CHAIRMAN. As to whether you shall publish the article or not. Who brings them to you?

The WITNESS. Which article do you refer to?

The CHAIRMAN. Articles that refer to other subjects setting out the interests of the Central Pacific.

LARGE QUANTITIES TAKEN OF ISSUES CONTAINING SPECIAL ARTICLES.

I will tell you. So far as these papers that have been circulated so largely by the railroad company are concerned, I have gotten up the matter without any solicitation by them or any one else and in my own way; and whatever talent I saw fit to employ I got. I have gone to the railroad company for its advertisement for that particular issue, and when the paper has been printed and ready for delivery I have gone to them and sold them as many copies of it as they would take for circulation throughout the States and Europe, which they have done. They have frequently taken them and paid for them.

Q. Was the subscription price to the paper the consideration for the publication of the article?—A. No, sir.

Q. Were you paid for the article in any way at any time?—A. Simply as I have told you; they have taken large numbers of the paper and circulated them.

Q. Was the subscription in the nature of a consideration for the article?—A. No, sir; that was not a subscription. That was a purchase of so many papers.

Q. What was your consideration for that?—A. The buying of so many papers.

Q. That is my question to you. Was the subscription the consideration for the publication of the article?—A. Yes, sir; so far as the interests of the State are concerned, and no other.

Q. Is the present subscription for three or four hundred copies the consideration of the publication of the last article?—A. No, sir; it is simply the regular line of subscription that they have taken year in and year out to send to their agents, and it has nothing to do with any article.

Q. Had you any conversation with any of the officers of the Southern Pacific or any of its agents concerning that publication?

Mr. COHEN. Do you mean the publication respecting the Commission?

The CHAIRMAN. Yes, sir.

The WITNESS. No, sir; no, sir; not a word. I take the responsibility of that entirely. I wrote it without suggestion from any one, the same as I write all of my editorials.

VARIATION IN ANNUAL PAYMENTS.

Q. I notice that the payments on the company's books varied from time to time. They varied from $600 to $1,300. I call your attention

to January, 1884, to $1,356 in one payment. Do I understand you to say that you recall the purpose of that?—A. I think that was in payment for the Christmas paper, which was illustrated, and they took large quantities of it. I think so; I am not positive.

Q. What date was that; January, 1884? Do you recall the payment in January, 1885, of $1,200?—A. No, sir.

Q. Do you recall whether that was for a Christmas subscription or not?—A. I think all those payments in the beginning of the year were for Christmas editions of the paper.

REBATE ON SHIPMENTS.

Q. Have you at any time received any rebate from the Central Pacific on any shipments that you have made?—A. I never received a rebate.

Q. Have you received a rebate in any way from the Central Pacific or a refund by way of overcharge?—A. I do not think they ever overcharged me on anything. What was the nature of it?

The CHAIRMAN. There was a refund entered by way of rebate, I think, of $125, on 2,500 Chronicles, in 1884?

The WITNESS. I do not remember that; but if I have fallen short in that amount I will see that it is refunded.

Q. Have you had any other business dealings with the Central Pacific?—A. Yes, sir.

EMPLOYED AS ATTORNEY AT SACRAMENTO.

Q. What other employment have you had with them?—A. I was in Sacramento during one session of the legislature.

Q. Are you an attorney by profession?—A. I commenced life as an attorney, but quit it very shortly. In 1850, in Sacramento, although not of age at the time, I was admitted to practice.

Q. What session of the legislature was it?—A. I cannot recall the year, but it was the session called the "Dolly Varden" legislature. I had been clerk of the house at the preceding session and I recollect it by that name.

Q. How were you employed there?—A. I was employed to look after the interests of the company, to follow the bills and see what bills were introduced.

DUTIES WHILE ATTENDING THE LEGISLATURE.

Q. Who instructed you?—A. I have an idea that I went up there with Mr. Gage.

Q. Were you directed by Mr. Gage?—A. Yes; entirely.

Q. What did you do there?—A. I simply had my desk on the floor of the house as a correspondent of my paper and kept the run of bills as they were introduced that were hostile to the Central Pacific Company. There were a great many of them, and it kept me very busy following them.

THE "DOLLY VARDEN" LEGISLATURE.

By Mr. COHEN:

Q. What year was that?—A. The year of the "Dolly Varden" legislature.

Q. What do you mean?—A. That is the nomenclature by which we know it here. It was a split off from the Republican party.

By the CHAIRMAN:

Q. Did you keep Mr. Gage posted?—A. We kept each other posted.

Q. Were you acting as correspondent also?—A. Yes, sir; and for almost every session when I have not been an officer of the house.

Q. But that session you were a member?—A. I had just vacated the position of clerk of the house.

Q. And you acted as correspondent of the Central Pacific?—A. As correspondent to a certain extent.

Q. Was that the only year you were employed by them?—A. No, sir; I think I have been there since, but it is in the same capacity, in addition to acting as correspondent of my paper.

NATURE OF BILLS INTRODUCED.

Q. Were there many bills enacted into laws that were hostile?—A. I have no recollection of what bills were enacted into laws hostile to the railroad. I know there was an immense number of bills introduced.

Q. Would the number of bills introduced be a criterion for the public sentiment prevailing throughout the State?—A. No, sir; it was the sentiment of a number of cowardly politicians who desired more than anything else to break into the strong box of the [illegible] company by means of threatened legislative enactment. It was simply a menace to the railroad, a pistol held to their heads to stand and deliver. That was the nature of the bills introduced.

Q. Were they largely supported?—A. Sometimes they were, and sometimes they were not.

Q. What measures did you use to prevent the enactment of such legislation?—A. I used none whatever.

NO KNOWLEDGE OF EFFORTS TO INFLUENCE LEGISLATION.

Q. Have you any knowledge of the use of money for the Central Pacific at the session of the legislature or at any session of the legislature that you attended for the purposes of influencing legislation?—A. No, sir; none whatever in a single instance.

Q. Have you any knowledge whatever of any bonus by way of special privileges extended by the Central Pacific to the members or to their friends for the purpose of influencing legislation or influencing the acts of the legislature?—A. Never during my three terms as chief clerk of the house and three terms as secretary of the senate, or when I was out of either of those offices, did anything of that kind come under my observation.

Q. Have you any knowledge of any sales of land, directly or indirectly, or patent rights to members of the legislature, or to their friends, for the purpose of securing their support?—A. None whatever.

Q. Have you any knowledge, directly or indirectly, of the use of money by the Central Pacific for the purpose of influencing legislation?—A. None whatever.

NO PRINTED FILES OF BILLS.

Mr. COHEN. I understand that the purport of your employment at Sacramento was to watch such bills as were introduced, and give information of them to Mr. Gage.

The WITNESS. Yes, sir. I would like to explain one thing to the chairman. The same thing may be in vogue in the legislature of Pennsylvania and in the other States these gentlemen come from. At one time we had no printed file here, but of late years we have printed files of the bills introduced and pending before the legislature, which makes it a very easy matter now for a man to follow the legislation which has been introduced.

PERSONAL CHARACTER OF MR. STANFORD.

By Mr. HAYMOND:

Q. How long have you been acquainted with Governor Stanford?

The WITNESS. Since some time in the fifties. I cannot tell you how long, but before the railroad was thought of.

Q. From the time that he ceased to be governor and got into the railroad down to the last three or four years have there been times when he was very bitterly assailed by portions of the press here?—A. Yes, sir.

Q. And have you not heard, and do you not know now from your own knowledge, that there is no man within your acquaintance that has been so bitterly opposed to the use of corrupt means with public officials?—A. Yes, sir; under all circumstances.

Q. Has he regarded it as mean and cowardly and always advised against it?—A. Yes, sir; and I would like to say that during the whole acquaintance of over thirty years, and during the whole time I held a position in the legislature, and close as I have had the honor to be to him, he has never, in a single instance, asked me to do a single thing that the most honorable man could not do.

STATEMENT OF MR. COHEN ASKING EXTENSION OF TIME.

Mr. COHEN. Here is a statement which I wish to present to the Commission asking for extension of time, which I will have read to the Commission:

Before the United States Pacific Railway Commission, in the matter of the examination of the affairs of the Central Pacific Railroad Company.

STATE OF CALIFORNIA, *City and County of San Francisco, ss:*

ALFRED A. COHEN, being duly sworn, doth depose and say:

That he is an attorney at law, duly admitted to practice in the Supreme Court of the United States and in the supreme court of the State of California; that in consequence of the unexpected and serious illness of Creed Haymond, esq., general counsel of the Central Pacific Railroad Company, which occurred at about the time of the assembling of this Commission in this city, he was requested by the officers of said company, on the 1st day of August, A. D. 1887, to appear before the Commission and represent the interests of said Central Pacific Railroad Company, and to offer such evidence as was necessary bearing upon the inquiries, matters, and things submitted to this Commission by the act of Congress entitled "An act authorizing an investigation of the books, accounts, and methods of railroads which have received aid from the United States, and for other purposes," approved March 3, 1887.

That previous to said 1st day of August he did not expect to be concerned in this investigation, other than as appearing as a witness before this Commission, which he did on the 27th day of July, 1887, upon the same day and within a very short time after having been subpœnaed, but previous to said 1st day of August he had made no preparation whatever to present the views and evidence on behalf of the Central Pacific Railroad Company, and since said date, by his constant attendance upon this Commission and his endeavors to furnish it such information from the books and vouchers of the Central Pacific Railroad Company and of other corporations connected therewith, he has had no time whatever to visit the offices of said company for the purpose of familiarizing himself with its affairs, or of obtaining such evidence as is necessary, in his judgment, to properly inform this Commission and the Presi-

dent and Congress of the United States of the various acts and doings of said Central Pacific Railroad Company and its officers, in the construction, maintenance, and operation of the roads of the said Central Pacific Railroad Company, and of other matters connected therewith, and of its dealings with its land grant and of the moneys received by the said Central Pacific Railroad Company and the manner in which they have been disbursed, and of obtaining such evidence as he states, from his general information and knowledge, to exist, which will prove that the said Central Pacific Railroad Company has in all cases and in every respect properly complied with its contract with the United States, and that the United States in but one single respect has never complied with any contract which it made with this company, and for the further purpose of being enabled to more fully present to this Commission full and complete answers to the various matters of inquiry which the said act of Congress imposes upon it.

That the employés, agents, and servants of this Commission, and the various experts employed by it, have had full and undisturbed range, as affiant is informed and believes, through the books and papers of the said Central Pacific Railroad Company and of the other corporations connected therewith that some of said books and papers are still in the possession of this Commission and of its various employés, and that until the same are restored to the possession of the officers of the said Central Pacific Railroad Company or to this affiant he cannot do his duty as counsel in the premises.

Affiant says that, in his judgment, in order to properly fulfill his duties as such counsel, and to fairly and properly present all the evidence touching the acts and doings of the said Central Pacific Railroad Company and its officers, and its relations to other companies, it will be necessary for him to spend at least one week at the offices of the said Central Pacific Railroad Company to obtain the evidence, both oral and documentary, which is necessary for the full and perfect information of this Commission.

Affiant is further informed and believes that, from the range which this investigation has taken, the Central Pacific Railroad Company ought to be permitted to affirmatively show that it has fully complied in every respect with the acts of Congress under which the grants of lands and the loans of bonds were made to it, and also to show affirmatively that none of the moneys belonging to the said Central Pacific Railroad Company were ever diverted from the uses of that company.

Therefore, under all the circumstances, affiant, representing the Central Pacific Railroad Company, prays a continuance of one week in this case, and believes that such continuance will result not in delay, but in the more rapid and thorough production of testimony; and affiant further states that this application is not made for delay, but in the interest of justice, that the said Central Pacific Railroad Company may be fairly heard.

ALFRED A. COHEN.

Subscribed and sworn to before me this 15th day of August, 1887.

ROBERT E. PATTISON,
Chairman of Commission.

Mr. COHEN. I understand that the application will be made on the minutes of the Commission, as made at this time.

EXPLANATION OF MR. HAYMOND.

Mr. HAYMOND. Now, if the Commission please, I would like to say a few words upon this application. I have been in very bad health for many days, unable to stand, although I am getting now in somewhat better condition, and I think that with my knowledge of the affairs of the company, now that I am able to do a little work each day, that we can prepare the testimony in this case so that it can be presented to you inside of a week, if you give us this delay, but if you do not give us this delay it never will come in that compact shape in which it should be presented, and no time will be saved, for it will take the whole of the two weeks anyhow to present it in a more desultory way. Of course it has been somewhat unfortunate to the company that I have been taken sick at this time, so that it was forced to be represented by Mr. Cohen without having had an opportunity to properly prepare himself. I have been more particularly in charge of these matters, and probably know more about the history of the road than anybody else, and if I had been

well enough to have taken charge I think I could have met the ideas of the Commission by the presentation of the testimony they desired in the beginning, because I have a great deal of it in my mind, but I was not even in a condition to be consulted.

BELIEVES AN EXTENSION OF TIME WILL CAUSE NO DELAY.

Of course I know that you are limited as to time. We dislike to make this application, and I would not make it if I did not believe that it was necessary. Of course a man may be prejudiced; it is so easy for a lawyer to be prejudiced on his own side; but I believe that I could put in testimony which would satisfy you gentlemen, as to the allegations and averments, that in every single instance this railroad company has complied with its contract made with the United States, and in no single instance has the United States ever complied with its contract. Now, if that could be proven here to your satisfaction, of course it would make a very great difference in your report, if what I assert be true, that the United States would have great difficulty in maintaining an action in equity in the Federal or State courts to foreclose its mortgage by reason of failure to comply with its mutual and dependant covenants contained in this contract by reason of the want of equity and by reason of things that it has done to injure this road. Why, if I could satisfy you, or make an approach towards it, that there has been injustice, and wrongs, and misrepresentations, it would go a long way to assist you in making up your report. What other people may say or believe or care, I have been satisfied from the first, and I have never believed that the Commission had the powers that it is generally supposed had been given to it. I have been satisfied from the first that this investigation was made, and I believe it has been conducted, from the very best motives so far as the Commission is concerned, and I have the greatest hopes of getting such a report from you gentlemen so far as the Central Pacific Railroad is concerned as will finally settle this matter between the Government and these roads. But in order to do these things you must have time, and we only ask now for four or five days' time, and that will not lengthen this examination. It will take two weeks anyhow, and it will go on in a scrambling way, and we will get everything that you want in that time, and all that we want to present, and I guarantee that it shall not be taking up time unnecessarily, and it might be in that case that we could work nights. And it is upon these grounds that I ask as counsel for the company that this continuance may be had. I know, of course, how difficult it is for the Commissioners to grant it, on account of their limited stay. I only regret that you gentlemen did not get here on the 1st of April, because if you had never done any other good you would have saved me from being sick, because I would have staid at home, and would not have gone away.

The CHAIRMAN. I think we had better take up this petition in private session and consider the application.

THE RECORD THE BEST EVIDENCE.

Mr. COHEN. If you let us classify this thing we will cut out a lot of extraneous matter so that we can get it all together and it would take about one-third of the time. I told the secretary to be here Tuesday morning with his books. I want to prove by the entries in the books the facts of the case, and I do not want to take anybody's word for this. The statements of the witnesses may clash, but the record is the safest evidence that we can have.

A SUGGESTION THAT DEPOSITIONS BE TAKEN AND SUBMITTED HEREAFTER.

The CHAIRMAN. Why can you not take the depositions of all your witnesses and not only furnish us with the deposition, but with the argument of the company as well, and the plan proposed by the company?

Commissioner LITTLER. That is exactly what I was going to suggest to you. That is what the Union Pacific is going to do.

Mr. HAYMOND. Let me make a suggestion to you, that in one feature of the examination it would not be as well, because you cannot see the witness or know what he is.

The CHAIRMAN. You are going to call the same people over again, are you not?

Mr. HAYMOND. No; we are going to call an entirely different set, perhaps.

Commissioner LITTLER. How would it do to present a few of your witnesses and let us look at them?

ORAL TESTIMONY MORE EFFECTIVE THAN DEPOSITIONS.

Mr. HAYMOND. All the testimony offered against us has been oral.

The CHAIRMAN. Whatever report we make will be our deductions after reading over the evidence.

Mr. HAYMOND. Now, I ask you if you would give the same force to testimony if you did not see the witness?

The CHAIRMAN. First, if you can give us the depositions of sworn witnesses, we will consider them the same as we do here, and then give us your argument based upon the depositions, and then, in addition to that, your plan of adjustment in writing. We will have it before us when we sit down and go over this testimony.

Mr. HAYMOND. But we make something all the time by sitting here and talking with you. We ascertain what points you desire information upon.

Mr. COHEN. The plan that the chairman suggests strikes me as being a very feasible plan, and one that would suit the Commissioners best, and I do not know but what it would suit us best. I do not know but that as everything has been printed so far, all this might as well be written out and printed.

Mr. HAYMOND. It deprives the Commission of the benefit of seeing the witnesses, and the testimony is not so strong. I should also desire that the Commission should see the San Joaquin Valley road and the non-aided road before going North.

REQUEST FOR TIME TO CONSULT WITH OFFICERS OF ROAD.

Mr. COHEN. If you will take that under consideration and then adjourn until to-morrow at 2 o'clock, it will give us a chance to consult over this matter, and I rather think that after talking with the officers of the Central Pacific we may be enabled to accept this proposition and submit the balance of our testimony in writing, properly sworn to. I would like to have all the witnesses sworn before you go away, so that whatever statements they may make may be under oath. Therefore, if you will give us a chance to meet the officers of the company to-morrow morning and talk this matter over, my impression is that that will be the best way of continuing this investigation, just as you suggest.

Commissioner LITTLER. In the first place Mr. Anderson and I have to leave here on Saturday, and the chairman leaves on Thursday. That cuts our time very short.

Mr. COHEN. I do not want to continue this investigation after the chairman leaves.

The CHAIRMAN. We will hear you if you want to make an oral argument in New York, after you get your testimony in. If you want to present it before us in the shape of an oral argument we will hear you the same as we did Judge Dillon on behalf of the Union Pacific.

Mr. HAYMOND. I do not know but that that is fair.

Commissioner LITTLER. We intend to give you every opportunity in the world to make your case. We expect to make an abstract of all this testimony before we write our report.

Mr. COHEN. Upon the testimony which you have taken, and such testimony as we will take in depositions, and such testimony as you may take on behalf of the Central Pacific in New York, I will present to you our summing up upon these facts.

Commissioner LITTLER. You see we really want time to go over all this testimony.

Mr. HAYMOND. You really ought to have a year, and I think that is what you ought to say to Congress.

Mr. COHEN. I think I shall recommend the Central Pacific Railroad Company to save the time, but I suggest now that an adjournment be taken until to-morrow evening at 2 o'clock, and we will then bring such witnesses before you as we intend to use, and they can be sworn. We will then take their depositions.

The Commission then adjourned until Tuesday, August 16, 1887, at 2 p. m.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Tuesday, August 16, 1887.

Afternoon session.

Mr. COHEN. Mr. Chairman, in your reply to our application for a continuance, you made certain suggestions which I think it would be well should be adopted.

The CHAIRMAN. We want your acceptance of our proposition.

Mr. COHEN. We will give that; but you set the hearing for the arguments for the 22d of September or whatever day it is, and we have understood that we could make an oral argument in October.

The CHAIRMAN. You can have up to the 1st of October, but we want to take time to read over the evidence during October. I suppose that on the 1st of October we could hear you.

Mr. HAYMOND. We are satisfied so long as the limitation is not placed on that.

Commissioner ANDERSON. That relates more especially to anything that you may expect to put in print. It has to go to Washington to be revised and sent back to us, and we cannot very well consent to receive anything for print after the 22d of September.

Mr. HAYMOND. Then do you wish it to reach you by the 20th?

The CHAIRMAN. Yes, sir.

TIME WHEN ARGUMENT WILL BE HEARD.

Mr. HAYMOND. And then will you fix a time for the oral argument?

The CHAIRMAN. We will be in New York from the 20th of September to the 1st of October, and we can hear you at any time during those two weeks.

Mr. HAYMOND. Is there any difficulty as to witnesses being sworn here by a court commissioner?

The CHAIRMAN. No, sir.

Mr. COHEN. I think they should be sworn by the Commission.

Mr. HAYMOND. We may have witnesses that we do not know anything about at the present time.

Commissioner ANDERSON. It would not hurt them to wear this oath around for two or three months.

Mr. HAYMOND. A man may forget it.

The CHAIRMAN. As the testimony is taken from time to time it had better be forwarded at once and not be held back.

FURNISHING NEWSPAPERS WITH COPIES OF DEPOSITIONS.

Mr. HAYMOND. As all the testimony has been printed so far, would you have any objection to our furnishing the newspapers with copies of such testimony as we may hereafter take.

The CHAIRMAN. No; none whatever.

Mr. COHEN. Your accountant wants to get several entries. I will give them to you now so that the books can go back to the accountant.

Commissioner ANDERSON. We have done with the books and they can all be returned.

Mr. COHEN. I want to take off some things. Mr. Reporter, you have the letter of the Commission.

FORMAL ACCEPTANCE OF THE PROPOSITION OF COMMISSION.

Mr. HAYMOND. We will now note a formal acceptance by counsel representing the Central Pacific Railroad of the proposition made by the Commission.

The CHAIRMAN. Have you any witnesses to offer this afternoon?

Mr. COHEN. Mr. Miller has come here and has answers to some calls.

RESOLUTION RELATING TO RAILROAD AND TELEGRAPH EAST OF NEWCASTLE.

Mr. COHEN. First, I will read from page 10 of the minute book of the Central Pacific Railroad Company, under date of May 1, 1865:

Resolved, That Leland Stanford, Mark Hopkins, and E. H. Miller, jr., be, and are hereby appointed, a committee to examine into and report to this board on the question of letting a contract for the construction of the railroad and telegraph line of the company east of Newcastle.

This was unanimously adopted.

Commissioner ANDERSON. State also who was present at that meeting.

Mr. COHEN. Present, Leland Stanford, Mark Hopkins, E. B. Crocker, A. P. Stanford, Charles Marsh, and E. H. Miller, jr.

REPORT OF COMMITTEE ON RAILROAD AND TELEGRAPH LINE.

I read from page 11, May 9, 1865:

The committee appointed at the last meeting to examine into the question of letting a contract for the construction of a railroad and telegraph line of the company east of Newcastle submitted their report, and on motion of E. B. Crocker it was adopted and ordered on file.

E. B. Crocker moved that the same committee be directed to ascertain and report as soon as practicable on what terms and to whom a contract can be let in accordance with the report of the committee just filed.

Motion seconded by Mark Hopkins and carried unanimously.

Page 12, June 6, 1865.—Do you want the names of the persons present at each meeting, Commissioner Anderson?

Commissioner ANDERSON. I think you had better give them.

COMMITTEE DIRECTED TO FURTHER REPORT AS TO TERMS.

Mr. COHEN. At the meeting of May 9 there were present, Leland Stanford, Mark Hopkins, E. B. Crocker, and E. H. Miller, jr. Now, on page 12, on the date of June 6, 1865, present, Leland Stanford, Mark Hopkins, E. B. Crocker, and E. H Miller, jr.

The commmittee appointed on May 1 to examine into the question of letting a contract for the construction of a railroad and telegraph line of the company east of Newcastle were further directed to ascertain and report as soon as practicable on what terms and to whom the contract may be let in accordance with the report of the committee just filed and submitted.

The report was adopted and ordered on file.

RESOLUTION OFFERED BY MARK HOPKINS, AND TERMS OF CONTRACT.

Then follows the resolution. Mark Hopkins offered the the following resolution, which was on motion adopted. Then come the particulars of the contract with Charles Crocker & Co. I need not read it to you; I suppose it can be inserted.

The following is a copy of the resolution last above referred to:

Central Pacific Railroad Company.—Copy of resolution adopted by board of directors June 6, 1865.

Resolved and ordered, That Charles Crocker & Co. be allowed and paid for all work done and material furnished, or which may hereafter be done and furnished, until the further order of the board of directors, in the construction of the railroad of the company, from section forty-three (43) eastward, subject to and in accordance with the terms, conditions, and stipulations set forth in the contract with said Charles Crocker & Co., dated September 19, 1863, except so far as the same are modified or changed by this order, at the following rates and prices, and in accordance with the following classification, to wit:

(1) For clearing and grubbing, up to section fifty, two hundred dollars per section, and for clearing and grubbing section fifty and beyond, such price as may be agreed upon by the president of the company and said C. Crocker & Co., and in case of their disagreement, the price to be fixed by the chief engineer.

(2) For earth excavation, to include all kinds of top soil, loam, sand, and other material removable by the ordinary process of plowing and shoveling, including haul, as per profile, forty-five cents per cubic yard.

(3) For cement, to include that material or whitish formation commonly known as "cement," which shall be excavated without blasting, including one hundred feet haul, sixty-five cents per cubic yard.

(4) For semi-hard rock and indurated material, to include all friable, argillaceous rock, hardpan, decayed granite, and indurated or cemented earth or gravel, which shall be excavated by blasting, one dollar and forty-seven and one-half cents per cubic yard.

(5) For solid rock, to include the softer varieties of granite, slate, and calcareous rock, and other rocks of a like character, two dollars and fifty cents per cubic yard.

(6) For extra hard rock, to include the harder varieties of granite, blue hard rock, jasper, and similar varieties of rock, five dollars per cubic yard.

(7) For flinty rocks, to include flint porphyry, ironstone, hornblende, trap rock, and rocks of a like character, and also all tunnel work, such price as may be agreed upon by the president of the company and said C. Crocker & Co., and in case of their disagreement, to be fixed by the chief engineer.

(8) For riprap protection wall, three dollars per cubic yard.

(9) For increase of average haul, for one hundred feet, one and one-half cents per cubic yard.

(10) For hammer-dressed masonry (dry), thirty-five dollars per cubic yard.

(11) For rubble masonry (dry), twenty-five dollars per cubic yard.

(12) For concrete masonry, in cement, fifteen dollars per cubic yard.

(13) For culvert masonry and foundation wall for trestle work (dry), twenty dollars per cubic yard.
(14) For slope, or retaining wall, including paving for foundations of structures (dry), ten dollars per cubic yard.
(15) For brick work in cement, thirty dollars per thousand.
(16) For blind or French drains (dry), three dollars per cubic yard.
(17) For cement mortar, five dollars per cubic yard.
(18) For lime mortar, three dollars per cubic yard.
(19) For timber in truss bridges of spans from 149 to 201 feet, ninety dollars per thousand feet, board measure.
(20) For timber in truss bridges of spans from 99 to 151 feet, eighty-two dollars per thousand feet, board measure.
(21) For timber in truss bridges of spans from 49 to 101 feet, seventy-five dollars per thousand feet, board measure.
(22) For timber in truss bridges of spans from 14 to 51 feet, including all farm and road bridges, seventy dollars per thousand feet, board measure.
(23) For timber in stringer bridges, trestling, and timber piers, seventy-five dollars per thousand feet, board measure.
(24) For timber and plank in foundations, fifty dollars per thousand feet, board measure.
(25) For timber in piling, forty dollars per thousand feet, board measure.
(26) For driving piling, twenty-five cents per linear foot under the surface.
(27) For wrought iron in all structures, fifteen cents per pound.
(28) For cast iron in all structures, eleven cents per pound.
(29) For cut spikes and nails in all structures, eight cents per pound.
(30) For ties, eighty-three cents each.
(31) For track-laying and distributing ties and other material, eight hundred dollars per mile.

The payments to be made monthly, according to the monthly estimates, five-eighths thereof in gold coin, and the remaining three-eighths in the capital stock of the company, at the rate of two dollars of capital stock for each one dollar of said three-eighths of said estimates, with the privilege of paying said three-eighths in gold coin in lieu of said stock, at the election of said company, to be made at the time of such payment.

COMMUNICATION OF C. CROCKER & CO.—REQUEST THAT STOCK BE RATED AT 30 INSTEAD OF 50.

Then on page 31, under date of May 2, 1866 (present, Leland Stanford, E. B. Crocker, Mark Hopkins, E. H. Miller, jr), the following communication from Charles Crocker & Co. was read, to wit:

SACRAMENTO, *April* 16, 1866.

To the Board of Directors of the Central Pacific Railroad Company of California:

GENTLEMEN: We find it impossible to sell the stock which we received upon our contract with the company for the construction of its railroad for more than 30 cents on the dollar, and cannot realize 50 cents therefor, the price at which the same was received under the contract. We find ourselves unable to prosecute the work with the diligence and rapidity required by the company under the present arrangement respecting the stock. We therefore request that your company pay us cash instead of stock, or otherwise the stock be paid to us at the rate of 30 cents instead of 50 cents on the dollar, as at present.

Respectfully,

C. CROCKER & CO.

Here is a resolution fixing the route of the company. I do not know whether you want it or not, and I do not care about putting it in if you do not want it.

Commissioner LITTLER. We do not want it.

CONTRACT WITH CONTRACT AND FINANCE COMPANY.

Mr. COHEN. At page 53, under date of December 3, 1867 (present, Leland Stanford, E. B. Crocker, Mark Hopkins, E. H. Miller, jr.):

The president reported that he had made arrangments, or a contract, with the Contract and Finance Company for the construction and equipment of the railroad and telegraph line of this company lying east of the eastern boundary line of Cali-

basis, and presented a draft of such contract. The same having been read and considered, the following resolution and order was unanimously adopted, to wit:

Resolved and ordered, That the company hereby consents and agrees with the Contract and Finance Company to the terms, stipulations, and conditions of the articles of agreement submitted by the president of this board, and the president and secretary are hereby authorized and directed to execute the said contract on behalf of this company and to attach the corporate seal thereto.

Commissioner LITTLER. We request that you put in a copy of the contract at that point.

Mr. COHEN. Very well. Note the request of Commissioner Littler, please.

Commissioner ANDERSON. Many of these resolutions have already been spread on the minutes of this Commission.

Mr. COHEN. If they are found to be duplicates they can be stricken out.

RESOLUTION TO GIVE NOTES OF COMPANY FOR AMOUNT DUE.

On page 66, under date of February 18th, 1869 (present, Leland Stanford, Mark Hopkins, E. B. Crocker, and E. H. Miller, jr.):

Resolved and ordered, That the president and secretary be, and they are hereby, directed to execute and deliver to the Contract and Finance Company, the promissory notes of this company for the amount of cash due to the said company, in such sums as said company may require, payable one year from date to said company or bearer, and with interest at 10 per cent. per annum, payable quarterly, principal and interest payable in United States gold coin.

Mr. HAYMOND. Mr. Anderson, the other day was there not something found on the books which showed what that contract was?

Commissioner ANDERSON. The Contract and Finance Company's contract was not found, but the accountant has reported the terms of the contract as gathered from the entries in the cash book and the ledger.

Mr. COHEN. When we come to put in our evidence we propose to show exactly what the contract was.

Mr. HAYMOND. I thought I heard Commissioner Anderson say that that had virtually been shown.

TERMS OF CONTRACT.

Commissioner ANDERSON. I did not gather from the report that we could re-establish all the terms of the contract, as they applied especially with reference to material and payments. Material appears to have been bought in some way by the Central Pacific for the Contract and Finance Company, and then there seems to have been equipment bought by the Central Pacific which did not enter into their account.

Mr. HAYMOND. So there is something short there.

Commissioner LITTLER. I think there is a mistake in that report.

Mr. COHEN. If you were going to stay here I could go through those books with Mr. Miller. I think we could find everything relating to the contract.

Commissioner ANDERSON. You will have Mr. Stevens here, who is very much better than I am on such matters.

Mr. COHEN. I think we could satisfy you as to the terms of the contract, and we could very likely do it with Mr. Stevens.

Mr. HAYMOND. I understood Commissioner Anderson that he had to some extent satisfied himself.

Commissioner ANDERSON. I am satisfied that the amounts are $43,000 gold per mile, and $43,000 stock.

Mr. COHEN. I think we can satisfy you by the books and papers.

Commissioner ANDERSON. I understand Mr. Miller desires to answer in reference to some calls.

PALACE HOTEL, SAN FRANCISCO,
Tuesday, August 16, 1887.

E. H. MILLER, JR., being further examined, testified as follows:

STATEMENT AS TO LAND-GRANT BONDS.

By Commissioner ANDERSON:

Question. What reply are you now able to make as to the calls?—Answer. First, I will submit a statement of the land-grant bonds sold and redeemed, in answer to a call from the Commission, showing that $10,000,000 of bonds have been issued. The receipts from the same have been $8,643,661.82; discount, $1,356,338.18; the total amount of bonds redeemed have been $5,563,000. The statement also shows the details, with the dates of the redemption.

By Commissioner LITTLER:

Q. Does that statement show the amount of bonds outstanding?—A. Yes, sir.

By Commissioner ANDERSON:

Q. The first entry relates to bonds issued to the Contract and Finance Company in exchange for notes of the Central Pacific Railroad. Can you tell me by whose vote the rate at which those bonds were to be taken was fixed?—A. No, sir; I cannot tell you that; I think that would appear in the minutes.

Mr. COHEN. What is the date of that?

Commissioner ANDERSON. The date is January 28, 1871.

THE NOTES HELD BY CONTRACT AND FINANCE COMPANY.

Q. I will ask you another question. Do you know who held the notes, the names of the persons who held the notes, at the time that these bonds were delivered in satisfaction of the notes?—A. The Contract and Finance Company itself, I think. That is my recollection.

Q. Do you think they had not been discounted?—A. They had not, but they may have been used as collateral security.

Q. Do you know whether at the time indicated, January 28, 1871, all of the first-mortgage bonds of this company had been issued and sold?—A. No; I do not recollect about it.

Q. Please examine the minutes and see whether they disclose the authority under which the discount on the 8,953 bonds issued to the Contract and Finance Company in January, 1871, which discount appears to have amounted to $1,208,655, was allowed?—A. I find a resolution under date of January 20, 1871.

RESOLUTION TO SELL OR EXCHANGE LAND BONDS.

Q. Will you please state who was present?—A. Present, Leland Stanford, Mark Hopkins, Charles Crocker, William E. Brown, C. H. Cummings, and E. H. Miller, jr.

Resolved and ordered, That the treasurer be, and he is hereby, authorized to sell or exchange the 6 per cent. land bonds of this company for any obligations of the company bearing interest at 7 per cent or over, provided he shall not exchange said bonds at less than the gold market value of the first-mortgage bonds of this company in New York.

Q. Was that carried by a unanimous vote, apparently?—A. Yes, sir.

Q. Can you explain why twelve of these bonds were sold by Mr. Huntington on the 10th of March, 1874, at $83.93, and fourteen bonds,

no date being stated, but apparently being sold at the same time, at $96.83?—A. No, sir; I cannot give you any explanation of that.

Q. What is that?—A. I do not remember any explanation of that.

Mr. COHEN. I will explain that before we get through. I intend to give you a full explanation before we get through.

ALL THE BONDS ISSUED TO CONTRACT AND FINANCE COMPANY.

By Commissioner ANDERSON:

Q. Do you know whether all the bonds referred to in the first entry—6,963 bonds—were issued to the Contract and Finance Company or whether some of them were issued to the firm of Crocker & Co.?—A. I think they were all delivered to the Contract and Finance Company; that is my recollection.

Q. Do you know the amount of the face value of the notes then held by the Contract and Finance Company?—A. I do not recollect that.

Q. Was there not an issue of sixty notes of $100,000 each?—A. There was at one time $5,600,000. I remember to have seen that recently.

TOTAL PROCEEDS OF ALL THE ASSETS.

Q. Then am I to understand that the total proceeds of Government bonds received, of the first-mortgage bonds of the company, and of the other assets which were referred to by Mr. Stanford in his statement, which, at his figures, realized about $47,000,000 or $48,000,000, had been insufficient to pay the amounts due to the Contract and Finance Company by the amount of notes held by them?—A. I do not know whether that is the fact or not. There were some subsequent dealings with the Contract and Finance Company, and there may have been subsequent credits.

Q. Had not these notes been issued before the completion of the road?—A. I think not.

DATE OF ISSUE OF NOTES.

Q. What is the date of the resolution, read this afternoon, in regard to the issue of those notes?—A. The date of the exchange of the bonds was in 1871.

Commissioner ANDERSON. No, sir. Mr. Cohen has put in a resolution here authorizing the issue of the notes to the Contract and Finance Company.

Mr. COHEN. That was in 1869.

THE AMOUNT OF THE NOTES.

Q. What part of 1869? Do you not recall that the amount of notes that were delivered in pursuance of the resolution of February, 1869, was sixty notes of $100,000 each, amounting to $6,000,000.—A. I presume that is the fact, but I do not recollect. My impression is that it was $5,600,000.

Q. Was it about that amount? I do not intend you to be responsible for the exact figures.—A. Yes, sir.

Mr. COHEN. I want you to keep in mind the date. My impression is that it was later than 1869. Are you sure about the date?

The WITNESS. No, sir; not about this date.

Q. Are these the same notes that were adjusted or paid with these land grant bonds in 1871?—A. I do not remember that, because I think there were three different sets of notes given the Contract and Finance Company at different times, aggregating different amounts.

Q. What I want to ascertain is whether the notes represent an indebtedness incurred in construction under the contract of building the road or whether they arose out of work done for you after the road had been completed and independent of the amounts which were to be covered by the terms of the contract?—A. That I cannot now answer without examining the books.

STATEMENT OF PROCEEDS OF SALE OF LANDS.

Q. From what source did you obtain the statement of the proceeds of the land sales?—A. From the trustees of the mortgage. The gross proceeds of the sales of land were paid over to the trustees of the land-grant mortgage.

Q. Is that Mr. Mills's report?—A. Mr. Mills is the land agent.

Q. Who gave you this figure of $5,563,000?

The WITNESS. Of bonds redeemed?

Commissioner ANDERSON. Yes, sir.

The WITNESS. I find that on my books. The trustees when they redeem bonds turn the bonds over to me to cancel, and I enter them on my books as so many bonds canceled.

Q. Who are the trustees?—A. They are now William E. Brown and J. O'B. Gunn. There have been various parties.

Q. And have they reported to you detailed statements showing what land has been sold and the price realized and the expense of conducting the land department?—A. No, sir; the trustees do not do that. They simply handle the money as it is turned over to them by the land agent.

PRINTED REPORTS OF LAND AGENT.

Q. Is all the information that we may gather on that subject contained in the printed reports of the land agent annexed to your annual reports?—A. All the reports in regard to the sale of lands. I have, however, in my hand here another call which is more in detail than that. Perhaps you will understand it better if you take the two together.

The paper furnished by the witness was marked "Exhibit No. 1, August 16, 1887," and is as follows:

Central Pacific Railroad Company. Statement of land-grant bonds sold and redeemed.

		Sold for.	Discount.
Jan. 28, 1871	8,953 bonds at 86¼ (issued to Contract and Finance Company, in exchange for notes of C. P. R. R. Co., dated October, 1869, and May, 1870, with interest).	$7,744,345.00	$1,208,655.00
Apr. 12, 1871	200 bonds at 75 (sold by Leland Stanford)	150,000.00	50,000.00
Mar. 10, 1874	12 bonds (sold by C. P. Huntington) at 83.93	10,071.94	1,928.06
	14 bonds (sold by C. P. Huntington) at 66.83	9,356.00	4,644.00
	4 bonds (sold by C. P. Huntington) at 84.23	3,373.20	626.80
May 13, 1874	1 bond (sold by C. P. Huntington) at 82.11	821.15	178.85
June 14, 1875	264 bonds (sold by C. P. Huntington) at 87.22	230,250.02	33,749.98

Feb. 17, 1881	128 bonds	128,000			

E. H. MILLER, JR., *Secretary.*

LAND-GRANT MORTGAGE PROPERTY.

The WITNESS. This statement is in answer to a call for a statement showing the amount of the property included in the land-grant mortgage which has been sold or disposed of, the amount of contracts outstanding, the application made of the property sold, the number of bonds redeemed, and the number of bonds outstanding.

The paper was marked "Exhibit No. 2, August 16, 1887," and is as follows:

[Secretary's office, Central Pacific Railroad Company, San Francisco. P. O. box 2238.]

SAN FRANCISCO, *August* 12, 1887.

To UNITED STATES PACIFIC RAILWAY COMMISSION:

GENTLEMEN: In reply to your call for "a statement showing the amount of the property included in the land-grant mortgage which has been sold or disposed of, the amount of contracts outstanding, the application made of the property sold, the number of bonds redeemed, and the number of bonds outstanding," I submit the following statement of property in land-grant mortgage, &c.:

	Acres.
Patented lands sold	1,834,036.91
Sales contingent on receipt of patents	421,583.07
Total	2,245,619.98

The total receipts from all sources to August 1, 1887, from lands sold, leased, land contracts, stumpage, &c., has been	$7,560,478.45
Of this amount there has been paid over to the trustees of the land-grant mortgage, to August 1, 1887	7,144,788.41
	415,690.04

The difference ($415,690.04) is for lands sold previous to the land-grant mortgage, and for receipts from leases, stumpage, and for land sales in suspense.

The trustees of the land-grant mortgage, from the amount paid over to them of $7,144,788.41, have redeemed $5,563,000 land-grant bonds, at a cost of	$5,585,170.85
Refunded on canceled contracts, &c	28,027.69
There is in hands of trustees, cash for redemption of bonds	1,531,589.87
	7,144,788.41

The amount outstanding on contracts for sales of lands was August 1, 1887, $1,147,891.57.

Yours, respectfully,

E. H. MILLER, JR., *Secretary.*

RATE OF INTEREST ON LAND-GRANT CONTRACTS.

Q. What rate of interest do your outstanding contracts bear?—A. At that time, I think, 10 per cent., and then it was reduced to 7, and now I believe 6; it is either 6 or 7.

Q. Do you know how much of a cash payment is required before the issuing of one of these contracts?—A. Twenty per cent. and one year's interest in advance.

Q. Who pays the accruing interest on the land-grant mortgage?—A. The company, the railroad company.

Q. And do they pay it from their general earnings or do they pay it and charge it to the land grant itself?—A. All expenses, including the interest of the land-grant mortgage, are paid out of the general earnings of the company. The gross proceeds of the land are paid over to the trustees.

Q. Are those the gross proceeds, without any reduction whatever?—A. The sales, without any reduction, except refunds on contracts that are not completed.

AMOUNT OF LAND UNDISPOSED OF.

By Commissioner LITTLER:

Q. How much land have you undisposed of, including that to which you have not secured patents, but which you claim under the original grant?—A. I cannot answer that. It is an estimate, a mere guess.

Commissioner LITTLER. I would like to know something about it.

The WITNESS. I think Mr. Mills, in our annual report, makes an estimate about that.

EXPENSES OF LAND DEPARTMENT.

By Commissioner ANDERSON:

Q. What is the approximate amount of the annual expenses of this department, without reference to interest at all?—A. It is from $50,000 to $100,000.

Q. Is that included as a part of the operating expenses of your railroad in the settlement with the United States?—A. No, sir; it has been thrown out always. You will see that, by our statement of profit and loss each year, the expenses of the land department are not included.

By Commissioner LITTLER:

Q. What compensation is paid to the trustees of this land-grant mortgage?—A. Nothing; they do it for love and affection.

By Commissioner ANDERSON:

Q. What compensation is paid to the land-grant agent?—A. It has been from $3,000 to $7,000 per annum.

RATE OF INTEREST AT TIME OF EXCHANGE OF BONDS FOR NOTES.

By Mr. COHEN:

Q. In the resolution passed in 1869, directing the issue by the Central Pacific to the Contract and Finance Company of its promissory notes the rate of interest was 10 per cent. What was the rate of interest at the time that you made the exchange of the land-grant bonds for the promissory notes?

The WITNESS. The current rate of interest?

Q. What was the rate of interest which you were paying at that time?—A. If it was those same notes, the rate was 10 per cent.

Q. What was the current rate of interest in 1871?—A. Ten per cent., I think.

Q. That was a low rate at that time, was it not?—A. I think so.

VALUE OF LAND-GRANT BONDS.

Q. Then would the land-grant bonds bearing 6 per cent. at that time be worth par in this market?—A. They were not worth par.

Q. And they could not have been sold for enough to take up——A. (interrupting.) No 6 per cent. bonds were worth par in this market.

Q. Could the bonds have been sold for enough at that time to take up the notes held by the Contract and Finance Company?—A. Not the same amount of bonds.

Q. I mean, could the same amount of bonds have been sold for enough to take up the notes held by the Contract and Finance Company?—A. No, sir.

Commissioner ANDERSON. Well, we will pass on to the next call.

MEMORANDA OF TERMS OF LEASES.

The WITNESS. The next is a statement called "memoranda of terms of leases."

The paper was marked "Exhibit No. 3, August 16, 1887," and is as follows:

Central Pacific Railroad to Southern Pacific Company.

Lease dated February 17, 1885.

Line of road: The whole of its railroad situated in Utah, Nevada, and California, known as the Central Pacific Railroad, and assigns all leases which it holds of railroads and other property in California situated north of Goshen.

Miles, 1,649.86, April 1, 1885.

Rental: $1,200,000 per annum, payable the first Monday in May of each year, or any net earnings after payment of all obligations, including above $1,200,000, not exceeding $3,600,000 per annum; the property to be kept in good repair, to add to and better the same, pay all taxes thereon, and discharge all liabilities and obligations except payment of principal of funded or floating debt; perform all obligation towards the Government except payment of U. S. bonds and interest thereon; payment to be made for rolling-stock of lines north of Goshen used on lines south of Goshen, and *vice versa*. In force from April 1, 1885. Ninety-nine years. To be revised if one party is being benefited at the expense of the other. To terminate or be changed or revised if hostile legislation by the Government takes place against Central Pacific Railroad. Central Pacific releases Southern Pacific of California, Southern Pacific of Arizona, and Southern Pacific of New Mexico, and transfers leases of those roads to Southern Pacific Company.

Southern Pacific Railroad of Arizona to Central Pacific Railroad Company.

Lease dated November 10, 1880.

Line of road: Western boundary of California and Arizona, at Yuma, to eastern boundary of Arizona Territory.

Miles, 384.17.

Rental: $135 per mile per month and repairs. In force from November 1, 1880. Five years. To terminate on thirty days' notice.

Southern Pacific Railroad of New Mexico to Central Pacific Railroad Company.

Lease dated November 17, 1880.

Line of road: All road constructed or to be constructed, commencing at the western boundary of the Territory of New Mexico and extending to the eastern boundary.

Rental: $135 per mile per month and repairs. In force November 1, 1880. Five years. To terminate upon thirty days' notice.

Miles when completed, 167.22.

Southern Pacific Railroad to Central Pacific Railroad Company.

Lease dated September 1, 1876.

Line of road: All of the road and branches constructed or to be constructed lying or being south of Goshen.

Rental: $500 per mile per month, less $250 per mile per month allowed by Southern Pacific for operating expenses. In force from September 1, 1876. To be terminated upon sixty days' notice. Amended April 10, 1879, to require twelve months' notice to terminate lease instead of sixty days. Lease canceled May 1, 1879.

Miles when completed, 550.20.

Lease dated April 16, 1879.

Line of road: All of the road and branches constructed or to be constructed lying or being south of Goshen.

Rental: $250 per mile per month and ordinary repairs. Rent to be readjusted by mutual consent, but never to be less than $2,700 per mile per annum. In force from May 1, 1879. Five years. To terminate upon twelve months' notice. Lease to continue after expiration of five years; to terminate after twelve months' notice. Lease canceled January 1, 1880.

Miles when completed, 550.20.

Lease dated January 1, 1880.

Line of road: All of the road and branches constructed or to be constructed lying or being south of Goshen.

Rental: $250 per mile per month and cost of repairs. If rent is reduced by mutual consent it shall never be less than the amount required to pay interest on bonds outstanding. In force January 1, 1880, five years. Not to be terminated or modified during said period as regards rent. If connection with eastern system of roads is not made in five years, lease to be extended until such connection is made, not to exceed ten years from date of this lease.

550.20 miles when completed.

Lease dated January 23, 1884.

Line of road: All of the road and branches, situate, lying, and being south of Goshen.

Miles, 550.20.

Rental: $250 per mile per month and repairs. If net earnings shall warrant an increase of rental, the same shall be increased from time to time. In force from January 1, 1885, ten years.

Berkeley Branch Railroad to Central Pacific Railroad Company.

Lease dated December 21, 1880.

Line of road: Shellmound to Berryman Station.

Miles, 3.84.

Rental: $200 per month per mile; all repairs and taxes. In force from November 1, 1880, ten years. To terminate upon thirty days' notice from either party.

Amador Branch Railroad to Central Pacific Railroad Company.

Lease dated December 21, 1880.

Line of road: Galt to Ione.

Miles, 27.20.

Rental: First five years $3,500 per month; second five years $4,000 per month; all taxes and repairs. In force from November 1, 1880, ten years. To terminate upon thirty days' notice from either party.

Los Angeles and San Diego Railroad to Central Pacific Railroad Company.

Lease dated November 11, 1880.

Line of road: Florence to Santa Ana.

Miles, 27.82.

Rental: $100 per mile per month, cost of all repairs and taxes. In force from November, 1, 1880, five years. To terminate upon thirty days' notice.

Los Angeles and Independence Railroad to Central Pacific Railroad Company.

Lease dated November 8, 1880.

Line of road: Los Angeles to Santa Monica.

Miles, 16.83.

Rental: $100 per mile per month, repairs and taxes. In force from November 1, 1880, five years To be terminated on thirty days' notice by either party.

San Pablo and Tulare Railroad to Central Pacific Railroad Company.

Lease dated July 1, 1884.
Line of road: Tracy to Martinez.
Miles, 46.51.
Rental: $13,800 per month; cost of repairs, legal expenses, and damages incurred in operations; guarantee principal and interest on $1,023,000 bonds. Rent may be paid in coupons of San Pablo and Tulare Railroad. In force from July 1, 1884, to April 1, 1908. Terms may be altered each five years. Central Pacific to further guarantee bonds, not to exceed $25,000 per mile for any extension of the San Pablo and Tulare Railroad and take lease of same.

California Pacific Railroad to Central Pacific Railroad Company.

Lease dated July 1, 1876.
Line of road: South Vallejo to Sacramento; miles, 60.17.
Adelante to Calistoga; miles, 34.60.
Davisville to Marysville; miles, 43.56.
Also, steamer New World.
Rental: $550,000 per annum, payable semi-annually, June 15, and December 15. Cost of ordinary repairs, taxes, legal expenses, and damages incurred in operations, guarantee principal and interest on $3,000,000 bonds. Rent may be paid in California Pacific coupons. If net earnings exceed $550,000 per annum, three-fourths of excess to be paid to California Pacific. In force from July 1, 1876. Twenty-nine years. Terms may be altered each five years. Supplement to lease of July 1, 1876. California Pacific Railroad agrees to increase accommodations between Sacramento and Suisun. California Pacific Railroad agrees to pay $50,000 per annum in addition to the $550,000 rental paid heretofore. California Pacific Railroad in consideration relinquishes payment of three-fourths of net earnings over and above $550,000 per annum. In force from January 1, 1880. May be terminated upon six months' notice; and after such termination return to conditions of lease of July 1, 1876.

California Pacific Railroad to Central Pacific Railroad Company and Southern Pacific Company.

Agreement dated October 15, 1886, to extend lease of July 1, 1876, and supplementary of December 24, 1879, to January 12, 1912. All conditions remaining the same. Lease assigned by Central Pacific Railroad to Southern Pacific Company April 1, 1885.

Northern Railway to Central Pacific Railroad Company.

Lease dated September 4, 1879.
Line of road: West Oakland to near Martinez; miles, 31.0231.
Benicia to near Fairfield; miles, 16.9881.
Also, San Pablo and Tulare, near Martinez, to Tracy, 46.5180.
Rental: 25 cents per mile for locomotives; 20 cents per mile for cars in passenger service; 8 cents per mile for cars in freight service; less $100 per mile of road per month. In force from September 2, 1878, ten years.
Lease dated September 4, 1879.
Line of road: Near Woodland to Willows, or any distance it may be extended.
Miles, 64.7969. July 1, 1886.
Rental: $1,500 per mile per annum, and all necessary repairs and renewals. In force from July 1, 1876, ten years.
Lease dated January 1, 1880.
Line of road: West Oakland to Tracy (including S. P. & T. R. R.); Benicia to Suisun; Woodland to Willows.
Miles, 158.66.
Rental: $47,500 per month, and cost of repairs and renewals. In force from January 1, 1880, 5 years. To be terminated upon one month's notice from either party. Canceled June 1, 1884.
Lease dated January 9, 1884.
Line of road: Willows to Tehama.
Miles, 36.49.
Rental: $47,500 per month, and to be kept in good repair. In force from January 1, 1883, two years. To be terminated upon thirty days' notice from either party.
Lease dated May 29, 1884.
Line of road: West Oakland to Tracy (including S. P. &. T. R. R.), Benicia to Suisun, Woodland to Tehama.
Miles, 195.15.

Rental: $53,800 per month, and cost of all repairs and renewals. In force from June 1, 1884, five years.

Lease dated July 1, 1884.

Line of road: Oakland Point to Martinez, Port Costa to Fairfield, Woodland to Tehama.

Miles, 153.63.

Also second track from Oakland Point to Port Costa, if same should be built.

Rental: $40,000 per month, and additional amount for second track, if built; keep road in good repair, pay all legal expenses, and damages on account of operations; guarantee payment of principal and interest of $3,964,000 bonds; also additional bonds and interest on second track, if built, not to exceed $25,000 per mile. Rent may be paid in coupons of Northern Railway. In force from July 1, 1884, to January 1, 1907. Terms may be changed at expiration of each five years.

Agreement dated October 21, 1886, between the Central Pacific Railroad Company Southern Pacific Company, California Railroad Company, Amador Branch Railroad Company, Berkeley Branch Railroad Company, San Pablo and Tulare Railroad Company, Northern Railway; leases heretofore made of the five last-named lines with the Central Pacific Railroad Company canceled, to take effect November 1, 1886; and obligations assumed by Southern Pacific Company, which company leases said lines from said date.

Commissioner ANDERSON. In connection with this Exhibit 3, I think it would be well to spread upon the minutes the present existing lease from the Central Pacific to the Southern Pacific in full.

The paper was marked "Exhibit No. 4, August 16, 1887," and is as follows:

AGREEMENT BETWEEN THE SOUTHERN PACIFIC COMPANY (OF KENTUCKY) AND THE CENTRAL PACIFIC RAILROAD COMPANY, DATED FEBRUARY 17, 1885.

This agreement, made and entered into this 17th day of February, 1885, between the Southern Pacific Company, a corporation duly organized and existing under the laws of the State of Kentucky, and now doing business in the State of California, and the Central Pacific Railroad Company, a corporation duly formed and existing under the laws of the State of California and the United States, witnesseth: That whereas part of the through business heretofore done by the Central Pacific Railroad Company's line from Ogden to the waters of the Pacific has been diverted by the Northern Pacific, Atlantic and Pacific, and Atchison, Topeka and Santa Fé Railroads; and whereas the Union Pacific Railroad Company has secured the control of the road known as the Oregon Short Line, and thereby secured an outlet to the Pacific other than over the Central Pacific Railroad, and thus in that respect placed itself in opposition to the interests of the Central Pacific; and whereas it now appears that the through business hitherto done by the Central Pacific Railroad will thereby be further diverted, and that it is not only to the best interest of but absolutely necessary that the Central Pacific Railroad Company, in order to maintain itself against these diversions, should be operated in connection with a friendly through line to the waters of the Atlantic: and whereas the said Southern Pacific Company has a line of railroad under its control for a period of ninety-nine years, extending continuously from the Pacific Ocean to the Atlantic Ocean; and whereas the lines of each company are doing a large local traffic, and it is important to both that the same should be conducted in harmony; and whereas the said Southern Pacific Company is willing to enter into an agreement with the Central Pacific Railroad Company, whereby its line and the line of the said Southern Pacific Company shall be operated so as to secure their just rights to each without the one gaining any benefit or advantage at the expense of the other, and whereby the Central Pacific Railroad Company may for a long term of years be assured of protection against the diversion of its traffic, and be relieved of the disadvantages flowing from lack of harmonious connections; and whereas, by reason of the facts before recited, it is mutually advantageous to the Southern Pacific Company and the Central Pacific Railroad Company to make such agreement; and whereas, both companies contract in the knowledge that the future development of the country may change materially the relations of the companies to each other in respect to railroad traffic, and may in the future render any agreement now made, however fair in its terms in view of existing conditions, advantageous to one at the expense of the other and thereby defeat the purposes which said companies desire and intend to accomplish by making this agreement; and whereas it is intended that such shall never be the effect of this agreement, therefore all the promises and covenants herein shall be construed in the light of the conditions now existing, and the arbitrators herein-

after named, in adjusting the terms and provisions of this agreement to a changed state of affairs, if such change should ever take place, must keep in view the main purpose of the parties to this agreement, to wit, that it is for the mutual advantage of both parties, and that neither is to be benefited at the expense of the other:

Now, therefore, to accomplish the purpose aforesaid, in consideration of the premises and of the mutual promises herein, the said Central Pacific Railroad Company hereby leases to the said Southern Pacific Company for the term of ninety-nine years, from the 1st day of April, A. D. 1885, the whole of its railroad situated in the Territory of Utah and States of Nevada and California, and known and designated as the Central Pacific Railroad, together with all the branches thereof, together with all the rolling stock, telegraph lines, steamboats, wharves, piers, depots, workshops, and all other property, real and personal, now owned, held, and possessed by the said Central Pacific Railroad Company and used upon or in connection with said railroad and telegraph, together with all the appurtenances thereunto belonging, with the right to possess, maintain, use, and operate, and enjoy the said property, and to receive the rents, issues, and profits thereof.

And the said Central Pacific Railroad Company hereby assigns to the said Southern Pacific Company all the leases which it now holds of railroads and other property situated in said State of California, and lying and being north of the town of Goshen, in the county of Tulare, with the right to take, hold, operate, maintain, and enjoy said railroads and other property in the same manner as the said Central Pacific Railroad Company holds, operates, enjoys and maintains the same under the said leases, and with the right to receive the rents, issues, and profits thereof.

And the said Central Pacific Railroad Company hereby releases the Southern Pacific Railroad Company, a corporation formed and existing under the laws of the United States and of the State of California, and the Southern Pacific Railroad Company, a corporation formed and existing under the laws of the Territory of Arizona, and the Southern Pacific Railroad Company, a corporation formed and existing under the laws of the Territory of New Mexico, and each of them, from all and every obligation under or by virtue of any and every lease made by said three last mentioned railroad companies, or either of them, to the said Central Pacific Railroad Company, and transfers and surrenders unto the said Southern Pacific Company the possession of all the property in said leases or any of them mentioned or described, with the right to receive the rents, issues, and profits thereof free from all claim of the said Central Pacific Railroad Company to the same or any part thereof.

The said Southern Pacific Company agrees to and with the said Central Pacific Railroad Company that it will keep and maintain the property hereby leased in good order, condition, and repair; operate, maintain, add to, and better the same at its own expense; pay all taxes legally assessed against or levied thereon, and will at the termination of this lease return the same to the said Central Pacific Railroad Company or to its successors or assigns (with additions and betterments) in as good condition and repair as the same was at the date hereof.

And the said Southern Pacific Company hereby agrees to and with the said Central Pacific Railroad Company that it hereby assumes and will discharge all the liabilities and obligations of every kind (including its obligations on leases now held by it) of the said railroad company, except the obligation to pay the principal of said railroad company's indebtedness known as its "floating debt," and except the obligation to pay the principal of the indebtedness of said railroad company known as its "bonded indebtedness" now outstanding and secured by mortgage or deed of trust, or which may be hereafter incurred under the provisions of any existing mortgage or deed of trust, or of any mortgage or deed of trust hereafter made with the consent of the Southern Pacific Company, and except the principal of all indebtedness the payment of which has heretofore been guaranteed by the Central Pacific Railroad Company, and except the principal of the indebtedness of the said Central Pacific Railroad Company evidenced by bonds of the United States, heretofore by the Government thereof loaned to the said Central Pacific Railroad Company. That as to such excepted indebtedness the said Southern Pacific Company will pay off and discharge at maturity the interest upon the same, except the interest upon the bonds of the United States, loaned as aforesaid, and that as to such bonds and the interest thereon, the said Southern Pacific Company will discharge the annual obligations imposed upon said Central Pacific Railroad Company by existing acts of Congress, and will, during the continuance of this agreement, fully comply with the terms of, perform all the duties prescribed in, and discharge all the obligations imposed upon said Central Pacific Railroad Company by the act of Congress commonly known as the "Thurman Act." And the said Southern Pacific Company hereby agrees to and with the said Central Pacific Railroad Company that it will well and truly perform all the duties and obligations of said railroad company to the United States and the Government thereof, under existing acts of Congress relating to the maintenance and operation of its railroad and to transportation for said Government over the same, as fully and faithfully as said railroad company is bound to do, except as otherwise hereinbefore provided.

And the said Southern Pacific Company agrees to and with the said Central Pacific Railroad Company that it will keep true and faithful accounts of all the earnings of the said Central Pacific Railroad, including the earnings of the railroads now held by said Central Pacific Railroad Company under leases and situated north of Goshen, together with true and faithful accounts of all expenditures, payments, and disbursements of every kind made by the said Southern Pacific Company in operating, maintaining, adding to, and bettering the same, and of all expenditures, payments, and disbursements made by the said Southern Pacific Company for taxes, rentals, interests, or in discharge of obligations incurred by said Southern Pacific Company under the provisions of this agreement hereinbefore contained, provided, however, that any payments made by the said Southern Pacific Company to either of the said Southern Pacific Railroads hereinbefore mentioned for rentals under the terms of existing leases in favor of the said Central Pacific Railroad Company and now assigned to the Southern Pacific Company shall never be included in and made part of any charge against the said Central Pacific Railroad Company or the earnings of its said railroad.

And the said Southern Pacific Company hereby agrees with the said Central Pacific Railroad Company that during the continuance of this lease it will annually, on the first Monday in May, pay to the said Central Pacific Railroad Company, as guaranteed rental for said Central Pacific Railroad and other leased property for the year ending on the 31st day of December next preceding that date, the sum of one million two hundred thousand dollars ($1,200,000).

And the said Southern Pacific Company hereby further in this behalf agrees with the said Central Pacific Railroad Company that if the earnings of the said Central Pacific Rrilroad and of the railroads situated north of Goshen, now held by the said Central Pacific Railroad Company under leases, shall in any year, during the continuance of this agreement, exceed all expenditures, payments, and disbursements of every kind made by the said Southern Pacific Company for such year in operating, maintaining, adding to, and bettering the same, and of all expenditures, payments, and disbursements made by the said Southern Pacific Company for taxes, rentals, interests, and in discharge of any of the obligations by said Southern Pacific Company incurred under this agreement as heretofore provided, including the said sum of one million two hundred thousand dollars, then such excess for any such year, not exceeding the sum of two million four hundred thousand dollars, shall, on the first Monday in May, as aforesaid, be paid to the said Central Pacific Railroad Company as additional rental for such year.

And it is further agreed between said Southern Pacific Company and the said Central Pacific Railroad Company that if at any time it appears that by the operation of this agreement either party is being benefited at the expense of the other, then this agreement shall be revised and changed so that such will not be the operation thereof; and if the parties hereto cannot agree upon the changes necessary to that end, then each party shall appoint one arbitrator, disinterested but skilled in relation to the subject-matter, and the award and decision of such arbitrators in writing shall be binding upon the parties hereto, and this agreement shall be revised and changed in accordance with such award and decision, and, as revised and changed, shall be duly executed in writing by the parties hereto.

And it is further agreed that if the arbitrators so chosen cannot agree upon an award and decision then, that the two shall choose a third impartial and skilled arbitrator, and that the award or decision of two of said three arbitrators shall have the same force and effect between the parties hereto, and shall be executed in like manner as hereinbefore provided for the award and decision of the two arbitrators first chosen.

And it is further agreed between the said Southern Pacific Company and the said Central Pacific Railroad Company that if any legislation or governmental action hereafter be had which in the opinion of the said Southern Pacific Company is in hostility to the said Central Pacific Railroad Company, its rights, or the property hereby leased, the said Southern Pacific Company may, on notice to the said Central Pacific Railroad Company, terminate this agreement or may submit to arbitrators in the manner and with the effect hereinbefore provided, for changes and revisions.

And it is further agreed between the Southern Pacific Company and the Central Pacific Railroad Company that upon the execution of this agreement the said Southern Pacific Company may enter upon, take possession of, and hold during the continuance of this agreement, all the property, real and personal, hereby leased by the said Central Pacific Railroad Company to the said Southern Pacific Company, and that duplicate lists of all the rolling stock and other personal and movable property so leased, showing its condition at the time of the execution of this agreement, shall be made and certified by the secretary of each of said companies, and that one of said lists shall be kept by each of said companies.

And it is further agreed between the Southern Pacific Company and the Central Pacific Railroad Company that if at any time any of the rolling stock or other personal property hereby leased to the said Southern Pacific Company by said Central Pacific

Railroad Company be used upon any roads other than the Central Pacific Railroad or the leased roads north of Goshen, then the said Southern Pacific Company shall credit to said Central Pacific Railroad Company the usual and customary sums paid by one railroad company to another for the use of the like property, and that the amounts so credited shall be deemed and taken to be a part of the earnings of said Central Pacific Railroad Company.

And it is further agreed that if in the operation of the Central Pacific Railroad and leased roads north of Goshen it becomes necessary to use any of the rolling stock or other personal property of the Southern Pacific Company, not leased from the Central Pacific Railroad Company, upon the said Central Pacific Railroad or leased roads north of Goshen, that the usual and customary sums paid by one railroad company to another for the use of like property shall be allowed as and constitute a charge against the receipts of the said Central Pacific Railroad and said leased lines and be so considered in the accounting hereinbefore provided for.

In testimony whereof the said Southern Pacific Company and the said Central Pacific Railroad Company have caused these presents to be signed by their respective presidents and countersigned by their secretaries and their corporate seals to be hereunto affixed pursuant to orders of their respective boards of directors the day and year first herein written.

In duplicate.

STATEMENT SHOWING RESULT OF OPERATION OF LEASED LINES AS AFFECTING EARNINGS OF CENTRAL PACIFIC.

The WITNESS. I now submit to you a statement and tables showing the result of the operation of leased lines as affecting the earnings of the Central Pacific.

The paper was marked "Exhibit No. 5, August 16, 1887," and is as follows:

Central Pacific Railroad Company.—A statement regarding leased lines.

It has been frequently charged in an indefinite way by the enemies of this company, that its leased lines have been a load which it was compelled to bear to the benefit of some of its stockholders who were interested in each of the companies, and to the injury of those who were interested only in the Central Pacific. From certain questions which have been asked by this Commission, they also appear to have the impression that these leases have been a charge to the Central Pacific; that the rental paid has been more than the receipts from their operation, and that the Central Pacific has been thus unjustly charged with the deficit.

If these charges were true, such a condition of affairs could only be defended on the ground that the leased lines were feeders to the Central system, and as the latter received the benefit of their connection by the traffic which they furnish, it ought properly to stand any loss in their operations. But the statement is not true; the Central Pacific has received a direct profit from these leased lines in excess of the rental paid during the past seven years (as long as their accounts have been segregated) of $10,373,000. This covers the period from 1880 to the termination of the leases in 1885 and 1886. Prior to 1880 the accounts were not kept so as to show accurately the results for each road by itself. These leased lines then were less in extent; but, as far as they extended, the result was doubtless to that extent as favorable to the Central Pacific as is known to have been the case since 1880.

If it would have been a wrong for the Central Pacific to pay these lines as rental a greater amount than it received as earnings, the reverse is equally true, that the leased lines were wronged by the Central Pacific keeping from the net earnings of the roads an excess over the sum it paid them as rental. The leased lines have received less from the Central Pacific as rental than was their just due. This was, however, according to the terms of the leases, and is not complained of by the lessors. Though the leases to the Central Pacific provided that their terms as to rental should be subject to readjustment from time to time with a view to equalizing the income and the

rental, yet, as a matter of fact, the development of the country and the consequent increase of traffic of the roads has led to an increase of income which has always kept in advance of the rental. The Central Pacific has in this way received a larger profit from the leases than it would had the terms of the leases been the net earnings of the lines.

All of the roads which had been leased by the Central Pacific were, when leased, feeders to the main lines. This was exclusively the case with the Southern Pacific until its completion as a transcontinental line, and even now all traffic over this line to San Francisco or other points in Central or Upper California passes over 158 miles or more of the Central Pacific Railroad. Had not the S. P. R. R. been built as a connection with the Central Pacific at Goshen, the whole of the traffic between Southern California, Arizona, and New Mexico, with San Francisco, would have been carried by sea; or the S. P. R. R. line would have been completed between San Francisco and Southern California. In either case the Central Pacific would have lost the traffic for all these past years. This traffic has been and continues to be to the Central Pacific a considerable source of profit, and it has, in addition, received during the period from 1880 until the termination of this lease in 1885 over three millions of dollars from the earnings of the Southern Pacific roads in excess of the amount it has paid for rental.

The deficits which appear from these leases are in the Amador Branch, the Los Angeles and Independence, and the Los Angeles and San Diego railroads. These are all short feeding lines. The total deficit from them has been $279,483.72; while the total surplus from the remaining leased lines has been $10,652,730.91. The earnings of these short branches have been made up by pro-rating the joint traffic on a plain pro-rata mileage basis for the greater portion of the periods shown, whereas the division of such traffic should have been on the basis of local rates. This would have been the case had the roads been operated independently. By giving the short lines their local rates on the division of joint traffic the result would probably show a surplus for these three lines instead of a deficit. As the Central Pacific Railroad Company received all the earnings of the roads however they were divided, the manner of segregating the earnings made no difference; it was simply for the purpose of an exhibit.

After the completion of the Southern Pacific as a transcontinental line, it became continually more apparent that to operate economically the lines acquired by the same interest in Texas and Louisiana, and steamships from New Orleans to New York and other ports, as well as the lines in California, Arizona, and New Mexico, they must be brought under one management. These roads which were not owned by the Central Pacific comprise now 24 companies, operating 3,706 miles of railroad, besides the steamship lines. The Central Pacific lines, including the recently finished branch to the Oregon boundary, comprises 1,359 miles of road. To harmonize all interests, to maintain fair and reasonable rates, to consolidate the administration, and so avoid unnecessary expenses, it was thought best for the interests of all concerned to bring the lines under a common control. The 3,706 miles were owned by practically the same persons who compose the Southern Pacific Company. These lines are being constantly extended in many places, so that the roads operated by the company are rapidly increasing. It seemed for this reason, if for no other, proper that the Southern Pacific Company, controlling three-quarters of the road, should operate the whole, rather than it should all be operated by the Central Pacific, owning but one-quarter.

But another important reason why the Southern Pacific Company should be the operating company was that the lines operated by the Central Pacific have all been harassed by the refusal on the part of certain Government officials to consider them as being independent of the incumbrances on the original aided line.

The Treasury Department has refused payment for United States transportation on these non-aided roads, now amounting to over $1,800,000, though the Supreme Court has held in every case that such payments were due the roads in cash. Had the Central Pacific taken leases of the newly acquired roads, or leased new roads as constructed in California by other companies, the same injustice as to United States transportation of mails, troops, and supplies would by the officers of the Treasury have been extended over such additional lines. The action of certain branches of the Government towards the Central Pacific has in effect fixed a penalty for operating feeding roads or opposition lines, which, to protect its income, should be controlled by the same company.

By the lease to the Southern Pacific Company the advantages to the Central Pacific are secured of a common control, and the consequent protection to its income by maintaining fair and reasonable rates. All expenses and requirements are assumed by the Southern Pacific Company, besides a guaranteed rental. If the earnings are in excess of the guaranty the excess is also paid to the Central Pacific. By the consolidation of management the expenses of administration are reduced to minimum and are but a fraction of their former amount. The operating company has paid for and keeps up the supplies, fuel, and materials on hand necessary for operation, which prior to the lease was carried by the Central Pacific at an outlay of $4,354,000. The

lease affords the Central Pacific every advantage it possibly could have if it were the operating company, and whatever risks there may be in meeting the annual payments and guaranteed rental are assumed by the Southern Pacific Company.

The following tables exhibit the operations of the leases held by the Central Pacific, showing a net profit to the Central Pacific from such lines of $10,373,247.19.

Statement showing profit to Central Pacific Railroad Company from leased lines, 1880 to 1886.

Leased line.	Net loss.	Net profit.
Amador Branch Railroad	$147,203.31	
California Pacific Railroad		$1,065,773.25
Western Railway		4,175,779.89
San Pablo and Tulare Railroad		2,312,971.99
Los Angeles and Independence Railroad	53,237.28	
Los Angeles and San Diego Railroad	49,043.13	
Junction and Copperopolis Railroad	None.	None.
Sacramento and Placerville Railroad		72,333.55
Southern Pacific Railroads		3,025,872.83
Balance of net profit to Central Pacific Railroad Company	10,373,247.19	
	10,652,730.91	10,652,730.91

The earnings of the Berkeley Branch Railroad (3.84 miles) have not been kept separately.

STATEMENT RELATIVE TO UNITED STATES TRANSPORTATION ACCOUNTS.

The WITNESS. The next statement which I furnish is a statement regarding the United States transportation accounts.

Q. Is this as to the existing transportation accounts between the United States and the company?—A. Yes, sir.

By Commissioner LITTLER:

Q. Are there any discrepancies noted there between your account and the Government's account?—A. I do not know. It would be impossible to analyze the Government's accounts and make a statement of any description.

The paper was marked "Exhibit No. 6, August 16, 1887," and is as follows:

Central Pacific Railroad Company. Statement regarding United States transportation accounts.

The charges to the United States for transportation of mails, troops, supplies, &c., performed by the Central Pacific Railroad Company and lines when were leased to

said company, also for cash paid under the requirements of law, from the beginning to December 31, 1886, are as follows:

Non-aided and leased lines, less payments thereon made by the Government	$3,896,212.44
Aided line, less payments made thereon & charges prior to 1873	6,280,436.32
Cash paid by company	1,282,264.61
Total charges to United States	11,458,908.11
The total requirements to the same date under the several acts of Congress, amount to	9,605,584.96
Leaving a balance due the company of	1,853,323.15

The balance is wholly for transportation services on non-aided and leased lines, and is above all requirements from the company under any law It is, according to the decision of the Supreme Court, due the company in cash (United States *vs.* Central Pacific, 118 U. S. Rep., 235.) The language of the court in this case is, that the withholding of compensation earned on non-aided lines is "not only a breach of faith on the part of the United States, but an invasion of the constitutional rights of the company." The amount still remains due and unpaid, notwithstanding the decision of the Supreme Court. And the amounts earned on non-aided lines now leased by the Southern Pacific Company are retained by the Treasury Department on such lines as were formerly leased by the Central Pacific Railroad Company.

This sum of $1,853,323.15 has accumulated since 1882, there having been a balance due the company every year since that time, as is shown in detail by the reply to your interrogatory number 55, in your circular letter dated May 12, 1887. Prior to 1882, there was a balance on each year's settlement due from the company to the Government. These balances were in every case promptly paid by the company in cash, as is shown by the several annual reports of the United States Commissioner. Since the balance of transportation has been more than the annual requirements under the law, the amounts have been retained by the Government.

The foregoing amounts are in accordance with the settlements made by the United States Commissioner of Railroads, and appear in the published reports of that officer. Up to April 1, 1885, the charges for transportation appear on the books of the Central Pacific Railroad Company, and subsequent to that date on the books of the Southern Pacific Company.

The amounts by years appear in the detailed statement submitted herewith. Of this amount of $11,458,908.11, there is due the sinking fund of the company in the United States Treasury, $3,122,231.10. (See report U. S. Com., 1886, p. 35, for amount to Dec. 31, '85; amount for 1886 is $172,347.23.)

Of the balance there is due to the company in cash, $1,853,323.15. Leaving an application toward the payment of bonds and interest, $6,483,353.86.

To the above amount in the sinking fund in the United States Treasury, there should properly be added the loss to the company by the Government's management of such fund, for premium paid in excess of interest received, $572,463.18, for a loss in interest on amounts paid in fund by company, $1,040,503.54; total, $1,612,966.72.

The amounts to the credit of the company to the same date, as stated by the United States Treasury Department, are as follows:

On account of bonds and interest:	
Transportation charges withheld	$5,402,730.73
Cash paid by company	658,283.26
Total to credit of bonds and interest	6,061,013.99
On account of sinking fund:	
Transportation charges withheld	2,452,401.49
Cash paid by company	633,992.48
	3,086,393.97
Total	9,147,407.96

The amount as above charged by the company of $11,458,908.11, is more by $2,311,500.15 than is credited by the Government. This chiefly arises from the fact that the Treasury Department has suspended action on accounts for transportation on non-aided and leased lines. The amounts of these accounts are not in dispute, and according to the decision of the Supreme Court above cited they are payable to the roads in cash. Commenting on this action of the Treasury Department, the Commissioner of Railroads, in his report for 1885, page 7, says:

"The court decided that the Government can retain the compensation on 'aided roads' only. A contrary decision is published by the Secretary of the Treasury in a circular dated September 11, 1885."

In 1884 the charges for transportation on non-aided and leased lines amounted to $661,396.51. During this year the Treasury Department acted on bills to the amount of $446.95.

In 1885 the charges on non-aided and leased lines were $514,242.16. The bills acted on by the Treasury Department amount to $118.11.

In 1886 the charges on non-aided and leased lines were $504,343.41. The bills acted on by the Treasury Department amounted to $37,887.51. The amounts acted on in the year are for joint traffic over non-aided and aided lines, and in the division the Department has changed the route from that over which the traffic passed, to a longer route on which the aided mileage would be greater. This relates to traffic between Sacramento and San Francisco. The short route of 90 miles performed the service.

The Treasury Department has credited the amounts to the long route of 140 miles, because in this route there is more aided road. If the above bills were correctly credited by the Department, the amount due the non-aided lines would be much more than the sum of $37,887.51, as stated.

The amount of transportation charges on non-aided and leased lines which has been credited by the Treasury Department, to December 31, 1886, is $2,023,319.40. If this had been properly distributed as to aided and non-aided lines, as is not the case, there would remain an important error in its application. One-half the charges on the aided line is withheld under the contract acts as a payment on the bonds and interest, the other half is retained under the Thurman act, to be applied to the sinking fund, and there be invested at interest for the benefit of the company. The transportation on non-aided and leased lines is payable to the company in cash, or if payment is withheld, is it in lieu of cash to pay the annual requirements under the law. The whole amount of charges on such non-aided transportation are thus, if withheld, a credit to the sinking fund. But the Treasury Department has applied all such credits the same as it has aided line transportation, *i. e.*, one-half to bonds and interest and one-half to sinking fund. Over $1,000,000 is thus applied to this time as a flat payment on the debt, which should have been invested for the benefit of the company. Any final settlement of the accounts with the Government will require readjustment of all these accounts which have been acted upon by the Treasury Department.

Central Pacific Railroad Company in account with United States Government. Settlements made by United States Commissioner of Railroads for requirements account of transportation charges, 5 per cent. of net earnings and sinking fund account.

		Total requirements.

STATEMENT OF GROSS FREIGHT AND PASSENGER RECEIPTS, AND AMOUNTS POOLED AND NOT POOLED.

The WITNESS. I next submit a statement showing the gross freight and passenger receipts and the amount of the same pooled and not pooled.

Q. Does this statement show that the amount in the pools is represented by a much smaller amount than the amount not pooled?—A. Yes, sir.

Q. I understood you or one of the witnesses to state that the larger portion of the business was pooled business?—A. I heard some witness state that there was a large amount, but it was not I; I know better.

Q. Do I understand this statement to represent the amount of business that is pooled and the amount that is not pooled?—A. Yes, sir.

Mr. COHEN. I do not think you understood Mr. Stubbs' statement.

Q. Will you please explain it?—A. As I understand this, the first column shows the total amount of business of freight and passenger receipts for the years 1877 to 1885. The next column shows the amount of that business which was in any pooling arrangement. The third column, of course, shows the difference between the two, and shows the amount of business of the company which was not pooled.

Q. The ordinary business?—A. Yes, sir; the ordinary business not pooled.

Q. Your heading then is the correct amount in pools, but not the amount of business growing out of pools?—A. No, sir; that was the total amount of business contributed to the pools by our road; not the amount paid but the amount of business in the pool.

By Commissioner ANDERSON:

Q. Is it the amount of interest which your company had in the pool?—A. No, sir; I mean the total amount of business that was contributed to the pool.

AN ILLUSTRATION.

By the CHAIRMAN:

Q. Does that represent a pool balance?—A. No, sir. It represents the total amount of business. I think I can make it clear by taking one year. The total business for passengers and freights for one year was, say, $25,000,000, in round numbers. Out of that there were $2,000,000 that were subject to pools, and whether that business brought an income to the company or whether they had to pay something out on the pools cuts no figure in this statement. That is the amount of business out of the $25,000,000 that went into the pools.

Q. Representing your pool transactions on all your business for a year?—A. Yes, sir; representing a balance of $23,000,000, that was ordinary business.

Q. And not in any manner pooled?—A. Yes, sir.

The CHAIRMAN. The heading of this column "Amount in pools," might lead one to suppose that it is a balance in pools.

The WITNESS. It does not mean that. It means the gross passenger and freight receipts. This amount of that business was under some pooling arrangement, but it was the gross business.

The CHAIRMAN. Change that heading, because there it looks as though it were a balance.

The WITNESS. I will change the heading to "Amount of same in pooling arrangements."

Q. Does that pool column include, for instance, the proportion of the Pacific mail subsidy paid by the Central Pacific?—A. No; it has nothing to do with that.

Q. Your answer is that this statement has nothing to do with that?—A. No, sir; it does not purport to make any showing of that.

Q. Was not that included in the business done during the year?—A. If it included that it would cover the entire business, probably; this is not receipts out of the pool or payments out of the pool.

The CHAIRMAN. But, Mr. Miller, do you not offer this as representing the proportion of business, freight and passenger that was pooled, and the proportion of the business of the road not pooled?—A. Yes, sir.

Q. And it covers all in the proportions that you have given, does it not?—A. Yes, sir; but if you consider the Pacific Mail Steamship subsidy, then it would take the total receipts, probably. If you consider that all the business that was affected by paying the steamship company as being under pools, then it would take the gross receipts, because it affected nearly all of the business.

THE STATEMENT MADE UP IN THE FREIGHT OFFICE.

By Commissioner ANDERSON:

Q. Is not your whole transcontinental business done under pooling arrangements with the eastern roads and the other roads that do transcontinental business?—A. Not that I know.

Mr. COHEN. To a certain extent perhaps it is. But this statement was made up in the freight office.

The WITNESS. The statement was made up in the general freight office, and I do not understand the details of the pooling business at all.

Commissioner ANDERSON. It does not include your general pooling business, evidently.

The WITNESS. That may be.

By Commissioner LITTLER:

Q. Do you know whether you received more money than you paid out on these pool balances?—A. That is a different question. I do not know that. I think we have received more than we have paid out; but that is a mere guess.

By Commissioner ANDERSON:

Q. Who made this account?—A. That was made up in the general freight office.

Q. Who is responsible for it?—A. Mr. Gray.

Q. Do I understand that you do not know whether this pool column includes your through business or the Pacific Mail business, or any other of the large interests that were included under arrangements with other roads, and which we understand as having been done under pooling contracts?—A. This statement was made up in the general freight office of the company. I submitted to that office the questions as asked, and then they explained it to me, and, as I understand it, that covers all the amounts pooled and unpooled.

THE STATEMENT WITHDRAWN.

Commissioner ANDERSON. It clearly does not include your through traffic.

The WITNESS. There has been no through traffic that has been pooled.

Mr. HAYMOND. For the year 1885 it included the entire gross receipts and contributions to pools, and the entire amount not pooled; but you would not call our divisions with the Union Pacific a pool, would you?

Mr. COHEN. We will withdraw this paper, and see if we cannot get some more definite information.

Commissioner ANDERSON. The company withdraws the statement so as to get further information on the subject from the officer who prepared it.

Mr. COHEN. We will call Mr. Gray here, and see what he has to say about it.

Q. What else have you?—A. I have a statement showing the amounts of the capital stock issued, and exhibiting the disposition of the same.

The paper was marked "Exhibit No. 7, August 16, 1887," and is as follows:

Central Pacific Railroad Company, statement of amounts of capital stock issued, showing disposition of same.

Issued under subscription, on account of salaries and services, &c	$1,999,703.32	
Issued on contracts, Sacramento to Promontory Point	38,473,696.68	
		$40,473,[illegible]
Issued under consolidation:		
To Western Pacific R. R. Co	7,900,000.00	
California and Oregon R. R. Co	1,829,8[illegible].00	
San Joaquin Valley R. R. Co	30,500.00	
S. F., O. and A	760,300.00	
		10,520,[illegible]
Issued to Contract and Finance Co:		
Account construction, C. & O. R. R	1,281,500.00	
Account construction, S. J. V. R. R	2,000,000.00	
		3,281,500.00
Sold in New York		5,000,000.00
Issued to Pacific Improvement Co:		
Account construction, C. & O. division		8,000,000.00
Held in trust for company by C. A. Huntington, agent		724,500.00
		68,000,000.00

Commissioner ANDERSON. In reference to this paper, can you not furnish the dates, or the approximate dates, at which the issues of stock took place?—A. You have a detailed statement of all that, which was filed in one of the statements furnished by Governor Stanford. This is simply an accounting for the $68,000,000 in a condensed form.

CONSOLIDATED STOCK ISSUED TO BRANCH LINES, STOCKHOLDERS.

Q. Do you know to whom the stock was issued for the branch roads that were taken in under the consolidation of 1870?—A. That was issued to the holders of the stock of those branch roads.

Q. Do you know, as a matter of fact, whether it was issued to the holders directly or to the Contract and Finance Company?—A. It was issued to each holder when he surrendered his certificates in the old and took certificates in the new company, from time to time. It was not issued at one time by any means.

Q. As a matter of fact did they not transfer the stock so received by them to the Contract and Finance Company?—A. No.

Q. Can you give us no information about that?—A. No more than you have got in your statement. It gives the detail of every issue of stock.

CONTRACT AND FINANCE COMPANY A LARGE HOLDER OF BRANCH LINES' STOCK.

Q. It does not show how the stock got into that company. Governor Stanford's evidence is that the Contract and Finance Company divided about thirteen millions of stock.—A. They were large holders of the stock of the Western Pacific, and of the California and Oregon.

Q. Do you say that the Contract and Finance Company were large holders of the stock of the Western Pacific Railroad, and of the California and Oregon?—A. Yes, sir; at the time of the consolidation.

Q. And of the San Joaquin?—A. Yes, sir; also of the San Joaquin.

Q. And of the San Francisco, Oakland and Alameda?—A. As to the last one I do not know whether they held any stock or not.

By Commissioner LITTLER:

Q. What is your reply to the next call?—A. My next statement is in response to a call made on Colonel Crocker for a statement of securities in the sinking funds of the Central Pacific Railroad Company.

STATEMENT OF CENTRAL PACIFIC SINKING-FUNDS' SECURITIES.

By Commissioner ANDERSON:

Q. The paper which you now present to us represents the present condition of the sinking funds, does it?—A. Yes, sir.

Q. Does it show the proportion applicable to each mortgage?—A. No, sir; that is kept pro rata only.

Q. We desire to know how much of these securities appertain to the different mortgages; can you tell us?—A. They show very clearly, as nearly as possible, by the annual reports. Our last annual statement or report shows that.

Commissioner ANDERSON. You have not furnished us with a copy of the report of 1886 yet.

The WITNESS. It has not been got out, because Governor Stanford has not had the time to revise the proof of his report.

Q. How has the difference between the total as stated here and the total as stated in your report of 1886 occurred?—A. There was probably some accrued interest collected on these bonds.

Q. And were there additional payments?—A. There would hardly be any additional payments. It ought to include the payments of December 31.

BONDS OF SOUTHERN PACIFIC OF NEW MEXICO.

Q. In your judgment are the bonds of the Southern Pacific of New Mexico as valuable as the bonds of the Southern Pacific of California?—A. In the market they are not, probably; but I think they are just as well secured, and are as good an investment.

Q. Has the Southern Pacific of New Mexico earned sufficient to meet its fixed charges without calling on any other portion of the system for aid?—A. I believe it does; at any rate it is leased now to the Southern Pacific Company, which has to pay the interest on the bonds.

Q. Do you mean the Southern Pacific of Kentucky?—A. Yes, sir.

Q. But of what value is that guarantee?—A. It is perfectly good, I think.

Q. Is not the title, or the interest of the Southern Pacific of Kentucky in all this property, subject as to each division to the mortgages on that division?—A. I presume so, because it owns the stock of all these companies. It practically owns the whole of it.

Commissioner ANDERSON. Suppose the New Mexico Division should fail to earn its fixed charges and the other divisions should decline to contribute.

The WITNESS. The other divisions would have nothing to say about it. The Southern Pacific of Kentucky would have to pay.

Commissioner ANDERSON. The bondholders of the other divisions, I mean.

The WITNESS. They would have nothing to say about it.

CANNOT DEFAULT.

Q. If there should be default in the interest of any one of these divisions, would not the bondholders of such a division have a right to foreclose and take it out of the system?—A. But they cannot default as long as the Southern Pacific of Kentucky makes earnings enough to pay the interest on all those bonds. There cannot be default, for they pay the interest on those which earn no money as well as those that earn large amounts of money.

BONDS OF SOUTHERN PACIFIC OF KENTUCKY.

Q. Take the whole system of the divisions as represented in the Southern Pacific of Kentucky; do they show more than the gross aggregate of the fixed charges?—A. Something more; yes, sir.

Q. Do you know the total amount of bonds issued on the New Mexico division?—A. No, sir; I cannot tell now.

Q. When were these bonds acquired for the sinking fund?—A. At different times. I cannot give you the dates. I supposed you were going to take that and come down and see the bonds themselves and investigate it. I have a statement in the secretary's office showing all that.

Q. Are these bonds quoted in the market, either in New York or here?—A. Part of them are quoted in New York. I do not know whether all of them are or not.

Commissioner ANDERSON. I mean the New Mexico division.

The WITNESS. I do not know. They are worth more than par here now.

BONDS OF GALVESTON, HARRISBURG AND SAN ANTONIO ROAD.

Q. Where is the Galveston, Harrisburg and San Antonio Railroad?—A. It is in Texas.

Q. Is that a part of the Sunset route?—A. Yes, sir.

Q. Are those bonds listed on the market?—A. I do not know that.

Mr. COHEN. Yes, they are listed.

Commissioner ANDERSON. About what is their quotation?

Mr. COHEN. I think over par, but you can tell by looking at the last quotation in the New York Herald.

Q. Will your statements show the period at which all these bonds were acquired?—A. Yes, sir.

Q. Do you desire to state what these bonds would bring at their present value?—A. That is what I was trying to get at.

Mr. HAYMOND. It is an important proposition, as it goes to the question of the redemption of the bonds. If we had a sinking fund large enough to pay them all in full, it would greatly facilitate the labor of the Commission.

The CHAIRMAN. We desire you to state what these securities would bring at their present value.

The WITNESS. They would bring considerably more than par.

The paper was marked "Exhibit No. 8, August 16, 1887," and is as follows:

[Central Pacific Railroad Company, Treasurer's Office, Fourth and Townsend streets.]

SAN FRANCISCO, *August* 15, 1887.

Statement of securities in the sinking funds of the Central Pacific R. R. Co.

35 bonds Central Pacific R. R. Co., first mortgage, 6 per cent. interest, par value	$35,000
1 bond Western Pacific R. R. Co., first mortgage, 6 per cent	1,000
2 bonds San Joaquin Valley R. R. Co., first mortgage, 6 per cent	2,000
80 bonds California and Oregon Division C. P. R. R. Co., first mortgage, 6 per cent	80,000
3,811 bonds "Central Pacific mortgage of 1936," 6 per cent. interest	3,811,000
3,535 bonds Southern Pacific R. R. Co., of New Mexico, first mortgage, 6 per cent	3,535,000
992 bonds San Pablo and Tulare R. R. Co., first mortgage, 6 per cent	992,000
103 bonds Los Angeles and San Diego R. R. Co., first mortgage, 6 per cent.	103,000
1,343 bonds Galveston, Harrisburg and San Antonio Ry., first mortgage, Western Division, 5 per cent	1,343,000
Total	9,902,000

These nine thousand nine hundred and two bonds cost the sinking funds $9,128,917.

THE CALIFORNIA LAW AS TO RAILROAD SINKING FUNDS.

Commissioner ANDERSON. What is the provision of law in regard to sinking funds for railroad mortgages in California?

Mr. HAYMOND. Simply that they shall provide for a sinking fund.

Commissioner ANDERSON. Is there no provision about the amount?

Mr. HAYMOND. No, sir; it is simply that they shall fix a sinking fund, whether they make it one dollar or a thousand.

Q. What provision is there in the mortgage prior to the Government lien?—A. That is set out in the annual report, requiring a certain amount to be set apart each year. In some instances we set apart $25,000 a year, in some instances $50,000, and in some $100,000, but there is no fixed percentage.

Mr. HAYMOND. Our sinking fund laws do not amount to much.

Commissioner ANDERSON. I know the first amount set apart for these mortgages was stated to be $105,000.

The WITNESS. The Commission will find the figures fully set forth on page 25 of the secretary's report of December 31, 1886. The report is not yet published, but we have proof-sheets of those figures.

The paper was marked "Exhibit No. 9, August 16, 1887," and is as follows:

No. 2.—*Funded debt in detail, December 31, 1886.*

Character of bonds.	Series.	Date of bonds.	Amount of bonds authorized.	Amount of bonds outstanding.	When due.	Rate of interest.	Interest payable.

			92,930,000	61,697,000				

NOTE A.—One hundred and eleven Western Pacific bonds, series "A," are reserved by the company unsold, to take up or exchange for the 111 bonds of issue of December 1, 1865, still outstanding.

E. H. MILLER, Jr., *Secretary.*

By Commissioner LITTLER:

Q. Have you any more answers to calls?—A. No, sir.

BONDS OF SAN FRANCISCO.

By the CHAIRMAN:

Q. Can you inform the Commission whether the bonds of the city and county of San Francisco, at the time of their disposition sold for less than par, and if so, how much under?—A. The amount received in bonds was $400,000, of which 315 were sold at $751.60 each, amounting to $236,754; 85 of them were paid out, at par, for rolling-stock, &c., making $85,000.

COST OF COLLECTING THESE BONDS.

By Mr. COHEN:

Q. Have you any estimate to the cost to the Central Pacific Railroad Company of collecting those bonds from the city and county of San Francisco, in the way of legal expenses, costs of law-suits, &c.?—A. It was a very large cost; not much less than $100,000.

RATE OF INTEREST.

By the CHAIRMAN:

Q. What was the rate of interest on the bonds?—A. Six per cent., I think.

Q. Seven per cent., I think. Will you ascertain that?—A. Yes, sir.

Mr. COHEN. The statute shows that.

Q. Do you know what portion of them has been redeemed?—A. No, sir; I think I saw an advertisement a few days ago in the paper that there were some funds on hand to redeem them.

THE CONTRACTS FURNISHED.

By Commissioner ANDERSON:

Q. Have you furnished all the construction contracts which you have found?—A. Yes, sir.

Q. Have you all the pool contracts?—A. All that I could find; I think there were three.

By the CHAIRMAN:

Q. Did the contracts that you furnished with reference to pools represent all the pools that the company was in?—A. No, sir; I understand not. I think at the time that I furnished those I said there were probably some others not in my possession.

Q. Have you furnished a complete printed copy of the mortgages?—A. You had them here one day; I do not know what disposition was made of them.

STATEMENT RELATING TO LAND ENTRIES.

Q. Does this statement show the land entries paid for by the Central Pacific, and the locations of the lands?—A. Yes, sir.

Mr. HAYMOND. Mr. Mills has given you all that.

Commissioner ANDERSON. Mr. Mills stated that he could not give that.

Mr. NORRIS. Mr. Mills had nothing to do with any land, excepting that which was included within the land grant. These were lands acquired for coal and for other purposes.

UNANSWERED CALLS.

By Commissioner ANDERSON:

Q. I will furnish you a statement of the few calls that are still unsatisfied. Have you the minutes of the boards of directors of any of the leased roads other than those which you have furnished to us?—A. Yes, sir; I have one of the San Joaquin Valley that has got one entry in it, or two. One is the articles of association, and one a set of resolutions of the board of directors. They are in a little book about 6 inches long and 3 inches wide.

Q. Have you the minutes of the San Pablo and Tulare Railroad?—A. No, sir.

Q. Have you the minutes of the Northern Railway?—A. No, sir.

Q. Have you the minutes of the California Pacific?—A. No, sir.

Q. Do you know where either of these books of minutes can be found?—A. I think they can be found in the offices of the secretaries of the respective companies.

Q. Are they not all together—located now in one office?—A. No, sir; I believe not. They are all at Fourth and Townsend streets, however.

Q. Who is the secretary of those respective companies?—A. W. V. Huntington is the secretary of two of them, and probably of all three.

Q. Who has charge of the minutes of the constituent companies that were formed into the San Francisco, Oakland and Alameda Railroad?—A. I do not know.

Q. What are the names of those constituent railroads?—A. They were the San Francisco and Oakland and the San Francisco and Alameda.

Q. Do you know where those books of minutes are?—A. No, sir.

Commissioner ANDERSON. Do you, Mr. Cohen?

Mr. COHEN. I do not. The secretary of the Central Pacific ought to have them.

CONSTRUCTIVE MILEAGE AND RATES TO BRANCH ROADS.

The WITNESS. The secretary of the Central Pacific has not got them.

Q. Was there not a call for constructive mileage and rates allowed to branch roads?—A. Yes, sir; and there was a long statement in relation to constructive mileage filed by Governor Stanford.

Q. My question is, have you prepared a statement of constructive mileage and rates allowed to branch roads?—A. Yes, sir; it was filed with the Commission in reply to a question. It was brought in by Governor Stanford.

Q. Did it form a part of Governor Stanford's answer?—A. Yes, sir. There was 50 per cent. to one branch line and 100 per cent. to another, and it stated the time during which they were allowed it, and then there was a statement of the result.

Q. Mr. Wright was asked to prepare a statement of the actual net earnings of the Central Pacific Railroad Company from 1880 to the date of the lease in 1885 to the Southern Pacific, and also a statement of the net earnings received by way of rentals since the date of such lease to the present time, to enable us to compare the relative advantages of the two methods of operations. Have you prepared such a statement?—A. I attempted to prepare such a statement, but I could not make one quite satisfactory to myself, because I did not comprehend the question.

Commissioner ANDERSON. I would state in explanation that the object of the question was to enable us to determine by an actual comparison of the figures whether the arrangements which existed prior to the lease of 1885 produced, on the whole, after all deductions, a more or a less favorable result than the result which has been attained under the lease of 1885.

Mr. COHEN. You are leaving out a great many considerations as to the amount of business that would be done before and afterwards. That would mislead you in the statement that you ask for.

Commissioner LITTLER. We will be satisfied with the statement if you furnish it.

THE LEASES PROFITABLE TO THE CENTRAL PACIFIC.

The WITNESS. Certainly, the leases held by the Central Pacific were profitable to the Central Pacific, and it made more earnings while it held those leases than it has made since. In this connection I will say that the Government officers in the first place found a great deal of fault with the Central Pacific, first, for leasing the roads, and since it canceled the leases they still find fault with us for canceling them. They would not settle with us for those earnings while they were leased to the Central Pacific, and now they will not when they are not leased.

Commissioner ANDERSON. I want to ascertain the net profits before 1885 and the net profits after 1885.

The WITNESS. The net profits from 1880 to 1885 are shown in our annual reports so far as I can give them to you, and I should simply make a statement from the annual reports.

Commissioner ANDERSON. You were asked to produce a statement showing whether, as to any of the leased lines operated by the Central Pacific prior to April 1, 1885, the rent paid by the Central Pacific exceeded the net earnings derived from the leased lines.

The WITNESS. That was answered by Mr. Wright. It showed that there were instances where the rentals paid were more than the earnings when the earnings were made up on a strict pro rata mile basis.

Mr. COHEN. But the general result was favorable to the Central Pacific.

The WITNESS. Very largely.

CERTAIN STATEMENTS REQUESTED.

By Commissioner ANDERSON:

Q. Copies of all printed blanks were asked for. Have they been furnished?—A. I understand so. They have been put up for a long time and ready to be sent to you.

The CHAIRMAN. I think they are here.

Commissioner ANDERSON. There was a call for a statement for 1884, showing the gross percentage of earnings received from pools and the passenger earnings from ordinary business. Was that included in the paper which you have withdrawn to-day?

The WITNESS. I presume so.

Commissioner ANDERSON. We want the same statement as to freight.

The WITNESS. Do you want it segregated? It would take me a great deal longer to segregate freight and passenger earnings than to give them all in one statement.

The CHAIRMAN. The act of Congress calls for them separately, and I would prefer to have them segregated, to show how much of your

business was freight and how much was passengers. We want to distinguish between the two, and the only way we can do it is to separate your income from freight and your income from passengers. The purpose of Congress in inserting this thirty-ninth section was to get those amounts separately.

Mr. HAYMOND. We will endeavor to answer it.

Commissioner ANDERSON. The next calls have been answered.

METHOD OF COMPUTING GROSS EARNINGS.

Commissioner LITTLER. Mr. Miller, I will ask you a question or two now. From the statement furnished to this Commission by Mr. Wright, your auditor, it appears that the gross receipts, as distinguished from the gross earnings, of 1884 were $28,977,877.14. It also appears from the annual report of the company for 1884 that the gross earnings proper were $22,166,106.26. We find from an examination of your rebate and overcharge books that for that year you paid out $1,060,000. There is, as you perceive, a large discrepancy between the first and second figures. I will ask you to explain this discrepancy, and to state to the Commission what sums of money you deduct from your gross receipts before you ascertain and declare your gross earnings.

The WITNESS. We deduct from them the amounts that we receive, the amounts that are due to other companies for transportation brought to us. For instance, we deduct the receipts for freight coming to San Francisco from New York and other Eastern points. We take all the earnings between San Francisco and Ogden and pay to the other companies the earnings east of Ogden. We do not consider their portion as any part of our net receipts, but they are a part of our gross receipts. In all such cases as that the deduction must be made.

THE DEDUCTIONS MADE TO ASCERTAIN GROSS RECEIPTS.

Q. What other items do you deduct from your gross receipts before ascertaining your gross earnings?—A. Nothing but the rebates, overcharges, &c., that I am aware of.

Q. Do you deduct your pool balances paid?—A. Yes, sir.

Q. Do you deduct all moneys received in due course of business from other railroads—for instance, the pro rata of tickets sold from here to New York? I suppose when you sell a ticket to New York you collect the entire fare here, do you not?—A. Yes, sir.

Q. Do you deduct those sums?—A. Yes, those sums that are due to other companies.

Q. What other sums do you deduct?—A. We deduct no other sums that I can think of now, but we add to our gross receipts, to arrive at gross earnings, the sums due us from other companies selling tickets to San Francisco. For instance, on the tickets they sell they owe us the fare from Ogden to San Francisco.

Q. I ask you what deductions you make in order to bring down this receipt column to balance your gross earnings column?—A. I do not think or know of any other now.

Q. Do you think that the several items mentioned, if eliminated from the gross receipts, would produce the $22,000,000 I have mentioned?—A. Yes, sir; I have no doubt about it.

Q. Would it be much trouble to ascertain and report to the Commission just what items were excluded from the gross receipts in order to determine the gross earnings?—A. It would be quite difficult to do that in detail, but in round numbers I could.

Q. Can you do it in round numbers?—A. Yes, sir; for that particular year.

Q. As I understand it, you can furnish the gross sum paid out under pool contracts and you can furnish the gross sum collected at this end of the line which has to be distributed to the several companies from here to New York. For instance, you can furnish the gross sum collected on the sale of through tickets. Now, what other items would go to make up this difference?—A. There would be very little else.

The CHAIRMAN. Rebates?

The WITNESS. Yes, sir; rebates and overcharges, and to obtain that I have to take off every account with every Eastern road. It is no slight labor.

Q. In other words, have you got to state an account between your company and the other companies with which you did business?—A. Yes, sir.

Q. Do you not exchange balance sheets, month by month, with these several companies?—A. Yes, sir.

Q. Would it be very much of a job to examine those balance sheets and foot them up for one year?—A. No, sir; but it cannot be done in one day.

Commissioner LITTLER. There is some little contrariety of opinion in the Commission as to this question, and I would like, and I know that the chairman would like, to know just how this is. You have from this until the 20th of September to do it.

The WITNESS. I cannot furnish such a statement by to-morrow.

EXPLANATION OF ENTRIES IN THE BOOKS.

Mr. HAYMOND. The question was asked yesterday as to the difference between the receipts of 1884 and 1885. There was a statement of the gross receipts for 1884 which amounted to about $28,000,000, and in 1885 it amounted to only $15,000,000.

The WITNESS. I cannot answer it entirely; I can answer it generally, but it would be better to put it to some other witness.

Mr. HAYMOND. Explain it as well as you can.

The WITNESS. Partly the reason is that in 1884 the gross receipts embraced the earnings of about 3,000 miles of road, and in 1885, or a part of 1885, there were embraced the earnings of only 1,400 miles of road.

Q. Was that after the date of the lease?—A. Yes, sir.

Commissioner LITTLER. It is the change in your book-keeping that makes that difference.

The WITNESS. Yes, sir. It is a change in the books, of course; but I see during the whole year 1884 these aggregate earnings of about $29,000,000 represent the earnings of about 3,000 miles of road, and in 1885 they represent the earnings of a great many less miles.

Q. You are keeping all the accounts now under the heading of the Southern Pacific Company, are you?—A. Yes, sir; the Southern Pacific Company. We, however, keep the books of the Central Pacific, but not what we call the operating books.

Mr. HAYMOND. Under the contract they are required to be kept.

By Commissioner ANDERSON:

Q. Calls were made upon Mr. Stubbs for a list of freight rates printed, and also a list of freight and passenger rates from year to year, and agreements with reference to special rates with particular shippers, and

a copy of the agreement with the Standard Oil Company. Has he reported those to you?—A. No, sir. I think in relation to the first that only the original sheets could be found.

WHO CONTROLS WHAT ROUTES FREIGHT SHALL GO BY.

Q. Do you know whether it is the practice of those who control the route over which freight is forwarded, in relation to the transportation of freight which entered into the pool contracts, when the percentage of your road is in excess of the proportion to which it was entitled under the pooling arrangement, to send portions of the freight by other routes in order to keep the equilibrium between the freight actually transported and the proportions to which the respective roads are entitled under the pool?—A. I do not know anything about the practice in that respect.

Q. Is that entirely under the control of Mr. Stubbs?—A. Mr. Gray and Mr. Stubbs, under the direction of the president and general manager.

Commissioner ANDERSON. We ask the secretary to furnish us with a statement of the amount of traffic diverted under pool agreements to or from the Central Pacific.

PRACTICAL OPERATION OF CENTRAL PACIFIC LEASE.

Commissioner LITTLER. One question on which I am not satisfied is whether this lease of the Central Pacific to the Southern Pacific of Kentucky is a good thing for the Central Pacific, and I direct your attention to that question in making your case. We want to see the practical operation of that lease.

Mr. COHEN. We will give it to you; we would have given that to you without your asking for it.

Mr. HAYMOND. It will take some years, perhaps, to thoroughly test and determine the question.

Commissioner LITTLER. You can compare one year's operation with the year immediately preceding.

The WITNESS. As controller of the Southern Pacific I can say this: that I have charge of all the accounts of that company; as secretary of the Central Pacific I have charge of all its accounts, and so far as the accounting is concerned the Central Pacific gets every dollar that it earns.

Commissioner LITTLER. I have no doubt of that, but I want this company to show to this Commission the practical effect of this leasing as compared with the earnings of the Central Pacific road during the last year it did business on its own account.

Mr. HAYMOND. Right in that connection you must bear in mind that at the time that lease was made it was intended at almost any sacrifice to complete the line to Portland, Oreg., and to bring that in as a feeder to the Central Pacific.

Commissioner LITTLER. That is a matter for you to consider and present.

The CHAIRMAN. We would like an answer from you gentlemen as to whether you are going to offer any testimony to-morrow. We do not expect to take up very much time. We want Mr. Stevens, Mr. Douty, and one other witness.

Mr. COHEN. We have some witnesses to examine.

The CHAIRMAN. Then there are the letters.

Commissioner ANDERSON. We received a letter from Mr. Carey as to whether the Commission desired to be present in court at the time of the hearing. We hold our session at 10 o'clock, and have made arrangements to examine witnesses, and we cannot well be in court at that hour.

Commissioner LITTLER. Do you want us there, Mr. Cohen?

Mr. COHEN. I asked Mr. Carey if he would stipulate that you would be there in case we wanted to examine you to supplement our answer in that case, or whether we should ask the court for process to compel your attendance. We have not determined yet what plan will be adopted, and therefore I could not say at this moment.

Commissioner ANDERSON. You had better first find out if you want us, and then we will determine whether we can accommodate you.

Mr. HAYMOND. Questions may arise on the record necessitating your attendance.

The CHAIRMAN. We agreed on the record, as I understood. Do you raise an issue of fact?

Mr. HAYMOND. No, sir; I do not think so.

Mr. COHEN. I thought we might want some evidence in the possession of the Commission which we have not.

The CHAIRMAN. You can notify us in the morning if you desire our attendance.

Mr. COHEN. Yes, sir. I was informed by Mr. Carey that he would probably make an application for a continuance on behalf of the United States.

E. H. MILLER, JR.

The Commission then adjourned to Wednesday, August 17, 1887, at 10 a. m.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Wednesday, August 17, 1887.

The Commission met pursuant to adjournment, all the Commissioners being present.

Commissioner ANDERSON. I have here a paper prepared by Mr. Miller, which is a statement showing the bonds of the leased lines which have been guaranteed by the Central Pacific Railroad Company.

The paper was marked "Exhibit No. 1, August 17, 1887," and is as follows:

Statement of bonds of leased lines guaranteed by the Central Pacific Railroad Company.

Name of road.	Miles of road.	Character of bonds.	Amount of bonds guaranteed.	Date of maturity of bonds.	Interest payable.
California Pacific R. R. Co.	[illegible]	Second mortgage, 6 per cent.	$1,600,000	Jan. 1, 1891	January and July.
California Pacific R. R. Co., "A."	.....	Third mortgage, 6 per cent.	2,000,000	July 1, 1905	January and July.
California Pacific R. R. Co., "B."	115.44	Third mortgage, 3 per cent.	1,000,000	July 1, 1905	January and July.
Stockton and Copperopolis R. R. Co.	49.	First mortgage, 5 per cent.	500,000	Jan. 1, 1905	January and July.
San Pablo and Tulare R. R. Co.	46.51	First mortgage, 6 per cent.	1,023,000	Apr. 1, 1908	April and October.
Northern Railway Co....	153.63	First mortgage, 6 per cent.	3,964,000	Jan. 1, 1907	January and July
	364.58		10,087,000		

The guaranty for the San Pablo and Tulare R. R., as stated in the lease, also provided that bonds on the extension of this road should be guaranteed by the C. P. R. R. Co., not to exceed $25,000 per mile of road. The San Pablo and Tulare R. R. extension is now in process of construction, but the C. P. R. R. has been relieved of the guaranty on it by the cancellation of the lease and the assumption of the obligations thereunder by the Southern Pacific Co., November 1, 1886.

The lease of the Northern Railway provides that the C. P. R. R. Co. shall also guarantee bonds on a second track from West Oakland to Port Costa, not to exceed $25,000 per mile of road. The C. P. R. R. Co. is released from this obligation by the cancellation of the lease on November 1, 1886, and the assumption of the obligations thereunder by the Sou. Pac. Co.

On November 1, 1886, the leases of the California Pacific Railroad, the San Pablo and Tulare R. R., and the Northern Railway were cancelled and the obligations thereunder assumed by the Southern Pacific Co.; that company agreeing also to indemnify and hold harmless the Central Pacific R. R. Co. against any liability arising out of the guaranty of bonds made by such leases.

The Stockton and Copperopolis R. R. is still leased to and the bonds are guaranteed by the Central Pacific R. R. Co.

The dates of the guaranties are as follows:

Cal. Pac. R. R. Co., 2d mtge	August 19, 1871
Cal. Pac. R. R. Co., 3d mtge	July 1, 1876
Stockton and Cop. R. R. Co	Dec. 30, 1874
San Pablo and Tulare R. R	July 1, 1884
Northern Railway	July 1, 1884

ENGINEER'S REPORT OF THE LOCATION OF THE CENTRAL PACIFIC FROM HUMBOLDT WELLS TO GREAT SALT LAKE.

Mr. COHEN. I offer the engineer's report of the location of the Central Pacific Railroad from Humboldt Wells to Great Salt Lake, dated January 10, 1867.

Paper introduced in evidence, and marked "Exhibit No. 2, August 17, 1887:"

ENGINEERS' OFFICE, C. P. R. R.,
Sacramento, Jan'y 10, 1867.

To the President and Directors C. P. R. R. of Cal.:

GENTLEMEN: On the 11th of August last, the following instructions were transmitted to Mr. Butler Ives, assistant engineer in charge of reconnoissance and preliminary surveys in Nevada and Utah, he having been previously engaged on the surveys of the Central, or Austin route from Big Bend of the Truckee to Salt Lake, to which advance was made in my report of Dec. 18th, 1866:

"If in your opinion you can safely undertake the trip at this season of the year, you will, as soon as you can refit your party, return to the Humboldt Wells via south end of Great Salt Lake, south end of Pilot Peak Mts., and Humboldt Pass, or any other practicable route you may find in the vicinity of the one indicated, making all necessary surveys to determine the practicability of the route for the construction of a railroad. I have always been of the opinion that a practicable pass through the East Humboldt range could be found north of the Humboldt Pass, having a distinct recollection of the profile of that range as seen from the vicinity of Thousand Spring Valley and Humboldt Wells.

"I am of the opinion that with the exception of the East Humboldt range, Pilot Peak range, and Cedar Mountains, you will find nearly an open country upon the route indicated, &c.

"Mr. BUTLER IVES,
"*Asst. Engr. C. P. R. R., Great Salt Lake City.*"

On the 14th of September, additional instructions were transmitted to Mr. Ives as follows:

"After completing your reconnoissance and surveys of lines from Great Salt Lake Valley, via Pilot Peak to Humboldt Wells, you will at once proceed to make a reconnoissance of the country lying between the head waters of the Humboldt River and the north end of Salt Lake; extending your examination as far north as Thousand Spring Valley, Goose Creek Valley and Mts., and City of Rocks, and if possible as far south as Pilot Peak; making such surveys as may be necessary to determine the practicability of a railroad route between the terminal points named. It is desirable if possible to avoid the long detour via the old Emigrant route, and I trust that your

examinations may result in the discovery of a more direct line from Humboldt Wells to the northern extremity of Salt Lake. I have directed Mr. Epler to report to you, and desire you to take general charge of the survey, so disposing of both parties that the work may be carried on to the best advantage.

"To Mr. BUTLER IVES,
"*Asst. Engr. C. P. R. R., Humboldt Wells.*"

Also upon Sept. 14th, the following instructions were sent to Mr. William Epler:

"Presuming that upon the receipt of this you will have resumed your work of reconnoissance upon the Upper Humboldt, you will continue such reconnoissance and surveys in accordance with the general instructions heretofore given until you meet Mr. Ives, when you will immediately report to him for instructions regarding your further work."

"To WM. EPLER,
"*Asst. Engr. C. P. R. R., Humboldt Wells.*"

In accordance with the foregoing instructions, Mr. Ives made an examination and survey of a line from Great Salt Lake City to Humboldt Wells, near which place he was joined by Mr. Epler, and proceeded to an examination of a route running north of Pilot Peak to north end of Salt Lake City. For convenience the different routes surveyed will be described as having their initial points at the Humboldt Wells.

First. Line running south of Pilot Peak and south end of Great Salt Lake.

Second. Line via Thousand Spring Valley, Goose Creek, Raft River Valley, and Pilot Springs to Bear River and Salt Lake Valley.

Third. Line running easterly from Humboldt Wells via North Pass of Pequop and Toano Mts., North point of Ombe Mts., Red Dome Pass and north end of Salt Lake to Weber Cañon.

The first-mentioned route, designated by a red dotted line on the map, bears nearly south from Humboldt Wells for eight (8) miles with a grade of 25 ft. per mile over a gently rolling sage plain and over the summit of a smooth divide to the head of Clover Valley.

Thence descending along the west side of the valley for fifteen (15) miles with a grade of 13 ft. per mile; thence for fourteen (14) miles, with a nearly level grade over a rolling sage plain, to the western base of the Pequop Mts.; thence up the western slope of these mountains rising 520 ft. in two and one-fourth (2¼) miles to the summit of the pass where Hastings' road crosses this range.

On either side of this pass the mountains rise into a high and extremely rugged range, extending to the north some thirty-four (34) miles (to a pass through which the northern route runs,) and south to the Gashute Passage.

The altitude of this pass is 6,200 feet above the sea. Following the lowest line of descent to the east one and one-fourth (1¼) miles to the eastern base of the mountains we descend 450 ft. and thence over a gradually sloping sage plain eastward to the Gashute Desert.

A railroad line through this pass would have to be carried along the mountain slopes to the north which are deeply cut by gulches and cañons and would involve grades fully up to the maximum allowed by act of Congress; and work of a very expensive character for twelve (12) or fourteen (14) miles. Descending the foot-slope at the eastern base of the mountains the line crosses the Gashute Desert in a N. E. direction fourteen (14) miles to the western base of the Toano Mts.

This desert is an extensive sage and greasewood plain (with a light loamy soil) varying in width from ten (10) to twenty (20) miles, and extending north to the north pass of the Toano Mts., and south to the Wachoi Mountains connecting the S. E. with Antelope and to the S. W. with Steplot Valley.

The ascent to the middle pass of the Toano Mts. is made in three (3) miles over a smooth sage plain, the rise being 170 feet. To the east of this summit the plain descends gradually one and one-fourth (1¼) miles, to the head of a narrow rocky ravine with broken hills rising about one (1) mile to the south, to the base of Steep Mts.; about one (1) mile down the ravine is a small spring of good water issuing from the granite rock. This is the only spring found in this range of mts. either north or south, and the only point where granite rocks were noticed on the whole western border of the Great Desert, the mountains north and south being limestone with some shales and slates.

From the summit to the eastern base is a distance of four (4) miles in a nearly due east line, following the ravine and Hastings' road with a descent in that distance of 750 ft.

Whence a gently rolling gravelly foot-slope descends uniformly for five (5) miles in the same direction with a fall of 700 ft. and thence over a smooth plain to the salt flats of the Great Desert, making a total descent from summit of pass 1,577 ft. in thirteen (13) miles and giving a difference of altitude between the Gashute Desert and the Great Desert of 1,300 ft. These deserts have heretofore been represented as

having about the same altitude. A railroad line through the last-named pass would have to be carried to the south along the eastern slope of the Toano Mts. for eight (8) or ten (10) miles, crossing numerous rocky spurs and ravines, and one deep cañon.

Thence descending along the foot-slopes to the west end of the Barren range S. E. of Pilot Peak, a distance of twelve (12) miles from the summit will require grades of from 90 to 100 ft. per mile and will involve much heavy work.

Thence to the western margin of the Great Desert, a distance of twenty (20) miles, the line passes with a light grade over rolling hills to a low pass in the main eastern spur of the Toano Mts. This pass is 250 ft. above the desert, and the line passes thence along the south slope of the mountains (crossing several heavy rocky spurs) four (4) miles to the western margin of the desert; skirting which for a distance of four (4) miles, it crosses a point of the mud plains six (6) miles in an easterly direction to the south end of an isolated rocky ridge rising like an island from the surface of the plains; thence bearing east by south for twenty (20) miles across the salt-mud flats of the desert.

This is the narrowest place at which these flats can be crossed north of the Granite Mountains; and it is extremely doubtful whether a railroad can be built across them without piling.

Of these flats Mr. Ives, in his report, says:

"The soil, which is of a marly nature, forms, when wet, a sticky impalpable mud, and was evidently deposited at the bottom of a deep sea.

"It is thoroughly impregnated with salt, and in dry seasons the surface becomes sufficiently hard for teams with light loads to pass over it, but when wet it is impossible for animals and difficult for persons to walk upon it.

"Salt water and mud is found a few feet below the surface at all seasons, and I am doubtful whether a road can be carried across, except upon piling."

Captain Stansbury, in his report to the War Department, in 1852, gives a similar account of these mud plains.

From the eastern margin of the desert it is about six (6) miles over a level Artesian plain to the north end of a low volcanic ridge rising like a rocky island from the desert. There are several of these ridges extending for thirty (30) miles south, and are from 200 to 1,000 ft. in hight. Passing these ridges the line skirts the eastern margin of the desert for about twenty (20) miles, thence ascending the rocky slope of the mountains bordering the western shore of Salt Lake with grades of 80 ft. per mile, for five (5) miles to the summit, which is a smooth sandy divide connecting the south end of this range with the west base of the Cedar Mts.

From the summit the line follows the north slope with a nearly level grade for four (4) miles, striking the northwest point of the Cedar Mts.

This portion of the line will be expensive, as the cuttings will be heavy and mostly in rock.

Thence via Skull Valley and north end of Onaqui Mts., Tuilla Valley, and north end of Oquirrh Mts. to Salt Lake City and along the base of Wasatch Mts. to Weber Cañon, no formidable difficulties are met.

Mr. Ives, in his report, says:

"The principal difficulties encountered upon this route are: The descent from the summit of the Toano Mts. to the desert plains (nearly 1,600 ft.) requiring maximum grades and heavy work.

"The crossing of the mud flats of the desert (about twenty-five (25) miles) and the scarcity of fresh water along the whole route, passing as it does through the most sterile portion of the Great Basin.

"From the summit of the Toano Mts. to the Tuilla Valley, a distance of one hundred (100) miles, there is no fresh water to be found along or near the line."

No portion of the country between Clover and Tuilla Valleys is, or ever can be, susceptible of cultivation or settlement. It is an inhospitable, barren waste, unfit alike for the wants of civilized or savage life.

The following is a brief description of the northern line via Goose Creek and the City of Rocks, &c., surveyed by Mr. Epler. The line from Humboldt Wells to Thousand Spring Valley had been surveyed by Mr. Ives and Mr. Buck, both of whom reported favorably regarding the character of the work involved, but adversely in regard to grades, it being found impracticable to carry a line across the divide between the headwaters of the Humboldt and Thousand Spring Valley without resorting to the use of the maximum grades allowed by act of Congress. Of his examination, Mr. Epler says:

"From my initial point in Thousand Spring Valley, which coincides with Mr. Ives' barometer station 272, to the plateau between Rock Spring Valley and the waters of Goose Creek the route (running in a northeasterly course) is direct and in every respect favorable, and will not require a grade exceeding 48 ft. per mile. Thence crossing this plateau in the same direction for a distance of about eight (8) miles our line skirts the base of the upper spur of the Goose Creek Mts. and is deflected to the left and thence runs nearly north for six (6) miles over a heavy mountain country, re-

quiring very expensive work, to the source of one of the tributaries of Goose Creek.

"Thence down the valley of this stream to its confluence with Goose Creek a very favorable route was found, with grades not exceeding 40 ft. per mile."

Mr. Epler's surveys were extended down the valley of Goose Creek to the Snake River sage plains; but finding no outlet through the mountains to the eastward, he returned to the point above mentioned and carried his line thence over the Goose Creek range.

"After reaching Goose Creek the line follows down the valley, which possesses an excellent soil and produces a strip of the finest grass from a few rods to one-fourth (¼) of a mile in width. The valley declines at a grade of about 30 ft. per mile. Goose Creek is about twenty (20) feet in width and one (1) foot in depth. The Goose Creek Mts. lie to the east and south of the valley, the lowest pass through the range having an altitude of 1,400 ft. above the valley, and a route through it would run to the Great Desert in the direction of Pilot Peak."

This line was therefore abandoned. Returning to the mouth of the tributary of Goose Creek (before mentioned) an examination was made of a line running thence easterly via Bible Butte to the source of a tributary of Raft River, thence via Summit Valley and Raft River Valley to Raft River Station on the old emigrant route.

This line, extending as it does for thirty-three (33) miles through a very rough and elevated mountain district, would involve such an enormous expenditure for the construction of a railroad that it was unhesitatingly abandoned.

The pass through which the emigrant road crosses the Goose Creek range was also examined. This pass is 1,700 ft. above the valley and can only be approached with grades of 80 ft. per mile and work of the most formidable character.

The mountain side along which a line must be carried in approaching the pass is deeply furrowed by ravines and cañons; the intervening ridges being sharp and exceedingly rugged, requiring heavy cuts and numerous tunnels through hard trap, slate and limestone.

From the summit at Emigrant Pass, a line of more formidable character was obtained, but the difficulties of ascending the western slope are so great that the line may be pronounced impracticable. The result of our explorations and surveys in this direction may be briefly summed up as follows:

That from the Humboldt Wells a practicable route may be obtained to Thousand Spring Valley (by using grades of from 105 to 116 ft. per mile), and thence to the valley of Goose Creek with grades not exceeding 50 ft. per mile, but involving some ten (10) or twelve (12) miles of very expensive work.

From Goose Creek Valley there is no practicable pass through the mountains to the eastward, and a railroad line entering the valley at its source can only leave it by following the stream to its confluence with Snake River, which carries us too far north for a line running to Salt Lake Valley.

Mr. Epler's report contains much interesting information respecting his further explorations, but inasmuch as a superior route has been discovered running south of Thousand Spring Valley and north of Pilot Peak to Salt Lake, avoiding the heavy grades encountered by Mr. Epler and giving a more direct and less expensive line, a detailed account of all his surveys at this time is unnecessary. The route last referred to, which is indicated by a full red line upon the accompanying map, is more fully described below.

From the Humboldt Wells, which occupy the centre of a basin formed by the gentle foot slopes of the surrounding mountain ranges, the lines run in an easterly direction, and with a very light grade and easy work for five (5) or six (6) miles, thence along a smooth narrow valley for seven (7) miles with a grade of 70 ft. per mile, passing north of and entirely avoiding the East Humboldt range (which has formed a serious obstacle to the more southern lines), it attains the highest point reached north of the Big Bend of the Truckee; being 6,200 ft. above the sea and 585 ft. above Humboldt Wells. Thence with a descending and nearly uniform grade of six (6) ft. per mile for the thirty-four (34) miles through the North Pass of the Pequop Mts. and along the smooth slopes of a spur of the latter range to the North Pass of the Toano Mts.

But little expensive work will be required on this portion of the line, the material encountered being mostly the light gravelly loam of the sage plains with an occasional stratum of clay. From the summit of the Toano Mts. the line follows a smooth valley from one-eighth (⅛) to one-fourth (¼) of a mile in width to their eastern base, making the descent in about 17 miles, with a grade varying from 62 to 70 ft. per mile. Thence to Hot Springs Creek, which flows from Thousand Spring Valley and sinks in the Great Desert, the line passes with a gently descending grade over a smooth gravelly sage plain requiring very light work.

Several springs of good water are found in this vicinity a few miles north of the north end of the Ombe Mts., which terminate abruptly in precipitous basaltic bluffs 1,000 ft. in height.

From the above springs the line follows down a ravine bordering the above-named creek for three (3) miles, thence down a smooth open valley for seven (7) miles to the point of a low rocky ridge bordering the Great Desert. From the springs to this point the descent is about twenty (20) ft. per mile, and the work will be light.

From the summit of the North Pass of the Pequop Mts. to the Great Desert this route gives us a continuous descending grade, without any deflections for increase of distance, and the work is generally of a favorable character, but little rock cutting being necessary in the whole distance.

From the western margin of the desert the route bears E. N. E. across a smooth and nearly level greasewood plain, for twelve and one-half (12½) miles to the N. W. point of the mud flats (which run through the lowest portion of the desert and extend to the southward (120) one hundred and twenty miles, varying in width from twenty (20) to forty (40) miles).

They are more particularly referred to in the description of a line running south of Pilot Peak. The line was carried across a point of these mud flats, for a distance of five (5) miles, but they can be entirely avoided without any expensive work and but a slight increase of distance by skirting their northern margin, along the base of the Raft River Mts.

From the eastern margin of the mud flats the line crosses a slightly broken greasewood plain for six and one-half (6½) miles, to the S. E. point of a low rocky range of hills, thence along the western margin of the mud flats for about six (6) miles, thence bearing N. E. with a gradually ascending grade over a loamy sage and greasewood plain, and along the slope of some low terraced hills of trap formation, to the summit of Red Dome Pass.

The ascent from the desert to this pass can be made with grades not exceeding 40 ft. per mile, and with light work.

This pass is 530 ft. above the mud flats at north end of Salt Lake, and is a low divide in the cross range connecting the barren rocky range on the NW. shore of Salt Lake with the Raft River Mts.

These hills and mts. have their bases formed in successive terraces to an altitude of 600 or 700 ft. above Salt Lake. Apparently shore lines of a former sea. Many of the terraces are formed of beds of water-worn gravel, which retain their horizontal outline for long distances.

The descent from Red Dome Pass can be made with a grade not exceeding 70 ft. per mile for seven and one-half (7½) miles, but will involve some four (4) or five (5) miles of rock work, though not of a formidable character.

This rock work can be avoided and a cheaper line secured, though involving an increase of distance of some three (3) or four (4) miles, by bearing south from the pass and along the foot slopes of the mts. to the mud flats.

Thence skirting the margin of these flats for eight (8) miles, and crossing a gravelly sage plain to the south end of a barren, rocky range of mountains at the extreme northern end of Salt Lake. East of this point is another mud flat, across which the line was carried for a distance of two (2) miles, of which one-eighth (⅛) of a mile will probably require piling. The substratum of three flats is of a firmer material than those in the Great Desert, and, with the exception of the distance named, will easily support an embankment. From these plains to the summit of the pass through the Promontory Range the line passes over the lightly undulating foot slopes of that range, with grade not exceeding 53 ft. per mile, and but little expensive work.

This is a nearly level sage and grassy plain, with very high, rocky mountains to the south, bearing a scanty growth of cedar on their slopes.

North of the pass the mountains are low for five (5) or six (6) miles, forming a table-land which is terminated by high, rocky bluffs on the north. From the summit a smooth sage plain descends to the NE. about one and one-half (1½) miles to the head of a small ravine, which deepens into a rocky cañon one mile below.

The line can be carried along a bench on the south side of this cañon for a distance of about two (2) miles, and thence along the eastern slope of the Promontory Range to its base, a distance of about six (6) miles.

By using a grade of 70 ft. per mile but three (3) miles of heavy work will be required. The line here strikes the western margin of the clay barrens, extending north from Bear River Bay.

Skirting these barrens we pass along the eastern base of some limestone hills to Box Elder Creek, and thence along the southern base of the Malade River Mts. on a nearly level grade, and passing the north end of the mud plains, run thence in a straight line across smooth sandy plains (bearing excellent grass) to Bear River. The Malade River Mts. are a low, barren, and broken range of limestone, and extend northward between the Malade River and Blue Spring Valley. Crossing Bear River about two (2) miles below its confluence with the Malade, the line passes across a level plain two miles in width to Box Elder Creek, and thence one and one-half (1½) miles in a southeasterly direction, over a marshy flat, to the base of the foot-hills of the

Wasatch Mountains, near Brigham City. Thence following the base of the foot-hills to Ogden City, a nearly level profile can be obtained with very easy work.

Ogden City is situated on the east side of the Weber River, and thence the line follows the east bank of the river for five (5) miles, and then crosses to avoid the high clay banks which rise abruptly from the stream, and thence follows the opposite bank to the mouth of the Weber Cañon, distant from Ogden City ten (10) miles. The grade for this distance gradually increases from twenty (20) to fifty (50) ft. per mile. Weber Cañon, through which Weber River flows, is a narrow gorge through the Wasatch Mts., about three (3) miles in length, running in a nearly due west course.

The mountains are very high and precipitous, yet on either side of the stream a natural glacis, 50 to 150 ft. in width, partly covered with débris from the mts., affords ample room for the construction of a railroad, and, with the exception of one point, requiring a tunnel of 300 ft. in length through solid gneiss, no heavy work will be necessary. The river varies from 50 to 150 ft. in width, and falls, in three (3) miles (through the cañon), 278 ft., or 86 ft. per mile. The cañon proper extends but this distance, and there widens into a smooth open valley, the extent of which was not ascertained; in fact, the terminal point of our survey was made at the mouth of Weber Cañon, which we suppose to be also the terminal point of the surveys made by the Union Pacific Railroad Company from the east. Much to our regret we were unable to find any monument marking their line, and therefore extended our examination through the cañon.

Unless upon a final location of their road the U. P. R. R. Co. should approach Salt Lake Valley by some other route than the one via Weber Cañon, the route just described is undoubtedly the best one for your company to adopt, and it should be desirable to carry a line to the north of the Wasatch Mts., a good route can be had via Pilot Springs and Raft River Valley by diverging from the present line near the north end of Salt Lake.

The most apparent advantages of this route over all others examined, assuming the Humboldt Wells as the initial and Weber Cañon or Great Salt Lake as the objective points, are its directness (making the shortest distance of any practicable route), lower ruling grades, better alignment, and less expensive work.

It also entirely avoids the extensive mud flats crossed by the southern lines and is better supplied with water; good springs of fresh, living water being found at convenient intervals along the route.

There are also convenient points where water can be obtained from the mountains to the northward by bringing it a few miles in ditches or conduits.

More timber (much that is suitable for fuel and some that will make railroad ties) is found on the northern than on the southern route. Aside from the heavy mountain work already referred to, encountered on the southern line, the difficult and expensive nature of the work required to cross the mud flats in the Great Desert, requiring piling for a distance of twenty-five (25) miles, which is a country almost entirely destitute of timber, is a question of serious moment.

The transportation of timber and piles from the Sierras will not only be expensive, but unavoidably retard the work of construction.

In fact, the transportation of ties, for a supply of which we must depend largely upon the forests of the Sierras, together with iron and other materials for construction, in addition to the increased business that will accrue to your road as it progresses eastward, will severely tax the operating department if the work is pushed with rapidity. The accompanying table shows the comparative merits of the two lines in respect to grades and distance. The topography on a portion of the southern route has been necessarily omitted for want of time to complete our maps, but will be presented in full upon the detailed map which is now being made, and which will be accompanied by a full report.

It is impossible to overrate the importance of early action by your board upon this subject of location, and in recommending for your adoption the route herein described, as running north of Pilot Peak and north end of Salt Lake, I feel confident that our explorations and surveys have been sufficiently thorough to warrant me in according it the preference over all others. The knowledge of the topography of the Great Basin which our survey of the past year have furnished, though developing facts widely at variance with those heretofore supposed to exist, enable me unhesitatingly to recommend the route in question.

SAM. S. MONTAGUE,
Chf. Engr. C. P. R. R. of Cal.

Table showing comparative grades via North and South lines from Humboldt Wells to mouth of Weber Cañon, in Great Salt Lake Valley.

Grade per mile.	North line.	South line.
	Miles.	Miles.
0 to 25 feet	133¼	158
26 to 50 feet	35	37
51 to 75 feet	50¼	22
76 to 105 feet	None.	27
Total	219	242

Table showing ascent and descent of grades from Humboldt Wells to the mouth of Weber Cañon.

Stations.	Distance.	Difference in altitude.	Total rise of grade.	Total fall of grade.	Total rise and fall.
Humboldt Wells, mouth of Weber Cañon:	Miles.	Feet.	Feet.	Feet.	Feet.
Via North line	219	1,055	1,969	3,024	4,993
Via South line	242	1,055	2,032	3,179	5,211

REPORT OF CHIEF ENGINEER OF CENTRAL PACIFIC UPON THE LOCATION, CONSTRUCTION, AND EQUIPMENT OF THE ROAD.

Mr. COHEN. I also offer report of the chief engineer of the Central Pacific Railroad Company, dated July 1, 1869.

Paper introduced in evidence and marked "Exhibit No. 3, August 17, 1887":

ENGINEERS' OFFICES, C. P. R. R.,
Sacramento, July 1, 1869.

To the President and Directors of the Central Pacific R. R. Co. of California:

GENTLEMEN: In presenting a report at this time upon the location, construction, and equipment of your road, it may not be improper to review briefly the leading features of the work from its commencement.

In doing this frequent reference to, and a partial recapitulation of, former reports will be necessary.

In undertaking the construction of your road, which was to form an important link in the great overland route, the determination of the proper route across the Sierra Nevada Mountains was the first and most important question that presented itself for your consideration. The early explorations of the U. S. Government engineers while establishing the fact that a practical route for a railroad from the Missouri River to the Pacific Ocean could be obtained, were not of that detailed character necessary to determine the final location. The route recommended by them, leaving the Humboldt Valley near Lassen's Meadows and crossing the summit of the Sierra Nevada via the Madelin and Beckwourth Passes, and thence via the Feather River cañon to the Sacramento Valley, was deemed very objectionable: first, on account of the heavy and expensive character of the work involved in the construction of a road through the above-named cañon, and, secondly, the long detour to the northward, and the great distance which such a line must necessarily make in reaching the Humboldt Valley. With the view, therefore, of finding, if possible, a nearer and better route to the great basin, surveys under the auspices of your company were commenced by Mr. J. D. Judah in 1861. This may be said to have been the initiatory step, certainly the first active movement towards the construction of the Pacific Railroad.

The result of these surveys was the development of a line with maximum grades of 116 feet per mile, and curves of a minimum radius of 573 feet, that could be built at a cost but little exceeding the cost of several Eastern roads then in successful operation.

The favorable results of these surveys, a detailed account of which is given by Mr. Judah in his report of October, 1861, removed the doubts that had previously existed in regard to the practicability of crossing the Sierra Nevada, and fairly established

the fact that a transcontinental road could be built. But how it could be built through an uninhabited country for 1,700 miles with little or no prospect of the development of a paying local traffic was a financial question that seemed unlikely to receive a favorable solution by the establishment of private capital to a sufficient amount to insure the success of so doubtful an enterprise.

The national character of the proposed work, its importance as a connecting link between the older States of the Mississippi Valley and the Atlantic seaboard and the newer States of the Pacific Coast, the great facilities such a road would afford the Government for the rapid transportation of its mails, troops, and munitions of war, the development of the interior country which this long line must traverse, it was thought would entitle the enterprise to the favorable consideration af the Government. It was therefore determined to apply to Congress for such aid as would enable the company to negotiate its securities and commence at once the prosecution of the work.

With carefully prepared maps, profiles, and estimates of his surveys, Mr. Judah repaired to Washington in the fall of 1861, in accordance with the following resolution of your board passed Oct. 9th, of that year:

"*Resolved*, That Mr. J. D. Judah, the chief engineer of this company, proceed to Washington on the steamer of the 11th Oct. inst., as the accredited agent of the Central Pacific Railroad Company of California, for the purpose of procuring appropriations of land and U. S. bonds from Government, to aid in the construction of the road."

It is unnecessary to review here the history of the first Pacific Railroad. Mr. Judah in his report to your company after his return to California, in the summer of 1862 says:

"A brief statement of some of the advantages accruing to your road through its connections with the Pacific Railroad bill, recently passed, seems necessary, in order to realize its advantages and secure the benefits and public consideration to which it is justly entitled. The theory of the Pacific Railroad bill recognizes existing companies at either end of the road; while the central division or portion between the States of Kansas and California is committed to the supervision of a company created by act of Congress, deriving its existing powers from the bill itself.

Upon the eastern side, the right to construct the road, from the junction of the Missouri and Kansas Rivers, through Kansas, to the 100th meridian of longitude west from Greenwich, with all the grants, donations, etc., for about 350 miles, is given to the Leavenworth, Pawnee, and Western Railroad Company of Kansas.

The central division, or portion through the Territories of Nebraska, Utah, and Nevada, to the eastern boundary of California, a distance of about 1,300 miles, is given to the Union Pacific Railroad Company, a corporation created by act of Congress; while the construction of the western division, reaching from the eastern boundary of California to the navigable waters of the Sacramento River, or to the city of San Francisco, is assigned to the Central Pacific Railroad Company of California, to whom are made the grants of lands, bonds, &c., for that purpose.

Subsequent amendments to the act gave your company the right to extend its road eastward until it met the line constructed by the Union Pacific Company. Under the encouragement thus accorded, the surveys for the final determination of the route across the Sierra Nevada was commenced in October of the same year. Routes that had been explored previous to the survey of 1861 were re-examined, and new explorations and surveys of other routes that promised favorable results were made and carefully compared before a location was determined upon.

Five different routes across the Sierra Nevada were examined, full descriptions of which, together with a detailed description of the "location adopted for the first division of fifty miles," are given in the report of your chief engineer for 1863.

The location was extended as far as Dutch Flat, 67 miles from Sacramento, in the fall of 1863, Mr. Judah's death occurring in November of that year. I was instructed by your board to take charge of and proceed with the surveys. The lateness of the season rendering further work on the mountains impracticable, it was decided to suspend the location until spring. A party was sent, however, to continue the preliminary survey from the State line eastward to the Big Bend of the Truckee, which was completed in December, and the party recalled. No new surveys were made during the year 1864; the small engineer force in the field being employed on the revision of the line on the unconstructed portions of the first division, on the first 18 miles of the second division, and on construction. (See report Oct., 1864.)

The following year the location surveys were resumed, the final location made to Owl Gap, and the preliminary location to the State line, 138 miles from Sacramento, a full account of which is given in my report dated October, 1865. In the summer of 1866 the final location surveys were continued from Owl Gap to the eastern boundary of California, and the preliminary location extended to the Big Bend of the Truckee.

In April of the same year, in accordance with instructions received from your board, a general exploration of the country lying between the Big Bend of the Truckee River, Nevada, and Great Salt Lake Valley, Utah, embracing the Humboldt and

adjacent valleys on the north and the 39th parallel on the south, was undertaken. Three parties were placed in the field. One, in charge of Mr. Butler Ives, was intrusted with the general explorations, trigonometrical and barometrical work.

Another, in charge of Mr. William Epler, was placed upon the survey of routes lying north of Overland stage road and west of Gravelly Ford; and a third, under S. M. Buck, was detailed to make an experimental survey of the Humboldt Valley. The exploration and surveys of Mr. Ives were the most extensive and thorough that have ever been made in this region, and have added much valuable information to the geography of that portion of the Great Basin embraced within their limits. It was the generally received opinion that the Humboldt Valley afforded the best, if not the only, practicable route through the western portion of the Great Basin, but with the view of testing all possible routes and demonstrating their value these surveys were undertaken. Their accuracy have since been frequently attested by our own and other surveys, and the conclusions based upon Mr. Ives's report have proven correct in every particular.

After carrying his lines through to Salt Lake City, via south end of Salt Lake, Mr. Ives returned, via Great Desert and Pilot Peak, to Humboldt Wells, and there, connecting his lines with those of Mr. Buck, made an exploration of a route thence to Salt Lake Valley, via north end of Pilot Peak or Ombe Range, northern extremity of the Great Desert, and north of Salt Lake, to Salt Lake City. Mr. Epler, starting also from Humboldt Wells, carried a line thence northerly, via Thousand Spring Valley, Goose Creek, City of Rocks, and Raft River, to Salt Lake Valley, there again connecting with Mr. Ives's lines.

The result of these surveys, which have been heretofore laid before your board, with the full reports of the assistant engineers in charge, pointed to the Humboldt Valley, and thence, via Ives's north line (so called) to Salt Lake Valley, as the shortest and most practicable route to be found through the great Basin. The surveys were continued until from the inclemency of the season the parties were compelled to quit the field.

A report of surveys in progress were made to your board in the month of October, 1866, recommending the adoption of the line via Humboldt Valley to Humboldt Wells, and a subsequent report made Jan'y 10th, 1867, recommended the adoption of the line from Humboldt Wells via Cedar Pass—north passes of Peoquop and Toano Mountains—north end of Great Desert and Monument Point, at north end of Salt Lake, and thence through a low pass in the Promonotory Range (the present location of the road) to Salt Lake Valley, and thence skirting the eastern shore of the lake to the mouth of Weber Cañon, ten miles above Ogden City. By a resolution of your board, passed December 18th, 1866, the route as recommended from Big Bend of Truckee River to Humboldt Wells was adopted, and by a similar resolution the line thence to Weber Cañon, via the route recommended in my report of Jan'y 10th, 1867, was on the 16th of the same month formally adopted by your board, and maps of the route were prepared and forwarded to the Secretary of the Interior immediately thereafter. During the year 1867 the surveys on the Sierra Nevada were confined to the final location between the State line (eastern boundary of California) and the lower Truckee Cañon, and such changes of former location as were important after the construction had been commenced. By these changes several important improvements were effected. Early in the spring of this year the surveys east of Humboldt Wells were resumed, and a location following the general route of Ives's north line of the previous year was made as far east as the mouth of Weber Cañon as early as 12th of August.

Subsequently, during the same season, a thorough exploration was made of the Wasatch and Uinta Mountains, the Fort Bridger Basin, and the valleys of the Muddy, Hams, and Black Forks as far east as the junction of the two latter. Returning, our lines were carried via valley of Hams Fork, Hodges Pass, and Bear Lake to Big Bend of Bear River, the point where it turns the northern extremity of the Wasatch Range, and thence via Cache Valley to Salt Lake Valley, embracing a careful examination of all the tributaries of Bear River, with the hope of finding a shorter route through the above-named mountains, but without success. This range maintains its rugged and formidable character to its extreme northern limit, and affords no practicable pass for a railroad between the Bear River Cañon and Echo Summit, where the Union Pacific road has been built. The long detour via Big Bend of Bear River, though affording lighter grades and greater immunity from snow in passing the Wasatch Mountains, gave so great an increase of distance—50 miles more than Echo Cañon line—that it was deemed a fatal objection and its further consideration was therefore abandoned.

These explorations and surveys were under the immediate charge of Mr. Ives, whose reports have already been transmitted to your board. During the same season the preliminary location was also continued to the summit of the Wasatch at the head of Echo Cañon, and an experimental survey (by transit and level) carried thence to Hams Fork, as before stated. The thoroughness with which these surveys were made and the correctness of the general conclusions deduced therefrom have been attested

by the Union Pacific Company in their location, they having, almost uniformly, adopted our routes to the abandonment of their own. This they have done repeatedly, and have furnished their engineers in the field with copies of our maps, profiles, and reports on file in the Interior Department at Washington for their guidance in making their own locations.

The surveys of 1868 were confined principally to the final location between the lower cañon of the Truckee and Ogden City, in Salt Lake Valley, a distance of 560 miles. Several new trial lines were run down the eastern slope of the Promontory Mountains, but without developing a superior line to the one located last year. The tunnel at first contemplated was thrown out by cutting heavily across the point of the spur and crossing the adjacent ravine at a height of 80 feet. This change was effected without exceeding the maximum grades and curvature previously reported to the Secretary of the Interior.

CONSTRUCTION.

The progress of construction may be briefly summed up as follows:

Ground first broken at Sacramento January 8th, 1863. Grading commenced in month of February following. Distance completed in 1863, Sacramento to Junction, 18 miles. Distance completed in 1864, Junction to Newcastle, 13 miles.

1865.—Road open to Auburn, 36 miles from Sacramento, May 10th. Opened to Clipper Gap, 43 miles, June 10th. Opened to Colfax, 54 miles, Sept. 10th; distance completed in 1865, 23 miles.

The heavy grading above Colfax was commenced and prosecuted vigorously during the following fall and winter.

In May, 1867, the cars ran to Secrettown, 62 miles; and on the 4th day of July the first train from Dutch Flat, 67 miles from Sacramento, brought a large number of the citizens of that place to Sacramento. On the same day the headings met, and light shone through the first tunnel constructed on the Pacific road, thus practically refuting the slanders which had been heaped upon the company by its enemies in their oft-repeated declaration that Dutch Flat was to be the terminus of the road. On the 24th day of November of this year the road was opened to Cisco, 92 miles from Sacramento. The winter setting in with unusual severity soon after, all the grading that had been commenced between Cisco and the Truckee, with the exception of the tunnel work at the Summit and vicinity, was necessarily suspended for the season. Work on the Summit tunnel, which had been commenced and abandoned after a few weeks' work in the fall of 1865, was resumed in August of this year, and the approaches were completed, and the tunnel proper commenced on the 16th of September. The other tunnels, from No. 7 to 13 inclusive, were all commenced during the fall, and the most of them were sufficiently advanced to afford protection to the workmen before the heavy storms set in. They were all vigorously pushed during the winter of 1866 and 1867, and completed as shown by dates in the annexed table.

After the completion of the road to Cisco, a large portion of the force (consisting principally of Chinese) that had been employed during the summer was transferred to the Truckee Cañon, and there employed during the winter months. Early in the season of 1867 work was resumed along the whole line between Cisco and Truckee, and prosecuted vigorously during the summer and fall. By December the grading and bridging were completed and the track laid to tunnel 12, two and one-half miles east of Summit, and the track had also been laid from Coldstream to camp 24, near the State line, a distance of 24 miles, the iron having been transported across the mountains by teams. Total progress of track in 1867, 39 miles. Winter again interfered with active operations near the Summit, and work on the unfinished portions of line between tunnel 12 and Coldstream (about 7 miles) was accordingly suspended.

The track above Cisco being laid on a newly finished and unsettled road-bed, and being but partially ballasted, no attempt was made to keep the road open or operate it during the winter months. Before it was closed, however, a large quantity of iron was transported to the summit to be forwarded thence by teams to the Truckee. Two locomotives were also sent to Truckee by teams and there put together, and the trucks and iron work for 10 flat cars were transported in like manner, the wood work being provided there. During the winter of 1867 and '8 the grading was completed a distance of 20 miles from the State line, and the track reached Reno, 154 miles from Sacramento, on the first day of May. About the middle of April a large portion of the grading force was sent back to complete the unfinished work near Donner Lake, and the rest were employed in grading towards Big Bend of Truckee. The grading proper was the least difficult and expensive portion of the work to be done on the unfinished seven miles near the summit. The snow during the winter had in many places drifted to a great depth, filling completed cuts to their original level, and in deep ravines where embankments were required were solid banks of frozen snow to a depth of 10 to 30 feet. All this had to be removed or a delay of several weeks, probably until midsummer, would occur before the work could be commenced. Meanwhile a larger force was employed opening the road between Cisco and the summit,

and thence eastward as far as the iron had been laid the preceding fall. The snow had become so compact that it was impossible to move it with plows, and consequently nearly the whole of the track for 15 miles had to be cleared with picks and shovels.

Between tunnels 8 and 10, where the previous year cuts had been excavated to a depth of from 20 to 60 feet in the solid rock, they were again made to an equal, and sometimes to a greater, depth in the snows. The grading of this seven miles was completed and the tracks connected on the 15th of June, and a few days thereafter trains commenced running regularly to Reno.

Early in June grading was commenced east of Wadsworth, but it was not until the 9th day of July that the track was laid across the Truckee at that point. It was in this month that the work east of Wadsworth was fairly opened and in the succeeding ten months 501 miles of road were graded, culverts and bridges built, and the track laid reaching the summit of Promontory on the 5th of May, 1869, and connecting with track of the Union Pacific Railroad on the 10th of that month. The grading from Wadsworth to the Toano Mountains was done principally with the forces sent from this end of the line, and thence to Salt Lake Valley. The greater portion of the grading was contracted with and executed by parties residing in Salt Lake Valley. Though the track was laid only to summit of Promontory the grading had been commenced and the greater portion of it completed thence to Ogden, a distance of 54 miles. The Union Pacific had also graded their line on this portion of the route and as far west as Monument Point. They had also done a little work as far west as Humboldt Wells, at which point they evidently expected to meet the track of the Central Pacific. The real contest between the two companies was for the possession of the route between Monument Point and Ogden, but as in accordance with the terms of an agreement made between the representatives of the companies in the city of Washington in April, 1869, the point of meeting was by Congressional enactment fixed at Promontory Summit. All work east of that point was suspended on the —— day of ——. By the terms of the agreement the Central Pacific is to pay for and own the road built by the Union Pacific Company between Promontory Summit and Ogden, so that the latter place will be the common terminus of the two roads. The construction of a road through an uninhabited country without local resources for materials and supplies of provisions, at a rate too rapid for civilization and improvements to keep pace with it, presented many difficulties and was unavoidably attended by great and unusual expense. All the material required for bridges, trestling, buildings, and track were transported from Sacramento and the Sierra Nevada; and all the fuel consumed in the operation of the road up to the month of December was also carried from the the forests of the Sierras. The transportation of this enormous amount of material absorbed the rolling stock as rapidly as it could be provided, and temporary delays were occasioned by the lack of sufficient cars and motive power.

A large number of cars were constantly employed in hauling water for the use of the workmen on the track, as well as for the supply of the engines, and it was not unfrequently hauled long distances ahead of the track for the supply of the grading gangs by teams kept for that purpose.

MANNER OF CONSTRUCTION.

The requirements of the Pacific Railroad act, as well as the standard fixed (by the board convened by the Secretary of the Interior, at Washington, in Feby., 1866), for the construction of the road, have been adhered to as closely as circumstances would permit, it being the aim of those in charge of the work to bring the road, when completed, fully up to the standard of first-class roads in the Eastern States. Rapidity of construction, and the frequent difficulty and sometimes impossibility of procuring building materials along, or within a reasonable distance of, the line have rendered temporary structures in some cases a necessity. All such structures of any magnitude have already been replaced by permanent ones, and those remaining, viz, the trestle culverts in a portion of the Humboldt Valley, will be replaced with stone as soon as may be necessary.

From Sacramento to Big Bend of Truckee all culverts are constructed either of brick or stone (brick being used only in the first 18 miles); they are substantially built, and of sufficient size for the purpose required as has been satisfactorily proven by the experience of several winters on the only portion of the line where any apprehension was ever felt regarding their capacity.

Not a single culvert has received serious damage, and but one has required enlargement. With the exception of the American River bridge, all the truss bridges on the road either rest directly on abutments and piers of masonry, or on substantial timber piers, which are supported by foundations of masonry. Trestling has in some instances been used in crossing deep gulches or low depressions in the divide traversed by this road. It is all substantially built and has good foundations, as is well attested

by the fact that not a single bent has required adjustment since first placed in position. A detailed description of the general plans and manner of constructing both bridges and trestling will be appended hereto, also a description of tunnels and statistics connected with their working and progress.

SNOW GALLERIES AND SHEDS.

The construction of timber galleries and sheds for the protection of the track against the deep snows which usually fall in the vicinity of the summit of the Sierras forms an interesting and important feature of the mountain work, both financially and as regards the uninterrupted working of the road over the mountains during the winter months. The average snow-fall on the summit has never been carefully ascertained for a series of years, but it may be safely stated as accumulating to a depth of eight feet on a level in mild winters (like the one just past) to fifteen feet in the severer seasons, with a probable average of 11 or 12 feet. The snow-fall diminishes rapidly east of the summit, not more than one-half the above amount usually falling at Donner Lake, while a few miles below Truckee Station it is so light as to offer no serious obstruction to trains.

West of the summit for 8 miles it accumulates to nearly as great depth as at the summit, then gradually diminishes until at Emigrant Gap there is usually about one-half the amount that falls at the summit. Below that place it diminishes rapidly; its greatest depth as low as Alta seldom exceeds 3 feet. At this altitude (3,600 feet) the snow lies but a short time, the storms being usually followed by rain, and this may therefore be properly termed the western limit of the snow belt. No difficulty has yet been experienced in operating the road between Alta and Blue Cañon, 9 miles further east, and thence to Emigrant Gap, by protecting the deep thorough cuts with sheds; the snow plows have been found capable of keeping the road clear.

No sheds were built in the season of 1866, and the road was, with the exception of a few days, kept open to Cisco with plows, aided by a large force of men to shovel through the deeper drifts. The plows were driven with six and at times with as many as twelve of the heaviest locomotives, coupled together, and then they could in many places penetrate the compact drifts to the distance of only a few feet. The sudden stoppage of such a train when moving rapidly under full steam necessarily caused heavy strains upon the machinery and an unusual wear of the iron in track by the slipping of the wheels. The only feasible plan that presented itself to obviate this difficulty was to protect the track by a structure that would withstand the accumulated weight of the falling and drifting snow. Accordingly in the summer of 1867 the deep cuts (where the most difficulty had been experienced during the preceding winter) between Lost Camp spur and Cisco, were covered with sheds. An aggregate length of 25,000 feet of these sheds were built, the longest one being one-half mile. They were covered only on the roof, and though some difficulty occurred by the snow drifting under them they aided materially in the operation of the road during the following winter, and as an experiment were a decided success. Of the 25,000 feet built the first season, an aggregate of but 250 feet, or 1 per cent. of the whole, was seriously injured. This injury occurred, not from the weight imposed upon them, but by snow slides from the high bluffs, along the Bear River slope, where slides had not been anticipated. The following season, 1868, eighteen miles more of the track was protected by sheds and galleries; the latter being built at places where snow slides were apprehended or known to occur. Of this distance, two miles was over double track at stations.

This covering was almost continuous for a distance of 9 miles west and 4 miles east of the summit. This season the covering will be made continuous from Emigrant Gap to Coldstream tunnel, a distance of 30 miles, and east and west of these points the deep cuts will be covered to Truckee and Blue Cañon. An account of the plan of these sheds and galleries, the manner of constructing them, and the material used, is given by Mr. Arthur Brown, who has had charge of their construction, as well as all bridge and other wood work on the road east of Newcastle, east of the Sierra Nevada. I think no obstruction from snow is likely to occur, excepting in crossing the summits of Cedar, Peoquop, and Toano Mountains. There are no indications of a heavy snow-fall on these mountains, but even with light storms drifting will be likely to occur, and snow fences may be required on some portions of the line in the above-named locality. Snow-plows should be stationed at Humboldt Wells, and at convenient stations east of there, for use in case of necessity. The past winter was an unusually light one throughout the Pacific coast and Great Basin, and observations taken only during that season will not furnish a safe criterion for future guidance.

Snow-plows may also be required on the summit of Promontory Mountains, though last season's storms were very light in that region.

FUEL.

The question of a supply of fuel for your road is one of the most important connected with its operation. East of the Sierra Nevada no timber suitable for building

purposes is found until you reach the Wasatch Mountains, and the sparse and scrubby growth of cedar and piñon on the slopes of the Cedar, Peoquop, Toano, Ombe, and Promontory Mountains will supply fuel but a short time, and that only at a high rate, it costing from seven to ten dollars per cord delivered on the road. No careful estimate has been made of the amount of fuel that can be obtained east of Humboldt Wells, but I think I am safe in assuming that it will be exhausted within three years. Search for coal has been made both under the auspices of your company and by private enterprise, but without any valuable results. Discoveries have been reported from time to time at various points along the line, but nothing better than bituminous shale has yet been produced. It is still hoped that coal may be found in the lime and sandstone formations east of Twelve Mile Cañon. In case of failure to find coal in the vicinity of the road the forests of the Sierra and the coal fields east of Salt Lake Valley must be depended on for future supply. Coal can be delivered at Ogden, via U. P. R. R., at a maximum cost of $4 or $4.50 per ton, one ton of which is probably equivalent to two or two and a half cords of cedar wood, though the exact relative value of the two has not yet been carefully ascertained. How far it may be necessary to transport coal westward and wood eastward will, of course, depend on their relative value as fuel and their cost.

TELEGRAPH LINE.

In accordance with the requirements of the railroad act, a telegraph line has been built along the entire length of your road, and offices established at all the principal stations. This is in every respect a first-class line.

The greater portion of the grading force employed up to the date of completion of the tracks has been retained for the work of ballasting and otherwise perfecting the road-bed. A large number of gravel trains are constantly employed, and the tract is being rapidly completed. A change of line has been made in Humboldt Cañon near the mouth of Trout Creek. By changing the channel of the river the line has been shortened about 1,200 feet, the fourteen degree curve thrown out, and the aggregate curvature reduced 173¼ degrees. A heavy riprap wall will be built to protect the embankment from the action of the river in high freshets. Some changes of line will also be required between Emigrant Gap and Cisco, to admit of the proper construction of snow sheds. These changes, which are now being made, will make some improvements in the alignment.

I omitted to mention, in connection with the snow galleries the construction of some heavy retaining-walls to aid in supporting the galleries and receive the shock of the snow slides, which would sweep away the strongest timber work if left unprotected. The principal walls built for this purpose are at the west end of tunnel 8, west end of tunnel 9, and between tunnels 9 and 10. Some additional work of this kind will be required during the present season. The work upon the snow sheds is progressing rapidly and will be completed early in the fall.

Masonry piers for a truss bridge at Butte Cañon, in place of the present trestle work, were built last year, and the bridge, which is already framed, will be erected this season. With the completion of the snow sheds at present contemplated, I am now confident that your road can be operated during the coming winter without interruption, and passenger trains run as safely and rapidly during the prevalence of the severest storms as during the summer months.

I hope at an early day to be able to present a more detailed report in regard to many matters of interest which have been but briefly alluded to herein.

Appended hereto please find a statement of the present equipment of the road, including motive power, rolling stock, shops, depot buildings, &c.

Respectfully submitted.

SAM. S. MONTAGUE,
Chf. Engr.

APPENDIX.

BRIDGES.

All trussed bridges of spans over fifty feet are built on the "Howe plan," strongly proportioned, and the workmanship carefully executed. The lengths of spans vary from 84 to 204 feet. Spans of 204 feet are strengthened by heavy arches connected to the lower cords by suspension rods. Spans of 50 feet and under are "straining beam trusses," also heavily proportioned, using an excess of 30 per cent. of material over the amount generally used in similar structures. The materials are of the choicest Puget Sound and mountain timber and the best quality of refined American iron. All the bridges are to be covered to protect them from the weather.

TRESTLE-WORK.

The bents are 16 feet apart, and strengthened with lateral and longitudinal girders, pinned and bolted to them at intervals of 10 feet, and sway-braced. The track string-

ers are built of double timbers, making a beam of 24 inches in depth. Material the same quality as the trusses.

SNOW SHEDS.

The framework of snow sheds is partly of round timber, viz, the posts and main or side bracing. The bents are placed 8 feet apart from center to center of posts. The roof is built at ¼ pitch or at an angle of 45 degrees with the horizontal. The size of posts are twelve inches and main braces 10 inches in diameter, with plates of sawed timber 4 by 10 inches. The rafters directly over the posts are also of sawed timber 6 by 8 inches, with double collars 3 by 8 inches gained into them. The two sets of intermediate rafters are 4 by 8 inches with double collars also.

The main or side braces abut against the under side of the collars of main rafters, where they are connected with rafters, and intersect the posts at an angle of 30 degrees, and pass outside of line of posts and rest on the ground near the grade of road, and answer the double purpose of side bracing and supporting the main rafters near their centers. The plates are braced from the posts and directly under the intermediate rafters. The longitudinal girders are placed above and below the intersection of the posts and main braces. The covering of the roof is 1¼ inches thick and the sides 1¼ and 2 inches. The size of interior of shed is 16 feet wide by 17½ feet high from top of rail.

SNOW GALLERIES.

The snow galleries differ from the sheds principally in the style of framing, the size of timber used, and the construction of the roof, which slopes in one direction, conforming as nearly as possible to the natural slope of the surface, in order to allow snow slides to pass freely over them.

In many places the roof has been extended to a distance of 100 feet horizontally, in order to make a proper connection with the face of the bluff. The interior dimensions of the galleries is 15 feet wide by 18 feet clear height.

The bents are placed from 3 to 5 feet apart.

The posts and caps consist of timber 12 by 14 inches, and the plates 12 by 12 inches, gained on top of bents 1½ inches.

The rafters are timber 12 by 12 inches, and truss-braced at intervals of 5 feet throughout.

The roof is covered with plank 5 inches in thickness, and sides with 2-inch plank.

The whole structure is anchored to the solid rock with rods 1¼ inches in diameter at intervals of about 10 feet.

DESCRIPTION OF TUNNELS.

Tunnel No. 1 is through a spur of Grizzly Hill on west side of Blue Cañon, section 44.

It is 508 feet in length and of dimensions noted in following table. The material is volcanic conglomerate sufficiently compact to sustain itself without lining, with the exception of 120 feet at west and 55 feet at the east end, which was timbered.

The plan of timbering adopted for this tunnel was carried out in all the others where any artificial support was required, and will hereafter be described in detail.

No. 2. Is through the ridge at Emigrant Gap, where the line leaves the American River slope and enters the valley of the South Yuba. The material is similar to that found in tunnel No. 1, though of a less compact character, and required timbering throughout its entire length. I am indebted to Mr. L. M. Clement, engineer in charge of location and construction of the Yuba and Summit divisions, for the following description of tunnels No. 3 to 13 inclusive:

Tunnels No. 3 to 4. These tunnels are through two projecting points of a trap ledge or dike that crosses the Yuba Valley half a mile above Cisco. This ledge consists of very hard trap in lamina, at right angles to the line of the road. It can be traced across the bed of the Yuba when the water has laid its edges bare, and falls over them in a succession of rapids.

No. 5, like the preceding, is through a spur formed by a ledge of hard rock crossing the valley, although in this case it is granite. The ledge may be traced beyond the Yuba to a ridge of solid granite stretching nearly across its outlet.

No. 6. Summit Tunnel. This tunnel is parallel to and about 400 feet north of Donner Pass. The length is 1,659 feet, exclusive of approaches. The material is granite of medium quality and hardness, and much broken by seams and fissures on the surface, though these seldom penetrate to sufficient depth to materially aid in working. Work on the approaches was first commenced in the fall of 1865, but finding it impossible to get the headings under before winter, operations were suspended after a few weeks' work.

It was resumed in August, 1866, and from that time until its completion there was scarcely a pause in its progress.

To expedite the work a shaft was sunk near the centre of the tunnel, and hoisting works erected during the fall of 1866. The progress of the shaft was slow and it did not reach the crown of the tunnel until Dec. 12th, and on the 19th was at a sufficient depth to allow the headings to be started. The average rate of progress in the shaft was 85-100 of a foot per day. From the last-mentioned date the headings were pushed in each direction from the shaft, as well as from each end until they met on the —— day of August, 1867.

Work from the shaft was suspended soon after the above date, and the work completed from the ends.

No. 7. This tunnel is through a granite ledge, six hundred feet east of Tunnel 6. Being only 99½ feet long, it was worked entirely from the east end; and when men were needed elsewhere they were taken from this work, thus making its progress slow and irregular.

No. 8 is through a granite bluff, which forms the end of main spur from Donner Peak. As might have been expected from the bold character of the bluff, its material proved to be harder than most of the granite in the other tunnels. The east portion of this tunnel is under a vertical face of granite one hundred feet high and at right angles to the line, forming the finest tunnel entrance on the road.

No. 9. Like No. 7, this tunnel, which is also through solid granite, was worked entirely from the east end. As the trail which led to it was very dangerous on account of snow slides, work was stopped from February 20 until April 19, 1867.

No. 10. This is through a small spur of volcanic conglomerate, composed principally of cobble and rounded boulders of all sizes. As might be judged from the rate of progress the material was easily worked, but still hard enough to stand without lining. The greatest weekly progress made in heading was 35 feet, and in bottom 49 feet. It was intended to take this tunnel out entirely from the west end, but when nearly through water began to accumulate in the bottom, running in at the west end and leaking through the roof. It was therefore finished from the east.

No. 11. The west end of this tunnel is through decomposed granite and was timbered as already described. The rest of it was through solid granite of the usual character found in this vicinity. Daily average progress in east end: Heading, 1 61-100; bottom, 1 86-100 feet.

No. 12. The granite here is rather softer than usual, but only required timbering for a short distance in the centre, where a ledge of soft material crosses the tunnel obliquely.

No. 13. The line, after following the side of Lake ridge for 3 miles, turns up into Coldstream Cañon. As the ridge terminates in a long sharp spur, a 10-degree curve and tunnel, 870 feet were used.

No. 14 is 198 feet long, in trachite. No timbering required.

No. 15 is 92 feet long. Granite ledge.

DIMENSIONS, TIMBERING, &C.

Nos. 10, 11, and 13. Excepting all of the tunnels east of the summit were through solid rock which did not require lining, and of the following dimensions: Width from sub-grade to springing line of arch, 16 feet; grade, 1.25 feet above sub-grade; on sharp curves 1.4 feet, and as elsewhere at centre of ties. Springing line, 9.75 feet above grade. Sides perpendicular. Arch a semicircle of 8-feet radius. Tunnel 11 was partly and tunnel 13 wholly lined with timber in the following manner: 12 by 12 inch sills were placed on each side with their bottoms 6 inches below sub-grade. Into these, posts 12 by 16 inches by 11 feet were mortised, supporting arches composed of three layers of heavy plank. Each outside layer consisted of 7 pieces each 5 by 12 inches by 4 feet 8 inches, forming a polygonal frame, as the timbers are not cut to the curve. Between these is a similar layer of 5-inch plank breaking joints with outside planking, the whole firmly connected with three-fourths inch bolts, so as to form a solid arch of 180 square inches sectional area. Bridging of 2 by 12 inch plank was put between the consecutive arches at each joint of their outer planking.

The distance from centre to centre of arches varied from 1.5 feet to 5 feet, according to material. Over the arches and when the material required it, on the sides also, a lining of split lagging was placed.

The width of subgrade, inside of posts, is 17 feet at springing line, inside of arches 19 feet, giving a batter of 1 foot on each side. Radius of intrados of arch, 9 feet 5 inches, making height of crown 19.75 feet above grade.

At Tunnel 12 a short distance in the centre proved to be decomposed granite and was supported by a light set of arches, each composed of seven pieces of 10 by 10 inch timber, with posts and sills similar to those already described. In all tunnels on curves allowance has been made for elevation of outer rail, so that tops of cars will be in center of tunnel.

The sectional areas and cubic yards per foot, lineal, of the various tunnels is shown in the following table:

Class of tunnel.	Area of excavation.	Area of finished tunnel above grade.	Excavation per foot, lineal.
	Sq. ft.		*Cu. yds.*
Hard rock on tang't	276. 53	256. 52	16,327
Hard rock on curve	278. 93	256. 33	16,333
Timbered, Nos. 11 and 13	418. 37	340. 53	15,491
Timbered, No. 12	324. 24	256. 53	12,009

In all cases the headings were at top of tunnel and, excepting in Nos. 11 and 13, were taken out to the final dimensions, and to an average depth of 7 feet below the crown. In Tunnels 11 and 13 the heading was in some places narrower and supported by temporary timbers; chambers were excavated at the sides for the sills, and the central core left to support the shores which held the material above in place; as soon as the timbering was finished the core and false work were removed.

LABOR.

With the exception of a few white men at the west end of Tunnel 6, the labor force was entirely composed of Chinamen, with white foremen—the foremen usually working in three shifts of 8 hours each, the latter in two shifts of 12 hours; a single foreman and a gang of thirty or forty Chinamen constituting the force at each end of a tunnel. Of these, 12 to 15 would be working in the heading, the rest on the bottom, removing material, etc. When the gang was small or the men were needed elsewhere the bottoms were worked with fewer men or stopped, rather than take them from the heading.

PROGRESS.

A record was kept showing the weekly progress and number of days worked, in each tunnel. From this record the accompanying table of tunnel statistics is principally compiled.

The column of working days shows the sum of working days on each face of heading or bottom. The headings were worked with all the men that could work to advantage, and, therefore, the column of average daily progress obtained by dividing length of tunnel by total number of working days in heading, shows what can be expected when working under similar circumstances elsewhere. The bottoms, on the contrary, were worked in an irregular manner until April, 1867, when they had all fallen behind the headings some distance. In the summit tunnel it averaged 125 feet. The bottoms were then worked steadily, and with but few exceptions made rapid progress. From the work done after April, and especially after the headings were finished, and the whole force worked on bottoms, an additional column has been compiled, showing progress on bottoms with full gangs. In tunnel No. 6, the daily progress is given separately for powder and nitroglycerine. It will be observed that average daily progress and daily progress with full gangs on bottom, are the same for the latter; this is because nitroglycerine was not used in the bottom until the headings were out and there were men enough to work it to full advantage. In tunnel No. 8 nitroglycerine was used for a short distance in the heading, but not to sufficient extent to affect its progress materially, or to afford data for comparison. The average daily progress in this tunnel for headings and bottoms includes that done with both powder and nitroglycerine, while the progress on bottoms with full gangs is for nitroglycerine alone. The other tunnels were taken out entirely with powder.

In Tunnel 11, the west end being through decomposed granite, as much as 37 feet per week has been made in the heading, but the progress was irregular, there being little advantage in getting much ahead of the timbering. The progress of bottom in the timbered part of No. 11 and throughout No. 12 depended entirely on the timbering, and that in great part on the progress of chambering for sills. When the latter is done and the timbers are in place it is but little work to remove the core. The progress with full gangs on bottoms in No. 11 is therefore given through the east end, which is hard granite.

From the table referred to, the following abstract has been made of work done with full gangs:

Material excavated.	Explosive material used.	Mean daily prgs.	Heading in tunnels.	Bottom.	
				Mean daily prgs.	In tunnels.
Hard trap	Powder	0.75	3 and 4	1.53	3 and 4
Granite	do	1.08	5 to 9, and 11 and 12.	2.07	5, 6, 7, 9, 11c, and 12.
Do	Nit. glycerine	1.82	6	4.10	6 and 8
Conglomerate	Powder	2.38	10 and 13	4.91	10

PALACE HOTEL, SAN FRANCISCO, CAL.,
Wednesday, August 17, 1887.

DARIUS O. MILLS, being duly sworn and examined, testified as follows:

By Mr. COWEN:

Question. You have resided in California for a great many years, have you not?—Answer. Yes, sir.

Q. From what time to what time?—A. My residence commenced here in 1849, and I think that I changed my residence about six years ago. I am not positive of it.

Q. Do you now reside in New York City?—A. Yes, sir.

Q. From the early part of 1850 to the present time you have been a banker in the city of Sacramento, have you not?—A. Yes, sir; most of the time.

Q. You now have a bank in that city, have you not?—A. Yes, sir.

PRESIDENT OF THE BANK OF CALIFORNIA.

Q. For some years you were president of the Bank of California in San Francisco, were you not?—A. Yes, sir.

Q. Are you acquainted with Leland Stanford, C. P. Huntington, and Charles Crocker, and were you acquainted with Mark Hopkins during his lifetime?—A. Yes, sir.

Q. How long have you known them?—A. From early in the fifties.

ACQUAINTED WITH CENTRAL PACIFIC SINCE ITS INCORPORATION.

Q. Have you been acquainted with the corporation known as the Central Pacific Railroad of California, and with the corporation known as the Central Pacific Railroad Company?—A. Yes, sir.

Q. From the time of its incorporation to the present time?—A. Yes, sir.

Q. During the time that the Central Pacific road was being constructed, say, from 1862 to 1869, you were a resident either of Sacramento or San Francisco, were you not?—A. Yes, sir.

Q. During that time were you intimately acquainted with the gentlemen who were the officers of the Central Pacific, who were constructing that road?—A. Yes, sir; generally so.

GENERAL KNOWLEDGE OF ITS CONSTRUCTION.

Q. You had a general knowledge during the time of the construction of the financial affairs of these gentlemen and of the Central Pacific Railroad Company, had you not?—A. Yes, sir; a general knowledge.

Q. As a banker were you applied to from time to time to lend money, either to the contractors, or to these gentlemen, or to the company? I am speaking of the time during the construction.—A. Yes, sir.

Q. Had you an intimate knowledge of the work of construction as it proceeded? Did you follow it along?—A. Somewhat.

Q. You knew the difficulties attending the construction over the mountains, did you not?—A. Yes, sir; pretty much.

DECLINATION OF OVERTURES TO TAKE AN INTEREST.

Q. Were you ever requested by any of the gentlemen I have named, Governor Stanford, Mr. Huntington, Mr. Crocker, or Mr. Hopkins, to take an interest in any of the contracts for the construction or in the corporation known as the Contract and Finance Company?—A. I had overtures to take an interest in the general business of the road.

Q. Which you declined?—A. I declined.

CAUSE OF SUCH DECLINATION.

Q. Would you mind telling the Commission the reasons that induced you to decline?—A. In the first place, the doubtfulness of its success and the ability of the parties to carry it out, and in the second place, the giving up of an important business which it would perhaps involve if I went into the railroads.

Q. Did the question of the liability, under the laws of California, of the stockholders in that corporation have anything to do with your determination?—A. Not especially.

Q. Were you acquainted with the affairs of those gentlemen I have mentioned, or of the Central Pacific Railroad Company, or of the Contract and Finance Company during the time that the road was being constructed, as to their financial wants and their desire from time to borrow money?—A. My understanding was that their wants were always pretty great during the construction of the road; that is, their wants for money.

RATE OF INTEREST CHARGED CENTRAL PACIFIC ONE PER CENT. PER MONTH.

Q. Can you from your recollection state what were the current rates of interest which borrowers of their standing would have had to pay in California between the years 1862 and 1869?—A. My recollection would not serve as to those dates; the rates of interest were high, and I think that these parties were subject to the highest rates almost that were paid here.

Q. Between those dates the current interest in California was always at least 1 per cent. per month, was it not?—A. Yes, sir; that is my impression.

OFFERED A CONTROLLING INTEREST AFTER ITS CONSTRUCTION.

Q. After the construction of the Central Pacific Railroad between Sacramento and Promontory Point, were you and some other gentlemen in San Francisco offered a controlling interest in the Central Pacific corporation?—A. Yes, sir.

Q. It was in the year 1873, was it not?—A. I do not have the dates in my mind, but I should think that it was about that time, or in that vicinity.

Q. You and the gentlemen associated with you were offered 80 per cent. of all the stock that had been issued by the Central Pacific Railroad Company and the corporations connected therewith, were you not?—A. That is my recollection; I think that it was 80 per cent., or about 80 per cent.

Q. All of these corporations had then been merged into the Central Pacific, had they not?—A. Yes, sir.

TERMS OF THE OFFER.

Q. Can you remember the rate at which this 80 per cent. of the stock of the Central Pacific Railroad Company was offered to you and the gentlemen connected with you?—A. I do not remember the exact rate. We did not figure it in that way. We did not figure the percentage on the stock.

Q. Recalling to your recollection, was it not at the rate of 20 cents on the dollar for the Central Pacific stock?

Commissioner ANDERSON. Ask the witness how they figured it out, if you want to get the effect of his recollection.

Mr. COHEN. I will get it all out.

The WITNESS. According to my recollection I did not figure the percentage upon the stock. It was certain properties in lump that were bargained for, and I have not any recollection distinctly what it would be upon the stock of the Central Pacific.

Q. Were they not properties represented by the stock of the Central Pacific?—A. Yes, sir.

Q. The proposition to you was to buy 80 per cent. of the stock of the company which had then been issued, was it not?—A. Yes, sir; about that.

Q. Leaving the other 20 per cent. remaining in Governor Stanford?—A. Yes, sir; that is my recollection.

DIFFICULTIES ENCOUNTERED IN CONSTRUCTION FROM SACRAMENTO TO PROMONTORY POINT.

Q. Before proceeding to another subject, can you state for the information of the Commission, your knowledge of the financial and physical difficulties that were encountered by the officers of the Central Pacific in constructing the road from Sacramento to Promontory Point?—A. The difficulties were very great, and they rendered their credit very poor. It was a constant struggle, and the sense of the community, as well as my own, was against their being able to carry out the enterprise.

Q. I should have asked you why it was that you refused to make the purchase of the 80 per cent. of the stock of the Central Pacific in 1873?—A. One reason was that I was not very anxious for the purchase, and another was a disagreement, you may say, as to the details regarding the completion of the contract.

Q. Did not the attitude of the Government towards the Central Pacific at that time, and the various questions that were likely to be involved, deter you from making that purchase?—A. I presume that was one of the reasons why I was not anxious to make the purchase.

TEST OF THE MARKET VALUE OF STOCK.

Q. During your residence in New York, have you been so situated as to form any opinion as to the stock of the Central Pacific Railroad Com-

ay on the New York market, with respect to its being an active stock or otherwise?—A. Yes, sir.

Q. In the test of daily quotations of sales on the New York Stock Exchange, at any particular figure, would that afford any criterion as to the price at which any large block of stock could be sold?—A. I should say it would.

Commissioner ANDERSON. That depends upon the stock and how long it has been on the market.

Q. Take the sales of 100 shares of stock, for instance, at $36, would that furnish any criterion of the price at which 80,000 shares of stock could be sold?—A. Naturally the large amount would rate at a lower figure, I should say, for the risk attending the purchase of a large amount.

Q. Taking the test price at $36 per share, how many shares of stock do you suppose, from your experience, could be sold at that price without causing a serious decline?

Commissioner ANDERSON. You are speaking of Central Pacific stock?

Mr. COHEN. I am speaking of Central Pacific stock.

EFFECT OF PUTTING A LARGE AMOUNT ON THE MARKET AT ONCE.

The WITNESS. There is no doubt that any large amount of stock thrown upon the market at one time would depreciate its value in the market.

Q. I am speaking of this particular stock of the Central Pacific Railroad Company. I understand you to say that it is not an active stock?—A. I did not say that it was not an active stock.

Q. You did not say so? I so understood it.—A. No; I did not say that.

Q. As compared with the stock of the Union Pacific Railway Company, is the Central Pacific stock considered an active stock on the New York market?—A. I do not think that it is considered so active now as it has been in more speculative times.

UNION PACIFIC STOCK MORE ACTIVE THAN SOUTHERN PACIFIC.

Q. Can you state, from your recollection, the relative quantities of the stock of the Central Pacific and the stock of the Union Pacific which are daily or weekly traded in on the New York market? Can you give me the relative figures?

Commissioner ANDERSON. Do you mean this month?

Mr. COHEN. At any time.

A. I think that the Union Pacific stock has always been more active.

Q. Referring to your experience in those matters, can you not more readily sell, without causing any depreciation in the price of the stock, 1,000 shares of Union Pacific stock than 1,000 shares of the Central Pacific?—A. Certainly; at the present time you might.

Q. Has not that been the relative position of those two stocks on the New York market?—A. I think that it generally has been.

Q. I will vary the question. I was referring to sales in a single day. What will be your answer in such a case?—A. My answer was predicated on that.

FINANCIAL STANDING OF PROJECTORS OF CENTRAL PACIFIC.

By Commissioner ANDERSON:

Q. In regard to the credit of Governor Stanford and Mr. Huntington, and Mr. Crocker, and Mr. Hopkins, at the period to which you referred,

you say that they had difficulty in borrowing money. At the early stage of this enterprise were they regarded as men of large private means?—A. They were regarded as men of respectable means and in good credit.

Q. Do you remember about how they were rated in the community at that time? Do you know how much money they were supposed to have in 1861 and 1862?—A. As an illustration, I remember that a short time before the commencement of the road, Governor Stanford was in business, and his credit was then good enough for me up to a hundred thousand dollars, individually. That is, before he went into the railroad.

Q. Do you remember what he was rated at as being worth at that time?—A. I do not know what he would be rated at, but his credit was not doubted for what he wanted.

Q. Were either of these gentlemen rated in those days as being worth over one hundred to one hundred and fifty thousand dollars?—A. I would be unable to say at what they were rated. In general terms, I say that I know that they had good standing, and were in good credit, but I would not exactly know how to go to work to rate them at any special or particular sum.

DIFFICULTY OF BORROWING MONEY DURING CONSTRUCTION.

Q. When you speak of the difficulties of borrowing during the course of this construction, do you refer to their borrowing on their individual credit solely, or do you refer to difficulty even when they had collateral?—A. I refer to their borrowing in every way, on their own credit, on the credit of the road, or any credit they could use. They were generally understood to be borrowers to any amount that they could get while constructing the road.

Q. Do you include in that, that they had difficulty in borrowing money on the Government bonds?

Mr. COHEN. Are you speaking now of war times?

Commissioner ANDERSON. I am speaking of the period from 1866 to 1869.

NO DIFFICULTY IN BORROWING ON GOVERNMENT BONDS.

The WITNESS. Of course there would be no difficulty in borrowing on Government bonds, to the extent of the market here, which was always a limited market for money in those days.

Q. Would there be any difficulty in borrowing on Government bonds in New York, between 1866 and 1869?—A. I should say not.

Q. Did they have any difficulty in borrowing on their first-mortgage bonds, which were prior to the Government bonds, in New York City? I have reference to the bonds which were issued for the construction of the road.—A. My impression is that they always had difficulty in borrowing on the first-mortgage bonds while the road was unfinished, because it never was classed as first-class security.

Q. Was not that difficulty rather as to the percentage than as to borrowing at all?—A. I think that it was not. I think that it was as to borrowing at all on those first-mortgage bonds.

TRANSACTIONS IN FIRST-MORTGAGE BONDS FROM 1866 TO 1869.

Q. Do you know of any transactions in these first-mortgage bonds between 1866 and 1869?—A. I do not know of any transactions here,

and I only know of transactions in New York from hearsay. I do not remember of any transactions here. I may say in this answer that those first-mortgage bonds were not rated here as being especially good in making loans. The loans made by the company were more upon the individual credit of the parties, and their pledges as to their ability to pay, than upon anything else.

Q. Do you know anything about the amount of money that was borrowed here as compared with the amounts that were borrowed in New York?—A. I presume that the amounts borrowed upon these securities in New York must have been much larger than the amounts borrowed here. I am satisfied that the amounts borrowed here were limited only as to what was procurable in the market.

DEPRECIATED PRICE OF GOVERNMENT, FIRST-MORTGAGE, AND COUNTY BONDS.

Q. As a man familiar with financial affairs, is it your deliberate judgment that this corporation had any serious difficulty in borrowing on the Government bonds which it received, between 1866 and 1869, on its own first-mortgage bonds, and on the county bonds that were issued to it to aid it in the enterprise, a sum equal to at least 75 per cent. of the facevalue of all of those securities?—A. In the first place, the county aids, or the aids that they got here, were more or less local, and had to be sold largely in this market, and at a depreciated valuation. Exactly what they got for them I do not know. I am perfectly aware that they were compelled to sell them at considerably under par. It was only after a great effort that they were able to get any movement at all in the first-mortgage bonds of the company. Mr. Huntington went to New York, and he was considered a very shrewd man, to get those bonds started among moneyed men in New York. He did succeed in a small way, after awhile, and it grew. With the exercise of great energy, and I may say using a great deal of talent and ability, he got them started so that he could make use of them. Of course the Government bonds could always be sold at a price. I presume that there was no difficulty with them, but that price was a low one. The bonds issued for the Central Pacific Railroad Company were not considered a first-class Government bond. In the first place, they were currency bonds, and then their issue for this undertaking did not command a price equal to other Government bonds, relatively.

DIFFICULTY OF OBTAINING LOANS ON THEM.

Q. I still repeat the question in which I called your attention to the fact that a very liberal discount is allowed, the figures being $25,000,000 of Government bonds, omitting the bonds issued to the Western Pacific Railroad Company, twenty-five millions of first-mortgage bonds of the road as constructed, and about $800,000 of county bonds—San Francisco bonds, Placer County bonds, and Sacramento County bonds, and one million and a half of the convertible bonds of the company. These were the figures of the different securities which the company controlled between 1866 and 1869. I ask you, from your knowledge of financial matters, whether there was any serious difficulty in this company obtaining by way of loans on the whole amount as much as 75 per

cent. of their face value?—A. I should think that there was. There was great difficulty.

Mr. COHEN. That is, as a loan, you mean?

The WITNESS. As a loan.

VERY SLOW OF SALE.

By Commissioner ANDERSON:

Q. Do you know anything about the prices at which the first-mortgage bonds of the company were sold?—A. No, sir; I do not.

Q. Do you know anything as to the quantity which was sold in 1868 and 1869?—A. I only know that, as I have stated, those bonds at the commencement were very slow of sale, and it was almost impossible to start them, and to make any sales of them at all. That is, I mean the first-mortgage bonds of the road.

Q. To what year are you referring?—A. I am referring to the first issues.

Q. What year?—A. Near the commencement of the road, when the first sections of the road were completed. I refer to the first bonds that were issued.

Q. I am asking you as to the period from 1866 and 1867, after the Government bonds had commenced to be issued, and when the community knew that the Government had agreed to postpone its own bonds so that the company would have the use of the value of its own first-mortgage bonds for the construction of the road?—A. I supposed that those bonds had begun to be issued before the time you mention.

Q. The first bonds were issued in 1865, but I am referring to the sales of the first-mortgage bonds of the company effected in 1866 and 1867, and I ask you whether you know the prices at which those bonds were sold and the amounts which were disposed of?—A. If I did know, I do not now remember the prices at which they were sold.

Commissioner LITTLER. I do not think that it makes a particle of difference as to what amount of these bonds were sold, or the price at which they were sold. That is a totally immaterial issue before this Commission.

Commissioner ANDERSON. There has been a great deal said of the difficulty which these gentlemen had in raising money.

Commissioner LITTLER. Suppose they did have difficulty. What difference does that make to the question before this Commission? For my part, I am willing to concede it. Of course they had difficulty in raising money.

WHAT THE BANK OF CALIFORNIA BOOKS SHOW.

Q. In regard to the accounts of the Bank of California, will you tell us whether your books show, when checks are drawn by depositors in that bank, the names of the indorsers who receive those checks, or who present them for payment?—A. I should think not.

Q. Do you know whether the Bank of California still has in its custody the ledgers containing the accounts of the Contract and Finance Company?—A. I do not.

Mr. COHEN. Mr. Mills is not connected with the Bank of California at this time.

Q. He was at the time of these accounts. How long ago did your connection with the Bank of California cease? It is quite awhile ago, is it not?—A. Yes; a number of years since.

Q. And you have no present knowledge about their books?—A. No, sir.

PROGRESS OF ROAD WHEN WITNESS WAS OFFERED AN INTEREST.

Q. You say that early in the history of this road these gentlemen asked you to take an interest in the enterprise in a general way. Was the nature of the progress they had made in building the road explained to you and the means they had of expecting its completion made fully known to you at that time?—A. I think so; that is, in a general way, and as to the progress of the road, very fully.

Q. How far had the road progressed when that occurred?—A. I received several overtures to go into the enterprise whilst it was being constructed on this side of the mountains, and after it was over the mountains.

WHO WAS DOING THE CONSTRUCTION.

Q. At the period when it was being constructed over the mountains, beyond the boundary of the State, was it explained to you who was doing the construction?—A. I do not know that it was especially. They were all in the work.

Q. With whom was the principal interview?—A. My principal interview was with Governor Stanford.

Q. Was it explained to you at this time that the work was being prosecuted through the intervention of the Contract and Finance Company?—A. I think that it was.

Q. Was it explained to you at this time that Governor Stanford, Mr. Crocker, Mr. Huntington, and Mr. Hopkins were the sole stockholders, and owned all of the stock, in the Contract and Finance Company?—A. I do not know that I ever knew especially about the Contract and Finance Company. I never took that separately into account in any consideration which I had as to being connected with that road.

INTEREST OFFERED IN BOTH CONTRACT AND FINANCE AND CENTRAL PACIFIC COMPANIES.

Q. Was the interest offered you in the Central Pacific, or was it offered you in the Contract and Finance Company?—A. My notion is that it comprised the whole scheme.

Q. Why do you say so, unless you have a distinct recollection, the corporations being distinct?—A. I say so because I would not have entertained it without.

Q. In 1873, at the time of this offer of 80 per cent., was that before or after the declaration of the first dividend of the Central Pacific Railroad Company?—A. I do not remember. It was before the stock had any particular standing, I think, in the market.

HAD ALL THE DATA BEFORE THEM.

Q. Was it explained to you at the time that the earnings of the road were sufficient to pay dividends on the stock?—A. My impression is that we had all the data before us, as to its earnings, and of course we had estimates of what might have been expected in the future.

Q. Is it your recollection that that discussion proceeded upon the theory that the earnings were sufficient to pay a dividend on the stock?—A. Yes, sir.

Q. Was that negotiation reduced to writing?—A. It was reduced to writing.

Q. Have you a copy of the proposal?—A. No, sir; I have not. I never retained a copy.

Q. Do you know who prepared it?—A. My impression is that Mr. Cohen prepared it principally, or largely.

Q. Did you see it after it was prepared?—A. Yes, sir.

Q. Did the paper, as prepared, coincide substantially with the terms you had talked over with Governor Stanford?—A. I talked it over at the time with Mr. Huntington and Mr. Crocker, and all the parties interested.

PRODUCTION OF COPY OF PROPOSAL CALLED FOR.

Commissioner ANDERSON. Mr. Cohen, we would like to see a copy of that, if you have it.

Mr. COHEN. If I have it, I will give it to you. There is nothing private about it, but I do not suppose that I have it.

Commissioner ANDERSON. As you have not produced it in evidence, we would like to see it.

Mr. COHEN. After fourteen years it is possible that I may not be able to find it.

Commissioner ANDERSON. We call for the production of the paper.

Mr. COHEN. I believe that I made a draft of the contract, and if I can find it I will produce it.

The WITNESS. The contract never was completed.

ITS TERMS.

By Mr. COHEN:

Q. Tell us, if you can, in general, what were the terms of this transaction with respect to this 80 per cent. of the stock of the Central Pacific. What were you to give?

The WITNESS. Do you mean to ask the price which we were to pay for it?

Mr. COHEN. We want to know what the bargain was which was discussed by you; that is, its prominent features.

The WITNESS. The bargain was to purchase the Central Pacific Railroad and the various dependencies to it, the details of which I have not in my mind now, it is so long since the affair happened.

Q. Can you state the full amount that was to have been paid?

Commissioner ANDERSON. Mr. Mills will state. Let him have his own time for it.

The WITNESS. We were to pay at the rate of twenty-five millions for the whole. That is my recollection.

By Commissioner LITTLER:

Q. Twenty-five millions for how many shares of stock?—A. At that rate for the whole property.

MR. STANFORD TO RETAIN TWENTY PER CENT. OF STOCK.

By Commissioner ANDERSON:

Q. And were you to have 80 per cent. of what had been issued, and was Governor Stanford to retain 20 per cent.?—A. It was not my purchase entirely. There were other parties associated with me.

Q. I assume that when you say that Governor Stanford was to keep 20 per cent. you mean Governor Stanford and his associates?—A. No, sir.

Q. Do you mean Governor Stanford alone?—A. I mean Governor Stanford alone. I will say as to this contract, it is so long since this transaction took place, and I have hardly thought of it since that time, that I could not give any full explanation of it at the present time. In fact, I could not at any time.

THE PROPERTY OF THE ROAD WENT WITH THE STOCK.

Q. When you say that you were to pay at the rate of twenty-five millions, do you mean that that was to be the price that you were to give, and to include that which Governor Stanford was to keep?—A. My recollection is that that was the rate for the whole property.

Q. What do you mean by the whole property?—A. The Central Pacific and the property that goes with it. I think that there was considerable property that did not belong to the Central Pacific that went with it from these parties.

Q. Of what nature?—A. Connections of the road, and properties in San Francisco.

Q. Do you mean stock of the leased lines?—A. No, sir; connections of the roads in this line, and certain properties in San Francisco, the details of which I cannot give you now. It is so many years since that I cannot remember in order to give you a full report of the agreement.

Q. At any rate, you were to take 80 per cent. of this total interest, and the gross price of the whole was fixed at $25,000,000?—A. That is my recollection.

By Mr. COHEN:

Q. Do you say twenty millions, or twenty-five millions?—A. My recollection is twenty-five millions for the whole. Twenty millions would be our proportion for the whole property.

PROPOSED PURCHASE HAD NO RELATION TO BONDS ALREADY ISSUED.

By Commissioner ANDERSON:

Q. How was this purchase with respect to the question of the bonds that had already been issued—the Government bonds, the first-mortgage bonds, and any other bonds that were outstanding in 1873?—A. It had no relation to these.

Q. Were you to take it subject to those bonds?—A. Yes, sir; we were to take it subject to those bonds.

By the CHAIRMAN:

Q. Were you to take all the property of the Central Pacific Railroad Company, in addition to the road, subject to all liens, at the rate of $25,000,000?—A. The Central Pacific proper, and more or less property outside of that.

Q. All of the property that was thrown in, as consideration for the twenty-five millions, you were to accept, subject to whatever liens were against it; is that correct?—A. Yes, sir.

SALES OF STOCK DEPENDENT ON INFLUENCES ON THE MARKET.

By Commissioner ANDERSON:

Q. In this talk about the stock market, and the ability to sell large blocks of stock at a time, is not that a matter which changes with the

condition of the stock market, with the nature of the stock, and with the period of time during which you undertake to sell such large blocks?—A. Of course it is dependent upon whatever influences there may be on the market.

Q. Will not this change very much from day to day, and will not an answer which should be correct for one period or one year have no relation whatever at another time? Is not that so?—A. To a certain extent.

Q. Would it have been easier to have sold ten thousand shares at any time in the year 1882 than to sell two thousand shares of stock at the present time?—A. I should think it would.

Q. Do you remember what the quotation of the Central Pacific stock was in October, 1886?—A. My recollection would be that in October of last year it was quoted somewhere in the vicinity of $40 per share.

Q. As a general rule, in regard to stocks of which two or three thousand shares are sold in a day, would there be any difficulty in disposing of eighty thousand shares at within 5 per cent. of the market price, if a good house were employed and allowed six months in which to do it?

Mr. COHEN. Are you speaking of the Central Pacific?

Commissioner ANDERSON. I am speaking of the general run of stocks. I will ask about the Central Pacific afterwards.

The WITNESS. That would depend upon so many circumstances that I should say that it would be difficult to answer the question.

LARGER AMOUNTS OF STOCK SELL FOR LOWER PRICE.

Q. Can you answer it any more definitely in regard to the Central Pacific? Suppose the market price of the Central Pacific should be $36 to-day, and I should say to you, "I want you to sell eighty thousand shares of this stock. I will give you six months or a year in which to do it." Would you consider it probable that it could be sold within a range of 5 per cent. of the present price?—A. I should say that it would depend largely upon the reports and prospects of the company in the mean time.

Q. Under some circumstances, would it not happen that the stock would sell above the quotations at the beginning of the transaction?—A. Perhaps so, if they could insure or show increased earnings, and thus give greater confidence.

Q. And in other cases, it would sell at a decreased price?—A. Yes, sir; and everything being equal, I should say that the larger amount of stock would sell at less than would be the price now.

Q. That is, unless the time is extended?—A. Everything being equal I should think that large blocks of stock would have to be sold at a reduction in price.

CAUSE OF FAILURE OF NEGOTIATIONS.

By the CHAIRMAN:

Q. What was the cause of the failure of the negotiation for the purchase of the Central Pacific and the outside property?—A. We did not entirely agree upon the details.

Q. Was the disagreement upon the details of the consideration?—A. It was upon details as to the property which was to be included.

Q. Were the objections upon your part, or upon the part of the people who were selling to you?—A. The objections, I think, were upon my part, and I declined to complete the negotiation.

Q. What objections did you make?—A. One objection was the sufficiency of the property that was to go into the conveyance. This led me to decline and break off the negotiation.

Q. What was the difference between the parties to the negotiations as to the amount of property and the question of sufficiency?—A. I cannot now say exactly what the difference was. There was difference enough to lead to some little dissatisfaction, and it terminated the negotiation which was not completed.

Q. What properties of the Central Pacific were sought to be retained by the Central Pacific people?—A. Not any. It was proposed that all the Central Pacific property should go in.

Q. Did you make yourself acquainted with the early financial condition of the Central Pacific Railroad Company from the reports as they were issued from time to time?—A. Generally.

Q. Did you read the president's reports as he issued them?—A. I presume that I did, but I have no distinct recollection about it.

REPORT OF PRESIDENT OF CENTRAL PACIFIC IN 1865.

Q. Do you recall the report issued in the spring of 1865?—A. I do not.

The CHAIRMAN. I refer to the report in which he states that the financial embarrassments of the Central Pacific are over, and that he could see his way clearly to the end?—A. I do not remember it.

Q. Would such be your general judgment as to the financial condition as given in his report of that date?—A. I certainly would have an opinion about it at the time. I might or might not agree with his opinion.

Q. How would you measure the financial report issued by the president regarding the condition of the finances in 1865?—A. I would measure it by, perhaps, how sanguine I might think that he was.

WELLS, FARGO AND COMPANY.

Q. Are you connected with the firm of Wells, Fargo & Co.?—A. No, sir.

Q. How long have you been connected with it?—A. I am not connected with it now. I have been.

Q. When did you leave the corporation?—A. I resigned from the directory, I think, about three years since.

Q. How long were you connected with it prior to that time?—A. Several years.

Q. Were you connected with it at the time of the organization?—A. With the original organization, no, sir.

Q. Were you connected with it at the time of the reorganization?—A. Yes, sir; I was at the time of the reorganization.

Q. Did you ever serve as president during the early history of Wells, Fargo & Co.?—A. No, sir.

THE PACIFIC EXPRESS.

Q. Were you in the organization of the Pacific Express Company in 1869?—A. Yes, if that was the date.

Q. At that time had you any interest whatever in Wells, Fargo & Co.?—A. No, sir; not at that time.

Q. Was all your interest acquired after the consolidation of the Pacific Express Company with Wells, Fargo & Co.?—A. Yes, sir.

THE CONTRACT AND FINANCE COMPANY.

By Mr. COHEN:

Q. Were you informed at the time of the formation of the Contract and Finance Company—at the time the proposition was made to you to become connected with the construction of the road through that company—of the objects and purposes of its formation; that it was to obtain the assistance of California and Eastern capitalists by offering them stock in the construction company?—A. I do not remember.

Q. Do you remember any statement made to you on that subject by Governor Stanford or Mr. Huntington as to the purpose for which that company was formed?—A. My understanding generally was that it was for the purpose of more easily financing the road. They conceived that it was a better plan on which to construct the road.

Q. Was not their thought that this was the best plan to invite the assistance of capitalists to assist in the work of construction?—A. I do not know that it was.

TERMS OF PROPOSAL TO SELL PART OF CENTRAL PACIFIC STOCK.

Q. I want to call your attention a little further to that proposed contract which the owners of the Central Pacific stock tried to make with you and others in 1873? Was not the entire stock rated, with a view to that contract, at $20,000,000, and the 80 per cent. that you were to purchase was 80 per cent. of that amount?—A. That might have been the case. I may have gotten the figures confused.

Q. Was not one of the terms of the contract that the owners of the stock, Governor Stanford, Mr. Huntington, and Mr. Hopkins, should pay all the floating debt of the company, and deliver the stock to you, subject only to the bonded liens of the company?—A. That is my impression.

Q. At that time, I understand that Charles Crocker had no interest in the corporation, having sold out his stock to Messrs. Huntington and Hopkins. Is that your recollection?—A. I believe so.

Q. In that proposed contract of 1873, was not the property included, that which Charles Crocker had sold to his associates as well as the property belonging to Messrs Huntington and Hopkins?—A. I do not remember distinctly if that was the case.

Q. That is not fixed on your mind?—A. No, sir.

D. O. MILLS.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Wednesday, August 17, 1887.

RICHARD F. STEVENS, being duly sworn and examined, testified as follows:

By Commissioner ANDERSON:

Question. What is your occupation?—Answer. I am an expert accountant.

Q. How long have you been engaged in that business?—A. About thirty years.

Q. Have you been familiar with the business of examining the accounts of railroads?—A. I have.

CHARACTER OF ACCOUNTANT WORK.

Q. State what large work of that character you have done.—A. I originated the general accounts of the old New Jersey railroads, called the United New Jersey Railroad and Canal Companies. I started them, and remained as auditor of that concern until it was leased by the Pennsylvania road. After that I took up the business of a general accountant. I think that the first work that I did was to examine Jay Gould's accounts on the New Jersey Southern Railroad. Since then I have done work on a great many railroads in New Jersey. I have been employed by the Pennsylvania Railroad frequently in the examination of certain of their accounts; and, latterly, I have examined for the State of New Jersey the accounts of the Delaware, Lackawanna and Western Railroad Company.

Q. So that you are perfectly familiar with all the various forms of keeping a set of railroad accounts?—A. I think that I am.

Q. In what have you been engaged in the last five or six weeks in regard to the books of the Central Pacific Railroad Company?—A. I have been engaged in making an abstract of their accounts from the vouchers, and from their general books, where it was necessary going into the minor books and statements.

Q. Commencing at the inception of their transactions?—A. Commencing at the inception of the road.

Q. How far have you prosecuted that inquiry?—A. I am now at the close of 1870.

Q. Have you examined what the books show in regard to the construction of the Central Pacific Railroad from section 1 to section 138?—A. I have.

COST OF CONSTRUCTION OF CENTRAL PACIFIC BY SECTIONS.

Q. Have you prepared a statement showing that construction by sections and the cost of it to the Central Pacific?—A. I have that statement prepared as to the cost paid to the contractors.

Q. Do you mean as to the amount paid by the company to the contractors?—A. To the contractors, with one single additional exception, which the company paid direct.

Q. Please produce that statement.

(The paper was marked "Exhibit No. 4, August 17, 1887," and is as follows:)

Statement showing payments made to Charles Crocker & Co. upon contracts for constructing the Central Pacific Railroad in 1863 and to 1868, inclusive.

Date.	Items.	Voucher No.	Amount.	Total.
1863.	*Sections 1 to 18.*

RECAPITULATION.

Paid C. Crocker & Co. in—	
1863	270,189.82
1864	337,338.70
1865	2,963,837.50
1866	4,568,711.12
1867	4,929,019.90
1868	1,190,527.60
Total	13,657,624.73

Note A.—The first 138 sections of construction were built by contractors, as follows: Sections 1 to 8, C. Crocker & Co.; 19 to 20, C. Crocker & Co. and Collins & Bro.; 21 to 24, Turton, Knox, and Ryan; 25 to 27, C. D. Bates; 28 and 29, S. D. Smith; 30 and 31, 32 to 54, 55 to 92, 93 to 138, C. Crocker & Co.

Note B.—Analysis shows that upon these contracts Crocker & Co. received:

In cash, ⅞	$8,536,615.46
In stock and bonds, ⅛	5,121,009.27
Total	13,657,624.73

Note C.—From the beginning in 1863 until the close of April, 1866, C. Crocker & Co. took the capital stock of the company in payments on contracts at the rate of 50 cents on the dollar. Beginning with May, 1866, and until the close of 1868, they took it at the rate of 30 cents on the dollar.

CONSTRUCTION FROM SECTION 1 TO SECTION 138.

The WITNESS. This is a general statement of the construction from section 1 to section 138. It includes the C. Crocker & Co. contracts, and some smaller contracts.

Q. What is this which I now show you?—A. It is a recapitulation of the statement already produced and on file, and sundry explanatory statements.

(The paper was marked "Exhibit No. 5, August 17, 1887," and is as follows:)

RECAPITULATION.

	Total	57. 983. 32

Materials furnished Charles Crocker by Central Pacific Railroad.

In 1863, sections 1 to 18	$323. 39
In 1864, sections 1 to 18	4. 60
Total	328. 39

Amount allowed Charles Crocker for extra work on his contracts, Central Pacific Railroad.

The board of directors, by resolution adopted May 12, 1867, allowed him for extra work... $296, 504. 31

Statement showing amount paid Charles Crocker in gross on each contract, Central Pacific Railroad Company.

On sections—	
1 to 18	$400,000.00
19 and 20	15,226.25
21 and 21	77,137.42
23 to 54, inclusive	1,393,134.60
55 to 92, inclusive	7,047,012.06
97 to 138, inclusive	4,725,115.00
Gross amount paid C. Crocker	13,657,624.73

RECAPITULATION.

Total amount paid Charles Crocker & Co. on his contracts and for extra work:	
Cash, or its equivalent, including materials furnished him	$8,853,117.93
Bonds, taken at par value	100,000.00
Stock, taken at par value	57,980.22
Stock, taken at 50 cents on the dollar	2,696,200.00
Stock, taken at 30 cents on the dollar	11,947,530.00
Total	23,654,828.15

TOTAL CASH PAYMENT.

By Commissioner ANDERSON:

Q. Can you state from the papers which you have produced what was the total cash payment to Charles Crocker & Co. for the construction done by that firm between section 1 and section 138?—A. I can.

Q. Please state the total cash payment?—A. They received in cash $8,536,015.46.

TOTAL SHARES OF STOCK.

Q. Can you state the total amount of shares of stock which were issued to Crocker & Co. for this same work?—A. The total amount at par value of stock was $14,801,710.22. There was a difference between Mr. Miller and myself, caused by the fact that he did not include the stock for the first eighteen sections.

AMOUNT OF BONDS.

Q. How much in bonds was issued?—A. I think only a hundred thousand dollars' worth.

Q. Will you please give the stock, net taking out the bonds, so that we can have the amount of stock issued?—A. The stock issued would be $14,701,710.22, at par.

CONSTRUCTION ACCOUNTS, SECTION 138 TO PROMONTORY POINT.

Q. Have you also prepared a statement of the construction accounts, showing the payments by the Central Pacific Railroad Company in money or in stock to the Contract and Finance Company, from section 138 to Promontory Point?—A. I have. The account of the Contract and Finance Company begins on December 4, 1867, with some small payments. The first large payment that was made to it was on July 2, 1868. That was a payment of 8,600 shares of stock. The next large payment was cash. On August 12, 1868, $2,040,225.14, and on the same day a smaller item of $70,687.50.

Commissioner ANDERSON. There is no occasion for going over the items. You can put the papers in evidence.

Colonel HAYMOND. We just want the grand total.

Commissioner ANDERSON. That is all.

The WITNESS. The payments continue through the year 1868 as contained in the statement which I produce.

Q. Will you give the total?

A. The statement consists of credits for construction and other items to the Contract and Finance Company, amounting in all to $16,729,824.91, and of debits for payments amounting to $16,904,854.76.

OVERPAYMENT TO CONTRACT AND FINANCE COMPANY.

By Commissioner ANDERSON:

Q. They were overpaid a little, were they not?—A. They were overpaid $175,029.85.

Q. The balance against them at the end of the year, then, was $175,029.85?—A. Yes. The statement also contains a sheet entitled, "Notes on Contract and Finance Company's account," which contains a statement of the contractor's contract, as I have gathered this contract from the entries in the books.

Q. The entries in the account now produced by you contain, as I understand it, all the entries of the dealings under this contract from the time that it was made in 1867 up to the end of this account?—A. It does.

By the CHAIRMAN:

Q. Does that close the account of the Contract and Finance Company?—A. No.

Q. Up to what period was it carried?—A. December 31, 1868.

(The paper was marked Exhibit No. 6, August 17, 1887, and is as follows:)

Account current of the Contract and Finance Company with the Central Pacific Railroad Company of California to December 31, 1868.

NOTES ON CONTRACT AND FINANCE COMPANY'S ACCOUNT.

On December 3, 1867, the board of directors of the Central Pacific Railroad Company entered into an agreement with the Contract and Finance Company for the construction of a certain part of the road. The original contract is missing and no copy can be found.

The minutes of the board of directors, December 3, 1867, reads:

"*Resolved*, That this company hereby consents and agrees with the Contract and Finance Company to the terms, stipulations, and conditions of the articles of agreement submitted by the president to this board, and the president and secretary are hereby authorized and directed to execute the said contract on behalf of this company, and to attach the corporate seal thereto."

Entries on the books in 1868 indicate the following details:

(1) The Contract and Finance Company were apparently to construct and equip the road for $48,000 per mile, payable half in gold and half in capital stock of the railroad company, and also to provide the necessary sidings. (2) The rails were to weigh 88 tons per mile. (3) The spikes, 5,200 pounds per mile. (4) Splice joints, 375, of 17 pounds each, per mile. (5) Bolts, 4 to each joint. (6) Locomotives, 1 for each 5 miles. (7) Passenger cars, 1 for each 30 miles. (8) Box cars, 1 for each mile. (9) Flat cars, 2 for each mile. (10) Hand cars, 1 for each 6 miles. (11) The specification and quality of the other work required by the contract is not yet shown by the books.

STATEMENT OF MATERIAL FURNISHED.

By Commissioner ANDERSON:

Q. Will you please produce your next statement relating to the Contract and Finance Company?—A. The next statement is for the year 1869, the year in which the contract work was closed. This statement contains the items charged to the Contract and Finance Company during the year 1869 for material furnished to it, cash payments made to it, and stock issued to it. It also contains the credits to the Contract and Finance Company for construction and for other items stated in the credit account; the total of the charges to the Contract and Finance Company being $32,615,452.49, and the total credits to the company being $34,618,004.97.

(The paper was marked "Exhibit No. 7, August 17, 1887," and is as follows:)

CHARGES TO CONSTRUCTION IN 1868 AND 1869.

By Commissioner ANDERSON:

Q. In connection with this construction account, what are the two sheets which you now produce?—A. They are the amounts which were charged to construction during the years 1868 and 1869 on the books of the Central Pacific Railroad Company.

(The paper was marked Exhibit No. 8, August 17, 1887, and is as follows:)

Statement showing main features of the construction account of the Central Pacific Railroad Company of California for 1868 and 1869.

1868.

Purpose for which expended.	Amount.	Total.
Paid Contract and Finance Company:		
In stock	$8,256,000.00	
In cash	8,256,000.00	
		$16,512,000.00
Paid Chas. Crocker & Co.:		
In stock, at 30 cents on $1	1,041,670.00	
In cash	1,190,527.69	
		2,232,197.69
Paid for iron and superstructure		2,077,000.00
Paid on cashier's vouchers:		
January	29,036.52	
February	43,707.24	
March	53,365.76	
April	34,321.78	
May	32,742.90	
June	28,856.16	
July	32,245.34	
August	58,163.53	
September	69,826.46	
October	85,509.89	
November	78,586.59	
		546,382.47
Paid for building snow-sheds		200,000.00
Expense account, including salaries and C. P. Huntington's accounts and extraordinary expenses, and the expenses of Fisk & Hatch in advertising and selling bonds		525,000.00
Sacramento wharf No. 1	48,589.89	
Sacramento wharf No. 2	126,597.79	
		175,187.38
Buildings, shops and machinery, and engineering		500,000.00
Passenger freight		95,000.00
Marine insurance		158,484.81
Sundry items incidental to construction proper		1,025,488.66
Total cost of construction		24,046,742.01

Statement showing main features of the construction account of the Central Pacific Railroad Company of California for 1868 *and* 1869—Continued.

1869.

Purpose for which expended.	Amount.	Total.
Paid Contract and Finance Company for constructing 360 miles of railroad	$30,960,000.00	
Paid Contract and Finance Company for extra work in building snow-sheds and sinking artesian wells	680,924.17	
		$31,640,924.17
Paid Union Pacific Railroad Company and Contract and Finance Company in bonds		2,970,000.00
Paid interest		426,665.57
Paid salaries—expense account of C. P. Huntington and incidentals		426,665.00
Paid on cashiers' vouchers		853,775.00
Paid Pacific Telegraph		40,000.00
Paid Marine Insurance		240,000.00
Paid for engineering		40,000.00
		36,736,969.74
Less credits for materials furnished the Contract and Finance Company over that purchased		2,886,544.00
Total cost of construction		33,849,425.74

By Commissioner ANDERSON:

Q. What work does it appear from the books of the Central Pacific Railroad Company that the Contract and Finance Company continued to do for the Central Pacific during the years 1870 and 1871?—A. It was construction work of an outside character, like laying track and furnishing ties on the Sacramento Valley Railroad to Brighton, building snow-sheds, the construction of the Western Pacific Railroad, and tems of a like character.

ACCOUNTS CURRENT BETWEEN THE COMPANIES.

Q. Have you prepared a statement showing the accounts current between the companies for the years 1870 and 1871?—A. I have, and produce the same. I now produce the accounts for 1870. The total items credited to the Contract and Finance Company aggregate $8,192,225.86, and the total amount of debits to the Contract and Finance Company for cash payments and other items of debit amount to $6,910,725.86, leaving a balance due, as stated on the books of the Central Pacific, in stock, of $1,281,500 at the close of 1870.

By Mr. COHEN:

Q. Due by whom?—A. Due by the Central Pacific to the Contract and Finance Company.

By Commissioner ANDERSON:

Q. Do the books show what stock that was; what that last entry refers to?—A. I do not think they do. I think that is the statement as it appears upon the books. I think that is all it says—"balance of stock due." A statement could easily be made, showing what that was for.

(The paper was marked Exhibit No. 9, August 17, 1887, and is as follows:)

Account current of the Contract and Finance Company with the Central Pacific Railroad Company of California for the year 1870.

Date.	Items.	Dr.	Cr.

1—	By construction of 26.15 miles of railroad and telegraph on the California and Oregon branch, from the 77.6 mile to the 103.75 mile, the whole distance of the line from junction at Roseville to a point opposite Tehama (see minutes of the California and Oregon Railroad Company, p. 42): Capital stock $784,500.00 Cash 522,000.00		1,307,500.00
—	By cash bills paid for repairs		69,057.01
31	By balance due in cash		307,730.15
31	To cash and cash items for December	673,894.65	
31	To balance of stock due	1,291,500.00	
	Total	8,192,225.86	8,192,225.86

By Commissioner ANDERSON:

Q. It appears from the accounts referred to in this statement that for some of the construction stock of the Central Pacific Railroad Company was issued and paid to the Contract and Finance Company in that year, does it not?—A. Yes. I think that the voucher for that is missing. I think that it is up here with the Commission.

Q. All the charges to the company for stock and bonds I understand to be stated at par in these accounts. Is that correct?—A. The cash was gold, and the stock was par; half and half.

ACCOUNT CURRENT BETWEEN CONTRACT AND FINANCE COMPANY AND RAILROAD COMPANY.

I also produce the account current between the Contract and Finance Company and the Central Pacific Railroad Company for the year 1871. The total of items credited to the company, including the balance from

the last account and construction and repair items, is $6,506,545.27; and the total of debits to the company for cash and stock payments is $8,770,446.16.

The balance against the Contract and Finance Company at the close of that year was $2,263,900.89.

(The paper was marked Exhibit No. 10, August 17, 1887, and is as follows:)

	Total	8,770,446.16	8,770,446.16

AYMENT TO UNION PACIFIC ON WORK FROM PROMONTORY POINT TO POINT NEAR OGDEN.

By Commissioner ANDERSON:

Q. Have you a statement of the amount paid to the Union Pacific Railroad Company for so much of the road as extends from Promontory Point to the point near Ogden?—A. I have. It is in the general balance-sheet, I think, for 1868. The total amount paid by the Central Pacific to the Union Pacific amounted to $2,138,000—$800,000 in cash and $1,338,000 in bonds.

Commissioner LITTLER. Was that in Government bonds?

The WITNESS. That was in Government bonds.

AYMENTS TO WESTERN DEVELOPMENT COMPANY FOR WORK ON NORTHERN RAILWAY.

By Commissioner ANDERSON:

Q. Have you prepared a statement from the books of the Western Development Company showing the payments to that company for the construction of so much of the Northern Railway as was constructed by that company?—A. I have, and produce the same. Each branch or contract is stated separately, and a general statement of the general credits is deducted from the total of the profit and loss.

Commissioner ANDERSON. That does not explain to us the cost of the construction. Take the profit and loss afterwards. I do not understand what you mean by the general deduction of the profit and loss.

The WITNESS. Each contract was kept separately in the books.

Q. Can you not state the cost of the construction under each contract separately?—A. Certainly. The Berkeley contract was for the construction of the road from Oakland to Martinez, 31.26 miles; and from Shell Mound to Berkeley, 3 miles; total, 34.26 miles. The cost was $1,279,686.79. The Benicia Branch contract was for the contract of the road from Benicia to Fairfield, 16.99 miles. The cost was $600,383.83. The balance of the contract, extending from Williams to Willows, a distance of 25.62 miles, cost $353,733.37. The Northern Railway contract, which included the Williams Branch, extending from Woodland to Williams, 39.2 miles, cost of construction, $809,251.12. The Berkeley siding, 4.68 miles, cost $81,694.27. This was the total cost of the individual contracts, but they had a general account in which there were certain credits and debits amounting, for the balance of the year, on the credit side, to $105,030.50, which would decrease the actual cost of the road and increase the profit and loss account.

ACTUAL COST OF THE ROAD.

Q. Please state the actual cost of the road, without loss and profit. Give us the net cost of the road.—A. I have not got it together. I have each road separately.

Q. Have you figured the interest in the account which you have given us?—A. I have.

Q. Did you include it as part of the cost?—A. Yes. The total cost of construction of these branches amounted to $3,019,718.88.

Q. What interest have you included in the estimate of the cost?—A. I have included the interest on the construction of the work up to the time that they received their first payment in stock or bonds. After that, the interest ceased.

Q. Is that the way you find it entered on their books?—A. Yes.

Q. What consideration does it appear that the Western Development Company received for this construction?—A. They received $4,810,500 in stock at par.

Q. In stock of the Northern Railway?—A. No. They received $4,710,500 of stock of the Northern Railway Company, and $100,000 stock of the Berkeley Branch Railroad Company. They also received $100,000 bonds of the Berkeley Branch, and $3,148,000 bonds of the Northern Railway; a total of stock and bonds of $8,058,500.

By Mr. COHEN:

Q. The result of all these statements is that when the Western Development Company built these roads it owned them. It owned all the stock and all the bonds; is that not so?—A. Yes; it owned them.

(The paper was marked "Exhibit No. 11, August 17, 1887," and is as follows:)

Statement of the Northern Railway Company. Cost of construction under contract.

BERKELEY CONTRACT.

1878. April 30.	Construction to date	$1,090,387.20		
	Interest on construction	189,299.59		
			$1,279,686.79	
	Profit and loss on Berkeley contract		813,097.71	
				$2,092,784.50

(31.2649 miles, Oakland to a point near Martinez; 3 miles, Shell Mound to Berkeley.)

BENICIA BRANCH CONTRACT.

1880. Aug. 31.	Construction to date	$555,314.09		
	Interest on construction	45,[illegible]		
			[illegible]0,383.83	
	Profit and loss on Benicia Branch		1,113,968.17	
				1,714,352.00

(16.9000 miles, Benicia to Fairfield.)

WILLOWS CONTRACT.

1879. Aug. 30.	Construction to date	$348,236.99		
	Interest on construction	5,496.38		
			353,733.37	
	Profit and loss on Willows Branch		1,311,397.63	
				1,665,131.00

(25.6174 miles, Williams to Willows.)

NORTHERN RAILWAY CONTRACT.

1879. May 31.	Construction to date	$713,373.53		
	Interest on construction	95,877.59		
			809,251.[illegible]	
	Profit and loss on Northern Railway contract		1,577,748.[illegible]	
				2,387,000.00

(39.2000 miles, Woodland to Williams.)

BERKELEY SIDING (4.681 MILES).

1878. Dec. 31.	Construction to date	$79,881.75		
	Interest on construction	1,812.52		
			81,694.27	
	Profit and loss on Berkeley siding		202,470.73	
	Rolling stock not furnished*		20,100.00	
				304,265.00
				8,150,350.50

Credit.

By sundry credits to general account of Northern Railway Company	*168,594.90	
Less debits of Northern Railway Company	63,564.40	
		105,030.50
Amount of construction and profit and loss		8,058,500.00

The profit and loss account assumes that the stock and bonds taken at par were worth their face value.

*The "rolling stock not furnished" is credited back in the item of $168,594.90.

Total issue of stock and bonds of the Northern Railway and Berkeley Branch.

STOCK.

1877. Nov. 15.	Berkeley Branch, 1,000 shares at $100, par value	$100,000
1878. April 17.	Northern Railway Company, 27,891 shares at $100, par value	2,798,100
1879. July 26.	Northern Railway Company, 19,124 shares at $100, par value	1,912,400
		4,810,500

BONDS.

1877. July 17.	Berkeley Branch, 100, par value $1,000	100,000
1878. July 17.	Northern Railway, 1,406	1,406,000
1879. Jan. 14.	Northern Railway, 234	234,000
15.	Northern Railway, 135	135,000
Feb. 10.	Northern Railway, 500	500,000
27.	Northern Railway, 65	65,000
May 19.	Northern Railway, 38	38,000

1880. Feb. 13.	Northern Railway, 148	148,000
		3,248,000
		8,058,500

The Northern Railway and Berkeley Branch Railway were built under the Berkeley contract.

	Miles.
From Oakland to Martinez	31.2649
From Shell Mound to Berkeley	3.
The Benicia Branch contract, from Benicia to Fairfield	16.99
The Northern Railway contract, from Woodland to Williams	39.2
The Willows contract, from Williams to Willows	25.6174
The Berkeley siding	4.681
Total distance	120.7533

The road from Fairfield to Woodland, making the continuous route, was built by the California Pacific Railroad Company, and belongs to the California and Pacific Railroad Company.

COST OF CONSTRUCTION OF SAN PABLO AND TULARE RAILROAD.

By Commissioner ANDERSON:

Q. Have you prepared a statement showing the cost of construction of the San Pablo and Tulare Railroad?—A. I have, and produce the same. It appears from this statement that the total amount paid for the construction of this road was $1,043,438.17; interest on the same, $113,672.57; total, $1,157,140.74. This road extends from near Martinez to Tracy, a distance of 46.52 miles.

Q. What consideration was received by the Western Development Company for that construction?—A. The consideration was 18,610 shares of the capital stock, $1,861,000.

Q. Of what company?—A. The San Pablo and Tulare Railroad Company; and 1,023 bonds, amounting to $1,023,000, and a cash item of $116; total, $2,884,116.

(The paper was marked Exhibit No. 12, August 17, 1887, and is as follows:)

San Pablo and Tulare Railroad Company.

COST OF CONSTRUCTION.

1881. June 30.	Construction to date	$1,043,468.17	
	Interest on construction to date	113,672.57	$1,157,140.74
	Profit and loss account		1,726,975.26
			2,884,116.00

SECURITIES ISSUED FOR ABOVE.

1879. July 26.	18,610 shares capital stock, $100 per share, par	1,861,000.00
1880. April 28.	500 bonds, 1 to 500, at $1,000, par	500,000.00
June 11.	523 bonds, 501 to 1,023, at $1,000, par	523,000.00
Jan'y 31.	Credit on account	116.00
		2,884,116.00

The profit and loss is made up by rating stock and bonds at par value.

COST OF CONSTRUCTION OF AMADOR BRANCH.

By Commissioner ANDERSON:

Q. Have you prepared a statement showing the cost of construction to the Western Development Company of the Amador Branch Railroad?—A. I have, and produce the same.

Q. State the cost of construction and the consideration received.—A. The cost of construction was $341,896.56, interest $38,753.08, making a total of $380,649.64.

Q. How was this paid for?—A. Six hundred and seventy-five gold bonds, $675,000; and the capital stock, $648,000.

Q. Of the Amador Branch Railroad?—A. Yes; and cash $27,000.

Q. Will you state where the road is?—A. This road extends from Galt to Ione, a distance of 27 miles.

(The paper was marked "Exhibit No. 13, August 17, 1887," and is as follows:)

Amador Branch.

LIABILITIES.

1877.		
July 6.	675 gold bonds of $1,000 each, par value	$675,000.00
Oct. 8.	Capital stock, par value	648,000.00
8.	Cash on account	27,000.00
		1,350,000.00

ASSETS.

1877.		
Oct. 8.	Completed road	1,350,000.00

COST OF CONSTRUCTION.

1877.	Construction voucher for grading, iron superstructure, and completing road, without equipment, from 1875 to 1878	341,896.56
	Interest on construction to September 30, 1877	38,753.08
	Total amount charged to construction	380,649.64
	Amount carried to profit and loss to credit of Western Development Company	969,350.36
		1,350,000.00

SECURITIES ISSUED FOR THE ABOVE.

1877.		
July 6.	675 gold bonds, $1,000 each, par value	675,000.00
Oct. 8.	Capital stock, par value	648,000.00
8.	Cash on account	27,000.00
		1,350,000.00

There were no extraordinary expenses in the construction account. This road extends from Galt to Ione, a distance of twenty-seven miles.

COST OF CONSTRUCTION OF SOUTHERN PACIFIC, OF CALIFORNIA.

By Commissioner ANDERSON:

Q. Have you prepared a statement showing the cost of construction to the Western Development Company of the Southern Pacific Railroad in the State of California?—A. I have, and produce the same.

Q. Will you please state the cost of construction, and the consideration received for the same?—A. The Southern Pacific Railroad includes the Colorado contract, the San Bernardino contract, the San Fernando contract, the Sumner contract, the Goshen contract, and the main line. The cost of construction of all was $11,410,227.11. The interest was $480,499.50, making a total of $11,896,726.61.

The WITNESS. You do not want the stock and bonds in detail, do you?

Commissioner ANDERSON. No; we want the totals.

The WITNESS. The amount of bonds was $14,576,000.

Q. Do you mean bonds of the Southern Pacific Railroad?—A. Yes. The stock was $14,576,700. The cash was $820.

Q. What is the mileage?—A. The road extends from Sumner to San Fernando, 140 miles; from Spadra to the Colorado River, 224.90 miles; and from Hurin to Goshen, 40 miles; total, 404.90 miles.

(The paper was marked Exhibit No. 14, August 17, 1887, and is as follows:)

Southern Pacific Railroad Company (of California).

COST OF CONSTRUCTION.

1877.		
July 31.	Colorado contract	$1,062,270.45
31.	San Bernardino contract	1,289,247.16
31.	San Fernando contract	1,471,471.83
31.	Sumner contract	3,322,234.43

Nov. 15.	38,376 shares, $100, par value	3,837,600.00
1877.		
Mar. 1.	14,400 shares, $100, par value	1,440,000.00
July 16.	42,591 shares, $100, par value	4,259,100.00
	Cash to balance account	820.00
		29,153,520.00

The vouchers for expense comprised in these contracts are mostly made up of state units of accounts from the auditor's and treasurer's departments, certified as to their correctness by the secretary, A. C. Irwin, and calculations examined by examining clerk. It would be impossible in the limited time to go over each individual voucher, but they are all evidently such items as would be incurred in building the road, such as grading, iron and superstructure, ties, lumber, supplies, &c.

Bonds and stock above are rated at par value.

Southern Pacific Railroad Company (of California) extends from—

	Miles.
Sumner to San Fernando	140
Spadra to Colorado River	224.91
Hurin to Goshen	40
	404.91

COST OF CONSTRUCTION OF SOUTHERN PACIFIC OF ARIZONA.

By Commissioner ANDERSON:

Q. Have you prepared a statement showing the cost of construction of the Southern Pacific Railroad of Arizona?—A. I have, and produce the same. The Southern Pacific Railroad of Arizona extends from the east end of the Colorado bridge, at Yuma, to the New Mexico line, a distance of 384.17 miles. The cost of construction was $6,718,222.17. The interest was $285,637.92. The total was $7,003,860.09. Stock and bonds were issued; bonds, $9,604,000; stock, $9,995,000; balance due on bonds, $250 cash.

Q. Were the bonds the bonds of this same company?—A. Yes.

(The paper was marked Exhibit 15, August 17, 1887, and is as follows:)

ARIZONA CONTRACT.

Cost of construction of the Southern Pacific Railroad Company of Arizona, from the east end of the Colorado River Bridge, Yuma, to the New Mexico line, 384.17 miles.

1885.			
Dec.	31.	Cost of construction	$26,718,222.11
	31.	Interest on above	285,637.92
			7,003,860.03
	31.	Balance carried to profit and loss	22,595,389.91
			29,599,250.00

STOCK AND BONDS ISSUED FOR ABOVE.

1880.			
Dec.	31.	500 bonds, Series A, 1 to 500, $10,000 each, par value	$5,000,000.00
		1,000 bonds, Series A, 1 to 1000, $1,000 each, par value	1,000,000.00
		300 bonds, Series B, 501 to 800, $10,000 each, par value	3,000,000.00
		604 bonds, Series B, 1001 to 1604, $1,000 each, par value	604,000.00
			9,604,000.00
Oct.	31.	99,950 shares capital stock Southern Pacific Railroad Company of Arizona	9,995,000.00
Nov.	23.	100,000 shares capital stock Southern Pacific Railroad Company of Arizona, $100 each, par value	10,000,000.00
		Balance due on bonds to Pacific Improvement Company	250.00
			29,599,250.00

The amended contract dated 16th and 22d days of November, 1880, provides, that the Pacific Improvement Company shall build and equip a single-track road with proper sidings, buildings, turntables, and everything necessary for a first-class road, and receive for doing so all the capital stock, less 50 shares, viz, 199,950 shares, at $100 each, say $19,950,000, and first mortgage bonds to the extent of $25,000 per mile of road built, the road extending 384.17 miles; the amount of bonds issued to the Pacific Improvement Company was $9,604,000, showing a balance due them of $250.

The vouchers are mostly auditor's and treasurer's settlements and statements, and the expenses appear to be correct, and such as would be proper in the construction of a road of this character.

The profit and loss account assumes that the stock and bonds taken at par were worth their face value, regardless of their actual value.

COST OF CONSTRUCTION OF SOUTHERN PACIFIC OF NEW MEXICO.

By Commissioner ANDERSON:

Q. Have you prepared a statement showing the cost of construction of the Southern Pacific Railroad of New Mexico?—A. I have, and produce the same. Under the New Mexico contract, the road was extended from the boundary line between New Mexico and Arizona to the west end of the Rio Grande bridge, a distance of 167.22 miles. The cost of construction was $3,604,360.53; interest, $45,211.67; total, $3,649,572.20. Stock and bonds were issued for the above as follows: Bonds, $4,180,000; stock, $6,688,800. Balance cash due on bonds, $500.

(The paper was marked Exhibit 16, August 17, 1887, and is as follows:)

NEW MEXICO CONTRACT.

Cost of construction of the Southern Pacific Railroad Company of New Mexico, extending from the boundary line of New Mexico and Arizona to the west end of the Rio Grande bridge, 167.22 miles.

1884.			
Dec.	31.	Cost of construction	$3,604,360.53
		Interest on above	45,211.67
			3,649,572.20
		Balance carried to profit and loss	7,219,727.80
			10,869,300.00

STOCK AND BONDS ISSUED FOR ABOVE.

1881.			
Aug.	31.	4,180 bonds of $1,000 each, par value	4,180,000.00
		66,888 shares capital stock, $100 each, par value	6,688,800.00
		Balance due on bonds to Pacific Improvement Company	500.00
			10,869,300.00

The contract dated November, 1880, provides that the Pacific Improvement Company shall build and equip a single-track road, with proper sidings, buildings, turntables, and everything necessary for a first-class road, and receive for doing so $25,000 a mile in first-mortgage bonds and $40,000 a mile in capital stock. The road extends 107.22 miles. The amount of bonds issued to the Pacific Improvement Company was $4,180,000, showing a balance due them of $500, and $6,688,800 of stock was also issued.

The vouchers are mostly auditor's and treasurer's settlements and statements, and the expenses appear to be correct, and such as would be proper in the construction of a road of this character.

The profit and loss account assumes that the stock and bonds, taken at par, were worth their face value, regardless of their actual value.

COST OF CONSTRUCTION OF COLORADO RIVER BRIDGE.

By Commissioner ANDERSON:

Q. Have you prepared a statement showing the cost of construction of the Colorado River bridge?—A. I have, and produce the same. The Colorado River bridge was 700 feet long. It was a bridge across the Colorado River at Yuma. It was built by the Western Development Company, and completed November 1, 1878, at a cost of $39,913.39. March 31, 1879, it was sold to the Pacific Improvement Company at cost, and that company expended upon it in riprapping and maintenance $20,087.41; rebuilding it in 1885, $77,327.06; and rebuilding it again in 1886, $68,802.59. It stands upon the books of the company at $206,130.45.

Q. Does this include all repairs and rebuilding?—A. Yes.

Q. Were you informed of the circumstances which caused it to be necessary to rebuild the bridge?—A. I was, generally.

Commissioner ANDERSON (to Mr. F. S. Douty). Mr. Douty, what were the causes of the destruction of this bridge?

BRIDGE DESTROYED BY FIRE AND FLOOD.

Mr. DOUTY. The bridge was washed out the first time, and the second time it was burned.

Commissioner ANDERSON. Were the washout and the destruction by fire at the same time or immediately preceding the charges for rebuilding?

Mr. DOUTY. The charge for rebuilding in each case succeeded the washout and the burning out. They were a year apart.

Commissioner ANDERSON. How long after the washout was it rebuilt? It was not as late as four or five years, was it?

Mr. DOUTY. It was rebuilt as soon as possible. We were probably a month in rebuilding the bridge.

Commissioner ANDERSON. The point that I want to know was whether the rent of $12,000 per annum, which was paid after the original construction, was paid up to the time of the first destruction?

Mr. DOUTY. It was paid up to the time of the first destruction, and then it was suspended.

Mr. HAYMOND. Was not the second destruction incendiary and the first destruction caused by the nature of the stream?

Mr. DOUTY. Yes, sir.

Commissioner LITTLER. Was it not insured; did you get any insurance?

Mr. HAYMOND. No, sir; the company never insures anything.

Commissioner ANDERSON. I understand that they are their own insurers.

(The paper was marked "Exhibit 17, August 17, 1887," and is as follows:)

Cost of construction of the Colorado River bridge, 700 feet long, August 16, 1887.

The bridge across the Colorado River at Yuma was built by the Western Development Company, and completed November 1, 1878, at a cost of $39,913.39.

March 3, 1879, the Western Development Company sold the bridge to the Pacific Improvement Company at cost.

The account against the bridge stands as follows:

Cost to March 31, 1879	$39,913.39
Cost riprapping and maintenance to January, 1885	20,667.41
Cost rebuilding, May, 1885	77,327.66
Cost rebuilding, July, 1886	68,682.39
Investment of Pacific Improvement Company to date	206,130.45

COST OF CONSTRUCTION OF CALIFORNIA AND OREGON ROAD FROM DELTA TO STATE LINE.

By Commissioner ANDERSON:

Q. Have you prepared a statement showing the cost of the construction of the California and Oregon road from Delta to the north line of the State by the Pacific Improvement Company?—A. I have, and produce the same. The California and Oregon Division of the Central Pacific, extending from Delta to the State line, is 104 miles long. The entire length of the division north of Roseville is 191.87 miles.

Q. Is the length of the road constructed 104 miles?—A. Yes.

Q. And you mean that Delta is 191.87 miles north of Roseville?—A. Yes. The cost up to date was $3,188,609.32. This is the cost up to June 30 on general construction, and April 30 on rolling-stock, buildings, and so forth.

By Commissioner LITTLER:

Q. What year?—A. This year, 1887. There was no construction interest charged in this account.

By Commissioner ANDERSON:

Q. Does anything appear to have been reserved for future construction in order to entirely build the road?—A. $317,000 of the bonds are yet undelivered.

Q. What consideration has been received by the Pacific Improvement Company for that construction?—A. The consideration received, leaving out the $317,000, is $4,183,000 in bonds and $8,000,000 in stock.

Q. Stock of what company?—A. Stock of the Central Pacific Railroad Company.

Q. What bonds?—A. $2,120,000 of the Central Pacific (California and Oregon Division) bonds, and $2,063,000 of the fifty-year 6 per cent. bonds of the Central Pacific Railroad Company.

(The paper was marked "Exhibit No. 18, August 17, 1887," and is as follows:)

Central Pacific Railroad Company (California and Oregon Division), extending from Delta to State line.

COST OF CONSTRUCTION.

1887.		
June 30.	California and Oregon, contract	$2,176,444.87
30.	California and Oregon, right of way	22,946.24
30.	California and Oregon, survey	106,350.43
30.	California and Oregon, masonry	459,312.03
30.	California and Oregon, telegraph	2,517.65
April 30.	California and Oregon, bridges, buildings, &c.	355,249.22
30.	California and Oregon, rolling-stock	56,699.06
		3,188,609.32

STOCK AND BONDS ISSUED FOR ABOVE CONSTRUCTION.

1866.			
Dec. 31.	Central Pacific Railroad Company (California and Oregon Division) bonds*	$2,120,000.00	
31.	Central Pacific Railroad Company fifty-year 6 per cent. bonds	1,373,000.00	
31.	Central Pacific Railroad Company, capital stock certificate No. C. 936	8,000,000.00	
1867.			
June 30.	Central Pacific Railroad fifty-year 6 per cent. bonds—$690,000 delivered to Pacific Improvement Company; $317,000 yet undelivered	1,007,000.00	
		12,500,000.00	

The road for which this stock and bonds are issued, and to be issued, to the extent of $12,500,000, runs from 191.87 miles north of Roseville, near Delta station, to the State line, 104 miles. There has been no construction interest charged in this account.

COST OF CONSTRUCTION OF ANAHEIM BRANCH.

By Commissioner ANDERSON:

Q. Have you also prepared a statement showing the cost of construction of the Anaheim Branch?—A. I have, and produce the same. The Anaheim Branch extends from Downey to Santa Ana, a distance of 20.82 miles. The cost of construction was $78,887.33. The interest was $16,275.52. The total cost was $95,162.85. The stock and bonds issued for the above were 4,168 shares of the stock of the Los Angeles and San Diego Railroad Company, $416,800, and 90 shares, $9,000; also 416 bonds of the Los Angeles and San Diego Railroad Company, $416,000.

Q. Is there not some explanation that you can make about that in regard to the apparent inconsistency between the cost of construction and the amount of railroad constructed? Perhaps Mr. Douty can explain it.—A. I made this statement from the books. It appears from this that it cost only $95,000 to build 20 miles of road, or an average of about $4,500 a mile. I asked Mr. Douty how it was, and he informed me that the bookkeeper got his accounts mixed up, and that in all probability a part of that road had been built by the Contract and Finance Company; the Contract and Finance Company must have expended large amounts in building that 20.82 miles, for which it received no credit.

By Mr. COHEN:

Q. Who was that bookkeeper?—A. I do not know. He was your bookkeeper.

Q. What was the name of the bookkeeper?—A. I do not know.

Mr. DOUTY. The last bookkeeper who had charge of the books was John Miller. He was succeeded by A. C. Irwin.

By Commissioner ANDERSON:

Q. What else did Mr. Douty say in explanation of the amount charged to construction?—A. He said that in all probability the Contract and Finance Company had not been paid for the work.

Q. And they treated it, therefore, substantially as if the Western Development Company had done the whole work, and were entitled to pay for it, because the interests were substantially the same; is that so?—A. I suppose that is so. I do not believe that you could build 20 miles of road for that amount of money.

Commissioner ANDERSON. I desire to say that this substantially completes the cost of construction which I have asked Mr. Stevens to investigate, and pretty much all of the leased lines, except the two Los Angeles roads, which do not appear to have been built by the Western Development Company. Mr. Douty, can you inform us whether those roads were built by the Contract and Finance Com-

*These bonds are now in Mr. C. P. Huntington's hands, to be executed in New York by the president and trustees.

pany—the Los Angeles and Independence Railroad and the Los Angeles and San Diego Railroad?

Mr. DOUTY. The Anaheim Branch is the Los Angeles and San Diego Railroad. The Los Angeles and Independence Railroad was built by other parties, or by the Los Angeles and Independence Railroad Company, of which John P. Jones was president. It was acquired by purchase from John P. Jones and others after it was built and completed.

Q. In what books will the consideration paid to Senator Jones appear? Will this appear in the books of the Western Development Company?—A. The books will show the consideration which we paid for it. There may have been other things.

By Commissioner ANDERSON:

Q. Mr. Stevens, will you obtain this information, so that we can complete our record?—A. Yes.

By the CHAIRMAN:

Q. Will you make a statement of the entire account?—A. Yes.

(The paper was marked Exhibit 19, August 17, 1887, and is as follows:)

Anaheim Branch contract.

COST OF CONSTRUCTION.

1878.			
Dec.	31.	Construction vouchers	$78,887.33
Oct.	31.	Interest on above	16,275.82
			95,163.15
		Profit and loss, Anaheim contract	746,637.15
			841,800.00

STOCK AND BONDS ISSUED FOR ABOVE.

1880.			
Nov.	30.	4,166 shares Los Angeles and San Diego capital stock, at $100 par value	416,600.00
1881.			
Jan.	6.	90 shares Los Angeles and San Diego capital stock, at $100 par value	9,000.00
	20.	416 bonds Los Angeles and San Diego Railroad Company, par value $1,000 each	416,000.00
			841,800.00

The vouchers are auditor's and treasurer's statements, and comprise only the regular expenses incident to the proper construction of the road. The profit and loss account assumes the stock and bonds to be worth their par value. Anaheim Branch, from Downey to Santa Ana, 20.82 miles.

MEMORANDUM.—The Los Angeles and San Diego Railroad ran from Florence to Santa Ana, a distance of 27.82 miles, of which distance the Western Development Company built 20.82 miles and the Contract and Finance Company 7 miles. The contract was that the road should be constructed for $20,000 per mile of stock and bonds, each, or a total cost of $1,112,800. Of this amount the Contract and Finance Company received $280,000 in equal proportions of stock and bonds and the Western Development Company $416,800 in stock and $416,000 in bonds. They also received $9,000 additional in stock. The cost to the Western Development Company of the 20.82 miles was $95,162.85, while the cost to the Contract and Finance Company for the 7 miles cannot be ascertained. The figures show that the Contract and Finance Company undoubtedly expended large sums of money in the construction of the 20.82 miles.

RECAPITULATION.

By Commissioner ANDERSON:

Q. Have you also prepared a recapitulation, showing the cost of construction of these various roads which you have enumerated in detail, and of the consideration received for the same in cash, stocks, and bonds?—A. I have, and produce the same.

(The paper was marked Exhibit 20, August 17, 1887, and is as follows:)

Cost of construction of roads named below, and consideration paid therefor.

Name of railroad.	From—	To—	No. of miles.	Cost of construction.	Bonds.	Stock.	Cash.	Profit and loss.
Northern Railway[1]			120.7533	$3,039,818.88	$3,248,000.00	$4,810,500.00		$5,018,681.12
Amador Branch	Galt	Ione	27	380,649.64	675,000 00	648,000.00	$27,000.00	969,350.36
San Pablo and Tulare Railroad	Martinez	Tracy	46.5180	1,157,140.74	1,023,000 00	1,861,000.00	116.00	1,726,975 26
Southern Pacific	Sumner Spadra Huron	San Francisco Colorado River Goshen	404.91	11,890,726.61	14,576,000.00	14,576,700.00	820.00	17,262,793.39
Anaheim Branch	Florence	Santa Ana	20.82	85,162.85	416,000.00	425,800.00		746,637.15
Southern Pacific of Arizona	Colorado River bridge.	New Mexico line	384.17	7,003,890.09	9,504,000.00	19,995,000.00		22,505,889.91
Southern Pacific of New Mexico	Boundary of New Mexico and Ariz.	West end of Rio Grande bridge.	167.22	3,649,572.20	4,180,000.00	6,688,800.00	500.00	7,219,727.80
California and Oregon Railroad	Roseville		77.6	3,879,975.60		2,228,000.00	[2]1,551,800.00	
Do	77.6 miles	103.75 miles to a point opposite Tehama.	26.15			784,500.00	833,000.00	
Do	Tehama	Red Bluff	12.51			375,300.00	250,200.00	
Do	Red Bluff	Redding	24.9				1,570,500.00	
Do	Redding	Delta[3]	34.04	3,051,816.11				8,594,290.68
California and Oregon Railroad (C. P.)	Delta	State line	104	[4]3,505,009.32	4,500,000.00	8,000,000.00		
Central Pacific Main Line (Crocker contract), bonds at par value:	1st mile	138th mile	138		100,000.00	57,980.22		
Stock at 50 per cent	Section 1	Section 92				2,606,200.00		8,853,117.93
Stock at 20 per cent	Section 92	Section 138				11,947,530.00		
Central Pacific Main Line, extra work							296,504.22	
Central Pacific Main Line (Contract and Finance Company).	138th mile	690th mile	552			23,736,000.00	[5]23,736,000.00	
Central Pacific Main Line, snow sheds and other extra work.							1,072,874.79	
Central Pacific Main Line, rebuilding American River bridge.							82,011.48	
Central Pacific Main Line, extending Oakland and Alameda wharves and fencing in track.							602,394.94	
San Joaquin Valley Branch of C. P. R. R.	Lathrop	Goshen	[6]152		6,080.00	2,000,000.00	30,500.00	

[1] The Northern Railroad and Berkeley Branch were built under the Berkeley contract from Oakland to Martinez, and from Shell Mound to Berkeley, 34.2649 miles; Benicia Branch, Benicia to Fairfield, 16.99 miles; Northern Railway contract, Woodland to Williams, 39.2 miles; Williams contract, Williams to Willows, 25.6174 miles; Berkeley siding, 4.681 miles; total distance, 120.7533 miles. [2] Of this cash, $250,000 were bonds taken at 80 per cent., or $207,000.

[3] From Redding to Delta the line was built by the Central Pacific Railroad Company. The distance, 34.04 miles, according to the books, cost $3,051,816.11, or $70,000 per mile. It is clearly evident that large sums of money were expended in this amount upon other portions of the road in rounding up the work.

[4] Central Pacific Railroad, Delta to State line, construction not completed, cost and profit and loss estimated. [5] Gold.

[6] The San Joaquin Valley Branch of the Central Pacific Railroad was constructed under contract with the Contract and Finance Company for $2,000,000 stock, $6,080,000 bonds, and $30,500 cash. The actual cost of construction can only be ascertained from the books of the Contract and Finance Company, which are missing.

By Commissioner ANDERSON:

Q. Have you prepared a statement of the disposition made of the $10,000,000 land-grant mortgage bonds issued by the Central Pacific Railroad Company?—A. I have, and produce the same.

(The paper was marked Exhibit 21, August 17, 1887, and is as follows:)

Account of sales of land-grant mortgage bonds for $10,000,000, *of October* 1, 1870.

Date.	Items.	Discount.	Amount realized.	Total.
1871.				
Jan. 28.	7,064 bonds exchanged for bills payable or outstanding notes of the company, by order of L. Stanford		$6,110,360.00	$7,064,000.00
	Discount allowed in the exchange, bonds taken at 86½	$953,640.00		
28.	1,809 bonds exchanged for bills payable or outstanding notes of the company, by order of Mark Hopkins		1,633,985.00	1,809,000.00
	Discount allowed in the exchange, bonds taken at 86½	255,015.00		
Aug. 12.	200 bonds sold by Mark Hopkins		150,000.00	200,000.00
	Discount, bonds taken at 75 per cent	50,000.00		
1874.				
Mar. 10.	12 bonds sold by C. P. H., credited in his account of January, 1874		10,071.94	12,000.00
	Discount on the same	1,928.06		
10.	14 bonds sold by Fisk & Hatch, as per C. P. H.'s account current for February		9,356.00	18,000.00
	4 bonds sold by C. P. H. (see account current for February)		3,373.20	
	Discount on above 18 bonds	5,270.80		
May 13.	1 bond sold by Fisk & Hatch, as per C. P. H.'s account current for April		821.15	1,000.00
	Discount on the same	178.85		
June 14.	264 bonds sold by Fisk & Hatch direct		230,250.02	264,000.00
	Discount on the same	33,749.98		
1875.				
Nov. 15.	325 bonds sold to Kuhn, Loeb & Co		291,288.69	325,000.00
	Discount on the same	33,611.31		
1876.				
April 5.	67 bonds sold by C. P. H		62,295.87	67,000.00
	Discount on the same	4,704.13		
1878.				
June 29.	180 bonds sold by C. P. H		148,819.95	180,000.00
	Discount on the same	19,180.05		
		1,356,338.18	8,643,661.82	10,000,000.00

By Commissioner ANDERSON:

Q. Have you completed your examination of the Contract and Finance Company's books?—A. No; I am going on with it.

By Mr. COHEN:

Q. How long have you been engaged in the office of the Central Pacific Railroad Company in making your examination?—A. I think that I commenced about the 4th or 5th of July. It was the first part of July.

Q. And have you continued up to the present day?—A. Yes.

FACILITIES FOR MAKING EXAMINATION.

Q. Have you received every facility from the officers and employés of the Central Pacific Railroad Company in aiding you in your examination and labors?—A. Yes; whenever I have asked for any books or papers Mr. Miller and Mr. Douty have always immediately given them to me, or else told me that they could not be found.

Q. You found no effort on the part of the officers of the Central Pacific to conceal any portion of their records or papers from your inspection, did you?—A. I found no such effort at all.

By Mr. HAYMOND:

Q. Do the books of any of the companies which you have examined show that a dollar of the money belonging to the Central Pacific Railroad Company ever went into the construction of any of the roads mentioned in Exhibit No. 14, which is the exhibit wherein you name all of those branch lines?—A. So far I have only made a thorough examination of the general books of the Central Pacific Railroad Company up to 1870, and as these accounts are of a later date I cannot answer that question.

Q. Will you make that examination and be prepared to answer hereafter?—A. I will make that examination as soon as I can.

Q. Will you also make it as to the Southern Pacific of Arizona and the Southern Pacific of New Mexico?—A. Yes.

COMPARISON OF BOOK-KEEPING.

Q. How have the books of the Central Pacific been kept as compared with the books of other railroad companies?

The CHAIRMAN. That is one of the provisions in the act of Congress for the Commission to pass upon and for the Commission to report to Congress; and I submit that if he has formed an opinion, to give that opinion would be anticipating the opinion of the Commission.

Mr. HAYMOND. Mr. Stevens is an expert. We wish to show what he knows about our books. There is an opinion abroad that the books of the Central Pacific have been altered, changed, and doctored from time to time, and we wish to show by this expert, who comes here with the highest kind of recommendations, that there is no truth in that report.

The WITNESS. Up to 1870, looking at it in the light of a book-keeper, I should say that they have been very badly kept, but honestly kept.

Q. That is, as book-keeping you think that they are not up to the standard of the present time?—A. No.

Q. Do the books up to 1870 show to an expert their truthfulness?—A. I have not seen a case of apparent alteration in the books.

Q. Nothing to indicate a desire to conceal anything?—A. Nothing to indicate improper book-keeping.

By Mr. COHEN:

Q. Every book-keeper has a system of his own pretty much, has he not?—A. Yes.

Mr. HAYMOND. You must remember that these gentlemen were not railroad men when they commenced to build this road, and that they knew very little about railroad book-keeping.

The WITNESS. There is a variance in all railroad book-keepers' methods.

INTEREST CHARGED TO CONSTRUCTION.

By Mr. HAYMOND:

Q. I want to ask you one other question, and that is, whether interest, such as Commissioner Anderson referred to, charged by the construction company, is a proper charge to construction?—A. It is always a customary charge by railroads.

Q. To construction?—A. Yes.

COMPLIMENT TO WITNESS.

Mr. HAYMOND. I desire, before you leave the stand, to express, in the name of Mr. Miller, Mr. Douty, and the company, so far as I can express it, our thanks for the manner in which you have made this examination. I believe that it is correct in every particular, whatever it may be worth to you in the future. You may put this expression in any shape you wish.

By Commissioner ANDERSON:

Q. In the testimony which you have given as to the mode in which the books have been kept, do I understand you to extend it any further than to the actual book-keeping? Do you intend to qualify at all, or could you qualify, the acts of the directors in the directions that were given concerning the different contracts that were made, or the different payments that were made, in which they might be interested?

Mr. COHEN. I would like to examine the witness as to whether he is an expert on such matters.

Commissioner ANDERSON. I want to know if his testimony has any reference to the acts of the directors in such matters.

Mr. HAYMOND. We do not claim that it has.

By Commissioner ANDERSON:

Q. Do you intend in your testimony to refer to the good or bad quality of the acts of the directors or trustees of the company in directing the making of the several contracts which were made, or only to the manner in which the book-keepers or clerks of the company carried out the instructions and kept the entries?—A. That was all that I intended to say.

Q. The latter portion?—A. Yes.

Mr. HAYMOND. It must be constantly borne in mind that there was not a man connected with this company when it commenced operations who had scarcely ever seen a railroad.

PRODUCTION OF BOOKS AND VOUCHERS.

By the CHAIRMAN:

Q. Have all the books up to 1870 that you called for been produced?—A. No; I called for a good many books that have not been produced.

Q. What has been the answer?—A. That they could not be found—that they were missing.

Q. Have all the vouchers which you called for up to 1870 been produced?—A. There was a portion missing. A large portion of the vouchers were not to be had.

Q. What has been the answer when you called for them?—A. The answer was that they could not be found.

Q. So that when you speak of passing upon the books and vouchers do you speak only of those that were called for up to 1870 and were produced?—A. Yes.

By Mr. COHEN:

Q. What books have you called for that have not been produced?—A. I called for the books of the Contract and Finance Company.

Q. What others?—A. I think some minute books. I would not be positive.

Q. Were any books of the Central Pacific Railroad Company missing?—A. No.

Q. Are not all the books of the company, from the date of its incorporation to the present time, in the office of the company?—A. Yes; so far as I have looked.

VOUCHERS IN DISORDER.

Q. Has there been any ledger, journal, account-book, or cash-book of any kind, the property of the railroad company, and kept by the Central Pacific Railroad Company, that you called for that has not been produced?—A. I have called for the minute books of the Central Pacific, the ledger, the journal, and the cash-book. Those are the only books that I have called for, and they have been produced. I ought to state one thing, and that is, you asked me about the books and the vouchers. I have never seen vouchers in such a state before in my life.

Q. Are they all disordered?—A. They are all in disorder, and nine-tenths of them are merely scraps of paper without receipts; but I do not say that I saw anything that was improper.

VOUCHERS WITHOUT SIGNATURE.

By Commissioner ANDERSON:

Q. Do you mean to say that the vouchers were scraps of paper without receipts?—A. I do.

Q. Do you mean without signature?—A. Yes; without the man's signature.

By Mr. COHEN:

Q. Were you informed that all those vouchers had been gone over by various commissions and accountants sent out by the Railroad Department of the United States Government, and by the lawyers in various suits pending against the Central Pacific Railroad Company, extending over the last ten years?—A. I was informed by Mr. Miller in general terms that they had been frequently overhauled.

Commissioner ANDERSON. That would not take the signatures off.

Q. Were you informed that in a great many cases vouchers had not been returned?—A. I was informed by Mr. Miller that the books had been repeatedly overhauled. He did not say that the vouchers had not been returned.

Q. In what cases have you found vouchers for the payment of money for which there is no signature?—A. Large payments made by Mr. Huntington, large payments made by Governor Stanford, salary vouchers and expense vouchers.

Q. On all such vouchers did you not find some identification by some proper officer of the company to whom or through whom the money had been paid?—A. No.

Q. In what cases is that wanting?—A. In a multitude of cases.

RESOLUTIONS AUTHORIZING PAYMENT OF SALARIES.

Q. Taking the salary vouchers, you found on the minutes of company resolutions authorizing the payment of certain annual salaries, did you not?—A. Yes.

Q. Did you find any vouchers for the payment of salaries—exceeding such sums?—A. Yes.

Q. Beyond the annual amount allowed?—A. Yes.

Q. What cases were there?—A. There was one item, I think, of $18,000 paid to Charles Crocker for back salary. I looked carefully

through the minutes of the board of directors, but could find no entry there as to that authorization.

Q. Can you give the date of that voucher?—A. There was no receipt for that voucher. It is in my report here.

Q. Was there nothing on the voucher to authorize the payment, or credit, to Mr. Crocker of that amount of $18,000?—A. It simply stated that it was for back services.

Q. Was the voucher not signed by anybody?—A. It was not signed by anybody. I called Mr. Miller's attention to it. He looked through the minutes of the board, and he said that it must have been passed. He thought that it was his mistake at the time in not entering it upon the minutes.

Q. What other vouchers not signed did you find for the payment of money?—A. A great many expense vouchers.

CASH VOUCHERS AND JOURNAL VOUCHERS.

Q. Have you distinguished between the different kind of vouchers? There are two classes of vouchers there, are there not—cash vouchers and journal vouchers?—A. There are.

Q. Journal vouchers, according to their mode of book-keeping, would not be signed, would they?—A. The majority of journal vouchers are not signed.

Q. Generally in the mode of book-keeping adopted by the various railroad companies throughout the United States it is not usual to sign journal vouchers, is it? Are they not mere memoranda made simply for the book-keepers as to entries to be made?—A. In all the book-keeping that I have seen they are either signed or else they refer to some voucher that is signed.

NO ATTEMPT TO DIVERT MONEYS.

Q. In those vouchers that are not signed did you find any attempt to divert the moneys of the corporation beyond the knowledge of the officers controlling it?—A. No; I find no attempt of that kind.

Mr. HAYMOND. Take my own case to illustrate. I am paid a salary, but I do not draw it monthly. The secretary keeps an account with me, and sometimes it is overdrawn, and sometimes it is underdrawn. Being a lawyer, it is generally overdrawn. Every month they put in a voucher, but I never sign it. When I draw any money it goes into the treasurer's office as a voucher. For instance, if I want four or five hundred dollars, under their system of book-keeping they do not require the original voucher to be signed. It is simply a memorandum for the treasurer.

The WITNESS. I can check off the salary accounts and get at the facts very readily.

By Mr. COHEN:

Q. Is there anything more that you can say that would give this Commission any more light as to the mode of keeping books?—A. I have said all that I want to say.

Mr. HAYMOND. I think that you have said it very fairly, too.

By the CHAIRMAN:

Q. All that you have said, however, is up to the year 1870, and covers only that period; is that correct?—A. Yes; I have examined only up to 1870.

RICHARD F. STEVENS.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Wednesday, August 17, 1887.

REQUEST THAT COMMISSIONER ANDERSON BE SWORN.

Mr. HAYMOND. I ask now that Commissioner Anderson be sworn as a witness for the Central Pacific Railroad Company.

Commissioner ANDERSON. Mr. Anderson says that he is ready to answer any questions that he deems proper, and he is already under oath.

Commissioner LITTLER. I object to his being sworn.

REQUEST TO PRODUCE ANY STATEMENTS AGAINST CENTRAL PACIFIC.

Mr. HAYMOND. We will waive your taking the oath. I would ask if you have received any information, by letter or otherwise, which you now have in your possession, bearing upon any of the issues presented by this act of Congress, containing statements against the Central Pacific Railroad Company. If you have, I ask you to produce them.

Commissioner ANDERSON. I think I had better answer that I will not make any answer without consideration.

Mr. HAYMOND. I trust that you get my idea. It is not intended to be offered in an offensive sense.

Commissioner ANDERSON. I understand that.

The CHAIRMAN. I do not understand it. I regard it as highly offensive. Since the Government of the United States was organized such a proposition was never before made. Such a proposition was never made before upon any inquiry instituted and sent out by the Government, and you cannot produce any authority for it.

Mr. HAYMOND. The statutes of the United States and of this State, and of every State with which I am conversant, provide that a juror or a judge may be called as a witness. That is the point that I am making.

The CHAIRMAN. If you are correct, the same point will apply to the secret service of the Government. The same inquiry could be made regarding the secret business of the Government. You could call for letters and the production of information of any kind.

Mr. HAYMOND. I do not so regard it. We are not arguing that matter.

Commissioner ANDERSON. A more analogous case is the right to see the evidence placed before grand juries. That has been the subject of a great deal of discussion in New York.

Mr. HAYMOND. The same is true here. I do not assert the right to make this demand. I simply make it because I think we ought to have this information.

Commissioner ANDERSON. I understand that.

The CHAIRMAN. I do not understand it. Of course the Commission will entertain the proposition. Make it in writing and we will entertain it, but I do not understand it.

Mr. HAYMOND. I am willing to explain it to you.

Commissioner LITTLER. What is the other proposition?

Mr. HAYMOND. The second proposition is that before we go on with our case, if there is any such evidence, it be produced, so that we may have an opportunity to meet it.

CHARACTER OF EVIDENCE ASKED TO BE PRODUCED, IF IN POSSESSION OF COMMISSION.

The third point is addressed entirely to the discretion of the Commission, and leaves out all legal propositions. We think that if you have

any information in your possession which you have not already divulged we ought to know it. You need not produce the letters, but we think that you ought to give us publicly the propositions and the information which might have affected your minds, and permit us to address evidence to you upon such points. That is entirely within the discretion of the Commission. You may not have received any such letters or information. I do not assert that you have.

Commissioner LITTLER. Do you think that it is the duty of this Commission to surrender to you any letters or communications which it may have received during its sittings here, and which it has not made and does not propose to make any part of its record or report to Congress?

Mr. HAYMOND. Yes; that is the difficulty; it might affect your mind without your knowing it.

Commissioner LITTLER. I think that we will not be very seriously affected.

Mr. HAYMOND. I am not prepared to say, as a lawyer, that we are or that we are not entitled to this information. I would not express an opinion as to whether you should do it or not; I am only saving the point. I have not looked at it, and do not know whether we are entitled to look at these things or not.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Wednesday, August 17, 1887.

Afternoon session.

The CHAIRMAN. Mr. Anderson, will you read to the Commission the result of our action?

NO MATERIAL LETTERS OR PAPERS RECEIVED AFFECTING THE CENTRAL PACIFIC.

Commissioner ANDERSON. In answer to Mr. Haymond's request, the Commissioners state that they have received no letters or papers which are in any way material to the interests of the Central Pacific.

Mr. COHEN. Do you state that as a finding of fact or as a conclusion of law?

Commissioner ANDERSON. I state that and nothing more.

Mr. HALL MCALLISTER (counsel for Mr. C. P. Huntington). Before Mr. Hayes testifies I want to call your attention to the fact that the circuit court has enjoined the production of any correspondence between Mr. Huntington and Mr. Colton, and I want to serve the injunction on Mr. Hayes, with a copy of the bill.

Mr. COHEN. This statement is made by Mr. McAllister as counsel for Mr. C. P. Huntington.

Commissioner ANDERSON. I think that Mr. Hayes had better be sworn before we proceed any further.

GEORGE R. B. HAYES, being duly sworn and examined, testified as follows:

By Commissioner ANDERSON:

Question. Where do you reside?—Answer. 1814 Buchanan street, San Francisco.

Q. What is your occupation?—A. I am an attorney at law.
Q. How long have you practiced in this State?—A. About 17 years.
Q. Were you one of the attorneys for the plaintiff in the suit of Colton *vs.* Leland Stanford and others?—A. I was of counsel for the plaintiff in that action.

WAS ATTORNEY FOR MRS. COLTON.

Q. Are you at present acting as attorney or agent for Mrs. Colton?—A. Yes, sir; I am one of the counsel in that case. I am her counsel, and I am here to-day as her representative.
Q. Do you know, as a matter of fact, that she was served with a subpœna to produce certain letters before this Commission?—A. Yes, sir; and she has given it to me.
Q. Have you received any instructions from her?—A. None whatever, except what I received from her attorney, Mr. Smith, to have her excused from personal attendance and to bring the letters here in lieu of her personal attendance. As she understood it, that was all that was wanted.

LETTERS CALLED FOR BY SUBPŒNA DUCES TECUM.

Q. Have you those letters with you?—A. I have here the letters from C. P. Huntington to David D. Colton.
Commissioner ANDERSON. The subpœna *duces tecum* called, if I remember aright, for all the letters either written by Mr. Huntington, Mr. Leland Stanford, Mr. Charles Crocker, or Mr. Mark Hopkins to David D. Colton, or written by Mr. Colton to either of those gentlemen, which chanced to be in her possession?
The WITNESS. Yes, sir; I have all the Huntington letters here except one. There were only three or four letters from Governor Stanford, short letters, with which—supposing that the inspection of the Huntington letters would consume some little time—I have not prepared myself. I had not time to find them. I intended to bring every letter, if wanted, and had some half a dozen or so from Mr. Crocker. She has not nor have I any letters from Mark Hopkins, nor have I nor has she the letters written by David D. Colton to C. P. Huntington. They, I believe, are in the possession of Mr. Huntington.
Q. Do you know whether she has in her possession a letter-press copy of those letters?—A. I have in my possession, as her counsel, a series of letter-press copy-books which purport to contain copies of letters from David D. Colton to C. P. Huntington.

A PERSONAL LETTER NOT PUT IN EVIDENCE.

Q. As a matter of fact, were any of the letters which you have referred to put in evidence in the suit of Colton *vs.* Stanford?—A. All the letters from C. P. Huntington to David D. Colton, with one exception, were put in evidence, according to my recollection, in the case of Colton *vs.* Stanford and others. That one was merely a personal letter, and I may remark to the Commission had no bearing on railroad affairs with the exception of a complaint that the directors' car was used too much for private purposes by persons connected with the company. Otherwise it had no bearing upon railroad affairs.
Q. Are you familiar with the record in that case, which, I believe, has been made up on appeal and is in print?—A. It has been made up on appeal, and I think I am familiar with it.

HUNTINGTON'S LETTERS PRINTED.

Q. Have the letters which you have referred to been printed in a separate exhibit or volume by themselves?—A. They have. That is, they are not in the record in the case, or in the printed report of the testimony in the case. For convenience in reading them on the trial, as Mr. Huntington's handwriting was none of the most legible, we had prepared, in advance, a printed copy in a separate volume, which we used to read, passing the originals to the counsel on the other side, and we read from the printed copies. That is not the printed copy that I referred to as being a complete one. [Referring to some printed matter in the hands of Commissioner Anderson.]

Q. Do you know from an inspection of that volume that it was accurate and contains the letters accurately?

COUNSEL OBJECT.

Mr. HAYMOND. We object to that question. We say that that is covered by the injunction issued in this case.

The WITNESS. I must peruse this thing.

Mr. HAYMOND. Certainly. You can violate the injunction if you want to.

The WITNESS. Excuse me. I do not want to.

Mr. HAYMOND. If you are enjoined from producing the original letters you cannot produce copies.

The WITNESS. I have not read the injunction fully yet. [After reading.] I see this injunction not only prohibits me from producing or delivering, but also from disclosing these letters. I presume, therefore, that it would probably cover the answer to that question, and, until the injunction is removed, I shall respectfully decline to answer.

Q. Referring to the original letters, do I understand that you have them present in your possession?—A. I have the original letters from C. P. Huntington to D. D. Colton.

Commissioner ANDERSON. They are sufficient to test the question. Are you prepared to produce those letters to this Commission?

WITNESS DECLINES TO ANSWER.

A. Not while, as I find I am at present, I am enjoined from exhibiting them or producing them or delivering them. Since I came into the room, and as I was about to step forward to testify, I was served with an order to show cause why an injunction should not be issued, and with a temporary restraining order in an action in the United States circuit court for the northern district of California, entitled "Collis P. Huntington against Ellen M. Colton," which restraining order prohibits me from producing or exhibiting or disclosing these letters.

Q. Will you kindly allow the Commission to use or inspect the order and the papers on which it was granted?—A. Yes, sir.

(The witness hands to the Commission the papers served upon him.)

The WITNESS. This is the order, and this appears to be a copy of the bill filed to-day.

COPY OF THE ORDER.

Commissioner ANDERSON. Shall I read this for the information of the Commission?

The CHAIRMAN. Yes, sir.

The papers served upon the witness were marked, respectively, "Exhibits 22 and 23, August 17, 1887," and are as follows:

THE COMPLAINT.

In the circuit court of the United States for the northern district of California.

COLLIS P. HUNTINGTON }
vs.
ELLEN M. COLTON. }

To the judges of the circuit court of the United States for the northern district of California.

Collis P. Huntington, of the city of New York, State of New York, and a citizen of the State of New York, brings this his bill against Ellen M. Colton, of San Francisco, California, and a citizen of the State of California, and thereupon your orator complains and says:

That he is, and was at all the times herein mentioned, a citizen of the State of New York, and that said Ellen M. Colton is and was at all the times herein mentioned a citizen of the State of California.

That from the 1st day of October, 1874, to the 9th day of October, 1878, the complainant and one David D. Colton were stockholders and directors in various corporations, to wit: The Central Pacific Railroad Company, the Contract and Finance Company, the Southern Pacific Railroad Company, and the Rocky Mountain Coal and Iron Company, and each and all of said corporations were duly incorporated under the laws of the State of California, and were conducting and carrying on business as such corporations within such State and elsewhere.

That between said first day of October, 1874, and said 9th day of October, 1878, complainant was a citizen of and resided in the city of New York, State of New York, and that said David D. Colton was a citizen of the State of California, and resided at San Francisco, in said State of California.

That between said 1st day of October, 1874, and said 9th day of October, 1878, the complainant and the said David D. Colton corresponded freely and confidentially with each other as to their business interests and as to their interests in aforesaid corporations, and as to the business of said corporations.

That said correspondence was private and confidential, and not intended for the public, and was so understood and so treated by this complainant and the said David D. Colton.

That on the 9th day of October, 1878, the said David D. Colton died in the city and county of San Francisco, and left the defendant, Ellen M. Colton, the widow, him surviving.

That by his last will and testament the said David D. Colton made the said Ellen M. Colton the sole legatee and devisee of all his property, real and personal, and also appointed her executrix of said last will and testament.

That on the 29th day of October, 1878, the said Ellen M. Colton duly filed the said last will and testament of said David D. Colton, in the then probate court of the city and county of San Francisco, and that thereafter such proceedings were duly had in such probate court that on or about the 11th day of November, 1878, an order of said court was duly made and entered appointing the said Ellen M. Colton the executrix of said last will and testament, and thereupon she duly qualified as such executrix, and letters testamentary upon said last will and testament were duly granted and issued to her, and thereupon she entered upon, and thereafter continued, the discharge of her duties as such executrix until on or about the 18th day of December, 1879, when, by an order and decree of said probate court, then and there duly made and entered, the whole estate, real and personal, of the said David D. Colton then remaining was distributed to the said Ellen M. Colton, and she was discharged from further duties as such executrix.

That ever since the death of said David D. Colton the aforesaid correspondence, and the letters constituting the same, have been, and now are, in the charge, custody and keeping of the said Ellen M. Colton.

That the said Ellen M. Colton is now about to exhibit the aforesaid correspondence and the letters constituting the same to a Commission appointed by Congress to examine and report upon the affairs of the Central Pacific Railroad Company and the Southern Pacific Railroad Company, and complainant avers, that if said letters are so exhibited to the said Commission, that they will become public, and will be published to the entire world.

That the said Ellen M. Colton is about to produce and exhibit and disclose the said letters without being compelled to do so, and without being called upon to produce or exhibit the same in any court, or in any judicial proceeding.

That so much of said correspondence as consists of letters from the complainant to the said David D. Colton are the sole property of complainant, and that said Ellen M. Colton has no right or authority to disclose, exhibit, or publish the same to the aforesaid Commission, or to any member thereof, or to any one.

Your complainant further avers, that the said Ellen M. Colton has in her possession and under her control, copies of the letters written by the late David D. Colton to complainant between the said 1st day of October, 1874, and said 9th day of October, 1878, and that last-mentioned letters are part of aforesaid correspondence; and that the said Ellen M. Colton is about to disclose and deliver said copies of said letters to aforesaid Commission, or to some member or officer thereof.

That said last-mentioned copies of letters are equally private and confidential as the original letters from said Colton to said Huntington, and that the said Ellen M. Colton has no right or authority to disclose or exhibit the same, or any of same, to any one.

Wherefore complainant prays that a temporary injunction may issue in this action enjoining and restraining the said Ellen H. Colton, her servants, agents, attorneys, counsel, employés, and each and every of them, and all persons acting under her control, authority, or direction, and each and every of them, from exhibiting or producing or disclosing to any one, or to any board of commissioners, or to any commissioners, or to the officer of any commission, any letter or letters written by Collis P. Huntington to David D. Colton between the 1st day of October, 1874, and the 9th day of October, 1878, or any copies of letters written between same dates by said Colton to said Huntington, and that upon the hearing of this action said injunction be made perpetual, and for other or further relief or both.

HALL McALLISTER,
Counsel for Complainant.
McALLISTER & BERGIN,
Solicitors for Complainant.

STATE OF CALIFORNIA,
Northern District of California, City and County of San Francisco, ss:

E. H. MILLER, JR., having been duly sworn, says:

That the said Collis P. Huntington is now absent from the State of California, and is now in the State of New York or in Europe; that deponent is the agent of said Collis P. Huntington for this suit; that deponent has heard read the foregoing bill of complaint, and knows the contents thereof; that the same is true of his own knowledge, except as to the matters which are therein stated on information and belief, and as to those matters that he believes it to be true; that the reason that this affidavit is not made by Collis P. Huntington is that he is now absent from the State of California.

E. H. MILLER, JR.

Subscribed and sworn to before me this 17th day of August, A. D. 1887.
[SEAL.]
H. P. TRICOU,
Notary Public.

ORDER TO SHOW CAUSE, AND TEMPORARY INJUNCTION.

In the circuit court of the United States for the northern district of California.

COLLIS P. HUNTINGTON, COMPLAINANT,
vs.
ELLEN M. COLTON, DEFENDANT.

Upon reading and filing the verified bill of complaint in this action it was ordered that the defendant, Ellen M. Colton, show cause, if any she can, on Monday, 22d day of August, A. D. 1887, before this court, at the opening of this court on that day, or as soon thereafter as counsel can be heard, at the court-room of said court, in the building at the northeast corner of Sansome and Washington streets, San Francisco, California, why an order should not be made in the above-entitled action enjoining and restraining her, her servants, agents, attorneys, counsel, employés, and each and every of them, and all persons acting under her control, authority, or direction, and each and every of them, from exhibiting or producing or disclosing to any one or to any board of commissioners or to any commissioner or to any officer of any commission, any letter or letters written by C. P. Huntington to the late David D. Colton between the 1st day of October, 1874, and the 9th day of October, 1878, or copies of any letters written by the late David D. Colton to the said C. P. Huntington between said 1st day of October, 1874, and said 9th day of October, 1878.

And in the meanwhile, and until the hearing of this order to show cause, the said Ellen M. Colton, her servants, agents, attorneys, counsel, employés, and each and every of them, and all persons acting under her control, authority, or direction, and each and every of them, are hereby temporarily enjoined and restrained from exhibiting or producing or disclosing to any one or to any board of commissioners or to any commissioner or to any officer of any commission, any letter or letters written by Collis P. Huntington to the late David D. Colton between the 1st day of October, 1874, and the 9th of October, 1878, or copies of any letters written by the said David D. Colton to the said C. P. Huntington between said 1st day of October, 1874, and said 9th day of October, 1878.

Dated San Francisco, August 17th, A. D. 1887.

LORENZO SAWYER,
Circuit Judge.

I, Lorenzo S. B. Sawyer, clerk of the circuit court of the United States for the northern district of California, do hereby certify the foregoing to be a full, true, and correct copy of an order to show cause, &c., this day issued in the foregoing entitled cause.

Attest my hand and the seal of said circuit court this 17 day of August, A. D. 1887.

[SEAL.] L. S. B. SAWYER,
Clerk,
By F. D. MONCKTON,
Deputy Clerk.

COLTON CASE DECISION ADVERSE TO THE PLAINTIFF.

Commissioner ANDERSON. I will ask you one or two questions more in regard to this suit. I understand that the decision of the Colton case was adverse to the plaintiff.

The WITNESS. In the lower court. We hope for better things above.

Q. Has an appeal been taken, and is it now pending?—A. Yes, sir.

Q. Where is the appeal record filed?—A. In the supreme court of this State.

Q. Without calling for any answer in regard to any individual letters, I will ask you to state whether the volume now shown you is the volume which you have already referred to as having been prepared for the convenience of counsel in that case.—A. I am a little afraid——

Mr. HAYMOND. We object upon the same grounds as before.

Commissioner ANDERSON. You will merely force us to procure a copy of the record.

Mr. HAYMOND. I think we will offer a copy of that record in evidence ourselves; but there were some things in these letters that we did not desire to have made public which might be considered as reflecting upon men that are dead; and I do not think there is any objection to your taking a copy of the record in the Colton case.

Commissioner ANDERSON. My question is whether that forms a part of the record.

BOOKS PRODUCED WHICH THE INJUNCTION COVERS.

The WITNESS. That question I can answer. I do not think that is within the injunction. This volume does not form a part of the record.

Q. Is it a true transcript of a part of the record?—A. No; I cannot say that it is a transcript of a part of the record.

Commissioner ANDERSON. Please explain the two books which I now show you, and state whether they form a part of the original record as kept during the trial of the case.

Mr. HAYMOND. Before answering the question, I would ask you whether there are copies of these letters in that volume?

Commissioner ANDERSON. Yes, sir.

Mr. HAYMOND. Then we say that that is within the injunction.

The WITNESS. I do not want to do anything to place myself in a contempt of the court——

Commissioner ANDERSON. We do not want to place you in such a position.

The WITNESS. And, therefore, that objection being made, and being somewhat apprehensive that it would be within the injunction, I will have to decline to answer.

Commissioner ANDERSON. I understand that those letters will be accessible to us.

The WITNESS. They are always in my custody, and will be accessible.

REGULARITY OF SERVICE OF SUBPŒNA NOT QUESTIONED.

Commissioner ANDERSON. I notice an allegation that Mrs. Colton is about to produce these papers without being compelled to produce them. Do I understand that any question of the regularity of the service of the subpœna was made?

Mr. HAYMOND. I think not.

The WITNESS. I can only say that our answer to that allegation would be that she was about to produce them in obedience to a subpœna served upon her requiring her so to do.

The CHAIRMAN. Will the counsel of the Central Pacific consent to an entry of that kind upon the record?

Mr. HAYMOND. I did not draw the bill; but after you are through I will take this question up with you, and will get Mr. McAllister's opinion upon it. I do not think that any question of that kind will be raised.

The WITNESS. I have here a copy of the subpœna that was served on Mrs. Colton.

The CHAIRMAN. Perhaps that had better be produced.

THE SUBPOENA WHICH WAS SERVED UPON MRS. COLTON.

Commissioner ANDERSON. And you now produce the same?

The WITNESS. Yes, sir.

Q. Will you leave it with us?—A. Yes, sir; but return it to me, please, because I have to make use of it in answering that bill.

The paper was marked "Exhibit No. 24, August 17, 1887," and is as follows:

[Supœna.]

The President of the United States of America to Ellen M. Colton, greeting:

We command you that, all and singular business and excuses being laid aside, you be and appear in your proper person before Robert E. Pattison, E. Ellery Anderson, and David T. Littler, commissioners appointed by an act of Congress of the United States of America, at parlor A, Palace Hotel, on the 17th day of August, one thousand eight hundred and eighty-seven, at 2 o'clock in the afternoon of the same day, to testify all and singular what you may know in the matter of the investigation of railways aided by the United States Government, now depending before said commissioners, on the part of the United States.

And that you have with you then and there all letters now in your possession or under your control written by Collis P. Huntington, Leland Stanford, Charles Crocker, or Mark Hopkins to David D. Colton; also, all letters written by said David D. Colton to either of the above named persons.

And this you are not to omit under penalty prescribed by law.

Witness, Hon. Morrison R. Waite, Chief Justice of the Supreme Court of the United States, at San Francisco, the 11th day of August, in the year of our Lord one thousand eight hundred and eighty-seven.

ROBT. E. PATTISON, *Commissioner.*

To ELLEN M. COLTON.

PROPOSAL TO PUT IN EVIDENCE THE LETTERS, WITH THE NAMES.

Commissioner ANDERSON. Have you a copy of those letters, Mr. Cohen?

Mr. HAYMOND. I think I can produce a copy of the record. Will you be satisfied with a full record of the Colton case from beginning to end?

Commissioner ANDERSON. No; we have all the names, and we are satisfied they are a transcript of the letters.

Mr. HAYMOND. Will you be satisfied with those particular letters without calling for others?

Commissioner ANDERSON. I cannot say as to that. When you say the letters, you mean the letters produced with the names omitted.

Mr. HAYMOND. The letters as made up in the record. The superior judge who tried the case was under the impression that those names should not, in a suit to which they are not parties, be disclosed.

Commissioner ANDERSON. We have copies of the letters with the names, and those letters, unless the court sees fit to enjoin us, we shall certainly put into our record.

Mr. HAYMOND. I think that when you hear us on that proposition you will not do that.

Commissioner ANDERSON. I did not mean that, but I mean that we have them ready to put in.

Mr. HAYMOND. I think after considering the matter you will probably take the view that Judge Temple did, and he is one of our best judges.

Commissioner ANDERSON. There was a very different issue between Mrs. Colton and Mr. Stanford from the issue between the United States and this company.

COUNSEL DOUBT THEIR ADMISSIBILITY.

Mr. HAYMOND. The letters are not the letters of this company, nor were they authorized by this company. They are letters between two directors, and it is very doubtful whether they are admissible at all in a proceeding against the Central Pacific under rules of evidence.

Commissioner ANDERSON. I need not say that I will listen with a great deal of attention, and with a desire to give full consideration to any argument which you may make as to what use may be made of the letters; but the point now under discussion is to get those letters into such a shape before this Commission that it will be bound by a decision, and they will either be produced or not produced.

Mr. HAYMOND. Then it is possibly best for the circuit court to make that decision whether they are the proper subject of testimony.

Commissioner ANDERSON. That decision would not reach this case at all. It will only decide whether Mrs. Colton can produce them or not.

Mr. HAYMOND. It will decide to whom the letters belong.

Commissioner ANDERSON. But that will not decide that we cannot take the copies that we have and use them as the basis of our report to the President, which is the real question.

Mr. HAYMOND. I do not really think that when you examine that question there will be much of a difference of opinion between us.

Commissioner ANDERSON. We cannot begin the examination until the letters are in a shape to be produced.

Mr. HAYMOND. You say you have copies?

Commissioner ANDERSON. I ask you if you will save us the trouble of proving them?

Mr. HAYMOND. I cannot answer that now. I will be in a position to answer it to-morrow morning.

Commissioner ANDERSON. I believe Mr. Cohen was one of the counsel present during the trial, and I will ask the chairman to ask Mr. Cohen to take the stand.

Mr. HAYMOND. No, sir; he was not one of the counsel during the trial.

The CHAIRMAN. Mr. Cohen, will you take the stand?

PALACE HOTEL, SAN FRANCISCO, CAL.,
Wednesday, August 17, 1887.

ALFRED A. COHEN, being further examined, testified as follows:

By Commissioner ANDERSON:

Question. Will you look at these letters and say whether you can identify them?

(The book shown to the witness being what purported to be copies of the 16th and 17th days' proceedings in the suit of Colton vs. Stanford *et al.*)

Answer. With all due respect to the Commission, I decline to make the examination.

DECLINES TO EXAMINE THE LETTERS.

The CHAIRMAN. You decline to submit to an examination?

The WITNESS. I decline to make an examination of those letters.

The CHAIRMAN. Then I will ask you to take the witness chair.

The WITNESS. I *am* answering as a witness. It is sufficient for me to know that the United States circuit court of this district has prohibited the production of those letters before this Commission, and with all due respect to the position of these Commissioners and to their superior age, ability, and learning, I think that the order of the circuit court, which has been read in their hearing and by one of the Commissioners, is a command which should be obeyed by every citizen who knows of its existence, whether he is a Commissioner or a person filling a private station. For that reason I decline even to make an examination of the letters, for the purpose of answering the question.

A VIOLATION OF PROFESSIONAL CONFIDENCE.

I further state in answer to the question of the Commissioner that I was the attorney of the defendants in the case of Colton against Stanford, and it would be a violation of my professional engagements and my oath as an attorney to disclose any part of the matters that came to me in my capacity as such counsel or attorney. That is in accordance with the professional usage of the State of California in which the case was tried, and also of the statute of the State of New York, of which State the gentleman who is questioning me is an honored and learned member of the profession.

Q. Do I understand that your knowledge of the letters in question was derived from your client?—A. My knowledge of the letters in question was derived from such examination which I made of them as their counsel, and I have no other knowledge.

Commissioner ANDERSON. My judgment is that we had better adjourn.

A SUGGESTION BY WITNESS.

By the CHAIRMAN:

Q. Have you anything to suggest to the Commission, or any information to give?—A. Yes, Mr. Chairman, I will make a suggestion. I would make the suggestion that the Commission do adjourn and report to the President that it was appointed under a misapprehension of the facts, and that the Central Pacific has in all respects performed its duties and obligations towards the Government.

Q. Anything further?—A. That will do for to-day, I think.

The CHAIRMAN. Then, if there is no objection, the Commission stands adjourned until to-morrow morning at 10 o'clock.

NO FURTHER EVIDENCE AT PRESENT SITTING.

Commissioner LITTLER. Do we understand that the counsel for the company announce to the Commission that they have no further testimony to offer before the Commission at its present sitting in San Francisco?

Mr. COHEN. We announce that we have no further evidence to offer at the present sitting in San Francisco, but we will avail ourselves of the privilege granted to us to forward to New York such depositions as we take of the various witnesses, at the time stated in the memorandum addressed to us by the Commission.

Commission LITTLER. Do the counsel for the company desire this Commission to see their witnesses and swear them before the Commission leaves?

Mr. COHEN. We will produce to-morrow morning such of them as we can for that purpose. Those that have not been sworn, we will produce to be sworn; if we do not, we understand it to be within the arrangement that they may be sworn by a United States commissioner for that purpose.

The Commission then adjourned to Thursday, August 18, 1887, at 10 a. m.

PALACE HOTEL, SAN FRANCISCO, CAL.,
Thursday, August 18, 1887.

The Commission met pursuant to adjournment, all the Commissioners being present.

LIST OF PROPOSED WITNESSES TO BE EXAMINED BY THE COMPANY.

Commissioner ANDERSON. What witnesses are you going to examine, Mr. Cohen?

Mr. COHEN. The witnesses I am going to examine are Leland Stanford, E. H. Miller, jr., G. L. Lansing, A. N. Towne, John Reynolds, J. F. Houghton, formerly surveyor-general of California; J. A. Fillmore, John C. Stubbs, Edward C. Wright, Charles Crocker—I propose to ex-

amine him further if I can get him—William Hood, George K. Fitch, and Arthur Brown. At this time we propose to examine no other witnesses.

A CALL FOR ORIGINAL CROSS-SECTIONS OF CENTRAL PACIFIC.

Commissioner ANDERSON. I repeat my call for the original cross-sections of the Central Pacific Railroad. I would like to see them very much, if they can be found.

Mr. COHEN. I will see if I can get them.

REQUEST FOR PRODUCTION IN NEW YORK OF THE HUNTINGTON VOUCHERS.

Commissioner ANDERSON. I would also like to inquire of Mr. Cohen if the company, in order to assist in the examination of Mr. Huntington in New York, can conveniently send to its office in New York the Huntington vouchers which have been produced here, but which, of course, are not available in the absence of Mr. Huntington.

Mr. COHEN. I will communicate the wishes of the Commissioners to the president of the company. I have no doubt that he will comply with their request.

Commissioner ANDERSON. Do you state definitely that the company does not desire us to hold sessions for the purpose of examining any witnesses that may be produced on behalf of the company either to day, to-morrow, or Saturday.

Mr. COHEN. I stated what we had to say as to that yesterday.

Commissioner LITTLER. I move that when this Commission adjourn to day it shall be subject to the call of either member of the Commission.

Mr. COHEN. Then you close the proceedings now as far as the public is concerned?

Commissioner ANDERSON. We cannot say that. There may be one or two gentlemen who may desire to appear before us.

Commissioner LITTLER. If they do we will not take your default. We will notify the company if we are to examine any witness on any subject.

The Commission then adjourned to meet upon the call of either of the Commissioners.

ADDITIONAL TESTIMONY

OFFERED BY

THE CENTRAL PACIFIC RAILROAD COMPANY,

ACCORDING TO AN ARRANGEMENT MADE AND ENTERED UPON THE RECORD AT THE CLOSE OF THE PROCEEDINGS OF AUGUST 15, AND AT THE OPENING OF THE PROCEEDINGS OF AUGUST 16, 1887.

FILED SEPTEMBER 20, 1887.

ADDITIONAL TESTIMONY.

SAN FRANCISCO, *August* 22, 1887.

EDWARD H. MILLER, JR., a witness heretofore sworn by the said Commission and who has testified before it, comes in pursuance of an arrangement made between the Central Pacific Railroad Company and the said Commission for the taking of further testimony in San Francisco, and testifies as follows:

Examined by Mr. COHEN (representing the Central Pacific Railroad Company).

Question. You have heretofore said that in 1862 you became connected with the Central Pacific Railroad Company as its book-keeper?—Answer. Yes, sir.

PROGRESS OF CONSTRUCTION OF CENTRAL PACIFIC IN 1863.

Q. Had the work of construction commenced at that time?—A. It had not.

Q. You became the secretary of the Central Pacific Railroad Company about the month of September, 1863?—A. Yes, sir.

Q. How far had the work of construction proceeded at that time, September, 1863?—A. There had been expended on sections 1 to 18, from Sacramento east, less than $200,000.

FINANCIAL CONDITION.

Q. What was the financial condition of the Central Pacific Railroad Company at the time you became its book-keeper?—A. They had $7,000 cash.

Q. What liabilities of the company at that time were outstanding against that $7,000?—A. None whatever, except some small bills for preliminary surveys, &c.

Q. From what fund did you pay the preliminary expenses of organizing the road and for the preliminary surveys?—A. From the money received for stock subscriptions.

TOTAL OUTSIDE SUBSCRIPTIONS TO STOCK.

Q. What amount of money was received from subscriptions to the stock of the Central Pacific Railroad Company of California from the incorporation of the company to the end of the construction of its road to Promontory, other than the stock subscribed and paid for by Leland Stanford, C. P. Huntington, Mark Hopkins, and Charles and E. B. Crocker?—A. Three hundred and twelve thousand and seven hundred dollars.

Q. Do you know D. W. Strong, a witness who testified before this Commission?—A. Yes, sir.

SUBSCRIPTION OF D. W. STRONG.

Q. Will you state your knowledge concerning his subscription to the stock of the Central Pacific Railroad Company of California, and what became of that stock and what conversations you have had with Mr. Strong upon the subject, and when?—A. Mr. Strong subscribed for 50 shares of stock. I cannot give the date. It was stock in the original corporation, and paid the first assessment of $500. He was subsequently allowed by the board of directors $2,500 for services, $2,000 of which was to apply on his stock subscription and $500 cash, which was paid him. At a later date he was allowed $1,400 additional for services. That was to be applied on his stock subscription. And then, on the 22d day of December, 1868, he sold his interest in the 50 shares of stock to O. D. Lambard and executed an assignment of the same, which is now on file in my office, and which has heretofore been introduced before this Commission and marked "Exhibit 4, August 10, 1887." At the time of that assignment there was $1,100 due on the 50 shares of stock, he having paid only $3,000.

Q. Who paid the other $1,100?—A. The other $1,100 was paid by Charles Crocker.

THE ALLEGED REFUSAL TO SHOW STRONG THE STOCK BOOK.

The day after Mr. Strong gave his testimony before the Commission he called to see me, and I showed him this assignment, which he seemed to have forgotten; but he acknowledged to me that it was all straight; that he did make such an assignment.

He said in his testimony before the Commission that he, as a stockholder, had asked to see the stock books of the company, and that I had refused to show them. In his conversation with me, the day after he gave his testimony, I said to him, "Mr. Strong, that can hardly be possible, for I knew that a stockholder had the right to see the books, and I never refused anybody that right." He said, "Well, I asked you to show me the book, and you went to the vault and got it and brought it out and put it on the table and said, 'there, Strong, you can examine it as long or as much as you like.'" And he says now that he was indignant at my manner and went off without looking at it. He said that all of those things happened so long ago that he had forgotten pretty much about how it was.

Q. Then, I understand that all that Mr. Strong paid for his stock was $500, and the balance of $3,000 was credited to him for services?—A. Mr. Strong did not pay anything in cash, except this, that he originally paid $500 cash, which was returned to him in that allowance of $500 cash.

Q. Do you know what consideration was paid by Mr. Lambard to Mr. Strong for the assignment you have mentioned?—A. I do not know.

CONTRACT WITH CHARLES CROCKER & CO.

Q. Did you take any part in the letting of the contract to Charles Crocker & Co. for the construction of the Central Pacific Railroad for the first 18 miles from Sacramento, the contract known as sections 1 to 18?—A. I did not. I was not a member of the board at that time.

Q. How much work had been performed under that contract at the time at which you became secretary and director of the company?—A. Half the work on sections 1 to 18 had been done.

CONTRACTS FOR SECTIONS 19 TO 138.

Q. What contracts were let by the Central Pacific Railroad Company of California for the construction of its road eastward of the State line after the contract for sections 1 to 18?—A. The next contract was to Cyrus Collins & Brother, for sections 19 and 20; Turton, Knox & Ryan, sections 21 to 24; C. D. Bates, sections 25 to 27; S. B. Smith, sections 28 and 29; Charles Crocker, sections 30 and 31. Then, at a later date, Charles Crocker had contracts for sections 32 to 54; also sections 55 to 92; also sections 93 to 138, which is practically the State line.

COST OF CONSTRUCTING SECTIONS 1 TO 18.

Q. It is shown by the minute books of the Central Pacific Railroad Company that Charles Crocker & Co. were paid for constructing sections 1 to 18 $400,000, $250,000 cash and $100,000 in bonds of the company and $50,000 in stock. Can you say, from the knowledge that came to you as secretary of the company, whether the $400,000 allowed him in the way I have mentioned covered the cost of that work to Charles Crocker & Co.?—A. I do not know positively, but I understood at the time that the $400,000 did not fully pay him for the money that he had expended.

FAILURE TO COMPLETE CONTRACT FOR SECTIONS 19 AND 20.

Q. What was the experience of the company with Cyrus Collins & Brother, to whom the contract was let for sections 19 and 20?—A. They failed to complete their contract and they assigned it to Charles Crocker.

Q. Those sections were completed by Charles Crocker?—A. Yes, sir.

Q. Did Charles Crocker receive the same compensation as Collins & Brother would have received if they had completed the contract?—A. Yes, sir.

COST OF CONSTRUCTING SECTIONS 30 AND 31.

Q. I believe you have before stated to the Commission that you have not any contract in writing made between the Central Pacific Railroad Company, of California, and Charles Crocker & Co. for the construction of sections 30 and 31. Will the books of the company show what was paid for the construction of those two sections?—A. Yes, sir. The amount is $77,137.42; paid $11,600 in stock, $65,537.42 in cash.

Q. You have stated that there was a contract let to Charles Crocker & Co. for sections 32 to 54, but in the minutes of the board of directors of June 6, 1865, the terms of the contract there set out are for the construction from section 43 eastward. Will your books show the payments made from 32 to 43, inclusive?—A. Yes. The books will show the payments from 32 to 43, inclusive, but the accounts are so kept on the books that that would have to be segregated. They show the total payments made from 32 to 138.

AMOUNT PAID FOR SECTIONS 32 TO 138.

Q. State the payments from 32 to 138?—A. The total payments are $22,885,677.21, of which $8,227,980.53 was cash and $14,657,696.68 was in stock of the company.

Q. In the examination of Governor Stanford by Commissioner Anderson, Mr. Anderson says that by the books of the Central Pacific it appears that Charles Crocker & Co. was paid—

In 1865	$3,236,710.35
In 1866	8,290,790.11
In 1867	9,930,282.19
Total	21,457,783.65

Or about $210,000 a mile for the sections from 31 to 141. And Mr. Anderson inquires from Governor Stanford whether the issues of stock and sales of bonds made for the purpose of raising that money were not on such a basis as to have contributed in the ultimate result very largely to the present condition of the Central Pacific Railroad Company. Will you first see whether the figures used by Mr. Anderson are correct?—A. My figures as given above are more than Mr. Anderson's. I make it $22,885,677.21.

Q. How much of that amount as stated by you was in cash?—A. $8,227,980.53.

PAYMENTS TO CHARLES CROCKER & CO. HAVE NOT CRIPPLED THE ROAD.

Q. Will you give your idea as to whether the payments made to Charles Crocker & Co. have contributed to the present crippled condition of the Central Pacific Railroad Company?—A. They have not contributed to that at all. I do not think the payments made to Charles Crocker crippled the Central Pacific, because I think the payments made to him were a fair amount for getting the work done. The work could not have been done under any other circumstances for any less at the time. It could not have been done by any other contractors for less. The fact is, as I understand, that they lost money on that contract; did not make anything on it.

Q. If the result of the payments so made to Charles Crocker & Co. tended to cripple the company, such result was owing more to the speed with which the road was completed and the inherent difficulties in the way than to any other cause?—A. Yes; they did the work, pushed it along in a manner that no other contractors would have done, especially the work in the winter, in the Sierra Nevada Mountains, clearing away the snow and ice, and building a road, some portion of it, beyond the connected line this side.

Q. You have already stated that you could not find any written contracts made between the Central Pacific Railroad Company and Charles Crocker & Co.?—A. Yes, sir.

CENTRAL PACIFIC BOOKS SHOW THE TERMS OF THE CONTRACT.

Q. Do not the minutes of the Central Pacific Railroad Company that are in evidence, namely, the proceedings of December 26, 1862, and of June 6, 1865, and the entries on the cash-book, journal, and ledger of the Central Pacific show substantially what that contract was and what payments were made for the work of constructing that portion of the road from Sacramento to the State line that was let to Charles Crocker & Co.?—A. The books of the company show clearly the terms of those contracts, and all the payments made under them.

Q. The minutes of the Central Pacific Railroad Company which have been heretofore read to the Commission show what steps were taken prior to the letting of the contract from the State line to Promontory

to the Contract and Finance Company. Have you any information on that subject other than is shown on the minutes?—A. I have no recollection of anything except what appears upon the minutes and reports that have been submitted to the Commission.

Q. Was the matter of letting this contract to the Contract and Finance Company discussed in the board of directors between its various members in your presence?—A. I do not now recollect it. I presume it was.

OBJECT IN FORMING THE CONTRACT AND FINANCE COMPANY.

Q. Do you remember that it was first proposed to let that contract to Charles Crocker & Co., but it was afterwards suggested that it would be better to form a corporation to take that contract with a view to inviting local or Eastern capitalists to take part in that work or to take stock in that corporation?—A. Yes; I remember that was a fact.

Q. Was not the main inducement to the formation of the Contract and Finance Company, and the letting of the contract to that corporation, to invite persons with capital to put their money into the work and to secure the completion of the road?—A. I so understood it at the time.

AMOUNTS PAID CONTRACT AND FINANCE COMPANY.

Q. Do the books of the Central Pacific Railroad Company show what was paid to the Contract and Finance Company for the construction and equipment of the road from the State line to Promontory?—A. They do.

Q. Have you made up the amount so expended?—A. I have. The amount was $47,472,000.

Q. How much of that was paid in cash and how much in stocks?—A. One-half cash, $23,736,000, and one-half stock, the same amount.

AMOUNTS PAID THE SEVERAL CONTRACTORS.

Q. You say that the Central Pacific paid to Charles Crocker & Co., for the construction of the road from section 32 to the State line, in cash, $8,227,980.53, and paid to the Contract and Finance Company, for the construction from the State line to the eastern terminus at Promontory, in cash or its equivalent, $23,736,000, making altogether $31,963,980.53. What was the amount paid in cash for the construction of sections 1 to 18?—A. 1 to 18 in cash, $250,000, and 100 bonds of $1,000 each.

Q. How much for sections 19 to 31?—A. $183,155.05 in cash.

Q. Can you give the cost of the road from Promontory to Ogden, paid by the Central Pacific to the Union Pacific?—A. We paid to the Union Pacific 1,502 Central Pacific first-mortgage bonds of $1,000 each and 1,338 United States bonds, equal to $2,840,000 par.

AVAILABLE RESOURCES.

Q. Annexed, as a part of the evidence of Governor Stanford given to the Commission on August 2, 1887, is a statement headed "Cost of the road," which contains a list of the available resources of the Central Pacific of California and the Western Pacific, with the exception of the amounts originally contributed by the promoters to inaugurate those enterprises, which I understand to be the amount subscribed by the pro-

motors to the stock of those companies. The amount realized from said available resources is approximately estimated at $46,062,000. Can you, from such examination as you have made of the books of the company, state how that sum of money was expended?—A. To the aggregate of the statement made by Governor Stanford, $46,062,000, there should be added the amount of the floating debt of the company at that date, December 31, 1869, including that to the Contract and Finance Company, $12,500,000, making a total of $58,562,000. From this should be deducted United States bonds not received by the Central Pacific at that time, $1,514,120; United States bonds not received by the Western Pacific, $322,000; Central Pacific first-mortgage bonds not issued, $8,203,000; an aggregate of $10,039,120. This aggregate, at 75 cents on the dollar, being at about the same rates at which the Government bonds and the company's own bonds were estimated in the statement made by Governor Stanford, amounts to $7,529,340. Deducting this from the $58,562,000, leaves $51,032,660 as the total receipts of the company to December 31, 1869.

Q. The result of this statement is that you had bonds of the United States and of the Central Pacific which, at 75 cents on the dollar, would have produced $7,529,340, and against these resources the Central Pacific was indebted in about $12,500,000?—A. Yes, sir.

MONEYS RECEIVED FROM SALE OF STOCK.

Q. In the statement furnished by Governor Stanford and in your additional estimate nothing is said about the amount received from the sale of stocks. What became of the moneys received from that source?—A. The money received from the sale of stock went into the treasury of the company and was used for any and every purpose the same as any other money. As I have said previously, the moneys received from the first subscriptions of stock were expended on preliminary expenses of the organization, surveys, &c. The amount received from the stock subscription should also be added to the $51,032,660. This amount was $1,001,400; making a total of $52,034,060.

CASH PAYMENTS ON CONSTRUCTION.

Q. What account do you give of this $52,034,060?—A. As shown heretofore, the cash payments on construction are as follows:

Sections 32 to 690 were	$31,963,980.53
Sections 1 to 18, cash payment, $250,000, and 100 bonds of $1,000 each of the company, at 75 cents, making for sections 1 to 18	325,000.00
Sections 19 to 31	183,155.05
Expended by Governor Stanford at Salt Lake, as explained heretofore	751,963.78
Paid to the Union Pacific Railroad Company for road from Promontory Point to 5 miles west of Ogden, United States and Central Pacific bonds at 75 cents	2,130,000.00
Expended for track-laying, equipments, building, &c., from sections 1 to 138	2,502,600.00
Construction of Western Pacific Railroad from San José to Sacramento, United States bonds and first-mortgage bonds of the company, $3,940,000, at 75 cents (being about the rate at which these bonds are estimated in Governor Stanford's statement), amounting to	2,955,420.00
County bonds issued in aid of the Western Pacific Railroad, which had been expended on construction before it came under the control of Stanford, Huntington, Hopkins, and Crocker, net proceeds as per Governor Stanford's statement	400,000.00

Expended for engineering, machinery in shops, legal and general expenses, shops and shop materials, wood sheds, snow plows, tanks, wharves at Sacramento, real estate, snow sheds, &c	$6,971,688.00
For interest, general account, on first-mortgage and convertible-mortgage bonds, chargeable to construction account	1,669,332.42
Cash assets	491,600.00
Leaving a balance of	1,689,340.22

Which was used in making additions to American River bridge, building retaining walls in the Sierra Nevada Mountains, strengthening and enlarging the north levee at Sacramento City, on which the railroad had been originally built, replacing trestles by filling, &c.

LOYAL TO THE INTERESTS OF THE CENTRAL PACIFIC.

Q. In the accounting between Charles Crocker & Co. and the Central Pacific, and the Contract and Finance Company and the Central Pacific, who watched over the interests of the Central Pacific Company?—A. I was always the accountant of the Central Pacific, and was always loyal to the Central Pacific as against anybody and everybody else—Charles Crocker & Co., the Contract and Finance Company, or anybody else.

Q. You had no interest in the contracts let to Charles Crocker & Co. in the contracts let to the Contract and Finance Company?—A. None whatever.

Q. You had no stock in the Contract and Finance Company?—A. None.

Q. You knew at the time of the construction what the Central Pacific had agreed to pay to Charles Crocker & Co. and the Contract and Finance Company?—A. Yes, sir.

STRICT BUSINESS RELATIONS OF CENTRAL PACIFIC AND CONTRACT AND FINANCE COMPANIES.

Q. You paid them the amounts they were entitled to receive and no more?—A. And no more. The contract with the Contract and Finance Company provided that the Contract and Finance Company were to furnish the equipment, but that the Central Pacific Railroad Company was to buy that equipment and charge it to the Contract and Finance Company at cost. I made up the charges for such equipment against the Contract and Finance Company and took care that the price charged would be the full cost to the Central Pacific. But in the case of the first locomotive charged to the Contract and Finance Company I made the price $11,000 in gold. Before the completion of the contract I found that locomotives were costing more than $11,000, and I charged them $12,500 for locomotives then furnished them, and at the completion of the contract I charged them $1,500 additional on each locomotive that had been furnished them at $11,000, thus making all the locomotives furnished them by the Central Pacific charged to them at $12,500 in gold coin, which was something more than the cost to the Central Pacific.

EFFORTS TO OBTAIN OTHER CONTRACTORS.

Q. What efforts were made to obtain other contractors than Charles Crocker & Co. and the Contract and Finance Company?—A. Well, there were no particular efforts made, because it was of no use to make efforts to get other contractors. There were none on this coast that would have taken the contracts then on any terms, and I doubt if any

contractors could have been got in the East. I do not think there was anyone that would have taken the contracts.

Q. What efforts were made to obtain stockholders in the Contract and Finance Company?—A. I do not know specifically, but I knew that Governor Stanford and the other parties in interest were trying their best to get capitalists interested with them in the Contract and Finance Company.

Q. Could in your judgment any other solvent or capable contractor have been found to take the contracts then let to Charles Crocker & Co. and the Contract and Finance Company?—A. I don't think that any other contractor could have been found to have taken them, and certainly if the contracts had been let to any other contractor they would not have pushed on the work, as the Contract and Finance Company did, at a very great sacrifice to themselves.

FINANCIAL CONDITION OF CONTRACTORS.

Q. What was the financial condition of those contractors, Charles Crocker & Co. and the Contract and Finance Company, while the work of construction was going on?—A. Well, they were constantly in want of, and constantly making demands for, money.

Q. In the contract made by the Central Pacific with Charles Crocker & Co. and the Contract and Finance Company, the Central Pacific agreed to furnish rails, fastening, and locomotives, did they not?—A. Yes, sir; and other equipments.

AMOUNT OF SUPPLIES IN TRANSIT.

Q. Can you make an estimate of the amount that was carried by the Central Pacific Railroad Company in supplies in transit between New York and San Francisco?—A. All supplies had to be bought in New York at least six months in advance of their arrival for use in California. They were brought around the Horn mostly by sailing vessels. Anything that there was any urgent demand for was sent by steamer, crossing the Isthmus of Panama. The amount in transit varied from time to time, seldom less than $1,000,000, and at some times over $3,000,000.

FINANCIAL CONDITION OF CENTRAL PACIFIC JULY, 1868.

Q. What was the financial condition of the Central Pacific at the time of the completion of the road to the State line?—A. The road was completed to State line about July 1, 1868. The company had expended the proceeds of all the United States bonds it had received and all the proceeds of all the county bonds and of all its own bonds which it was authorized to issue up to that point, and had a floating debt of over $5,000,000.

PRICES PAID FOR MATERIALS.

Q. Can you give the prices of materials paid during the construction of the road between 1862 and 1869, inclusive?—A. In 1863 we paid $115 a ton for 5,000 tons of rails in Boston and New York in bonds of the company.

Q. At what rate were the bonds taken?—A. No rate fixed. That is what they cost in bonds at par.

Q. That was the price at New York and Boston without shipping charges?—A. Without shipping charges. We also paid for a lot of about 500 tons, $262 per ton in stock and $5.50 additional per ton in New York and Boston. From 1864 to 1869 rails cost in New York from $74 to $87.50 per ton.

Q. Was that at the mill or alongside ship?—A. That was alongside the ship, I believe, averaging, say, $80 per ton in currency. Freight from New York averaged about $17.50 a ton; insurance all the way from 5½ to 17 per cent.

SPIKES AND FASTENINGS.

Q. What was the cost of railroad spikes and fastenings during the same period?—A. Spikes cost 6½ cents per pound; bolts, 9½ cents; fish joints, 6 cents; car castings, 7½ cents; 33-inch wheels, $24 each; Babbitt metal, 48 cents per pound; bar iron, $110 to $115 a ton.

Q. In speaking of tons of rails, is that 2,000 pounds or 2,240 pounds?—A. Iron, 2,240; rails, 2,240; everything else 2,000 pounds. All those are Eastern prices, to which was added freight and insurance and in many cases cartage and lighterage. The first 38 locomotives placed on the road cost over $20,000 each in currency. The next 111 locomotives cost nearly $12,500 each, gold coin.

Q. What was the Government tax on locomotives at the time this road was being constructed, if you know?—A. Six per cent.

TIES, HAY, AND GRAIN.

Q. Now give the price of ties, hay, grain, and whatever had to be purchased during the construction of the road?—A. The ties and iron we furnished. The Contract and Finance Company bought hay and grain and things of that kind; the contractors bought that themselves. I have bills of purchased material at Salt Lake from which I can give prices.

PRESENT PRICES OF RAILS.

Q. What are the present prices of rails of the same weight and quality as those used in the construction of the Central Pacific?—A. We do not use the same quality. We use now all steel rails; use no iron rails; steel rails, I think, are worth $40 to $45 here.

Q. I am speaking of the price at the point of production. State what your information is on the subject, what steel rails are worth?—A. The present price of steel rails in California is from $45 to $46 in the East about $35 to $36 a ton. Spikes are now made here at $2\frac{1}{10}$ cents per pound; bolts at 2½ cents a pound; joints at $1\frac{7}{10}$ cents; bar iron at $40 to $45 a ton; car castings 2½ cents; car wheels, 33-inch, $8.25 each; Babbitt meta, 16 cents a pound. Locomotives of about the same size can now be had at from $7,000 to $7,500 each.

WORK THAT WAS LOST TO THE COMPANY.

Q. In the examination before the Commission something had been said about contracts made by Governor Stanford with the Mormons in Utah. Will you explain for what purpose those contracts were made?—A. Well, the Union Pacific were building this way to meet the Central Pacific as far this side of Salt Lake as possible. Governor Stanford went out to Salt Lake to commence building from Salt Lake this way,

and did there a large amount of work on the line from Salt Lake to a point 100 miles or more this way. The Union Pacific also had a force on the ground this side of Salt Lake grading. The result of all which was that the Central Pacific got its track laid to Promontory, a point some 47 miles west of Salt Lake, at the same time the Union Pacific reached that same point and made connection. Consequently all the work done for the Central Pacific by Governor Stanford from Salt Lake to Promontory Point was an actual loss to the company, as they made no use of that grading.

PRICES PAID IN UTAH FOR MATERIALS.

Q. What prices were paid in Utah for the materials used in the construction of the Central Pacific in that Territory?—A. I have bills of material and contracts for material returned from Salt Lake which show that ties were paid for from $1.25 each to $8. The ties got at $1.25 were very few. The majority of the ties were $2 each.

Q. What were the circumstances that compelled you to pay $8 for ties?—A. I do not know.

Q. Was not the contract made in this way: That they were to have $8 for ties delivered in a certain time; $6 for ties delivered in a longer time; $4 for ties delivered in a longer time still? In other words, the question of time was a great consideration, and those that they delivered early they got $8 for, and those delivered later $6 and $4?—A. That did not apply in all cases, but the contracts for ties in every case specified the time in which they were to be delivered, and if not delivered within that time then the price of those that had been delivered up to that time was very much less than the contract price, the question of time being a large element in the price paid or to be paid.

THE QUESTION OF TIME AN IMPORTANT FACTOR.

Q. The question of time was important in consequence of this contest with the Union Pacific in building?—A. Yes, sir. Each road had a right to build until it connected with the other. Of course we could not build without ties.

Q. Can you give the year in which those payments for ties were made?—A. The fall of 1868 and the spring of 1869.

ACCOUNTS OF FREIGHT FOR SALT LAKE DIVISION.

Q. I notice in some of the accounts the cost of freight from Wadsworth to Salt Lake. What was the occasion of the freighting, and what was paid for the service?—A. The freight from Wadsworth to Salt Lake was 10 cents a pound.

Q. Carried how?—A. Carried by team.

Q. What freight did you send—what was the nature of it?—A. Machinery and tools principally.

Q. To be used on the Salt Lake Division during construction?—A. Yes, sir. It was some construction material that went from Wadsworth to Salt Lake for use on the Salt Lake Division.

Q. Without looking at the books for that purpose, can you make any estimate as to how much was spent for freight from Wadsworth to Salt Lake?—A. No. It was not very much.

PRICES OF WOOD, LUMBER, PROVISIONS, AND LABOR.

Q. Have you a memorandum of the prices of other articles at Salt Lake?—A. Yes. We bought large lots of wood at Salt Lake, for which we paid $8 to $10 a cord, mostly $10 a cord. Lumber was $110 to $150 a thousand feet. There was considerable lumber used for bridges, &c. Barley was 10 cents a pound in Ogden. Bills in my possession show that the prices for flour were 18 cents a pound; sugar, 40 to 45 cents; coffee, 50 cents; butter, $1; bacon, 50 cents; ham, 45 cents; pork, 40 cents; beans, 25 cents a pound. Boots were $12 a pair. This entered into what contractors could afford to do. The price of labor was, foremen, $5 a day; laborers, $3 a day.

Q. You are speaking of the year 1868, I suppose?—A. 1868 and 1869.

FLOATING DEBT MAY, 1869.

Q. What was the floating debt of the Central Pacific Railroad Company on May 10, 1869; or, for convenience, estimated at May 1, 1869?—A. The floating debt was over $14,500,000.

Q. I assume your estimate is taken from the balance sheet of the Central Pacific books made on May 1, 1869, is it not?—A. Yes.

Q. The books at that time, May 1, 1869, show a credit to Mark Hopkins, treasurer, of $2,874,446.21, and a credit to Leland Stanford of $1,839,915.41. Will you please explain how those balances arose?—A. Well, they were moneys loaned to the company by Leland Stanford and by Mark Hopkins.

Q. Obtained by loans on the credit of Stanford, Huntington, Hopkins, and Charles and E. B. Crocker, were they?—A. Yes, sir; it must have been in that way.

COST OF LOCOMOTIVES.

Q. Referring to your testimony as to the cost of locomotives, I notice that both Mr. Stanford and Mr. Huntington speak of higher prices paid for locomotives than you have mentioned.—A. We brought two locomotives across the Isthmus of Panama. They cost, ready to run, one of them, $37,795.91. That was a locomotive 18 by 22 cylinder. The other one, cylinder 17 by 24, cost $37,110.55.

MONETARY ARRANGEMENTS WITH CONSTRUCTION COMPANIES.

Q. Mr. Douty has stated in his testimony to this Commission that the Western Development Company and the Pacific Improvement Company kept a banking account with the Central Pacific. Will you explain the business between the Central Pacific and those two companies, so far as receiving deposits from and lending money to those construction companies?—A. There was never anything in the nature of a banking account kept at all. Sometimes they were overdrawn; sometimes they had balances to their credit.

Q. When they were overdrawn did they pay interest?—A. Always.

Q. At the current rate of the day?—A. Yes, sir.

Q. When they had money to their credit did the Central Pacific allow interest?—A. Yes, sir. That is, interest was made up on current account with those companies.

Q. At the end of each month?—A. At the end of each year.

Q. Will you state how it was that the Central Pacific had money to lend those construction companies?—A. They did not lend them money as a general thing. They were balances of account. We did not do any banking business for either of those companies; never did, and do not now. In the sense that they deposited money with us and we paid interest on it, they never did anything of the sort. Sometimes, if they had money and the Central Pacific wanted to use it, we paid them interest on it, if it was left with us. But that was always more in the nature of a running account between the companies than in the nature of a banking account.

ADVANTAGES TO CENTRAL PACIFIC.

Q. What was the result of these monetary arrangements between the construction companies and the Central Pacific; did it tend to the advantage and profit of the Central Pacific?—A. Yes, sir; the Central Pacific always got interest on it, and they never took money on deposit and paid interest on it when they had funds of their own.

Q. Did the Central Pacific at any time borrow money for the purpose of lending to these construction companies?—A. Never.

INVESTMENT OF THE SINKING FUND.

Q. Some testimony has been given to the Commission as to lending moneys in the sinking fund of the Central Pacific to the Western Development Company. Will you please give such explanation as you can about those transactions?—A. The board of directors, acting as trustees under the mortgages of the company, had in their possession, from time to time, moneys belonging to the sinking fund of the various mortgages of the company. Some of such moneys were loaned on interest to the construction companies at various times, taking collateral securities from such companies. All such loans, with the interest accrued thereon, have been paid, and the amounts in the sinking fund of the companies are now invested, as shown by my statement to the Commission August 16, 1887, marked Exhibit No. 8.

ADVANTAGEOUS TERMS MADE WITH CONSTRUCTION COMPANIES.

Q. It has been stated that the Central Pacific paid to the Contract and Finance Company, the Western Development Company, and the Pacific Improvement Company 10 per cent. upon the cost of improvements, betterments, and repairs. Will you give some information to the Commission on this payment of 10 per cent., whether it was an advantage or a disadvantage to the Central Pacific?—A. In my judgment, the 10 per cent. paid to the construction companies for the work done by the Central Pacific was always an advantage to the Central Pacific Company. The 10 per cent. was not a profit or intended to be a profit to the construction companies for doing it, but to arrive at the actual cost of the work to such construction companies and to cover contingencies, the use of hand tools which were worn out on the works, the use of machinery in the shops, and, if you please, to cover interest on the plant of the construction companies. Of course, in some instances a portion of the 10 per cent. was clear profit to the construction company. In other instances the 10 per cent. would result in a loss. This 10 per cent. was, of course, intended to cover also the cost of superintendence and accounting. One great advantage to the Central Pacific in having

these construction companies do such work was that they had always a force on construction and materials ready for construction which they could turn immediately to making any repairs or rebuilding any structures for the Central Pacific. They had such material and such men as the Central Pacific would not have had and did not have in its own employ in the shops. For instance, the Central Pacific had in its shops men for building cars and that kind of work, called carpenters; but they were entirely unfit and not adapted to bridge building or building houses, depots, &c., along the line of the road, and could not be used in an emergency for repairs; and the Central Pacific did not carry that kind of material on hand. Employing these construction companies to do that sort of work, they were not obliged to carry the kind of materials for building bridges that might be washed out or burned, or buildings that might be burned, or new buildings that might be required along the road.

A CASE IN POINT.

A case in point which very distinctly shows the advantage to the Central Pacific of employing these construction companies to do the work was the burning of the American River bridge, a very long and expensive bridge about two miles east of Sacramento. It was completely burned. Within two days and one night a temporary bridge was constructed by the Construction Company, which enabled trains to pass over the bridge without interruption. This temporary bridge could not have been built by the Central Pacific itself, or by any other construction company in California, under three weeks. In the mean time the trains would have all been interrupted. The same construction company completed the permanent structure before the high waters of the succeeding winter came, they bringing men and materials from all points where they were doing work on construction and putting them at this work of building the temporary bridge and rebuilding the American River bridge. The next day after the bridge was burned I was on the ground and saw the river pretty well covered with men, pile drivers, &c., that the Construction Company had been able to bring there inside of twenty-four hours after the bridge had been burned; men especially adapted to and understanding that kind of work; a force such as the Central Pacific, or any other contractors in California, could not have got together inside of ten days.

THE USUAL CHARGE, TEN PER CENT. ADDED TO COST.

In this connection I will say that the Central Pacific has always charged to the construction companies 10 per cent. on all work done by it for those companies. It always charges to other railroad companies 10 per cent., and in some cases 15 per cent., for work done by it for the other companies. Other companies also charge the Central Pacific 10 per cent for work done by them, this 10 per cent. being added to the actual cost of the labor and material to approximate as nearly as possible the actual cost of labor and material and foremen, superintendents, the use of tools, and executive and contingent expenses. The Central Pacific has a contract with the Pullman Company at this time, and has had for the last three years, by which the Pullman Company agreed to build for the Central Pacific whatever sleeping cars it might require at the actual cost for labor and material, adding 10 per cent. for superintendence, executive expenses, use of tools, machinery, &c. In fact it is a customary thing in the Central Pacific shop, when it makes up works

in advance for its own use, to charge for such work at the actual cost of labor and material, adding 10 per cent. to arrive at the real cost of the work done.

THE SUGGESTION TO THE COMPANY TO DO ITS OWN CONSTRUCTION.

Q. It has been suggested by a member of the Commission that the Central Pacific Railroad Company should have kept itself in a position by having skillful men in its employ and the necessary amount of material on hand so as to provide for ordinary and extraordinary repairs. I would like you to state from your experience what would be the financial outcome of doing the business in that way instead of through a Construction Company?—A. Well, in that case the Central Pacific would have had to carry a very much larger stock of material, or a large stock of material of a different character from what was required in its ordinary uses for constructing cars, &c.; and I think it could not have done such work as was done by the Construction Company as cheaply as it got it done through those companies with the 10 per cent. added; and in a great many instances it could not have done it as quickly.

CONSTRUCTION COMPANIES BENEFICIAL.

Q. If the Central Pacific, on a sudden emergency, or to make improvements or betterments, were required to go into the market and hire such labor as it could obtain and buy such material as would be wanted, do you think it could have made such improvements or betterments or repairs for any less money or had the work as well done as it could be done by a construction company with its corps of trained and skillful men, even adding 10 per cent. to the amount that it cost the Construction Company?—A. No. As I said before, I do not think the Central Pacific could have done it as well or as cheaply or as quickly as things were done by the Construction Company.

CHARGED ONLY ACTUAL COST.

Q. In the work done by these Construction Companies for the Central Pacific I understand that the Construction Companies charged for lumber or material the actual cost to it and the expense of handling, but did not charge any interest on the cost of material; therefore a part of the 10 per cent. allowed covered the interest on such portion of the capital of the Construction Company as was used in carrying such material. —A. The facts are that the Construction Company charged the Central Pacific Company only the actual cost of the material to them, no matter how long they had carried it in supply. They did not charge any interest on the material for the time they had it in supply. Of course, if the Central Pacific had had to carry a supply of this material for doing its own work it would have had to buy a stock of timber or lumber a sufficient time in advance to have had it well seasoned and fit for such uses, and certainly would have been out the interest on the money it cost to carry such a supply of material, or else in an emergency they would have to go into the market and buy material practically unfit for the purpose and pay the market price, which, in such case, would be a great deal more than buying the material at wholesale and carrying it in stock, as was done by the Construction Company. The Construction Company bought large amounts of lumber at from $2,000 to $4,000 less than the market price. Of course the Central Pacific got the benefit of that

when it was used on its work. They got the benefit of low prices that had been paid for material in addition to saving the interest.

THE ARRANGEMENT DECIDEDLY BENEFICIAL TO THE ROAD.

Q. Then the general result of your experience as an accounting officer of the Central Pacific is that that company sustained no damage from the arrangement it made with these construction companies for its repairs, both ordinary and extraordinary?—A. This Construction Company did not do all the ordinary repairs of the Central Pacific. Such repairs as could generally be done by its own force with the material it had on hand were so done by itself. The construction companies were called upon only to do the larger work. My opinion is that the arrangement with these construction companies to pay them the cost of labor and material, with 10 per cent. added, was very decidedly a beneficial arrangement to the Central Pacific Company. In the current work done in all the shops of the Central Pacific Railroad Company each piece or kind of work done during the month is charged, first, with the cost of labor, then with the cost of material, to which is added a percentage arrived at in the following manner: The wages of the general master mechanic, of the foreman, and the stationary engineer and fireman, and the watchman, the cost of fuel, the cost of hand tools that are used up during the month, the salaries of the accountants at the various shops, and the general accountants at the general office of the machinery department are added together and the per cent. of these expenses to the total cost of the whole work done in the shop for the month is then added to each individual item of work done during the month. This percentage runs from 6 to 12 per cent. For such work there is no charge for the use of machinery or interest on plant.

COST OF SNOW GALLERIES AND SNOW SHEDS

Q. What was the cost to the Central Pacific of the snow galleries and snow sheds to December 31, 1869?—A. $1,558,039.87. From 1870 to 1886, inclusive, the cost of putting on iron roofs and other betterments on the snow sheds was $427,495.59. The cost of ordinary repairs from 1870 to 1886, inclusive, was $896,666.58. The cost of snow service from 1870 to 1886, inclusive, was $602,276.81, making a total of $3,604,472.85. The cost of construction shown above is somewhat less than the full actual cost, as some of the charges are so made as to make it difficult now to ascertain the exact sum. Such charges as are not included here would not materally affect the statement, as they are small in amount.

Q. What is the number of miles of snow sheds and galleries, and what is the average cost per mile?—A. Over 35 miles of snow sheds and galleries, which, at a cost of $1,588,039.87, would make an average per mile of $45,372.56.

The cost of maintaining sheds and clearing the road of snow for the past seventeen years is $2,016,432.98, an average annual expense of $118,316.70.

Q. The building of snow sheds and galleries was not included in the contract with Charles Crocker & Co.?—A. No.

Q. Then the cost of building and maintaining has been paid by the Central Pacific?—A. Yes, sir.

NO DIVISION OF ASSETS.

Q. Before leaving the question of the finances of the Central Pacific I ask you whether, from the time of your first connection with the com-

pany up to this date, any of the proceeds of bonds issued by the Central Pacific of California or by the Western Pacific, the proceeds of the bonds loaned by the Government to those companies, or any of the earnings of the Central or Western Pacific or any of their moneys or assets have been used or applied to build the road of the Southern Pacific Railroad Company or of any other railroad company?—A. They have not. Not a dollar of the assets of those companies has been diverted to any other company or person.

Q. Have any of the bonds issued by or to the Central Pacific Railroad Company of California or by or to the Western Pacific, or of any of the constituent companies forming the present Central Pacific, been paid to Leland Stanford, C. P. Huntington, Mark Hopkins, Charles or E. B. Crocker, or any other person in the way of dividends or profits?—A. None.

CONSTRUCTIVE MILEAGE ALLOWANCE.

Q. Some questions have been asked by the Commission on the subject of constructive mileage allowance. I would like to have such information as you can give on that subject.—A. In Governor Stanford's answer to questions 3 to 7, inclusive, to the Commissioner's letter of May 12, and especially in answer to question 4, a statement in relation to diversion of earnings from aided lines to less productive branches through constructive mileage allowances was filed by him with the Commissioners, which I think shows clearly that no such diversion of earnings was made from the aided lines of the Central Pacific to any less productive branches. Mr. Wright, the general auditor, in his testimony before the Commission, was asked if 50 per cent. and 100 per cent. constructive mileage did not amount to one and a half to one and two to one. He answered that it did. That answer was correct so far as mileage was concerned, but when applied to earnings it was not correct. Giving a road 100 per cent. constructive mileage it by no means follows that on connecting business it received 100 per cent. or any definite per cent. of additional earnings. In no conceivable case could the additional earnings amount to 100 per cent.

ILLUSTRATION OF THE WORKINGS OF CONSTRUCTIVE MILEAGE.

To illustrate the workings of constructive mileage, suppose railroad line A gives to line B 100 per cent. constructive mileage. Now, if any connecting business is done over the two lines—say, for illustration, 100 miles on each line—the division of the earnings would be, on a straight pro rata mileage basis, 50 per cent. to each. But giving B a constructive mileage of 100 per cent. such business then would be 100 miles on A and 200 on B, giving to A 33⅓ per cent. and to B 66⅔ per cent,, an increase of B's earnings of only 33⅓ per cent., instead of 100 per cent. The percentage of additional earnings of B would vary with the varying distances on each line over which connecting business was done from the various stations on one line to the various stations on the other.

DISCONTINUANCE OF CONSTRUCTIVE MILEAGE TO CERTAIN ROADS.

Mr. Wright in his testimony said that I ordered constructive mileage that had been given to the various branch and leased lines of the Central Pacific to be discontinued. I did that because from a statement I had made up I ascertained that the 50 per cent. and 100 per cent.

constructive mileages given by the Central Pacific to the branch lines amounted to so little to those lines that it was not worth continuing, and also because it had been objected to by United States Auditor French.

SAN FRANCISCO, *August* 26, 1887.

EDWARD H. MILLER, JR., being further examined, testified as follows:

FURTHER INFORMATION AS TO LEASES.

By Mr. COHEN:

Question. Have you any other information to give concerning the leases taken by the Central Pacific of other roads in addition to that which you have already given to the Commission?—Answer. The Government officers objected to the Central Pacific leasing other lines, and the Government Department in Washington refused to pay the Central Pacific for transportation of mails, troops, &c., over leased lines. And now that the Central Pacific has canceled those leases and those lines are leased to the Southern Pacific, the Government refuses to pay for the transportation of mails and troops over the same lines. As I understand it now, they seem to have claimed first that the Central Pacific had no right to lease other roads; now they seem to claim that the Central Pacific has no right to cancel such leases.

Q. What has been the result to the treasury of the Central Pacific from the leases it has heretofore taken?—A. The result was a profit to the Central Pacific.

Q. What amount now due from the United States to the Central Pacific for transportation is withheld?—A. Nearly two million dollars.

GOVERNMENT DOES NOT PAY FAIR, REASONABLE COMPENSATION.

Q. Do you consider that the rates allowed by the Government of the United States to the Central Pacific Railroad for carrying the mails are fair, reasonable, or just?—A. No. The Government has not in the past and does not now pay or allow the Central Pacific and Union Pacific Railroad a fair, reasonable compensation for the transportation of its mails. It allows only the same rates per mile as are fixed by the Post-Office Department and paid to all Eastern railroads. All those same Eastern railroads allow to the Central Pacific and Union Pacific Railroads over 50 per cent. greater rate per mile on connecting business than they themselves receive on the same business. This establishes the fact, by the very best possible evidence, that larger rates to the Union and Central Pacific Railroads are fair and reasonable, and the Government should allow for all past and future services in the transportation of its mails by the Central and Union Pacific Railroads at least 50 per cent. additional to the rates paid to the Eastern railroads.

FORMER AVERAGE COST PER ANNUM OF GOVERNMENT TRANSPORTATION.

Q. Have you given to the Commission anywhere the average cost per annum to the Government of transportation in the region now covered

by the Pacific Railroad between the year 1850 and the completion of said road?—A. Yes; in one of the exhibits annexed to the statement of Governor Stanford.

Q. Have you given the average cost per annum since the completion of the Pacific Railroads?—A. Yes, sir. That is in the same statement.

Q. Have you in your records any papers or information that will show how the western base of the Sierra Nevada Mountains was arrived at, or was fixed by the President of the United States?—A. Yes, sir; I have.

LETTER FROM ABRAHAM LINCOLN FIXING THE BASE OF THE MOUNTAINS.

The witness produces a letter signed by the President of the United States, Abraham Lincoln, dated January 12, 1864, which reads as follows:

EXECUTIVE MANSION,
Washington, January 12, 1864.

In pursuance of the eleventh section of the act of Congress entitled "An act to aid in the construction of a railroad and telegraph line from the Missouri River and to the Pacific Ocean, and to secure to the Government the use of the same for postal, military, and other purposes," approved July 1, 1862, the point where the line of the Central Pacific Railroad crosses Arcade Creek in the Sacramento Valley is hereby fixed as the western base of the Sierra Nevada Mountains.

ABRAHAM LINCOLN.

LETTER FROM STATE GEOLOGIST UPON SAME SUBJECT.

The witness also produces a letter from J. W. Whitney, State geologist, addressed to the governor of the State of California, dated March 23, 1863, which is as follows:

OFFICE OF THE GEOLOGICAL SURVEY OF CALIFORNIA,
San Francisco, March 23, 1863.

SIR: In reply to your favor of March 7, requesting me to give my views with regard to the position of the western base of the Sierra Nevadas, and to fix the point where, in my opinion, the line of the Central Pacific Railroad intersects said base, I beg leave to submit the following:

The "base" of a mountain, as seems apparent from the meaning of the word as applied to other things, where it is susceptible of a precise definition, is the lowest point of the mountain or the point where the ascent commences. As applied popularly, however, the term "base" appears to be used generally to signify the point where the rise of the mountain begins to be sufficiently steep to present a marked appearance to the eye, or to become a decidedly perceptible obstacle to progression.

That the scientific or precise idea of a mountain base is somewhat different from the popular one may be inferred and illustrated by a consideration of the Rocky Mountain chain; and I will use the words of the highest geological authority in this country, Professor Dana, who says, speaking of the Rocky Mountains: "The mountain mass, therefore, is not a narrow barrier between the East and the West, as might be inferred from the ordinary maps, but a vast but gentle swell of the surface, having a base 1,000 miles in breadth." He says further: "The average eastern slope of the Rocky Mountains seldom exceeds 10 feet in a mile, which is about 1 foot in 500, equal to an angle of only seven minutes."

It is evident from the above that Professor Dana considers that on scientific principles the eastern base of the Rocky Mountains is to be placed several hundred miles east of where it would be located according to the popular idea.

So, with regard to the Sierra Nevada, it would seem that a strictly accurate determination of the position of its western base would place it where the upward rise of the surface commences, without reference to the popular idea of the greater or less steepness of ascent.

The intention of the act of Congress, by which three times the usual amount of money is given to aid in the construction of the 150 miles, "beginning at the western base of the Sierra Nevada," seems to be clearly indicated in the words "most mount-

ainous and difficult of construction," which specify the portion of the road which is to receive additional aid beyond that given for other portions.

If, therefore, a distance of 150 miles, measured east from the point in the Sacramento Valley where the ascent commences, will clear the most difficult and mountainous portion of the Sierra Nevada and reach the valley on the eastern slope, then it seems reasonable that the base of the Sierra Nevada should be taken as beginning at that point.

In case that is not done, the location of the position of the western base of the Sierra will be more or less a matter of uncertainty, as there is no other position which can be assigned which does not depend more or less on circumstances and conditions which are not capable of being fixed with precision.

I would suggest, therefore, that the point where the line of the Central Pacific Railroad crosses Arcade Creek may with propriety be taken as the base of the Sierra, as from there commences a regular and continuous ascent, and in a distance of 150 miles from that point the most difficult and mountainous portion of the route will have been traversed.

I am, with high respect, your obedient servant,

J. W. WHITNEY,
State Geologist.

To his Excellency Governor STANFORD,
President C. P. R. R. Co., Sacramento.

LETTER FROM E. F. BEALE.

The witness also produces a letter from E. F. Beale, then United States surveyor-general for California, addressed to the governor of the State of California, April 30, 1863, which is as follows:

SAN FRANCISCO, *April* 30, 1863.

Hon. LELAND STANFORD:

DEAR SIR: Language written or spoken being the medium through which human thought is expressed, the learned men of civilized and cultivated nations, through all ages, have labored to reduce the same to a science as exact and perfect as possible; but while it is true that lexicographers have given certain definitions to words, and they are used with comparative precision in the learned professions, the arts and the sciences, yet inasmuch as a majority of mankind use language in a *conventional* rather than in *exact* sense, in seeking the interpretation thereof it is not always safe or just to apply to the same the strict rules of the lexicographer.

Now in relation to the word "base" as applied to a mountain, lexicographers define the word "base" as the lowest part, bottom, or foundation of anything upon which it exists, as in mathematics the base of a triangle, the chord of an arc in architecture the base of a pillar—the broad part of anything, as the bottom of a cone, &c., &c. It is clear that the word base, as above defined, is in a mathematical sense a point which can only be ascertained by exact measurement and calculation.

Now what is the base of a mountain? It exactly corresponds with the base of a cone or with that of an equilateral triangle. It is the lowest or broadest part upon which it rests; hence it is that part which rests upon the perimeter of the globe, and it commences at the point which is cut by the tangent to the circle of the earth's circumference. Hence the altitude of mountains is always estimated from the level of the sea, which is considered as the perimeter of the earth. This is the definition that the geometrician would give to the word base as applied to a mountain. But it is manifest that when the same word is applied to a mountain by the popular writer or speaker it will not admit of such a strict interpretation, for it is not so understood in common or popular language; and when language is made to convey a meaning foreign to the intention of the author, it becomes vicious and untrue. I presume any general reader can recall many instances in which the traveler, the historian, and the biographer have described towns, places, &c., as being situated at the base of mountains, evidently using the word in the popular sense.

I would say, therefore, in relation to the subject on inquiry, that the word "base" as used in the act of Congress referred to means the point where the ascent becomes plainly perceptible, not to be geometrically ascertained, but merely by observation, the intent of the act of Congress clearly being to commence at the point where the mountain ascent presented the first considerable obstruction.

From my knowledge of the topography of the country, I think a point should be taken somewhere about midway between Sacramento and Folsom.

Very respectfully, yours, &c.,

E. F. BEALE.

LETTER FROM J. F. HOUGHTON.

The witness also produces a letter from the surveyor-general of the State of California to the governor of California, dated June 29, 1863, which is as follows:

STATE OF CALIFORNIA, OFFICE OF SURVEYOR-GENERAL,
Sacramento, June 29, 1863.

To his Excellency LELAND STANFORD,
Governor of California and President of Central Pacific Railroad Company:

DEAR SIR: Your letter asking me to examine the law of Congress in regard to the location of the 150 miles most difficult of construction commencing at the western base of the Sierra Nevada Mountains, and also to examine the profile of the route selected by your company, reached my office during my absence on the eastern boundary survey of the State.

Since my return I have given the subject careful consideration, and am satisfied that it should be located in such a manner that the two extremities of the 150 miles should rest upon corresponding grades, the one to the west, the other to the east of the mountains.

Applying this, which seems to me the most reasonable rule of determination, to the profile of the route as surveyed by Mr. T. D. Judah, your chief engineer, I find that at a distance of 7 miles from the city of Sacramento, at a point marked Arcade Creek, a grade of 21 feet per mile occurs, and at a distance of 150 miles from this last-named point the route reaches the Big Truckee Meadow, over and beyond the Sierra Nevadas, with a long continuous grade of 20 feet per mile eastward.

In my opinion the proper location of the said 150 miles is from Arcade Creek with a grade of 21 feet, to the Big Truckee Meadows with a grade of 20 feet per mile, which line covers the whole eastern and western slopes of the Sierra Nevada Mountains and extends to corresponding grades on either side.

I have the honor to be, very respectfully, your obedient servant,

J. F. HOUGHTON,
State Surveyor-General.

NO AFFIDAVITS REQUIRED IN CONNECTION WITH FIXING THE BASE.

Q. In the testimony of Mr. Strong given before this Commission, it was said that several officers and directors were required to make affidavits in connection with fixing the western base of the mountains. Have you any information on that subject?—A. I think Mr. Strong was mistaken. I do not think any affidavits were either required to be made or that anybody was asked to make affidavits. I think the letters above, from Professor Whitney and Surveyor-Generals Beale and Houghton, were transmitted to the President and that he acted on the information given in those letters. I never heard of affidavits being asked for or required.

GROSS RECEIPTS OF CENTRAL PACIFIC.

Q. In your examination before this Commission, August 16, 1887, Mr. Commissioner Littler asked you to show to the Commission the practical effect of the lease of the Central Pacific Railroad to the Southern Pacific as compared with the earnings of the Central Pacific the last year it did business on its own account.—A. The gross receipts of the Central Pacific Railroad Company were; for 1884, $28,977,877.14 for 1885, $15,306,092.57.

The gross receipts stated for 1884 are before any deductions are made for overcharges, amounts due connecting lines on joint traffic, or other deductions which should be made from same to show gross earnings.

In 1884 the Central Pacific Railroad Company operated an average for the whole year of 2,802.45 miles of railroad. The receipts for this year include the receipts from all this mileage.

In 1885 the Central Pacific Railroad Company operated for January and February 2,802.45 miles; from March to December it received the earnings on 1,649.86 miles. The average miles for the year from which this company received the earnings was, therefore, 1,841.96 miles.

The gross earnings and operating expenses of the 1,649.86 miles of railroad, from which the Central Pacific Railroad Company received the net profit in 1885, and which were operated by the Southern Pacific Company from April 1 to December 31 of that year, are shown for the same line in 1884, compared with 1885, in the annual report of the Central Pacific Railroad Company for 1885, pages 24 and 25.

This shows the economy in operation under lease to Southern Pacific Company, viz, Central Pacific Railroad and leased lines north of Goshen, 1,649.86 miles:

	1884.	1885.
Earnings	$15,096,970.29	$14,384,420.56
Operating expenses	8,338,588.22	6,206,598.87
Earnings over operating expenses	7,658,382.01	8,077,821.69
Net increase under lease to Southern Pacific Company		419,439.68

Notwithstanding the gross earnings were less by about a million and a half, the operating expenses were reduced nearly two millions.

In 1884 gross receipts are shown, but in 1885 gross receipts are shown for only two months; gross earnings as against gross receipts, for ten months.

Q. How long was that Southern Pacific lease under consideration by the Central Pacific before it was adopted?—A. Several months.

Q. Well and thoroughly considered by the board of directors, was it not?—A. It was considered and reconsidered time after time.

Q. Do you know under whose auspices it was prepared?—A. Governor Stanford's, more especially; but we all took part in the discussion.

METHOD OF KEEPING ACCOUNTS TO SHOW NET EARNINGS.

Q. Will you state whether the books and accounts of the Central Pacific Railroad are or have been so kept as to show the net earnings of the aided railroads?—A. The accounts of the Central Pacific Railroad Company have been so kept that the United States Auditor of Railroad Accounts and the United States Commissioners of Railroads, whose special duty it has been to ascertain the aided portion of the road, have had no difficulty in doing so. For some three years the earnings of the aided line were made up on the basis of giving by the main line constructive mileage to some of the branch and leased lines; but the aided portion of the line has received from constructive mileage or its equivalent (to wit, an allowance of more than actual straight pro rata per mile division) an amount vastly greater than it has allowed to leased lines or branches. If the Government will settle on the theory that pro rata for mileage is the proper basis for all divisions of all earnings, a restatement of the accounts of this company with the Government on that basis will, in my opinion, result in showing that the company has overpaid the Government on its settlements under the 5 per cent. clause of the original act and the 25 per cent. clause of the Thurman bill not less than $1,000,000. I hope such restatement may be called for and made. The

only drawback would be that it has so far been impossible to get a settlement on any basis with the Government that shall be final.

NO EFFORT TO IMPAIR GOVERNMENT'S INTERESTS.

Q. Understanding as you do the objects and purposes of this inquiry, I will ask you to say if during your twenty-five years' connection with the affairs of the Central Pacific Railroad Company you can state any instance in which its business has been so handled or its property managed with the intent on the part of its directors or officers to infringe or impair the interests of the United States?—A. Never in any single instance.

E. H. MILLER, JR.

SAN FRANCISCO, *August* 24, 1887.

RICHARD GRAY, having been duly sworn by L. S. B. Sawyer, commissioner of the United States circuit court, testified as follows:

Examined by Mr. COHEN:

Question. How long have you been connected with the Central Pacific Railroad Company, or its system of roads?—Answer. Since March, 1874.

Q. In what capacity?—A. Part of the time as assistant general freight agent, and since May, 1882, as general freight agent.

NO DIVERSION OF TRAFFIC TO SOUTHERN PACIFIC.

Q. I understand it has been testified before the United States Pacific Railway Commission, in the examination of the affairs of the Union Pacific Railway, that "the Central Pacific has diverted all the traffic possible to the Southern Pacific, since 1882, from the Union Pacific;" that to accomplish this special inducements were held out to shippers; that "if there were no Southern Pacific, the Union Pacific would probably do 25 per cent. more business." Are these statements correct?—A. These statements are not correct. The party or parties making them must have been grossly misinformed, and could not have been cognizant of the facts.

No traffic was diverted by the officers of the Central Pacific to the Southern Pacific. After the completion of competing transcontinental roads business was solicited by the agents of the various roads and routed in accordance with the wishes of shippers.

SPECIAL INDUCEMENTS TO SHIPPERS BY "SUNSET" ROUTE.

The only special inducements offered shippers by the Sunset route were quick time and prompt and regular delivery of their freight without overcharge. Quick time was made by special attention to the traffic, cars being run through from New Orleans to San Francisco without transfer or detention; and the absence of overcharges resulted from through billing and a careful and systematic handling of the business. These latter were possible because of proper co-operation by the managers of the line between New York and San Francisco.

FREIGHT WAY-BILLED THREE TIMES ON NORTHERN LINES.

This was in glaring contrast with the crude and unsystematic mode of way-billing and handling the business by the northern lines, on which

numerous transfers were made, consuming time; the average time between New York and San Francisco being twenty-six to thirty days, while freight had to be way-billed three times.

The Sunset route delivered freight in from sixteen to eighteen days without overcharge, one manifest covering the goods from New York to San Francisco.

NEVER DECLINED TO CO-OPERATE.

Q. Have the officers of the Central Pacific Company ever refused to co-operate with those of the northern lines in arrangements for expediting service and through billing of freight?—A. The officers of the Central Pacific Company have never declined to co-operate in any proposition for expediting service or arrangements for properly conducting the business, but have repeatedly urged on the management of the lines via Omaha the necessity for through billing and running the cars through without transfer, so as to compete with water lines.

TRANSCONTINENTAL TRAFFIC OF SECONDARY IMPORTANCE.

The transcontinental or Pacific coast traffic, which some years ago was said by the commissioner of the eastern trunk lines to constitute less than 2 per cent., being divided among the several trunk lines and the roads between Chicago or Saint Louis or the Missouri River, was never of sufficient importance to receive from any of them the requisite attention and dispatch, and arrangements for through cars and billing never could be consummated until the completion of the southern lines rendered such action imperative if the northern lines would retain their proper share of the business. Even the lines west of the Missouri River looked on the transcontinental traffic as of secondary importance when compared with their local business, apparently giving the latter the preference. The annual report of the Union Pacific Railway Company for the year 1881 slightingly mentions Pacific coast business as follows:

The tonnage of freight over your road to and from the Pacific coast also shows an increase over the year preceding, but the low rates at which it was carried rendered it the least profitable of any freight transported by the company.

Of the total net earnings of this company from the transportation of freight during the past year, the Pacific coast contributed but 7¼ per cent.

The foregoing, published nearly two years before the opening of the Sunset route, is a fair index of the feeling in regard to through freight and the attention it received from the all-rail lines, until on the opening of that route they found the business naturally seeking the lines which gave it proper attention.

It is difficult to see how, if there were no Southern Pacific, the Union Pacific would do 25 per cent. more business, when in 1881, nearly two years before the completion of the Sunset line, as previously stated, the overland freight carried by the Union Pacific amounted to only 7½ per cent. of its total freight traffic.

When, in order to compete with the southern roads, it was suggested that a through car arrangement be made, to accomplish which what is known as the "California Fast Freight Line" was organized, the managers of the Southern Pacific Company promptly responded.

CALIFORNIA FAST FREIGHT LINE CONTAINS 2,900 CARS.

The official statement issued by the manager of the California Fast Freight Line shows the equipment at present contains 2,900 cars, of

which the roads between Council Bluffs and Chicago contributed, all told, 650 cars; the Union Pacific 650, and the Central Pacific 1,600 cars.

EQUIPMENTS OF CENTRAL AND UNION PACIFIC.

Thus the Central Pacific, with a prorating interest in the line between Chicago and San Francisco of 39 per cent., furnishes an equipment of through cars equal to 55 per cent. of the whole, while the Union Pacific, with an interest of 46 per cent., furnishes an equipment of only 22½ per cent.

Prior to the completion of the southern roads, by mutual agreement the officers of the Union Pacific were given almost entire control of west-bound traffic, a reciprocal right being conceded to the Central Pacific on east bound.

CONNECTIONS OF SOUTHERN PACIFIC.

The Atchison line was connected with the Southern Pacific at Deming in March, 1881; the Texas and Pacific was connected at El Paso in December, 1881; while the Galveston, Harrisburg and San Antonio, or Sunset line, was not open for business until February, 1883.

UNION PACIFIC COMPANY'S WEST BOUND FREIGHT DECREASING.

In the annual report of the Union Pacific Railway Company for 1883 we find it stated:

> In the through and the Pacific coast business there was a gain from last year of 23,083 tons in east-bound freight, and a loss of 67,872 tons in west-bound freight.

This statement shows conclusively that if there was a change in the volume of the tonnage passing over the Government aided lines, the freight east bound, which the officers of the Southern Pacific Company might be supposed in some way to control, showed a large increase, while that which the Union Pacific and its connections were expected to solicit and route showed a large falling off.

DIVERSION FROM CALIFORNIA PACIFIC TO WESTERN PACIFIC.

Q. Your answer to my last question relates to business which formerly was transferred by the Central Pacific to the Union Pacific. Do you know of any other instance in which any business has been diverted, either freight or passenger, from an aided to a non-aided road? I direct your attention more specifically to the business of the Western Pacific and the California Pacific.—A. I do not think that the business transferred from the Western Pacific line between Sacramento and San Francisco via Stockton and Livermore can be called a diversion. The diversion really was from the California Pacific, which was the first line completed, and much shorter and more direct, to the Western Pacific. It was decidedly to the interest of the Central Pacific Company to lease the California Pacific; and it was greatly to the advantage of the public and all interested to send traffic by the shorter line instead of the longer with its heavy grades and slow time.

BRANCH ROADS FEEDERS TO PARENT ROAD.

Q. During your connection with the Central Pacific Railroad Company have you ever known it to be the policy of the company, or are

you informed of any one instance in which business has been diverted from an aided to a non-aided road for the purpose of benefiting the latter at the expense of the former?—A. No, sir. Business was allowed to take its natural channel. In the practical making of rates and management of the road no such distinction as aided or non-aided roads was known, the interests of the Central Pacific and its leased lines being considered a unit. As between the branch lines of the Central Pacific, such as the Stockton and Copperopolis, and the Stockton and Visalia road, the branch roads were made to act as feeders and contribute business to the parent road, which, if under separate management or were business allowed to seek its own channels, would not have been the case. The same is true of the Northern Railway and of the California Pacific. There has been no diversion of traffic from the aided to the non-aided portion of the road which was not clearly in the interest of the public and of the aided portion of the road and the result of natural or geographical causes.

Q. Have you in your possession any estimate that has been made as to the cost of moving freight per ton over the Western Pacific and the California Pacific between Sacramento and San Francisco?—A. I understand the equation of the grades and curves of the line between San Francisco and Sacramento via Livermore to equal about 200 miles. As the distance between Sacramento and San Francisco is only 90 miles, over a practically level road, the cost of operation must be correspondingly less.

RELATIONS BETWEEN CENTRAL PACIFIC AND PACIFIC MAIL.

Q. The transactions between the Central Pacific Railroad Company and the Pacific Mail Steamship Company have invited the attention of the Commission, especially the question as to the payment of so-called subsidies by the railroad company to the steamship company. Will you give your experience and judgment on such relations, and whether the payments that have been made to the steamship company were in the nature of subsidies or whether they were in the nature of reciprocal arrangements for the interchange and distribution of traffic between the steamship company and the railroad company? Will you please answer this question as fully and completely as you can, giving all such information as you may have bearing on the business of the railroad company and the necessity for its harmonious relations with the steamship company?—A. The Union and Central Pacific roads were completed in 1869, seven years before the time required by law. They were constructed through an almost uninhabited country, the census of 1870 showing that Nebraska had only 122,993 inhabitants, and these mainly in the counties bordering the Missouri River. Wyoming had only 9,118; Utah, 86,786; Nevada, 42,491; and even California, the goal to reach which the roads were built, had only 556,615. The State of Oregon had only 90,923; while the Territories of Washington, Idaho, and Montana, which have since been so largely benefited by the building of the Pacific roads, had, combined, only 59,549, exclusive of Indians.

Railroads are usually projected and built through districts which have a population and resources well defined or susceptible of rapid and certain development, but from the foregoing it will be seen that the Pacific roads had little local business save what they themselves created, or the uncertain traffic incident to mining communities.

CAPITALISTS SAID "THE LINE CANNOT PAY."

During the incipiency of the Pacific roads, capitalists East and West fought shy of the enterprise. During its construction they doubted whether it would be operated except at Government expense, and it is a fact that about two years after the last spike was driven a shrewd and representative business man was heard to say, "The line cannot pay; it is only a question of a short time when the first-mortgage bondholders will foreclose and take the property to the exclusion of the Government as well as the stockholders."

This assertion, though based on outside observation by a non-railroad man, was not unjustified judging from the comparatively small earnings of the roads.

It will be seen that it at once became an important question with the management representing that portion of the owners who held their stock as a permanent investment, and who had faith that the line might develop the States and Territories through which it passed and fulfill its destiny of uniting the East and the great West. "How shall the roads be operated so as to pay expenses and meet their obligations to bondholders, and to the Government?"

TRAFFIC WENT ROUND CAPE HORN.

Previous to the completion of the Pacific roads, traffic between the Atlantic and Pacific coasts went round Cape Horn or across the Isthmus of Panama. If by the latter it was carried by the Pacific Mail Steamship Company, a powerful corporation with a capital of $20,000,000, established for many years in the carrying trade between New York and San Francisco, operating a well-appointed line between this port and China and Japan; also coast lines between ports in California, Mexico, and Central America.

TEA, SILK, ETC., SENT OVERLAND.

With such a company it was of the utmost importance that friendly relations be entertained. Accordingly, an arrangement was soon made under which the tea, silk, and other Asiatic freight was sent overland to Eastern cities, instead of by steamer via the Isthmus to New York.

ASIATIC FREIGHT A LARGE AND VALUABLE BUSINESS.

The importance of this trade is shown by the fact that during the ten years ending February, 1881, the Pacific roads carried 177,278,505 pounds of tea and other Asiatic goods on which the charges accruing to the Union Central Pacific roads were $3,264,456.44, or an average of $1.84 per 100 pounds, or 1.9 cents per ton per mile. Since 1880, owing to the active competition by the Suez Canal, this traffic has been taken at less remunerative rates, but until the opening of competition by the Canadian Pacific, it was a large and valuable business, which was secured by the co-operation of the Pacific Mail Steamship Company.

MARKET FOR COFFEE VIA SAN FRANCISCO.

Arrangements were also made under which large quantities of coffee from the Central American States of Salvador and Costa Rica found a

market in our Middle States via San Francisco, instead of being carried by steamer to New York and distributed thence.

It was a natural sequence that harmonious relations should exist between great corporations whose interest in such large measure lay in the same direction, and as a rule the steamship company operated with the overland roads to secure the traffic between New York and San Francisco as against clipper lines.

The bulk of the traffic with the Atlantic coast had formerly gone round Cape Horn, leaving to the shorter isthmus and overland lines the higher class or more valuable goods, on which time, interest, and insurance were important.

CONSERVATION OF RATES OF VITAL IMPORTANCE.

As a result of this the tonnage remaining for the short lines was small, the rates comparatively high, and the revenue easily destroyed by undue competition, so that the conservation of rates became of vital importance.

Various attempts were made by the steamship company and the railroad managers to apportion the business equitably by giving certain classes of traffic to one or the other without success, and it soon became evident that nothing but "co-operation" of "working together under a joint purse arrangement" would accomplish the desired end.

Therefore, in order to maintain reasonable and uniform rates and remove all incentive for underbidding, payment of rebates to favored shippers, or other modes of cutting rates, an amount of traffic equal to that which each line would carry under a maintenance of agreed rates, was mutually conceded to each.

AGENTS FIXED THE RATES.

To properly carry out this arrangement, the business at either end of the line was placed under the management of joint agents selected by mutual consent. These agents fixed the rates from time to time and handled the traffic in a manner which was most advantageous to shippers as well as to the carriers.

TRAFFIC IN EXCESS OF AGREED PROPORTION.

Under this plan it was found more convenient to the general public and to the interest of the rail lines that the latter should carry an amount of traffic in excess of their agreed proportion, even though this resulted in paying over in cash to the steamship company the revenue accruing from such excess. The sums thus paid, commonly miscalled "subsidies," merely represented what the steamship company would have received had its agreed allowance of the traffic been sent by steamer instead of being routed overland by the joint agents.

GOOD REASONS FOR THE ARRANGEMENT WITH PACIFIC MAIL.

There were good reasons for this policy of sending an excess of the traffic overland instead of causing the steamship company to carry it, thus earning its allotment.

A systematic effort was being made by the railroads to wean Pacific coast shippers from their established custom of using the Cape Horn route for a large portion of their shipments.

RESULT OF THE POLICY.

The overland roads were also trying to develop and foster trade relations between California and manufacturing centers west of the Alleghanies.

The result of this policy is that our merchants have a choice of markets in which to purchase and are not restricted to Atlantic seaboard cities as formerly. On the other hand, our people are enabled to sell their products direct to all the principal cities and towns east of the Rocky Mountains, to most of which through rates can be obtained, instead of shipping to New York and distributing thence inland.

LOSSES TO CENTRAL PACIFIC THROUGH COMPETING LINES.

Q. I would like you to give to the Commission such estimates as you have of the loss to the Central Pacific by reason of the competition which grew out of the Atchison, Topeka and Santa Fé, the Atlantic and Pacific, the Texas Pacific, and other competing lines.—A. This question has already been fully covered by statements and statistics presented by Traffic Manager Stubbs, especially in the statement in Exhibit No. 12, annexed to the statement and evidence of Governor Stanford. I cannot give any more detailed information than is set out in the recapitulation, Exhibit F, forming a part of said Exhibit No. 12.

LOSS ON PASSENGER AND FREIGHT EARNINGS.

Q. For the convenience of the Commission, will you repeat the figures here?—A. The total loss on passenger and freight earnings for the five years and nine months ending December 31, 1886, to the Central and Union Pacific lines by the building of other lines was $37,132,351.02; or an annual loss of $6,457,801.18, of which the Central Pacific proportion was $17,080,881.47; or an annual loss of $2,970,588.54.

Q. How much of the Central Pacific's loss was sustained by loss of passengers and how much by loss of freight?—A. Of this the loss on freight to the Central Pacific was $11,216,217.18; the loss on account of passengers was $5,864,664.29.

DOES NOT GET ALL THE GOVERNMENT TRANSPORTATION IT EXPECTED.

In addition to the loss of business caused by construction of competing lines, it may be proper to remark here that the United States Government has not, as was the intention when the Pacific roads were projected, given them the carrying of all its freight. It is a well known fact that naval material and supplies, such as duck, rope, rigging, and other articles necessary for the equipment of vessels at Mare Island have been shipped from the Atlantic coast to the navy-yard via Cape Horn, or by steamer via Panama. The amount of freight thus shipped I am unable to give, having no data at my command. The Commission can undoubtedly ascertain from the Departments at Washington full information on this point, should they so desire. The tonnage thus diverted from the Pacific roads and carried by water must have been large, as it has been the rule of the Government authorities to ship all naval supplies by water, sending overland only such articles as were needed promptly, or the transportation of which by sea was inconvenient. It has also been the custom of the Navy Department to transport

all seamen between New York and San Francisco via Panama. Several times the paymasters of the Navy, or the officials having the matter in charge, have been approached on the subject by railway officials at both New York and San Francisco, and the invariable reply has been that instructions from Washington require them to send seamen by way of Panama.

SPECIAL CONTRACTS.

Q. Explain to the commissioners your knowledge and experience with reference to special contracts made by the Central and Union Pacific.—A. Previous to 1878 the great bulk of merchandise from the Eastern States to California was transported by clipper around Cape Horn. This consisted chiefly of coarse goods, such as agricultural implements, coal oil, heavy groceries, &c.; also large quantities of dry goods and merchandise, prompt delivery of which was not essential. The Union and Central Pacific roads having a surplus of rolling stock and motive power, desired to increase their tonnage and to divert from the water lines all classes of merchandise the transportation of which could be secured at any figure above actual cost.

NO FIXED BASIS OF CHARGE.

To this end, they went into the freight market at New York and other Eastern ports from which clippers sailed for this coast, but were met with the fact that there was no fixed basis of charge for transportation by clipper, fluctuations being frequent according to the season of the year, and large and regular shippers being able to obtain better rates of freight than smaller ones.

On investigation of the other element of cost by clipper, viz, insurance, it was found that large and regular insurers secured very much lower rates of insurance than others.

The element of interest on the investment for the time that goods would be afloat in excess of the time consumed by rail lines also varied, some shippers estimating the value of money at 1 per cent. per month, while others could secure it for half that figure.

ANOTHER ELEMENT OF COMPETITION.

Another element of competition was the fact that clippers having secured from large shippers, like the Standard Oil Company, or the large hardware and iron shippers, round lots sufficient for stiffening of vessels, would on the remaining space be enabled to offer nominal figures on the light and bulky articles which otherwise would be carried by rail. To add to the complications, clipper rates sometimes fluctuated from day to day.

It soon became evident that such a competition could not be successfully met by the rail lines, who could not afford to change their rates suddenly and frequently, and that if they tried to meet openly the rates made by clippers they would imperil their assured and regular revenue without accomplishing the desired end.

"CONTRACT SYSTEM" INAUGURATED TO MEET THE COMPETITION.

What is known as the "contract system" was therefore inaugurated. Contracts were made with a few of the hardware, iron, and agricultural

implement houses, these being the principal Cape Horn shippers, at first, but the system rapidly developed until it soon embraced probably nine-tenths of the traffic between the Atlantic States and the Pacific coast.

These contracts were made on printed blanks and were uniform to all parties dealing in the same class of goods.

The chief consideration contained in these contracts was that the shipper would agree to ship all his goods by the rail lines and none by clippers or water lines.

REASONS FOR REFUNDING EXCESS IN RATES.

It was further agreed that at the option of the carriers all or any freight might be way-billed and charges collected at the regular tariff rates current at time of shipment, the difference between such rates and the special contract rates to be refunded periodically.

This latter arrangement was made for two reasons:

First, because the contracts covered shipments made by a number of Eastern roads whom it was impossible to notify and to arrange for the billing of the property at the special contract rates; and second, it was found desirable by the carriers to collect full tariff rates and make the refunds after the shipper had complied with his obligation, viz, to completely refrain from shipping goods by water.

THE "CONTRACT" SYSTEM SOON BECAME GENERAL.

Although it was originally intended to make these special contracts only with shippers whose capital and character of business enabled them to ship around Cape Horn, the system soon became general. Contracts were made with all shippers who would comply with the simple condition, viz, to ship all their goods by rail.

At soon as practicable contract rates were printed and issued to billing clerks of all the roads interested in the overland business, and, so far as possible, freight was billed at the contract rates.

"REBATE" A MISNOMER.

Q. Explain in what cases rebates were made in favor of any corporation, person, or persons, and whether same were made to others similarly situated or doing like business.—A. In my answer to the previous query it will be seen that the sums refunded by the Union and Central Pacific and connecting lines were not "rebates" as that word is generally understood, but, strictly speaking, overcharges which were caused through error or by design for the reasons given and which were paid on proper showing being made or certain conditions complied with. They were not in any sense railroad revenue or earnings, and therefore the term "rebate" as applied to them is a misnomer.

As before stated, contract rates were general and were accorded to all persons similiarly situated or doing like business.

STANDARD OIL COMPANY'S CONTRACT.

The contract with the Standard Oil Company about which a great deal has been said, and the circumstances attending the making of which have already been very fully explained by General Traffic Manager Stubbs, may be thought to be an exception to the foregoing, but it can

be shown that the oil business as conducted on this coast previous to the inauguration of the contract system was a monopoly; that it had always been such; that this monopoly enjoyed from the water carriers and still enjoys from the clipper lines lower rates than can be secured by other shippers, and that in accepting the business in competition with Cape Horn at the rates dictated by the Standard Oil Company, plus a reasonable allowance for interest, insurance, &c., the rail lines in no wise discriminated against smaller shippers, but reduced the margin of difference in favor of the larger corporation as against smaller shippers which had heretofore existed and which now exists.

IN ACCORDANCE WITH BUSINESS PRINCIPLES.

This was in accordance with the rule which prevails in all kinds of trade and commerce; for instance, a hotel keeper who uses several hundred pounds of meat daily can buy for 8 or 10 cents per pound, while individauls or small consumers must pay 12 or 15 cents for the same article. This is not denounced as discrimination, but the butcher who would fail to recognize the claims of the hotel keeper would be considered lacking in good business sense.

POOLING OR "JOINT PURSE" ARRANGEMENTS.

Q. Give the Commission the history of and the general results to the interests of the Central Pacific of pools, pooling contracts, and arrangements to which the Central Pacific Company has been a party.—A. The use of the word "pool" as applied to the arrangement between carriers co-operating to maintain agreed or uniform rates on a given traffic is not correct. A better term would be "joint purse," as it is used in English railway parlance, out of which each party is supposed to withdraw what it has or should have put therein; that is, what naturally belongs to it.

PACIFIC MAIL AND TRANSCONTINENTAL "JOINT PURSES."

The first and most important "joint purse" arrangement to which the Central Pacific Company has been a party was the Pacific Mail, which has been already explained. The original contract between the Pacific Mail Steamship Company and the Union and Central Pacific roads was dated September 15, 1871. This or similar contracts, with slight modifications and except at short intervals, continued in force until March 17, 1886.

The "joint purse" next in importance was the Transcontinental, which was formed in October, 1884, and dissolved in February, 1886.

OTHER "JOINT PURSE" ARRANGEMENTS.

We have also had "joint purse" arrangements with the Union Pacific and Denver and Rio Grande Railway Companies' on business to and from Utah; with the Atchison, Topeka and Santa Fé and Texas and Pacific Companies, on business to and from points in Arizona, New Mexico, and Texas; with the Pacific Coast Steamship Company, on business of Southern California; with the Oregon Railway and Navigation Company, on Idaho business; with the South Pacific Coast Railway Company, on Oakland and Alameda business; and with the San

Francisco and North Pacific Railroad Company, on business of Lake County.

MADE FOR PROTECTION OF REVENUE.

All these "joint purse" arrangements were for the protection of revenue, and were based on the legitimate taking power of each party. In other words, the intention was to give each party that proportion of the business which rightfully belonged to it. The following figures, taken from our annual reports, will show at a glance the effect of pools or joint purse arrangements on revenue, and the disastrous results of the lack of co-operation between carriers, or, in other words, the absence of pools. The average rate per ton per mile received by the Pacific system of the Southern Pacific Company, including the Central Pacific, was as follows:

	1885.	1886.
	Cents.	*Cents.*
West-bound	1.384	.710
East-bound	.902	.885
East and west bound combined	1.342	.792

INCREASED RATES RECEIVED.

Thus it will be seen that the average rate received on west-bound business in 1885, when pools were in force, was 90.5 per cent. higher than in 1886; and on all through business (east and west bound), 70 per cent. higher than in 1886, during ten months of which there was unrestrained competition. In other words, had the rates per ton per mile which prevailed on transcontinental business in 1885 been received on tonnage carried during 1886, the revenue would have been 70 per cent. more than that actually received.

BUSINESS AFFECTED BY POOLS.

Q. I hand you a paper dated San Francisco, August 11, 1887, being a statement of the gross freight and passenger receipts from 1877 to to 1885, inclusive, also contributions to pools and amounts not pooled during the same period. This paper was introduced by Mr. Miller in his testimony before the Commission on August 16, 1887, and withdrawn so that you, who were supposed to be its author, might further explain it. It will be seen from the questions put by the Commission to Mr. Miller that it desired to be informed what part of the whole business was in any way affected by pools. Will you please give such explanation on this subject as you can?—A. The paper dated August 11, presented to the Commission by Secretary Miller, contains a statement of actual contributions to pools during periods named, and these amounts being deducted from the gross receipts, left the balances for each year as the "amount not pooled." I have since learned that what the Commissioners desire to know is, "what part of the whole business is in any way affected by pools?"

I hand you herewith a statement showing gross freight and passenger receipts, also amounts of earnings protected by pools during the years 1877 to 1885, inclusive, and amount not covered by pool agreements for same years; from which you will perceive that from 25 to

33 per cent. of our gross revenue has been affected and protected by pools:

Statement showing gross freight and passenger receipts, also amount of earnings protected by pools and amount not covered by pooling agreements, for years 1877 *to* 1885.

Year.	Gross freight and passenger receipts.	Amount protected by pools.	Amount not covered by pools.	Per cent. of earnings protected by pools.
1877	$17, 438, 174. 79	$5, 636, 568. 09	$11, 801, 605. 80	32. 32
1878	18, 405, 852. 63	5, 456, 575. 23	12, 949, 277. 45	29. 64
1879	18, 904, 538. 15	4, 989, 177. 19	13, 915, 360. 96	26. 39
1880	21, 687, 037. 29	4, 810, 834. 52	16, 876, 202. 77	22. 18
1881	25, 517, 618. 56	6, 104, 764. 39	19, 412, 854. 17	23. 92
1882	28, 399, 397. 51	7, 341, 618. 54	21, 057, 748. 97	25. 85
1883	26, 504, 090. 83	8, 899, 522. 43	17, 604, 577. 40	33. 58
1884	26, 993, 000. 37	6, 667, 182. 18	20, 325, 818. 19	24. 70
1885	25, 460, 980. 53	6, 112, 859. 15	19, 348, 121. 38	24. 01
Totals	209, 310, 669. 71	56, 019, 102. 62	153, 291, 567. 09	26. 80

GROSS FREIGHT AND PASSENGER RECEIPTS, POOLED AND NOT POOLED.

The following is the paper alluded to in answer of the witness to the last question as withdrawn by Mr. Miller:

SAN FRANCISCO, *August* 12, 1886.

TO UNITED STATES PACIFIC RAILWAY COMMISSION:

GENTLEMEN: In answer to your call, I submit the following statement, showing gross freight and passenger receipts; amount of same pooled and not pooled.

Respectfully,

E. H. MILLER, JR.,
Secretary.

SAN FRANCISCO, *August* 11, 1887.

Statement of the gross freight and passenger receipts from 1877 *to* 1885, *inclusive; also contributions to pools, and amounts not pooled, during same period (Pacific system).*

Year.	Gross freight and passenger receipts.	Amount in pools.	Amount not pooled.
1877	$17, 438, 174. 79	$298, 871. 79	$17, 139, 303. 00
1878	18, 405, 852. 63	442, 334. 87	17, 963, 517. 81
1879	18, 904, 538. 15	503, 716. 27	18, 400, 821. 88
1880	21, 687, 037. 29	463, 226. 33	21, 223, 810. 96
1881	25, 517, 618. 56	497, 078. 88	25, 020, 541. 68
1882	28, 399, 397. 51	751, 624. 76	27, 647, 542. 75
1883	26, 504, 090. 83	699, 801. 71	25, 804, 288. 12
1884	26, 993, 000. 37	1, 060, 586. 13	25, 932, 414. 24
1885	25, 460, 980. 53	2, 127, 081. 56	23, 333, 918. 97
	209, 310, 669. 71	7, 744, 500. 30	201, 566, 169. 41

NOTE.—The year 1885 included the entire gross receipts and contributions to pools, and amount not pooled, for the entire system west of El Paso and Ogden.

E. H. MILLER, JR.,
Secretary.

RICHARD GRAY.

Sworn to before me the 24th day of August, 1887.

L. S. B. SAWYER,
Com'r U. S. Circuit Court, Nor. Dist. California.

SAN FRANCISCO, CAL., *August* 24, 1887.

A. N. TOWNE, a witness heretofore sworn by the said Commission and who has testified before it, comes, in pursuance of an arrangement made between the Central Pacific Railroad Company and the said Commission for the taking of further testimony in San Francisco, and testifies as follows:

DIVERSIONS, COMPETITION, FEEDERS, AND EFFECT ON FINANCIAL STANDING OF CENTRAL PACIFIC.

Examined by Mr. COHEN:

Question. Mr. Towne, I desired to get your testimony before the Commission on the question of the diversion of business from the aided and the non-aided lines, on the effect of the competition with the Central Pacific and the taking away of its business by the transcontinental roads that have been constructed under the aid given by the Government, such as the Northern Pacific, the Atlantic and Pacific, the Texas Pacific, and the connection of the Atlantic and Pacific, the Atchison, Topeka and Santa Fé, and the other non-aided transcontinental roads; also the causes that led the Central Pacific managers to build the various feeders to the original Central Pacific Company, and the other branch lines which are not consolidated with the Central Pacific Railroad Company; also the effect on the financial standing of the Central Pacific of the various leases it has made. But on reading your letter to Governor Stanford, of July 5, 1887, which is made a part of his evidence and appears as Exhibit —— in answer to question ——, I find that you have, in effect, answered all the questions more fully than you would be likely to do in response to such questions as I may now put to you; and, therefore, your explanation being so very full, and, as I think, so advisory to the Commission, for the convenience of the Commission I will insert your letter again as part of your testimony here. I will ask you to furnish another copy of that letter, and I will put it in as a general answer to the questions which I intended to ask you this morning.

ANSWERED BY A LETTER FROM WITNESS.

The following is a copy of the letter furnished by the witness in answer to the question:

SAN FRANCISCO, *July* 5, 1887.

HON. LELAND STANFORD,
President Southern Pacific Company:

DEAR SIR: In obedience to your instructions, I beg leave to report with respect to the question (No. 9) asked by the Pacific Railroad Commission, created by the act of Congress approved March 3, 1887: "Whether any traffic or business which could or should be done on the aided lines of said company has been diverted to the lines of any other company "or to non-aided lines," as follows:

DIVERSIONS TO THE LINES OF OTHER COMPANIES.

(1) *Through traffic.*—It is a matter of public knowledge that there are now several (9) transcontinental lines. It is unnecessary to name them. All except the original Central and Union Pacific line have been completed since 1880. Each of these constructed since 1880 has diverted more or less traffic from the original Union and Central Pacific line. The aggregate of these diversions is equal to more than 50 per cent. of the total through freight and passenger traffic for the five years and nine months ending with December 31, 1886, the period which has elapsed since the opening of the first line competing with the Central and Union Pacific line for through traffic.

The responsibility for the construction of these opposing lines rests, in my judgment, with the Government of the United States. It follows that the United States Government is the instrumentality through which said diversions of through traffic from the Union and Central Pacific roads to the other later built transcontinental lines was accomplished.

A part of each of said other lines received large grants of land from the United States Government, the grant being in each case, I believe, double the grant of lands made to the Union and Central Pacific Companies. It was the Government grant of land which induced the building of these roads; at least it, if not the sole cause of their construction, was the inducement which facilitated their construction and caused their early completion. In each case the building of these roads has been in advance of the settlement of the country through which they run. In nearly every case the country has been settled since the completion of the road, in the main through the advertising agencies of the railroad managers, whose motives were not only to develop traffic but sell their lands. There has been no time to date when the original line made by the Union and Central Pacific roads could not and would not have provided facilities for and amply accommodated all the through traffic carried by the other lines; hence the conclusion is inevitable that the United States Government, by granting large land subsidies in aid of roads which have been built, and which, since their completion, have competed for and taken the larger share of the through traffic from the Central and Union Pacific line, is directly responsible for the diversion of said traffic and the consequent loss in earnings to the Central Pacific Company and Union Pacific Company. This loss would have been very much greater, but fortunately the Southern Pacific Railroad Company, organized in 1865 under the laws of California to build a railroad from San Francisco to San Diego, thence east to the boundary of the California State line, there to connect with railroads to be built to the Mississippi River, passed in 1870 under the control of the men who controlled the Central Pacific. The control of the Southern Pacific by the Central Pacific owners very much delayed the extensions of the latter road, and after its extensions were made to connections with lines building westward from the Mississippi River, secured cooperation and harmony in working the traffic which was common to both the Central Pacific and the Southern Pacific lines that would have been impossible under separate control and which was of great advantage to the original or Central Pacific line.

There can be little questioning, in the minds of practical railroad men, of the proposition that had the railroads following the 32d and 35th parallel routes, respectively, been wholly constructed and operated by men who were not interested in the Central Pacific line, the diversion of traffic to those lines would not only have been more rapid and greater in degree, but [redacted] the revenue of the Central Pacific and Union Pacific line would have been diminished in much greater rate.

The extent of the damage to the Central and Union Pacific line by diversion of traffic to these other through transcontinental lines will be shown approximately by the general traffic manager in answer to the Commission's inquiry No. 54.

(2) *Local traffic.*—The traffic between San Francisco and other Bay points on the one hand, and the cities of Stockton, Sacramento, and Marysville, Cal., respectively, is shared by other carriers. This, however, scarcely comes under the head of a diversion from the Central Pacific aided lines. The other carriers sharing this traffic are (*a*) vessels navigating the bays, Sacramento River, San Joaquin River, and Feather River respectively—routes which were open and employed before the Central Pacific line was built; (*b*) the California Pacific road, which was completed and in operation before the Western Division of the Central Pacific. Therefore, whatever amount of this business has been done via the Western Division of the Central Pacific is, in fact, a diversion from the other carriers named.

DIVERSIONS TO NON-AIDED LINES.

While the roads, to which the diversions treated under this heading have been made, were built and are owned by other companies than the Central Pacific, yet as they are controlled by those who have also controlled and managed the Central Pacific, I presume they illustrate the diversions to non-aided lines referred to in the Commission's interrogatory.

Traffic to and from points south of Lathrop interchanged with San Francisco and Oakland has, since the completion of the San Pablo and Tulare road, Tracy to Oakland via Martinez, been carried over that road instead of being carried via Niles and Livermore. The road from Tracy to Oakland via Martinez is 11 miles longer than the road from Tracy to Oakland via Livermore, but the former is a practically level road, its maximum grade being 10 feet to the mile, over which an ordinary engine can draw fifty cars, loaded with from 10 to 12 tons each, while the latter crosses the Contra Costa Range with a maximum grade of over 52 feet to the mile, which would require three engines to haul the same train. The longer line does not lose appreciably, if at all, in the matter of time, when compared with the Livermore line, while it gains greatly in the matter of cost of operating.

All traffic of the Western Division of the Central Pacific east of Lathrop, to and from San Francisco and Oakland, has also been diverted from the "aided" line between Tracy and Niles in like manner and for the same reason as the traffic to and from points south of Lathrop.

All traffic interchanged by points east of Sacramento and north of Roseville Junction with San Francisco and Oakland has been diverted at Sacramento from the "aided" line between Sacramento and Niles to the California Pacific and Northern Railway, a non-aided line. The reasons for this diversion are:

(1) *Public convenience.*—The passenger train time between San Francisco and Sacramento via the California Pacific line is four hours, against six hours via the Central Pacific, Stockton and Livermore route. The public demands and is entitled to the best service we can give. We should be unable to justify sending passengers, or even freight, over the long and heavy line via Stockton against the shorter, easier, and much more attractive line via Benicia. Especially is this true of the through or transcontinental traffic, which is taken in competition with other transcontinental lines. The weight of this consideration with those whom the company serves is well illustrated by the fact that the United States Government chooses the short line for the transportation of its mails in consideration of (*a*) public convenience (*b*) and the fact that it pays for the transportation of mails by the mile. By so doing it expedites the mails and saves money; secures the best service at the least expense to the Government.

(2) *Economy in operating.*—The line from Sacramento to Oakland wharf via Stockton and Niles is 136 miles, and crosses, as I have before explained, the Contra Costa Range at a maximum grade of over 52 feet to the mile, while the California Pacific line via Benicia makes but 86 miles between Sacramento and Oakland wharf, and is practically a level line. If we were to equate the two lines, that is to say, reduce the grades and curves of both lines to their equivalent in straight level lines, we would find the Stockton route to be more than double the length of the Benicia line. There is fully that difference in the cost of handling the traffic over the two routes; in view of which it would have been inexcusable to use the longer and more expensive route.

The Government did not assume the responsibility of constructing the Central Pacific road. It contributed thereto by a grant of land and a loan of credit, but its motives were selfish. It was not moved by a desire to benefit or enrich the promoters of these enterprises. The result, as will doubtless be shown before the Commission, has amply justified the wisdom of Congress in granting the aid. No Government or individual ever made a better investment, or, if I may be allowed the expression, ever engaged in a more successful adventure, even if it transpires that neither the principal nor the interest of the loan is ever repaid. Neither did the Government assume the responsibility of operating the road when it was completed. It was left in the control and management of its owners, and we must assume that this was the purpose of Congress. We may also fairly assume that Congress expected the road to be managed by practical business men, upon established business principles, of itself a valuable promise, affording the best guarantee that sooner or later the company would be able to discharge its obligations to the Government. These shareholders found themselves engaged with the problem of making a support for nearly a thousand miles of road through a sparsely settled territory, which, for the most part, at the time, was regarded as incapable of producing anything in the way of traffic which a carrier might move with profit. It was a link in the transcontinental line connecting the Atlantic and Pacific coasts. California was the chief State on the Pacific coast, having a population in 1870 of but little over 560,000. It was known only as a mining State. Its agricultural resources were not only undeveloped but unknown, even undreamed of by the most sanguine. The chief value of the road was its value to the Government as a *military road*, as a strategic line, but the Government assumed no responsibility for its management, provided no guarantee of earnings, no means of support. The owners of the road were left to their own resources and devices to develop traffic and to make a support for it. The occasion called for the greatest skill and sagacity, untiring industry, and the utmost economy on the part of the owners and the agents they employed to assist in conducting the affairs of the company. The Government, which I here put in the place of the public, certainly understood this. It cannot be that at the time there was any warrant for interfering with the management of the road, or any thought of questioning the propriety of anything which the managers of the road might or should legally do in pursuit of the interests of the railroad company. Its interest was to secure the maximum of traffic at the maximum price, and to move it at the minimum of cost. It is not to be supposed that the circumstances I have described ever (until after the passage of the Thurman act) suggested to the managers of the road, to its patrons, to Government officials, or to Representatives in Congress, that the question whether the company should or should not be restrained from adopting any method of conducting its traffic, or any measure of economy in operating the road, or any advice to conserve, increase, or promote its traffic, should turn upon the point whether or not it

affected the earnings of a particular "aided" or "non-aided" portion of the road, so long as the method, measure, or device was lawful and had for its object the welfare of the company. On the contrary, it is fair to assume that these circumstances not only warranted but required the employment of every measure of economy, every lawful device to defeat or meet competition, every means to increase the traffic and enlarge the revenue of the company, regardless of special consideration for a part of its road, whether "aided" or "non-aided," so long as the communities on every portion of the road were afforded reasonable service at a fair price.

Were we to examine into the ultimate cause which led to the acquirement or building of the non-aided lines to which traffic may be said to have been diverted, it will be found in every case to have had for its object the strengthening and protection of the Central Pacific line. They are all feeders of the main line. They occupy territory which sooner or later would have been seized by other railroad companies. They have developed the resources of that territory and made it tributary to the main line of the Central Pacific. I venture to say that in each case the gain to the Central Pacific Company from contributions of traffic, the reduction of competition, the saving and cost of handling traffic by the acquirement of these "non-aided" competitors and tributary lines has more than equaled their cost. As a single example, take the California Pacific road. Suppose it had continued under separate and independent control from the Central Pacific, what its extension might and would have been to the damage of the Central Pacific in its most productive territory is scarcely a matter of conjecture. It certainly would have been extended through the Sacramento Valley and probably would have been constructed east and formed another through line. The control of the California Pacific was necessary to the Central Pacific. Having it, a reasonable regard for the public interest, as well as economy in conducting the traffic, compelled the Central Pacific managers to handle the traffic in the manner I have described. I need only suggest these considerations. They have doubtless been thought of and debated in your own mind to far greater length than in mine, or than I would be authorized to treat them in this communication.

Very respectfully,

A. N. TOWNE.

EFFECT OF LEASE OF CENTRAL BY SOUTHERN PACIFIC.

Q. In addition to that letter, have you anything further to say concerning the lease of the Central Pacific to the Southern Pacific and the financial condition of the Central Pacific at this time in contrast with its supposed condition if the lease had not been made, and upon the general prospects of the Central Pacific for the future, and also what would have been the effect on the business of the Central Pacific if the Southern Pacific, which was authorized by Congress in 1866 to be constructed, had passed into adverse ownership?—A. I had supposed that my letter to Governor Stanford would generally cover the question. I would say, the effect of the lease of the Central Pacific aided road, of comparatively small mileage, to the Southern Pacific Company, the latter owning and controlling many times the mileage of the former, has been to strengthen and benefit the Central Pacific. It has secured to the latter all its geographical advantages; it is thereby protected in its local traffic; it enjoys all possible support and protection in the through traffic natural to it. The lease protects it against destructive rivalry sure to have followed a divided control, and which could not have been averted had the Southern Pacific been owned or controlled by those adverse to the Central Pacific. Had there been as active competition against the aided portion of the Central Pacific in its early history as at the present time since the completion of other aided transcontinental roads, it would not have been able to meet its obligations to the Government nor to the first-mortgage bondholders; and neither would it now, but for the unaided feeders, located in the most productive sections of this State and running through populous valleys.

The practical wisdom of this will, year by year, as other competitive roads are constructed, become all the more apparent, demonstrating the necessity and importance of working the properties as one interest, giv-

ing protection alike to both, developing their resources and bringing out their capabilities in a way not otherwise impossible.

NO UNDUE DIVERSION OF TRAFFIC FROM AIDED TO NON-AIDED LINES.

There has been no diversion of traffic from the aided to the non-aided portion of the road which was not manifestly natural and geographically just. To illustrate this, take the line between this city and Sacramento; a portion of the traffic has gone over the non-aided line; it is true this traffic might have been forced over the aided line, but on the other hand it should not have been so sent, and for many reasons. For instance, the transportation of the United States mails, the early delivery of which benefits a great number of people, who cannot be as well served by a long and circuitous route as by a more direct one. The mails are transported between the two important cities of San Francisco and Sacramento by the short line, 89.79 miles, over a level, non-aided road, skirting the tidal waters, while they could be taken by the non-aided line to Niles, and thence over the mountains by the aided line to Sacramento, a distance of 139.67 miles. The line made up of the non-aided road is not only level, but of much better alignment than the aided line; the difference in favor of the non-aided line amounts to 858 feet of rise in grades and 2,620 degrees of curvature.

MOST PROFITABLE AND ECONOMICAL ROUTE BETWEEN SAN JOSÉ AND SACRAMENTO.

Then, again, the most economical and profitable route by which to move traffic between San José and Sacramento is over 17.54 of the aided line from San José to Niles; thence to Sacramento over non-aided roads via Oakland and Benicia, 108.21 miles, making total distance 125.75 miles as against 127.01 by the aided line. Add the difference in favor of the level line, with good alignment and grade, and the result is much in favor of the non-aided line; and yet the bulk of the traffic is diverted to the aided line, and trains so scheduled as to accommodate it by the latter route, although the tariff for freight and passengers is the same by the long as by the short route, and passengers are allowed to go either way. In contrast with this the postal authorities between San Francisco and Sacramento demand that the mails be sent by the short line via Benicia, for which service compensation is based on the mileage.

That which is so apparent in the the movement of United States mails is alike applicable to passengers and freight, and however much the management might feel inclined to divert commerce from its natural channel, it could not long resist the demands of its patrons, who, in all competitive traffic, route their own shipments, the same as the agents of the Government direct theirs.

METHOD OF CONSTRUCTING ROAD.

Q. It has been complained of by the Commission that the Central Pacific Railroad Company paid to construction companies the actual cost of making its repairs and 10 per cent. additional. Will you give your experience, as the general manager of the Central Pacific, as to whether that arrangement tended to the advantage or disadvantage of that company?—A. It is necessary in this connection for those not familiar with the circumstances to carefully consider the reason for em-

ploying others to do the work of the company, as otherwise it might, at first sight, be difficult to understand satisfactorily. When the road was ready for through traffic, in view of the temporary character of many of the long trestle bridges and other structures, it was deemed wise, and a matter of economy on the part of the company, to employ the superintendent of bridges and buildings of the construction company to care for and make such repairs as was necessary on the newly constructed road with the men employed in construction work going on extensively elsewhere off the aided portion of the Central Pacific. This superintendent had not only many and able foremen and workmen in great numbers, but he had also at command a complete outfit of pile-driving machinery, dredges, &c., together with a large shop, supplied with modern machinery and tools, ever ready to respond to any demand in case of destruction of bridges by fire or flood; all of which was important to the company and less expensive than it would have been if the company had duplicated these many and expensive machines and tools, and created an organization necessary to meet all kinds of emergencies arising on the road, especially during a stormy winter. Actual cost and 10 per cent. added for superintendence and use of tools and machinery, I recommended and urged as the cheapest and most satisfactory way of making these extraordinary repairs and betterments.

MILITARY IMPORTANCE OF ROAD FROM PORTLAND, OREGON, TO NEW ORLEANS.

Q. You have spoken in your report of the importance of the overland road to the United States Government for military purposes. What road, what line, were you referring to?—A. I refer especially to the line extending from Portland, Oreg., at the mouth of the Columbia River, to New Orleans, or to the delta of the Mississippi.

Q. Is not the effect of the building of that line from Portland to New Orleans taken in connection with the Central Pacific and Union Pacific and its eastern connnections to enable the United States at any time within a week or ten days to move its entire Army to any point within its territory?—A. Yes, sir. I am satisfied, with the amount of rolling-stock ever at their command, the various roads would be able to transport troops and munitions of war for the Government to any point in the United States within seven days from the time the order was given. In fact, troops could be moved from almost any point in the United States on to the line of the British possessions on the Pacific within the period of one week.

PLAN OF SETTLEMENT.

Q. You were asked to give to the Commission such recommendation as might occur to you for the settlement of the indebtedness of the Central Pacific Company to the United States. Are you enabled to do that now?—A. I have prepared a statement for the Commission which I will insert here as my answer to that question.

The following is a true copy of the statement last referred to, furnished by the witness:

SAN FRANCISCO, *August* 18, 1887.

PACIFIC RAILWAY COMMISSION,
San Francisco:

GENTLEMEN: I have, since your inquiry, given the subject-matter more mature reflection, and must confess it is difficult beyond my first thoughts. I have endeavored to fairly consider the question of what the future of the Central Pacific Company

would be, especially with reference to its earning capacity and with reference to its ability to meet its obligations to the Government. The great number of hostile and competitive routes now threatening its revenue, with more roads in contemplation, would very naturally make one hesitate before expressing an opinion as to what the future may be; in fact, I believe the future of the road depends almost wholly on Congressional action.

The outlook for the property, severed from its unaided feeders, the latter situated in populous and productive sections of this State and from the parental care of the Southern Pacific Company, would be anything but encouraging; in fact, I do not think it could be operated and made to pay the necessary running expenses, together with interest on first-mortgage bonds and other fixed charges.

The Government has, first, encouraged and aided in the construction of other roads, thus materially affecting and reducing the the revenue of the Central Pacific.

Second, it has, by the interstate commerce act, forbidden pooling, which also affects and lessens the ability of the company to meet its obligations.

Third, the company has not enjoyed all the Government transportation, as was contemplated under the act of 1862, nor has it received full compensation for the service it has performed—not even one-eighth the amount as compared with rates paid for like service prior to the completion of the road, thereby saving to the Government in its transportation many millions of dollars.

Fourth, there has been added to this large amount saved to the Government by the rapid construction of the road to an early completion, to say nothing of an immense saving of time and expense to the public thereby.

On the other hand, there was a loss to the company:

First, by the division of business to other subsidized roads.

Second, by the refusal of the Government to grant land patents.

Third, by forced sale of bonds during great financial depression occasioned by the Civil War.

Fourth, a loss of interest on sinking fund.

Fifth, a large amount due the company for transportation and withheld by the Government. Amounting in all to nearly $63,000,000.

Taking all these things into consideration, the least the Government can do in equity is to remit the entire debt, conditioned upon the company keeping the line open at all times to traffic; and further conditioned that the Central Pacific Company shall increase its debt to an amount sufficient to change the line over the Sierra Nevada Mountains between Coldstream, via Soda Springs, and the present line below the snow belt. This lower level tunnel line would very materially lessen the cost of operating the road, and thereby better enable the company to meet its obligations to the first-mortgage bondholders. This, together with a perpetual and guaranteed lease from the Southern Pacific Company, would make the first-mortgage debt doubly secure, and at the same time provide for the Government an uninterrupted line of communication from the mouth of the Columbia River, near Portland, Oreg., on the north, to the Delta of the Mississippi, near New Orleans, on the south, which for military purposes will ever be of immense importance to the Government.

The working of the Southern Pacific Company's roads in harmony with the Central, for the benefit alike of the latter and the public, is a subject to which I have given much thought and consideration. In order to bring about desired results and protection alike to the Central Pacific Railroad and the Southern system, situated as they are, forming in the one case a link in a great transcontinental line, largely dependent in its connections upon other roads, and the other a complete and the only through line of road under one ownership, extending from ocean to ocean, across the continent, required mature reflection and deliberation. It was necessary to carefully consider the reasons for the construction of the Southern line, and the full measure of the plan for harmonious and successful working of the properties. There seem to be but two possible courses to pursue. First, to operate them entirely independent one of the other, entailing the expense of maintaining two complete and separate organizations, requiring in many respects two men to do the work of one, and, what was of still greater importance, constant friction sure to arise in the endeavors of the separate managements to secure traffic not competitive or natural, as well as that clearly of a competitive nature to both, whereby the revenue of the two systems would immeasurably suffer, even if worked under agreed tariff rates, as such agreement for the working of two or more great systems have not, for any considerable time, proved harmonious, nor can they be made to.

The second plan, and the one which in my judgment seemed the best, and in fact the only one if the best results to the roads and their patrons were to be expected, was to work them as one, saving largely in the expense of operating two independent lines, insuring immunity from ever-fluctuating rates and exhaustive and ruinous waste of revenue sure to follow a divided and competitive management, which the rivalry of two such powerful contestants would ever threaten. On the other hand, under a consolidated management, the two interests would fully enjoy mutual pro-

tection and reciprocal consideration; each carrying the traffic naturally belonging to it, and each aiding and protecting the other against hostile encroachments, whether upon common territory or otherwise. The Central Pacific Railroad, very properly named, connecting at Ogden with the Union Pacific and the Denver and Rio Grande roads, forming a link in a trunk line between the Pacific Ocean and the Missouri River, all-sufficient for the traffic, was, soon after its construction, placed in peril, and threatened by two transcontinental lines, competitive in their nature, crossing the Colorado River at the Needles and Yuma, respectively, entering California, and thence westward on their way to San Francisco. To ward off the inevitable results consequent upon the construction of these rival lines of road from the east, and to more thoroughly protect the Central Pacific in the enjoyment of its traffic, justified any measure of protection. The Central was a corporation powerless to act, and has ever been classed in this respect, while on the other hand the Southern has at great cost been pushing forward against the encroachments of hostile roads from the east, offering thereby protection to the Central, and the aided lines east thereof, which it seems to me would be an element in this calculation and an important factor in justification of the Government's releasing the company from all demands.

Respectfully,

A. N. TOWNE,
General manager.

POOLS, REBATES, AND CONSTRUCTIVE MILEAGE.

Q. The Commissioners have sought to get all the information they could on the subject of pooling arrangements, rebates, and constructive mileage. Have you any statement to make on either of those subjects?—A. I have little or nothing to add to what has already been given the Commission by officers of the company and the general traffic manager. Pooling, constructive mileage, and the system of rebates has been in existence many years. The former (pooling) is quite as essential to the public generally, for the better maintenance of rates, as it is for the railroad company; and it is to be hoped that the Interstate Commission will soon or late recommend to Congress such changes in the interstate law as will enable the companies to continue a system of pooling the same as is done in England and in nearly all portions of Europe where pooling is generally legalized.

Q. What has been the general effect on the interests of the aided lines from the pooling arrangements they have heretofore been parties to?—A. Beneficial.

Q. With respect to rebates, do you know of any arrangement or contracts made for rebates allowed to any corporation, firm, or person other than such as would be allowed to any other corporation, firm, or person under like circumstances?—A. I do not recall any.

MANNER OF ALLOWING CONSTRUCTIVE MILEAGE.

Q. If you have anything to say on the subject of constructive mileage, will you state your views?—A. In the division of earnings between different companies it is a universal custom to allow the weaker party a constructive mileage; and this is the easiest and most desirable way of arranging the division of earnings, which better enables the companies to quote rates to the public through over the various lines interested.

RATE PAID TO ROCKY MOUNTAIN COAL COMPANY FOR COAL.

Q. The Commission has sought to be informed of the rate paid by the Central Pacific Railroad Company to the Rocky Mountain Coal-Mining Company for coal. Will you state what is the highest price and the lowest, and the dates of the highest and lowest prices?—A.

My recollection is we paid as high as $2.85 per gross ton of 2,240 pounds. The exact date I do not remember; but it was about the time, if I remember correctly, that the coal mines along the line of the Union Pacific road were having troublesome and disastrous strikes among the miners. We are, however, at the present time, and I think for some time past have been, paying only $1.85 per net ton of 2,000 pounds.

Q. Could the Central Pacific Railroad Company be furnished the same quality of coal at any lower price than it paid to the Rocky Mountain Coal Company?—A. No, sir; I do not think the same quality of coal for steaming purposes can be obtained anywhere else at as low rates as it is furnished by that Company.

Q. Mr. Stubbs was asked to state the prices charged by the Rocky Mountain Coal Mining Company for commercial coal furnished to the public along the line of the Central Pacific. He said he had no knowledge or information on the subject. Can you give that information?—A. The Rocky Mountain Coal Company are charging $2 per ton for commercial coal furnished to the public. I have no information what they were charging at the time that we were paying $2.85 per ton.

A. N. TOWNE.

SAN FRANCISCO, *August* 24, 1887.

N. T. SMITH, having been duly sworn by L. S. B. Sawyer, commissioner of the United States circuit court, testified as follows:

Examined by Mr. COHEN:

Question. What is your position?—Answer. I am assistant treasurer of the Southern Pacific and treasurer of various other companies.

Q. How long have you been connected with any of the companies?—A. Since 1871.

SAN FRANCISCO TRANSFER COMPANY.

Q. Were you acquainted with a corporation, association, or firm known as the San Francisco Transfer Company?—A. Yes, sir.

Q. From what time?—A. From 1872 or 1873.

Q. Did you know the firm of Kennedy & Long?—A. Yes, sir.

Q. You knew Mr. M. G. Kennedy?—A. Yes, sir.

CONNECTION OF KENNEDY & LONG WITH COMPANY.

Q. What had Kennedy & Long to do with the business of the San Francisco Transfer Company?—A. It seemed to me they were the principal owners, the proprietors, as far as I knew. They ran it.

Q. Under an arrangement with the Central Pacific?—A. Under some arrangement with the Central Pacific.

NATURE OF BUSINESS.

Q. What was the business of the San Francisco Transfer Company?—A. It was transferring baggage principally from the cars to the different parts of the city.

Q. And from residences to the cars?—A. From residences to the cars; yes, sir. My recollection of it is they had the exclusive control of that business.

Q. How long were Kennedy & Long engaged in that business—for what time?—A. That I do not know. I became acquainted with them in 1872 or 1873. At that time our office was on the corner of Market and New Montgomery street and they had their office and baggage-room in the same building, down stairs, our office being upstairs.

Q. How long after that did Kennedy & Long retire from that business?—A. They retired some time in 1872 or 1873. I do not recollect the year. In one of those years.

Q. Who succeeded them in the business?—A. They were succeeded by Smith & Coleman.

CIRCUMSTANCES OF TRANSFER TO SUCCESSORS.

Q. Do you remember the circumstances under which the business was transferred from Kennedy & Long to Smith & Coleman?—A. I remember the business was being run very badly, and the firm of Kennedy & Long seemed to be very much embarrassed. There was much complaint about their business. In fact, there were times when they could not get their teams and wagons out of the stable. They were careless about debts. Mr. Kennedy was very anxious to borrow money to help him along. Failing to do that he was anxious to sell out a portion of the business. It was at that time that I first became acquainted with him. He came to me and wanted I should go in with him, if I had the means. There was nothing in the business that was inviting to me. Afterwards he seemed to be in a great deal of trouble, unable to carry on his business in consequence of a lack of funds. His frequent declaration was that if he had more money to put in the business he could make a profitable business out of it; he could not get any money. Governor Stanford asked me at one time if I would not look into it; and he said he felt friendly to Mr. Kennedy, and if they could carry on the business he would like to have them do it. Later, however, there were arrangements made by which the whole business was transferred to Smith & Coleman. I was somewhat instrumental in making that transfer. It is long ago now, and the facts not having been brought to my mind during these many years I forget the details about it. I think, if I recollect rightly, that I was a director for the new company for a little while.

Q. Of which company?—A. Kennedy & Long. I know I was a director of one of the companies, perhaps both, for a time.

Q. What do you mean by both companies? You have only mentioned one.—A. The new company was that of Smith & Coleman.

DETAILS OF THE TRANSFER.

Q. What was the name of the company formed by Smith & Coleman?—A. I do not know that I remember the name of the new corporation. I know there was a transfer made, and I was solicited to go in there by Mr. Kennedy himself to assist in making the transfer. That is why he came to me to assist him. We found in making the transfer that the debts were pretty large. Smith & Coleman claimed that they were larger than they had been represented to them. We had some little trouble in agreeing as to the amount; but if my recollection serves me right they agreed to take the concern and pay all the debts. They had to do that in order to release the stock, the wagons, horses, &c., which were at that time, I think, held by attachment.

Q. By attachment at the suit of the creditors of Kennedy & Long?—A. Yes, sir.

THE TRANSFER CAUSED BY FINANCIAL EMBARRASSMENT.

Q. Is it not the fact that Kennedy & Long would have retained the business if they had been able to meet their engagements, and that the transfer to Smith & Coleman was the necessary result of their financial embarrassments?—A. No doubt of it in my mind. I feel very certain that they would have continued in the business had they not been embarrassed.

Q. From your knowledge of the men and the circumstances, did you ever see any disposition on the part of Governor Stanford, or any other officer of the Central Pacific, to force Kennedy & Long to lose their business?—A. No. On the contrary, I always felt in making this transfer that Governor Stanford's friendship was with Kennedy & Long. They had been in the business for some time. I know he expressed regrets that they had become embarrassed and not able to conduct that business properly, were not able to attend to the public properly. There was a good deal of complaint on the part of the public of business not being attended to. It frequently happened that they could not get their horses out. They did business for some time, if I recollect right, with an attachment on their teams.

N. T. SMITH.

Sworn to before me this 24th day of August, 1887.

L. S. B. SAWYER,
Com'r U. S. Circuit Court, Nor. Dist. Cal.

SAN FRANCISCO, CAL., *August* 24, 1887.

WILLIAM HOOD, having been duly sworn by L. S. B. Sawyer, commissioner of the United States circuit court, testified as follows:

Examined by Mr. COHEN:

Question. What is your position?—Answer. Chief engineer of the Southern Pacific Railroad Company.

SUCCEEDED FORMER CHIEF ENGINEER MONTAGUE.

Q. You are chief engineer of the Central Pacific Railroad Company also?—A. I am.

Q. Are you the successor of Mr. Montague, the former chief engineer of the Central Pacific?—A. Yes; his direct successor.

Q. Have you in your custody the books, papers, and records that were kept by Mr. Montague as chief engineer of the Central Pacific?—A. Yes, sir.

CROSS-SECTION BOOKS.

Q. I have been asked by the United States Pacific Railway Commissioners to produce to them the cross-sections of the Central Pacific Railroad Company over the Sierra Nevada Mountains. Are those cross-sections in your possession?—A. The greater part of them.

Q. In what form are those cross-sections kept?—A. In the original field books and as noted in the field during the construction of the road.

Q. How many books of the kind did you find?—A. We find fifty-eighty books.

Q. Are these fifty-eight books original books or copies from some other statements?—A. They are the original cross-section books.

A PORTION LOST IN TRANSPORTATION.

Q. Where are the cross-section books that you do not find?—A. Mr. Montague informed me that when the office and books were moved from Sacramento to San Francisco, in 1873, several boxes in which books, maps, and papers were packed never arrived, but were lost in some unknown manner in transportation. Those boxes may have contained some of the cross-section books which we cannot find.

Q. When did you first become connected with the Central Pacific Railroad Company?—A. As assistant engineer, in the spring of 1867.

Q. Mr. Montague was chief engineer at that time?—A. He was chief engineer.

CONSTRUCTION OVER SIERRA NEVADA MOUNTAINS.

Q. Did you take any part in the construction of the Central Pacific Railway over the Sierra Nevada Mountains?—A. Yes, sir. And I was more or less intimately connected with all the construction of the Central Pacific Railroad from that time until the rails were connected at Promontory. There is a statement made by me under date of July 23, 1887, to Governor Stanford, which is appended to his answer to question 51, and is marked Exhibit 9.

Q. Have you anything to add to your written statement?—A. Nothing in reference to the general features of the construction of the Central Pacific.

Q. Are you willing to send your 58 cross-section books and any others that you may find for the inspection of the Commission?—A. I am.

ARRANGEMENTS MADE FOR REPAIRS ADVANTAGEOUS TO CENTRAL PACIFIC.

Q. The Commissioners have sought to obtain testimony as to whether the arrangement made by the Central Pacific Railroad Company for having its ordinary and extraordinary repairs, betterments, and improvements made by a construction company at actual cost, with 10 per cent. added, was to the advantage and interest of the Central Pacific Railroad Company or the reverse. Can you, from your experience as an engineer on the road, give any information upon that question?—A. The ordinary repairs of the railroad are chiefly repairs on track and structures in immediate contact with the track. These repairs on the Central Pacific, as well as all other railroads, are done by the railroad section men, who become specialists in that direction. When a radical reconstruction is required at any point on the road, the work takes a character similar to that of new construction, and is not work which the railroad employés are accustomed to. The Pacific Improvement Company, who are constructing many new roads, have expert foremen and every appliance, and are themselves so situated that they can do this reconstruction work for the railroad companies much cheaper than the railroad companies could do it themselves with inexpert men. Therefore, it is greatly to the advantage of the company. The actual cost and 10 per cent. added is far less than the amount for which it could be done by section men or other employés unaccustomed to that kind of work.

UNPROFITABLE FOR COMPANY TO REGULARLY EMPLOY SKILLED WORKMEN.

Q. It has been suggested by one of the Commissioners that it would be to the interest of the Central Pacific to keep the labor necessary and

the material required for such work on hand to meet an emergency. How would that strike you?—A. Well, the keeping of material on hand requires capital invested and involves a deterioration of material when kept long in stock. A construction company doing new construction all the time and required to have a large amount of material on hand, can furnish that, from time to time, to the Central Pacific Company as required to much greater advantage to both parties than the Central Pacific could furnish it. I do not think it would be profitable for the Central Pacific to keep in its employment the requisite number of men possessing special skill in construction work so as to have their services in case of an emergency, because there would be a great deal of the time when they could not be used; in fact, the bulk of the time.

Sworn to before me this 24th day of August, 1887.

L. S. B. SAWYER,
Com'r U. S. Circuit Court, Nor. Dist. Cal.

SAN FRANCISCO, CAL., *August* 26, 1887.

JOHN J. HALEY, having been duly sworn by L. S. B. Sawyer, commissioner of the United States circuit court, testified as follows:

Examined by Mr. COHEN:

Question. How long have you lived in California?—Answer. I have lived in California thirty-five years. I am now seventy-four years of age.

Q. Were you acquainted, in the years 1870, 1871, '72, and '73, with a corporation or association known as the San Francisco Transfer Company?—A. In the winter of 1872-'73 I knew Mr. Kennedy of the firm.

SAN FRANCISCO TRANSFER COMPANY.

Q. Was that a corporation or a firm, the San Francisco Transfer Company?—A. It was a corporation. I knew Mr. Kennedy of that corporation.

Q. He was the manager?—A. He was manager. I supposed it was a corporation because they talked about stock.

Q. There was a firm of Kennedy & Long who were supposed to be the representatives of that corporation?—A. I knew Mr. Kennedy. I did not know Mr. Long.

Q. Mr. M. G. Kennedy was his name?—A. Yes, sir.

WHY IT WAS TRANSFERRED TO SMITH & COLEMAN.

Q. What did you know of the business of that corporation and the facts which led to the transfer of its business to Smith & Coleman?—A. Well, I should think it was in the spring of 1873, that is my impression—it is so long ago I cannot remember the exact date; I know there was some rain about the time. Governor Stanford sent for me. I went in and he asked me the question. He said, "Don't you want to go into that transfer business? Kennedy & Long are so much in debt they cannot get along. I want somebody to go there and buy them out. They want to sell or take a partner, or something of that kind. Look into it and see if there is anything in it. I do not care much about it, but there ought to be some money in it if managed properly." I was some

time investigating. I found they were indebted more than $10,000. One man, I learned, had their stock—that is why I supposed it was a corporation; had their stock for about $10,000. I looked into it thoroughly, and made up my mind not to have anything to do with it. About that time a Mr. Smith come to me. He was introduced to me by Judge Robert Robinson. He wanted to know if I was going to take that business. I told him no, I had made up my mind not to. He wanted to know if I would give him what knowledge I had about it. I said yes. He said that he had some notion of buying out that concern.

Q. The Mr. Smith you mention was J. Henley Smith?—A. I have known him intimately since. It was J. Henley Smith. I did not know his name then, except that it was Mr. Smith. I did give him all the information I had. Well, he was considerably dampened about it, but after that, perhaps some time within three months, he did buy it out with a Mr. Coleman, whom I did not know.

I also reported to the governor that I did not want anything to do with it. I knew that they were very much embarrassed. Their horses were attached while I was talking about it; their horses and wagons were attached. I told Mr. Smith that, perhaps, well managed, it might do something. I did not think they would ever make a dollar, but would get in debt all the time.

JNO. J. HALEY.

Subscribed and sworn to before me this 26th day of August, 1887.

L. S. B. SAWYER,
Com'r U. S. Circuit Court, Nor. Dist. Cal.

FRIDAY, *August* 26, 1887.

W. H. MILLS, a witness heretofore sworn by the said Commission, and who has testified before it, comes, in pursuance of an arrangement made between the Central Pacific Railroad Company and the said Commission for the taking of further testimony in San Francisco, and testifies as follows:

SALES OF LAND OF CENTRAL PACIFIC TO PRESIDENT STANFORD.

Examined by Mr. COHEN:

Question. You have spoken of sales of land of the Central Pacific made to Governor Stanford. Please state the extent of the sales, the prices obtained, and how they compared as to price with other sales of similar land made at or about the same time?—Answer. The sales made to Governor Stanford were made, according to my present recollection, in 1884. I remember distinctly the negotiations were conducted entirely with George Champlin and Ariel Lathrop. I never had a conversation with Governor Stanford on the subject until since the matter was brought up before this Commission. The negotiations extended over a considerable period of time and resulted in sales at three different intervals. A part of the land sold to Governor Stanford was unsurveyed at the time of the sale, and, I think, remains unsurveyed now.

UNSURVEYED LAND IN BUTTE AND TEHAMA COUNTIES.

Q. Situated where?—A. In Butte County, California; a small portion in Tehama County. The lands were high rocky lands, having a

severe winter upon them. They were purchased by his agents for the purpose of protecting a sheep range. They were sold at the highest price obtainable, and no consideration was given to the fact that they were being purchased for Governor Stanford, and no concession made in prices in consequence of that fact. Some of the land sold to him had been sold to other parties previous to this time and they had permitted their contracts to lapse. The lands were resold to Governor Stanford on the basis of the original sales, except in one instance, where, finding the lands had been sold at a price which would not justify the purchaser in retaining, cultivating, and improving it, the land having come back to the company, it was graded down by a regularly authorized grader to a lower price; a custom which frequently obtains in the department in relation to lands which have been sold and which under the experiment of agriculture have been proven not to be as valuable as the original graded price.

THE SALES IMPARTIALLY CONDUCTED.

It will answer the question very fully to say that the negotiations, the prices asked for the land, and the prices obtained for the land were such as would have been made to any other customer of the department. The sale was conducted in all respects as if Governor Stanford had no connection with the Central Pacific Railroad, no contingent interest in its lands, or had no contingent interest in it. No concession was asked on that account. It never was at any time pleaded by the agents of Governor Stanford that some price ought to be made to Governor Stanford lower than would be asked of other customers. On the contrary, some apprehension was manifested by them that a higher price would be asked because it was Governor Stanford who was buying the land.

All of the lands, I understand—I have reason to know because I examined the deed afterwards to see whether or not the lands were properly described—all of the lands which were sold in those sales to Governor Stanford were deeded to university purposes to the trustees of the Leland Stanford, Jr., University.

SALE OF LAND ON OPPOSITE SIDE OF SACRAMENTO RIVER.

One of the sales was made after it had been decided to deed the lands to the university, on the opposite side of the Sacramento River from where the main body of the land lay, because it was feared that it might become necessary in the future to change the course of Deer Creek, and that the change of the course of Deer Creek might injure that piece of land. Governor Stanford paid for that piece of land the full graded price, the price for which it had been offered to others for some ten or twelve years with no takers; our view of the matter being that they desired to change the course of Deer Creek, and it might inflict injury on land lying immediately opposite; that land in the hands of some other purchaser would give a right of action for damages by reason of the change of that creek. That land was purchased to protect land which had at that time been deeded to the university.

THE "PROMONTORY RANGE."

Q. You stated in your testimony given before the Commission that you made a sale of land to the Promontory Stock Company, which was composed of a son of Charles Crocker and other persons. Will you

give your experience with reference to that tract, what attempts had been previously made to sell the same, and the price obtained from Mr. Crocker as compared with previous efforts?—A. I became acquainted with what is known as the Promontory range, and which has been supposed to embrace 200,000 acres—I say, has been supposed to embrace that, because for the most part at the time of the sale it was not surveyed; and even at this time a large proportion of it is still unsurveyed. I became acquainted with it in 1883 and believed it to be an excellent range. I began to make efforts to find a purchaser for that range. The first persons who examined it were parties from San José. They made a thorough examination of the range for goat and sheep purposes. They discovered that the most of the water upon which the range depended for value was in the possession of adverse holders. They rejected it.

SALE OF SOUTHERN PORTION OF THE RANGE.

The southern portion of the range, supposed to contain 100,000 acres, more or less, was sold to Sharp Walker by a contract of sale, from which he subsequently receded. The sale had gone to the extent of binding him legally to take the land, but as there were many questions in the minds of the law department whether the contract could be enforced he was permitted to withdraw.

DEFAULT OF TARPEY AND PHILLIPS.

The third attempt to make a sale was to D. P. Tarpey and Henry Phillips, as actual partners, but it was known to me at the time that there were behind them some capitalists in San Francisco. They made an actual purchase of the range subsequently sold to Mr. Crocker, for the sum of $200,000. Their first payment was to have been made on the first day of July, the year following the sale. This sale was made I think late in 1884, and the first payment was to be due and payable on the first day of July following.

When that time came around they defaulted in their payment, having expended, as they claimed, a large sum of money and a great deal of time and attention to the subject of getting possession of the land which they had purchased. For my part I contemplated seriously the enforcement of the contract; but the parties in interest visited Governor Stanford and asked to be relieved, declaring that the bargain was a hard one, that it would inflict upon them pecuniary loss. Governor Stanford requested, rather than instructed, that I should release them from their obligations. I also consulted Director C. F. Crocker in the premises at the time, insisting so far as I was concerned that the contract should be enforced against them. Col. Charles F. Crocker agreed with me for a part of the time, but subsequently relinquished his position and said that I might forgive them and recover the contract.

AN OPTION TO TARPEY.

Immediately after the surrender of that contract, the surrender of which was formally accepted by the land department, I gave to D. P. Tarpey an option to buy or sell that land for $200,000. The option was in writing, providing that Mr. Tarpey should have for a period of two or three years, the exact terms not now remembered, the option to purchase or sell that land for $200,000. It further provided that the

option should not preclude the sale of the land by the land agent of the company, but that if the land was sold by negotiations in the land department of the company, thirty days' notice should be given to Mr. Tarpey of such sale, which notice, after the expiration of thirty days, should terminate his option.

SALE TO REPRESENTATIVE OF CHARLES CROCKER.

The sale was subsequently made by the land department to a representative of Charles Crocker. Negotiations were conducted chiefly by John W. Taylor. Mr. Taylor examined the range carefully, as he contemplated forming a partnership with the son of Charles Crocker and Lieutenant Buford, and after examination decided to purchase provided a rate upon the land could be obtained which would be satisfactory. I made the rate to the representatives of Mr. Crocker at $208,640; $8,640 more than Mr. Tarpey's option.

EFFECT OF TARPEY'S OPTION.

It should be explained that Mr. Tarpey's option bound us during its life not to sell the land for less than the option price to him. We were, therefore, bound not to sell it for less, but we could sell it for more. Mr. Tarpey was notified that the land had been sold, a notice given that his option would terminate at the expiration of thirty days. He came to the office, surrendered his option, and took an agency with the Promontory Stock Company, who made arrangements immediately with Charles Crocker for the purchase of the land, it being the intention of Mr. Crocker to resell to the Promontory Stock Company. Mr. Crocker signed the contract himself, but did not conduct negotiations with the department.

PRICE TO MR. CROCKER HIGHER THAN PREVIOUSLY ASKED.

Q. You got from Mr. Crocker all you could possibly obtain from anybody for that land?—A. I received from Mr. Crocker a higher price for the land than I had been asking for it. I had sold it absolutely for $200,000 at one time and had given an option for its purchase at $200,000. I sold it to Mr. Crocker for $208,640. Mr. Crocker insisted after the negotiations were closed with his representative that the whole matter should be taken before the board of directors, as he, himself, was a director of the company and did not wish to have it appear that he had negotiated the sale, which, in truth, he had not.

I took the matter before the directors of the company and explained to them the history of the transaction concerning the Promontory range. Governor Stanford gave the matter very careful attention and finally decided that the purchase price was the full value of the land. The condition of the adverse possession was such that it was obvious that it would require a very large expenditure of money to reduce it to the possession of the purchaser.

RECEIPTS AND EXPENSES OF LAND DEPARTMENT.

Q. I want you to state here the total receipts for land sales, leases, contracts, and stumpage from the date of the grant to the first day of the present month.—A. The total receipts from all sources of the land department from the beginning of the administration of the land grant to the first day of August, 1887, were $7,560,478.45.

Q. What have been the actual expenses of conducting the department?—A. The question can be answered from the books: $1,029,876.73, leaving net rece pts over expenses $6,530,601.78.

Q. The expenses you have spoken of do not include interest, but merely the ordinary executive expenses of the department?—A. Yes, sir. The interest account began to run October 1, 1870.

Q. That is not included in the amount of expenses you have given?—A. No, sir. It would very greatly exceed the gross of that.

REQUIREMENTS OF COMMISSIONER OF GENERAL LAND OFFICE.

Q. Have you any statement to make to the Commission concerning your department and its relations with the Government? If so, please do it.—A. I submitted to Governor Stanford answers to the written questions relating to the land grant which are annexed to Governor Stanford's deposition, marked Exhibit No. 6. In addition to the matter set forth in the statement made to Governor Stanford a discouragement has been offered and interposed by the Commissioner of the General Land Office to the taking of title by requiring an affidavit with respect to each 40-acre tract as to its mineral or non-mineral character. The surveys of the United States do not segregate the interior of sections into either quarters or sixteenths; that is, into 160-acre tracts or into 40 acre tracts. By reason of this failure to make surveys into 40-acre tracts it is impossible for a witness to identify the lands concerning which his deposition is required. The lands are therefore not surveyed in a manner to suit the ruling of the department. It being impossible to identify the 40-acre tract within the exterior boundaries of a section of land, it will be impossible to obtain the testimony required by the Commissioner of the General Land Office, and therefore the rule practically arrests, so long as it is in force, the process of making lists of selections which are the bases of obtaining title to the land.

THE ACT OF JULY 10, 1876.

Section 21 of the act of 1864 provided that no patents should be issued to the company or party in interest until the cost of surveying, selecting, and conveying the same had first been paid. The provision also provided that such cost should be paid as the title should be required by the company or party in interest. By the act of July 10, 1876, this portion of section 21 of the act of 1864 was repealed, and in lieu thereof it was provided that the cost of surveying, selecting and conveying the land should be paid and payable as required by the Secretary of the Interior. The act has been in force since the date already mentioned, July 10, 1876, and up to the present time the Secretary of the Interior has made no demand upon the company for the cost of surveying, selecting, and conveying.

WM. H. MILLS,
Land Agent, C. P. R. R.

ARTHUR BROWN, having been duly sworn by L. S. B. Sawyer, commissioner of the United States circuit court, testified as follows:

Examined by Mr. COHEN:

Question. Where do you live?—Answer. In Oakland.

Q. How long have you resided in California?—A. I have been in California since 1864.

Q. Before that time?—A. I was up North, in Oregon.

CONNECTION WITH CONSTRUCTION OF CENTRAL PACIFIC.

Q. When did you first become connected with the construction work of the Central Pacific?—A. In February, I think, 1865.

Q. In what capacity?—A. I was employed by Mr. Strobridge, superintendent of construction, one month, as foreman on the grading. Then I was put in charge of the building of bridges. I was afterwards appointed superintendent of bridges.

Q. Who was your employer?—A. I was employed by Charles Crocker.

Q. Charles Crocker was the contractor for the work at that time?—A. Yes, sir.

Q. How long did you remain in that capacity under Mr. Crocker?—A. I remained until the road was finished—at least until his contract was ended.

Q. Then by whom were you employed?—A. I was employed by the Contract and Finance Company.

Q. You remained in the employ of the Contract and Finance Company until the road was finished to Promontory?—A. Yes, sir.

Q. How far had the work progressed east of Sacramento when you were first employed under Mr. Strobridge?—A. The end of the track was at New Castle.

Q. Where was the end of the track when you were appointed superintendent of bridges?—A. Still at New Castle. I was only one month n Mr. Strobridge's department.

SUPERINTENDENT OF BRIDGE DEPARTMENT.

Q. As superintendent of the bridge department what did you do other than building bridges?—A. I built the snow-sheds.

Q. You built water-ways and trestle-works?—A. Yes. And station-houses. All wooden structures.

Q. Water-tanks?—A. Water-tanks, turn-tables, &c.

DIFFICULTIES EXPERIENCED IN CONSTRUCTION.

Q. Can you give your experience as to the difficulties that you encountered in crossing the mountains, getting materials and owing to the character of the weather, between New Castle and the State line?—A. In 1866 the road was built to Cisco. In the winter of 1867, we had great trouble in keeping the road open. It was necessary to employ a great many men shoveling snow. There were several very expensive slides there above Alta. It was then decided to build snow-sheds; and I had instruction to make plans and estimates for sheds to be commenced in the spring as soon as the snow was cleared. We commenced building some experimental sheds that summer. I forget now how much we built; not a great deal. The idea was to cover all the cuts.

SEVERITY OF THE WEATHER.

Q. How did the fall of snow and the temperature of the weather generally interfere with your work during the winter months?—A. Well, any work that we did that was through the snow was at tremendous expense. We had several buildings broken down that winter by the weight of the snow, and a large trestle near Cisco carried away by snow.

Q. In other words, the severity of the climate added greatly to the cost of doing the work?—A. Oh, yes; it doubled it. More; made it nearly three times as expensive.

Q. What was your facility in getting men to do that work?—A. It was very difficult in the winter time. Men would not remain without being paid high wages.

Q. Had you facilities for taking care of them?—A. Yes. But with such an immense amount of snow it was hard to get around anywhere. I remember I had an office and bed-room which had to be shoveled out every time I returned after going over the mountains. The snow had to be shoveled out before I could get into it. A person would have to be on the ground to have any idea of the trouble we had to contend with on account of snow.

WAGES OF LABORERS.

Q. What did you pay for men in your department?—A. Carpenters were paid $4 per day. Laborers were paid from $2.25 to $2.75.

Q. Did the amount paid to laborers include board, or did the laborers board themselves?—A. We boarded them and deducted the board.

Q. What did you pay the foreman of carpenters?—A. Four and a half and five dollars. We paid the foreman of the laborers about $3.75.

MEASUREMENTS OF WORK.

Q. Who measured the work that was done in your department so that the contractor could obtain his pay for it?—A. That is the lumber? We had several men employed for that purpose. I made out all the bills, and the measurements were made up under my supervision.

Q. To whom did you report the measurements?—A. I reported to the office of Charles Crocker & Co. They had the contract, I understand, over to the State line.

Q. To whom did you report on the amount that was due to Charles Crocker & Co. for the bridge work done?—A. I was employed by him and I reported to him.

Q. A statement was made to the Central Pacific based on your measurements?—A. Yes, sir.

Q. Were those measurements you made true and correct measurements of the work that was done and so reported?—A. Always.

NO EFFORTS TO INFLUENCE REPORTS.

Q. Did Mr. Crocker ever seek to influence you in any way to sign a report which was made for work done during the time he was contractor?—A. No, sir; never.

Q. Did any one in his behalf?—A. No, sir; no one in his behalf ever interfered in any way.

Q. When you were working for the Contract and Finance Company you made true and correct measurements in the same way?—A. At all times. I have always reported correctly.

Q. Without any interference from any one?—A. Without any interference from any one.

FACILITIES FOR OBTAINING SUPPLIES.

Q. What was the facility with which you were enabled to get your supplies during the time that you were working over the mountains?—

A. Very often the road was blocked by snow, and a great deal of difficulty in getting them.

Q. Did you have to team bridge materials over the mountains?—A. There are two large bridges between Cisco and the Summit. The timbers were prepared at Emigrant Gap. We had to resort to hewn timber. For timbers that were intended for the bridge chords we would hew a stick 18 inches square and rip it up with whip-saws, making two pieces 9 by 18. In that way we got the timber, as there were no sawmills. That timber was hauled up on sleds on the crust of the snow. The top became so solid that we could haul them up to where the bridge was to be put up; and we had to dig a hole in the snow 16 feet deep for the purpose of laying the timbers on the ground.

Q. What other materials did you use in your department besides timber?—A. We used a great deal of iron and spikes, bolts and nails.

PRICES OF MATERIAL.

Q. Have you got any memorandum that would give the prices of materials that you used?—A. I do not remember the prices of anything but timber.

Q. What was that?—A. Bridge timber we paid from $18 to $25 a thousand for. From the Truckee River we paid $22. Snow-shed timber cost from $13 to $15 per thousand.

BUILDING SNOW SHEDS.

Q. Are there any other facts you can state about your experience in building the road over the mountains?—A. The greatest difficulty I had was in building the snow sheds. In 1868, the summer before the road was opened, everything depended on having the road covered. We had then about two thousand five hundred men at work; teams hauling timber, and five or six trains. We worked on late in the fall shoveling snow. We succeeded in getting the road covered so that they could take material over the road that winter and finish up in the spring of 1869.

Q. You finished the snow sheds in 1869?—A. Yes; but you understand we had to make great efforts in 1868 to keep the road open in the winter of 1869. Then the road was finished to Promontory in 1869. The great point was in getting the road covered sufficiently in 1868, so they could work in the winter of 1869.

SPEED OF CONSTRUCTION GREATLY INCREASES THE COST.

Q. How did the speed with which the road was built and the bridges and trestles furnished bear upon the cost of the work?—A. Well, taking the time and the weather and the force employed, it must have cost over double. It probably could be replaced for less than 40 per cent. by taking advantage of the proper season and everything else.

Q. Does that remark apply to the whole road from New Castle to Promontory?—A. That is my opinion.

Q. You think at the time that the road was finished to Promontory you could have done the same work over again, taking your own time to do it, working at such times of the year as was economical to work, and accomplish the same result for 40 cents on the dollar of what the work from New Castle to Promontory cost?—A. I think so.

ADVANTAGES OF HAVING REPAIRING DONE BY CONTRACT.

Q. Some complaint has been made about the mode in which the Central Pacific Railroad Company has had its extraordinary repairs and improvements made by letting the work to the Contract and Finance Company, the Western Development Company, and the Pacific Improvement Company from time to time, paying the cost to those companies and 10 per cent. added. I want to get your experience as to whether that was a beneficial arrangement for the Central Pacific or not?—A. When the road was completed to Promontory the snow sheds were not finished. We continued to work on them that fall and summer of 1869 with the force we had. Likewise we commenced work on the Western Pacific. Of course we had to have an immense outfit of tools, pile-drivers, &c., building the Oakland terminal wharf; and we did some repairs on the bridge work, drawing from those forces. For instance, the American River bridge burned down. We drew our force right from Oakland, and rebuilt it temporarily in about, I think, thirty-six or forty hours. We had to take the pile-drivers and all the machinery up. Several other structures were burned down. On the whole, I think it was a great advantage, because we had a large force of trained men from the construction we were doing on the California and Oregon and other roads we were working at. I think that the Central Pacific got rather the best of the bargain.

Q. Your judgment, then, is, drawing on your long experience in doing that class of work, thatt he Central Pacific lost nothing in having the work done by the construction companies for actual cost to the construction companies with 10 per cent. added?—A. No, I think they were ahead. I would state that the Central Pacific did work for the Western Development Company and the Pacific Improvement Company, and charged those companies 10 per cent. in addition to the actual cost, thus reversing it. I have made a statement on some of the matters you have asked about to Governor Stanford. It is Exhibit No. 11, annexed to Governor Stanford's evidence.

ARTHUR BROWN.

Sworn to before me this 24th day of August, 1887.

L. S. B. SAWYER,
Com'r U. S. Circuit Court, Nor. Dist. Cal.

E. C. WRIGHT, a witness heretofore sworn by the said Commission, and who has testified before it, comes, in pursuance of an arrangement made between the Central Pacific Railroad Company and the said Commission for the taking of further testimony in San Francisco, and testifies as follows:

GROSS RECEIPTS OF CENTRAL PACIFIC AND LEASED LINES.

Examined by Mr. COHEN:

Question. You prepared a statement, under date of August 9, 1887, addressed to the chairman of the Commission, which contains a statement of the gross receipts of the Central Pacific Railroad and leased lines from 1864 to 1885, inclusive, no charges to earnings of any descrip-

tion having been considered. For convenience I copy this statement, which is as follows:

Years.	Receipts.	Years.	Receipts.
1864 (November and December.)	$121,679.10	1876	19,529,752.54
1865	356,806.94	1877	18,735,795.15
1866	879,754.38	1878	19,338,318.14
1867	1,442,625.58	1879	20,169,573.87
1868	2,364,211.18	1880	23,167,794.29
1869	7,593,267.60	1881	27,112,392.18
1870	9,010,261.89	1882	30,282,352.56
1871	10,271,628.10	1883	28,502,101.28
1872	13,612,835.04	1884	28,977,877.14
1873	14,706,334.24	1885	15,306,092.57
1874	15,433,590.37		
1875	17,811,491.01	Total	324,636,955.15

APPARENT FALLING OFF IN GROSS RECEIPTS EXPLAINED.

It will be seen that the gross receipts for 1884 are stated at $28,977,877.14, and the gross earnings for 1885 at $15,306,092.57. In the examination of Mr. Towne, general manager, the Commission asked him to explain the difference between those two years, and suggested that the falling off was in consequence of the leasing of the Central Pacific Railroad to the Southern Pacific Company. Mr. Towne referred the Commission to you to explain those figures and the difference between the two years. Will you please do so?—Answer. The amount, as shown on the statement for the year 1885, being $15,306,092.57, is the gross earnings of all the lines west of El Paso and Ogden, 2,802.45 miles, for the first two months. The rest of the year, ten months, is the gross earnings only of the lines north of Goshen, 1,649.86 miles. I would also state that this sum named is the gross earnings for that year, and should have been so stated in my statement to the Commissioners, in contradistinction from the other year, which is the gross receipts.

Q. In other words, the amount shown for the year 1885 was the gross earnings of the Central Pacific Railroad Company from Ogden to Oakland and the leased lines north of Goshen.—A. Yes, sir. That is, for ten months; and for the total system for the other two months.

PROFITS DERIVED FROM LEASES.

Q. In your written statement, made to the chairman of the Commission August 9, 1887, there is the following question and answer:

Q. State whether, as to any of the leases held by the Central Pacific Railroad Company prior to April 1, 1885, the rent paid by the Central Pacific exceeded the net earnings derived from the leased road.—A. Yes, sir, in some instances, because such earnings were made up on a mileage basis which did not give the leased lines their due proportion of earnings.

Will you state what was the general result to the treasury of the Central Pacific from the leases which it held prior to April 1, 1885?—A. I would state that there was a very large sum, over ten millions, which was the profit to the Central Pacific during the period these roads were leased. I can give the exact figures if it is necessary.

E. C. WRIGHT,
General Auditor.

SAN FRANCISCO, *August* 29, 1887.

L. M. CLEMENT, a witness heretofore sworn by the said Commission and who has testified before it, comes, in pursuance of an arrangement made between the Central Pacific Railroad Company and the said Commission for the taking of further testimony in San Francisco, and testifies as follows:

RETAINING WALLS ON SIERRA NEVADA.

Examined by Mr. COHEN:

Question. I desire to get from you such information as you may have with respect to building retaining walls on the summit of the Sierra Nevada Mountains. Will you state for what purpose such walls were built?—Answer. On the east side of the summit of the Sierra Nevadas, where the snow laid in drifts in places to a depth of 80 feet, depending upon the wind currents, it became necessary to protect the snow sheds. The railroad company learned from experience that it was practically impossible to construct snow sheds to resist the side pressure of the snow. The best selected timber of the mountains snapped, and the sheds were crushed in, necessitating the removal of the débris and shoveling off the snow during the remainder of the winter. By experiment it was found that the snow in large bodies had a similar movement to that of the glacier, and would crush in any timber-shed. It was therefore decided to build heavy retaining walls and to fill in the back of the wall with rock and other convenient material, forming a slope or incline about equal to that of the mountain side. The sheds at these places were built nearly flat, sloping a little down-hill, and allowing the snow to pass over the walls and shed in its glacial movement. In other places this was not practicable, and retaining walls heavy enough to resist this glacial movement were built.

Q. Over how many miles were those walls built?—A. In places for about 4 miles.

Q. Can you give any estimate of the cost of those walls?—A. No; I cannot now recall the cost.

LEWIS M. CLEMENT.

SAN FRANCISCO, *August* 31, 1887.

LELAND STANFORD, a witness heretofore sworn by the said Commission and who has testified before it, comes, in pursuance of an arrangement made between the Central Pacific Railroad Company and the said Commission for the taking of further testimony in San Francisco, and testifies as follows:

DIVISION OF PROFITS OF C. CROCKER & CO.

Examined by Mr. COHEN:

Question. In the testimony which you gave to the Commission on July 29, 1887, you were asked concerning the division of the profits made by Charles Crocker & Co. on their contract with the Central Pacific Railroad Company for building certain portions of the road from Newcastle, or from section 31, to the State line. In your answer to Mr. Commissioner Anderson as to whether you or Mr. Huntington or Mr. Hopkins received from Mr. Crocker any division of the profits you said,

"No, sir." You were asked: "Is that your positive statement?" You answered, "Yes; I do not think that we left him with money over." It is evident that you were speaking about a division of money, and the Commission was asking you about a division of the stock. I would like you to explain your testimony in that respect.—Answer. I do not think there was ever any dividend of stock until the road was completed, and it was made through the Contract and Finance Company.

Q. At the time Mr. Crocker took that contract I understand that there was no arrangement whatever that he should divide his profits with any one?—A. No; no one.

WHAT WAS REQUIRED BY THE "COMMON NECESSITIES OF THE SITUATION."

Q. That during the progress of the work, yourself, Mr. Huntington, and Mr. Hopkins were compelled in every way to aid him with your credit in order to accomplish the successful prosecution of the work, and that after the road was built Mr. Crocker turned his stock in to the Contract and Finance Company, to be divided equally among the five associates. Is that the fact?—A. No. He turned it in to the Contract and Finance Company. Of course, there it would be divided among the stockholders, whoever they might be; but I do not know that there was any understanding as to that.

Q. But the point I am trying to get at is the common necessities of the situation. You were forced to help Mr. Crocker to perform his contract, and that therefore, without there being any previous agreement to that effect, the stock that he had over was turned in to the Contract and Finance Company, to be divided among the stockholders?—A. Yes. I cannot say that it was to be divided. I do not know that there was any understanding about it. But the stock was turned in to the Contract and Finance Company, and ultimately divided among the stockholders after the road was completed. At the time when the contract was let it was let to Crocker & Co. as contractors; but it very soon became apparent that no ordinary rules that would govern between contractors would answer the purposes of the rapid construction of the road; that sacrifices must be made which the company could afford, but a contractor looking to profits out of his contract could not. Mr. Crocker became apprehensive about his personal liabilities. I cannot tell when that was; but I know we said: Go on, we will stand by you. I think one contract above section 31 only went up to Colfax; then the work was continued on, and as we went up into the mountains the work became heavier, and, owing to the season, much more difficult to perform, as they had to work in the rain and mud, and after a while in the snow. But it became manifest by this time that the burden of the road must really rest upon the promoters of the enterprise, and it would require all their united skill, energy, and capacity in every way to put the road through, and the business was managed with reference to the construction of the road, without a thought as to individual interests or to contracts.

Q. The object was to get the work through without any regard to ultimate profits?—A. Yes, sir. More than that, I can say it was upon that system only that the road could have been built; as it was built and completed by distributing over the road, where it would do the most good, the work and men needed, in order that the whole might work in harmony to a completion.

NO DIVIDENDS EXCEPT OF CASH.

Q. I wish to ask you whether any dividends were paid by the Central Pacific Railroad Company to either of the directors or to any of the stockholders of the Central Pacific from the bonds which were received from the United States or from the first-mortgage bonds issued by the Central Pacific or from any bonds granted in aid of the building of that road at any time?—A. The Central Pacific never made any dividends of anything excepting cash dividends, as appears by the books, so far as I understand it.

ALL ASSETS USED IN CONSTRUCTION OF ROAD.

Q. You have rendered to the Commission a statement, in your evidence of August 2, of the cost of building the road, showing the assets that were available for that purpose and the amounts approximately realized from those assets, the whole amounting, together with the sum then due the Contract and Finance Company, to $47,880,000. Mr. Miller, secretary of the company, has stated that this whole sum was fully used for the construction of the Central and Western Pacific. I would like to have your testimony on the same subject.—A. So far as my knowledge goes, all the moneys derived from the first-mortgage bonds, the Government bonds, and from all other sources up to the completion of the road, either for stock or bonds, went into the construction of the road.

EXPECTATION AS TO FUTURE RECEIPTS.

Q. I presume that you read the debates in the House of Representatives and the Senate which preceded the passage of the act of Congress of 1862. When you accepted the terms of that act what was your expectation as to future receipts of the Central Pacific Railroad Company for the transportation to be done for the Government?—A. Well, we thought that they would be ample to meet our liabilities to the Government. We supposed our prices would be regulated by the competition offered. Whether the road could be built or not or operated in the winter season was very uncertain. It was not known that fuel could be had anywhere along the line of the road at the time of commencement. The coal field in the Rocky Mountains was unknown, and geologists had pronounced against finding any there, saying that it was of formation older than the coal deposit. We supposed competition would be the governing rule, and the debates in Congress clearly show that it was expected at the time that the payments to the company for services would not be less than they had been before for similar services.

PRICES NOT ANTICIPATED TO BE MEASURED BY EASTERN STANDARD.

Q. When you accepted that contract and were building the Central Pacific Railroad you did not anticipate that you would be required from the net earnings of the road to take care of the interest or principal due to the Government, except by the payment of 5 per cent. on the net earnings, did you?—A. That is all. That was our understanding. Besides, I can say here what perhaps I may have said before, that in 1861 Mr. Huntington, Mr. Crocker, and myself went over the line of road, and when we reached the summit on the proposed line and contemplated the tremendous difficulties there to be encountered, we talked

the matter over as to the safety of the construction of a road over the mountains. We conversed upon the subject and said between ourselves that if it were possible for a vessel to sail from San Francisco around Cape Horn and get in back of the Sierra Nevadas we could not afford to build a road over the mountains; or if a vessel could sail from any portion of the Atlantic around Cape Horn and get in the rear of the Sierra Nevadas we could not afford it; but they could not do that, and the competition to fix our prices would be only such as that of ox teams, horses, and mules. The prices, therefore, would justify, we thought, the construction of the road. That same idea prevailed at the time when we accepted the act passed by Congress in 1862. It never entered our minds, and I do not think it did that of any member of Congress, that the prices to be paid to the Pacific Railroad could be measured at all by that standard of prices charged over roads in the East with large local business, where the difficulties of construction were entirely different from what they were over the plains.

FORMER CHARGES FOR GOVERNMENT TRANSPORTATION.

Q. According to the debates in Congress it would appear that it was expected that the Central Pacific Railroad Company should receive for one year's transportation for the Government an amount exceeding $3,000,000. You did not anticipate that the payment for the entire service rendered to the Government for freight transportation for ten years would be less than that amount, did you?—A. No; we did not. On the contrary, we knew that they were paying large rates for transportation of the mails. At one time the Government paid $1,750,000 for carrying the mails by stage, the maximum of which was to be a thousand pounds.

SUBSIDIES TO COMPETING LINES NOT ANTICIPATED.

Q. Did you anticipate at the time you accepted the contract, by the act of 1862, that before you got over the mountains the Government would subsidize an opposition road to you?—A. No; we did not dream of such a thing.

Q. In this connection, for the purpose of refreshing your memory, I call your attention to an address which I find among the records of the State of Nevada, and a letter addressed by you to the legislature of that State, under date of January 14, 1865, in which you say: "It is certain that Congress will never assist in building a road to rival or compete with one in which so large an amount of national funds will be invested."

That expresses your idea, I believe at the time you took the contract and the time you were endeavoring to perform your part of the contract?—A. Yes, sir.

EFFECT OF DELAY IN ISSUING SAN FRANCISCO BONDS.

Q. The city of San Francisco contributed $400,000 of its bonds as a compromise in place of $600,000, which they were authorized by act of the legislature to subscribe to the stock of your company. I wish you would explain the effect on the prospects of the company, and, if you please, on the prospects of the city, growing out of the delay during which the litigation took place, which resulted in that compromise.—A. It is hardly right to say the opposition of the city, because the peo-

ple of the city of San Francisco voted to subscribe to the stock of the company $600,000, to be paid in their bonds. But conflicting interests, or interests that seemed to conflict with those of the Central Pacific Railroad, made objections and got out injunctions to restrain the subscription to the stock of the company by the city and county of San Francisco. The result of it was litigation, which the supreme court was at last called to pass upon, in which the court decided that the city and county should make the subscription. Afterwards a compromise was made, by which the city was to issue in lieu of the subscription 400 of its bonds. The compromise required three mandamuses from the supreme court to carry it into effect. The same private interests enjoined other counties and the State from giving us the aid we anticipated, and which the law had provided. All those things hurt our credit very much. The consequences of this opposition were particularly disastrous, because the winter following, after we had reached New Castle, 31 miles from Sacramento, was the mildest winter that has ever been known on the Sierra Nevadas. During that winter we were able to work across the summit, building a wagon road. The climatic advantages of that season were more than equal, for the purposes of constructing a road, to those of any two years we had afterwards.

COULD HAVE MET UNION PACIFIC AT CHEYENNE.

Except for the delay consequent upon this opposition, we would more easily have met the Union Pacific at Cheyenne than we did at Promontory.

Q. The result to the city of San Francisco in its trade and commerce, if you had reached Cheyenne, can hardly be estimated at this time?—A. Scarcely. It would have given to San Francisco complete control of the business of Utah, Wyoming, Montana, and Idaho.

Q. What time was consumed, if you remember, in building from section 1 to 31, from Sacramento to New Castle?—A. I cannot say.

Q. After reaching New Castle, how long was the work of construction arrested?—A. By the opposition met?

Q. By the want of funds.—A. For the want of funds, about one year.

Q. That would be from some time in 1863 to some time in 1864?—A. Yes, sir. We were detained there until after the passage of the act of 1864.

Q. New Castle, you speak of, is less than 40 miles from Sacramento?—A. Yes, sir; 31 miles.

Q. You had to complete 40 miles before you were entitled to any aid even under the act of 1862?—A. Yes, sir; we had iron enough on hand to complete 50 miles of road, but we were unable to do the grading and utilize the iron.

Q. For want of funds?—A. For want of funds, yes. That want of funds would not have existed except for the litigation that we became involved in from the opposing interests by which this State aid and the county aid were unavailable to us.

CRIPPLED CONDITION OF ROAD AT COMPLETION.

Q. Now, as I understand, the result of all your efforts to build the Central Pacific eastward and meet the Union Pacific as far east as possible, and the completing of the road in one-half the time required by your contract with the Government, and building it during war

time when the credit of the Government was at low ebb, and a small amount could be realized upon or borrowed upon its bonds, and the large prices you were compelled in consequence to pay for materials and equipment, was to leave the Central Pacific in a crippled condition when the road was finished to Promontory? By crippled condition I mean that you had spent upon the road certainly one-half more than you would have spent if the road had been built under different conditions, and built economically without regard to the question of time; and therefore you were at the mercy of any other roads that should be constructed parallel with you or to compete for your business, because such road could be built for very much less and would have to bear, among its fixed charges, a much less burden in the way of interest?—A. Yes, sir. I believe the road could be graded for less than half what it cost, had we taken more time; had we taken such time as economy in construction would have demanded. But I explained before that what justified us in our way of constructing the road was that we would not have any serious competition, any competition other than that which ox teams and mule teams afforded. The reason for this extraordinary effort was the same in regard to competition when it became apparent that the Union Pacific might come west of the Rocky Mountains, because that would open up all this business east of the Sierra Nevadas to competition by rail; and the advantages which we thought we had as against competition would be destroyed for the business east of the Sierra Nevada Mountains.

COMPARATIVE COST OF CONSTRUCTION OVER THE MOUNTAINS.

It is susceptible of demonstration almost that there was more work put in the first 150 miles in crossing the Sierra Nevadas than would suffice to grade the road for a single track from the Sierra Nevadas to Chicago. After we passed the Sierra Nevadas, working less than half the force we had been working on the mountains for three years, we were enabled to go 500 miles in ten days less than ten months. The work on that 500 miles is fully equal to the average work of grading a line from the Sierra Nevadas to Chicago. So, working with half the force, less than half the force we had on the Sierra Nevadas, we could easily have gone to Omaha while we were building that 150 miles in the mountains.

EFFECT IF UNION PACIFIC HAD REACHED SIERRA NEVADAS.

Q. I found a short time since a prediction made by the constructors of the Union Pacific that it would meet the Central Pacific at the eastern base of the Sierra Nevada Mountains, or at Wadworth. What would have been the effect of the finances of the Central Pacific if that prediction had been verified?—A. Absolutely to destroy to the road all value of through business and deprive the Central Pacific practically of local business that would pass from California. It would have enabled the Union Pacific to furnish advantages to eastern merchants to ship their goods into Nevada. But by meeting competition and the prices made for through rates from the east to San Francisco, the very low rates enabled San Francisco merchants to sell goods and command largely the traffic of that portion of the country this side of the Rocky Mountains.

COULD NOT HAVE SUSTAINED OPERATION OF THE ROAD.

Q. Could you have paid the operating expenses and fixed charges of a road from the eastern base of the Sierra Nevada Mountains to San

Francisco for any pro rata you could have obtained on the freight between New York and San Francisco?—A. No. And add to that such local business as might have been done from California over to Nevada would not have sustained the operation of the road in my judgment. The fact is, what we had built would have been to the Central Pacific worthless. It was an absolute necessity for the Central Pacific to protect itself from ruinous competition that it should reach as far east as Salt Lake.

NECESSITY FOR REACHING OAKLAND.

When your contract was performed with the Government and you had completed the road from San José to San Francisco you seemed to have found a necessity for connecting the road with the city of Oakland. You built a road to that point, which was subsequently consolidated with the Central Pacific. Can you explain what the necessity was for reaching Oakland?—A. The distance by San José to San Francisco was too long to compete successfully with the Sacramento River; also with the California Pacific road which was constructed. The Sacramento River itself furnishes a most excellent means of transportation, as it is not troubled with ice and has uninterrupted navigation throughout the whole year for freight, and was a distance of about 100 miles, while the route by rail by San José was about 180 miles, and a portion of the road, as you approached San Francisco, having a grade of 90 feet to the mile. There were great advantages to the road in reaching the bay on the Oakland side, as ship and car were brought together at the minimum of cost; in fact, without any charge to the ship for wharfage.

ABSOLUTELY NECESSARY TO CONTROL CALIFORNIA PACIFIC.

Q. In this connection will you state why it was you found it necessary to buy the control of the California Pacific?—A. The California Pacific was a rival company, being the shorter line, 87 miles against 137½ by the Western Pacific, and a line of easy grade. More, those in control of the California Pacific, which included a number of leading capitalists in London and Frankfort, organized a company here embracing a very large number of the leading capitalists of San Francisco to build a road from a point on the California Pacific near Sacramento up that valley and over the mountains east, which would become a competing line to the Central Pacific. The advantages of that line between Sacramento and San Francisco were such that there were constant complaints of through passengers going to San Francisco being compelled to go around by the way of Stockton and Livermore, a longer route. Oftentimes they would surrender their tickets at Sacramento and purchase passage over the California Pacific from that point to San Francisco. It seemed to be an absolute necessity that the California Pacific road should be controlled, if possible, by the Central Pacific or its friends.

REASONS FOR BUILDING FEEDERS.

Q. Some comment has been made upon the action of those who controlled the Central Pacific in building feeders to the main line along the northern valleys of California and the San Joaquin Valley, especially the roads known as the California and Oregon and the San Joaquin Valley road. Will you explain why you undertook the building of those roads?—A. Well, there were two principal reasons. One was that these

great valleys needed railroads, and if they did not pay well immediately they would in future in our judgment. Another thing, the business that they might develop would add largely to the receipts and business of the Central Pacific. Without those branches the Central Pacific did not reach scarcely any of the business of California. It came over the mountains and struck the river at Sacramento, leaving the business of the valleys to seek water transportation.

GAVE VALUE TO AIDED LINES.

Q. Did not the building of those roads add materially to the receipts of the aided lines and thereby promote the interests of the Government in that respect?—A. Yes; it gave the principal valleys to the aided lines. The same as building the Southern Pacific gave additional value to that portion of the San Joaquin Valley which had been consolidated into the Central Pacific by bringing the business of the Atlantic and Pacific and of the Southern Pacific with all its eastern connections over that portion that was consolidated into the aided line.

POLICY OF CONSOLIDATING THE ROADS.

Q. Some questions have been asked by the Commission of various witnesses as to the policy of consolidating the roads that you obtained control of, such as the ferry lines between San Francisco and Oakland and Alameda, and the California and Oregon and the San Joaquin Valley, with the main line of the Central Pacific. Will you explain in what way that affected the interests of the Government?—A. It was of the greatest advantage to the aided line to have these unaided lines consolidated into the company. They are to-day the most valuable portion of the Central Pacific property, by far, and if the Central Pacific shall ever have the ability to pay off its obligation to the Government it will be through the advantages of those roads.

Q. Through the earnings and increase of value from those roads?—A. Yes, sir; so far as the stockholders in those roads were concerned it was a great misfortune to them to be consolidated with the Central Pacific.

NECESSITY FOR CONTROLLING SOUTHERN PACIFIC.

Q. Will you explain the necessities that arose for your control of the Southern Pacific line, and the continuing of that line to an eastern connection?—A. Well, the necessity for obtaining control of the Southern Pacific Railroad was based really upon the act of Congress providing for its construction. It became apparent that if that line was constructed entirely independent of those who were interested in the Central Pacific it would become a dangerous rival, not only for the through business from the Atlantic Ocean, but it would enter into active competition for the local business of California. It was of paramount importance that that road should be controlled by the friends of the Central Pacific; and all our anticipations consequent upon the control of that road have been realized. It has worked in harmony and has added largely to the business of the Central Pacific in part by causing the business coming over the Sierra Nevadas through Tehachapi Pass, all of it, whether from the Atlantic and Pacific, the Atchison, Topeka and Santa Fé, the Texas Pacific, or the Southern Pacific itself, to pass over the line of the Central Pacific through the San Joaquin Valley from Goshen to San Francisco.

CONSTRUCTION COMPANIES PAID IN BONDS AND STOCK.

Q. In the construction of the various branch roads and feeders in which the various construction companies of which you have been a member have been engaged, did the construction companies ever receive for the construction of such roads anything but the bonds and stock of the roads so constructed?—A. No. Nothing else that I remember of in any case.

Q. The money used for the construction was furnished by the stockholders of the different companies?—A. The construction companies may have been furnished with money as they were largely by their own stockholders, and then they used their credit.

Q. Can you call to mind any case in which the construction companies could at the termination of the construction of any road have obtained the cost of construction back by the sale of bonds and stocks which it received in payment?—A. No. There was no one of the companies the bonds of which could be sold at the time of the construction for money enough to build the road.

Q. After those roads were finished the construction company had to keep the bonds and stock received in payment until the business of the road was developed and the value of the bonds made manifest to the public?—A. Yes; that was so.

DIVIDEND OF WESTERN DEVELOPMENT COMPANY INSTIGATED BY D. D. COLTON.

Q. In the examination of Mr. Douty before this Commission the records of the Western Development Company have been put in evidence, and it is made to appear from the minutes of that company that on the 4th day of September, 1877, a dividend was declared of certain bonds and stocks purporting to be from the surplus profits of that company. Mr. Douty has said in his answer to the Commission that that resolution authorizing that dividend was prepared and passed at the instigation of Mr. David D. Colton, who was then controlling the financial affairs of that company, and that the other stockholders, yourself, Mr. Huntington, Mr. Hopkins, and Mr. Crocker, were, as he subsequently found out, not cognizant of that resolution or the declaration of that dividend. He has also said that a portion of the bonds which came to Mr. Colton as his share of the dividends had been previously used by him to raise money for his own purposes. Will you give the Commission such knowledge as you have about the declaration of that dividend, and what action you subsequently took about it?—A. I was not an officer of the Western Development Company; and the first that I knew of the dividend was that some one got into my room a quantity of Southern Pacific bonds. Upon inquiry I learned that it was a dividend that had been declared by the Western Development Company.

DIVIDEND OUGHT NOT TO HAVE BEEN MADE.

Q. How long was that after the declaration of that dividend, do you remember?—A. When I was informed by General Colton what this dividend was for, I did not approve of it. I knew that the company was largely in debt, and I did not think the assets justified a dividend. I thought they were taking out of the company assets that would be needed to pay off the debts of the Western Development Company. It turned out that the dividend ought not to have been made, considering

the assets of the company and its indebtedness. We never returned that dividend; we held it for five or six years, when the road became established and the value of it known, when the bonds found a market.

ORIGIN AND PURPOSE OF LEASING CENTRAL PACIFIC.

Q. The Commissioners have evidently wanted as much explanation as they could get about the lease of the Central Pacific Railroad to the Southern Pacific Company. If I understand you, you gave a great deal of time to the preparation of this lease, and was careful to see that the interests of the Central Pacific were not neglected. I would be glad if you would explain that lease in detail, the inspiration of its origin, and the purposes for which it was made.—A. The principal object in making that lease was the mutual interests of the Central and Southern Pacific Railroad Company. The Central Pacific had formerly leased the Southern Pacific Company, but in the course of time the Southern Pacific road had constructed and consolidated until they had an entire line from San Francisco to the Atlantic Ocean, with extensive branches, with also a large fleet of steamships running from New Orleans to various ports on the Atlantic, and to Mexico. Its interests were too varied, too uncertain, and too large for the Central Pacific to control. Its interests were much more important than the Central Pacific itself, the Southern Pacific altogether having 2,885.70 miles of road, while the Central Pacific had 1,660.63, including that portion of the Oregon lines recently constructed. The object of the lease was, as I have said, for the interests of both roads. It was made so that one road could [illegible] profit at the expense of the other. The lease provides for its [illegible]tion from time to time as the interests of one or both companies may require. It will be seen from reading the lease that it is provided that if either party is benefited at the expense of the other, then the agreement shall be revised and changed so that such will not be the operation thereof; and it further provides that all matters of dispute shall be left to skilled and impartial arbitrators; that if any legislation or governmental action hereafter be had which in the opinion of the Southern Pacific is in hostility to the Central Pacific, the Southern Pacific may, on notice, terminate the agreement, or may submit to arbitrators the manner of providing for such changes or revisions. Therefore it will be seen that in this lease the interests of both companies are well and faithfully guarded. It is certain that in its operation the interests of the United States and the aided roads have not been in any manner infringed upon, but have been promoted.

STEPS TAKEN TO SECURE ROUTE IN NEVADA.

Q. Some question was asked by the Commissioners, I believe of yourself, about the route that was adopted through the State of Nevada. What steps did you take, in addition to obtaining reports of your engineers, to obtain information as to the best route to be adopted?—A. We inserted advertisements in the papers requesting information in regard to various routes. We availed ourselves of whatever information we could obtain, and the engineers who made examination of the various routes suggested declared that the one finally adopted was the best possible. I believe the principal engineers connected with the road up to this time have never had any doubt but what the route

adopted was the best. My attention has been called to a notice which was published at the time it bears date, which reads as follows:

PACIFIC RAILROAD NOTICE.

The Central Pacific Railroad Company of California, desirous of obtaining full information with regard to routes across and passes through the Sierra Nevada Mountains, will receive information and give due consideration to the merits of routes other than that surveyed by them; provided, that proper surveys or reconnaissances are made of such routes in the usual manner by competent engineers, and furnished to them before the first day of October, 1862.

LELAND STANFORD,
President.
MARK HOPKINS,
Secretary.

Dated SACRAMENTO, *August* 22, 1862.

NO DIVERSION OF FUNDS TO BUILD OTHER ROADS.

Q. It has been said, and as I understand it is one of the grounds upon which gentlemen in both houses voted for the bill authorizing this Commission, that the moneys and earnings of the Central Pacific Railroad Company have been used to build other roads that were incorporated with the Central Pacific. Is that true?—A. No money to my knowledge was ever diverted from the Central Pacific except for a consideration in a fair business way. It never diverted anything to any other roads, directly or indirectly.

Q. It has been said also that the constructions companies built other roads, using the moneys and credit of the Central Pacific. Has there been any case where the Central Pacific has loaned any of its funds that it did not loan them on the same terms and the same rate of interest as any other person would have loaned it?—A. No. It never loaned any money where it did not receive full repayment with interest.

ASSETS OF CONTRACT AND FINANCE COMPANY INSUFFICIENT TO PAY ITS DEBT.

Q. It is in evidence here by the testimony of Mr. Brown, who was secretary of the Contract and Finance Company, that after it had built that portion of the Central Pacific Railroad Company from the eastern boundary of the State of California to Promontory Point, and had performed all its contracts towards the Central Pacific that it had undertaken, that it received payment in accordance with those contracts in money and stocks; that it had expended all the money so received in performing such contracts, and had borrowed and expended for a like purpose somewhere about three and a half millions of dollars, and that it had as against the money that it borrowed about twenty-three millions of stock of the Central Pacific Railroad Company. This was about the date that the two roads were connected, May 10, 1869. From what you knew of the estimate at which that stock was held, either in the markets of the Pacific or in the Atlantic market where stocks were bought and sold, could that debt of three and a half millions have been realized from the sale of stocks which the Contract and Finance Company then had?—A. I do not think it could have been disposed of at all to realize any money; but certainly not such an amount as that.

NO DESIRE TO DISREGARD GOVERNMENTAL RIGHTS.

Q. Having in view the purposes of this inquiry and the misapprehension that has existed which has led to the passage of the bill authorizing

it, I wish you would express your opinion whether during your administration as the president of the Central Pacific Railroad Company, from its incorporation to the present time, there ever has been any desire or intention or any act done, permitted, or suffered by your knowledge, by which it has been intended to disregard the rights of the United States as a contracting party with you, or whether in your judgment such has resulted from any of the acts which have been done by the company which could in the ordinary course of business have been prevented?—A. Never. Nor did I ever entertain serious doubts about the Central Pacific's ability to meet its obligations to everybody, the Government included, until I saw the effect of the diversion of business, and the influence upon rates by the competing lines of roads. Except for that interference, with the earning capacity of the Central Pacific, it is apparent that it would now be abundantly able to meet its obligations to all parties, the Government included, even if the equities which I maintain justly ought to be considered were not allowed. As it is, as I think, the Government cannot fail to allow us the equities, it will still be able to meet all its obligations.

IF GOVERNMENT HAD PERFORMED ITS OBLIGATIONS THE COMPANY WOULD ALSO.

Q. I suppose I might condense your views into this, that if the Government of the United States had performed its part of the contract there would have been no doubt about your performing your part of it?—A. According to my judgment. Let it be understood I have raised no objection to the committee having every information we could furnish excepting in the one matter which I deemed entirely immaterial to the Government, furnishing the names of confidential agents where I thought it might be prejudicial to their interest and necessarily also to the interests of the Government, the Government being always interested in the prosperity of the road.

RESOLUTION TO ESTABLISH A SUNKING FUND.

Q. It appears on the minute book of the Central Pacific Railroad Company that the board of directors, January 30, 1878, passed a resolution establishing a sinking fund to provide for the payment of the entire debt to the United States. And it appears that after the passage, on May 8, 1878, of what is known as the Thurman bill, the effect of that resolution was suspended until the validity of the Thurman bill could be judicially determined. I read you these resolutions, not alone for your information, but for the information of the Commission:

Whereas this board is credibly informed that the efforts of this company to come to an amicable settlement with the representatives and officers of the United States as to the time and manner of payment of the claims arising out of advances of its thirty-year currency bonds in aid of construction, and the interest thereon, are likely to come to no satisfactory result, by reason of illegal and inequitable demands of the agents of said Government, to which this company cannot assent;

Whereas three years have elapsed in fruitless negotiation with a view to framing a new and more effectual arrangement, in which the rights and equities of both parties should be considered and respected, and by which every dollar which has been advanced as interest or principal sums would be restored to its treasury, so that the Government might secure not only all of the benefits and advantages from the creation and use of the railroad itself, as contemplated by the original act, but also the payment of its expenditures therefor, which at the inception of the work was regarded as doubtful and unimportant; and

Whereas the Secretary of the United States Treasury, under the pretended authority of an act of Congress making appropriations for the legislative, executive, and ju-

dicial expenses, approved March 9, 1873, has retained and withheld from this company large sums of money, now amounting to about $1,500,000, which have been earned and are due under its contract, and which the courts have adjudged to be payable under the Constitution and laws of the country, but which are, nevertheless, and as is believed arbitrarily and wrongfully, still withheld, to the manifest injury of the company and in derogation of its rights: Now, therefore,

Be it resolved, That the secretary be, and he is hereby, directed to ascertain, as nearly as may be estimated, the amount of said United States subsidy bonds and the interest thereon which will remain unpaid and unliquidated at their maturity after deducting the probable current repayments by one-half the compensation for transportation on behalf of the Government, and also the sums due and payable annually as 5 per centum of the net earnings after the completion of the whole railroad, as required by the act of 1862, and to compute therefrom the sums necessary to overtake and cancel said remainder of indebtedness by the date of maturity, if invested in a sinking fund with an interest accumulation of four (4) per cent. semi-annually.

And be it further resolved, That thereupon the treasurer of the company be, and he is hereby, authorized and required to commence such special sinking fund by first payment thereto on or before the first day of September next, and to apply like sums thereto on the first day of September and March thereafter, by investing them with all accretions of interest thereon as it shall mature, and upon good and sufficient security, to the best advantage, as directed by the finance committee, to the end that such remainder of the indebtedness may be fully discharged and paid at maturity from the proceeds of said sinking fund.

And be it further resolved, That the agent, attorney, and counsel of the company be, and they are hereby, instructed and requested to take such steps as may be deemed necessary and advisable to recover from the United States all sums due and withheld from the company, and such sums, with interest that may be recovered thereon, when received, shall also be placed to the credit of said sinking fund, and invested to the best advantage in like manner as above described.

And be it further resolved, That if, by reason of a low rate of interest prevailing on first-class investments within this State, or if, for any other cause, it shall appear to the finance committee that said sinking fund is unable to earn and accumulate at the aforesaid rate of eight (8) per centum per annum, then and in that case they shall cause a proportionately larger sum to be applied semi-annually to said fund, so as to make up any deficiency. And all said sums shall be appropriated from the common treasury of the company out of any moneys remaining after the payment of operating and administrative expenses, the interest upon its debt, and the installments to the several sinking funds provided therefor, and before any moneys shall be paid out as dividends upon the capital stock. And in case the amount earned for Government service shall be larger than estimated, or the 5 cent. of the net earnings shall be larger than estimated, then there may be deducted from the yearly amount set aside for said sum the annual excess from both or either of said sources.

What explanation do you desire to make about this matter?—A. Well, at that time the prospect of the road was so good that we did not doubt our ability to comply with those resolutions and set aside such funds as seemed to be necessary to meet the obligations that would be due to the Government at the maturity of the bonds. When the Thurman bill was passed we considered that the Government itself had determined how the company should meet the maturing indebtedness to the Government, and that the effect of the resolution should be suspended until it was ascertained whether the Thurman bill was valid or not.

CONTRACT AND FINANCE COMPANY'S INDEBTEDNESS TO CENTRAL PACIFIC.

Q. I call your attention to the testimony given by you on August 3, in reply to a question by Mr. Anderson, asking you to explain the minutes of the Central Pacific of September 2, 1873, with reference to the notes made by yourself, Mark Hopkins, and C. P. Huntington, amounting to $5,700,000, indorsed by said Contract and Finance Company. Do you wish to add anything to what you said in your answer on that occasion?—A. Only this: That that was an indebtedness of the Contract and Finance Company to the Central Pacific for money had from

time to time, and that we became responsible in connection with the Contract and Finance Company for the money, and the money was paid to the Central Pacific with interest. The Central Pacific suffered no damage or loss from that transaction.

LELAND STANFORD.

SAN FRANCISCO, *August* 31, 1887.

ALFRED E. DAVIS, having been duly sworn by L. S. B. Sawyer, commissioner of the United States circuit court, testified as follows:

Examined by Mr. COHEN:

Question. Where do you reside?—Answer. I reside in this city.

Q. How long have you been a resident of California?—A. Nearly thirty-nine years, with probably an intermission of five and four years in the State of Nevada.

Q. What year did your come to California?—A. I arrived here in May, 1849.

Q. In what part of California did you live in 1849?—A. I lived in this city.

Q. Are you acquainted with the Sacramento River and the city of Sacramento?—A. I have had a familiar acquaintance with it from 1849 to this time.

TOPOGRAPHY OF SACRAMENTO.

Q. State your knowledge of the topography of Sacramento and the surrounding country as you first knew it in 1849.—A. The site of the city of Sacramento as I saw it in 1849, in July, was a low deposit of sandy loam, the banks of the river bordered here and there by cotton-wood trees.

Q. The city was not leveed at that time?—A. No levee whatever.

LEVEES IN FRONT OF SACRAMENTO.

Q. State the condition of the Sacramento in front of the city and at the point of its junction with the American River in 1849.—A. I saw the first levees that were built. They were totally insufficient for the protection of the city from the waters of the river.

Q. What was the experience with the levees first built in 1851-'52?—A. The levees were entirely overflowed and were practically useless as to holding the waters off of the city.

Q. The city of Sacramento was overflowed that winter for how long?—A. Oh, several weeks. A long time.

CHARACTER OF THE COUNTRY WEST TO THE MOUNTAINS.

Q. Give your experience of the country between the city of Sacramento and the western slope of the Sierra Nevada Mountains, the character of the country?—A. Well, that question is broad and general. You can get a much more specific answer by carrying the question within the limits of the city of Sacramento and the American River and the Norris Ranch up to Arcade. That was about the limit of the high water, Arcade. You could arrive at the condition of the waters on the American River and in the city of Sacramento and the Yolo country by finding the altitude of this point just mentioned. I sup-

pose that that district of country spoken of at that time was 10 feet under water.

Q. What time are you speaking of now?—A. The first flood after my arrival in this State. I think that was in 1850.

Q. Mr. Davis, you know that the Central Pacific Railroad commences on the Sacramento River and then runs in an easterly direction along the American River Slough for three miles to where it crosses on the bridge over the American River proper?—A. Yes, sir. I know that.

Q. At the time you first saw the American River what was its condition as to banks? How high were the banks opposite Sacramento when you first saw it?—A. You mean as distinguished between high and low water?

Q. Yes. The banks of the stream.—A. During the summer or winter?

Q. I mean how far from the bed to the top of the bank in 1850?—A. That depended upon the stage of the waters. The river fell or rose in proportion to the season—dry or wet.

Q. There were no tailings in the stream then?—A. No. The débris had not reached there. It had not even reached Marysville at that time.

Q. What had occurred up to 1861 and 1862?—A. Hydraulic mining became active. Then the bottom of the river began to fill; consequently the waters would rise in proportion to the filling of the bottom of the river by the débris coming down.

THE LEVEES A NECESSITY.

Q. When this road was commenced what had to be done to construct a road? What was necessary to be done to construct that road from the Sacramento River to the American River bridge, a distance of three miles?—A. There was no alternative but to raise the old levee with the filling of the river. Probably that country has been filled up 30 feet from its natural condition when I first saw it.

Q. Who filled that up where the road is built?—A. The Central Pacific.

Q. Was that heavy or light work?—A. It was very heavy; very vast.

Q. What protection did they have to give that as against the waters of the American River? Any riprapping, heavy stone riprapping?—A. Great deal. A great deal. In addition to the exertions they used in riprapping they were compelled to raise the land; to raise the whole substructure by filling.

A VERY EXPENSIVE ROAD TO CONSTRUCT.

Q. Was that an expensive road to construct?—A. Well, undoubtedly; from the very nature of their immense filling; because a mere embankment on the railroad in a freshet there would amount to nothing whatever. The levees had to be made probably from four to six times the natural width. Being a sandy loam, there would be no protection except by very wide embankments, and high, in addition to the riprapping, to make them stand. In other words, the work to be done would be an unknown quantity. If they had had a natural upland bank to put the track upon, it would have been much to their advantage. But they had to make the bank by leveeing the whole country along there for various widths.

THE SCHEME CONSIDERED CHIMERICAL.

Q. Was the difficulty of constructing and maintaining a road on the route of these three miles much discussed at the time by the people who

knew the country?—A. We thought that it was almost impossible to do it. It was as chimerical as to their being able to make an embankment of railroad bed to stand there as it was that Sacramento could ever be lifted out of the water. That was the comparison. Nobody believed it could be done. Nobody was willing to invest in property in Sacramento on account of these enormous costs. I speak of the raising of the town of Sacramento. It had the same relation to the realty of the town as the construction of the railroad had.

DIFFICULTIES IN CONSTRUCTING BRIDGE OVER AMERICAN RIVER.

Q. At the end of this three-mile section a bridge is constructed across the American River?—A. Yes, sir.

Q. What difficulties were there in constructing the bridge?—A. Very great; because at that time the natural stream had been filled with débris from the mountains, shifting quicksand; that, being lighter material, floated down the rivers, and has kept filling until it has made a very large impression upon the bay and harbor itself of this city.

Q. The depth of tailings and débris from the mountains at the American River bridge is about 30 feet, is it not?—A. Fully that.

Q. It has raised the river that much above the bed?—A. Yes, sir; and from that fact high water of the American River jumps out of its natural banks and precipitates itself against the road bed and levee in front of the city of Sacramento on the American Slough.

NATURE OF THE COUNTRY UP TO ARCADE.

Q. From the American River up to Arcade what is the nature of the country?—A. After crossing the bridge and a long trestle you begin to strike the natural formation of the land. It gradually rises into a more solid formation until you get to Arcade.

Q. And from Arcade to the geological foot of the mountains, or Newcastle.—A. Well, from Arcade to Pino or Rocklin or Rosedale Junction then would begin to encounter rocks; a rocky country, with undulating or rolling hills, with streams carrying a great deal of water during the wet season.

Q. From Roseville Junction, say to Auburn?—A. Well, all heavy cuts and fills.

Q. At Newcastle there was a very heavy trestle?—A. Yes, sir.

Q. About how high?—A. I do not know. I should judge from my general knowledge it must have been 70 or 80 feet above the bottom of the cañon.

Q. How long?—A. The entire length of it I should judge would be from out to out in the neighborhood of 1,000 feet; running from nothing down to 70 feet above the bottom of the cañon.

Q. What is the nature of the country and how heavy is the work from Auburn up to Emigrant Gap where the prominent snow line commences?—A. It grows heavier constantly; heavier cuts and heavier fills.

Q. From Emigrant Gap to the summit of the Sierras, seven thousand and odd feet above the level of the sea, what is the nature of country?—A. Very abrupt; sharp, rocky cañons and heavy trestles; most difficult to overcome under favorable conditions.

COMPARATIVE DIFFICULTIES OF CONSTRUCTION.

Q. Well, how was the work of construction upon that line, the conditions as you knew them considered, compared with that of any other

railroad that you are acquainted with in the United States?—A. Well, I do not know much about other railroads except in this State; but I know as to the time and the condition of things at that time that it was considered almost insurmountable.

Q. What were those conditions? How was the snow-fall?—A. The first difficulty was the want of knowledge on the part of contractors, and the want of appliances at that time; the conditions of labor and the surroundings of every description; high freight and the isolated condition of things generally made many difficulties in construction that could only be understood by those who would be familiar with it at the time. At this time, of course, after these things had been accomplished, it would not seem so insurmountable as it did at that time.

Q. The permanent snow belt commences about Emigrant Gap.—A. Well, or Blue Cañon.

THE AVERAGE SNOW-FALL.

Q. And extends across nearly to Truckee. About how deep would the snow fall there? What was the average snow-fall on that line?—A. The average snow-fall on a level would be about 30 feet for the season; but the snow was regulated by the cañons and the wind currents, &c., which would make necessary embankments sometimes 100 feet or more high. Heavy bodies of snow hanging on the mountains and sliding down, so it would be almost impossible to measure just what those difficulties were; I think beyond human calculation to tell just what relation they would have.

Q. You have been over it since the road was completed?—A. Many times.

CHARACTER OF WORK VERY HEAVY.

Q. Taking the general character of the work, what is it? Very heavy?—A. Decidedly heavy. I say "decidedly" don't express it.

Q. Where were you living at the time work was being prosecuted on that road?—A. In Virginia City, Nev.

Q. What was your business then?—A. Mining.

Q. Did you have occasion ever to cross the mountains during the winter?—A. Yes, sir; frequently. I would say that I crossed the Sierra Nevada Mountains in April, 1860, and up to the completion of the Central Pacific Railroad to Reno I probably crossed fifty times.

Q. Were the difficulties great in crossing?—A. Yes. I have been seven days from Carson to Placerville, a distance of about 75 miles.

PRICES OF SUPPLIES IN CARSON VALLEY.

Q. Do you know at the time what the prices of hay, barley, and such supplies as would be used in feeding men were at, say, Reno?—A. I found on my first trip over, there being at that time no other mode of getting across except by horseback, I had to pay 25 cents a pound for hay and 25 cents a pound for barley.

Q. Where?—A. In the Carson Valley. I never was able afterwards to procure barley for less than 5 or 6 cents a pound and hay $50 or $60 a ton until the completion of the railroad.

Q. You have a knowledge, of course, from your experience there, what were the prices of provisions and hay and grain, the prices which persons constructing the Central Pacific road would have to pay, say from

a point near the summit to Reno?—A. They were affected by the same rules; flour and provisions of every description.

PRICES PROPORTIONATELY HIGH IN SAN FRANCISCO.

Q. Can you give some of the prices that the contractors would have to pay?—A. I do not know now that I could. I have got my old books and accounts. I could turn to them. I know they were proportionately high as 5 cents a pound would be for barley. Wheat, flour, and provisions of every description were in proportion. In the market in San Francisco, when everything had to be obtained across the Isthmus or around Cape Horn, prices were generally much higher here in this city. And the freight would regulate the price anywheres in the snow belt of the Sierra Nevada Mountains.

12½ CENTS A POUND FOR FREIGHT ACROSS SIERRA NEVADAS.

Q. Do you know what was paid in 1862-'63 per pound for hauling freight across the Sierra Nevadas?—A. Yes; I paid 12½ cents a pound from Folsom; and I paid the same from the first station out when they began to use the Dutch Flat road, Newcastle.

Q. After the road was completed to Newcastle you paid as high as 12½ cents a pound for freight?—A. From there to Carson City.

Q. Was that the ruling rate?—A. Yes, sir; I got my freight as low as anybody. I used a good deal of exertion to get teams at that, and paid my freight promptly.

COULD NOT GET IT AT ANY PRICE IN WINTER.

Q. As the winter months approached, how was it?—A. Could not get it over at any price. That is, the freights would go over as early as the roads could be made passable.

Q. A force working in the mountains on the road during the winter months would have to be supplied by pack trains and carrying provisions on the backs of men, would they?—A. No other mode.

Q. And the expense would be very much increased?—A. Why, of course. Whenever you employed pack trains you would frequently for short distances have to pay 12, 15, or 20 cents a pound to pack 30 miles.

ENGAGED TEN OR ELEVEN YEARS IN BUILDING RAILROADS.

Q. What business have you been engaged in in the last few years?—A. Well, I have been a general operator one way and another all the time during my residence on this coast, mining; and the last ten or eleven years I have been engaged in building railroads.

Q. From what points?—A. I built a railroad and ferries from San Francisco to and across the Santa Cruz Mountains to the city of Santa Cruz.

Q. That railroad and ferry was run in opposition to the Central or the Southern Pacific?—A. Well, I never said opposition. In competition—close competition.

Q. Have you been acquainted with Governor Stanford, Mr. Hopkins, Mr. Crocker, and the directors of the Central Pacific Railroad?—A. I have known all those gentlemen for many years; never intimately.

Q. Never had any business connections with them?—A. Never; except what freights I may have had going over the road.

CONSTRUCTED SOUTH PACIFIC COAST RAILROAD.

Q. The road that you constructed was the South Pacific Coast Railroad?—A. Yes, sir.

Q. Was it constructed under your own superintendence?—A. Yes, sir. I was president, treasurer, and general manager for more than ten years.

Q. In what years?—A. Commencing in 1876.

Q. Then you used in the construction of tunnels and in rock work gh explosives, did you?—A. Yes, sir.

Q. They had none at the time this road was constructed?—A. No, if you mean the Central Pacific.

Q. Did you use the Burley drill in your tunnels?—A. Yes, sir; that kind of drill was unknown in those days when the Central Pacific was constructed.

Q. You have said that you know from actual observation the character of the country over which the Central Pacific Railroad runs from Sacramento City, say as far east as Reno?—A. Yes, sir.

Q. You have also said that you knew the prices of provisions, labor, and of such supplies as would go to make up a railroad then, iron, &c.?—A. Yes. I know the general business conditions of the country; at all times have been operating very largely then and since, to the extent of many millions of dollars.

Q. You have crossed the Central Pacific several times and know something about the character of the work?—A. I think I have a fair judgment of it.

CENTRAL PACIFIC COULD NOW BE BUILT FOR LESS THAN HALF ORIGINAL COST.

Q. From your experience in railroad conditions, in railroad construction, from your knowledge of the present price of labor and railroad material and your knowle.lge of the character of the Sierras over which this line is constructed and the conditions under which it was constructed, what would be your estimate of the difference between the cost of building that railroad now and what it actually cost to construct it at the time it was built?—A. More than 100 per cent. difference between then and now. I judge by comparison. I built a road here commencing in 1876. I bought rails at $60 a ton. I can produce vouchers to show that the South Pacific Coast Railroad cost $50,000 a mile and more from Alameda Point, including ferries, to Santa Cruz, after all the new appliances and past experiences were taken advantage of. I say new appliances; I mean the use of high explosives and the Burleigh drills, the better settlement of the country and the better supply of labor, and lower prices for rails and ties and all materials.

THE PROJECTORS THOUGHT TO BE "A LITTLE OFF."

Q. You are satisfied now if there were no railroad from Sacramento to Reno that one could be constructed for one-half less than it actually cost to construct the Central Pacific at the time it was built between those points?—A. I think it is quite proper and truthful to say that probably it could be built for half the money now, but it must be borne in mind constantly that comparison is all I can judge by. Who, at any time formerly, would have thought that we could build an iron cruiser

in San Francisco ever? Yet you have an iron cruiser now, here, being constructed in San Francisco, competed for against the great industries of the East. We find that they are building an iron cruiser here for the United States Government. The man who would have attempted to say that he could build an iron cruiser here at that day would have been considered insane. I say the same rule would apply to railroads, and especially over the Sierra Nevada Mountains.

Q. In other words you thought that the men who were constructing the Central Pacific or undertaking to do it were insane?—A. We thought they were a little off. Yes; that is what we all thought.

ALFRED E. DAVIS.

Subscribed and sworn to before me this 6th day of September, 1887.

L. S. B. SAWYER,
Comm'r U. S. Circuit Court, Nor. Dist. Cal.

SAN FRANCISCO, *August* 31, 1887.

F. S. DOUTY, a witness heretofore sworn by the said Commission, and who has testified before it, comes, in pursuance of an arrangement made between the Central Pacific Railroad Company and the said Commission for the taking of further testimony in San Francisco, and testifies as follows:

RESOLUTION TO ACCEPT INDIVIDUAL NOTE FOR CENTRAL PACIFIC DEBT.

Examined by Mr. COHEN:

Question. On the books of the Western Development Company of September 15, 1875, appears the following resolution:

Whereas Leland Stanford, C. P. Huntington, Charles Crocker, and Mark Hopkins are owing to the Central Pacific Railroad Company the sum of $878,847, and were owing said company said sum of money on the 1st day of January, 1875, and

Whereas the said Leland Stanford, C. P. Huntington, Charles Crocker, and Mark Hopkins ask to make their promissory note for said amount to said Central Pacific Company, bearing date of January 1, 1875, and payable two years thereafter, with interest at the rate of 10 per cent. in gold coin, and

Whereas said Stanford, Huntington, Crocker, and Hopkins proposed and agreed to deposit with said Central Pacific Railroad Company 17,597 shares of the capital stock of said last named company in pledge to secure the payment of said note and save this company harmless, and

Whereas this company is willing to accommodate said parties; now, therefore

It is ordered, That the promissory note of this company for the sum and of the tenor above stated be made and delivered to said Central Pacific Railroad Company on the deposit with said company by said Stanford, Huntington, Crocker, and Hopkins of the shares of stock above mentioned.

AN EXPLANATION OF THE TRANSACTION.

Governor Stanford, in his testimony of August 3, 1887, was asked to explain this transaction, but he had no recollection of it. I will ask you to explain what that transaction really was?—Answer. The resolution of September 15 is entirely misleading. The note which the said Western Development Company authorized its officers to execute was for the benefit of the Western Development Company, and was used in its business, was to all intents and purposes borrowed for its account.

The Western Development Company executed a note bearing date the 1st of January, 1875, to the order of the Central Pacific Railroad Company, which was signed by myself as president and A. C. Irwin as secretary. For the further security of the Central Pacific the note was indorsed by Charles Crocker, Mark Hopkins, C. P. Huntington, and Leland Stanford by C. Crocker, attorney.

I imagine from this indorsement that Governor Stanford must have been absent at the time.

Q. Can you say who furnished that resolution to you which appears on the books of September 15, 1875?—A. I cannot say positively; but this, as all other business at that time relating to the Western Development Company was generally under the instructions of General Colton, and I assume this to have been no exception to that rule.

F. S. DOUTY.

JOHN PUTNAM JACKSON, having been duly sworn, by L. S. B. Sawyer, commissioner of the United States circuit court, testified as follows:

Examined by Mr. COHEN:

Question. How long have you lived in California?—Answer. Since January, 1869.

PRESIDENT OF CALIFORNIA PACIFIC RAILROAD COMPANY.

Q. You were president of the California Pacific Railroad Company?—A. I was.

Q. From when to when?—A. I cannot give you the exact date. I was president of it over eighteen months; during the years 1870 and 1871; perhaps a part of 1872.

Q. Were you acquainted with a corporation or association known as the San Francisco Transfer Company, at any time?—A. I was.

Q. When?—A. About the years 1870-'71.

Q. And after?—A. After and ever since.

Q. Were you acquainted with the firm of Kennedy & Long?—A. I was; Kennedy, Long & Co.

Q. And with Mr. M. G. Kennedy?—A. With Mr. M. G. Kennedy, individually.

FINANCIAL STATUS OF SAN FRANCISCO TRANSFER COMPANY.

Q. What information can you give about the affairs of the San Francisco Transfer Company, Kennedy & Long, or Mr. Kennedy, about the years 1871-'72?—A. At the time mentioned, namely, about the year 1871, Mr. M. G. Kennedy, of the firm of Kennedy, Long & Co., doing business as the San Francisco Transfer Company, came to me and represented that he had a great number of small creditors that were embarrassing him, and that if he could get his indebtedness capitalized or lumped, it would relieve him from embarrassment and enable him to do a more effective business. He represented that $10,000 would do this. I thereupon loaned him $10,000, taking the note of the Transfer Company and Kennedy, Long & Co., and stock of that Transfer Company as collateral security for the payment of the note, which note I think bore interest at the rate of 1 per cent. a month. The note ran

along for some time past due, and I was unable to collect the interest. On examining into the affairs of the company, I found that it was embarrassed by a number of other creditors whom he was unable to pay, and he thereupon asked me to come into the company and take charge of it, and run its affairs. I examined into it and found it in so bad a condition, that I declined to have anything to do with its management. The creditors were embarrassing the business on all sides, and the indebtedness of the firm rendered them unable properly to transact their business. Thereupon I opened negotiations with two gentlemen, named Evan J. Coleman, and J. Henley Smith, which resulted in my selling to them the note and stock of the Transfer Company, which I held as collateral, which gave them a controlling interest in the company, and resulted in their succeeding to the business.

OFFICERS OF CENTRAL PACIFIC NOT CONCERNED IN SALE.

Q. During your relations with Kennedy, Long & Co., and the sale of the note and stock to Coleman and Smith, and the proceedings which followed, and which transferred the control of the company to them, did you have any conversation with Governor Stanford, or any of the officers of the Central Pacific?—A. I had nothing whatever to say to or do with them or any of them. The transaction was an abstract business proposition on my part, accepted by these two gentlemen without any reference whatever to the railroad company.

Q. At the time that Leland Stanford, C. P. Huntington, and Mark Hopkins obtained the control of the California Pacific by the purchase of a majority of its stock you were its president?—A. Yes, sir.

PURCHASE OF CALIFORNIA PACIFIC BENEFICIAL BY CENTRAL PACIFIC.

Q. I wish you would state for the benefit of the Commission your views upon the desirability of the purchase with reference to the interests of the Central Pacific Railroad Company, whether, in your judgment, it was a proper and beneficial thing to do for its interests, and why?—A. I was president of the road at the time, and much as I personally regretted the sale of the road, I could not but see that it was a most beneficial thing for the owners of the Central Pacific Railroad to do. In fact, I regarded it as nearly an absolute necessity for them to own that road; some of the reasons being that it was the shortest road between the commercial and the political capital of the State; that is, San Francisco and Sacramento, being 83 miles against 138 as run by the Western Pacific Railroad. The time was three and a half hours against five hours by the other route. The road was so popular that it took the great majority of the business between San Francisco and Sacramento, many persons disregarding their ticket already purchased by the longer route and paying extra to go on the shorter one. It brought a great deal of business to the Central Pacific Railroad which it otherwise would not have received, and made the road much more popular than any other single act could have done at that time. It was no unusual thing for parties coming overland, who had tickets to San Francisco to stop at Sacramento, disregarding the remaining coupons of their ticket, and buying a new ticket to ride over the California Pacific Railroad to San Francisco. The purchase of this road certainly brought money to the coffers of the Central Pacific.

PROPORTION OF LOCAL BUSINESS DONE BY CALIFORNIA PACIFIC.

Q. About what proportion of the local traffic between Sacramento and San Francisco was being done by the California Pacific as against

the Western Pacific?—A. We claimed at that time that we did three-quarters of the passenger business.

Q. At the time that Stanford, Huntington, and Hopkins took the majority of stock in the California Pacific were not the directors and owners of the latter attempting to float a scheme for the extension of the California Pacific by way of the Beckwith Pass to a connection with the Union Pacific at or near Ogden?—A. Yes, sir. That was called the California Pacific Railroad Extension Company; and had not the California Pacific Railroad been sold to the owners of the Central Pacific the connection would doubtless have been made with the Union Pacific, as this could readily have been done for less, it was thought, than one-half of the cost of the Central Pacific Railroad. The Central Pacific Railroad was built under such circumstances of pressure as to time and difficulty of realizing on its securities and the great cost of material at that time, being shortly after the war, that the new road projected by the California Pacific could have been built at a very much less cost, to wit, one-half, and would not have been burdened when finished with the indebtedness that handicapped the Central Pacific. I may say that it was a constant threat that some other company would parallel the Central Pacific, which the Central Pacific had to guard against by every means in its power.

J. P. JACKSON.

Subscribed and sworn to before me this 31st day of August, 1887.

TESTIMONY

TAKEN BY

THE UNITED STATES PACIFIC RAILWAY COMMISSION

APPOINTED

UNDER THE ACT OF CONGRESS APPROVED MARCH 3, 1887, ENTITLED "AN ACT AUTHORIZING AN INVESTIGATION OF THE BOOKS, ACCOUNTS, AND METHODS OF RAILROADS WHICH HAVE RECEIVED AID FROM THE UNITED STATES, AND FOR OTHER PURPOSES."

ROBERT E. PATTISON, OF PENNSYLVANIA, *Chairman*,
E. ELLERY ANDERSON, OF NEW YORK,
DAVID T. LITTLER, OF ILLINOIS,
Commissioners.

VOLUME VII.

REPORTED BY

CHARLES P. YOUNG, New York,
SECRETARY AND STENOGRAPHER TO THE COMMISSION.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1887.

3021

TESTIMONY

TAKEN BY

THE UNITED STATES PACIFIC RAILWAY COMMISSION,

AS TO

THE WORKING AND FINANCIAL MANAGEMENT OF THE RAILROADS THAT HAVE RECEIVED AID FROM THE GOVERNMENT IN BONDS.

PORTLAND, OREG., *Monday, August* 22, 1887.

The Commission met. Present: Commissioners Anderson and Littler.

BENJAMIN CAMPBELL, being duly sworn and examined, testified as follows:

By Commissioner ANDERSON:

Question. Where do you reside?—Answer. In Portland.

Q. How long have you lived here?—A. Three years.

Q. What is your occupation?—A. General freight agent of the Oregon Railway and Navigation Company.

Q. How long have you held that position?—A. Since October last.

Q. What position did you hold before that?—A. General agent of the Union Pacific Railway Company.

Q. At this place?—A. Yes.

Q. When was the Oregon Railway and Navigation Company leased to the Oregon Short Line?—A. I think, on the 1st of January of this year.

Q. Before that time, in connection with what company was it operated?—A. It was operated independently.

THE OREGON RAILWAY AND NAVIGATION COMPANY.

Q. Between what points does the Oregon Railway and Navigation Company operate?—A. It operates between Portland and Huntington; a distance of 404 miles.

Q. There connecting with what?—A. With the Oregon Short Line.

Q. No other road?—A. No. Then it operates between Portland and Wallula Junction, Washington Territory, 214 miles.

Q. That is another branch?—A. That is the main line—from Portland to Wallula Junction, 214 miles—connecting there with the Northern Pacific road. It also operates from Umatilla Junction, which is a point on the main line 187 miles east of Portland, to Huntington, a distance of 217 miles, connecting there with the Oregon Short Line.

TRAFFIC ARRANGEMENT WITH NORTHERN PACIFIC.

Q. Before the lease of the Oregon Short Line had you a traffic arrangement with the Northern Pacific, effected through the junction at Wallula?—A. Yes.

Q. Does that arrangement continue under the present system?—A. Yes.

STEAMSHIP LINES.

Q. What other property does the Oregon Railway and Navigation Company represent besides this road?—A. The Ocean Steamship line between Portland and San Francisco; the Willamette River line, between Portland and Corvallis; the Columbia River line, between Portland and Astoria, 110 miles; the Middle Columbia River line, between Portland and The Dalles, 88 miles; and the Puget Sound line, between Tacoma and Victoria, 90 miles.

By Commissioner LITTLER:

Q. How far is it from Portland to Corvallis?—A. 97 miles.

Q. How many steamers in all are required for this traffic?—A. I am unable to say how many are required. There are twelve, I think, in active use.

Q. Do I understand that all this property, as well as the railroad property, is included in the lease to the Oregon Short line?—A. I have never seen the lease.

Q. You do not know?—A. No; I do not.

Commissioner LITTLER (addressing Mr. Bromley). Do you know, Mr. Bromley?

Mr. BROMLEY. I believe it is.

INTERCHANGE OF TRAFFIC WITH OREGON SHORT LINE.

By Commissioner ANDERSON:

Q. What is the extent of the interchange of traffic between the Oregon Short Line and the Oregon Railway and Navigation Company, at present?—A. It would be necessary for me to refer to a report that is made showing that tonnage. I am unable to say, off hand, what it is.

Q. Can you furnish us with a copy of that report?—A. I can.

Q. Do you mean during to-day?—A. Yes.

By Commissioner LITTLER:

Q. When was the road completed through to Huntington and the connection made with the Oregon Short Line?—A. December 14, 1884.

By Commissioner ANDERSON:

Q. Can you describe generally the nature of that interchange of traffic?—A. The west-bound traffic consists of general merchandise; no particular commodity.

Q. Articles required for consumption along the line of the Oregon Railway and Navigation Company?—A. Articles required in Oregon and Washington Territory. East-bound, the traffic consists of wool, lumber, salmon, barley, live stock, and hops. Those are the principal articles of shipment; general merchandise is very light.

By Commissioner LITTLER:

Q. What important towns, if any, are there between here and Pocatello?—A. There are The Dalles, about 5,000 inhabitants; Pendleton,

3,500; Baker City, about the same; Boisé City, about 3,000. Those are the only important towns.

CHARACTER OF EAST-BOUND MERCHANDISE.

Q. As to the east-bound merchandise that you refer to, how far east does the bulk of it go?—A. The salmon and wool are shipped, generally, to the Atlantic seaboard; barley, live stock, and hops are confined largely to Saint Louis, Chicago, Milwaukee, and points on the Missouri River.

Q. So that substantially all your traffic gives to the main line of the Union Pacific the benefit of nearly the entire haul?—A. Substantially; yes.

PROBABLE FUTURE DEVELOPMENT.

Q. What is your judgment as to the growth of this traffic in the near future?—A. That is a question that I do not know that I can answer intelligently without giving some considerable consideration to it. I think that the salmon traffic will decrease. I think the wool traffic will decrease; to what extent I am unable to say. I think the barley traffic will increase; although that traffic is subject to the conditions of the crop in the Eastern States. The lumber traffic will increase largely, and the hop traffic, I think, will increase.

Q. Do you export any wheat from here over the Union Pacific?—A. No, sir. Wheat all comes this way.

Q. From where does the wheat come?—A. Almost exclusively from points on the Oregon Railway and Navigation Company's line.

Q. The Oregon Railway and Navigation Company is all in Oregon, is it not?—A. Part of the system is in Washington Territory.

Q. All your wheat comes over that line?—A. Yes. Nothing of that character reaches the Union Pacific.

Q. How is it in regard to the future of traffic going the other way?—A. I think there is a promised increase.

Q. That is largely dependent upon population here, I judge, is it not?—A. Altogether.

Q. The question whether it increases or not depends simply, then, on the increase of population?—A. Yes.

DESCRIPTION OF COUNTRY TRIBUTARY TO OREGON SHORT LINE.

Commissioner LITTLER. I wish you would give a description of the country tributary to this Oregon Short Line as it now exists, and a description of its productive qualities—what sort of cereals or other products it produces.

The WITNESS. Do you desire that I should include the Oregon Railway and Navigation Company's line?

Commissioner LITTLER. Yes.

The WITNESS. The cereal that is grown along the line and that is naturally transported East consists almost exclusively of barley. The line from Umatilla to Huntington runs through a generally mountainous country, with the exception of Grand Run and Powder River Valleys. Beyond Huntington the line traverses a sage-brush desert all the way from Huntington to Pocatello.

Q. What is the character of that sage-brush country; is it capable of producing anything?—A. It is capable of abundant production.

Q. Then you do not wish the Commission to understand that it is a worthless desert by any means?—A. No; I would not have you under-

stand that; but it requires immense outlays of capital to construct water ditches for the purpose of irrigating.

Q. What large stream is within reach of that sage-brush region?—A. Snake River.

Q. What is the capacity of Snake River for irrigation?—A. I suppose it is unlimited.

Q. Is it a large river with a heavy flow of water?—A. Yes.

By Commissioner ANDERSON:

Q. What does it empty into?—A. Into the Columbia River.

Q. At what point?—A. At Ainsworth, in Washington Territory.

THE SAGE-BRUSH COUNTRY.

Commissioner LITTLER:

Q. Regarding the sage-brush country, what are the peculiarities of the soil? Is it adapted to the growing of grain when put under cultivation?—A. Both grain and fruit; grain principally.

Q. What kind of grain is best adapted to that country?—A. The smaller kinds.

Q. Is any of that country adapted to raising corn successfully?—A. I think not; the nights are too cold.

Q. Is it well adapted for wheat, hops, rye, and barley?—A. Yes.

Q. What sort of a grass country is it?—A. That I am not thoroughly posted upon; but some sections of it are considered good for grazing purposes.

Q. Is there much stock raised and shipped over your road from that region?—A. A great deal; yes.

By Commissioner ANDERSON:

Q. Between what points is that?—A. Chiefly at Ontario. The stock originates in Southeastern Oregon.

Q. Is that on the line of the Oregon Railway and Navigation Company?—A. No; Ontario is on the Oregon Short Line, 48 miles east of Huntington.

Q. Is there any coal on any portion of that line?—A. No.

Q. Or on any territory tributary to it?—A. No.

Q. Where do you get your coal?—A. We obtain our coal for a portion of the line from Seattle, and for the remainder from Rock Springs, Wyo.

Q. What do you pay a ton?—A. I really do not know. For some we pay $5, some $5.50, and some $6. Six dollars, I think, is the average price.

Q. In regard to the effect on this business of competition from other roads, what roads are there that can draw off any portion of the business that would naturally flow to the Union Pacific?—A. At present the Northern Pacific is the principal competitor.

COMPETITION BY THE OREGON AND CALIFORNIA.

Q. How will the completion of the Oregon and California road affect you?—A. I am unable to express an opinion on that point. There are a multitude of circumstances to take into consideration in connection with that.

Q. Please explain some of them, without committing yourself to any opinion as to how they will work.—A. It will depend wholly on what policy is adopted by the Southern Pacific people; whether they will

make the same rates to and from the East and Portland that are made to and from the East and San Francisco.

By Commissioner LITTLER:

Q. Assuming that they will do that, what effect will that have on the Union Pacific?—A. It will have a tendency to divide the business to a great extent.

Q. Will that apply to all the different classes of business that you have referred to?—A. Yes; with perhaps the single exception of lumber.

Q. How many through freight trains do you run on your road?—A. We have one each way daily.

COMPETITION BY THE NORTHERN PACIFIC.

By Commissioner ANDERSON:

Q. In regard to competition by the Northern Pacific, how does that affect you, and through what extent of country?—A. That affects us, I might say, from Portland and, in fact, from all points on the Oregon Railway and Navigation line.

Q. All points also on the other side of the junction?—A. Not beyond Huntington, but all points confined to the line of the Oregon Railway and Navigation Company's system.

Q. What period does this traffic arrangement cover?—A. My recollection is that it covers a period of 99 years.

Q. Does that apply to all kinds of traffic? Is it a general arrangement?—A. Yes.

Q. Is there any other matter of interest to the Union Pacific Company that occurs to you to explain to us?—A. No; nothing that I think of. Your visit here is a suprise to me and I have not given the subject of your inquiry special thought.

Commissioner LITTLER. We are anxious to know what the natural resources are of the country which is tributary to this line between here and Granger, with the view of determining something in relation to its future prosperity.

The WITNESS. I have given you the principal items. The Oregon Short Line, in itself, runs through a mountain region a portion of the way.

Q. Are there any large mines producing much traffic?—A. Not very, outside of Montana. What is commonly termed the Wood River country is the mining region tributary to the Oregon Short Line.

INDUCEMENTS TO IMMIGRATION.

Q. What inducements or facilities are these companies offering to immigration and settlement along the line; anything special?—A. I am unfamiliar with the working of the passenger department and do not know of any special efforts in that particular direction, more than is generally done in railway advertising.

Q. The country through which this road runs is sparsely settled, generally, is it not?—A. Very sparsely.

Q. Would it not be good policy on the part of the company to offer extra inducements to settlement, with the view of inducing traffic?—A. I do not know in what way they could do that.

Commissioner LITTLER. They might do it by offering special rates for a long time to come to those who would build up towns along the line of the road. That would be one way.

The WITNESS. But under the interstate commerce law they could not do that.

Commissioner LITTLER. They can do it when the entire traffic is within a particular State.

The WITNESS. Very true; but the peculiarity of the country is such that the entire traffic could not possibly be confined to the limits of one State. The peculiarities of the State of Oregon are such that its settlement will be slow. There is a great deal of land that requires irrigation, a great deal that requires clearing of timber, and a great deal of it is remote from railroad facilities.

TOPOGRAPHY OF COUNTRY TRIBUTARY TO OREGON SHORT LINE.

Q. What is the general character of the country with reference to undulations between this point and Granger, tributary to the Oregon Short Line?—A. I might say that it is mountainous for a distance of 100 miles from Portland; then, passing over a section of the country for about 80 miles, it is almost wholly a sandy desert. We strike for a distance of 50 miles, a tolerably productive country; then we have a distance of 75 miles that is entirely mountainous. At that distance—say, 305 miles from Portland, we strike the Grand Run Valley, which is limited in extent to, perhaps, 20 by 35 miles. Then we cross another range of mountains, a distance of some 30 or 40 miles, until we strike Boulder River Valley. That is of practically the same size as the Grand Run Valley, excepting that it requires considerable irrigation to make it productive. Beyond that, or after you get 30 miles from Portland, you run through a mountainous country until you strike the Oregon Short Line.

Q. Give us a description of this lava-bed country over which the Oregon Short Line runs for so long a distance, and state whether that region is capable of agricultural production.—A. Between Huntington and Mountain Home, in Idaho—a distance of 150 miles—the country could be made productive, provided it could be irrigated. The elevation of the land is considerably above the Snake River, and it is, therefore, difficult to get water on it. Between Mountain Home and Pocatello the land is practically worthless, because there is little or no soil above the lava rock. That is, I think, as fair a general description as I could give.

FUTURE OF LAVA-BED COUNTRY.

Q. The future of that region is not very promising, then, is it?—A. No, sir; it cannot be called promising.

Q. Does that lava-bed region produce grass, or is it uninhabited by cattle?—A. It produces to a limited extent only. The proof of that statement lies in the fact that the supplies of hay are all furnished over the line of our road.

Q. Do you know what kind of grasses are indigenous to the soil through this region of country?—A. What is called "bunch" grass.

Q. Do you know whether timothy or blue grass flourish when planted?—A. Only in the Grand Run Valley, that I know of.

Q. Where is that valley, exactly?—A. That begins 305 miles east of Portland, and extends 30 miles further on.

The Commission then adjourned, to meet in New York city on Tuesday, September 20, 1887.

10 WALL STREET, NEW YORK, *Tuesday, September* 20, 1887.

The Commission met pursuant to adjournment, all the Commissioners being present.

The chairman laid before the Commission affidavits of John J. Haley and William Hood, taken on behalf of the Central Pacific Railway Company, after the closing of the sessions of the Commission in San Francisco.

For affidavit of John J. Haley, see page 3596.
For affidavit of William Hood, see page 3594.

Mr. A. A. Cohen, on behalf of the Central Pacific Railway Company, presented affidavits similarly taken of the following-named persons: Leland Stanford, E. H. Miller, jr., A. N. Towne, N. T. Smith, John P. Jackson, Arthur Brown, Richard Gray, E. C. Wright, W. H. Mills, F. S. Douty, A. E. Davis, L. M. Clement.

These affidavits will be found in the record as follows:

	Page.
Leland Stanford	3607
E. H. Miller, jr	3551
A. N. Towne	3594
N. T. Smith	3592
John P. Jackson	3627
Arthur Brown	3601
Richard Gray	3572
E. C. Wright	3605
W. H. Mills	3597
F. S. Douty	3626
A. E. Davis	3620
L. M. Clement	3607

CHARLES CROCKER, being duly sworn and examined, testifies as follows:

By Commissioner ANDERSON:

Question. How long have you resided in California?—Answer. I have lived there 37 years, and a little over.

Q. Where did you first reside?—A. I first went to the mines near Hanktown.

Q. Subsequently you resided in Sacramento?—A. Yes; I moved there in 1851.

Q. How long did your residence in Sacramento continue?—A. It commenced in 1851, and continued up to 1874.

Q. You then removed to San Francisco?—A. Yes.

Q. And has that been your residence ever since?—A. Yes; with the exception of about two years that I claimed residence here, lived here.

ACQUAINTANCE AND RELATIONSHIP WITH HUNTINGTON AND HOPKINS.

Q. What was your business in Sacramento?—A. I was in trade, merchandising there.

Q. When did your acquaintance with Mr. Huntington and Mr. Hopkins begin?—A. It is hard for me to remember that. It was some time before the railroad was commenced.

Q. Some time before Mr. Stanford was elected governor in 1861?—A. Oh, yes; several years.

Q. Were your relations with those gentlemen business or financial relations?—A. No; merely friendship.

Q. What was your line of business in Sacramento?—A. In the dry goods business.

Q. Mr. Hopkins was in the hardware business?—A. Yes.

Q. Did Mr. Stanford then reside in Sacramento?—A. He resided there when I knew him. He resided near the mines first.

INITIAL PROCEEDINGS FOR BUILDING CENTRAL PACIFIC ROAD.

Q. You have been associated, one way or another, with the enterprise of the construction of the Central Pacific Railway ever since its inception, I believe?—A. Yes, sir; we have been co-stockholders.

Q. Going back to the initial proceedings, after the company was first organized, do you remember the first contract that was taken for building the road from Sacramento City east for the first few miles of the road—say the first 18 miles?—A. The first contract was 18 miles.

Q. Do you remember whether, at the time that contract was taken, you were or were not a director of the road?—A. I was not.

WHETHER WITNESS WAS A DIRECTOR AT BEGINNING.

Q. Do you remember the fact that you had been a director before the contract was taken and that you resigned?—A. I would not be positive about that, whether it was before or whether it was after the road was built that I became a director.

Q. After the 18 miles were built?—A. No, after the road was entirely completed. I was not a director while the road was being built.

Commissioner ANDERSON. It appears from the records that you were a director at the time of the initial proceedings.

The WITNESS. Very well; if you know it then you need not ask me.

Commissioner ANDERSON. I want to get it on the record.

The WITNESS. I do not remember distinctly about it.

Q. Do you remember who became a director in your place; do you not remember that your brother took your place in the board?—A. No; I do not remember with certainty. The minutes of the board will tell all that better than I can tell it.

Q. Your brother was E. B. Crocker?—A. Yes, sir.

THE FIRST CONTRACT.

Q. What knowledge did you have at the time that contract was voted to you in the proceedings of the board that such a contract was coming up—was to be voted for?—A. It was advertised for. I think it was advertised, and I put in a bid for it. It is a good while ago now, and I do not remember all the incidents.

Q. Do you not remember anything about the terms of that contract?—A. As near as I can recollect it was $250,000 in cash, $50,000 in stock, and $100,000 in bonds. That is about the way I recollect it. I may be mistaken, however.

Mr. COHEN. It would save you a great deal of time to remember that all these facts you are inquiring about we fully admit.

Commissioner ANDERSON. The examination will not be long.

Q. That was for the construction of 18 miles of road?—A. From Sacramento to Roseville; yes, 18 miles of road as near I can recollect.

Q. You say there were bids called for. Do you remember whether there were any other bids or propositions made?—A. I cannot say positively as to that. It is a good while ago, and I do not remember all the circumstances.

Q. Do you remember the character of the country over which that 18 miles of road extended?—A. Yes.

DESCRIPTION OF FIRST 18 MILES OF ROAD.

Q. Please describe it generally.—A. Well, it was through the city streets out to the American River; then there was the crossing of the American River, which was quite expensive in those early days. Then for a while it was light work, with some cutting of rock, but mostly earth-work. Then there were several bridges, one, particularly, a pretty costly bridge, that crossed within about 2 miles of Roseville.

Q. Was it Arcade Creek?—A. No; it was within 2 miles of Roseville.

Q. Your contract included the bridge across the American River, did it not?—A. Yes, the complete structure.

TITLE OF MR. CROCKER'S FIRM, AND WHO WERE INTERESTED.

Q. What was the name of your firm; was it Crocker & Co.?—A. I do not remember whether it was Charles Crocker & Co. then, or whether that came afterwards. In that contract it may have been Charles Crocker & Co.

Q. When your firm was Charles Crocker & Co. whom did the "Co." represent?—A. It did not represent anybody. It was put there for the purpose of my associating others with me; and I sought to associate others with me, and could find nobody that would take the risks.

Q. Did anybody besides yourself have any interest in that contract?—A. No, sir.

Q. Did Mr. Huntington?—A. Not that I know of; he did not have any from me.

Q. Did Mr. Hopkins?—A. No.

Q. Or Mr. Stanford?—A. No.

Q. Did they have any interest in the subsequent contracts which your firm obtained for building the road from station 31 to the eastern line of the State?—A. No, sir; they did not; I was all the time trying to get others to come in with me, and could not.

Q. You say that neither of these gentlemen had any interest in that subsequent contract?—A. No, sir; none whatever.

THE FIRST 18 MILES.

Q. How long were you engaged in building the 18 miles?—A. I could not remember. I think it was about a year, but then I am not certain as to that.

Q. Was that entire construction completed before the passage of the act of 1864 granting the subsidy?—A. Yes, sir. You mean the law of 1864 which gave us the right to mortgage the road in advance of the Government bonds?

Commissioner ANDERSON. Yes.

The WITNESS. Yes, it was. I recollect that distinctly. How many miles did you ask about—18?

Commissioner ANDERSON. Yes.

The WITNESS. Oh, yes. It was before that. That might have been pending in Congress, but I do not think it was passed until the 18 miles were completed.

Mr. COHEN. What act are you speaking of now?

Commissioner ANDERSON. The second act—the act of 1864.

SUB-CONTRACTORS.

Q. What other contractors were engaged at this time in building sections of road—at the time you were building the 18 miles?—A. There were contractors under me. I let some little contracts.

Q. To whom did you let any portion of your work?—A. I let the bridge to I. M. Hubbard.

Q. The bridge across the American River?—A. Yes; and I let a rock cut out near Roseville to some one whom I do not remember.

Q. Besides your 18 miles, were there not some small sections of the work awarded to other contractors, who did their construction about the same time that you did yours, beyond the 18 miles?—A. There was nothing awarded until the 18 miles were finished and in running order.

BUILDING TO NEWCASTLE. WITNESS TO BE ALLOWED A CONTRACT FOR ONLY 2 MILES.

Q. Then what happened as to the future construction?—A. As near as I can recollect, they concluded to build up to Newcastle, some 31 miles.

Q. From Sacramento?—A. Yes; and they advertised for bids. They informed me that I could not have more than 2 miles of it. There was a great hue and cry there that I was a favored contractor, and they informed me that I could have but 2 miles of it.

Q. Who informed you?—A. The directors.

Q. Can you not specify the names?—A. The directors generally.

Q. Who were the active directors?—A. Governor Stanford, Mr. Hopkins, and my brother.

Q. And Mr. Huntington?—A. Mr. Huntington, I think, was here. I do not distinctly remember whether he had left for New York then or not, but if he was there, he was with them in it. As I understood, it was agreed upon between them that I should not have more than these 2 miles.

Q. This information came to you from the gentlemen whose names you have given?—A. Yes.

OTHER CONTRACTORS, AND THEIR FAILURE.

Q. What other contractors obtained any portion of the work?—A. There was a man by the name of S. D. Smith; and his firm was S. D. Smith & Co.

Q. Was there a man by the name of Collins?—A. There was a man by the name of Bates. Then Chittendon Knox had some, and a man by the name of Collins.

Q. What happened after that in regard to construction?—A. I think Mr. Collins failed in his. I am not certain whether it was Mr. Collins or some other man, but anyhow he failed in carrying it out, and then they got to bidding against each other for laborers, and put up the price of labor. There was a scarcity of labor on the coast at that time, and they bid against each other, and that was the reason they could not complete their construction.

Q. Do you remember what the contract with them was for?

The WITNESS. Do you mean by the mile?

Commissioner ANDERSON. No. Do you remember the whole amount of each contract?

A. No; they were so much for rock, and so much for cement, and so much for masonry.

AS TO THE ACT OF 1864.

Q. Was it during the period of the construction of these small sections that the act of 1864 became operative?—A. I cannot say as to that. I was not very familiar with the legislative part of the business. I was wrapped up in the construction. All that fixes it in my mind is that the 18 miles were constructed so that I rode over the work with one of the Senators, and he told me about this bill being pending—that is, the work above the 18 miles.

Q. After the bill was passed, in 1864–'65, you became aware of the fact that the company had obtained the right to mortgage its property in advance of the Government subsidy?—A. Yes.

CHARLES CROCKER & CO. PROCEED WITH THE WORK.

Q. What was the next contract that Charles Crocker & Co. obtained from the Central Pacific?—A. I think there was no contract in writing. I think that the board passed a resolution directing me to go on with the work at the prices at which I had taken the two upper sections. They were the heaviest sections up to Newcastle, including Newcastle. There may have been a contract, but I could not positively swear as to that, although I think it was a resolution and afterwards a contract. In the mean time I had become thoroughly warmed up to the building of this road; my whole heart was in it; I was willing to do anything to push it forward, and I took great risks in doing it.

AS TO THE TERMS.

Q. The terms you refer to as applicable to the two sections were payments at a specified rate for earth excavation?—A. Yes.

Q. Also for rock excavation?—A. Yes.

Q. Also for cement?—A. Yes.

Q. Also for masonry?—A. Yes. They went right on on the same terms—the contracts for the last two sections.

Q. Do you remember that there was also a price fixed for what is called grubbing and clearing the ground?—A. I do not remember now, but I presume there was. There naturally would be.

Q. Did you furnish the rails, or did you prepare the bed for the laying of the rails?—A. Yes, but I did not furnish the ties.

Q. You furnished none of the equipment?—A. No, sir.

Q. As matter of fact, you did continue the work and you constructed the road from the termination of the work on these small sections to the eastern line of the State?—A. Yes.

Q. Do you remember when that point was reached and the road completed to the eastern line of the State?—A. I could not positively say as to that, with any accuracy, in the absence of any reference.

DESIRABILITY OF LETTING CHAS. CROCKER & CO. PROCEED.

Q. Do you recall the fact that, before that resolution was passed with regard to that large section of work done by you, there was a formal report made as to the desirability of giving it to you rather than to continue the policy of awarding it to a number of contractors?—A. I do not remember distinctly about any resolution being passed. I was not a member of the board. But I remember that there was a good deal of talk about the difficulty that was experienced in controlling labor. The

experience that we had on the 13 miles that were between Roseville and Newcastle convinced me that if the contract was let out to everybody that would bid on one or two sections, and it was divided up in that way, the labor would become unmanageable, and that it would run up the price so that it would hamper the building of the road, and there would be less chance of success. That was talked over, and I joined in the discussion among the board of directors, although I was not a member of the board. It was decided that I should go on immediately and see what I could do. I did go on until we got tied up in suits and I had to stop. I could not get any money. They had got all the money I had and all I could borrow. That was the time when I would have been very glad to take a clean shirt and lose all I had, and quit.

RESOLUTION UNDER WHICH THEY PROCEEDED.

Commissioner ANDERSON. I am now on your large contract; the construction which was made by you from section 31 to the east line of the State. It appears that on the 1st of May, 1865, a committee, consisting of Leland Stanford, Mark Hopkins, and E. H. Miller, jr., was appointed to examine into and report on the question of letting the contract for the construction of the railroad and telegraph line east of Newcastle. That committee was appointed and reported on the 4th of June, 1865; and on that day a resolution was passed as follows:

Resolved and ordered, That Charles Crocker & Co. be allowed and paid for all work done and material furnished, or which hereafter may be done or furnished, until the further order of the board of directors, for the construction of the railroad of the company from section 43 eastward——

The WITNESS. Section 43?

Commissioner ANDERSON. Section 43; it so appears on this.

subject and according to the terms, conditions, and stipulations set forth in the contract with the said Charles Crocker dated September 19, 1863, except so far as the same may be rectified or changed by this order, at the following rates or prices, and in accordance with the following classifications:

Payments to be made according to monthly estimates, five-eighths in gold coin, and the remaining three-eighths in stock of the company, at the rate of $2 of capital stock for each $1 of said three-eighths of said estimate, with the privilege of paying said three-eighths in gold coin in lieu of said stock, at the election of said company, to be made at the time of such payments.

Q. Does that recall to your mind anything more definite as to what the terms of your contract were?—A. No; that is the first time, I think, that I ever heard that resolution. I have an indistinct recollection, however, that it was not a contract that I went on under from Newcastle; that it was a resolution of the board authorizing me to go on on the terms that I had been working on.

Mr. COHEN. Where did you take that from?

Commissioner ANDERSON. It is taken from your books.

Mr. COHEN. I think the word bonds is written in mistake for stock. I think it is a mistake in the copy.

The WITNESS. I did not have any bonds except on the 18-mile contract.

AS TO MONTHLY ESTIMATES.

Q. That resolution calls for monthly estimates. Do you remember who had charge of making those monthly estimates?—A. The chief engineer.

Q. Whose chief engineer?—A. The company's.

Q. Did you have an engineer?—A. No, sir.

Q. Who was the engineer in charge of that business?—A. At that time, Mr. Montague.

Q. What other engineer had charge of the making of the estimates?—A. I do not know; he had assistants; I cannot remember their names. For instance, the chief engineer has his regular corps of assistants, and those assistants set the grade-stakes, set the "cut-and-fill" stakes, and all that sort of thing. Whether they made up the estimates or not I cannot tell you, but I think they furnished the material from which the chief engineer made up the estimates.

AS TO CROSS-SECTIONS.

Q. The initial step was to survey the ground before the work commenced, by cross-sections?—A. Yes.

Q. And then the estimates were made as the work progressed?—A. My monthly estimates were made on the work actually accomplished, and they had to measure what I had done.

Q. They had to measure and subtract the second set of cross-sections from the first set of cross-sections to ascertain what work had been done?—A. Well, I am not an engineer, and I do not know how that was.

CALL FOR CROSS-SECTIONS.

Commissioner ANDERSON (addressing Mr. Cohen). We made a call on your company for the original cross-sections, and I do not know whether they have been furnished or not.

Mr. COHEN. Mr. Hood has given a deposition on that subject. There was a number of trunks full of them. Some of them, I believe, were lost. I do not know whether the others have been sent to New York or not.

PRICES FOR EXCAVATION.

Q. Do you remember the fact that the payments you were to receive varied very much with reference to different classes of earth excavation, that there was the loose earth, and second-class earth, etc., so that there were five prices for earth excavation?—A. I do not remember anything of the kind.

Q. Do you remember that there were different prices for rock excavation, varying from $2 to, I think, as high as $10 a yard?—A. Yes; and I know that some of it was not half paid for when they paid $10 a yard for it. I remember that very well.

Q. But you do not remember that there was any difference with reference to the different classes of earth excavation?—A. No; I do not. It seems to me that you must be mistaken about that, but I cannot swear that you are.

Q. That the prices for earth excavation varied from 40 and 50 cents up to $1.50 a yard?—A. Well, what I call cement they may have called earth; I do not know. But there was a different price for earth that was cemented and hard and had to be blasted.

PROPORTION OF HIGH-PRICED EXCAVATION.

Q. If I should recall it to your mind would you remember that the high-priced excavation was very much larger in number of yards entered on your estimate from which you received your payments than the ordinary earth?—A. I do not remember about it.

Q. Did you revise those estimates at all before they were presented to the company?—A. I used to look at them; yes. But I did not pretend to revise them, in figures. I did not know anything about it. I could not have measured a cut any more than I could have flown. I was not an engineer and had no knowledge of those things.

Q. How long were you engaged on the work from Newcastle to the east boundary of the State?—A. The east line of the State is down near Old Camp 24. We built some road across the mountains before the mountain portion was finished. The men were driven out of the mountain portion by the storms and could not be kept there any longer; could not do any work. The snow would fill up just as fast as they could dig it out, so I moved them down on the Truckee River. We hauled locomotives over (and when I say "we" I mean myself), and we hauled iron and cars and all that sort of thing and built 50 miles.

LOCOMOTIVES HAULED ON SLEIGHS.

By Mr. COHEN:

Q. How did you haul your locomotives, by wagons?—A. No, we hauled them over on sleighs. I think we hauled some of them over on logs, because we could not get a sleigh big enough. We crossed the snow-line before the gap in the mountains was finished, and we used to take passengers at Truckee and bring them to Cisco, where the road terminated, then they would get on stages and go over the mountain, and then get on the railroad again and go to Reno. That was before the mountain portion was connected.

BEFORE THE CONTRACT AND FINANCE COMPANY COMMENCED WORK.

Q. Was it before the Contract and Finance Company commenced their work?—A. Yes; I believe it was. It was before the contract was let to them, though they took the contract and they paid me for what I had done.

By Commissioner ANDERSON:

Q. Your recollection is that your work was substantially completed at the time the Contract and Finance Company took their contract in October, 1867?—A. No; I do not think it was. I think they took the contract before I had finished mine. In fact I do not know when the contract was let to them. What was the date of the contract to them?

Commissioner ANDERSON. December, 1867.

The WITNESS. Well, we finished the gap in the mountains there in the spring of 1868; we finished the road in 1869. I know that we built 501 miles in a short time—in nine months and twenty days. We finished the gap across the mountains in the early spring of 1868.

WHO KEPT THE BOOKS; AND WHERE?

Q. Who kept your books at this time—the books for this construction?

The WITNESS. Which construction?

Commissioner ANDERSON. From section 43 (or whatever it was) to the east line of the State of California?—A. I had a man by the name of Smith that kept them for a part of the time, and then W. E. Brown came in.

Q. What Smith—John Smith?—A. I think his name was Ralph Smith, if I remember rightly.

Q. Is he alive?—A. I cannot tell you; I have not seen him for a number of years.

Q. Where were those books kept?—A. In my office.

Q. In Sacramento?—A. Yes.

Q. Who assisted Mr. Smith in this work?—A. Well, I did. I used to do some of the work.

Q. Were those large books—large folios?—A. Yes.

Q. And the usual set—day-book and ledger?—A. There was what was called a blotter, then a journal and a ledger.

WHAT BECAME OF THE BOOKS?

Q. What became of the books after the work was completed?—A. I do not know. They were no use to me after I closed them up. I never inquired anything about them, and I do not know what became of them. I presume they are there among the débris.

Q. Why do you presume they are among the débris?—A. Well, I do not know why they should not be there. That is all I know about it. I had nothing to do with them after I got through with them.

Q. Have you not heard from any source whatever that those books were inquired for and could not be found?

The WITNESS. Charles Crocker & Co.'s books?

Commissioner ANDERSON. Yes.

A. No; I never knew that anybody cared to see them.

Mr. COHEN. We have not heard that they were asked for.

The WITNESS. I never knew that anybody had any interest in them.

Q. Have you not heard that both Mr. Wm. E. Brown and Mr. John Miller have stated that the books of Charles Crocker & Co. were together with the books of the Contract and Finance Company in the rooms occupied by the Contract and Finance Company, and that both the books of Charles Crocker & Co. and the books of the Contract and Finance Company prior to 1873 have gone astray and cannot be found?—A. No; I never heard anything about Charles Crocker & Co.'s books being sought for and inquired after. I do not know who has any business with them, If anybody asked me about them I would tell them that it was none of their business, unless it was your respectable board here.

WITNESS DOES NOT KNOW.

Q. I will ask you now where are your books?—A. I do not know any more than the man in the moon.

Q. When did you last see those books?—A. I cannot tell you that. I do not think I have seen them since they were closed up, shortly after the completion of my contract.

Q. You say that the Contract and Finance Company made some payments to you for some portion of your work which they finished. Those payments would require entry in your books, would they not?—A. Well, I said so, and I thought so at the time I said it, only a few minutes ago, but since you have spoken of the organization of the Contract and Finance Company it has refreshed my memory, and I remember that Wm. E. Brown kept a separate account of the work from the State line on, and that he used to go with me in paying off the men, and that he paid off my men as well as the Contract and Finance Company's men. At first I thought that I did that work, but I see now that I did not. There was a separate account kept. William E. Brown was the secre-

tary of the Contract and Finance Company, and there was a separate account kept of the work done beyond the State line.

Q. You say you have had no occasion to see these books since that work closed?—A. Yes.

Q. Is that your best recollection?—A. Yes.

Q. From 1868 until the present time you have never seen those books at all.—A. I will not say that I have never seen them, but I will say that I have never examined them.

Commissioner ANDERSON. I am talking about seeing them. I am talking about the disposition of those books, because they cannot be found.

Mr. COHEN. I do not think that is a fair statement. They have never been inquired for.

Commissioner ANDERSON. I beg your pardon. You have forgotten the evidence. The evidence was very close in the examination of Mr. John Miller and Mr. Brown as to the books of Charles Crocker & Co. Those two gentlemen stated that they had seen them with the books of the Contract and Finance Company.

Mr. COHEN. This strikes me as a new proposition.

CALL FOR THE BOOKS OF CHARLES CROCKER & CO.

The CHAIRMAN. Then we will make a formal call now on Mr. Cohen for the books of Charles Crocker & Co., if there is any misunderstanding.

Mr. COHEN. I have never heard of their being asked for until this moment, as far as my recollection serves me.

The CHAIRMAN. Will you produce the books of Charles Crocker & Co.?

Mr. COHEN. Where?

The CHAIRMAN. Here.

Mr. COHEN. I cannot very well if they are in California.

The CHAIRMAN. We call for them, and give you time to produce them within the next sixty days.

Mr. COHEN. I have no authority to take the books or records of the Central Pacific Company.

Commissioner ANDERSON. These are the books of Charles Crocker & Co.

The WITNESS. I do not know what right you have to examine my books.

Mr. ANDERSON. It is for you to say.

The WITNESS. Well, I do not know where they are. I do not know that I have any objection to your examining them; but, at the same time, I do not know what right you have to do so.

Commissioner ANDERSON. The main question is whether they exist or not.

The WITNESS. I cannot say as to that. I cannot say whether they exist or not. I really have not seen them—have not had occasion to see them since they were closed, after the contract was finished.

Commissioner ANDERSON. I will say that certain presumptions arise from the fact that the books of the Contract and Finance Company have disappeared and cannot be found. The same claim is made as to the books of Charles Crocker & Co.

The WITNESS. Yes, I know.

Commissioner ANDERSON. Now, without saying whether there is any merit in it or not, we do say that we desire to ascertain whether or not

the books are in existence, without saying whether we shall examine the entries in them or not.

The WITNESS. I cannot see why they should not be in existence except that I wanted to find the Contract and Finance Company's books once, and tried to find them, and could not.

Commissioner ANDERSON. We ask you now to find the books of Charles Crocker & Co., or else satisfy us of their existence, so that we may test the question of whether we shall ask for their production or not.

The WITNESS. At least, they are not here, unless somebody has brought them here without my knowledge.

Commissioner ANDERSON. Our only desire is to know where they are.

THE WITNESS. I do not know where they are. If I can find them when I get to California I will send them to you.

Mr. COHEN. I do not know about that. We will see about that.

The WITNESS. Provided the lawyers of the company do not object. I have no objections, so far as I am concerned.

Commissioner ANDERSON. It is your affair.

COMPENSATION FOR WORK DONE FROM NEWCASTLE TO EAST LINE OF STATE.

Q. Do you remember anything about the amounts you received for the work done by you from Newcastle to the east line of the State?—A. No, sir; I cannot tell you about that.

Q. Have you any recollection of how much it was per mile for any portion of the work?—A. No, sir; it was by the yard.

Q. I mean how much it came to per mile?—A. No, I have not.

Q. Do you remember that there were some miles of that work for which you received as high as $300,000 per mile?—A. I do not.

Q. Or $400,000 per mile?—A. I do not remember. Very likely there are miles of the road that cost fully that.

Q. I am only asking whether you recall what you did receive?—A. I do not recall; I cannot recall so far back.

Q. Do you remember that you received a large amount of stock in addition to the cash payments?—A. Yes.

Q. Do you remember how much stock in all you received?—A. No, I do not.

Q. Do you remember whether it was in excess of $10,000,000?—A. Oh, I cannot remember those things so long as that. It is a long time ago, and I had no occasion to treasure it up. There is nothing now here to recall it to my mind.

Q. You do remember that the amount of stock received by Charles Crocker & Co. was a very large amount of stock?—A. It necessarily would be.

AS TO DISPOSITION OF STOCK.

Q. Do you remember what disposition was made of that stock by you?—A. I do not remember now exactly.

Q. Do you remember that it was passed over by you to the Contract and Finance Company?—A. I think it was all put in together. I do not know, though, for certain; I think it was.

Q. What, exactly, do you mean by its all being put in together?—A. I was a stockholder in the Contract and Finance Company. The stock was not considered worth anything. I did not consider it worth much

of anything at the time the road was finished, and I think we put the stock all in together, but I am not certain about it.

By Commissioner LITTLER:

Q. You mean into the Contract and Finance Company?—A. Yes.

By Commissioner ANDERSON:

Q. When you say "we," whom do you mean?—A. The other stockholders of the Contract and Finance Company and myself.

Q. Who were the others?—A. I do not remember. There were a good many of them.

Q. You remember that Mr. Huntington was one?—A. I never saw his name on the books.

WERE STANFORD, HUNTINGTON, HOPKINS, AND CROCKER DESIGNATED TO HOLD ALL THE STOCK?

Q. I do not say that you did; but there were certain persons who, you remember, were designated to hold the stock. Do you not remember that you and Mr. Stanford and Mr. Huntington and Mr. Hopkins were designated to hold all the stock?—A. I am not certain of it. I know that they held most of it; but I am not certain that they held all of it.

Q. As far as your recollection is concerned, do you remember that there were any other stockholders who held an interest in that stock except those four and E. B. Crocker?—A. Well, I really think—and yet I cannot swear it is so, but I rather think that W. E. Brown had some of that stock, and that Mr. Strobridge had some of it; I am not certain of it.

Commissioner ANDERSON. They have both been examined, and Mr. Brown said he was a representative of some of the others.

The WITNESS. Then, if you found those particulars from the books and other sources, why do you bother me about it?

Commissioner ANDERSON. I will show you in a minute.

The WITNESS. I cannot understand, if you found out all this information, why you bother me about it. I tell you that I have not the means here of refreshing my memory, and I defy you or any other man to remember such things as those after what has been done since then.

Commissioner ANDERSON. We will go back to the disposition of the Central Pacific stock which you received. You say it was all turned in to the Contract and Finance Company—the stock you received?—A. I do not say so. I say I think it was. If you have been down there and have had access to the books, why do you ask me? The books are in your possession now, I understand.

Commissioner ANDERSON. No, sir; the books cannot be found.

The WITNESS. What books?

Commissioner ANDERSON. The books of the Contract and Finance Company.

Mr. COHEN. Every fact you wanted has been given.

Commissioner ANDERSON. I know; but you know that the conclusion which I want to reach necessitates this examination. Let us go on in an orderly way.

CONTRACT AND FINANCE STOCK.

Q. You spoke of all of you putting your stock together and turning it into the Contract and Finance Company. Had any other gentlemen

any of the Contract and Finance Company's stock, or was it not all turned over to you, on this contract?—A. They had considerable of it, as I remember. I subscribed for quite a large quantity of stock before the road was commenced.

Q. How much in all?—A. Well, enough to control it, all of them together.

Q. Was there over a million and a half that had been issued before you began your contract from station 31?—A. I cannot say as to that. The books will show the whole thing.

Commissioner ANDERSON. I merely asked whether you had not become the holder of the bulk of the stock that had been issued at the time you completed this contract to the east line of the State?

The WITNESS. I think the Contract and Finance Company was.

BULK OF CENTRAL PACIFIC STOCK ISSUED TO CROCKER & CO. FOR CONSTRUCTION.

Q. Before the Contract and Finance Company commenced, had not the bulk of the stock been issued to Charles Crocker & Co. for construction?—A. As near as I can recollect, that is so.

Commissioner ANDERSON. Now, that stock, amounting to many millions of dollars, was passed by you to the Contract and Finance Company, as I understand it.

The WITNESS. Well what do you call "dollars"?

Commissioner ANDERSON. I mean the par value of the stock. That quantity of stock was passed over by you to the Contract and Finance Company?

The WITNESS. I think it was.

Commissioner ANDERSON. And in that company the gentlemen you have named were the stockholders, and as such became interested in the stock which was passed over to the Contract and Finance Company?

The WITNESS. Of course, if they were the stockholders they got the stock.

WHY THEY PASSED IT OVER TO CONTRACT AND FINANCE COMPANY.

Commissioner ANDERSON. Now I want to know why, if you were the only person interested in the contract for this 138 miles of road, and Mr. Huntington and Mr. Stanford and Mr. Hopkins had no interest at all, you passed over all the stock which you had received in payment to a company in which they were joint stockholders with you, holding equal shares of stock.

The WITNESS. Well, in the first place, I did not count the stock worth anything much only to control the road. In the next place, it was stormy times—I mean in the money sense. I was heavily in debt. The Contract and Finance Company was heavily in debt.

Commissioner ANDERSON. The Contract and Finance Company had not yet commenced operations; it had just been formed.

The WITNESS. But the stock was not put into that company until the road was finished, I think. I do not remember when it was done.

Mr. COHEN. It was done a year after the road was finished.

The WITNESS. Well, it was done before, I know, because I had no inducement to do it. As near as I can recollect, the inducements for me were to get up a strong team, and unite our debts and unite everything, to succeed. I was afraid of being crushed out and I came very near it.

There was one time in my history, as I have said before, when I would have taken a clean shirt and quit operations, and I had commenced that railroad a rich man.

WHEN THAT WAS DONE.

Commissioner ANDERSON. What I want to get at is when you passed this large quantity of stock over to the Contract and Finance Company?

The WITNESS. I do not recollect.

Q. You do not know whether it was at the beginning of their work?—A. I know it was not at the beginning.

Q. Do you know whether it was after the completion of the road, in 1869?—A. I cannot tell you exactly the time. My remembrance is it was after the Contract and Finance Company had found out that they were heavily in debt, and the railroad company was in debt, and I was in debt. There was a general weeping all along the line.

Q. Do you know when those tears were shed—at what period; was it in May, 1869, when the road was finished?—A. I did not say that there were tears shed. You know that I meant that in a figurative sense.

Commissioner ANDERSON. So did I.

GREAT REJOICING ON COMPLETION OF ROAD.

Q. Do you know whether it was a fact that in 1869, when the road was completed, there was great distress—or was it an occasion of much rejoicing?—A. It was an occasion of much rejoicing. The people were rejoiced to know that the road was finished, and they did not care a continental whether I owed a million or ten millions, or that Mr. Stanford owed it. They had got the road, and they began "cussing" us immediately afterwards.

EARNINGS OF CENTRAL PACIFIC UP TO MAY, 1869.

Q. Is it a fact that, up to May, 1869, the Central Pacific's account of earnings showed that it had actually earned up to that period, on its net income account, from two to three million dollars?

The WITNESS. Before the road was finished?

Commissioner ANDERSON. No, up to May, 1869—that its net earnings, over and above all liabilities, were from two to three million dollars?

The WITNESS. I do not remember that.

Commissioner ANDERSON. The reports of the company show that.

The WITNESS. Then talk to the company. I was not a member of the company then.

Commissioner ANDERSON. But I say if it be true that your net earnings show that net gain——

The WITNESS (interposing). But does not the same account show the interest amounts that we had to pay?

Commissioner ANDERSON. But I am speaking of everything—after paying interest charges, and all operating expenses.

The WITNESS. I do not think the company earned them.

Commissioner ANDERSON. Would you like to look at the interest account, which is here?

The WITNESS. No; if you know it, that is sufficient.

WERE SUITS BROUGHT TO RECOVER ON STOCK?

Q. Is it not true that within a year after the completion of the road suits were brought against Mr. Stanford, and maybe against yourself (of that I am not positive), in order to recover on stock of the road—to recover large amounts of money which it was claimed that that stock fairly represented and that the holders were entitled to receive—on the ground that immense sums of money had been made and misapplied by the directors of the road? Such suits were brought, were they not?—A. I guess so; but do you know whether they ever proved anything of the kind?

Commissioner ANDERSON. I did not ask whether they did or not.

The WITNESS. There have been a great many of that kind of suits brought, and there have been a great many charges brought against the builders of the Central Pacific Railroad and the Union Pacific Railroad. They have been charged with everything you can imagine. Why? Because they built that road, and because they had connection with the Government of the United States in building it. Every politician, every little fellow that wanted to get to be a cross-roads politician, was engaged in hooting at the road, and they commenced such suits, but that does not prove that the company had the money that they charged it had.

AS TO SETTLEMENT OF SUCH SUITS.

Q. Now, as matter of fact, is it not true that all those suits were settled, and that the company paid, in order to settle the suits and acquire the stock, from $250 a share to as high as $1,700 a share?—A. No, sir; it is not true. The company never paid anything.

Q. Or that such payments were made by the individual directors against whom the suits were brought?

The WITNESS. Understand, I do not want to evade a direct answer to your question; but if I answer it directly, a false impression would go out. About the time of the bringing of that suit we had inaugurated a Southern Pacific Railroad. We were going to build that. We had bonds to sell to the amount of $25,000,000 or $30,000,000 perhaps—to a great amount at any rate—I have forgotten now how many there were on the market. The fact of any such suit being brought, and the newspapers all ready to publish everything that they could against the defendants in that suit and for the plaintiffs, injured the sale of those bonds. I wanted to fight the suits right out, notwithstanding that it would damage the sale of those bonds; but my associates thought it was better to pay these fellows something than to have this continued excitement and these continual charges and countercharges going through the press, to the injury of the sale of twenty-five or thirty million dollars of bonds—I have forgotten how many there were, but fully $25,000,000. I recollect that Mr. Huntington said that ½ per cent. or 1 per cent. of the price of those bonds would more than settle this suit, and that it was better to do it than to suffer a loss of 2 or 3 per cent. on the sale of those bonds; and that was the governing principle that settled those suits. If I had had my way they would not have been settled. I think it was a great mistake to settle them.

Mr. COHEN. I have said to Mr. Crocker that he was a little mixed about his dates. It was other bonds that were to be sold about that time, such as the San Joaquin.

Q. Do you remember how many of those suits there were—the Lambard suit and the Robinson suit?—A. The Robinson suit was long afterwards.

THE ROBINSON AND LAMBARD SUITS.

Q. It was on the same general ground, was it not?—A. Yes; the claim was that there were two kinds of stock—that one was much more valuable than another kind, in the estimation of the newspaper press; and the fellows that wanted to make something for nothing. There were lots of those. The first lot that was issued was, I believe, $8,500,000, or $8,000,000, I am not certain which. That was not sufficient to build the road to the summit of the Sierra Nevadas or to the State line. The law of the State required, I believe, that the stock should equal the bonds that should be issued on the road; and it was raised to $20,000,000. Then afterwards, when it was concluded that we could build on to Salt Lake, it was raised to $100,000,000, in order to cover it. Now, those parties that held this old stock (most of them never paid a cent for it) thought they had something that was worth ten or fifteen times as much in the $100,000,000 of stock, and so they brought these suits. They claimed, too, and set up in the papers that I changed my old original stock and got ten for one. It was not true. I took share for share; so did Mr. Stanford; so did Mr. Huntington; so did all—everybody except these fellows that had not done anything for their stock. Robinson was a hanger-on about Congress. We had given Judah a few shares to help him along.

Q. That was not all of the suits, was it?—A. The Lambard suit was the same, and so was the Brannan suit. Brannan never gave a dollar for his stock.

Q. You remember that the complaint charged the paying, by the directors to themselves, of exorbitant prices for construction, and misapplying the donations given by different counties in the State? You recollect all those allegations, do you not?—A. Yes; and I recollect that some newspapers said that these fellows had made $200,000,000 of cash in building the road. The total amount was about $70,000,000 that passed through their hands for building the road, I believe. Those things are unworthy of this Commission going into and inquiring about. They were blackmail suits. For instance, I saw some reports of Strong's evidence. He sold his stock to Lambard; and he says Lambard never paid him for it; and I know a widow that he got stock from in the same way, and he never gave her a cent. That is the kind of men they were.

AS TO VALUE OF STOCK IN 1869–'70.

Q. The object of the question is to test your statement, that in 1869 and 1870 you did not consider the Central Pacific stock worth anything at all?—A. I did not say "anything at all." I say any money. You could not sell it. It was only for the control of the road that I considered it of any value.

WHAT WAS PAID FOR STOCK IN SETTLEMENT OF SUITS.

Q. Yet, as a matter of fact, in all these suits brought from 1870 to 1876—the Brannan suit, the Lambard suit, the Robinson suit, and the San Joaquin suit—is it not true that the directors paid from $250 to $1,700 a share in settlement of those suits?—A. I do not think they ever paid any such amount of money. I do not know, though. I never paid any such amount of money. What they did I cannot say.

Q. What is the highest you paid?—A. I am talking about one period of time and you are talking about another.

Q. What time are you talking about?—A. I am talking about the time when this stock was turned into the Contract and Finance Company, which was long previous to the commencement of those suits. Do you recollect your asking me that question?

Commissioner ANDERSON. I do, and that Mr. Cohen said it was in 1870.

The WITNESS. Well, these suits were brought after that.

Q. When was the Brannan suit brought?—A. I do not remember, but my impression is that it was brought after the completion of the road.

Q. 1870 was after the completion of the road?

Mr. COHEN. The Lambard suit was brought in 1870.

Commissioner ANDERSON. About the same time.

Mr. COHEN. Mr. Crocker is a little mixed about his dates, and about his facts. He made some remarks here about the causes that induced these suits, some remarks about the newspaper men, which, of course, are only in jest. [Laughter.] We look upon the newspapers as our immediate friends. We expect justice from the Government through the newspapers.

WHY THE SUITS WERE SETTLED.

The WITNESS. In fairness, you ought to remember that I said that the suits were settled for the purpose of avoiding the scandal, and to assist in the disposition of the bonds we had to sell for the building of other roads. It was not because the stock was worth it.

Q. But is it not true that at the time you made the settlement of the Brannan and Lambard suits you did know that the stock of the Central Pacific Company was a valuable asset, that it promised to do a large business, and that within three years afterwards it paid dividends on its stock?

SALE OF STOCK BY WITNESS IN 1871.

A. I remember this, that in 1871 I sold all my stock for 12 cents on the dollar, and that I was very glad to sell it, and that that stock carried with it my interest in the Southern Pacific Railway Company, and in several other companies that I did not have the stock of.

By Mr. COHEN:

Q. At what date do you fix that sale?—A. That was in April, 1871, I think.

By Mr. ANDERSON:

Q. To whom did you sell it?—A. I sold it to Mr. Stanford, Mr. Huntington, and Mr. Hopkins.

Q. How long did they keep it?—A. I do not know.

Q. Did not they sell it back to you?—A. Oh, yes. I went off to Europe for my health. I was very much broken down, and just when I came back—I do not know——

THE STOCK NOT PAID FOR, BUT RETURNED.

Mr. COHEN. Go on and tell the whole story. They did not pay you for it.

The WITNESS. They did not pay me for it.

Mr. COHEN. And they gave you back the stock?

The WITNESS. I asked them for payment, and told them I had come back recuperated, and wanted to go into business. I asked Mr. Stanford

for money there. He would not or did not pay me. I met Mr. Huntington, and I told him I must have that money; that I was able to go into business now, and wanted it. "Well," said he, "Charley, we have not got it. We cannot get it." It was right in the flurry, then, of 1873—the Jay Cooke flurry. They could not get money. I had $60,000 in the bank in California, and I tried to get it here to buy some Wells, Fargo & Company stock, and I could not get it. They would not send it by telegraph, because they had not got it to spare. I took that stock back and tore up the papers.

Q. How long were you in Europe?—A. About two years.

THE CONTRACT OF SALE IN WRITING.

Q. Was that contract between you and Mr. Stanford in writing?—A. Yes.

Q. Have you a copy of it?—A. I do not know whether I have or not.

Q. Did it not embrace other matter besides the Central Pacific stock?—A. It embraced this other property that I told you of.

Q. Was each security scheduled, or was there a lump price?—A. There was a lump of everything connected with railroads on my part. I sold, on a basis of 12 cents on the dollar, the shares of the Central Pacific, saying nothing about the others.

Q. Do you swear that that is so stated in the contract—that it is so stated definitely—that 12 cents a share is stated in the contract, or is that an estimate that you make from the number of dollars that you received?—A. I cannot say that it was stated in the contract to be 12 cents a share. I think we figured it up and then stated the amount.

Mr. COHEN. You mean 12 per cent., not 12 cents a share.

The WITNESS. Yes.

Commissioner ANDERSON. We would like to have that contract, if you can find it, to test the accuracy of your memory as to the price.

By Commissioner LITTLER:

Q. I understand you to say that when you canceled the contract it was surrendered. Is that so?—A. I think so.

Q. Then you would not have it?—A. I would not. I cannot swear that it was surrendered, but I know this, that Mr. Huntington said, "Let us tear up the old contract and take your stock back, and you come right in with us and go ahead in all these enterprises that have been started in the mean time." He said, "We will just consider you have had two years' leave of absence, and when I want leave of absence I will take it."

AS TO DIVIDENDS.

By Commissioner ANDERSON:

Q. Had you received the first dividends on your stock before you passed it over?—A. Oh, no; there were no dividends then. If there had been I would not have sold for any 12 cents.

Q. When was the first dividend paid on this stock?—A. I cannot tell you. The books will show.

Commissioner ANDERSON. The books show that it was in 1873.

The WITNESS. Then that is correct.

Q. When you got the stock back had there been a dividend paid to Mr. Stanford and these others who held it?

The WITNESS. Before I got it back?

Commissioner ANDERSON. Yes; before they gave it back to you.

The WITNESS. No, sir; I do not think there was.

Mr. COHEN. Mr. Crocker took this stock back just as he sold it, and surrendered the notes that had been given.

Commissioner ANDERSON. I understand that; but we want to get some explanation of values—to ascertain whether the stock was a dividend-paying stock at the time it was returned.

The WITNESS. No; it was not. I took it back in October, 1873, I think. [To Mr. Cohen.] You recollect when I telegraphed to you?

Mr. COHEN. Some time in 1873. But whatever rights the stock had, you got just the same as if you had never sold it.

THE STOCK HAD NOT PASSED OUT OF WITNESS' POSSESSION.

The WITNESS. Oh, yes. In fact it had not passed out of my possession, but was in the bank of California in San Francisco.

Q. Did not the contract that you made with Stanford & Co. contain an option under which you were entitled, within a given period, to cancel it and take your securities back?—A. No; it was an absolute sale.

Q. Without any payment whatever, and without any transfer of the securities?—A. Yes; there was nothing paid out at all.

By Commissioner LITTLER:

Q. Do I understand that it was placed in the bank of California, in escrow, to be given to the purchasers when they should pay the notes?—A. It was placed in my strong box in the vault of the bank, and when they paid for it I was to give them the stock. I retained it.

Q. Then you retained the possession of it notwithstanding the sale?—A. Yes.

NOTES GIVEN FOR THE STOCK.

Q. How did they evidence payments for this stock—by notes?—A. Yes; they gave me their notes.

Q. Where were those notes?—A. I think I gave them into the hands of the bank of California, in an envelope indorsed, "Whenever there is a payment made on the inclosed notes a receipt may be given in my name and ——." I cannot remember exactly the indorsement.

By Commissioner ANDERSON:

Q. You did not take them with you to Europe?—A. No.

Q. Nor did you bring them to New York?—A. No.

By Commissioner LITTLER:

Q. Both the notes and securities were in California?—A. Yes; I have forgotten now whether or not I left both with Ralston, the cashier. I think very likely I did, and with written instructions on the envelopes—large envelopes, you know—that when any amount was paid a certain amount of stock should be delivered.

AS TO PREPARATION AND CUSTODY OF CONTRACT.

By Commissioner ANDERSON:

Q. As to the contracts: Did you not also leave the contracts there with Mr. Ralston?—A. No; I do not think I left the contracts with him.

Q. What do you think became of the contracts?—A. I think I left them with W. E. Brown.

Q. You think they were delivered?—A. It is pretty hard for me to remember all these little incidents. I think very likely the contract was tied up with the stock and the whole thing placed in the bank there together.

Q. Who drew the contract, do you remember?—A. I drew it.

Q. Mr. Cohen did not draw it?

Mr. COHEN. Mr. Storrs drew it, did he not?

The WITNESS. No, sir; I drew it myself. I think it will be found in my handwriting originally; and then it was copied by Mr. Huntington's clerk, or may be I copied it.

Q. Did you sign it?—A. Yes.

Q. And hand it to the parties in interest?—A. They took a copy and I took a copy. There were duplicates. There were two copies—I do not know but there were three. My brother was in it.

THE SALE A BONA FIDE TRANSACTION, THOUGH NO MONEY PAID.

Q. Was this anything more than an arrangement that was to go into effect in case you should become very sick abroad; was it a seriously consummated transaction?—A. It was entirely consummated. It was a bona fide, true transaction, and I did not regard myself as interested in the railroad one dollar.

Q. And yet no money whatever was paid to you?—A. No; it was a a very foolish thing to do, but that is just the way I did it.

Q. The securities were left in escrow until it was paid off?—A. Yes; and I recollect, when I talked to Mr. Stanford about it, he said he thought it was a big price, and I said, "Why, governor, you did not pay me a cent. I trusted entirely to you."

Q. At the time when this transaction was entered into, did you examine the reports of the company to see what its earnings were?—A. I do not remember any particular examination. I did not make any examination for the sake of sale. The fact was my brother had been taken with softening of the brain, and my physician told me, "Mr. Crocker, if you go on another year with the work you are doing you will go after your brother." Well, what was money in consideration of such a state of affairs?

CONSIDERATIONS OF HEALTH INVOLVED.

Q. Then you made this arrangement largely in consequence of these representations and the condition of your brother's health?—A. Not my brother's health—my own health. He was already afflicted and I could see what a wreck he was.

Q. Do you remember that about this time Mr. D. O. Mills made a proposition to acquire an interest in this enterprise?—A. He made a proposition while I was in Europe.

Q. Do you remember what he offered for 80 per cent. of the stock and some other property in San Francisco?

Mr. COHEN. He did not offer anything. It was offered to him.

The WITNESS. I was not present at that trade. I only know what I heard.

Mr. COHEN. Mr. Crocker was then out of the concern.

The WITNESS. I do not know anything about it of my own knowledge; it is only hearsay.

STATIONS 31 TO 138. WHAT WAS COST OF CONSTRUCTION?

Q. Have you any recollection of the cost of construction to Crocker & Co. of the road from station 31 to station 138?—A. No. If you know

how much the company paid I can tell you that Crocker & Co. did not have any money when they got through.

Commissioner ANDERSON. That is exceedingly vague, because they might have used the money in other adventures—in other matters of business.

The WITNESS. That was the only business they had; and a pretty heavy old business it was. You build a railroad through those Sierra Nevada Mountains, and you will find that money will melt away very fast, especially in war times.

Q. All that you remember is that you had no money left at the end?—A. Yes; that is what I remember; we had no money left.

Q. You had all the stock that you had received?—A. Well, I would not say that I had not used some, because the stock may be in some contracts. I cannot say now. I think I did use some stock in some subcontracts.

FINANCIAL CONDITION OF WITNESS WHEN HE UNDERTOOK TO BUILD CENTRAL PACIFIC ROAD.

Q. You said a little while ago that when you commenced this road you were a rich man. Please be a little more precise in explaining what you mean by that.—A. I had a splendid business and had some money and was happy, and I left that and went into this turmoil and these everlasting investigations and all that is mean.

Commissioner ANDERSON. You have come out pretty well?

The WITNESS. Yes; so far as money is concerned, but money is not everything in this world.

Q. When you say you were a rich man, do you mean that you were worth $200,000 when you commenced?—A. I think I was.

Q. Very much more than that?—A. I can not tell. I did not take an inventory of my assets, but I collected all my debts as fast as I could collect them and paid the money into this railroad.

Q. Did you consider yourself at that time a millionaire?—A. No; I did not.

THE CONSTRUCTION COST CROCKER & CO. ALL THEY GOT.

Q. Can you not give any figures as to the cost to Charles Crocker & Co., of the construction of the road from section 31 to section 138?—A. No; I can not, only generally, as I did before. I replied that when I got through I did not have any money. I do not know how much it cost more than to say that if you have examined you know just exactly what it cost the company.

Q. I want to know what it cost Charles Crocker & Co.?—A. I tell you it cost all they got.

Q. Do you know what you paid per yard for removing the earth?—A. We did not pay by the yard—we hired the men.

Q. What rates of wages did you pay the men?—A. All the way from $35 per month up to $250 or $350.

Q. According to the grade of employment?—A. Yes.

EMPLOYMENT OF CHINESE.

Q. Do you remember that you employed a large number of Chinese?—A. Yes; a big lot of them.

Q. Do you remember what their wages were?—A. They varied; when we first commenced to employ Chinese we paid $1 a day—$26 a

month. Then it was increased to $30. Then it was increased to $35, and I think it held at $35, excepting when we would take out skilled men for skilled work, and we would give them a little more. We took blacksmiths; and at one time when we had a strike among our Irish brothers on masonry, we made masons out of the Chinamen. I recollect that Mr. Strobridge said once, "Make masons out of Chinamen!" and I said, "Did they not build the Chinese wall, the biggest piece of masonry in the world?" [Laughter.] We made masons out of the Chinese, and after they had been at it a few days the Irishmen came back and wanted to go to work. The Chinamen made good blacksmiths also; we had several of them at that work.

Q. In addition to their wages did you board them?—A. They boarded themselves.

Q. How about the white labor?—A. We boarded the white men.

PROPORTION OF WHITE MEN TO CHINESE.

Q. What was the proportion in number of white men to that of Chinese?—A. It varied at different stages of the work. I recollect that I had a great deal of trouble to get Mr. Strobridge to try Chinamen. At first, I recollect that four or five of the Irishmen, on pay day, got talking together, and I said to Mr. Strobridge, "There is some little trouble ahead." When I saw this trouble impending a committee come over to us to ask for an increase of wages. I told Mr. Strobridge then to go over to Auburn and get some Chinamen and put them to work. I said, "There is no particular hurry. You can get Chinamen." The result was that the Irishmen begged us not to have any Chinamen come, and they resumed their work. It was four or five months after that before I could get Mr. Strobridge to take Chinamen. Finally he took in 50 Chinamen; and a while after that he took in 50 more. Then they did so well that he took 50 more, and he got more and more until finally we got all we could use, until, at one time, I think, we had ten or twelve thousand. When we had 12,000 Chinamen we had more white men than we had before. We had carpenters and blacksmiths and teamsters, and all that sort of thing. They were white men.

Q. Are you able to give the average number of hands you employed for that work during the two years it was in progress?—A. There were more than two years.

Commissioner ANDERSON. I am not speaking in regard to the time when the Contract and Finance Company had charge of it, but during the construction from section 31 to the east line of the State.

The WITNESS. Commencing at Newcastle, we hired all the white men we could get, and just above Auburn we put the first Chinamen to work, and then we increased them very rapidly, and in six months, I think, we had 2,000 or 3,000. Then, after the first winter, they increased until, when we got into that rock work on the summit, we had as high as 10,000 or 12,000.

BILLS FOR EXTRA WORK.

Q. Do you remember the fact that after the completion of your contract or while the contract was going on, you had a number of large bills for extra work?—A. Yes.

Q. What was the extra work? What was its character?—A. It was shoveling snow, and all that sort of thing. I can not particularize, I know that we shoveled snow there 60 feet deep, and pitched it over six or seven times.

Q. Do you remember who prepared these bills for extra work?—A. Mr. Strowbridge kept an account of the number of men employed, and the bills were allowed for the number of men employed.

Q. They were presented to the board of the Central Pacific and they were allowed in the usual way?—A. Yes.

Q. Did you have any conversation with the directors about the allowance of those bills?—A. I have no doubt I did. I do not remember any conversation particularly. I know this, that while they were urging me to push the work I would say, "Here is this snow in the way;" and I would ask, "Who will pay for removing it?" And they would say, "We will pay for it." Of course I was not going to pay for it. I was not going to get any pay except for the removal of the rock. I know there was a 60-foot ravine that we cleared of snow and pitched it over and over and over before we could get to the rock. The engineers would not allow the track to go on snow or ice.

FORMATION OF CONTRACT AND FINANCE COMPANY.

Q. Do you remember the formation of the Contract and Finance Company, and how it came about?—A. Yes, I remember something about it. I may miss some details.

Commissioner ANDERSON. Give us what you remember.

The WITNESS. The directors told me that after we got to the State line they did not think it best for me to go on any farther; that they wanted more capital; they wanted to engage heavy men in it. They wanted me to organize the company. I did. I got some friends of mine to organize this company; then I sought for stockholders to come in and take stock. I could not get any one to do it. I took the presidency of the company. I subscribed for the stock.

Q. How many shares?—A. I have forgotten how many, but a large number.

Q. Was it not a fifth of the whole issue?—A. Well, I guess it was more than that.

AMOUNT OF ITS CAPITAL STOCK.

Q. What was the whole issue of capital stock—$5,000,000?—A. $5,000,000.

Q. Did you not take 10,000 shares, Mr. Stanford, 10,000; Mr. Hopkins, 10,000; Mr. Huntington, 10,000, and Mr. E. B. Crocker, 10,000?—A. Mr. Huntington and Mr. Stanford did not take any at first, as I remember. I took some stock. I think I afterwards divided some of my stock with them, when I found we could get no one to go in, and they had to put their shoulders to the wheel. I think I put my stock back and gave them all an even show.

Q. So that you all had even interest?—A. I believe so, as near as I can recollect now.

DID WITNESS THEN BECOME A DIRECTOR OF CENTRAL PACIFIC?

Q. Did you not at this time re-enter the board of the Central Pacific Company?

The WITNESS. When that company was organized?

Commissioner ANDERSON. Yes.

The WITNESS. I do not recollect when it was. If I was not under oath, and was not going to have my evidence printed, I should say that

I did not. I do not think that I went back into the board until it was finished; but still I may have done so.

Commissioner ANDERSON. We read you from the minutes of October 21, 1869 (which was just after the completion of the road), from which it appears that at that date Mr. E. B. Crocker retired and you became a director of the board.

The WITNESS. Well, that was my remembrance, and that is what I thought. My remembrance is now that that is correct, because that was the time when my brother's health gave out.

CHARACTER OF WORK DONE BY CONTRACT AND FINANCE COMPANY.

Q. What was the character of the work done by the Contract and Finance Company, as compared with the work which had been done by you—I mean with reference to expensiveness and difficulty?—A. It would not average nearly as heavy; but, at the same time, it was under very disadvantageous circumstances.

Q. Just describe it, shortly, from Reno on to Promontory Point.—A. Everything had to be carried forward. Everything had to be brought from behind. The country supplied nothing—but stone to build the culverts and bridge masonry.

Q. It supplied the ballast for fillings, did it not—the gravel?—A. We did not bother much with ballast at those times, until after we got farther along.

Q. Do I understand that the road was, substantially, built on the surface of the country as you found it, except when cuts were necessary?—A. We did not make a cut if we could help it. We graded the road in a good, substantial manner, according to the face of the country, and we had good gradients, good alignment, as good as we could get. As I say, we threw in enough earth from the neighborhood, with the shovel, to ballast it and hold the ties in position, and we graveled it after we got the road running.

POINTS OF DIFFICULTY IN CONSTRUCTION.

Q. Were there any points of special difficulty in construction between Reno and Promontory Point?—A. Yes.

Q. Name them.—A. The Truckee Cañon below Reno; there was a good deal of heavy rock work there. When we got to the desert we hauled water 84 miles for man and beast. That was very costly.

Q. Is the Truckee Cañon east or west of Reno?—A. East. There are two cañons. I am speaking of the lower cañon. The upper cañon is from Truckee on, down to just below the State line. Then you come to a valley region, and then you strike into another cañon.

Q. How long is that cañon—the one that is east of Reno?—A. I could not tell you in miles. It must be twenty odd miles, I should think.

Q. Through that, you say, there was a good deal of blasting to be done—a good deal of removing of rock.—A. Yes.

Q. What other points of difficulty were there between the Truckee Cañon and Promontory Point?—A. There was the Humboldt Cañon—in fact two or three Humboldt Cañons; the cañons at the Palisades and above there—between there and Elko.

Q. Is it not a fact that four-fifths of the distance between Reno and Promontory Point consists of easy, rolling land, where there was no special difficulty of construction?—A. Yes.

WORKING IN ADVANCE.

By Commissioner LITTLER:

Q. While on that subject, I will ask you how far through the Humboldt Desert does this road run—how many miles of it are in that Humboldt Valley?—A. From the Truckee River at Wadsworth, I would call it all Humboldt, though there are 20 or 30 miles there that are desert before you get to the sink of the Humboldt. I should think it was about 300 miles, pretty near that, but the time-table will show the exact distance. We built 501 miles in nine months and twenty days, commencing at Wadsworth, which is the lower crossing of Truckee River. I recollect that it was on the 9th day of July we crossed the Truckee River, and we had this work away ahead. We made an excursion out there—the chief engineer and Mr. Strobridge and myself. My brother went along also. We decided that we must commence that work two hundred and odd miles in advance of the track in order to have it ready when the track got there, so that we would not be detained, and would go right through. We hauled the material and provisions for the men, and the men themselves, all over there. They got the ground ready. When the last spike was driven in the bridge at the mouth of the Humboldt, at the cañon, the road was ready, and they went on. That was done at a great expenditure of money. I paid large amounts for the hauling of materials and everything out there; that hauling added largely to the expenditure. It was all for speed—to get the work done. It is no small job to get 501 miles of railroad built in nine months and twenty days when the country supplies nothing and everything has to come from behind.

WITNESS WAS PRESIDENT OF CONTRACT AND FINANCE COMPANY DURING CONSTRUCTION.

Q. Did you remain president of the Contract and Finance Company during the whole period of construction?—A. Yes; I think I did. I do not know that I was the first president, though.

Q. Who was the first president?—A. I do not remember now.

Mr. COHEN. Mr. Mark Hopkins.

The WITNESS. I do not remember; but I superintended the construction. I was president when the real work of construction commenced.

Q. Who was the secretary of the company under you?—A. W. E. Brown.

Q. Where were the books of the company kept?—A. In his office.

Q. In Sacramento?—A. Yes.

Q. When did you cease to be president?—A. I ceased to be president when I became a member of the board of directors of the Central Pacific; but I am not certain about that.

Q. How long were the offices of the Contract and Finance Company kept at Sacramento?—A. They were kept there until just after my return from Europe, which was in July, 1873.

AS TO MISSING BOOKS OF CONTRACT AND FINANCE COMPANY.

Q. When did you first hear that the books of that company had been lost?—A. I could not tell you when I first heard of it. I can remember the time when I first tried to find them.

Q. When was that?—A. That was in December. Let me see. That was either in November or December, 1873.

Q. Where did you look for them?—A. I looked for them at their office; that is to say, I did not look personally; I had a man to look for me.

Q. Who was the man?—A. I think it was my secretary.

Q. What is his name?—A. No; I do not think I had a secretary then, because I had not gone back to work. It was immediately after taking back my interest in the road.

Q. You do not remember who made the search?—A. No, I do not. I know that I went back there as second vice-president in control, just the same as though I had not been out, and that I went into an investigation about some matters, and that I wanted to see something—to verify something—in those books, and I asked for them. Whom I asked I can not recollect. It was some one that was there assisting me. It might have been one of the Hopkins; I could not say, though.

Q. Would you not naturally have asked Mr. Brown, who was president of the Contract and Finance Company, where his books were?—A. Mr. Brown was in Europe, unfortunately.

Q. Was there no one else at the office of the Contract and Finance Company?—A. Yes, sir; Mr. Miller was there.

Q. Did you ask Mr. Miller?—A. I did not go down into his office; I probably sent down. I don't remember going down into his office to ask him; but I remember that, in order to verify something, I wanted to see those books. That was the first information that I had that they were missing and could not be found.

Q. What investigations did you make?—A. I told them that I wanted to see them.

Q. Told whom?—A. I told the parties there; I do not remember whether I had any interview with Mr. Miller or not—John Miller; you are getting me confused, gentlemen. You know I am not in condition——

Commissioner ANDERSON. I do not desire to confuse you at all.

The WITNESS. I know that; but I am confused, nevertheless.

FAILURE TO FIND BOOKS A GREAT MISFORTUNE.

Commissioner ANDERSON. Let me say that the failure to find these books is, to say the least, a great misfortune and an extraordinary fact, and if you can give any light as to the motives that led to the destruction or withdrawal of those books, or their loss, we shall feel much obliged. Let me say also that William E. Brown has testified that he prepared a new set of books for Mr. John Miller to keep, and that that new set of books, containing entries which must have been taken from the old set, have been produced and examined by us; so that those old books were extant at the time these new books were prepared. [Addressing Mr. Cohen.] Do you remember the date of the entries in the new set of books?

Mr. COHEN. Some time in 1873.

Commissioner ANDERSON. It is either 1873 or 1874.

Mr. COHEN. 1873, I think.

The WITNESS. New books were opened in 1873?

Commissioner ANDERSON. Yes, new books, by Mr. John Miller; which we have now, and have examined.

The WITNESS. I do not know; I was not there when they were opened.

DISAPPEARANCE OF THE BOOKS OF THE CONTRACT AND FINANCE COMPANY.

Q. Do you know anything about the books of the Contract and Finance Company?—A. I do not.

Q. Did you ever converse with Mr. Stanford about their disappearance?—A. Yes.

Q. What has he stated to you about their disappearance?—A. I could not remember those statements; but there was a wonder—we all wondered what became of them. I tried to find them, not thinking of any investigation, you know, but just for my own verification of something that was pending in my business, and I could not find them. I could not get anybody who could find them and no one could tell me where they were. I supposed they were up in Sacramento, but it was not a matter of sufficient consequence for me to go up there to find them, or to send there to see. It was merely a matter of verification of a statement that had been made to me. They could not be found. It was not, as I say, of sufficient consequence for me to send to Sacramento, but I supposed at that time they were there. Mr. Hopkins was a curious man; he never believed in saving what he called "trumpery," and he may have destroyed those books. I have no reason to believe that he did, or that he did not; I do not know anything about it, for that matter, but I talked with Mr. Stanford and that is the way I put it, that perhaps "Uncle Mark" had done it; though I could not give any reason for it, more than that he regarded them, perhaps, as trumpery and in the way.

Q. Have you any memoranda from those books?—A. No.

Q. None whatever?—A. No, sir; none that I know of.

CONTRACT AND FINANCE COMPANY IN DEBT ON COMPLETION OF ROAD.

Q. Have you any material that will inform the Commission as to the cost of construction of that road to the Contract and Finance Company, as entered in its books?—A. Nothing more than that I know the Contract and Finance Company was in debt when it got through building the road; that is all.

Q. Do you not know that when the Contract and Finance Company got through building that road they still held $6,000,000 of notes of the Central Pacific Company which had been given to the company on account of that work?—A. I know that they had—yes; and I know that the company could not pay them.

Q. It subsequently did pay them by the land-grant bonds?—A. Yes.

Mr. COHEN. You are talking about an entirely different thing.

Commissioner ANDERSON. No, I am not.

Mr. COHEN. We deny that there is such a thing.

Commissioner ANDERSON. Well, the witness has stated it.

Mr. COHEN. The witness has not stated it of his own knowledge. You have led him to concur in a statement that you made. You know the condition of the witness.

Commissioner ANDERSON. I will ask the question again.

NOTES HELD BY CONTRACT AND FINANCE COMPANY AGAINST CENTRAL PACIFIC.

Q. You remember that in 1869, when the Contract and Finance Company had finished its construction, it was the holder of $6,000,000 of notes of the Central Pacific Company—sixty notes, each for $100,000—which had been delivered by the Central Pacific Company to the Contract and Finance Company on account of obligations that had matured in its favor under the contract.

Mr. COHEN. At what time?

Commissioner ANDERSON. At the time of the termination of the construction in the spring of 1869.

The WITNESS. I recollect that there were notes held by the Contract and Finance Company against the Central Pacific Company, and they were for a large amount, but how large an amount I cannot say.

By Mr. COHEN:

Q. At what time was this?—A. After the completion of the road.

Mr. COHEN. After the completion of the road, or after their work on other contracts?

The WITNESS. I cannot tell you. They might have been for other work. I cannot say, though, about that. I cannot remember so far back. I know this: that the Contract and Finance Company held these notes; that they took these bonds in payment, but whether the notes were given for a debt owing for the construction of the road or not I cannot say.

Q. What other debt would such an amount as $6,000,000 be given for?—A. I cannot say. I do not recollect of any work that they did that would amount to as much as that; but still they might have done it, and I not recollect it.

AS TO DIVISION OF SURPLUS ASSETS AMONG STOCKHOLDERS OF CONTRACT AND FINANCE COMPANY.

Q. Do you remember the fact that within one, two, or three years after the completion of the road the Contract and Finance Company made a division among its stockholders of its surplus assets?—A. No, I do not recollect. I have no doubt they did. They would if they had any to divide.

Q. Do you not remember that you yourself received a large amount of stock of the Central Pacific Company from the Contract and Finance Company as your share?—A. Yes.

Q. Do you remember what the amount of it was?—A. No; I do not.

Q. Do you not remember that it was about $13,000,000?—A. Somewhere in that neighborhood.

Q. And that a similar amount was delivered to Mr. Stanford, Mr. Hopkins, and Mr. Huntington?—A. I could not tell you what they got; I know about what I got.

Q. You know that you had "evened up" your interests at that time; you had similar amounts of stock in the Contract and Finance Company?

Mr. COHEN. What time are you speaking of?

Commissioner ANDERSON. The time of the division of the Central Pacific stock. Mr. Stanford himself has stated that they each got $13,000,000.

The WITNESS. Then what do you want me to corroborate him for; is he not reliable?

Mr. COHEN. I object to it, because I know that Mr. Stanford is mistaken.

Commissioner ANDERSON. I am not a witness in this case. Mr. Stanford has sworn to it, and I want this witness to say whether or not Mr. Stanford is correct.

THE WITNESS GOT $13,000,000.

The WITNESS. I do not know what Mr. Stanford has sworn to, but I know that I got $13,000,000. I am not certain that I had got $13,000,000 at that time. I know that when I went to Europe I got $13,000,000 when I made that sale.

Q. When was it that you went to Europe?—A. In 1871—July or August.

Q. Now, did you get anything else from the Contract and Finance Company besides the stock?—A. Not that I remember at that time; I do not remember of anything just now.

Q. Have you any books that will show what you did receive from the Contract and Finance Company?—A. No; I did not keep any private books. When I closed up a thing I would put it away.

OTHER DIVIDENDS.

Q. Have you at any time received any dividend or interest from the Contract and Finance Company other than this stock?

Commissioner LITTLER. In payment for construction on the Central Pacific?

Commissioner ANDERSON. As a payment of dividends in the Contract and Finance Company—as a division of profits?—A. I do not recollect now having received it. I may have received some, but I do not recollect.

LAND-GRANT BONDS.

Q. Do you remember receiving any land-grant bonds from the Contract and Finance Company?—A. I think I got some land-grant bonds.

Q. Do you remember about the amount?—A. No; I do not.

Q. Do you remember whether you received any other bonds or stocks of any other roads—branch roads?—A. Really, I feel kind of "off my center," I may say—I am confused; my mind is confused. The fact is I ought not to be here to testify. I am not in fit condition. My physician said to me that I ought not to come and urged me, peremptorily, not to come; but I told him that I wanted to come, I did not want to shun investigation by anybody; and I am here against his protest.

THE S. H. H. AND C. BOOKS.

Q. I will ask you whether you remember that the Contract and Finance Company had on hand a large amount of property at the time it closed its books, and that a large amount of property was passed over to the books known as the S. H. H. and C. books, the amount being $13,500,000—you remember those books?—A. Yes; I remember those books, but I do not remember as to the property.

Q. You remember that Messrs. S. H. H. and C. received from the Contract and Finance Company $13,500,000?—A. No; I do not. I know that there is a large amount of imaginary capital in that concern, but as to its assets it had not as many as the books show. I cannot explain it; I am not book-keeper enough to do it; but I know very well that when I came to see the cash balances due me there and when I asked for the money there was not anything to pay it with. There were no assets.

PROFITS ON THE CONSTRUCTION CONTRACT.

Q. I will ask you the question in a simple way. I will ask you to estimate for this Commission the profits you made through the Contract and Finance Company on the construction contract which that company made with the Central Pacific—not in dollars, but in kind—what did you receive?—A. I received stock.

Q. You received $13,000,000, or thereabouts, in stock?

Mr. COHEN. Not from that contract.

The WITNESS. I cannot say that I received it from that. When I sold out to these gentlemen I had in the neighborhood of $13,000,000.

By Mr. COHEN:

Q. Of stock, you mean?—A. Of stock; yes.

Q. That was sold at 12 cents on the dollar?—A. Yes.

Commissioner ANDERSON. That is not the question now. The question is what he got from the Contract and Finance Company.

DOES NOT REMEMBER EXACT FIGURES.

The WITNESS. In these large amounts I could not remember the exact figures. I know that when I sold out I had over $12,000,000 of stock, but I do not think it was $13,000,000. I recollect on another occasion that I had $13,000,000 of stock, but I do not think it was at the time I sold out.

By Commissioner ANDERSON:

Q. Let us try to get it at the time you sold out. What did you sell besides $13,000 000 of stock?—A. I sold my interest in the Central and Southern Pacific, and in all the work that was going on.

Q. Did you sell any bonds?—A. No; I did not sell any bonds.

Q. Did you have any bonds?—A. Yes; I had some bonds.

INTEREST ON BONDS PAID WITNESS'S EXPENSES IN EUROPE.

Q. How many bonds did you have?—A. The interest on them was what paid my expenses in Europe.

Q. How many bonds were there? You ought to recollect a matter that would help you in that way.—A. No; I do not recollect.

Q. You do not recollect how many land-grant bonds you had?—A. No.

By Commissioner LITTLER:

Q. Was it not several hundred thousand?—A. No.

By Commissioner ANDERSON:

Q. Was it not several millions?—A. No.

Q. Did you not have your fifth or fourth that was presented by the Central Pacific to the Contract and Finance Company in payment of those notes?—A. I had my share of them, whatever it was—whatever amount of stock I held was.

Q. Do you remember how many bonds were paid by the Central Pacific Company to the Contract and Finance Company in satisfaction of those notes?—A. No; I do not. You have got the books of the Central Pacific. Why do you not verify all that from those? My memory cannot go back to give you those details; and if my memory does not give it right you may cast aspersions upon me.

Commissioner ANDERSON. There is no desire to do that.

The WITNESS. I know there is not, but it may be done.

Q. The question was how much you made out of that transaction?—A. I can not tell you.

Q. How much stock and how much bonds?—A. I made all I could, but I do not remember how much it was.

WITNESS'S CONNECTION WITH WESTERN PACIFIC.

Q. What connection had you with the Western Pacific—did you build it, or part of it?—A. I do not recollect about it. I do not think I built any of it. [After consultation with Mr. Cohen.] I have not said that the bonds were given to the Contract and Finance Company for building the main line of the road.

Commissioner ANDERSON. You said the bonds were in payment of the notes, and that you did not know why the notes were given.

The WITNESS. They were in payment of the notes.

Mr. COHEN. That was not the contract for the main line.

The WITNESS. I do not say that it was.

Commissioner ANDERSON. I think you are mistaken about that. The reports of our accountant will show.

Mr. COHEN. Those notes came from the building of the Oregon Branch, if I am not mistaken.

Commissioner ANDERSON. I think you are mistaken.

The WITNESS. What difference does it make? The United States have got the road and they have paid for it.

Commissioner ANDERSON. Have the United States got the road?

The WITNESS. The people have.

Mr. COHEN. They have got all they called for, and more too.

Q. Do you not remember that in 1867 a contract was made between the Western Pacific road and Messrs. Stanford, Hopkins, yourself, and Mr. E. B. Crocker for the construction of that Western Pacific, you four buying out McLaughlan, a former contractor?—A. I know that we bought McLaughlan out, but that has nothing to do with the building of the road.

S. H. H. AND C. OWNERS OF WESTERN PACIFIC STOCK.

Q. Did you not become owners of the stock that the Western Pacific issued, and were you not afterwards parties to the consolidation by which you exchanged stock of the Western Pacific for stock of the Central Pacific?—A. I have no doubt we were. I do not remember anything about that consolidation, but I know that we bought McLaughlan out.

Q. Is it not a fact that all the stock of the Central Pacific that came into the possession of you four gentlemen in that way was also passed into the Contract and Finance Company, so that, substantially, all the Central Pacific stock that you four gentlemen held was placed in the hands of the Contract and Finance Company?—A. I do not remember.

WITNESS'S CONNECTION WITH CENTRAL PACIFIC.

Q. What connection have you had with the Central Pacific since 1869?—A. I was a director, and I was superintendent of it for a while, until we employed Mr. Towne.

Q. Up to what date was that?—A. I was superintendent of the road up to some time in 1869, when I think Mr. Towne was elected. I will appeal to the company's books to tell that. It is all guess-work.

Q. Then since 1869 you have been a director in the road. What other offices have you held?—A. Second vice-president.

Mr. COHEN. Not all the time since 1869?

The WITNESS. I was in Europe after I sold out, and did not own anything.

Q. You resumed your position when you returned from Europe?—A. I did. I was re-elected director and second vice-president, and have been such ever since.

THE WESTERN DEVELOPMENT COMPANY.

Q. Are you familiar with the various constructions that have been made since that date? I refer to the California and Oregon, and the work done by the Western Development Company.—A. I do not think the Western Development ever built any of the California and Oregon.

Q. No; but it built some other roads which were leased to the Central Pacific. I ask you if you are familiar with all that construction?—A. I am familiar with the road. I was not familiar with the construction while I was in Europe.

Q. I am referring now to the different construction contracts between the Central Pacific and the Western Development Company and the Pacific Improvement Company afterwards. Were you a member of the board, and did you vote for those contracts?—A. I never voted for any contract that I was interested in in the board of directors in my life, that I know of. My recollection now is that the contract for building the San Joaquin Branch was let to Mr. Strobridge. I am not certain about it, but I think there was a contract let to him.

WITNESS A STOCKHOLDER IN THE WESTERN DEVELOPMENT COMPANY.

Q. Were you a stockholder in the Western Development Company?—A. Yes.

Q. What was the total capital of that company?—A. $5,000,000, I believe.

Q. How much stock did you hold?—A. I held——

Commissioner ANDERSON (interposing). 10,000 shares. Is that right?

The WITNESS. I presume so. I do not remember though, really.

Q. Either a fifth or a fourth of the whole capital, was it not?—A. No; I think not.

Mr. COHEN. That company was divided into ninths.

The WITNESS. I think that Mr. Colton had some of it.

Mr. COHEN. He had one-ninth.

Commissioner ANDERSON. And the other parts were divided among these four.

WITNESS'S STOCK IN PACIFIC IMPROVEMENT COMPANY.

Q. How was it about the Pacific Improvement Company; how much stock did that company have?—A. Five millions, I think; five or ten.

Q. How much of that did you own?—A. I think about a quarter. I would not be positive about that, though. I am really very much confused now, and my mind is not clear.

Mr. COHEN. Do you want to quit now?

The WITNESS. Yes.

Commissioner ANDERSON. We will take a recess at 1 o'clock.

The WITNESS. These are very important matters. Did you not learn this in California from the books?

Commissioner ANDERSON. Of course. But you have just said that you have not voted for any contract in which you had an interest. I want to ask you whether you have not voted on all the contracts between the Central Pacific Company and the Western Development

Company, the Contract and Finance Company and the Pacific Improvement Company?

CENTRAL PACIFIC NEVER HAD A CONTRACT WITH WESTERN DEVELOPMENT COMPANY.

The WITNESS. The Central Pacific Company never had any contract, that I know of, with the Western Development Company, and the Contract and Finance Company contract was made while I was not a director, as I have testified before and as you found out in California. I do not think the Central Pacific Railway Company ever made a contract with the Pacific Improvement Company.

Q. Who is now constructing the California and Oregon from Delta to the north line of the State of California?—A. That is the Pacific Improvement Company. That is so.

Commissioner ANDERSON. You will probably find quite a number of errors in your statement about these companies not having made any contracts with the Central Pacific Company.

The WITNESS. Well, I tell you that my mind is not in a condition to testify correctly. I feel very much upset. My mind whirls; goes from one thing to another. I am thinking of what the doctor told me. I see he was nearer right than I was.

Commissioner ANDERSON. I think we had better take a recess until 2 o'clock.

Mr. COHEN. Mr. Crocker cannot be here after to-day, and I want to examine him for half an hour.

---

10 WALL STREET, NEW YORK,
Tuesday, September 20, 1887.

Afternoon session.

Mr. COHEN. I have a communication which I have been desired to present to the Commission on behalf of the Central Pacific Railroad Company with reference to the expenses which have been incurred in preparing tables and statements containing information and for the expenses of transportation. I thought we had better put it in the form of a letter, so that you may consider it in executive session, in order that we may get a reply.

(The letter was placed on file.)

CHARLES CROCKER, being further examined, testified as follows:

POLICY OF CENTRAL PACIFIC.

By Commissioner ANDERSON:

Question. Will you state to us, generally, what, so far as you know, has been the policy of the Central Pacific Company since its completion in regard to the connections made by it with branch roads and with the Southern Pacific for the purpose of developing that enterprise—the enterprise of the Central Pacific?—Answer. Well, that is a pretty broad question. I do not know that I could frame an answer to that more than to say that the Central Pacific is anxious to have the country tributary to its road developed, and have brought to it for transportation all the products of the country adjacent. They have done nothing

in the way of money assistance that I now remember in encouraging those things, but we, as stockholders, have been engaged in building feeders.

ROADS CONNECTING WITH CENTRAL PACIFIC.

Q. Will you enumerate the principal roads with which connections have been made, either by leases or by other contracts?—A. I could not remember all those things.

Q. I will recall most of them to you. The San Pablo and Tulare; that was a connection made by lease, was it not?—A. Yes.

Q. That was the fact also with the Northern Railway?—A. Yes.

Q. And the Amador Branch, a part of the San Pablo and Tulare?—A. Yes. None of that money came from the Central Pacific, however.

Q. Those roads were organized with an independent organization, constructed by construction companies, by contracts made between the particular roads and the construction companies, and then leased to the Central Pacific. Was not that the method?—A. Yes.

By Mr. COHEN:

Q. In all cases?—A. As far as I recollect just now.

Q. The Amador Branch, the California Pacific, and the Southern Pacific in California?—A. I do not think the Amador Branch was leased.

By Commissioner ANDERSON:

Q. It was leased to the San Pablo and Tulare, and the San Pablo and Tulare to the Southern Pacific. Then the Southern Pacific in California, in Arizona, and in New Mexico. Was not that also constructed by the Western Development Company and the Pacific Improvement Company, and then a lease made of the constructed road to the Central Pacific, and was not that the state of affairs until the change by leasing the Central Pacific to the Southern Pacific in 1885?—A. I believe it was.

WITNESS A STOCKHOLDER IN CONNECTING COMPANIES, AND, IF PRESENT, VOTED ON LEASES.

Q. Were you not a stockholder in all those different companies that I have enumerated?—A. Yes.

Q. And did you not yourself, as a director of the Central Pacific, vote on the terms of all the leases of these various companies that were made to the Central Pacific?—A. I do not recollect whether I was present at all the meetings. If I had been I should have done so.

Q. And when you were present you did vote?—A. I presume I did; I never saw anything to object to in it.

Q. Did you not vote also on the contract made in October, 1886, for the construction of the California and Oregon by the Pacific Improvement Company, from Delta to the northern boundary of the State, the contract being made between the Central Pacific and the Pacific Improvement Company?—A. I do not recollect whether I was present at that or not. It was very soon after my injury that that contract was made, and I was incapacitated for business for a long time after that injury. I cannot say that I was present. I do not remember now of being present.

THE COLORADO RIVER BRIDGE.

Q. Do you remember whether you voted for the lease of the Colorado River Bridge to the Southern Pacific or to the Central Pacific?—A. I cannot recollect whether I did or not.

Mr. COHEN. Is it important to establish all these facts?

Commissioner ANDERSON. The record will show; but the witness has stated that he never voted for any contract or transaction between the Central Pacific and other companies in which he had an interest.

The WITNESS. That was to the best of my recollection.

Commissioner ANDERSON. I call these cases to your attention and will refer you to the record showing the vote.

Mr. COHEN. We will admit that every time he was present he voted on these things as they came up. He was mistaken in that statement he made on that matter.

ALL THOSE CONTRACTS PROFITABLE TO CENTRAL PACIFIC.

The WITNESS. Yes; wherever I stated that I was not present and I was present, I made a mistake, undoubtedly. My memory failed me. As a general thing I abstained from those matters; but, at the same time, I do not know why I should; it was all perfectly regular. All those contracts were profitable to the Central Pacific, especially the bridge contract, as the construction company which built the bridge never got half its money on that. It was burned up.

Mr. COHEN. They have been all through that.

The WITNESS. Then I do not know why they ask me about those things, when I have got a bad memory.

PROPRIETY OF DIRECTORS VOTING ON CONTRACTS IN WHICH THEY WERE INTERESTED ON BOTH SIDES.

Commissioner ANDERSON. I will explain, so that you will understand the point. It is true that we have most of this information. But perhaps one of the gravest questions before us is on the propriety of the directors of the Central Pacific Company voting on contracts in which they had a pecuniary interest on both sides, as much with reference to the propriety of the act itself as with reference to the question of how much money they made. Therefore I call your attention to the fact that the inquiry now addressed to you turns on the question whether you did in fact vote on contracts made with companies in which you had a large interest as a stockholder when you were also interested in the Central Pacific as a stockholder and director of that company.

THE ROCKY MOUNTAIN COAL COMPANY.

Q. Now, I call your attention to another case—the case of the Rocky Mountain Coal Company; were you a stockholder in that company?—A. Yes, sir.

Q. Did you vote on the arrangements by which that company furnished coal to the Central Pacific?—A. I do not think there was any voting arrangement about it.

Q. You know, as matter of fact, that the Rocky Mountain Coal Company has for many years sold to the Central Pacific very large amounts of coal?—A. Yes; I know that, and sold it cheaper than they could get it anywhere else.

APPROVED OF EVERYTHING THAT BENEFITED CENTRAL PACIFIC.

Q. The question is whether you have, as a director, approved the arrangements made between the two companies by which the one became a seller and the other a purchaser—you being a stockholder in both

companies?—A. Well, answering generally, on that proposition I will say that I approved of anything that benefited the Central Pacific Company.

Q. Even if it benefited you?—A. Because I always had a larger interest in that than I had in any other company.

Q. Directing your attention, specifically, to the Pacific Improvement Company, do you know what consideration the company voted for the construction which the Pacific Improvement Company made between Delta and the northern boundary of the State?—A. I do not.

COST OF CONSTRUCTION TO PACIFIC IMPROVEMENT COMPANY.

Commissioner ANDERSON. I state that it appears from your records that the price paid was $4,500,000 of bonds of the Central Pacific issued under their last mortgage of October, 1886, and 80,000 shares of stock which at the time of the vote, in October, 1886, was worth about 40 cents. That being the consideration voted for that work, do you know what the cost of construction to the Pacific Improvement Company was?

Mr. COHEN. What did that include?

Commissioner ANDERSON. It included the construction from Delta to the northern boundary of the State—the rails and the equipment.

Mr. COHEN. And the acquisition of some other property?

Commissioner ANDERSON. No; there was a provision in it by which another company in Oregon agreed to make a connection, but what the Pacific Improvement Company agreed to do was what I have stated.

The WITNESS. I do not recollect. As I have said before, I was in a very precarious condition at that time, owing to my accident, and I have a very indistinct remembrance of that whole matter. I know that I left before it was finished up—before there was anything done about it—because I got sick by attending the discussions that were held.

Q. My question is now whether you know what that construction and all the work agreed to be done has cost the Pacific Improvement Company?—A. I do not know; and I do not think it is finished yet.

Q. If the facts establish that the cost to the Pacific Improvement Company has been less than $3,500,000, and the value of the consideration to be paid should be over $7,000,000, would you still consider that a proper contract for persons who were directors in both companies to approve of and vote for?—A. I do not think that there was any such discrepancy between the cost and the payments. But still, I would not, as an officer of the Central Pacific Railway Company, pay any such difference, if I knew there was going to such a difference.

WAS IT A PROPER CONTRACT?

Commissioner ANDERSON. Now, I will state, for your information, that Mr. Douty, the president of the Pacific Improvement Company, has stated to us the entire cost of this road as being about the figure which I have stated, and that the cost, up to the date at which the information was furnished to us, was $3,158,000, and some $600,000 in bonds having been set aside, stated by Mr. Douty to be more than sufficient to entirely complete what was to be done. The question I ask you is whether, in your judgment, that was a proper contract for directors of the Central Pacific to approve?

A. If they knew what was going to be the cost of the building of the road, I should not think it was; but those things are oftentimes ex-

tremely hypothetical. It is guess-work. Sometimes a man takes a contract to build a house and he loses money in building it, and sometimes he makes a good deal. Those circumstances have to be taken into account. The man who lets the contract and the man who takes the contract exercise their best judgment.

Q. When the man who takes the contract is the same person as the man who votes for it, and he pays moneys that belong to the corporation in which he is a trustee, in your judgment, is not that open to very severe criticism?—A. Well, I guess the public will criticise that pretty closely.

COST OF THE COLORADO RIVER BRIDGE.

Q. Do you know what was the cost of the Colorado bridge when first built?—A. I do not remember.

Q. You have stated that the parties who built it did not get their money back.—A. That is what I understood. It was burned, and it was a long way short of paying for itself.

By Mr. COHEN:

Q. It was burned once and washed out once by the flood, was it not?—A. It was washed out once or twice, and burned out entirely, and there has been a good deal of difficulty about it. The bridge is across the river which is the dividing line between the State of California and Territory of Arizona; and there was some difficulty as to which company would own the bridge, or else the Contract Company would never have built the bridge and owned it.

THE OAKLAND WHARF EXTENSION.

Q. Do you remember a bill presented by the Contract and Finance Company, while you were president of that company, in October, 1876, for what was known as the Oakland wharf extension, the amount being $692,000?—A. No; I do not. I had nothing to do with it, as I remember now.

Q. It appears from the minutes that you presented the bill to the Central Pacific Company.—A. Well, if I did, then I did. But I do not remember it.

Q. Do you remember whether you voted in favor of the payment of that sum?—A. I do not.

Mr. NORRIS (reading from a memorandum relating to the Central Pacific minutes). Page 52, October 20, 1876:

Bill of C. Crocker, of the Contract and Finance Company, dated September 30, for $692,000, for work and material on Oakland wharf extension and on Alameda wharf extension.

This bill includes items for fencing the railroad line between Niles and Oakland, $17,000, and 10 per cent. for superintendence, $692,944.99.

On motion of Mr. Brown, the bill was audited and allowed, Mr. Crocker himself being present.

READING OF MEMORANDUM OBJECTED TO.

Mr. COHEN. I object to this. This is a garbled statement of what purports to be contained on the book of minutes. I undertake to say that there was no such entry on the book of minutes as read here. It is simply a condensed statement of one of your employés; it is not a copy.

Commissioner LITTLER. It does not purport to be a copy. Your attention is called to the fact that very often during your examination

that very document was resorted to, with the original books before us, and the entries in that paper which you hold in your hand were always found to be correct in substance.

Commissioner ANDERSON. We will enter on the record an exact copy from your records.

Mr. COHEN. I do not remember having had my attention called in California to this extract. If it had been, I should have compared it, and put it in in full from the record book, when we get it.

Commissioner ANDERSON. We will put it in in full.

Mr. COHEN. We take the responsibility of everything that appears on our minutes, but we do not want any portion of the minutes put in for any particular purpose.

Commissioner ANDERSON. We will substitute for the extract an exact copy at any time you furnish it to us.

Mr. COHEN. We have no chance of getting the books over here again.

Commissioner ANDERSON. No; but you can send us a copy.

DEFECTIVE MEMORY AGAINST COMPANY'S BOOKS.

The WITNESS. I want to say a word. With all due respect to your honorable Commission, I do not think it is fair to examine me, with my defective memory, as compared with your quotations from our books. The books are correct, and you are asking me questions on matters that I do not pretend to remember, and you are going to put me down as against those books, and the books against me. I do not think that is fair.

Commissioner ANDERSON. There is no desire to do that. Nobody is going to criticise you for making any mistakes. The point the Commission wishes to show, and which has been substantially conceded, is that you, in common with the other directors, approved the practice of giving contracts when you had interests on both sides.—A. Well, if the books show it, that is sufficient. I do not deny what is in the books.

Mr. COHEN. I understand, then, that the Commission enters into a stipulation with us that Mr. Crocker's defective memory may not be taken to contradict the books?

Commissioner LITTLER. We do not expect to contradict the books by his memory.

Mr. COHEN. I want that stipulation confirmed, so that the members of the press will understand it.

Commissioner ANDERSON. The Commission enters into no stipulation. The press will look out for itself.

ASHAMED OF NOTHING HE HAS DONE.

The WITNESS. I desire to say here that there is nothing I have done in connection with the building of the Central Pacific Railroad or any other railroad that I feel ashamed of or that I wish to recall. I feel proud of what I have done. It has resulted in good to the people generally and to me particularly. I did not give up twenty years of the best part of my life for nothing.

RELEASE OF CHARLES CROCKER FROM LIABILITIES TO CENTRAL PACIFIC.

Commissioner ANDERSON. I call your attention to an entry in the minutes of April 15, 1885, and ask you if you recall the circumstance

of a release of Charles Crocker from any liabilities that there might be against him in favor of the Central Pacific Railway Company?

The WITNESS. I do not recollect the date, but I remember that there was something of that kind going on for Mr. Huntington, and I thought it would be a good thing to have me absolved at the same time, and I got absolution.

Commissioner ANDERSON. But you gave yourself absolution. You voted in favor of it?

The WITNESS. Did I?

Commissioner ANDERSON. I ask you.

The WITNESS. I do not remember whether I did or not. I do not think I did. I think I kept silent. I am a modest man.

Commissioner ANDERSON. You were present when the releases were directed to be given by the board, were you not?

The WITNESS. Very likely.

Q. You entered no demurrer and made no protest?—A. No; I thought I ought to be released. I did not know really of any obligation, but at the same time if it was good for others it was good for me. That is the way I reasoned about it.

EARNING CAPACITY OF SUBSIDIZED PORTION OF CENTRAL PACIFIC.

Q. Can you give us your views as to what you consider to be the earning capacity of that portion of the Central Pacific which is covered by the subsidy bonds?—A. I could not. In the first place I have been away from San Francisco two years, and nearly one year of that time I have been suffering from almost a fatal injury; and, in the next place, whatever I might say here in an off-hand way could be better verified from the earnings and expenses of the road as indicated by the books; that would show better than I can.

FORECLOSURE BY UNITED STATES DISASTROUS.

Q. What, in your judgment, would be the effect of a foreclosure of the United States lien so as to separate that portion of the Central Pacific between Ogden and Sacramento from the rest of the system; what, in your judgment, would the effect of that be on the security of the United States?—A. I think it would be disastrous.

Q. Can you not be a little more specific in explaining what the effect would be on its business?—A. I know if it was a good thing for us to build those connections without the subsidy it would be a good thing for the Government to maintain them. I do not think, in other words, that the Government can run that road any better than we have done it.

Q. What suggestions can you make, if any, as to your views of the policy that the Government should pursue in regard to the collection of its debt?—A. Well, if it wanted to be magnanimous and generous, write it off.

COURSE THE GOVERNMENT SHOULD PURSUE TO COLLECT ITS DEBT.

Q. Can you make a business answer as to the best policy to pursue so as to preserve the usefulness of the railroad as far as possible, and, at the same time, secure as much to the United States as can be secured?—A. I think that a subject that would require a good deal of study and investigation. If two or three men on the part of the Government, with an honest desire to do justice between the company and

the Government, should meet a committee of the board, they could come to some conclusion that would be worthy of attention; but, in an off-hand manner, in the investigation of this question, I do not think I am capable of giving you any outline of a settlement that I would be willing to stand to, or that the Government would be. I do not know enough about it. I never gave it any study. It is a question that requires a good deal of study. Whenever it is attempted by such men on the part of the Government and a committee from the board of directors with an honest desire to come to an honest conclusion, there will be some way found to do the best for all. But, at the same time, when I come to reflect on the condition of the country at the time the contract was made between the company and the Government for the building of that road, I think that if the Government wrote off its whole claim to-day it would come out away ahead of the manner in which it would have come out if the road had not been built.

LARGE VOUCHERS FOR EXPENSE ACCOUNT.

Q. Have you been aware from time to time of the existence of large vouchers which purported to be merely for expense account or legal expenses, and which did not, on their face, convey any information as to the parties to whom the moneys were given or the purposes to which they were applied?—A. I never saw any of those vouchers, but I have heard of them through the press and through the report of your proceedings.

Q. Have you heard of them from officers of the company—from Mr. Huntington and Mr. Stanford?—A. I think I have passed on some of them, as a member of the board, and voted for their allowance; I think I have. I do not remember particularly now. But if they had come up I would have voted for them when I was present.

APPLIED TO SOME GOOD PURPOSE.

Q. When you say you would have voted for them, you say that because you have knowledge of the purposes to which they were applied?—A. No, sir. I know they have been applied to some good purpose or they would not have been allowed.

Q. You say you would have allowed them yourself. Why would you allow them?—A. Because I have faith in the men who disbursed the money.

Q. Is that the full reason?—A. Entirely.

Q. You would have allowed them, then, without asking these gentlemen any questions as to the reasons why they had been paid or the objects to which they had been applied?—A. Yes.

Q. As matter of fact, have you asked for an explanation of the purposes to which these moneys have been applied?—A. No; I have not.

Q. Have you any knowledge whatsoever of the persons to whom those moneys have been paid, or the purposes to which they have been applied?—A. The men who signed the vouchers.

Q. The vouchers, in many cases, are signed simply by Mr. Stanford.—A. Then he got the money.

Q. My question is, have you any knowledge of the persons to whom the moneys were paid by the signer of the vouchers?—A. No; I have not.

OBJECTS TO WHICH MONEYS WERE APPLIED.

Q. Have you any knowledge of the objects to which these moneys were applied?—A. To benefit the company.

Q. In what way would it benefit the company?—A. That I do not know. There are a great many ways in which money has to be disbursed.

Commissioner ANDERSON. I am speaking of your knowledge now.

The WITNESS. I do not know anything about it. I never sought to know. I do not want to know. I have trust and faith in Governor Stanford and Mr. Huntington, and I do not believe they have misappropriated a single dollar, and I know, as far as myself is concerned, that I have never misappropriated a single dollar. In other words, I have always tried to get for the company a dollar and five cents for every dollar I have expended.

INFLUENCING LEGISLATION.

Q. Do you know whether any of the moneys I referred to were used for the purpose of influencing legislation?—A. I do not.

Commissioner ANDERSON (addressing Mr. Cohen). We will strike the answer out, if you wish, and let you raise any objection you desire.

Mr. COHEN. The question is answered. I should object to it under the ruling of the circuit court, but the question is now answered; yet it is a question that should not have been put.

Commissioner ANDERSON. That is matter of opinion.

Q. Please look at the letters, copies of which I show you, at pages 1619, 1620, 1621, and 1622 of a copy of the record in the Colton suit, and state whether you recognize those letters.

Mr. COHEN. I object to the question, and advise the witness not to make the examination and not to answer any question on the subject. In the first place, there is nothing here to prove that the papers shown to him are copies of the record in the Colton case, or that they are copies of the letters they purport to be.

THE COLTON LETTERS.

Commissioner ANDERSON. As far as that objection is concerned, we merely ask the witness whether these printed papers shown him refresh his recollection so that he can swear to the existence of such letters, if there be such.

The WITNESS. What letters do they purport to be?

Commissioner ANDERSON. They purport to be letters written by you to Mr. Colton. My question simply is whether you will read them and see whether you recollect writing such letters.

Mr. COHEN. I make the further objection that the production of these letters before this Commission is enjoined by order of the circuit court of the United States for the northern district of California.

Commissioner ANDERSON. The question is whether you remember writing them.

The WITNESS. I do not remember writing them, and I do not remember their being presented in the Colton case; but they sound very much like me. The Government of the United States is no more interested in these letters than in the Sharp case. They are most of them personal, and show what a good time I had at Los Angeles.

Q. Is there any further suggestion you desire to make to this Commission in regard to the subject-matter of this investigation?

The WITNESS. Any suggestion that I want to make?

Commissioner ANDERSON. Yes. You are a prominent director of this road and we are very desirous of receiving full suggestions from

the officers.—A. I have no doubt, if I had a little time to gather my houghts together, I could make you a good many good suggestions; but, really, I have not thought over the matter, and did not suppose you would entertain a suggestion of mine anyhow. I have no doubt, if I had a little time, I could think of a good many things you ought to do.

DEFINITION OF THE ROCKY MOUNTAIN BASE-LINE.

Q. Do you remember a circumstance that occurred in regard to the definition of the base-line of the Rocky Mountains being the point from which you were entitled to receive $48,000 per mile instead of $16,000? —A. Yes; I remember that very distinctly.

Q. Please tell us how that point came to be fixed?—A. Well, the law provided that from the western base of the mountains for 150 miles eastward the bonds should be three times as much (I think it was) as on the plains before reaching that point. The question came up, "Where is the base of the mountains?"

ARCADE CREEK THE BASE.

Q. That is, on the California side?—A. On the California side. I entered into the question, and I thought a good deal about it. We were very hard up, and we wanted to get the base down as near the river as we could, dealing justly with the Government, in view of that portion of the law which stated that 150 miles eastwardly covered the most expensive portion of the work. I do not know that I am quoting it exactly, but I think it is pretty much that way. The surveyors had made 150 miles from Arcade Creek reach the Truckee Meadows, where it was as level as this floor, and beyond there there was nothing very heavy. The heaviest work was all between Arcade Creek and the Truckee Meadows. Therefore that answered that portion of the law. I took Professor Whitney out on a little ride, and I had a profile of the road from Sacramento City to the Truckee Meadows with me, and beyond there even. I showed it to him. I had a copy of the law, and read that to him. "Now," said I "Professor, we want to have you decide or give your opinion of where this spot should be located." The profile showed a perceptible rise from Arcade Creek up. It was getting up faster and faster as we went along, and then got down; and when we got down to the Truckee Meadows, 150 miles from this point, on the Arcade Creek, it was almost level again, and the obstructions were trifling. It was smooth ground there. Here was all this heavy mountain work between. It answered the purpose of the law exactly. I did not ask him to do anything except that I wished him to decide where true justice would place the western base of the Sierra Nevadas. "Well," he says, "the true base is the river, but," said he, "for the purpose of this bill, Arcade Creek is as fair a place as any." I think the president of the company addressed him a letter on that question and he answered it, I think, in writing. Then I took out General Houghton, the surveyor-general of the State of California, and I took him over the same course, showed him the whole thing, and talked to him in the same way. He said that undoubtedly, for the purposes of the bill, that was the true place to put the western base, and he answered the letter of the company in the same way.

By Mr. COHEN:

Q. There was a report made by the United States Surveyor-General appointed by President Lincoln, was there not?—A. I did not know

of that. I was told lately that there was, but I had nothing to do with that.

By Commissioner ANDERSON:

Q. What was the point that was located?—A. Arcade Creek.

Q. How many miles is that from Sacramento?—A. I should judge about 9 miles; somewhere along there.

NATURE OF COUNTRY EAST OF ARCADE CREEK.

Q. What is the nature of the country from 5 miles east of Arcade Creek?—A. Light work.

Q. Is it mountainous?—A. No; but there is a steady incline upwards.

Q. How soon after leaving Arcade Creek do you reach what you call a mountainous section of the country?—A. That being the base of the mountain, it commences right there.

Q. Well, is there any mountain for 5 miles east of Arcade Creek? You have stated that there was not.—A. There are not any big mountains. There are some little foot-hills. But you seem to forget, all the time, that it is a question of where this 150 miles should be; the bill required it to comprise the most difficult construction. And after you have got 150 miles from Arcade Creek, you have got to lighter work than there was there at Arcade Creek. The profiles will show to-day; and you can go over the country and see it for yourself.

Q. How far is Rockland from Arcade Creek?—A. I should think about 18 miles; but I cannot remember those distances.

Q. Is there a cut between Arcade Creek and Rockland?—A. Yes.

Q. Where?—A. Before you get to Roseville, and beyond Roseville.

THE PRESIDENT OF THE UNITED STATES FIXED THE BASE-LINE.

Q. How far is that from Arcade Creek?—A. About 6 miles—to this cut. There is a cut there of, I think, 15 or 16 feet. We considered it a big cut at the time we took it out. The President of the United States had power under that bill to place that base, and he did it, and I would like to know who is to question it.

Commissioner ANDERSON. That is not the point here.

The WITNESS. Yes, it is. He was the supreme judge of where that was to be, and he was satisfied, and he placed it right there.

Q. I only ask you whether you consider that the section between Arcade Creek and Rockland could be described as the most mountainous and difficult of construction of the road?

The WITNESS. That is not the point.

Commissioner ANDERSON. I ask you that question.

A. I tell you this, that from Arcade Creek 150 miles eastwardly comprises the most difficult construction there was on the Central Pacific Railroad.

Q. You may say the same thing from Sacramento City to the meadows?—A. There is where the true base ought to have been, but we were a little modest and did not ask for it.

CENTRAL PACIFIC UNABLE TO PAY ITS DEBT TO GOVERNMENT.

By the CHAIRMAN:

Q. What is the ability of the Central Pacific Company to-day to pay its debt to the Government?—A. No ability whatever.

Q. What capacity has it, financially, to make any adjustment of the debt with the Government?—A. Its earnings.

Q. Have you at any time considered the question of the settlement of the debt with the Government?—A. We have.

PLAN OF SETTLEMENT.

Q. Can you state to the Commission about what was the result of your thought on the question?—A. No; I could not give you an intelligent opinion of the right way to settle it. The right way to settle it, in my opinion, would be to first ascertain what the company is probably going to earn, and extend the payment of the bonds for a sufficient time so that the company can earn it without embarrassing itself, or without destroying the property or having it forfeited to the first mortgage bondholders. The company will be better suited, and so will the Government, to have such an arrangement made by which the company can pay the Government. That it can be made I have no doubt. It makes but little difference to the Government whether it gets it in one year or one hundred years. They have got so much money now that they do not know what to do with it, and the whole country is convulsed with the idea of having so much money on hand. A scale of payments can be made that will give the company over one hundred or one hundred and fifty years to pay, and the Government will not be hurt by that course. The Government can charge interest, such as they have to pay themselves, and the company can pay it. The first-mortgage bonds can then be extended and the company can work out.

ONE HUNDRED AND FIFTY YEARS' EXTENSION OUGHT TO BE GIVEN.

Q. Do you consider one hundred or one hundred and fifty years as a proper extension?—A. I have not given it consideration. I should think that, to make it easy for the company, one hundred and fifty years ought to be given. Mind you, I do not want the Government to lose anything on that. Add the interest and spread it along, and let the company pay it as they can. If they can pay any faster let them pay it.

Q. Would you base it on a percentage or a fixed annual sum?—A. A fixed annual sum.

Q. Have you considered any question of settlement divorcing the company from the Government?—A. I should want this settlement when made to effect a separation of the Government and the company, and let the company go on and make its money as other people do. We could have made much more money for the Government if the Government had let us alone.

Q. That is to say, you would have an immediate settlement made by the company with the Government on the basis of periodical payments reaching over one hundred and fifty years, the Government to withdraw entirely from interest in the road?—A. No, sir; I do not want the Government to release any securities, and I do not think the company would ask that, but to have them extended over one hundred and fifty years, and make it so that the company can pay. They could afford to borrow money if they could not earn it; but the Government could hold this mortgage all the time, so that they can forclose, if they want to, when they find the company does not want to pay or does not pay.

EFFECT OF SOUTHERN PACIFIC CONSTRUCTION ON CENTRAL PACIFIC.

Q. What effect had the construction of the Southern Pacific on the Central Pacific as to its traffic?—A. A good effect. That is to say, if

nobody had ever built the South Pacific road the Central Pacific would have been a good deal better off; but Tom Scott was there, and he was going to build the road, and it was better for us to build it than for him to build it, because we had a very great interest in the Central Pacific, which we were bound to protect, while Tom Scott was bound to scalp the Central Pacific.

Q. Has the construction of the Southern Pacific had the effect of increasing the earnings of the Central Pacific?—A. No; I think not.

Q. Then the construction of the Southern Pacific has had the effect of decreasing the earnings, and, therefore, decreasing the payments to the Government by the Central Pacific Company?—A. Undoubtedly; and there are seven or eight other roads that have been doing it too, and the Government has been helping them all. I assure you we did not help them.

Q. Was the interest in the construction of the Southern Pacific the same that held the Central Pacific?—A. Pretty much. There was a little difference, but not much.

Q. So that the interest controlling and building the Southern Pacific was an interest profiting by reason of the income derived from the diversion of traffic over the Southern Pacific, thus decreasing the net earnings of the Central Pacific?

The WITNESS. Now, that is rather a hard sort of question.

The CHAIRMAN. I only ask you for information.

SOUTHERN PACIFIC WAS BOUND TO BE BUILT ANY WAY.

The WITNESS. As I said before, the Southern Pacific Railroad Company was bound to be built. Tom Scott had a land grant from the Government and he was going to build it, and if we had folded up our arms and laid down and gone to sleep, he would have built it, and it would have been ten times more disastrous for the Central Pacific if he were to do it than if we were to do it. It was a foregone conclusion that the road was going to be built. The only question was, who should control it, friends of the Central Pacific or enemies of the Central Pacific? Now, it does not seem to me that any man of fair mind can doubt which it is best to have own it. We thought so. We did it to protect the Central Pacific. We had no ambition to build the Southern Pacific Railway.

Q. Has not the effect of the construction of the Southern Pacific been to impair the security of the Government in the Central Pacific?—A. The Congress of the United States did not think so or else they would not have encouraged the building of it.

The CHAIRMAN. I am asking you as to the effect of the building?

The WITNESS. Of course the building of every railroad built across this continent has injured the Central Pacific, and yet the Government helped them all, I believe. We did not do it, I assure you of that. If we could have stopped the building of them all we would have done it.

Mr. COHEN. It helped them all except the Canadian Pacific, you mean, and it encouraged that by giving it the Government business.

GOVERNMENT FREIGHT SENT AROUND THE HORN.

The WITNESS. Yes; really, this is a thing that you ought to know. I know it, and I am very sorry to say what I am about to say. But the railroad was built for the purpose of transporting Government troops, Government stores, Government implements of war, and all that sort of thing, and there was a provision that the Government should be served

as cheaply as any other customer, and, notwithstanding that we sought for that trade and tried to get it and let it go on the payment of the debt, it was sent around the Horn and around the Isthmus and through foreign countries rather than over our own territory and in payment of a debt owing to the Government. That is the course that the Government has pursued with regard to giving this business to the railroad. If we had had the transportation of the Government freight at the same rate which they pay others, we would have paid the Government a great deal more money than we have paid. I was superintendent about that time, and was pretty well informed as to those things, as I was looking after business for the road in every way that I could. We had more difficulty in getting the Government freight than we had in getting the merchants' freight.

Q. What particular road got a large portion of the Government freight?—A. I am speaking of the time before there were any roads other than the Central Pacific. I tell you that the Government freight went around the Horn and across the Isthmus and through foreign countries rather than go over our own road and our own country; and, unfortunately, they were not Democrats that did it, either. [Laughter.]

PLAN OF SETTLEMENT.

The CHAIRMAN. I call your attention to the fact that one of the important questions in the act of Congress is the adjustment of the debt. You have intimated that if Congress will appoint a commission to hear the board of directors of the Central Pacific Company some proposition can be arrived at.

The WITNESS. Not to hear, but to confer.

Q. This Commission is ready and willing to hear any proposition that the company may have to present, and that is one of the important subjects of the bill.

The WITNESS. Have you communicated with the board of directors on that subject?

The CHAIRMAN. Yes; we have asked them all for information.

The WITNESS. Well, I have been in Europe and I do not know.

PROBABLE EFFECT OF AN ACT AUTHORIZING SALE OF GOVERNMENT INTEREST IN CENTRAL PACIFIC.

The CHAIRMAN. I have repeated the question to you for that reason. I ask you what would be the effect of an enabling act of Congress authorizing the sale of all the right, title, and interest of the Government in the Central Pacific Railroad Company?

The WITNESS. What would be the effect?

Commissioner ANDERSON. Who would buy it, and what would it bring?

The WITNESS. I wish I were omniscient, then I might answer that.

The CHAIRMAN. I ask you as a railroad man.

The WITNESS. Good gracious alive; I could not tell you what would be the effect; it would create quite an uproar.

Q. What would be the nature of the uproar?—A. Astonishment, and all that sort of thing. Well, I cannot tell you. But I say that if the Government should appoint three good business men to meet three good men from our board, there could be an arrangement made by which the Government would not lose a cent, and the company would be benefited and taken out of politics. That is the great thing, to get the road out of politics.

The CHAIRMAN. Will you submit such a proposition to this Commission? [Jocularly:] We believe, with all due modesty, that this Commission is such as you have described.

The WITNESS (laughing). Well, since I have got to talking you have got a smile on your face which you did not have before. I think you are a good fellow.

The CHAIRMAN. I am much obliged.

A SUGGESTION THAT THE COMMISSION MEET MR. HUNTINGTON.

The WITNESS. If any such proposition had been made to the board of directors and I had been at home I should have sought to have action taken on it. I believe that if you three gentlemen will meet Mr. Huntington, not with your reporters and not with your stenographers, but just to talk the matter over, just to compare views, may be you can form a plan with his concurrence, and if he advises the board that, in his judgment, it is the best that can be done, I think the board will ratify his suggestions. He is not empowered to act, you know, but I think they will ratify his suggestions.

Q What is the objection to presenting the suggestion to the Commission here?—A. Because it is in the nature of a trade. You might want to "haggle" about it a little.

The CHAIRMAN. There is an old saying that "In all trades somebody is bound to be cheated," so we do not want to be introduced to any trades.

The WITNESS. Well, I do not mean that. I know very well you are not a legislative body, and you are not empowered to make a settlement, neither is Mr. Huntington empowered to make a settlement, and you know there cannot be any settlement of that kind without having a talk about it and a comparing of views, one with another. If you say, "I will do this," and the other man says, "I will not do it," then there is an end of the matter.

The CHAIRMAN. Will you, as a member of the board, submit hereafter a proposition for extension or settlement?

The WITNESS. I think I will. I will do my best to get the board to consider it.

INFLUENCING LEGISLATION.

By Commissioner ANDERSON:

Q. Have you ever, personally, used any of the funds, stock, bonds, or other securities of this company for the purpose of influencing legislation?

Mr. COHEN. I do not think that is a question proper to ask this witness.

The WITNESS. Well, I can say no; most emphatically, no. I never did.

Commissioner ANDERSON. It is the privilege of the witness to answer, as well as of the counsel to object.

HOSTILE LEGISLATION.

Q. Do you know of any hostile legislation that has been had in either of the States or Territories or in the national legislature hostile to the interests of the Central Pacific Railway?—A. I have a vivid recollection of a good deal of it, but I am not prepared to say just exactly what it was. There have been any quantity of bills introduced into the California legislature that would have cut our throats and ruined the Government's interest in the road. I do not mean to say cut our throats

literally, but figuratively speaking. We have been threatened from all sides, and have had to guard the approaches. I know of one bill that was proposed, but we beat it. That bill, if passed, would have destroyed the paying capacity of the road, which, in that event, would long ago have been sold at public sale; of course, in such a case, the Government's rights would have been all sacrificed. I cannot tell the particular acts that have been passed, but we have survived all of them, even the Thurman bill. I thought at the time that was passed that it would ruin us.

ACTS OF CONGRESS GRANTING LANDS TO COMPETING ROADS.

By Commissioner LITTLER:

Q. Do you regard the acts of Congress granting lands in aid of these competing lines as legislation hostile to the Central Pacific?—A. I do not think it was intended as hostile legislation.

Q. What was the practical effect of it?—A. The practical effect was to build the roads and cut down the earnings of the Central Pacific and the Union Pacific and thereby reduce the Government's interests. It hurt us, and hurt the Government. You must remember, when we fight for the road we fight for the Government. We do not get credit for that, however.

GRADE OF SACRAMENTO LEVEE.

By Mr. COHEN:

Q. What was the grade of the levee at Sacramento as compared with the present grade when you commenced to lay your tracks there?—A. We have raised it about——

Mr. COHEN (interposing). Nine feet, is it not?

The WITNESS. I think it was hardly that. I was going to say seven. I cannot remember exactly, but I was going to say seven feet.

Mr. COHEN. The grade of the city of Sacramento was raised to conform to that grade nine feet, was it not, some distance back from the levee? In other words, you had to make an embankment in order to keep your track above the high waters of the Sacramento River in the floods of each year, had you not?

The WITNESS. Yes.

Q. So that laying the track at the Sacramento was not laying it simply in a valley country?—A. Oh, no.

Q. You had to make your track above high-water mark until you got to a sufficient elevation to avoid the floods from the Sacramento River?—A. Most undoubtedly. We spent a good deal of money there on the levee to get it up to a height that would bring our tracks up above the flood.

Q. That was very expensive, was it not?—A. It was very expensive; and we have spent more or less money on it ever since.

Q. You had to guard the approaches to the American River so as to protect the abutments of that long, expensive bridge you built across that river, had you not?—A. Yes.

Q. All that work was contracted to be done and paid for out of the $400,000 allowed you for the eighteen miles?—A. Yes, according to contract. I did not get $400,000 in cash.

Q. I understand; $250,000 in cash, $100,000 in bonds, and $50,000 in stock?—A. Yes; and the bonds could not have been sold for over $75,000. They could not have been sold in California at any price, but they would not have brought over $75,000 anywhere.

AID-BONDS FROM THE BASE-LINES.

Q. With respect to the point at which the western base of the Sierra Nevada Mountains was fixed by President Lincoln, you got from that point aided bonds at the rate of $48,000 a mile and issued your own bonds for the same amount?—A. Yes.

Q. Did not the proceeds of those bonds go into the construction of the road between that point and the State line?—A. I believe they did, as far as I remember.

Q. Did you know of any dividend being declared or paid out of the aided bonds or the first-mortgage bonds of the Central Pacific Railway.

The WITNESS. Dividends paid with the bonds?

Mr. COHEN. With the bonds or from the proceeds of the bonds?

The WITNESS. No, never. The bonds were all sold, every one of them, and the proceeds went into the treasury of the company.

FINANCIAL CONDITION OF CHARLES CROCKER & CO. AFTER COMPLETION OF CENTRAL PACIFIC.

Q. Can you state, from your memory, what was the financial condition of Charles Crocker & Co. after they had completed the building of the Central Pacific road from Sacramento to the State line—how much was the firm of Charles Crocker & Co. in debt?—A. I do not recollect. I know they owed, but I cannot recollect how much.

Q. For the purpose of refreshing your recollection, I will ask you whether, when you completed your track to the State line, you had not exhausted all the assets that you received from the Central Pacific Railroad Company excepting the stock, and whether you were not indebted to the extent of upwards of $5,000,000?—A. I cannot say as to that; I do not recollect now. I know I owed a good deal of money.

Q. You owed a good deal of money, and you had the stock as an asset?—A. Yes.

FINANCIAL CONDITION OF CONTRACT AND FINANCE COMPANY.

Q. Can you state what the financial condition of the Contract and Finance Company was at the time it had completed the track between the State line and Promontory Point?—A. I cannot tell you exactly, but I know it was in debt.

Q. It had exhausted all its cash assets and was in debt and had the stock that it received from the Central Pacific?—A. Yes; it had the stock, but it could not sell it.

Q. I understood you to say, in your direct examination, that there was no money over, and that the Contract and Finance Company had no money over when the road was finished.—A. Nothing but the stock; and that we did not consider very valuable. In fact, we felt pretty blue over the situation.

CONNECTIONS MADE WITH CENTRAL PACIFIC.

Q. You were asked about connections made with the Central Pacific by the building of new lines in California. After the road was finished to Promontory Point the entire property of the Central Pacific consisted of a line of railroad from Sacramento to Promontory Point. That was all the property it had, was it not?—A. Well, we had bargained for a road to Ogden—to meet the Union Pacific.

Q. But you were not paid for it then?—A. No; not on the immediate completion of the road, but we took possession of the road very soon after completion, and we paid for it.

Q. After you complied with the resolution passed by Congress in 1869, that Ogden should be the common terminus of the two roads, then all the property the Central Pacific had was from Sacramento to Ogden?—A. Yes. That was before the consolidation with the Western Pacific.

Q. The only way you had of reaching San Francisco at that time, before the Western Pacific road was finished, was to send your passengers down the river on a steamboat and your freight in the same way?—A. Yes.

Q. Then, after the Western Pacific was finished, in the fall of 1869, you could send your passengers from Sacramento to San José, but you still had no means of reaching San Francisco?—A. No; but we had foreseen that and had organized a company to build a road from Niles to Oakland.

Q. You built that road connecting with the Western Pacific?—A. Yes.

Q. And then you consolidated the Western Pacific with the Central Pacific, so as to form one continuous line from Ogden to San Francisco?—A. Yes; by the way of Stockton and Livermore Pass.

OAKLAND AND ALAMEDA FERRIES PURCHASED.

Q. Then you bought the Oakland and Alameda ferries, did you not?—A. Yes.

Q. After that purchase, the ferries and the railroad connected with them were consolidated with the Central Pacific?—A. Yes.

Q. At the time the road was finished to Ogden the Government refused to accept it because it was not completed?—A. I have no recollection of that. I know there was a commission appointed to decide when the road was finished. That was some time after. But I do not know whether the Government refused to accept it or not; I rather think they did not.

Q. Do you remember that Mr. Huntington deposited $4,000,000 of the first-mortgage bonds of the Central Pacific Railroad Company with the Secretary of the Treasury as a guarantee that the road would be completed in accordance with the requirements of law?—A. No; I do not.

ACCEPTANCE OF ROAD BY GOVERNMENT.

Q. Do you know when the road was finally accepted by the Government?—A. Yes.

Q. When was it?—A. I cannot remember the dates.

Q. It was the 1st of October, 1874, was it not?—A. About that time. I recollect that I went with the commissioners and showed them the road along at different points, and they examined it very thoroughly and wrote out their report.

Q. Were you examined as a witness before the committee of eminent citizens appointed by Congress—I do not mean *these* eminent citizens, but another committee of eminent citizens—who examined the road?—A. I recollect a good many commissions and, especially, the "eminent citizens."

GOVERNMENT SLOW IN FURNISHING LAND PATENTS.

Q. Do you remember that the Government refused to issue your land patents and refused to deliver the balance of the aid bonds because the

road was not completed, and it had been in operation then some six months between Sacramento and Ogden?—A. I do not remember their refusing to issue bonds, but I know that they have always been very slow in the furnishing of patents for land. They are growling at one end of the line because we do not take out patents, and refusing at the other end of the line to give us patents. We have always been between two fires. The public, through the press, has been swearing at us, saying that we were not taking out patents, and we had papers in the Government departments for years trying to get patents for the land.

Q. When the Central Pacific was finished there was no money over, from the proceeds of the aided bonds or otherwise, that you could use to build any other road?—A. No; I do not remember any.

Commissioner LITTLER (jocularly). These interrogatories are very leading, and very objectionable in a court of justice.

Mr. COHEN. Yes; but I have not seen much justice around this Commission so far. I hope there will be some when you make your report. This is your witness, and I am cross-examining him.

Q. Did you not consider it for the interest of the Central Pacific Railway Company to build the San Joaquin Valley road for the purpose of connecting the southern part of the State with the main line of the Central Pacific?—A. Most assuredly.

CENTRAL PACIFIC HAD NO MEANS TO BUILD SOUTHERN EXTENSIONS.

Q. The Central Pacific, as a corporation, had no means to undertake that work, had it?—A. We had not at that time; no. I do not think they had at any time; in fact, I know they had not.

Q. You built that road and connected with the Central Pacific?—A. Yes.

Q. That has been for the benefit of the Central Pacific, has it not?—A. Yes.

Q. Have the net earnings of the Central Pacific been in any way depleted to keep up the ferries that you bought, or any other lines that you bought or constructed that have been consolidated with the Central Pacific?—A. No; they have been an advantage all the time; the ferry particularly. The ferry adds largely to the Central Pacific.

AS TO LAND-GRANT BONDS RECEIVED BY WITNESS.

Q. In the examination pursued by Mr. Anderson this morning, he asked you about some land-grant bonds that you received. From the way it was left, I think it would appear that you received those land-grant bonds as a dividend. Is that the fact, or is it not the fact that you took those bonds for moneys due to you and to the other stockholders by the Contract and Finance Company—the moneys that you deposited with the Contract and Finance Company?—A. I can not recollect about that. If it was declared as a dividend the books would show it.

Commissioner LITTLER. Do you claim that the Contract and Finance Company loaned the Central Pacific Company $6,000,000 in money?

Mr. COHEN. No, sir; I do not say any such thing.

Commissioner LITTLER. What do you claim?

Mr. COHEN. The point of my question is this: The stockholders of the Contract and Finance Company did not subscribe for the capital stock. The money that the Contract and Finance Company had to develop its business was the money that these stockholders had borrowed and had put in there for their individual credit, and for which they received interest. In other words, they made deposits with the Contract

and Finance Company. My question led up to the fact that these land-grant bonds were paid to them in settlement of the moneys that were advanced to the Contract and Finance Company.

LAND-GRANT BONDS PAID TO MEMBERS OF CONTRACT AND FINANCE COMPANY IN SATISFACTION OF LOANS.

Commissioner LITTLER. In other words, as I understand, the Contract and Finance Company never paid a dollar for the five millions of stock, but each member of the company loaned to the company sums of money from time to time, and these land-grant bonds were paid to them in satisfaction of their individual loans?

Mr. COHEN. Yes, sir; that is my understanding of it.

Commissioner ANDERSON. There is no evidence of that, Mr. Cohen.

Commissioner LITTLER. There is evidence that they never paid a dollar of their capital stock.

Commissioner ANDERSON. There is no evidence whether the land-grant bonds were given to stockholders for reimbursement of their loans or whether it was done by way of dividends.

Commissioner LITTLER. No; there is no evidence of that; but what I wanted to make clear was that they never paid a cent of their capital stock.

LAND-GRANT BONDS NOT PAID AS DIVIDENDS.

Mr. COHEN. The point insinuated by Mr. Anderson this morning was that the land-grant bonds were paid out as dividends. That is not the fact. There was no such dividend paid.

Commissioner ANDERSON. Why do you say it is not a fact?

Mr. COHEN. Because I know it is not true. I knew the run of the business.

Commissioner ANDERSON. If you have books, and can prove it, you should do so.

Mr. COHEN. I am putting my knowledge of my client's business into the questions that I am asking. I know how those matters were handled.

The WITNESS. The fact of the matter is, I have not the knowledge to answer these questions.

Mr. COHEN. Mr. Anderson had put you on the record as admitting that it was a dividend of land-grant bonds.

The WITNESS. If I am on the record as saying that there was a dividend in land-grant bonds I wish to be removed from the record in that respect, for I have not any clear recollection of it.

SETTLEMENT OF GOVERNMENT DEBT.

Mr. COHEN. You were asked to make some suggestions as to the settlement of the Government debt.

Commissioner ANDERSON. Before going into that subject, I want to put on the record an extract from the minutes, dated September 3, 1873——

Mr. COHEN (interposing). I object to those extracts as not being correct.

Commissioner ANDERSON. We will take the responsibility of that.

The extract is as follows, and is from page 107 of the minute book:

September 9, 1873, resolved, that the secretary be directed to receive from the Contract and Finance Company the notes of Leland Stanford, Mark Hopkins, and C. P. Huntington, amounting to $5,700,000, indorsed by said Contract and Finance Company, in settlement of its indebtedness to this company, and credit the same to the account of said Contract and Finance Company.

Showing that the individual indebtedness of these gentlement to the Contract and Finance Company was settled in this way.

S. H. H. & C.'S NOTES GIVEN FOR BENEFIT OF WESTERN DEVELOPMENT COMPANY.

Mr. COHEN. I will say, in explanation of just such an item as that that you introduced in San Francisco, that I called on Mr. Douty to explain it. It is in his deposition. It turns out that these notes given by Mr. Stanford, Mr. Hopkins, Mr. Huntington, and Mr. Crocker, which were supposed to be for money borrowed by them, were really given for the benefit of the Western Development Company for its use, and not for the benefit of the other company or themselves. I state that this thing which you have just read is of the same character. You will find it in Mr. Douty's affidavit. That is the trouble in picking out such things from the proceedings of a large company like this.

Commissioner ANDERSON. The trouble is that we have not got the books.

Mr. COHEN. You had the books in San Francisco and could have used them for this purpose, but the trouble is that you put a stranger at this work—your statistician I will call him, though I think he ought to have a higher name than that—to support a theory which you have formed.

The WITNESS. This seems to be all irrelevant to my examination.

The CHAIRMAN. It is.

The WITNESS. I want to get through.

Mr. COHEN. This is my usual experience. When the Commissioners get through with a witness they seek to prevent my getting any information from him.

RELATIONS OF COMPANY TO GOVERNMENT.

Q. You have been asked to give some suggestions as to the settlement of this debt with the Government. I would like to get from you your understanding of the relations of the company to the Government. When you accepted the act of 1862 by filing your acceptance in the office of the Secretary of the Interior, did you not understand that the Government would give to the Central Pacific a stated sum for the transportation of its business over the road? Had it not been stated to you that the Central Pacific and the Union Pacific would receive from the Government an amount of transportation equal to $7,300,000 per annum?

Commissioner ANDERSON. Stated by whom?

Mr. COHEN. That was the intimation given by the Senators and Representatives that voted for the bill.

(Question continued.) And that you would not be required to pay anything on account of these bonds; that one-half the transportation would go to pay the interest, and that the other half would form a sinking fund to retire the principal—was not that the understanding when you accepted the contract to build this road?—A. That seemed to be the gist of the discussions in Congress—that this company would pay that debt by transportation of the mails, munitions of war, troops, Indian supplies, and that sort of thing. A little while ago I was saying that we did not get that freight; that it was sent through a foreign country rather than give it to us. We were very much disappointed in the amount of freight we got from the Government and the amount

of compensation for carrying the mails. We had every reason to believe that we would be liberally paid for all the transportation that was given to us, and that we would get all there was. Congress, in its discussions, as I remember them, discussed that proposition—that the Government would thus get its pay fully. And it was proven by a report from the Treasury Department—that the Government had saved; and I believe one of the Senators, in his speech, read that report, to the effect that the Government had already received, in saving of transportation of the mails and of these Government supplies, sufficient to nearly pay the debt at that time, and it has been going on ever since.

COMPANY DISAPPOINTED AS TO GOVERNMENT FREIGHTS AND MAILS.

We supposed that we were going to get somewhere near what had been paid for very inferior service in carrying the mails; but, on the contrary, all those things were ignored, and the officers of Government only sought to depreciate the pay that they were to give us for everything we did. The result is that the Government did not get back as much as we expected it would get; but it got a great deal. If the road had not been built five or six years before the time we agreed to do it—which it was, at the sacrifice of millions of dollars in expense—the Government would not have saved what it did by the quick completion of the road. I think we finished it seven years ahead of the contract, and we did not receive any more for it than if we had taken the whole seven years to build it; and we could have saved a good many millions of dollars in the building of the road if we had waited for the full time to expire, not only in the cost of material and cost of labor, but the price of the bonds when we sold them. We sold the bonds for currency for less than par, and then sold the currency as low as 34 and 35 cents on the dollar, I think, at one time, to pay out the gold to our men.

PREMIUM ON GOLD.

Commissioner ANDERSON. You must be mistaken in your figures. Gold was never at such a premium as to reduce the price of currency 34 or 35.

The WITNESS. Yes, it was.

Commissioner ANDERSON. You did not get any Government bonds until after the war was over.

The WITNESS. We did not?

Commissioner ANDERSON. No. Ask Mr. Cohen.

Mr. COHEN. Not all. They got some bonds.

The WITNESS. We got bonds and sold them at a very great discount.

Mr. COHEN. When the act of 1864 was passed, which was the time that General Grant was repulsed from Cold Harbor, the rate of gold ran up to 290.

Commissioner ANDERSON. I do not think gold went to 290 in 1864; in 1863 it did.

Mr. COHEN. On the 1st of July, 1864, gold was at 290.

Commissioner ANDERSON. At any rate the first bonds were not issued until 1865.

Commissioner LITTLER. The war closed in April, 1865.

Mr. COHEN. On the 1st of July, 1864, the premium on gold was 290; on the 1st of August, of that year, it was 261, and on 1st of December it was 243.

Commissioner ANDERSON. But you must bear in mind that you did not get the bonds then?

The WITNESS. We ought to have had them. That was not our fault.

Mr. COHEN. When the act of 1864 was passed, the road was finished to Newcastle, a distance of 31 miles, and we could not get any bonds then because, under the act of 1862, we had to finish 40 miles and we had not the money. The moment the act of 1864 was passed we completed the other 9 miles and obtained the bonds for the first 40 miles. That was when gold was highest.

Commissioner ANDERSON. But you did not get your bonds then. You did not get them till January, 1865, and you could not sell them until you had them.

The WITNESS. Well, I guess you are right.

COMPANY HAD SUPPOSED THE GOVERNMENT WOULD DO AS IT AGREED.

By Mr. COHEN:

Q. When you were building the road over the mountains, did you understand that the earnings of the road were to be subject to any fixed charges other than the payment of the first-mortgage bonds and the operating expenses? Was it not your idea that the transportation done for the Government would pay the interest on the aided-bonds?—A. My understanding was, in the very words of the act, that it was a contract, and that the Government would religiously live up to the contract, as we intended to, and as we did. There have been no violations of the contract on our side. We had every reason to suppose that the Government would do with us exactly as it agreed and not defer the payment of the bonds or the issuing of patents or put any impediment in our way. But unfortunately we were mistaken. I do not say that the Government collectively did it, but I say the officers of the Government did place everything in our way that they could. They sent their transportation over other routes, through foreign countries, rather than give it to us. That I say, and can prove. We had every reason to believe that the Government was going to favor itself and favor us in doing it, but we were disappointed.

SAVING TO GOVERNMENT IN TRANSPORTATION.

Q. Do you know what amount of transportation the Government has furnished to the Central Pacific Railway Company since the completion of the road?—A. No.

Q. Have you seen any statement made by the Central Pacific Railroad Company as to what the Government has saved in transportation of its freight and passengers, troops, and munitions of war, for sixteen years following the completion of the road?—A. I have seen such, but I do not remember it. I know it is a very large amount, but I do not treasure those things up. I have got lots of everyday things to remember.

Mr. COHEN. I would like to have it appear here that the amounts taken from the War Office and the Navy Department show a saving in fifteen years, from the building of the road up to the 1st of January, 1880, of $100,000,000, and a saving in the carrying of the mails of $39,600,000.

Commissioner ANDERSON. The statement will show for itself.

Mr. COHEN. In other words, the Government has saved by the building of the road, from 1869, $139,600,000.

Commissioner ANDERSON. I am afraid you have not quoted the figures correctly.

Mr. COHEN. I quote from the reports made to the House Committee on Pacific Railroads by the different Departments.

Q. You have not made any calculation as to those figures?—A. No; though I have read them over.

EFFECT OF SOUTHERN PACIFIC ON CENTRAL PACIFIC.

Q. You were asked some questions about the effect of the building of the Southern Pacific road on the business of the Central Pacific. The building of the Southern Pacific interfered simply with the through business, not with the local business of the Central Pacific, did it not?—A. No; on the contrary, it added to the local business of the Central Pacific by bringing business to it.

Q. By its connection at Goshen with the Central Pacific?—A. Yes.

Q. So that the net earnings of the Central Pacific were not materially reduced by the building of the Southern Pacific, in the way in which it was run by yourself, Mr. Stanford, and Mr. Huntington?—A. It was injured in the through business only.

Q. But the local business was benefited by it?—A. Yes, sir; I neglected to mention the difference between the local and the through business.

DIVERSION OF BUSINESS FROM AIDED TO UNAIDED LINES.

Q. It is charged that the directors of the Central Pacific have diverted business from the aided lines to the unaided lines. Have you any knowledge of that being done, other than so far as was required by the necessities of the case?—A. Only where it shortened the run, and where it was a necessity. It diverted the mail to a shorter and quicker route.

Q. The Government did that, did it not—insisted on the mail being carried by the California Pacific, because the mileage was less?—A. I do not remember what the Government did, but I know that it was the thing to do, and it was done. The Government would be a very foolish if it did not insist upon it. I do not know whether it did or not. I know the passengers all insisted on going by the shortest line.

NO PROOF THAT CENTRAL PACIFIC DIRECTORS HAVE FAILED IN THEIR OBLIGATIONS TO GOVERNMENT.

Q. It is charged also that the board of directors of the Central Pacific have been ungrateful to their great benefactor, the United States Government, have failed in fulfilling their obligation to it. Have you any instance in your mind that you can mention where they have so failed?—A. No, sir; there are none. I know there are such general charges made, but I defy anybody to put his finger on a specific thing that has been done. As I have said oftentimes, it is easy to get up and talk generally about a man having done great things, but when you come to fetch them right down to some single thing specifically done, they can not show it. I have been traduced in that way lots of times, but when you come to examine it there is not anything you could put your finger on to fight them with, because they do not charge anything specifically, but make everything general. One correspondent said we had made $200,000,000 in clean cash in building the road, but that carried its own condemnation on its face.

Q. If the Government had been as faithful as the company in performing its obligations there would have been no difficulty now about paying the debt, would there?—A. No.

Mr. COHEN. I had the good fortune once to appear before this Commission, and they asked me to make some suggestions. I suggested that they report to the President that the Central Pacific Railroad Company had in all respects performed its obligations toward the Government. Have you any suggestion to make that will improve on my statement in that respect?

The WITNESS. I have advocated in our board our making out a bill against the Government, presenting it, and demanding payment of it, and that we should have a bill introduced in Congress to pay us what they ought to pay for these violations of the contract.

CONSTRUCTION OF ROAD FROM SAN FRANCISCO TO SAN JOSÉ.

By Commissioner ANDERSON:

Q. In regard to the construction of the road from San Francisco to San José, do you remember the date when that was completed?—A. We had nothing to do with the building of that road.

Q. Was it not constructed before the Central Pacific was completed?—A. Yes, sir; I think it was.

The Commission then adjourned to Wednesday, September 21, 1887, at 10 a. m.

---

10 WALL STREET, NEW YORK,
Wednesday, September 21, 1887.

The Commission met pursuant to adjournment, all the Commissioners being present.

OBJECTION BY COUNSEL FOR CENTRAL PACIFIC.

Mr. COHEN. Let me ask the Commission whether it would be willing to strike from the record of yesterday that statement of what the minutes of the Central Pacific Company contain. I do not want that to go in as part of your report. If the minutes are to be annexed there should be a full copy, and not an extract taken from them which is not in the language of the minutes.

Commissioner LITTLER. We said to you that we would take a certified copy of the minutes in place of it.

Mr. COHEN. The minutes are not here.

Commissioner LITTLER. You can get them. You have plenty of time.

Mr. COHEN. We have already spent $14,000 in complying with the wishes of this Commission.

Commissioner LITTLER. That is a small matter to you gentlemen.

Mr. COHEN. We have not any more time or money to expend in such matters.

Commissioner ANDERSON. We will give you the liberty of substituting the original. The extract as presented was taken by a gentleman who is prepared to swear to its accuracy.

Mr. COHEN. It is not in the language of the original.

Commissioner ANDERSON. We can do no more than to let you substitute the original. If you do not do that, the burden is with you.

Mr. COHEN. But we ought not to be put in the position of having it on the minutes.

Commissioner ANDERSON. It appears on the record that it is not a copy.

Mr. COHEN. If you will say that it is not in the language of the minutes, that may do, and it will not be binding on us.

Commissioner ANDERSON. You can always correct it, and if you do not take the trouble to do so, everybody in the United States will believe that it is correct.

Mr. COHEN. If it has the sanction of your name it will be so taken.

Commissioner ANDERSON. Then you must correct it.

Mr. COHEN. We ought not to be put in the position of having it purport to be taken from our books.

The CHAIRMAN. We will take your exception and enter it on the record.

THE HUNTINGTON VOUCHERS.

Commissioner ANDERSON (addressing Mr. Cohen). Has the Central Pacific Company forwarded to New York the vouchers, bearing Mr. Huntington's name, which the Commission called for at the examination in San Francisco?

Mr. COHEN. They have not. I have presented your request to Governor Stanford, and he said he would not send any of the vouchers from the office in San Francisco to New York; and he gave as a further reason that the company had already handed to the Commission a great many important vouchers which had not been returned. I will say further that I telegraphed to the chairman of this Commission from San Francisco to Philadelphia, to find out what had become of those missing vouchers, and nobody until the present time has been able to give me the requested information. Our time is short, and we desire to know what has become of those papers that were intrusted to you. That is the reason why Mr. Stanford did not want to send any more papers to New York.

COLLIS P. HUNTINGTON, being further examined, testified as follows:

By Commissioner ANDERSON:

REGARDING VOUCHERS THAT DO NOT GIVE DETAILS OF EXPENDITURES.

Question. You recall the fact that during your former examination a number of charges for miscellaneous expenses appearing on the books of the Central Pacific Company without any detailed statement of the persons to whom such moneys were paid or the purposes to which said moneys had been applied, were brought to your attention, and you were examined in reference to them. You stated, among other things, that it was your practice, at the end of each month, to forward to San Francisco a statement of the expenses, and that the entries on the books in California were made from such memoranda. You also, if I remember correctly, stated that you did not think the memoranda in San Francisco would develop any more detail than the mere statement that these moneys had been expended for legal expenses or on expense account. Do you remember that portion of your examination?—Answer. I remember the questions being asked. I do not think I said that the details would be spread upon the books there.

Commissioner ANDERSON. I have just said, in effect, that you have stated that they would not be spread on the books.

The WITNESS. Yes; I should answer it, I think, in the same way now, if the question were asked me. I said "monthly, perhaps," not monthly. I sent when I had time. My view is, as I remember (it is some time back), that I sent it about monthly.

Q. Have you, since that examination, received by correspondence any information from the officers in San Francisco as to what, in fact, does appear on the face of those vouchers which bear your signature?—A. No; I have not.

Q. Have you refreshed your memory in any way so as to be able to give this Commission any further information as to the subject of those expenditures?—A. Well, I have been very busy about other matters and I could hardly expect, even if I did turn my mind in that direction (which I certainly have done occasionally), to remember the details of things that happened twenty years ago, or thereabouts.

Commissioner ANDERSON. Not unless you consulted correspondence or books.

The WITNESS. Well, I have not consulted any particular correspondence. The matter has come to my mind, of course, quite frequently, but I have been a very busy man for the last fifty years, and in regard to these matters that were settled at the time I would hardly be able to remember, even if I made the greatest possible effort to do so.

Commissioner ANDERSON. Since your examination the Commission has seen the vouchers in San Francisco, extending over a period commencing in about 1872, and coming, more or less, down to date, and we find that in almost every month there are vouchers, bearing your signature, in which items varying from $500 in magnitude to a very large sum of money (I do not wish to be understood as quoting accurately from memory), to, perhaps, $75,000 or $100,000, were simply entered as being expended for "legal expenses," or for "expense account," and the voucher bears your signature, or is identified as coming from you. Now, is there any further explanation you wish to give as to the purpose for which these moneys were expended, and which you considered justified you in giving them the sanction of your name as to their being correct expenditures? Is there any further explanation that you desire to make to this Commission?

EXPENDITURES ALL FOR PROPER PURPOSES.

The WITNESS. I do not know that there is. They were all for proper purposes, or they would not have borne my signature. Of course the matters were fresh at the time, and whatever I wrote to my people was a statement of the facts as I had them in my mind then; but they have passed out of my recollection now, and I have never pretended to keep our books or to look into them very much. I have great confidence in my associates, or co-directors, and our employés, and I sent those matters to them; they were correct.

Q. Can you not give us some light as to the kind of use made of this money, so as to enable us to pass judgment as to what you call the correctness of the expenditures?—A. I do not know that I could. Of course there are a great many things that we have to pay money for that are perfectly legitimate and proper, in order to properly care for the interests that I was attending to. There was no money paid out but what was legally and morally right to pay out. Of that I have no doubt.

AS TO FEES TO MEMBERS OF CONGRESS.

Q. Would you designate as a proper expenditure the payment of a large fee to a member of Congress for some legal services of greater or

less magnitude, which was paid to such member while a measure in which the Central Pacific Company had an interest was pending in Congress?—A. Well, I would not think it was a proper thing to do if the matter on which he was to act was one that he had to vote on.

Q. You understand my question—that the counsel fee has no apparent reference to the subject of legislation, but is supposed to be paid for some other service entirely, only that the compensation to be made was made during the same session, and before the member's vote was actually cast, in regard to a measure in which the Central Pacific Company had an interest. Would you consider that that was a proper use of money?—A. Well, I should hesitate before I would use money in that way. Of course, when we want legal advice we generally go to the best men we think of.

LEGAL ASSISTANCE FROM MEMBERS OF CONGRESS.

Q. As matter of fact, has not the Central Pacific Company frequently had legal assistance both from members of Congress and from members of the State and Territorial legislatures?—A. I know very little of what has been done west of the Missouri River.

Commissioner ANDERSON. Then we will confine ourselves to what you know.

The WITNESS. I do not think there would be any objection to employing a man to attend to a case in court because he was a member of the Senate or of the House.

Q. Even though, at the time, there was a measure pending before the legislature in which the Central Pacific Company had a large pecuniary interest?—A. I should have no hesitation in employing the best man I could find, whether he was a member of Congress or not.

Q. In regard to other services of a kindred character—the preparation of a statement of a case or of facts and figures which, in your judgment, established propositions in which the Central Pacific Company had an interest, would you deem it improper to employ a member of Congress for the purpose of getting together such information, and paying a member of Congress compensation for such services?—A. I should want to think of that, if such a case should arise. I always like to get the best men to do any particular thing that I have to do. If the case should ever come up I should consider it very carefully and then I should act according to the best of my judgment.

EMPLOYING PERSONS RECOMMENDED BY MEMBERS OF CONGRESS.

Q. You would, in similar cases of the rendering of legal services or of services in the nature of getting together useful information, have no hesitation in employing persons recommended to you by members of Congress?—A. I do not think I should hesitate to employ the best man, even if he had been recommended by a member of Congress.

Q. Between the years 1872, 1873 and the present time, is it not true that it has often happened that there have been measures pending in Congress in reference to which it was extremely desirable that the status of the Central Pacific Company should be intelligently put forth and explained to Congress?—A. There is no doubt of that.

NECESSARY TO GET TOGETHER A GREAT MANY FACTS.

Q. It was necessary for you to get together a great many facts and figures, which required considerable patient research?—A. There is no doubt of that.

Q. How many persons do you suppose have been in the employ of the company during that time engaged in this harvesting of useful knowledge?—A. It is difficult to tell. Every day brought its work and we got persons to attend to it, and they attended to it.

Q. Who selected the persons who were to do this work?—A. General Franchot was in Washington for a number of years; and then Mr. Sherrill—very wise and very good men, both of them.

Q. Had they all the requisite knowledge of the qualifications of different persons, which necessarily implied a close acquaintance with the affairs of the Central Pacific Company—had these gentlemen sufficient personal knowledge to make that selection without assistance from you?—A. Well, I have spent a good many evenings with both of them, explaining to them what needed to be done.

SELECTION OF PERSONS TO GATHER INFORMATION.

Q. In these conversations on the general subject in which you were interested, which I presume was a matter of discussion between yourself and Mr. Franchot and Mr. Sherrill, you say these gentlemen, and not yourself, selected the persons to whom the duties of gathering together the required information were assigned?—A. It would be difficult to say just how far I did advise. I would give them an idea of what I thought would be useful to them in attending to the affairs that they were looking after.

Q. Did you ultimately become acquainted with, or aware of the names of, all the persons who were engaged in this work?—A. Oh, no.

Q. Did you become acquainted with the names of many such persons?—A. Well, more or less so, but I do not recall names at the moment.

CLASS OF PERSONS SELECTED.

Q. What class of persons was generally selected? Were they persons who had official connection with the Central Pacific Company or outsiders?—A. I think the honorable Commissioner could answer that himself; he must know that we should get suitable men to do the work that we had to do. We wanted to inform every member that had a vote in regard to what we wanted, and that it was useful to the public and was proper and right to do.

Commissioner ANDERSON. My question is as to whether the class of persons so employed consisted mainly of persons who had no official connection with the Central Pacific Company, or whether this class consisted of some of the officers of or persons in connection with the company itself?

The WITNESS. Many outside persons, no doubt.

PERSONS SO EMPLOYED ENGAGED FOR A SINGLE SESSION.

Q. Did the persons so employed generally remain in the discharge of these duties during several sessions, or only a single session?—A. I should think not for more than one session as a rule. There are a great many new members of Congress coming in at each session, and almost every man has some one constituent that can sit down and talk to him and explain matters, when I could not do it, and when perhaps General Franchot could not.

Q. Then one of the qualifications which you looked for in the persons selected by General Franchot and Mr. Sherrill was the qualification of

being able to talk successfully to the new members of Congress as they appeared?—A. That would naturally be so; and, therefore, I suppose it was so.

RELATIONS OF SUCH PERSONS TO MEMBERS OF CONGRESS.

Q. Do you not remember, as matter of fact, that it frequently occurred, in discussing the qualifications of persons whom it was proposed to employ, that the relations of such persons to members of Congress were the subject of discussion?—A. Without remembering the facts in the case, the subject itself would almost convince me that it was so; that if you wanted to go and explain to a member of Congress, you would want an able man and some one that he could talk to, and whom he would allow to talk to him.

Q. Is it usual for members of Congress to make any special difficulty about allowing intelligent citizens to talk to them?—A. Well, I have had men refuse to talk to me.

CHARACTERISTICS OF PERSONS CHOSEN FOR SUCH SERVICE.

Q. What form of inducement, then, in your discussion with Mr. Franchot or Mr. Sherrill would suggest itself as being likely to loosen the tongue of the member of Congress?—A. Without remembering what I did say, I should naturally say, "I cannot talk to him; he is a clever fellow, a little thin skinned, afraid, and we want some man that can sit down and explain to him. All he wants is to know that it is right. Now you want some constituent of his—his best man, if you will—to explain to him that this thing is in the public interest." I could not do it myself and probably Mr. Franchot could not do it. Intelligence on the part of the person and the fact that he had some acquaintance with a member of Congress, such as would arise from being one of his constituents or having been in more or less intimate relation with him, would be a circumstance that would commend a person having such qualifications to me, as showing that he would be a proper man to select, a wise and good man, to go and talk to his member of Congress. I would suppose that any man would be willing to go and talk to a friend about something that was not wrong, when he would not do it to every man he met on the street.

Q. In regard to the range of discussion that was to be permitted between the members of Congress and the apostles that you sent to them, was that generally confided to Mr. Franchot and Mr. Sherrill, or did you take a hand in that?—A. Probably it was done more or less by General Franchot, Mr. Sherrill, and myself.

Q. As a matter of fact, did they, from time to time, consult with you?—A. They did.

FUNDS USED IN EXPLAINING MATTERS TO CONGRESS.

Q. Do I understand the testimony heretofore given by you correctly—that the larger portion of the funds which appear on the vouchers over your signature were applied to legal expenses and expended through payments made by you through Mr. Franchot, Mr. Sherrill, and other such parties, for the purpose of explaining these matters to Congress in the way you have detailed to-day?—A. I would not be prepared to say that the majority was. We had many things to do. We had a great many things in the Departments to attend to. We have now hundreds of thousands of acres of land that we are trying to get patents for.

Q. Without limiting you to members of Congress, my question is whether the unexplained vouchers were for expenditures, the majority of which were incurred for purposes such as you have detailed this morning or kindred purposes in other Departments?—A. I could not divide and subdivide them at this distance of time from other transactions; but I have no doubt that they were paid out for legal and proper legitimate purposes, such as would be sanctioned by the strictest rules of morality.

TO PREVENT CONGRESS AND THE DEPARTMENTS FROM COMMITTING ROBBERY.

Q. But what I want to get at particularly is that no portion of these moneys was to be considered as covered by the ordinary expenditures of a railroad for purchases of property or materials. Those would be specific vouchers. So that as to all the unexplained vouchers we may assume that they were for moneys expended for imparting information to Congress or to the Departments, or for some purpose of that character?—A. That I cannot say. Most of the money was expended no doubt to prevent Congress and the Departments from robbing us of our property.

PRIVILEGES OF COUNSEL.

Commissioner ANDERSON (observing Mr. Cohen conferring with the witness). Mr. Cohen, we think this witness is abundantly able to take care of himself.

Mr. COHEN. It is my privilege to call his attention to anything that occurs to me.

Commissioner ANDERSON. It is your privilege to make objections.

Mr. COHEN. We do not think that that is all.

Commissioner ANDERSON. I beg that there may be no conferring. If you desire to make any objections to questions we shall be glad to have you do so.

Mr. COHEN. I propose to call the attention of the witness to matters connected with the history of this company.

The WITNESS. Mr. Cohen has called my attention to the fact that there were large vouchers for rails and locomotives, and large sums paid, for which Mr. Colton had vouchers.

Commissioner ANDERSON. I have no objection after I get through to Mr. Cohen's correcting and explaining anything he chooses.

Mr. COHEN. You have stated that to me ever since you commenced taking testimony, several weeks since, but when you get through you never give me a chance to examine a witness.

Commissioner ANDERSON. I do not agree with you in your statement of what happened, but you shall have an opportunity.

Mr. COHEN. I called Mr. Huntington's attention to something that he had forgotten.

Commissioner ANDERSON. I object to it, while the witness is being examined.

ZEALOUS IN TAKING CARE OF PROPERTY.

Q. Is there any special session of Congress that impresses itself vividly on your mind as having occasioned an unusual amount of work of the character to which you refer?—A. I do not remember any special session. We have been very zealous in taking care of our property ever since we commenced work.

Commissioner ANDERSON. I refer particularly to the contest at the time that Thomas A. Scott sought to obtain right of way and the first right of occupancy in connection with the Texas Pacific and Southern California.

The WITNESS. No; I do not think there is anything special; that is to say, anything that was very expensive. It did not need so many explanations. Mr. Scott wanted, in the first place, $100,000,000 to build that road, and I used to go up myself before the committee and say that we would build it without any aid as fast as he could build it, and that the public should not find fault with the rates of fares and freights, and that generally put a quietus on the subsidy proposition. A further argument was that the Government had extended aid to one road and expected to get its money back, and that it should not help Scott to destroy the security it had.

Q. As a matter of fact, did not Mr. Scott make great efforts to get bills through Congress to assist his enterprise?—A. He did.

CONTENDING FOR TWO YEARS AGAINST SCOTT'S BILLS.

Q. And, as a matter of fact, were you not for two years contending against that legislation with all the vigor of which you were capable?—A. Yes. I used to telegraph my people every day to push the work on; that that was the way to kill Mr. Scott's project.

Q. Did you not also write many letters on that subject in describing the arduous nature of your labors?—A. I should think so.

Q. Is it not true that at that time General Franchot had a number of persons in his employ for the purpose of furthering the interest of the Central Pacific and defending them?—A. As I remember, he had quite a good many.

Q. Can you give us the names of any of those persons in connection with the Scott legislation, or attempted legislation?—A. I do not think of any at the moment except Mr. Sherrill; he was with Mr. Franchot.

Commissioner ANDERSON. But you have stated that there were quite a good many.

The WITNESS. There were; I have no doubt of it, but I do not for the moment recall any names.

Q. When you say "quite a good many" do you mean forty or fifty persons?—A. I do not know how many, but I should say a good many.

Q. Do you remember whether you saw any of them, personally yourself?—A. No; I do not, and still I should have been very likely to see them. I used to go over occasionally. Mr. John Boyd has been in our interest for a long time, and another gentleman was Mr. Beard.

Q. During what years did this business relating to Mr. Scott's interest continue?—A. I cannot give the years. It ran along for two or three years, I should think; somewhere in the seventies, probably.

Q. Was it not in 1876 and 1877?—A. Probably.

THE COLTON LETTERS.

Q. To what persons connected with the road was your correspondence which related to this Washington business mostly addressed?—A. I should think to D. D. Colton.

Q. Do you keep letter-press copies of your letters?—A. Sometimes I do and sometimes not. I am very careless about such things.

Q. You are personally quite familiar with the Colton letters, I presume, having had occasion to see them in the course of some litigations?—

A. Letters that I wrote I should be very apt to be familiar with. The newspapers have been publishing letters purporting to be mine ever since they were lost or stolen.

Q. Why do you think they were stolen?—A. Because they were in the safe in the office where they belonged (so my people told me) on Saturday, and on Monday they were gone. I do not know that they were stolen, but those were the facts. I call it "stealing" them.

Q. Were they written to Mr. Colton personally, or to the company?—A. They were written to him as a director. The party that took them away certainly had no business with them. They were taken away after Mr. Colton's death.

Q. Are they not in possession of Mr. Colton's administratrix, Mrs. Colton, to-day?—A. I do not know. Some parties came to me to sell me those letters.

Q. They had no market value for you, I suppose?—A. I told the parties that I had written them, and if they wanted to sell them they had better sell them to somebody who had not seen them.

NOTHING WRONG ABOUT THE ORIGINALS UNLESS IT WAS THE GRAMMAR AND SPELLING.

Q. Then you do know what was in them?—A. I do not know what was in those letters. There was nothing wrong in the original letters unless it was the grammar and the spelling. [Laughter.]

Q. Please look at the letter I now show you, at page 1705 of the Colton record, and state whether you recognize that letter?—A. I do not recognize that letter; but still I might have written it. It says that Mr. Scott had a short-hand writer and I had not. I do not remember ever having written any such thing.

Q. Read to the end of the letter and state whether, according to your best recollection, that letter was written by you or not? The letter begins on page 1705. The matter on page 1706 is what I desire you especially to read.—A. (After looking at the letter.) I do not recollect that. There are a good many things in here that do not seem to be like me, and some that do.

Q. Are there not references made there that nobody could have made except yourself?—A. I should think any could.

THE COLTON SUIT.

Q. Do you remember the fact of the bringing of the Colton suit?—A. Yes.

Q. Were you in California during a portion of the time?—A. I think not; and still I might have been. It spun out a long time.

Q. Were you aware of the fact that a number of letters purporting to have been written by you to Mr. Colton were put in evidence in that case?—A. I do not know, but I suppose they were.

Q. You heard it. Did you see the record?—A. No; I do not think I saw the record. They sent me over a lot of reading matter, but I treated that as I usually do such matters. I do not usually read such matter unless I can be benefited by it.

Q. Did you never, before to-day, see a copy of the volume I have just placed in your hands?—A. I never saw a copy of that book before.

NEVER READ THE LETTERS SINCE HE WROTE THEM.

Q. And you never saw the letter I have shown you, in the form I have presented it to you?—A. I have never read any of the letters since I

wrote them. Those that I wrote of course I read when I wrote them—at least, something akin to reading them; but I have never read them since, I think.

Q. What is your best judgment—did you write the letters, a copy of which I have shown you, or did you not?—A. Well, I would not want to say. I should say I was in great doubt.

Q. You think the balance is so exactly even that you can not tell us whether you did or did not write it, but, upon the whole, you think you wrote it?—A. I have no further answer to make to that question than that which I have just given.

Q. Which would displease you most, if you had to swear—to swear that you did write it or to swear that you did not?—A. I must answer that as I have answered your last question.

FELT LIKE APOLOGIZING TO THE HOG.

Q. If you are entirely neutral on the question whether you wrote this letter or not, let me ask you whether it would not be impossible for you ever to have written such a sentence as this, and whether you do not know that such a thing was impossible to you—that you could not have done it and that you had not done it? I will read this sentence:

All the members in the House from California are doing first-rate except ——, and he is a damned hog any way you can fix him.

Did you ever write such a sentence as that to anybody?—A. Well, I should think that I did. I wrote about one fellow, and I have never passed a hog since that I have not felt as though I wanted to go on the other side of the way, as I had abused him. But I do not think that that was the language that I used, and I do not think that is a copy of the letter.

Q. But you do think that you used that language?—A. No; I do not think that I said that. I do not think that I used the word "damned."

Q. But I understand you to say you used such language about somebody?—A. I think in my letters I said that such a fellow was a "wild" hog; I do not think I ever used a word so angular as "damned."

WOULD RATHER NOT ANSWER.

Q. Will you tell us to whom that letter refers, whether the word be "wild" or "damned"?—A. Well, I should rather not.

Commissioner ANDERSON. If you object to answer, that presents another question; if you do not object to answer, we respectfully ask for the answer.

The WITNESS. I should rather not answer.

Commissioner ANDERSON (addressing Mr. Cohen). Are we to understand this as a claim of privilege?

Mr. COHEN. You are conducting this examination and I do not like to interfere with a gentleman of your great experience.

Commissioner ANDERSON (to the witness). Mr. Huntington, we would like to be informed as to whether you put your refusal to answer on the ground taken by the United States circuit court or not, so that we may conduct ourselves accordingly. If you simply say you do not want to answer because it is unpleasant, that is one thing. If you say you do not want to answer because you claim that we have no right to insist on an answer, that is another. Will you not inform us which ground you take?

The WITNESS. I guess I will put it on the latter ground.

Commissioner ANDERSON. The witness objects to answer and states, as his ground, that the Commission has no legal right to insist on an answer.

Mr. COHEN (addressing the witness). You have got it wrong. You mean to say "the former ground."

The WITNESS. I will put it on the former ground; yes.

The CHAIRMAN. We had better put the question direct, and let the witness say yes or no.

Commissioner ANDERSON. We would rather have the witness say on what ground he declines to answer.

ON THE GROUND THAT IT IS UNPLEASANT TO ANSWER.

The WITNESS. I would rather decline to answer on the ground that it is unpleasant.

The CHAIRMAN. You may make any explanation you please.

The WITNESS. The party to whom I suppose it refers lives in San Francisco, and I do not want to say anything that would be unpleasant to him. There is nothing that we are going to make or lose by it.

Commissioner ANDERSON. I will read another sentence from this letter and see whether you remember writing such a sentence or not:

Scott is working mostly among the commercial men. He switched Senator ——, of ——, and ——, of ——, this week, but you know they can be switched back, with proper arguments, when they are wanted.

Do you recollect ever writing such a sentence as that to any one?—A. No; I do not.

Q. Will you swear you never wrote such a sentence to Mr. Colton?—A. It is ten or twelve years ago, and I would not say that I did not write it, because, frequently, a member of Congress would say he would go for the bill, and then he would see Mr. Scott. Men I knew at the time would say they would vote for the bill, but I was satisfied that when I would sit down with them I could show them that it would cost the Government $100,000,000, and that I could switch them back.

MEANING OF THE WORD "SWITCH."

Q. I refer particularly to the use of the word "switch," which hardly anybody but a railroad man would use to a member of Congress. Do you recollect that that has occurred in your correspondence?—A. I do not.

Q. I think you have just now used that word in describing the operation?—A. Well, it is a good word.

Q. What would be the meaning of the word "switched"?—A. Changed.

Q. Changed, simply?—A. That is the proper meaning of the word, I believe—to change from one track to another by a switch. That is a railroad expression.

Q. But you could not use an iron switch on a Senator. What kind of a switch would you refer to as being used in order to change him?—A. In that case I should very likely have told him that we would build the road as quickly as Scott would, and would not ask for any aid. Scott in his first bill asked for something like $100,000,000 of Government aid. I think that I could explain to any man with whom I could sit down and talk that it was not a good thing to do. I think I could switch almost any fair man from that proposition.

MEANING OF THE PHRASE "COMMERCIAL MEN."

Q. Do you think that you used, in any of your correspondence, this expression: "Scott is working among the commercial men"? Do you recollect such a phrase as that?—A. I do not remember it, but he got resolutions passed by boards of trade and chambers of commerce, and by commercial and political conventions generally.

Q. If you used that expression, that is the sense in which you referred to these persons as "commercial men"?—A. Yes.

Q. You do not think that you intended, if you ever used that expression, to refer to persons who represented that they could control votes in Congress?—A. That is what I hired men to go to Washington for—to influence members of Congress by giving them good and solid reasons to show that what I wanted done was in the interest of the people.

Q. I will now ask you to look at a letter, beginning at page 1703 of the Colton record, dated January 17, 1876, and see whether you remember writing that letter, or a similar letter, to Mr. Colton. It is at the foot of the page.—A. (After examining the letter.) I do not remember having written it.

AS TO ORDERS FOR ENGINES.

Q. There is an allusion in the paper I have shown you to a Mr. Towne, as sending you an order for engines. There was a Mr. Towne, at that time (1876), connected with the Central Pacific, was there not?—A. Yes; he was general manager.

Q. Did you at any time receive an order from him for engines?—A. I do not recollect receiving the order for them, but I was getting orders from him very frequently.

Q. Can you explain how any letters purporting to contain your signature could contain references of this kind to Mr. Towne, except on the theory that it was a letter of your own?—A. I can not; except that if anybody was going to write a letter of course he would put some truth in it. He would not make it all lies, because it would not be to his interest.

DOUBTS HAVING WRITTEN THE LETTER.

Q. Do you believe you wrote that letter which I have shown you, or not?—A. I should have doubts about having written it. I do not remember anything in it.

Commissioner ANDERSON. I will read the last clause and ask you the question whether you wrote it or not. The last clause is: "I believe with $200,000 I can pass our bill, but I take it that it is not worth that much to us." Did you ever write that sentence to Mr. Colton?

The WITNESS. I should say not.

Q. You deny, under oath, that you ever wrote that sentence?—A. I would not say positively, but I would say it is my best recollection and belief that that portion of it was made up.

Q. You do not remember it now?—A. I do not remember it. I do not know any reason why I should have written it. I can see how the Government could have paid five times that to have got that road built.

WITNESS HAS AN IMPRESSION THAT THE COLTON LETTERS ARE MUCH GARBLED.

Commissioner ANDERSON. The real question is whether you did write this or not. These letters, as you are doubtless aware, are letters pur-

porting to have been written by you to Mr. Colton, and were put in evidence in the Colton suit.

The WITNESS. My impression is that they are very much garbled, that there are certain things in all of them probably that I did write and that very much in them is false.

Q. Has that always been your impression—that these letters are garbled?—A. I never saw those before.

Q. Is it this morning that you first formed that impression?—A. I have never seen those letters before.

Q. Have you never thought they were garbled before?—A. I did not think anything about it.

Q. Have you never had interest enough to examine them to see all that was written?—A. I do not remember anything about them, because, although I do not remember all that I have said, there are certain rules that have governed my life which allowed me to do some things and not to do others.

WILLING TO HAVE PUBLISHED ANYTHING HE EVER PUT IN A LETTER.

Q. I think your statement was that you had never put anything in a letter that you would not be willing to have published before the whole world. I wish to ask whether, if you did put in that letter the words "I believe, with $200,000, I can pass our bill," it is your best judgment that you would be willing to have that published to the world as your statement?—A. Certainly, I would; with $200,000 I could get a man from almost every Congressional district in the United States to go to Washington and show his member of Congress that a Southern Pacific road would protect our border, which, with all our Army, we had never been able to do, and that without any cost to the Government. General Sherman himself told me that by means of 2,000 men with that road he would rather agree to protect our border than with 50,000 men without the road.

Commissioner ANDERSON. I will read you the preceding sentence in connection with this proposed expenditure of $200,000, in order that you may see whether that was the sense in which the words were used, if you did use them:

It cost money to fix things so that I would know his bill would not pass.

The WITNESS. Of course, that is right in the direction I have spoken of.

WHAT WAS MEANT BY THE WORD "FIX."

Q. Will you tell me what is meant by the word "fix," as you there understand it?—A. To go and fix a man by convincing him that it was right. I understand the Connecticut dialect very well, and I used the word that expressed my idea. That is just what I meant. I would, with $200,000, fix things. That is, I would plan so that the Government would make millions out of it, and that we would be benefited by it.

Q. Always assuming that if there is a sentence in the letter of August 29, which sentence you do not admit to be yours, you have a right to reject it, let me ask whether, when you allude to what Mr. Scott is doing on his side, you refer to this same class of work—that is to say, to argument and answering legitimate inquiries and supplying information of the character to which you refer—as the class of work you intended to do or might have done with the $200,000? I refer you again to this sentence: "Scott is working mostly among the commercial men." Would

that, in your judgment (if used in that sentence), refer to work of that same character?—A. I should suppose so.

16⅔ PER CENT. OF THE APOSTLES "SHORT WEIGHT."

Q. I understand you as declaring under oath that that expression, if used by you, did not mean among men whose votes were purchasable?—A. Certainly not. It would be very strange, however, if out of three or four hundred men there was not more than one that was unworthy. Eighteen hundred years ago the best man that ever lived selected twelve men, and 16⅔ per cent. of them were "short weight." [Laughter.]

Commissioner ANDERSON. But this sentence does not refer to any work you were doing, but refers to what Mr. Scott is doing.

The WITNESS. I did not suppose by that that he was going to buy votes, but that he was going to bring certain influences to bear to pass his bill if he could. He was asking the Government for a large sum of money, but we did not ask for anything.

DOES NOT SUPPOSE MR. SCOTT EVER BOUGHT A VOTE.

Q. Then you did not, during the course of all this work, ever believe or suspect that Mr. Scott used any unworthy methods of obtaining votes?—A. I do not suppose that he ever bought a vote. He might get friends (I would not say it was unworthily) by passes. He had railroads running all over the country. He might do that without ever mentioning a vote. He might, by doing a man a favor, get a return favor, thinking, of course, that it was in the public interest.

Q. I will ask you to look at this same record, at the letter, on pages 1710 and 1711 (No. 128), and see if you remember writing that letter.—A. (After examining the letter.) I do not remember having written that letter. There are some things in there that I should say I would have been very likely to write, others I have no recollection of ever having written.

Q. Well, is it your best impression, after reading that copy, that you wrote that letter?—A. My impression is that there are some things in there that I probably wrote, and some things that I did not.

"THE R. R. COMMITTEE OF THE HOUSE WAS SET UP FOR SCOTT."

Commissioner ANDERSON. I will read the letter and beg you to correct me when I read portions that you reject.

NEW YORK, *March* 4, 1876.

FRIEND COLTON: Yours of February 24th, No. 142, is received. I have been in Washington most of the time since Congress met, and you say truly when you write that you think I have had a rough fight there this winter. The R. R. Com. of the House was set up for Scott, and it has been a very difficult matter to switch a majority of the committee away from him, but I think it has been done; but Scott is very able, and then he promises everything to everybody, which helps him for the day, and in this fight, and just what he may yet do I cannot say. There is to be some legislation for the Texas and P. or the S. P. before the 44th Congress goes out, and as Scott promises so much, and has such a fearfully long list of creditors to help him, that I have my fears that he will be able to pass his bill next winter, if matters are then as they are to-day. And I think it of so much importance that he is not allowed to build a road parallel to ours with Government aid that I shall endeavor to get our bill passed through the Senate this winter if possible (and the House, too). If we only get it through the Senate, and could then get built some road in Arizona before Congress comes together next winter, I think there would be but little doubt we would win the fight. What do all you think of it? I am doing all I can to demoralise Scott in Texas. He has got to have legislation in that State to extend time on his land grant or else it is lost to him.

The Southern Pacific bonds have been admitted to the stock board here. It was a hard thing to do, as they have a rule that no bonds shall be admitted except on completed roads. I think there is an even chance of selling some of the bonds this spring. It is such a large loan that we must be very careful in launching it, as its final success depends very much on the way the loan is put onto the market.

Yours, truly,

C. P. HUNTINGTON.

P. S.—Those memorandums giving progress of the work on S. P. are very interesting to me. H.

DOES NOT REMEMBER WRITING THE LETTER.

Q. Now, as a matter of fact do you not remember writing in regard to those Southern Pacific bonds?—A. No; I do not. If I had written such a letter, it would naturally have been to Mr. Hopkins. When I wrote on financial matters it was generally to Mr. Hopkins.

Q. What portion of the letter I have read to you do you reject, or what portion does your memory discard?—A. There are some ideas in the letter that may be mine; but I do not remember such a letter.

Q. Do you think that this was one of your ideas—that the Railroad Committee of the House was set up for Mr. Scott?—A. Well, he had a great many friends. I do not mean by that that it was set up wickedly, but that he got his friends into it.

Q. Was it a special committee?—A. The Railroad Committee was a standing committee.

Q. It was the general railroad committee?—A. Yes.

Q. Had there been any changes made in that committee during that winter while the legislation was pending?—A. I should think probably not. It was not usual to make changes.

WHAT "SET UP" REFERRED TO.

Q. Whatever would have been referred to by these words "set up" would be something that you would refer to as being done by the Speaker at the beginning of the session?—A. Yes; certain influences that were brought to bear—all correct in their way, but, instead of having a man from California or a man from the extreme South, having a man from Philadelphia or a man from that section—what I call a man of that "geography"—that is to say, a man whose geography was in favor of the Texas Pacific road.

Q. As to the next sentence, I will ask you whether your memory rejects that, as a part of your work or not. I call your attention to that because it contains this somewhat peculiar word "switch." "It has been a very difficult matter to switch a majority of the committee away from him, but I think it has been done."—A. My company's work there was with the committee, to show them the great wrong there would be in giving this large subsidy in money when a good responsible company would build the road without any money. It was very hard work, particularly when it was against their "geography," as I may say. I do not suppose any honest man (and I certainly think this Commission is honest) would think that anybody was bought with money. In Congress they have sometimes, I believe, 5,000 bills to look after, and the members cannot expect to analyze every bill. Parties interested in a particular bill have to go and explain it to the members, and it is very hard work; it takes a good many men a good many hours.

NO PERSONAL OBJECTION TO THE PRODUCTION OF LETTERS.

Q. I understood you to say a few moments since that you had no objection whatsoever to the production and publication of any letters which

you had written.—A. I have no personal objection. It seems that these letters have disturbed this Commission. Politicians are very thin-skinned, and there are always people who want to make the better appear the worse.

Commissioner ANDERSON. I like to have things explained.

LIGHT-WEIGHT POLITICIANS CRYING FROM THE HOUSE TOPS.

The WITNESS. I would be very glad to explain, and I will do so as far as I can. I will explain, if you like, what the difference is between having the Central Pacific road built so that a whole army can be transported comfortably across the continent in six days, and the condition of things before the road was built, when you could trace the line by the bleaching bones of the cattle that died for want of food and from drinking poisoned waters, and by the graves of murdered emigrants all the way from the Missouri River to the Sacramento. You could follow the whole line by those marks, and you could not get out of sight of a carcass. We went to work and built the road, and the Government said it would give us so much if we built it. We complied in every particular with the contract, and because some light-weight, narrow-minded politician thought he could make something by maligning us, he went upon the house-tops and cried aloud. I would like to explain many things to this people, and I hope to live long enough to do it. I spent twenty-five of the best years of my life in building this road across the high, dry, arid plains of the continent, and am abused for it by a portion of the press and by light-weight politicians who known little and care less about what we have done for the country.

AS TO THE INJUNCTION RESTRAINING PRODUCTION OF THE COLTON LETTERS.

Q. As far as these letters are concerned I return to the proposition. Did you say you had no objection to their production for the purposes of explanation? I would like to know whether you directed the issue of an injunction in San Francisco when the counsel for Mrs. Colton was about to place these letters in the hands of the Commission?—A. My attorneys there did what they thought was best. I think I did not know anything about it at that time.

Mr. COHEN. We accept all responsibility for that.

Commissioner ANDERSON. I am only asking my question. I want to know whether you knew anything about it or were consulted about it.

The WITNESS. My attorneys have authority to do what in their judgment they think proper to do. I do not think I knew anything about that specially.

Q. You did not know anything about it at the time?—A. I did not know of it at the time, but as I say they had power to do it.

AS TO CORRECTNESS OF PRINTED COPIES.

Commissioner ANDERSON. The position we are in is this: We are forced to ask you as to these letters from this printed book, because we cannot lay the original paper before you, your attorney in San Francisco having prevented Mr. Hayes by injunction from placing the Colton letters in our hands. Now, to make the examination brief, I will ask you, either now or at your leisure, as you desire, to examine the letters printed in the Colton case, purporting to have been written by yourself

to Mr. Colton, and to state whether it is your best impression that these printed copies are correct copies or not.

The WITNESS. Unless it is specially necessary I will say to the Commission that I work many hours a day, and I do not care anything about reading these letters. I have never read them, as I say, and never should read them unless there were a necessity that I should.

Commissioner ANDERSON. If you do not desire to read them——

The WITNESS (interposing). I do not want to read them. I do not care anything about them.

Commissioner ANDERSON. If you do not care to read them I will read them to you and ask you some questions. It will only take more time to discuss the matter. If you are satisfied, or your counsel is satisfied that these printed letters are correct copies it will save a whole day's examination.

COULD NOT SAY THEY ARE CORRECT.

The WITNESS. I am not, and therefore, if it should save a whole month's examination, I could not say they were correct.

Commissioner ANDERSON. It is a printed case, and doubtless your counsel has examined it.

Mr. COHEN. I would suggest that you go on with some other part of the examination, and I will think it over and talk to Mr. Huntington about it during the recess. You can take the letters up after recess.

Commissioner ANDERSON. That is satisfactory. You know perfectly well what the facts are, as to whether these are correct or not.

The WITNESS. I have some matters to attend to at the recess and I can not read them then.

Commissioner ANDERSON. If you say you merely want to discuss what is right to do—whether to object to their being read at all, or if you say that you are satisfied that they are correct copies, it would save time.

Mr. COHEN. I thought it would save time.

Commissioner ANDERSON. It may. And if you say you want to have time for that purpose I will ask the chairman to allow that course to be taken.

Mr. COHEN. I think I would like to talk to the witness a little about them. I have not had any consultation with Mr. Huntington at all. He has just got back from Europe, and I have just come from California.

Commissioner ANDERSON. It will take a whole day to read them, and if Mr. Cohen will, in good faith, endeavor to save us the time it would be desirable.

Mr. COHEN. What is that last remark, "in good faith"?

Commissioner ANDERSON. Yes; it will take a whole day to read them, and if you really mean to save us time, that course would be very acceptable.

Mr. COHEN. We do not want to waste any time about it. We want to get through with it to-day; and I will talk with Mr. Huntington about it at recess.

Commissioner ANDERSON. We shall probably have twenty letters to examine him on after they are all conceded to be correct. I do not know but that we had better go ahead and read them.

The CHAIRMAN. I think I would go ahead with the examination.

HUNTINGTON TO CROCKER.

Commissioner ANDERSON. I will read a letter purporting to have been written by you to Mr. Crocker, and which will be found at page 1604 of the printed record in the Colton case:

NEW YORK, *November 20th*, 1874.

FRIEND CROCKER: Herewith I send copy of bill that Tom Scott proposes to put through Congress this winter. Now, I wish you would at once get as many of the associates together as you can and let me then know what you want. Scott sent me three copies, fixed as he wants them, and asked me to help him pass them through Congress, and if I would not do it as he has fixed it, then he asked me to fix it so that I will, or in a way that I will support it. Now, do attend to this at once, and in the meantime I will fix it here, and then see how near we are together when yours gets here. Scott is prepared to pay, or promises to pay, a large amount of money to pass his bill, but I do not think he can pass it, although I think this coming session of Congress will be composed of the hungriest set of men that ever got together and that the d—— only knows what they will do. But as Scott's bill proposes to give the A. and P. land grant (the west end of it), I am not sure that it would not be as well to let the bill stand in that way, we stopping the Texas Pacific at the Colorado River. If we ask to come this side of the Colorado, it will be hard to stop the Texas P. from going west of it. I think the Texas P. or some of their friends will be likely to take the ground that the S. P. is controlled by the same parties that control the Central, and that there must be two separate corporations that run roads into S. F., and it will be very hard for us to make head against that argument, and I am disposed to think that Colton had better come over and spend a few weeks, at least, in Washington. Would it not be well for you to send some party down to Arizona to get a bill to build in the Territorial legislature, granting the right to build a R. R. east from the Colorado River (leaving the river near Fort Mohave), have the franchise free from taxation, or its property, and so that the rates of fares and freight can not be interfered with until the dividends on the common stock shall exceed 10 per cent. I think that would be about as good as a land grant. It would not do to have it known that we had any interest in it, for the reason that it would cost us much more money to get such a bill through if it was known that it was for us. And then Scott would fight it if he thought we had anything to do with it. If such a bill was passed I think there could at least be got from Congress a wide strip for right of way, machine shops, &c.

Yours truly,

C. P. HUNTINGTON.

I have read you a letter purporting to have been written by you to Mr. Crocker, on the 20th of November, 1874. What is your best recollection as to whether you wrote that letters?

PROTEST AGAINST MODE OF QUESTIONING.

Mr. COHEN. I desire, on behalf of the Central Pacific Railroad Company, to offer a protest against this mode of questioning. There is nothing whatever to identify the paper which the Commissioner has read as being a copy of any letter or document extant. It is not proved and not competent to be used in evidence. It is contrary to the elementary principles of the law of evidence. For that reason I object to any questions being predicated on it or being answered.

Commissioner ANDERSON. The objection is entered.

Mr. COHEN. For the reasons I have stated I advise the witness not to answer the question.

Commissioner ANDERSON. The witness will do as he pleases. He is evidently a law unto himself. He has got a very good adviser, too.

NO RECOLLECTION OF HAVING WRITTEN THE LETTER.

The WITNESS. I have no recollection of ever having written that letter. There are a good many things in there that I do not think I did write. There are some things there that I might or might not have written, because they were things that did occur.

Mr. COHEN (addressing the witness). It is a matter of choice with you whether you will answer the question or not. It is a question which a court, being governed by the rules of evidence, would not permit to be asked of a witness. You are not bound to answer.

Commissioner ANDERSON. This witness understands his business.

The WITNESS. There are certain things there which are not like me, and I do not believe that I wrote them. Some I might have written, or might not.

Q. I will read you this sentence. I desire to know whether it is written by you or not:

Scott is prepared to pay, or promises to pay, a large amount of money to pass this bill, but I do not think he can pass it, although I think this coming session of Congress will be composed of the hungriest set of men that ever got together, and that the d— only knows what they will do.

THAT CONGRESS NOT THE HUNGRIEST CROWD HE EVER SAW.

Did you or not write that sentence?—A. I do not think I wrote that I have seen a good many hungry crowds. I do not think that that Congress was really the hungriest crowd I ever saw. Therefore I do not think I wrote that.

Q. Is it because you do not think that that was a just criticism on that particular Congress, or do you mean to be understood as swearing that you never could have used an expression of that kind in the letter.—A. According to my rule of life I should say that I did not. I am pretty sure that I never wrote such a sentence in a letter. It would not be like me.

PERSONALLY WOULD NOT OBJECT TO PRODUCTION OF ORIGINAL LETTER.

Q. Have you any objection, Mr. Huntington, for the purposes of this examination, and in order to set the question at rest, to direct a discontinuance of the suit which prevents the production of the original letters?—A. There are other parties interested with me. As far as I am personally concerned, I would not object. My associates are interested in this matter, and I should have to consult them. At present I should simply refer the matter to my counsel.

Commissioner ANDERSON. We are prepared to send and have the letter produced and abide by its sentiments, after a personal verification by you as to the genuineness of the handwriting. Have you or have you not any objection to that course being pursued?—A. I have already answered that question.

Q. Will you consult your associates and let us know the result?—A. My counsel can do as he chooses.

Commissioner ANDERSON. It is perhaps of some importance to you whether or not you wrote the particular sentence that I have been reading.

The WITNESS. I do not know whether it is or not.

A LETTER RELATING TO COAL.

Commissioner ANDERSON. I will read you a letter dated November 13, 1874, to Mr. Colton, pages 1608, 1609 and 1610, of the Colton record.

NEW YORK, *November* 13*th*, 1874.

FRIEND COLTON: Your letters of the 1st and 3rd inst. are received. It would seem as if you had acted wisely in what you have done in the way of informing yourselves of the value of the coal which you bought at Coos Bay. I do hope that you will

find coal on the lines of some of our roads. But on or off the rail, I hope the fuel question will be sharply looked after until you are satisfied that the minimum of the cost has been reached. I think I will talk with Gould in relation to coal, as you suggest, but I am not certain as I shall, for if we should ever get control of the U. P. I want to be as little mixed up with Gould as possible, as he is so much of a speculator that it is very difficult to tell just where his interest is, or whether he is working to put stock up or put it down. If you could get the title to what coal land you want at Evanston at a fair rate, and a fair rate for transporting it on the U. P., I should much rather prefer not having anything to do with any of them in this coal matter; as I should expect, if we did, that they would work the stock up and then sell it out; then raise the d—— in some way by having the U. P. break its contract with the coal company so as to put the price down, or what they would be as likely to do, start a new Co. I know very little of the details of this coal matter, and nothing, as you may say, of the question of title, and it would seem to me to be important enough for you to come and attend to the case in Washington, but of that you will know best. If you want me to do anything about it write me fully and I will do what I can.

Yours, truly,

C. P. HUNTINGTON.

Do you remember writing a letter of that character to Mr. Colton, in regard to this coal?

WHAT IS "THE OBJECT OF RAKING UP THESE OLD PERSONAL MATTERS."

The WITNESS. I do not. I never had any idea of getting control of the Union Pacific. If it is not asking too much of the Commission I would ask the object of raking up these old personal matters.

Mr. COHEN. To control the next election.

Commissioner ANDERSON. We are directed by Congress to ask the questions, under the act.

The WITNESS. If it is for political purposes, of course, I have nothing to say; but really, for other purposes, is it of any moral or business interest to the country?

NOT FOR POLITICAL PURPOSES.

Commissioner ANDERSON. I will answer your question. It is not for political purposes. It is to ascertain whether you used money to influence legislation. That is why these letters are read.

The WITNESS. Is there anything in that letter that shows anything of that kind?

Commissioner ANDERSON. No; not in this particular letter.

The WITNESS. Then, as to that particular letter, I would ask the Commission of what use it is? Of course I ask this hesitatingly, because I wish to show all respect to the Commission.

Commissioner ANDERSON. Do you want that particular letter withdrawn?

The WITNESS. No; I do not care anything about it. But what object is there in raking it up, supposing it were true?

The CHAIRMAN. Pardon me, you have prevented the production of the original letters. We are now relying upon a court record, and we want to identify these letters as far as possible and practicable. That is the purpose of this examination. If you will produce the originals in your own handwriting it will save a great deal of time.

The WITNESS. With all due deference to the Chairman of the Commission, suppose you had the original of the letter, and suppose I had said something in it about Jay Gould, a man whom I respect very highly, is there anything there that Government money could be spent for? I think this investigation costs money. It certainly costs me

time, and time is money to me. I do not see why these old personal matters should be raked up, since it is for no political reason, unless it is to amuse this Commission.

Commissioner ANDERSON. I thought I had answered very clearly that the object of my questions is to ascertain whether you have used money to influence legislation.

INSTRUCTED HIS PEOPLE NEVER TO USE MONEY IN ANY IMMORAL OR ILLEGAL SENSE.

The WITNESS. I will say here, as I have said many times before, that we never have, in any way whatever. I have given instructions to my people never to use any money in any immoral or illegal sense, but to bring proper influences to bear to get votes, and only proper influences.

Q. Then I want you to explain the allusions which are made from time to time in these letters to the use of money in connection with members of the legislature. We will only waste time by discussing it.—A. It takes money to try cases in court, and when we are attacked in Congress we have to pay money for attorneys to protect our interests there.

Commissioner ANDERSON. If you want to decline to answer on the ground that we cannot force you to answer, that is one thing. If you do not decline, let us proceed.

The WITNESS. I will answer your questions to the best of my ability.

AS TO MEN THAT CAN BE CONVINCED.

Q. Then you had better let me proceed. We will get through sooner that way than by discussing the whole merits of the question. I read a letter dated December 1, 1874, which will be found on page 1611 of the Colton record:

NEW YORK, *December 1st*, 1874.

FRIEND COLTON: Your letters of November 20th, 21st, and 22nd are received. I agree with you as to the Stockton and Copperopolis bonds, and would give them, say, $500,000, 5 per cent., guaranteed by the Central for the $1,000,000, seven per cent. now out, and I would do this at once. I would like to know what is being done with the Cal. Pacific extension bonds. Has any of our people endeavored to do anything with ——— and ———? They are both men that can be convinced. I can endorse all you say of Mt. Diablo coal, but think I shall not do anything about the Rocky Mountain coal with Gould, but let it rest until you come over, as it is one of the many things that you understand better than I do. I will see ——— when he comes over and talk with him, and maybe he and we can work together, but if we can brush him out it would have a good effect, and then we could, or at least would try, to get some better timber to work with. It looks now as though I should telegraph Bradbury to close charter for two, and possibly three, of the White Star steamers as soon as I can get U. P. R. R. Co. to sign contract for running with steamers, which contract I will send copy of to-morrow. I have thought it would be well for Captain Bradbury to go out to China in one of the steamers and fix matters there, and then come to S. F. I see nothing else so good as to load the steamers out with coal. I am doing all I can to educate the people on the S. P. securities, and it begins to look a little as though the bonds could be sold within ten to fifteen months at prices that we can afford to take, but to do that we have got to work the Centrals up, and I am doing what I can in that way. If we can get the Centrals up to par, I hope we shall be able to start the S. P. at 90 to 95. That would be a good price. You will not sell many in Cal., and it is therefore very important that the few you do sell should be sold at a high price. And in this connection it would help us very much if we could fix up Cal. Pacific income and extensions on the basis that we talked of, even if we had to pay something to convince ——— and ———. As you all know the importance of getting out at the earliest day the new bonds on the S. P., I will say nothing of it here, except that I would have them like the present issue as far as the coupons and register go, and that it will take at least two months to get them engraved and printed, so that I hope you will send them on as soon as you can, so that I can set the engraver and printer at work.

Yours, truly,

C. P. HUNTINGTON.

Do you recollect writing a letter of that character to Mr. Colton?—A. I do not. There are many things there that occurred some time; I do not know whether at the date of that letter or not. I should be disposed to think that in those letters there was some truth and some fiction.

Q. Do you remember as to the following sentence:

Have any of our people endeavored to do anything with ——— and ———? They are both men that can be convinced.

DOES NOT REMEMBER WHO THEY WERE.

Do you remember who those persons were?—A. I do not. I do not remember anything about it. But what we wanted was so clearly in the interest of the Government that where I was able to meet a member I could convince him that it was for the interest of the Government, unless his geographical position was such that he would hold to his local interest at the expense of the interests of the country.

LEGISLATION MORE DIFFICULT TO GET IF CONGRESS KNEW THE INTERESTS WERE WORKING TOGETHER.

Q. I will read you a letter of December 10, 1876, from page 1615 of the record in the Colton suit:

NEW YORK, *December 10th*, 1874.

FRIEND COLTON: Your two letters of November 29th are received. The Texas Pacific bill, as amended by me, is on the way to Cal. As it is somewhat different in theory from your views as set forth in your letter, I will not reply to you in detail before you receive the bill. I agree with you that there will be no bill pass this session, granting such aid as is asked for. I think we must add section to the bill as sent out that will allow, or maybe compel, us to build a road to connect San Diego with our line. On account of this legislation, I think it important that the S. P. should be disconnected from the Central as much as it well can be. And, as you say, I think it should have a superintendent that does not connect with the C. P., although I think it would be difficult to get a man as good as Towne. I agree with you fully when you say our telegraph superintendent is no good. I sent you on the 6th copy of my letter to Scott. I have just received his reply. I will have copy of it made and sent to you; also my reply, before this goes, and will send them with this. This S. P. is an important matter and should be attended to at once. I am glad you are coming over soon.

Yours, truly, C. P. HUNTINGTON.

Do you remember writing a letter of that character?—A. I do not.

Q. Is there anything in the allusions to the connection between the Central Pacific and the Southern Pacific that you recall?—A. Not at this time. I have always thought it was better to work the roads in harmony—better for the public and better for ourselves.

Q. The allusion here is that it would be more difficult to get legislation if people in Congress knew that the interests were working together than if they thought they were not represented by the same persons. Is that a familiar subject to you with reference to legislation?—A. I do not recall it now as being one.

LETTER TO THOMAS A. SCOTT.

Q. I will read you a letter dated December 8, 1874, addressed by you to the Hon. Thomas A. Scott (page 1616 of the Colton record):

DECEMBER 8TH, 1874.

Honorable THOMAS A. SCOTT,
Pres. Texas and Pacific Ry. Co., Philadelphia, Pa.:

DEAR SIR: Herewith I hand you two copies of the proposed bill for your road, with such alterations as I want embodied therein. As it is a hard time for building railroads just now, and as we are all interested in the construction of this road, I trust that these alterations will meet your approval, and that such arrangements will be made as will secure the early completion of the road.

Truly, yours, C. P. HUNTINGTON, *Prest.*

Do you remember writing that?—A. No.

Q. You do not remember writing that?—A. No; I do not. It is possible that I wrote a portion of that.

SCOTT TO HUNTINGTON: "YOUR SUGGESTIONS ARE TOTALLY INADMISSIBLE."

Q. I will read you a letter from Thomas A. Scott to yourself as vice-president (page 1617 of the Colton record):

TEXAS AND PACIFIC RAILWAY CO.,
OFFICE OF THE PRESIDENT,
Philadelphia, 9th December, 1874.

C. P. HUNTINGTON, ESQ.,
Vice-President, New York:

MY DEAR SIR: I have your letter of December 8th, and I am sorry you took the trouble you have in regard to our bill. We expect to build our road to San Diego as already pledged to the public to do. We had hoped that it would be to your interest to connect with us at San Gorgonio Pass. Your suggestions are totally inadmissible, and I am rather surprised to have you make them after the many statements you have made to me in regard to this matter.

Very truly, yours,

THOMAS A. SCOTT, *Prest.*

Do you remember that letter and that Mr. Scott took that ground?—A. I do not. I do not see how it could have been so. San Gorgonio is 700 miles, or thereabouts, from El Paso. It does not seem to connect very well.

HUNTINGTON TO SCOTT: "AM SOMEWHAT DISAPPOINTED IN YOUR REPLY."

Commissioner ANDERSON. I will now read a letter from page 1617. The whole subject may recur to you as you hear it. It is the answer that you wrote or appear to have written on December 10, 1874, to Colonel Scott:

DEAR SIR: I have the honor to acknowledge the receipt of your letter of the 9th inst., and am somewhat disappointed in your reply to my letter of the 8th inst. You say, 'We expect to build our road to San Diego, as already pledged to the public to do.' It did not neither does it now strike me that the public care who build the road so that it is built, as it seemed to me that the two companies working from different directions could build it in less time than one company could. My great interest, of course, is with the Central Pacific, which will not be benefited by the construction of this road; but the parties who control the Southern Pacific are very anxious to have this southern line completed at an early day. And so long as I am acting as the president of the company I shall do all that I can to carry out their wishes.

Yours, truly,

C. P. HUNTINGTON,
President.

Honorable THOS. A. SCOTT,
President Texas Ry. Company, Philadelphia, Penn.

Do you not recollect that correspondence with Mr. Scott?—A. No; it escaped my mind that we had ever had any correspondence by letter. I used to meet him in Washington very frequently and also here. We used to talk the matter over.

LETTER TO COLTON: SUGGESTION AS TO BRINING COLONEL GRAY.

Q. I will read you a letter from page 1618 of the Colton record, as follows:

NEW YORK, *December* 11, 1874.

FRIEND COLTON: It is my opinion that there will not be any legislation in Congress this winter for the S. P. or the Texas P. R. R., and yet it is possible that if all

the Cal. members both in the House and Senate are in favor of the change of line of the S. P. it can be done. Now, if you think we can get ———, I would suggest that you bring Colonel Gray over with you to explain the difference between the different lines, or the difference between the line first located and the one where the road ought to build. I send copy of letter just sent to Towne, that explains itself. Steamers still waiting on U. P.

Yours, truly,

C. P. HUNTINGTON.

DOES NOT REMEMBER IT.

Do you remember writing that letter to Mr. Colton?—A. No. That is entirely out of my mind.

Q. Was there any Colonel Gray that you knew or had anything to do with?—A. Yes. Colonel Gray was our consulting engineer on the Central Pacific; and he was the engineer-in-chief of the Southern Pacific.

Q. Do you remember suggesting that Colonel Gray be brought over to explain the difference in these locations to some members of Congress?—A. It has gone from my mind entirely, if it was ever there.

Q. Do you know who that blank can have referred to, when you say:

Now, if you think we can get ———, I would suggest that you bring Col. Gray over with you to explain the difference between the different lines.

A. No, I do not.

LETTER TO COLTON: ALLUSION TO "PASSES AND MONEY."

Q. I will read to you a letter dated March 3, 1875, page 1622, of the Colton record.

NEW YORK, *March 3rd*, 1875.

FRIEND COLTON: Yours of the 1st and 2nd inst. have just come to hand, also dispatch that you have received two dispatches from George E. Gray. What is up? Have received no letter from C. P. H. for three days. Have you sent passes and money? The money I had not sent for the reason I did not know you wanted it until to-day. The passes have gone as fast as they have come in from Dillon. I have just sent over for the last lot, and if they come will send them with this. I also send $1,000, as requested. I noticed a bill passed the House some few days since, called up by Williams of Mich. I forget its title, but it called for reports, etc., etc., from the Pacific roads. Of course it was something ugly, or it would not have passed. Gould has control of the P. M. S. S. Company (or the stock) I think, and can control the company, and has been urging me to go into the board of directors, but I have refused, although there is many reasons why it would be well for some of us to be on that board. Scott's bill must not pass; but you understand that as well as I. What did Gray telegraph about? I would like to see Franchot, but I am fearful he makes a mistake in coming north so early.

Yours, truly,

C. P. HUNTINGTON.

DOES NOT RECALL IT.

Do you recall any of the matters contained in the letter I have just read? Please look at it and say?—A. No; I do not recall anything there.

Q. Please look at it and oblige me by telling me if you can explain that sentence: "Have received no letter from C. P. H. for three days." Is it intended to be a telegram in quotation marks? C. P. H. appear to be your initials. What I want to know is if there should be quotation marks embracing those words, "Have received no letter from C. P. H. for three days. Have you sent passes and money?"—A. I do not know anything about it.

Q. Do you know what money or what passes are alluded to in that letter?—A. I do not. I think I gave passes here myself. I do not understand that allusion.

SCOTT GOES TO MEXICO—HUNTINGTON TO COLTON.

Q. I will read you a letter from page 1631 of the record in the Colton suit:

NEW YORK, *December 25th*, 1875.

FRIEND COLTON: Your telegram in relation to passenger coaches is received and is having attention. Tom Scott has gone, or is going very soon, over the Texas Pacific road and so on into Mexico, and I hear of several prominent parties going to Mexico with him. He has commenced to get up his Texas Pacific connected with some Mexican scheme, and I have no doubt but that he will be before Congress next winter in great force; but we ought to be in condition to at least keep him this side of the Colorado River. I have been at work considerable of the time since you left getting up a pamphlet in relation to the S. P., giving many reasons why the bonds should be very good, and I think after you have read the book you will take some of the securities. Colburn is putting the facts in a readable shape; I find him to be a very valuable man. Cannot you do something to bring up the gross earnings of the S. P.? They are very small for so much road as is being operated. I think that road should have a first-class superintendent. I send with this copy of B. S. Manufacturing Company letter in relation to curtains for sleeping car.

Yours, truly,

C. P. HUNTINGTON.

ESCAPED HIS MIND.

Do you recollect that letter and the allusion particularly to Mr. Scott and his scheme?—A. No, it has escaped my mind that he ever contemplated going into Mexico with a railroad.

ALLUSION TO ARGUMENT BEFORE R. R. COMMITTEE.

Q. I will read you a letter from page 1639 of the Colton case:

NEW YORK, *April 9th*, 1875.

FRIEND COLTON: Yours of March 29th, No. 7, is received, with list of engines on the roads, drawings, etc. The engines ordered are too far advanced to make any changes, but when I come to Cal. I will talk with Stevens and see the practical workings of the machines. The 15 x 22 engines on the road were ordered by Mr. Crocker. The order came for fifty of them, and I bought and sent, I think, twenty. A few such machines are useful. As I wrote you, Bradbury cabled for 5,000 pounds sterling. I called on Dillon for their half; tell him that I thought it important that he answer such calls early. He said he thought so. I think we have called three times since, and got the money to-day—a few minutes to-day before 3 p. m. It looks as though they were a little short. I have sent a cable transfer to Bradbury. I hear of Tom Scott's being at work in the Southern States on his Texas Pacific. I think he expects to make one of his greatest efforts next winter, and hopes to be able to pass his bill. I shall send you argument before the R. R. Committee to all the Southern N. papers, as it connects more with their interest than with Tom Scott's.

Yours, etc.,

C. P. HUNTINGTON.

Q. Do you recollect that letter?—A. No.

Q. Do you recollect the argument?—A. I do not recollect about his going South.

Q. Do you recollect the argument of Colton, that you approved of and sent to the Southern newspapers?—A. It has escaped my mind entirely that he ever sent one.

Q. "I shall send you argument before the railroad committee to all the Southern newspapers;" I assume that that is a misprint for "your argument." You do not recall whether Mr. Colton made any argument?—A. No; I do not remember about his sending over any argument.

Q. Did you prepare an argument yourself before the railroad committee that was sent to the Southern newspapers?—A. They were all making arguments. I do not remember about any one in particular.

Q. I refer to one that was sent to the Southern newspapers for publication.—A. No; if he ever sent any it has gone from me entirely.

AS TO INDEPENDENCE NARROW GAUGE ROAD.

Q. I will read you a letter of April 22, 1875, page 1641, of the record in the Colton case:

NEW YORK, *April 22nd*, 1875.

FRIEND COLTON: Yours of the 9th inst., No. 18, is received. I have seen Dillon and read him that portion of your letter that referred to U. P. working on Sec. 31, and asked him to have the work stopped, but he said I had better see Gould. I have not seen him yet. There is much talk here about the Independence Narrow Gauge road. I hear of them in the market for rails and rolling stock. I was told to-day that William Butler Duncan, Senator Jones and Stewart, T. W. Park, and Jay Gould were all in this narrow-gauge road. I have no reason to believe this is true except the rumor, and that is a better reason for its being false than of its being true. T. W. Park and Jones, on the part of the Panama road, and Gould for the P. M. have been much together of late. And at first quarreled (so said), but now, I am told, are very friendly, and I have no doubt have talked over the matter of a railroad from the Pacific coast to Salt Lake. And Gould has gone in with the Kansas Pacific R. R. folks, and, I am inclined to think, now controls that company. I mention these matters of the railroad from Salt Lake to the Pacific, south of the C. P., because such a thing is rumored about, not because I think a road is soon to be built there.

Yours truly,

C. P. HUNTINGTON.

Do you remember that letter and these allusions to those gentlemen?—A. No; I had forgotten all about their ever having any connection with those lines, if I ever knew it.

GOVERNOR S. SAID SOME GOOD THINGS.

Q. I read from page 1653 of the Colton case, a letter of May 28, 1875:

NEW YORK, *May 28th*, 1875.

FRIEND COLTON: Yours of the 20th, No. 50, is received with N. P. clippings. I do not think Booth made many votes by his Grand Hotel speech. The Governor said—Gov. S——— some good things to the Chronicle interviewer; but I think it unfortunate that he should so closely connect the C. P. with the S. P., as that is the only weapon our enemies have to fight us with in Congress.

The rest of the letter refers to another matter of no special interest. I ask you whether you remember writing the sentences I have read to you?—A. No; I had forgotten about the governor ever having an interview with the Chronicle.

KEPT SOME PEOPLE'S LETTERS; OTHERS, DID NOT.

Q. Were you in the habit of keeping letters and referring to letters received by you by their number? Was that your custom?—A. With some parties, and with some not.

Q. With Mr. Colton?—A. I think I used to number the letters to him.

Q. And that he numbered his?—A. I am not so certain about that; I am inclined to think not.

Q. Do you know any person named Booth who made a speech at the Grand Hotel?—A. I do not. I know lots of men named Booth, but I do not connect any of them with any of my letters.

Q. Do you know Governor Booth?—A. Yes; I know him very well.

Q. Do you remember the fact that he made a speech at the Grand Hotel in the spring of 1875?

The WITNESS. Where was that?

Commissioner ANDERSON. I am only endeavoring to ascertain whether this is an allusion of yours.

The WITNESS. No; I do not remember. I never knew that he made a speech at any hotel.

AN ALLUSION TO ——— AS A "WILD HOG."

Q. I will read you from page 1661, letter of May 1, 1875:

NEW YORK, *May 1st*, 1875.

FRIEND COLTON: Yours of the 17th of April, No. 17, is received, and contents carefully noted. As to the road east of Spadra, I notice there has arrived in California, out of the last 8,000 tons of 56-pound iron rails bought, say, 4,800 tons, say 1,200 tons more due and nearly so. So it would seem that you are not to have any delay on account of rails to lay the 50 miles of the Fort Yuma line, and I think you should have the next 50 miles graded, so that you can lay the track next winter; sooner than that we will not have the rails. I notice that you say of ——— he is a wild hog; don't let him come back to Washington, but as the House is to be largely Democratic, and if he was to be defeated likely it would be charged to us, hence, I should think it would be well to beat him with a Democrat; but I would defeat him anyway, and if he got the nomination, put up another Democrat and run against him, and in that way elect a Republican. Beat him. I am glad Stubbs is coming over here. You know I do not pretend to know anything of the details of our freight business.

Yours truly,

C. P. HUNTINGTON.

DOES NOT REMEMBER HAVING WRITTEN SUCH A LETTER.

Is it your recollection that you wrote that letter?—A. No; I do not remember ever having written such a letter. I think I should have done such a thing if I had been there, perhaps; or would have tried to at least.

Q. Has it not some expressions in it that you recall as having used?—A. Not specially.

Commissioner ANDERSON. I am merely asking you with reference to the identification of the letter. Do you not remember this expression, "wild hog," as applied to a certain person referred to in the letter I have just read?

The WITNESS. I do not remember using it there; but I did sometimes use it.

Q. You did use it?—A. That is an expression I have used.

Q. Will you inform us with reference to what person that expression was used?—A. If it could be of any benefit to any human being or to any interest in the country—any legitimate, honest interest or purpose—I should be awfully tempted. But I cannot think of any interest whatever that would be served by answering it.

A MAN WHOSE VIEWS RAN CONTRARY TO ALL HUMAN INTERESTS.

Q. I call your attention to the fact that the reference is to some person who was to be prevented from getting back to Congress. Was it not some person whose views were hostile to the Central Pacific Railroad, and whom, for that reason, you did not want returned to Congress?—A. If I remember the person, and I believe I do, it was a man whose views ran contrary to all human interests. Anything that would benefit humanity anywhere he was against.

Q. Do you decline to give us the name?—A. I do not think it would be best.

Commissioner ANDERSON. We do not ask your reason, but we ask if you decline to give the name.

The WITNESS. I do not want to say anything that the Commission would think was discourteous; but, really, if they would give me any reason, even the shadow of a reason, I should be tempted.

NO MONEY USED TO PREVENT THE "WILD HOG'S" RETURN TO CONGRESS.

Q. I will give you a reason for it. If it should appear that some portion of the unexplained money was used to prevent this gentleman from being returned to Congress, that would be interesting to Congress to know.—A. Well, I can tell you that there was not.

Q. How do you know?—A. This could not have been money that I paid out. I did not pay out any. I was not there.

Q. That may be. That is another matter. You know there are other vouchers there besides yours that are unexplained, do you not?—A. I think I have heard that.

Q. So that it is quite possible that the Central Pacific money was used, after you had advised that it would be desirable for the interests of the company to defeat this gentleman's election?—A. I do not think it was.

Q. I am only giving you a reason why we want the name. If you object to giving the name, that is sufficient for the present.—A. I think I had better not give the name.

IMPORTANT TO HAVE RIGHTS IN ARIZONA.

Q. I will now read to you a letter from page 1664 in the Colton suit, dated September 15, 1875:

NEW YORK, *September* 15th, 1875.

FRIEND COLTON: Yours of the 7th inst., No. 57, is received; also your dispatch in have P. M. S. S. Co. withdraw their patronage, etc. As to the latter, I asked Governor Stanford to attend to it, and he said he would, and I have no doubt he done so. He living in Cal., I thought it one of the things he could do better than I. The Gov. left here last night. I am glad to notice you are stopping the one per cent. per month. That will kill anything that I know of. Scott is stirring up the South on his Texas and Pacific. Parties are sending me papers every day—some for him, some against him. I have written three letters to-day to different parties in the South on T. P. R. R. matters. I think it is of much importance that we have some rights in Arizona, and I think if we could get them I think we should do so at once. You know my views, and I had a long talk with Gage on the matter, and if we could get two franchises to run through the State, I think we should do so at once. We should not be known in it, but should be sure that we have the control, in black and white, before they become a law. I will write again in a few days. Somehow, I have not got my ideas in line yet.

Very truly,

C. P. HUNTINGTON.

P. S. I send memorandums of rails shipped, etc.

Do you recall that letter or a letter similar to that?—A. Not clearly enough to identify the letter.

AS TO MR. STEPHEN T. GAGE.

Q. Do you know a Mr. Stephen T. Gage?—A. Yes.

Q. What is his relation to Mr. Stanford?—A. I do not know. He is, I think, a director in one of the roads; perhaps more than one.

Q. Do you remember having talked with Mr. Gage in regard to the franchises in Arizona, in that year, 1875?—A. No; I do not. The fact is, matters that I get through with drop out of my mind.

"A. A. C." A GOOD FELLOW.

Q. I read you from page 1665, a letter dated September 17, 1875:

NEW YORK, *September 17th*, 1875.

FRIEND COLTON: Yours of the 9th inst., with inclosures as therein stated, are received. It looks as though you would be able to cave Mr. Fitch and Pickering down the bank. I will do what I can to get Gould and Dillon to make the exchange of coal lands, as you desire, but I very little hope that they will do what you want them to. I am glad to hear of your paying Reese and others, as it is well to pay even if we have to borrow the money right over again, and when the money is due pay it or renew the note. I hope you will pay A. A. C. what we owe him. He is a good fellow but his account has stood long enough. As we shall need a large amount of money this winter it would be well to borrow some on six to twelve months, if you could do so at fair rates. I do not expect to sell any S. P. bonds this fall. We shall need considerable gold here to pay interest on the 1st of Oct., but I hope to get on without calling any from Cal.

Yours, truly,

C. P. HUNTINGTON.

Do you recall writing that letter and those allusions to Fitch and Pickering? Do you know what those allusions are?—A. Yes. I do not know what in the world we wanted to "cave them down the bank" for, unless it was that they opposed our getting Goat Island, which they have regretted ever since. They are very nice gentlemen.

TO WHOM DO THESE INITIALS REFER?

Q. Do you know whom those initials "A. A. C." refer to as "a good fellow"?—A. I do not.

Q. Do you think you could find out after communicating with your counsel?—A. I do not know. [Addressing Mr. Cohen.] Do you remember? Possibly you are the party.

Commissioner ANDERSON. Mr. Cohen's initials are "A. A. C.," are they not?—A. Yes. What puzzles me is that he owed us any money.

Commissioner ANDERSON. No. You owed him money. This letter says, "I hope you will pay A. A. C. what we owe him. He is a good fellow, but his account has stood long enough."

The WITNESS. Well, we borrowed money sometimes of Mr. Cohen, and did not like to have such an account run too long. We liked to pay up.

MATERIALITY OF THE INQUIRY.

Mr. COHEN. I would like to get a little information myself, Mr. Anderson. How does the fact that the Central Pacific owed money to anybody and wanted it paid bear upon matters that are confided by Congress to this Commission?

Commissioner ANDERSON. If you ask the question seriously, I will say that there is a vast number of letters here, and we can not tell until we read them how material they are.

Mr. COHEN. You know what is in them. You have read them.

Commissioner ANDERSON. I have not read that.

Mr. COHEN. I do not think my private business with the Central Pacific needs any explanation.

Commissioner ANDERSON. I am willing to have the last letter struck out, if you wish it.

Mr. COHEN. I do not care anything about, or about any of them. They are read for gossip or scandal, just as I say, to influence the question as to who shall have the next custom-house or post-office. All this this Commission was appointed for was to determine that question.

HUNTINGTON TO COLTON: SCOTT'S EFFORTS FOR TEXAS PACIFIC. INQUIRY AS TO ARIZONA CHARTERS.

Commissioner ANDERSON. I will read from page 1669 a letter of September 27, 1875:

NEW YORK, *September 27th*, 1875.

FRIEND COLTON: Yours of the 18th, with inclosure, as stated, is received. You must be very busy with all of your associates out of the city. I notice by McCarthy's letter to Mr. Crocker that the people of San Diego will join with us if he will agree to build east from their city, and I am inclined to think we had better do that, as that would strengthen Wigginton very much to have his people ask him to fight for a bill as we want it. Scott is making the strongest possible effort to pass his bill the coming session of Congress. He gets every little gathering in the South to pass resolutions favoring the Texas Pacific bill; then those that the Texas Pacific owes name a legion, and, of course, they are all for it; then he is promising a connection with all the broken-down roads in the South, with the promise of money to help them all if his bill passes; and by some kind of a turn he is settling up with all those that hold him personally, and that is to help him, as it makes his promises worth something with the broken-down fellows that he is agreeing to help. If we had a franchise to build a road or two roads through Arizona (we controlling, but having it in the name of another party), then have some party in Washington to make a local fight and asking for the guarantee of their bonds by the U. S., and if that could not be obtained offering to build the road without any aid, it could be used against Scott in such a way that I do not believe any politician would dare vote for it. Can you have Safford call the legislature together and grant such charters as we want at a cost of say $25,000? If we could get such a charter as I spoke to you of, it would be worth much money to us. If there is anything done it must be done quickly. I am very sorry that Sargent is feeling so hard toward us, but I shall endeavor to see him before Congress meets. I have bought the tunnel-bolts at three and a half (currency) instead of 9 cents (gold), as was being paid by Mr. Crocker when I was in California. I think money is too cheap with you all in California, and that we can be beat in building railroads by those that place more value on a dollar than we do; and I think when one of us goes to the front in a car that weighs, say, 20 tons, it adds to the cost of every mile of road that we build thereafter more than $100 per mile. I wish you would let me know who ordered the officer's car that is now running on the S. P. Please let me know what the new transfer boat cost.

Yours, truly,

C. P. HUNTINGTON.

Q. Do you remember writing such a letter as that to Mr. Colton?—A. No; I do not. Some of the ideas or some things that are suggested there, of course, have been in my mind, but there are some things there that are new.

ALLUSION TO THE PEOPLE OF SAN DIEGO.

Q. Do you remember a man named McCarty writing to Mr. Crocker that the people of San Diego would join with the Central Pacific people if you would agree to build east from their city?—A. No; I do not remember ever knowing a Mr. McCarty living in San Diego.

Q. Did you know a man named Wigginton?—A. Yes; I knew a man named Wigginton.

Q. Did he belong to San Diego or where?—A. No; he lived in the San Joaquin Valley, I think. I do not know just where. I am quite sure he lived in the San Joaquin Valley. That is north of San Diego.

Q. You say some of the ideas in this letter do strike you as having come from yourself?—A. No; not in the shape of a letter. I have

thought of those things, and I might have written them, but after hearing that read, I do not recall anything.

SUGGESTION AS TO CALLING THE ARIZONA LEGISLATURE TOGETHER.

Q. I will read this particular sentence to you and ask you whether you wrote that:

Cannot you have Safford call the legislature together and grant such charters as we want, at a cost of, say, $25,000?

A. I do not remember writing it. I remember something of Mr. Colton writing to me that it would cost a good deal to get a bill drawn and call the legislature together to pass it. There is something running in my mind like this, that he did not believe the legislature of the Territory would pay the expense; possibly, if we should pay the expense of their coming together, a bill might be passed, as it was very much in the interest of the Territory. The people of the Territory were poor, and that seemed a large sum to them.

Q. To pay the expense of an extra session?—A. Yes. I do not remember writing about it, but possibly I did.

Q. As a matter of fact, Mr. Safford was governor of the Territory at the time, was he not?—A. I do not remember, but I think he was. I have known him for many years, and I think he would rather we should pay the expense of an extra session than that his people should do so.

THE ETHICS OF A SUGGESTION TO PAY THE "COST."

Q. Would that application of $25,000 be within the domain of what you have described to us as part of the necessary, legitimate, and proper expenditure of money for the purpose of advancing the interests of the Central Pacific?—A. Yes. I would not see any harm in it.

Q. You would not see any harm in offering to pay the expenses of an extra session of the Territorial legislature—I will not say to purchase a bill, but with the idea that a bill should be presented to them to pass, and passed, if they approved it?—A. While the expense of passing a bill so much in the interest of the people of the Territory should be paid by the Territory, yet rather than not have it we would be willing to pay the expense of an extra session to pass it. There certainly is nothing wrong in that.

Q. What do you include in their expenses—just the board bill of the members of the legislature, or their salaries?—A. Whatever the Territory was responsible for.

"EXPENSES" WOULD COVER WHATEVER THE TERRITORY WAS RESPONSIBLE FOR.

Q. That is, the salary of the members and any other expenses?—A. The idea was that whatever the Territory was responsible for the parties would pay. Just what that was I could not say.

Q. Whatever that was, if the company should offer to pay it, instead of putting it on the Territory, then, in order to have such legislation as the legislature passed, that, in your judgment would be a proper application of money?—A. There certainly would be no harm in it, and it would be clearly in the interest of the people.

A MEMBER OF THE FORTY-FOURTH CONGRESS, AND EX-GOVERNOR.

Q. I will read you from pages 1676 and 1677 of the Colton record a letter of October 19, 1875:

NEW YORK, *October 19th*, 1875.

FRIEND COLTON: In your number 79 you mention that Mr. Hopkins has been over the line and examined the trestle work with Mr. Montague, etc. I was very glad to hear

that he has done so, as I felt uneasy about it. Mr. H. wrote and gave what seemed to be very good reasons for not doing any work on them this fall, etc. I think you should pay off Cohen what we owe him, and for that matter every one else that we are paying 12 per cent. interest. I borrowed $50,000 for six months to-day at 7 per cent.; and took up the same amount of our paper that had about 10 months to run at 10 per cent. I think it was well to send Harvey Brown to look after the land matters. The work in the San Fernando tunnel does not seem to be pushed as fast as ought to be. There was, if I read the engineer's figures correctly, 1,250 feet of the heading of the tunnel out on the 30th of September. I have given ——— a letter to you. He is a member of the 44th Congress, ex-governor of ———, and a slippery fellow, and I rather think in Scott's interest, but not sure. I gave him a pass over C. P. and got one for him over U. P., so do the best you can with him, but do not trust him much.

Yours truly,

C. P. HUNTINGTON.

Do you remember writing that letter?—A. I do not.

DOES NOT REMEMBER WRITING SUCH A LETTER.

Q. Do you remember writing any letter with an allusion to a member of the Forty-fourth Congress who had been an ex-governor, whom you described as a "slippery fellow" and to whom you gave passes?—A. No. I do not remember writing any such letter. I used to give passes to every member of Congress, as I wanted them to go over and see what we had done for the country. I do not remember specially anybody's being in Congress who was an ex-governor.

Q. A Virginian; an ex-governor of Virginia?—A. No.

Mr. COHEN. Or of Pennsylvania?

The WITNESS. No; I do not know. I am quite sure that I did not know any member from Virginia that was an ex-governor.

Q. Is it your best impression that you wrote that letter or did not?—A. I do not think I should have written such a letter.

Q. Will you swear that you did not write such a letter as that?—A. There are some things in it that I am very certain that I would not write. There may be some things picked out of the letter that I did write.

Q. I should very much like to be informed as to what part of that letter you are very sure you did not write?—A. I do not remember about the "ex-governor," because I cannot think of anybody that was an ex-governor that was a member of Congress.

(Here Mr. Norris wrote a name on a piece of paper, which he handed to the witness.)

The WITNESS. No; I do not believe I ever wrote about that man.

Q. You knew him?—A. I knew him, but he never was much of a friend of ours. I do not think I ever did him any favor. I am very sure I have not loaned him any money, nor any man in his place.

WOULD HAVE GIVEN A PASS IF ASKED FOR ONE.

Q. The expression is that you gave him a letter for Mr. Colton and a pass over the Central Pacific and Union Pacific.—A. I should have given him a pass, very likely, if he asked for one.

Q. Was he not a member of the Forty-fourth Congress?—A. He was in Congress, but in which Congress I do not remember.

Q. Was he not an ex-governor?—A. He was an ex-governor of Virginia, yes; but I do not believe that I ever wrote that he was a "slippery fellow," for I certainly never thought so.

The CHAIRMAN. We will now take a recess until 2 o'clock. In the mean time if you can have a consultati on, Mr. Huntington, with your

counsel as to the production of the original letters it will save a great deal of examination.

The WITNESS. I shall have all my time occupied outside of this matter during this hour. I have several gentlemen to see and I may even be a little late in getting back.

No. 10 WALL STREET, NEW YORK,
Wednesday, September 21, 1887.

Afternoon session.

C. P. HUNTINGTON, being further examined, testified as follows:

"OBNOXIOUS TO THE REPUBLICAN SIDE OF THE HOUSE."

By Commissioner ANDERSON:

Question. I now read a letter from page 1681 of the Colton record, dated New York, November 10, 1875:

NEW YORK, *Nov.* 10, 1875.

FRIEND COLTON: Yours of October 23, 1875, No. 85, is before me. ——— is also here. I think ——— can do us some good if he can work under cover, but if he is to come to the surface as our man I think it would be better that he should not come, as he is very obnoxious to very many on the Republican side of the House, and then there is so many things about our business that he does not know, and he has not the time to learn it before Congress comes and goes. It is very unfortunate that he came over in the directors' car with Mr. Crocker. I received a letter to-day, from a party in Mass., that said that Gorham and Sargent were very much offended because ——— was or rather had come over to look after our interests in Washington. I am, however, disposed to think ——— can do us some good, but not as our agent, but as an anti-subsidy Democrat, and also as a Southern man with much influence in the South in showing the Southern people that the Texas and Pacific R. R. is in no way a Southern Pacific road, but a road if built by the Government would prevent the Southern States from having a road to the Pacific for many years. But ——— must not be known as our man. I received a letter from H. S. Brown this morning that G. was for Randall or for Walker. I send copy with my reply.

Yours, etc.,

C. P. H.

Q. Do you remember a letter referring to those subjects, written by you to Mr. Colton?—A. I do not. There was a letter from somebody in Massachusetts, but I do not remember getting any letter from anybody in that State at that time.

Q. It refers to a party in Massachusetts who said that Gorham and Sargent were very much offended because this person who is referred to had been appointed to look after your interests in Washington. Do you remember the fact that somebody alluded to these gentlemen as being offended?—A. I do not. It has gone out of my mind entirely. I knew Gorham and Sargent very well.

Q. Who were Gorham and Sargent?—A. Sargent was our minister to Germany. He had a discussion with Bismarck and the folks over there about pork.

Q. Were they in Congress at that time?—A. I do not think Gorham was ever in Congress.

Q. Had he any official position under the Government?—A. He was Secretary of the Senate, I believe, at one time. I do not know whether he was at that time, or not.

WHO CAME IN THE CAR WITH MR. CROCKER?

Q. Do you remember who came over with Mr. Crocker in a car, as to whom you thought it undesirable that he should have come that way?—A. I do not remember. Mr. Crocker almost always brings over some one. He is a very clever gentleman, and generally brings some friends.

Q. Do you know who is referred to in the blank in this letter?—A. I do not. Of course there were a good many people coming and going that I knew, but that particular trip I do not remember.

WAS IT EX-SENATOR GWYN?

Q. Do you know whether during that session your company employed ex-Senator Gwyn to attend to and look after your interests?—A. He was there; but I do not remember the session.

Q. This was in November, 1875.—A. I would not say that he was not there. He was there one session of Congress.

Q. Does that refresh your memory now as to who came over in the car with Mr. Crocker? Do you remember whether he came over in the car with Mr. Crocker, and that you thought it undesirable?—A. I do not. I could not say that he ever came over in a car with Mr. Crocker.

A CONFIDENTIAL AGENT.

Q. Did he act afterward as one of your confidential agents?—A. He did. He explained some of our matters, I think, to his Southern friends.

Q. Did he receive compensation for his services, as far as you know?—A. It would be very strange if he had not received compensation if he did anything for us.

Q. Who had charge of liquidating his account, you or General Franchot?—A. I think General Franchot. Dr. Gwyn was a very able and active man.

Q. Did you personally make any payment to him?—A. I do not think I did; still, I might have done so. He was a very good man to employ; he was honest and capable.

Q. Do you remember whether receipts were obtained from him through either General Franchot or yourself?—A. I do not; I should hardly think we would have taken receipts from the doctor.

Q. As a matter of fact, do you recollect ever having had his receipts in your possession—vouchers for money that had been paid to him?—A. I do not.

Q. Have you in your mind any recollection of the amount of money paid to him?—A. I have not.

Q. Even generally, whether the amounts were large or small?—A. I could not say. But I know Dr. Gwyn so well that I would like to say that whatever money was paid to him he did not use for any immoral or illegal purpose.

A SUGGESTION THAT R. R. AND THE LAND COMMITTEES OF CONGRESS WOULD NOT FAVOR SUBSIDIES.

Q. I read you a letter dated December 17, 1875, from page 1690 of the Colton record:

NEW YORK, *Dec.* 17, 1875.

FRIEND COLTON: I expect to have a bill ready early next week so amending the Texas Pacific act as to allow the S. P. to build east of the Colorado River, or rather will have some changes made in the bill you sent over. The vote in the House the

other day will do much good in helping Speaker Kerr in making up the R. R. and land committees in such a way that they will not be likely to report in favor of any subsidies. Of course the South were not all for Scott's bill before we commenced working there; but we have done good work, and I am getting Southern papers every day from the line of his travels that speak out against the Texas Pacific. See clippings inclosed. The Railroad Gazette, in publishing the proceedings at the St. Louis convention, made some mistakes which I have endeavored to correct, as you will notice by copy of letters sent to you. Nearly all the papers here have taken favorable notice of it. I send slips from World and Tribune. The editor's article in the R. R. Gazette I did not see until after its publication. I have looked over Gov. Irwin's message; it seems to be well enough, although not just such a one on R. R. matters as I expected.

Yours, truly,

C. P. HUNTINGTON.

Do you remember writing that letter?—A. I do not. Many of the things referred to are familiar to me, or were so.

Q. Do you remember the allusion to the Railroad Gazette, and the publication of the Saint Louis convention?—A. I do not. In fact I do not know what Gazette you refer to, or where it is published.

Q. Do you remember the fact that you were encouraged in regard to the constitution of the committees by the vote in the House?—A. I do not. Of course, in a case of that kind we should do what we could, and bring all proper influences to bear to get an anti-subsidy committee. That was in our interest; in the interest of the people. So I suppose there was no harm in that.

SCOTT MAKING TERRIBLE EFFORTS AND NUMEROUS PROMISES.

Q. I will read you a letter dated December 13, 1875, page 1699 of the record in the Colton case:

NEW YORK, *Dec.* 13, 1875.

FRIEND COLTON: Your two letters of the 4th inst., Nos. 107 and 108, with inclosures, are received. The resolutions I think are all right. You write you are drawing up a bill to introduce in Congress. I am glad you are. I have been to work on one for some days and Mr. Storrs has it in hand now. When yours comes I will use the best one, or, what is more likely though, use the best parts of both. I hope to have it introduced by Thursday, the 23rd. Scott is making a terrible effort, promising everything to everybody, and I promise nothing that I do not expect we shall fulfill, and the Southerns being so very poor that many of them will hold to Scott in hopes he may do something for them. Vain hope. ———, as you no doubt have seen, has gone off the railroad committee, but there is a good man in his place, ———. His going off looks as though he did not care to help us or harm us much. If he did he would have stayed on the committee. I sent you to-day Senate bills No. 6 and 14. I could get control of Atlantic and P. R. R. at a very small cost, but do we want it as a gift.

Yours truly,

C. P. HUNTINGTON.

Do you recall that letter to Mr. Colton?—A. I do not. I will say, however, as I did in regard to some of the others, that there are many things there that are familiar to me. I really regret that I can not give the Commission more information about my private affairs, and about the inside working of our company. I should be glad if I could give the Commission the most minute particulars of our company affairs.

Q. You have no impression as to whether you wrote that letter or not?—A. No.

WHAT ARE HIS SERVICES WORTH?

Q. I will read you a letter dated January 14, 1876, from page 1700 of the record:

NEW YORK, *January* 14, 1876.

FRIEND COLTON: Yours of December 30 and the 1st inst., Nos. 120 and 121, also your telegram that ——— has had for his services $60,000 S. P. bonds; then asking how

much more I think his services are worth for the future. That is a very difficult question to answer, as I do not know how many years ——— has been in our employ, or how far in the future we should want him. In view of the many things we now have before Congress, and also in this sinking fund that we wish to establish, in which we propose to put all the company's lands in Utah and Nevada, it is very important that his friends in Washington should be with us, and if that could be bought by paying ——— say $10,000 to $20,000 per year, I think we could afford to do it, but of course not until he had controlled his friends. They could hurt us very much on this land matter, although I would not propose to put the land in at any more than it is worth, say $2.50 per acre. I would like to have you get a written proposition from ——— in which he would agree to control his friends for a fixed sum, then send it to me.

Between the business here and in Washington I am worked about up to my capacity.

Yours truly,

C. P. HUNTINGTON.

Do you remember anything relating to a payment of $60,000 in Southern Pacific bonds for the services of any individual?—A. I do not. Somebody else must have given those bonds out, if they were given.

Q. Do you remember your attention being called to the fact that $60,000 in Southern Pacific bonds had been given to any one for services?—A. I do not.

Q. Some one as to whom you did not know how many years he had been in the employ of the company?—A. I do not.

WILLIAM B. CARR'S RELATIONS WITH THE COMPANY.

Q. Were you acquainted at this time with William B. Carr?—A. Yes; I knew Mr. Carr.

Q. What relation did he hold to the company?—A. I think that he did business for us for a good many years. He had some contracts. I have known Mr. Carr since 1850, I think. He is a bright man.

Q. What kind of contracts did you say?—A. I think he had one or more contracts to construct some portion of the Western Pacific road.

Q. I am speaking of 1875-'76.—A. I think Mr. Carr was a general utility man. He never had any public position that I know of.

Q. He was not a freight agent or passenger agent, was he?—A. No; I think not. But we have to have men as important to us as freight and passenger agents, because when we have money we have to hire somebody to watch it or it will be stolen.

WHAT ARE A "GENERAL UTILITY" MAN'S SERVICES?

Q. When you say a "general utility" man, I want my attention directed to the class of services he would perform.—A. He would go out to get rights of way, as I remember, and, I presume, to look after legislation at Sacramento, and, I think, was often before the council in San Francisco.

Q. As a matter of fact did he not attend the legislature in California?—A. He used to go up very frequently and attend to matters there.

Q. Was he not generally known, in the inoffensive sense of the word, as a "lobbyist"?—A. No; I think not. I would not call him a "lobbyist." He used to attend to our business. But perhaps I do not understand the word "lobbyist." I take it, a "lobbyist" is a man who stays around the capitol and picks up any sort of work he can get. A man that goes there as the regular agent for some legitimate business and attends to that business and nothing else I do not call a lobbyist.

Q. I will take your definition of a lobbyist as one who attends the legislature in the interest of a great corporation, seeing members of the legislature, using argument with them, doing everything that he can to defend the company or to promote its interest. Was that Mr. Carr's business?—A. I should say that a man who did that was an agent of the company.

Q. Was that Mr. Carr's business?—A. He used to go there for that purpose, with others. There were a great many members, and they had to be educated more or less as to what we needed and as to whether or not it was in the interest of the people. If it was, I think they would be pretty likely to go for it; if not I should expect they would go against it.

ARE SUCH SERVICES WORTH $10,000 TO $20,000 PER ANNUM?

Q. Should you consider the services of such a man worth from $10,000 to $20,000 per annum?—A. I should think so; if he is as able a man as I think Mr. Carr is. I should not think from ten to twenty thousand would be out of the way.

Q. I read this sentence in the letter: "I would like to have you get a written proposition from ——— in which he would agree to control his friends for a fixed sum and then send it to me." Do you recollect writing and asking for that information, with reference to Mr. Carr?—A. I do not. I have no recollection of anything of the kind.

Q. Have you any knowledge as to what friends Mr. Carr has in Washington whom you deemed it desirable to control or influence in any way?—A. No. I think he had more or less influence with all the members from California.

Q. Had he himself been a member of Congress?—A. No; but I think he knew, personally, all the men from the Pacific coast.

Q. Had he a large acquaintance with members of Congress?—A. I think with all California members.

Q. Did his acquaintance also extend to Washington?—A. I suppose it would, with the California members.

"I BELIEVE WITH $200,000 I CAN PASS OUR BILL."

Q. I will read you a letter dated January 17, 1876, page 1703 of the Colton record:

NEW YORK, *Jan.* 17, 1876.

FRIEND COLTON: Yours of the 8th and 9th inst., Nos. 123, 124, and 125, are received. The news of much rain is good, even if it does wash our roads some. I have just received an order from Mr. Towne for 25 20 x 24 cylinder engines, which I shall buy. As I understand it, you buy this size because they will haul more cars than an 18 x 24, so I shall soon expect an order for a 24 x 30, because they will haul more than a 20 x 24. I wish to say for myself that while I much like Stevens' plan of arranging driving-wheels, etc., I am as much opposed to having any engines on the road with more than 18 x 24 cylinders, and of course other parts in proportion, and you will all come to this some time. I have received several letters and telegrams from Washington to-day, all calling me there, as Scott will certainly pass his Texas Pacific bill if I do not come over; and I shall go over to-night; but I think he could not pass his bill if I should help him; but of course I cannot know this for certain, and just what effort to make against him is what troubles me. It cost money to fix things so that I would know that his bill would not pass. I believe with $200,000 I can pass our bill; but I take it that it is not worth that much to us.

Yours, truly,

C. P. HUNTINGTON.

That letter, or part of it, has been already read to you. What do I understand you to say in regard to the last sentence:

I believe with $200,000 I can pass our bill, but I take it that it is not worth that much to us.

A. I have answered it once, but I will answer it again if you wish.

Commissioner ANDERSON. You might do so just in order to have it all together.

The WITNESS. I should say that with $200,000 I could pass a bill that would protect our border for 1,500 miles between Mexico and the United States, where the cowboys have been raiding ever since the treaty of Guadalupe Hidalgo. I should say that with $200,000 I could get such a bill passed, when the building of the road would not cost the Government one dollar, and would make land, then entirely worthless, of some value after the road was built. I should say that I could get men from as many districts in the United States as would be necessary to convince members of Congress that this road was in the interest of the people, and was a thing that they could not afford to vote against.

Q. What do I understand you to say as to whether that particular sentence was written by you or not?—A. I do not know whether it was or not.

A BILL IN WHICH NO AID WAS ASKED OF THE GOVERNMENT.

Q. You understand that the bill referred to here is a bill in opposition to the Scott bill?—A. It was the bill in which we asked no aid of the Government. We offered to build the road from San Diego substantially to the mouth of the Rio Grande, so far as protecting the country is concerned, as the road would be much of the way in sight of Mexico. We have made it possible for the Government to look over and protect the lives and property of our people along that border. Just why we should be abused for that, since it is in the public interest, I never saw and do not see now. In all our railroad building within the territory of the United States we have fulfilled our contracts to the letter, but the Government has not done that with us, but has treated us as we would expect to be treated only by highwaymen. For carrying the mails across the Sierra Nevada Mountains, where it costs more to build and operate a railroad than in any other part of the United States, where coal is $6 per ton, and not very good at that, we get from the Government less than is paid on the Baltimore & Ohio road, where they get coal of much better quality at 90 cents a ton, because some demagogue rises in his place and proposes that it shall be so, thinking he will be returned to his place because he has done this injustice to a corporation.

FRIENDS OF THE TEXAS PACIFIC ALL WORKING HARD IN WASHINGTON.

Commissioner ANDERSON. I will read you a letter of January 29, 1876, page 1705:

NEW YORK, *January* 29, 1876.

FRIEND COLTON: Your letters of the 19th and 20th, Nos. 128 and 129, are received. I notice and appreciate what you say about my being overworked. I am working rather hard this winter, but I think I can stand it for some time yet. Scott is making a terrible effort to pass his bill, and he has many advantages with his railroads running out from Washington in almost every direction, on which he gives free passes to every one which he thinks can help him ever so little. The Texas Pacific seems to own almost every one in the country. I hear in very many of the large towns there are parties holding stock in his construction company, and they are all in Washington working for the T. P. bill. Then, on our side we have ——, ——, ——, and —— in the Senate to help us. —— is very bitter, so much so that he can hurt us but little. So you can see things are very lively with us, but I shall defeat them, or, I should rather say, Congress will, for I doubt if he could pass his bill if I should help him, yet I am making the best fight I can, and I think I

are doing very well. Scott is very able; he has a shorthand writer, and I have not had any, but the last time I agreed to pay half and so get a copy, but could not bring the marks of what you may call them with me as we did last winter. I will send you out what was said at the last meeting as soon as they are printed. The committee asked us to have them printed for their use. Much of it was printed before we went before the com.—Scott's as well as my own. I returned from Washington this morning; shall go back next Monday night, but I dread it very much. Scott is working mostly amongst the commercial men. He switched Senator ——, of ——, and ——, of ——, this week, but you know they can be switched back with proper arguments when they are wanted; but Scott is asking for so much that he can promise largely to pay when he wins, and you know I keep on high ground. All the members in the House from Cal. are doing first rate except ——, and he is a damned beg any way you can fix him. I wish you would write a letter to ——, saying that I say he is doing first rate, and is very able, etc., and send me copy. I am working as I have before wrote you, I think, to get up a co. to build a road from Austin to El Paso. If I can get some men in it that I am working with, I will get much strength from the South for it. I have much to do to-day, and will write no more at this time.

Yours, truly,

C. P. HUNTINGTON.

P. S.—I will get you telegraph passes. H.

Mr. COHEN. You do not want that to go on the record again, do you? We have had it twice, I believe.

Commissioner ANDERSON. I beg pardon; I think not. We will attend to the record.

Q. I merely ask you, Mr. Huntington, do you remember the material contained in that letter as having been written by you?—A. I do not remember having written the letter. There is much there that is not new, but there is some that is. I think that letter has been answered before. I will continue to answer it, if necessary. Of course I am at your service.

Q. I merely ask you if your judgment is that that letter is a copy of a letter written by you?—A. I should not think it was a copy. I should think probably something had been cut out of the letter and something added. People who steal letters would be likely to change them to suit themselves.

Q. I read to you now a letter dated December 22, 1875——

The WITNESS (interposing). My counsel suggests, and I would ask the Commission, whether it is not practicable for you to submit these questions in writing, so that I can write out my answers during the evenings, when I have more time. I have no special objection to answering them here, but some of them seem to come up for the third time.

Commissioner ANDERSON. There are no others coming up more than once. I think we can get through this afternoon.

COMMITTEE NOT NECESSARILY A TEXAS PACIFIC BUT A "COMMERCIAL" ONE.

I will read you a letter dated December 22, 1875, from page 1689 of the record:

NEW YORK, *Dec.* 22, 1875.

FRIEND COLTON: Your letters of the 11th inst., Nos. 111 and 112, are received; also your dispatch that you would send $125,000 in gold. You need send more gold for the January interest. I notice the progress on the tunnels; they go slow. I hope the work on that next to the largest one in the Tehachipi will be pushed. I am glad to notice that you are thinking of commencing it soon. What is the exact length of the San Fernando tunnel? I think —— will return to California in January. I have just returned from Washington. —— was unfortunate about the R. R. committee, that is, there was not a man put on the committee that was on his list, and I must say I was deceived, and he was often with ——, and K. was at his rooms and

spent nearly one evening. The committee is not necessarily a Texas Pacific, but it is a commercial com., and I have not much fear but that they can be convinced that ours is the right bill for the country. If things could have been left as we fixed them last winter there would have been little difficulty in defeating Scott's bill; but their only argument is it is controlled by the Central. That does not amount to much beyond this: It allows members to vote for Scott's bill for one reason, and give the other that it was to break up a great monopoly, &c. If these dam interviewers would keep out of the way it would be much easier travelling. I send a few clippings.

Yours, truly,

C. P. HUNTINGTON.

ATTENTION CALLED TO THE WORD "COMMERCIAL."

I read this letter to call your attention to the fact that the same word appears to have been used in it which was used in a letter read before, being the letter of January 29, 1876. I refer to the word "commercial." You explained the sentence in that letter, "Scott is working mostly among the commercial men," by saying that that referred to boards of trade and persons who had industrial interests throughout the country, and that it was by influencing them that he expected to get assistance to pass his bill. Now, the sentence in the letter that I have just read refers to the committee itself, and states that "the committee is not necessarily a Texas Pacific, but it is a commercial committee." Will you please explain that?

The WITNESS. If I wrote it at all (though I have no recollection of writing it) I think I should have said their geography might influence them. That is, it was on the line of that Pennsylvania interest. I always called Scott's interest in Washington the "Pennsylvania interest," and the Texas Pacific a tail to the Pennsylvania Railroad Company. Scott endeavored to get the committees so organized as that the local interests of their members would lie along the line of the Pennsylvania Railroad, or territory in which that road was interested, while I endeavored to get them farther north, or else from the Gulf States.

COULD CONVINCE MEMBERS THAT "OURS IS THE RIGHT BILL FOR THE COUNTRY."

Q. Would that explain the exact connection of the latter part of the sentence, "And I have not much fear but that they can be convinced that ours is the right bill for the country"?—A. I do not think there was a man in Congress, when you put it squarely before him, that would vote away eighty to one hundred millions when a good road could be built without any aid from the Government. In fact, I know when I sat down with a man myself I hardly ever failed to convince him that that was not the thing to do. He could understand, himself, that his particular person would not be likely to rest in his particular chair at the next session of Congress if he voted away $80,000,000 when it was not necessary. Still it was very hard to "switch" people or prevent them voting against a subsidy that they thought would benefit their particular locality, as is proved by the voting of large sums to clear out trout-streams in the interior of the Republic.

DID NOT MEAN THAT THE COMMITTEE WAS PURCHASABLE.

Q. Do I understand you to say positively that if you did use this word you did not mean to assert that the committee, as formed, was purchasable; that it was a committee that could be bought?—A. Of course not.

Q. You did not mean that?—A. Of course not. I always told our people to keep on "high ground," as I expressed it, to fix them all as well as they could, but never to buy a vote. I was always firm on that point. Under no consideration would we ever give money for a vote, even if votes could be so obtained, because that is not right, and it was easy to demonstrate that our propositions were all in the interest of the public. It costs money to fix these things all the time.

"COMMERCIAL" SHOULD HAVE BEEN "GEOGRAPHICAL."

Q. You think the word "commercial," if used by you, was entirely an error, and should have been "geographical"?—A. I think so. The letters that I wrote to Mr. Colton I usually wrote after I got through my day's work. I used to go down early in the morning to the docks and look after the shipping of our goods. I would stay there until 10 o'clock, then go to my office and attend to business until 3, then go out and attend to purchasing, and get back to the office about dark, and write my letters. Of course if I had expected that so much of my time would have been taken up as has been for the last few years in explaining to Congress, I should have been more particular in my language, and should have kept data, so that I could give to this Commission and all other inquirers all the details of my business. But as the Government has said they would give us so much to build the road, we built the road exactly as we had agreed to. I never thought the Government would go back on its contract, especially when it was so much in their own favor. We worked night and day for years to accomplish this great work, and it never came into my mind that the Government of the United States would be following us around to see where we had put this dollar and that, so long as we fulfilled our contract with them. Still we have to rise and explain, and explain, and explain. What for, I do not know.

IF THE WORD "COMMERCIAL" USED, IT WAS NOT USED IN AN OFFENSIVE OR SINISTER SENSE.

Q. Do I understand you to say that you do not think you used the word "commercial," as applied to the Senate committee, at all in your letter?—A. I do not think I did in any letter. Still it is possible I did, but not in any offensive or sinister sense. I use words frequently that perhaps are not the best words, but they convey my idea. For instance, I talked about "fixing" things. Even my friends would say that that is not a good word; but it was plain to me. All I can say is this: "Out of the abundance of the heart the mouth speaketh."

Commissioner ANDERSON. I think everybody would agree that the word "commercial" is an exceedingly expressive one.

The WITNESS. Well, in that connection I think perhaps it is not the best one. But it was honestly said, and not in the sense in which evil people would be likely to construe it. I meant that it was a proper and a reasonable thing to do, and it would be done honestly and honorably.

Q. You say you might have used the word "geographical"?—A. I say that might have been a better word.

Q. That would be totally different in its meaning from "commercial."—A. Well, yes; but in my previous answers I have explained the sense in which I meant it. If I wrote it at all I wished to convey the idea that there was a commercial interest to be served.

SENATORS "SWITCHED."

Q. Referring to the letter of January 29, 1876, speaking of the committee, you say that "Scott has switched Senator ——, of ——, and ——, of ——, this week, but they can be switched back." Can you tell us who is referred to by those blanks?—A. No; I presume if I wrote the letter at all, I mentioned certain men that had been friendly to our interests. That is, men who would know that they were best serving the interests of the public in doing what we wanted to have them do.

Q. Do you remember who those two gentlemen were who were referred to in those blanks?—A. No. Whoever they were, if the letter was written by me, there was nothing wrong with the men. Men told me in Washington when the Thurman bill passed: "Mr. Huntington, we know it is wrong, but we dare not do anything else."

"RAILROAD COMMITTEE OF HOUSE SET UP FOR SCOTT."

Commissioner ANDERSON. I will read you a letter, dated March 3, 1876, to be found at page 1710 of the record in the Colton case:

NEW YORK, *March* 4, 1876.

FRIEND COLTON: Yours of February 24th, No. 142, is received. I have been in Washington most of the time since Congress met, and you say truly when you write that you think I have had a rough fight there this winter. The R. R. Com. of the House was set up for Scott, and it has been a very difficult matter to switch a majority of the committee away from him, but I think it has been done; but Scott is very able, and then he promises everything to everybody, which helps him for the day and in this fight, and just what he may yet do, I cannot say. There is to be some legislation for the Texas and P. or the S. P. before the 44th Congress goes out, and as Scott promises so much and has such a fearfully long list of creditors to help him, that I have my fears that he will be able to pass his bill next winter, if matter are then as they are to-day. And I think it of so much importance that he is not allowed to build a road parallel to ours with Government aid that I shall endeavor to get our bill passed through the Senate this winter if possible, and the House too. If we only get it through the Senate, and could then get built some road in Arizona before Congress comes together next winter, I think there would be but little doubt we would win the fight. What do all you think of it? I am doing all I can to demoralize Scott in Texas. He has got to have legislation in that State to extend time on his land grant or else it is lost to him.

The Southern Pacific bonds have been admitted to the stock board here; it was a hard thing to do, as they have a rule that no bonds shall be admitted except on completed roads. I think there is an even chance of selling some of the bonds this spring. It is such a large loan that we must be very careful in launching it, as its final success depends very much on the way the loan is put on to the market.

Yours, truly,

C. P. HUNTINGTON.

P. S. These memorandums giving progress of the work on S. P. are very interesting to me.

H.

The WITNESS. That letter, if you will allow me, has been read once; I think twice.

Commissioner ANDERSON. These letters repeat their assertions. This letter, if you will pardon me, has not been read before. I only want to ask you (if you wrote it) what you meant by the use of the expression that "the Railroad Committee of the House was set up for Scott."

The WITNESS. I think, perhaps, it is not the best word, but I meant that he had got his friends to work and got men geographically or otherwise personally friendly to his interests. I suppose there is always more or less "pulling and hauling," as you may say, to get committees right or to get them wrong.

A DIFFICULT MATTER TO "SWITCH" MEMBERS AWAY FROM SCOTT'S BILL.

Q. You say, "It has been a very difficult matter to switch a majority of the committee away from him, but I think it has been done." That expression is giving the same force to the word "switch" that you have already explained?—A. Most assuredly; we had so many good reasons why members should go against Scott's bill and vote for ours that I had always great faith that by giving a man thoroughly to understand what we wanted we could switch him from Scott's bill, unless he or his constituency were geographically interested in it.

SCOTT MAKING A "DIRTY FIGHT."

Q. I will read to you from page 1712 a letter dated March 22, 1876:

NEW YORK, *March* 22, 1876.

FRIEND COLTON: Your letters of March 3d and 8th, Nos. 143 and 144, reached me in Washington. You write me that you wish Senate bill No. 153 to pass. It gives the right of way through the military grounds at Benecia, as you no doubt understand; as amended it gives the right only to the Northern R. R. Co.

I am having a very lively fight in Washington, but things do not look bad.

Scott is making a very dirty fight and I shall try very hard to pay him off, and if I do not live to see the grass grow over him I shall be mistaken. You know I work 365 days in a year when it is necessary.

Yours, truly,

C. P. HUNTINGTON.

What would you understand by the use of the words "a dirty fight" used in that letter as applied to Scott's campaign?—A. I do not remember having written the letter. There are some things, however, in it that have been in my mind before.

Q. If you are positive you did not write the letter I will not ask any question until the letter is produced.—A. I should think there was something in all of those letters probably that were in my letters. There are others that I do not remember anything about.

Q. On your statement that you can not absolutely deny the letter, I again ask you what would be the meaning of the use of the words "dirty fight" as applied to Scott's transaction. Would you mean by that that he was using money on his side?—A. Oh, no,

SOME THINGS PUBLISHED THAT WERE PERSONAL AND UNJUST.

Q. What would you mean?—A. Well, I do not know now particularly. He had some men in Washington that republished some things that were personal and unjust. I suppose it is hardly necessary to speak of the matter here; but there was a little paper in Kentucky that was very bitter against me personally, and published some things about me. Those he got republished in Washington. If I wrote that expression that is possibly what I meant. I have no recollection of saying anything of that kind in the letter. But I know I was very much vexed at the time. I have been in business for myself very actively for over fifty years, and I do not usually need to make any explanation of what I have done. My record is pretty clear. If any man in America has done more for the benefit of the American people or kept more men at work for the last twenty-five years than my associates and myself, and paid them more for their labor, I would like to see him.

"KEEP ON HIGH GROUND."

Q. I will now read you a letter of March 23, 1876, from page 1712 of the case. To shorten matters, unless you desire me to read the whole letter, I will simply read a sentence I desire to call your attention to:

When I see you I have much to tell you of Washington matters that I have not time to write, but I keep on high ground, so that we can not be hurt by any investigation.

Do you recall using a sentence of that character?—A. No; I do not. Still I did frequently use it to my people. I told them to keep "on high ground." I went over to Washington once and found that General Franchot had a lot of cigars and some wine and liquors on his table. I said, "Put those away." He said to some one while I was there, "Huntington is a clever fellow; vote for his bill." I said to him, "Do not talk about Huntington being a clever fellow. Put your liquor and your cigars away. Sit down and give them good solid reasons why this should be done in the public interest, and then you are all right."

A LARGE NUMBER OF SPEECHES PRINTED AND SENT BROADCAST.

Q. I read from page 1717 a letter of April 27, 1876:

NEW YORK, *April* 27, 1876.

FRIEND COLTON: I returned from Washington this morning and find yours of the 11 and 13 insts. on my desk. To-day is the first time that I have been to my office since the 19th. I returned from Washington last Saturday night, but got telegram Sunday that I must be in W. Monday morning, so returned there Sunday night. It seems to me well that you have arranged with the stage-line via Yuma.

We are getting on with the sinking-fund bill as well, perhaps, as we could expect; not much opposition yet, and I have hopes that we can get something through that will be satisfactory to us. Scott, I think, has given up all hopes of getting any subsidy this session, and is asking for eight years more time, and I think he will get it against all we can do. His new bill calls for his building 20 miles each year from San Diego this way and 50 miles west from this end of his road. Scott has several parties that I think do nothing else but write articles against the Central Pacific and its managers, then get them published in such papers as he can get to publish them at small cost, then sends the papers everywhere, and there is no doubt but that he has done much to turn public sentiment against us. If it was known that the C. P. did not control the S. P. I think we could beat him all the time, although he had about the same advantage over us in Washington that we would have over him in Sac. If he wants a committeeman away he gets some fellow (his next friend) to ask him to take a ride to New York or anywhere else, of course on a free pass, and away they go together. Then Scott has always been very liberal in such matters. Scott got a large number of that drunken, worthless dog ———'s speeches printed and sent them broadcast over the country. He has flooded Texas with them. The Sac. Record-Union hurts us very much by abusing our best friends. There was a No. of that paper came over some little time since that abused ——— and some other of our friends, with ———'s name up for President. ——— took it around and showed it. He showed it to ———, with the remark that he did not suppose that he cared anything about it, but that he would show him what the railroad organ said about him. If I owned the paper I would control it or burn it.

Do you recall what I have read as being contained in a letter from you to Mr. Colton?—A. No; there is much there that I do not remember anything about.

Q. Do you know who is referred to in the statement that Scott got a large number of the speeches of somebody whom you refer to as a "drunken, worthless dog"?—A. No; I do not. I regret that I do not have those names and everything, so that I could help this Commission, as I know it would give this Commission pleasure. Still, I do not think it is of any importance to the public.

ONE OF THE "THOUSAND LITTLE ANNOYANCES OF THE DAY."

Q. Do you remember alluding to the articles against the Central Pacific being shown to some persons whose names are left blank here:

Some other of our friends, with ——'s name up for President. —— took it around and showed it. He showed it to ——, with the remark that he did not suppose that he cared anything about it, but that he would show him what the railroad organ said about him.

A. No. If that was written it was about one of the thousand little annoyances of the day that came and went and were forgotten. It must have been some little thing that did not make any impression on my mind. At the time, if I had known, as I said before, that this particular correspondence was to have gone into the national archives to go down to future generations I should have tried to have it full in every way, as it is going to cost the Government a good deal of money and ought to be correct.

NOT TOO LATE TO TELEGRAPH FOR THE LETTERS.

The CHAIRMAN. It is not too late to telegraph for the letters. We shall be in session for some days. You can get the letters.

The WITNESS. If you can show me the necessity for it or how any human being could be benefited by it, black or white, native or foreign born, I will strain a point to get it before the Commission; but if it can serve any human interest I do not know it; therefore I should not like to put myself to a great deal of trouble to amuse any one.

"THE HARDEST FIGHT BY A HUNDRED TIMES."

Q. I read you, from page 1726, a letter of June 7, 1876:

NEW YORK, *June* 7, 1876.

FRIEND COLTON: Your letters, May 29 and 30, Nos. 163 and 164, are received. I am glad to hear that the work on the Tehachipi is moving on satisfactorily. When will the track be laid to the summit? I notice what you say of the Lawrence bill, but it will never become a law. I went to Washington night before last and returned last night. Shall go back to-morrow, so as to be at the meeting of the Judiciary Com. Friday. I am having the hardest fight by a hundred times that I have ever had in Washington, but we shall not be eat up this time. I hope —— will be sent back to Congress. I think it would be a misfortune if he was not. —— has not always been right, but he is a good fellow and is growing every day. —— is always right, and it would be a misfortune to Cal. not to have him in Congress. —— is a damned hog, and should not come back. It is shame enough for a great commercial city like S. F. to send a scavenger like him to Congress once. I have not time to write more.

Yours, truly,

C. P. HUNTINGTON.

Can you refer us to the names of the parties alluded to in this letter?—A. No. There are many things in all these letters that are familiar and many things of which I have no recollection of. It is possible that in every letter there is something that I did write.

FAVORED ELECTION OF MEN WHO FAVORED PUBLIC IMPROVEMENTS.

Q. Do you recollect that in June, 1876, you were in favor of the return of some persons who had represented California in Congress, and opposed to the return of another member?—A. I should say it would have been very strange if we had not been in favor of men that were in favor of public improvements that we knew would largely benefit the public, and (if you will) that would be of some benefit to us,

Q. Do you remember what persons?—A. No; I do not. No doubt I did write such things as that it was well to return large-minded men to Congress, and not well to return little fellows, drinking men, men that had no other business except to malign or blackmail somebody—I will not say "blackmail," but to malign some one. We did not want to have such men get back. If I had written about such a matter, no doubt I should have taken that view. The public interest would have been better served in every case, I believe, to have followed my advice when I gave it than to have done otherwise; that I have no doubt of. I have not been in this country, working as I have, purely for myself. I have been doing many things for the public in a modest, quiet way. I have not made it a purely personal matter all the time. Many times in building the Central Pacific road I would have given anybody largely out of the money that I had if they would have taken the work off my hands and assured me that they would have built the road. I know the same is true of my associates. In one case we agreed to pay interest ten years on $1,500,000 of the bonds—7 per cent. gold bonds. I personally gave my guarantee that I would pay that. I have done many things that I did not do for profit. I did them in order that the road should be a success. California was full of people that wanted to come east, including women and children. That point had its weight with us. It is very well to sneer at that, as people of small minds will, but it had its influence on us, and a very large influence. A railroad would give people a means of crossing the continent comfortably in six days and on land, instead of spending twenty to thirty days on the ocean, with all the inconveniences of such a voyage.

WHO WERE THE OBJECTIONABLE PARTIES?

Q. To return to the point; is it not true that there are three names referred to in this letter—three blanks—at this period in 1877, meaning Messrs. Luttrell, Page, and Piper, California Representatives?—A. I would not say that. Those gentlemen have all been members of Congress.

Q. Was it not one of those three men that you were opposed to, and did not consider worthy of being returned?—A. Well, very likely.

Q. If this letter was written, the uncomplimentary expression applied to the person whom you did not commend, I presume?—A. I presume so.

Q. Was that Mr. Piper?—A. If it was necessary—if any public interest could be served—I could answer that; but I would not like to do so unless the public interest, in however remote a way, could be benefited by it; then I should be disposed to answer the question.

SHOULD BE DEFEATED AT ALMOST ANY COST.

Q. I read to you, from page 1727 of the record, a letter of June 12, 1876:

NEW YORK, *June* 12, 1876.

FRIEND COLTON: Your three letters of the 26th and 27th May, No. ——, are received. I notice what you say of ——, ——, and ——. The latter should be defeated at almost any cost.

WOULD THAT BE A PROPER APPLICATION OF CORPORATION MONEY?

The rest of the letter is immaterial. That is written in the same month as the prior letter. I want to ask you whether it comes within

your definition of the proper application of the moneys of the corporation to use them for the purpose of defeating members of Congress?—A. Well, I do not know. We should not use any money of the Central Pacific to defeat a member of Congress.

Q. "The latter should be defeated at any cost," you say.—A. I have always been in the habit, personally, of "chipping in" for my friends ever since I was twelve years old. When they came around and wanted to elect a good fellow, and defeat a bad one, I would help. If a man did not do that, I should think he was of rather small pattern.

Q. I presume we all "chip in." I do not refer to that. I am referring to moneys of the Central Pacific. To your knowledge have any of the moneys of the Central Pacific been used for election purposes?—A. No. if I had been in San Francisco at the time, and wanted to defeat Mr. Piper, if you will, I should have done it with my own money; I should not have used any money of the Central Pacific Railroad. Mr. Piper did get up in Washington and make a speech on one field day (a piece that he had got somebody to write, I presume), and he delivered it there when the House was about empty, and had it printed in the Record.

WOULD PAY EXPENSES OF A TRIP TO CALIFORNIA.

Q. I will read you, from page 1735 of the Colton case, part of a letter of July 26, 1876:

NEW YORK, *July* 26, 1876.

FRIEND COLTON: I have been working for the last two months to get a party of, say, 25 Southern members of Congress to to go out to Cal., and over the line of the S. P., and see what we have done, and our ability to do. Of course I want no one to go except the best men of the South; men that will go for the right as they understand it, and not as Tom Scott or somebody else understands it. I told Senator Gordon, of Georgia, if he could get up a party of the best men of the South, we would pay all their expenses, which, I suppose, would be not less than $10,000, and I think it would be money well expended. When would be the best time to come?

Do you remember writing in regard to getting up a party of statesmen of that character?—A. I do not. I do remember about speaking to several parties. They were very ignorant of what we had done, and I told them if they would get up a party of good men we would be glad to pay their expenses to California, to give them an opportunity of seeing how much we had done for the country and at how small a cost to the Government. I tried very hard to get them to do this. I do not remember about writting about it, however.

CONSIDERED A LEGITIMATE AND PROPER EXPENDITURE.

Q. But would you consider that expenditure of money as coming within what you have defined as a legitimate and proper expenditure?—A. I should most certainly, as it would be done to educate them up to the necessities of the country west of the Missouri River.

Commissioner ANDERSON. I am going to ask you a question to-morrow that Mr. Crocker said he had not time to think of. I mention it to you now. That is in regard to your views as to the best adjustment to be made between the Government and the company; especially your views as to the paying capacity of the company. Will you be so kind as to revolve that over during the night?

The WITNESS. I will if I can. It is a pretty large question.

Commissioner ANDERSON. But you know that is what the Commission has before it. We were quite surprised to get nothing from Mr. Crocker on the subject.

The WITNESS. Allow me to say that I hope the Commission will go into that subject very thoroughly, because all the money the Government is to get comes from the people who use the road; and I should not think it right to force this generation to pay, if it was possible to do so, what should be distributed through several generations.

ARRANGING TO OBVIATE HOSTILE LEGISLATION.

Q. I will read you from page 1742 of the case, a letter of November 15, 1876:

NEW YORK, *Nov.* 15, 1876.

FRIEND COLTON: I had meeting in Phil. last night with Tom Scott. We meet again here to-morrow. I do not have my own way altogether, but I think we shall agree upon some bill that we can all work for. We shall have to prorate on through business more than I would like; and I think there should be a bridge co. organized (that we are not known in) to build over the Colorado River at, say, Arrowsbury or any other point on the river, then build at the point where the R. R. crosses, under contract with the railroad co. In this way we could tax the through business on this line if we so desired.

That is all of that letter that is material. Do you remember the fact that at this time you began to discuss an arrangement with Mr. Scott which would obviate hostile legislation between the two companies?—A. Colonel Scott and myself had a number of talks, though I do not remember writing to Mr. Colton about it. Scott wanted the two companies to have an even prorate across the continent, which I did not think would be fair, but it was in my mind to have a bridge built across the Colorado River, on which we could have an "arbitrary," so as to equalize or make up in part the difference in the expense of operating our road over that of operating the Texas Pacific.

Q. That bridge was subsequently built, was it not?—A. Yes.

Q. And it was separately organized from the Southern Pacific?—A. Yes.

DIFFICULTIES IN THE WAY OF BUILDING A BRIDGE.

Q. Do you happen to know what it cost to build that bridge?—A. I do not. It cost a good deal. We had to bring our lumber from Puget Sound. The lumber got warped and we had to get more. The Government prevented us a long time from going through a patch of sage brush they had, making the bridge cost a good deal more than it ought to have cost. The timber came from Puget Sound through the straits of Fuca, to San Francisco, and then 722 miles by rail, and lay on those hot burning sands at the bridge site, and a good deal of it got twisted, waiting for permission from the Government to build the approaches to the bridge through the sand and sage brush belonging to the Government.

Q. Do you know who built that bridge?—A. I think the Pacific Improvement Company.

Q. Was it the Western Development Company?—A. It might have been, but I think not.

Q. Were you a stockholder in the Colorado Bridge Company?—A. If built by the Pacific Improvement Company; yes. I do not know how that was.

Q. Are you a stockholder to-day in the Colorado Bridge Company?—A. I presume I am.

Q. Do you receive a portion of the rent which is paid for that bridge?—A. If I am a stockholder I do. If there are dividends coming to me they are credited to me in San Francisco. I never see it if it is paid,

RENT PER ANNUM FOR THE USE OF THE BRIDGE.

Q. Do you know how much rent per annum is paid, either by the Central Pacific or by the Southern Pacific Company, for the use of that bridge?—A. I do not. I know the bridge has been burned up once or twice.

Q. Leaving out the burning up, have you any idea of the first cost of that bridge?—A. I have not.

Commissioner ANDERSON. Mr. Douty stated, in California, that the first cost of the bridge was about $40,000.

Mr. COHEN. Oh, no; $50,000.

Commissioner ANDERSON. Well, say $50,000.

Q. Do you know what rent was fixed to be paid for that bridge by the Central Pacific during the period before the lease in 1885?—A. I do not. It ought to be pretty large, because it is a very dangerous place for a bridge. I never had anything to do with it.

Q. You do not remember whether you were present and voting at the time of the fixing of the rent for the use of that bridge?—A. I do not. Still it is possible I was there. Mr. Cohen says it pays 6 per cent. on the cost.

THE TRUTH SHOULD BE STATED FOR INFORMATION OF THE GOVERNMENT.

Commissioner ANDERSON. Mr. Cohen has a fanciful way of looking at those things. He thinks if a house burns down three times the rent ought to be trebled.

Mr. COHEN. Mr. Anderson, you know the facts in this case as well as I do.

Commissioner ANDERSON. I think that it is an exorbitant rent.

Mr. COHEN. You know the facts. You ought to state the truth. You know the truth, and you ought to state it for the information of the Government. You conceal it all the time, wresting the truth against that company, and trying to make the worse appear the better part. You know just as well as I do that the rent they pay is at the rate of 6 per cent. per annum on the cost of the bridge.

WHAT IS MEANT BY "FIXING UP" A COMMITTEE.

Commissioner ANDERSON. I will read you from a letter on page 1756 of the Colton record, dated March 7, 1877:

NEW YORK, *March* 7, 1877.

FRIEND COLTON: Since writing you last your letters, Feb. 10, 16, and 23, Nos. 28, 29, and 31, have been received. I notice you are looking after the State railroad commissioners. I think it is time. Congress has adjourned, and we have not been hurt, except by the paying out of some money in Washington for hotel bills, etc.

I am quite sure that we stand better in Washington at this time than we ever did before.

The P. M. S. S. Co. got no aid. I will tell you some things about that some time. The sinking-fund bill did not pass, but it is in a much better shape to pass than it ever has been before. I stayed in Washington two days to fix up R. R. committee in the Senate. Scott was there, working for the same thing, but I beat him for once, certain, as the committee is just as we want it, which is a very important thing for us. You will no doubt notice before you get this that we were not able to pass the Texas Pacific bill.

Q. If that letter is a correct copy of a letter written by you I would ask you what you allude to by speaking of fixing up the committee?—A. I do not remember having written the letter. By fixing the com-

mittee I meant getting the best men—those who could not be swerved from the right by any local interests.

Q. How would you try to bring about that result?—A. By endeavoring to get men that, as far as we knew, were in favor of the public interests; that is, against giving $80,000,000 of subsidy to build a road when we would build it for nothing. If I had written this letter I think I should have added "ourselves and the Government," because the Government—that is, the people—were interested as much as we were; in fact, more.

Q. What I want to know is what you would do to secure the result?—A. I would go to some member of the House whom I knew to be friendly and ask him to see the Speaker and recommend the appointment on the committee of good men who could not be switched by any local interest.

Q. The Speaker of the House and the President of the Senate?—A. Yes.

Q. This letter refers to the Senate?—A. Yes.

A CHANGE IN THE "MAKE-UP" OF THE COMMITTEE.

Q. On this same subject I read you from page 1758 of the record, from a letter dated March 14, 1877, omitting the first part of the letter, the following sentence:

After the Senate Railroad Committee was made up Scott went to Washington in a special train, and got one of our men off and one of his on, but they did not give him the com. Gordon of Ga. was taken off and H. Bogy of Mo. put on. Scott could not have troubled us with the S. P. if the S. P. had been left by itself as we had it, but putting it with the C. P., as it had been done, makes it an ugly fight, and it will continue to go more and more so until the S. P. is built a long way east of where it is now.

Do you remember such a change occurring as that in the railroad committee of that year?—A. I do not; but no one would suspect General Gordon of being anything but a high-toned, honorable man. He was in Georgia, and his "geography" was in favor of the Southern Pacific line—that is, the road would certainly be a benefit to his State, while a Missouri man would have been in favor of Scott's road, because it would run through Missouri.

C. P. HUNTINGTON.

The Commission then adjourned to to-morrow, Thursday, September 22, 1887, at 10 a. m.

The following letter was subsequently received from Mr. Huntington:

SUBJECT: COMPENSATION FOR MAILS ON AIDED ROADS.

[Central Pacific Railroad Company, 23 Broad street. C. P. Huntington, vice-president.]

NEW YORK, *October* 13, 1887.

Hon. ROBERT E. PATTISON,
Chairman U. S. Pacific Railway Commission, New York:

DEAR SIR: During my testimony before the Commission on the 21st ult. I stated that the Central and Union Pacific Railroad Companies were allowed by the Government a less rate for carrying the U. S. mails over the Rocky Mountain and Sierra Nevada ranges, where every element of railroad operation was more expensive, than was allowed to the other non-aided railroad companies throughout the country.

The members of the Commission expressed a desire to be furnished with further evidence in support of this statement. I beg to refer them to an "act making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1877, and for other purposes" (19 Stat., 78), by which "the compensation to all railroad companies for the transportation of mails is reduced 10 per centum per annum" from the rates theretofore prevailing.

Section 13 of the same act (19 Stat., 82) is as follows: "That all railroad companies whose railroad was constructed in whole or in part by a land grant made by Congress on the condition that the mails should be transported over their road at such price as Congress should by law direct, shall receive only 80 per centum of the compensation authorized by this act."

By the act making like appropriations for the year ending June 30, 1879 (20 Stat., 148), the compensation to all railroad companies for the transportation of mails was further reduced 5 per centum per annum, and my understanding is that that is the unrepealed law and practice to this day.

Permit me to add that this is not the full extent of the grievance. This arbitrary cutting down the compensation for mail carriage originated in a desire on the part of the Executive to shift the deficit of receipts of the Department under its expenditures to the shoulders of the railroad companies of the country, and on the part of the respective partisans in Congress to figure out a showing of economy in appropriations more apparent than real.

The non-aided railroad companies were at liberty to refuse the mail carriage on terms they deemed unjust, if they deemed it policy, and some of them threatened so to do. The land grant and subsidized roads could not refuse, so that the bulk of the retrenchment fell to their share. Deficiency bills were reported year after year for the payment of the mail carriage by these companies who were so situated as to enforce their demands. On the other hand, all efforts to secure the full payment which the Pacific Railroad act of 1862 contemplates, by deficiency appropriations, have failed of effect. This cause of complaint against the Government is worse than I had before stated it.

Yours, very respectfully,

C. P. HUNTINGTON,
Vice-President.

No. 10 WALL STREET, NEW YORK,
Thursday, September 22, 1887.

The Commission met pursuant to adjournment, all the Commissioners being present.

COLLIS P. HUNTINGTON, being further examined, testified as follows:

A LETTER TO A FLORIDA SENATOR.

By Commissioner ANDERSON:

Question. I will read to you from page 1763 of the record in the Colton suit, a letter dated March 26, 1877, as follows:

MARCH 20TH, 1877.

FRIEND COLTON: I gave to-day a letter to Senator ——, of Florida. He is a good fellow enough, and our friend, after he is *convinced* we are right.

H.

Do you remember giving a letter in 1876 to a Senator from Florida?—Answer. I do not. Very likely I should have done so if he asked me, and if he was going to California. To almost all the people who were going over there, who asked me for letters, I gave them.

Q. Can you supply the name of the Senator from Florida that is referred to in this letter?—A. No. I do not remember. I knew both of the Senators from Florida.

Q. Do you remember seeing him about that date, 1877?—A. It is very difficult to carry dates. Of course I was seeing all those people almost every day when I was in Washington. Probably I saw the Senators from Florida.

Q. Did you have any special acquaintance with Senator Conover from Florida?—A. I used to meet him and Senator Jones frequently. I could not call it any special acquaintance.

A FRIEND OF THE ENTERPRISE.

Q. Was this gentleman regarded as a friend of the enterprise and a being satisfied that your views were correct?—A. I should think s because the Southern road, which was more particularly in controver ran into his section, and would accommodate his people. Ours w wholly a Southern road and, of course, benefited the Gulf States, a they should all have been in favor of the Southern road, as against th road from Saint Louis to San Diego.

Q. Do you remember the occasion of his visit to California in 1877, anything about it?—A. No; I do not remember the date.

CAREFUL AS TO CHOICE OF A UNITED STATES SENATOR.

Q. I quote from a letter on page 1765, dated April 3, 1887. Th first part of the letter refers to business matters, which, of course, I wi read if you desire. I read especially the following quotations:

We should be very careful to get a U. S. Senator from Cal. that will be disposed use us fairly, and then have the power to help us. ———, I think, will be friendl and there is no man in the Senate that can push a measure further than he can. Ra road credits are very sensitive here.

Do you remember in 1877 what Senator it was that you referred to?— A. I do not. Of course we were watching to get fair, good men an able men to act upon these interests that the public and we were inte ested in. But I do not remember who that referred to.

Q. Who was the next Senator from California elected after 1877?— A. I could not say. It is easily found out, I suppose.

Q. Was Senator Sargent elected soon afterwards?—A. I shoul think not. He was in the Senate, but I should have said it was earli than that. He was a very able man. If he was running for a positio I should have liked very much to have had him get the place. He wa a man above suspicion. I knew him intimately for years, and neve heard a breath of suspicion or taint against the character of A. A. Sa gent. I should do all I could for him for any place that he wanted whether I had any personal interest in the matter or not.

THE LOS ANGELES AND INDEPENDENCE ROAD.

Q. I will read you a letter from page 1766 of the Colton case, date April 20, 1877:

NEW YORK, *April 20th*, 1877.

FRIEND COLTON: Yours of the 11th, No. 40, is received. I notice what you wri of financial matters, and I quite agree with you that we must stop all outlays that w possibly can and reduce our floating debt.

I think with you that it will be too *hot to work* in Arizona the coming summer, b it is possible that it will be too hot in Washington to work to advantage there, a we may think it best to send some to work east of Yuma for one hundred miles or s and have it reported over the wires that the work is being rapidly pushed forwar &c.

I wrote Crocker on the 7th inst. in relation to Jones' Los Angeles road. A few da after I saw Jones I met Gould. He told me Keene had bought it. Of course I said was glad to hear it, as we did not want the road at any price; that I made Jones a offer for it because we wanted him to help us with our (C. P. & U. P.) sinking fu bill in Congress, and I was very glad it had got (the railroad) out of the way, an that I saw nothing now to prevent friendly relations between ——— and ourselve &c. On the Sunday following ——— came to my house and said he came from ——— and ———, and that in the panic or break in Panama a few days before ——— wo have been broken if ——— and ——— had not come in to help him out, and to do it the had to take ———'s railroad, &c., and he asked me, after some beating about, if w

wanted the road at $480,000. I told him that we did not want it at all, but that we would take it so as to work in harmony with ——, and that I had made him an offer as I wrote Crocker, and my impression was our people would do that now, but I was quite sure we would rather —— and —— would keep the road, if by that —— could be made our friend, &c. What do you all think of this? I am rather disposed to think that —— and —— have not bought the road but hold it as collateral.

Yours, truly,

C. P. HUNTINGTON.

Do you remember writing that letter?—A. I do not remember having written such a letter. There are some ideas in there that have been in my mind before. You mention, I believe, one Senator's name there.

Q. The language of the letter is, "that I made Jonesan offer for it." Is that Senator Jones?—A. I should think very very likely it was.

Q. Jones of Nevada or Jones of Florida?—A. Jones of Nevada.

Q. Did Senator Jones have an interest in the road that is referred to there?—A. Senator Jones, I think, was sole owner.

Q. What is the title of the road?—A. The Los Angeles and Independence road, I think. It is the Santa Monica road.

Q. Was that road subsequently purchased by the Central Pacific or its directors?—A. It was not.

BOUGHT BY THE WESTERN DEVELOPMENT COMPANY.

Q. What disposition was made of that road?—A. I should say the Western Development Company bought it.

Q. Bought it and completed it, did they not?—A. No; it was completed from Santa Monica to Los Angeles.

Q. Who were the stockholders in the Western Development Company?—A. I think the large majority of the stock was held by Leland Stanford, Mark Hopkins, Charles Crocker, and myself.

Q. Those four held all of it, did they not?—A. Not all.

Q. Had you not, of the 50,000 shares, over 49,000?—A. I think not. I have never seen the books of the Western Development Company. From the very start, in all our contract companies, we have been endeavoring to get people to put in money with us, to share the profits and take the risk. We have not been able to get in people as we would have liked.

Q. Was this road immediately leased by the Western Development Company to the Central Pacific, and subsequently to the Southern Pacific?—A. I could not say. That is among the data in California, and I have had but little to do with it.

WANTED TO HAVE THE LOS ANGELES AND INDEPENDENCE ROAD OUT OF THE WAY.

Q. By whom has this road been operated ever since?—A. I could not say. Our people have changed the lease, I think, once or twice. It was a road that was running in opposition to the road from Wilmington to Los Angeles. I wished to have it out of the way. The Santa Monica road was cutting rates, and the business was light for one road. To divide the volume of business and then cut the rate would leave but little for either road.

Q. You say that some of the ideas contained in this letter you recognize as having been in your mind before the date of the letter. Will you tell me whether this is one of them?

I made Jones an offer for it, because we wanted him to help us with our (Central Pacific and Union Pacific) sinking fund bill in Congress.

A. I would not put it in that way. Mr. Jones, I think, was short of money, and I bought the road as cheap as I could. I knew that he was opposed to the Government giving this large subsidy asked by the Texas Pacific, and I, no doubt, thought that if he could be relieved of this embarrassment he would have more time to attend to his public duties, one of which would be to kill this Texas Pacific subsidy bill.

Mr. COHEN. Mr. Jones was the sole owner of that road, was he not?

The WITNESS. I think so. If I remember right he told me that the road cost him $716,000. I gave him, I think, $200,000 in cash for it and fifty bonds; and the road cost him $716,000, as, I think, he told me.

Q. The bill that you have referred to in your answer relating to the granting of subsidies for the completion of other roads is not the bill referred to in the sentence I have quoted?—A. It might not have been. It might have been something else; I do not pretend to carry these dates. I get the ideas of different things that we have done. But good men have generally been for them as soon as it was explained to them how they affected the public interests.

Q. I understand your statement, then, to be that if Mr. Jones were relieved from his embarrassment he could give more attention to the intelligent consideration of the bill, whatever it was?—A. Of the bills before the Senate.

Q. What bill did you understand this sentence to refer to: "Our (C. P. & U. P.) sinking-fund bill in Congress"? That letter was written in 1877. Is not that the Thurman act?—A. No, I think not. I wrote a letter, as I remember it, to the Secretary of the Treasury, saying that we thought it important that we should have a proper sinking-fund bill to pay this money that was due to the Government. I am quite sure a year or more I worked upon that before the introduction of the Thurman bill. The Thurman bill was taken up more as a political measure to "take the wind," as I suppose the boys would say, out of our sails; or, rather, I should say, to gain on the political side rather than to hurt us.

"THINGS HAVE CHANGED VERY MUCH."

Q. This bill referred to in this letter is a bill that would have been preferred by the Central Pacific to the Thurman act which was actually passed, is it not?—A. As I remember, it would, as it was a bill under which there would have been a real sinking fund, while the Thurman bill has sunk the money of the company without benefiting the Government or any one else. Things have changed very much, as the Government has furnished means to build a road on each side of the Central Pacific, which has taken it out of the power of the Central Pacific to earn enough net money to take care of the sinking fund such as we then proposed.

Q. Can you supply any of the blanks contained in this letter as to the names of persons whom Mr. Jones had reference to as having been called on? Look at the letter and state.—A. I remember how you read them. I could not. I was writing about pretty much everybody that was interested in public matters. I never have given those letters much weight. I wrote them hurriedly in the evenings, as I have said, after getting through my day's work, and I did not suppose that they would ever be considered as important as they are, or as there is an effort made, I would say, to make them important. They mostly relate to efforts that we made to save the Government from paying $80,000,000 and building a competing road to the Central Pacific, in which the Government had a large interest. We not only wanted to protect ourselves

by paying that debt, but also by building a road that would be at least friendly, and would serve the public as it has served without any cost to the Government.

"MUST HAVE FRIENDS IN CONGRESS FROM THE WEST COAST."

Q. I will read a letter from page 1770 of the Colton case, dated May 7, 1887:

NEW YORK, *May 7th*, 1877.

FRIEND COLTON: Since I last wrote you your Nos. 41, 42, and 43 have been received.

Mr. Bryan, the Japanese commissioner, was in our office here last week and said he had been ordered to go to Europe. How long he should remain there he could not say, but he thought not long; would see you in S. F. on his return in relation to mails to Japan.

I am glad to get so good a report of the Ione coal. May it ever continue to burn as well.

I hope the Arizona business will meet your expectations. We need the money that the business will bring badly.

I notice what you say of ———, the Florida Senator. He is a clever fellow, but don't go any money on him.

I will have notice for the redemption of S. P. bonds to the amount of $200,000 published here as you request.

I suppose you will put in the S. P. bonds that belong to the W. D. Co. If not, I want to stand in as the others do. I would not put in any series A.

The $70,000 that I let ——— have are tied up for ten years. I think we can make more than the interest on the amount paid for ———'s road out of our other roads by not running the ——— road at all; and ——— is very good-natured now, and we need his help in Congress very much; and I have no doubt we shall have it. We must have friends in Congress from the West coast, as it is very important, I think, that we kill the open highway and get a fair sinking-fund bill by which we can get time beyond the maturity of the bonds that the Government loaned us to pay the indebtedness; and I think if any Republican is elected in ———'s place he (———) is worth to us, if he comes back as our friend, as much as any six new men, and he should be returned.

It is fearfully hard to get money here; I think never so much so before.

Yours truly,

C. P. HUNTINGTON.

Do you recollect any of the sentiments contained in that letter?—A. I would wish to say, in answer to the other letter, as there seems to be an effort to damage some public men, that I never gave Senator Jones any money for any purpose whatever connected with legislation. I bought his road and gave him two hundred and odd thousand dollars for a road that he told me cost him seven hundred thousand and odd, and I believed what he told me. He does not need any one to protect him; but still, as an effort seems to have been made, I wish to put those facts upon the record. I do not remember having written that letter, though there are ideas there that are not new to me. I see nothing wrong in it, or in any part of it. We wanted to pay the Government what we owed; we wanted to pass a sinking-fund bill, and we did whatever we could that was right to do. I do not think it would be necessary that we should, and I don't think we would be called upon, if we were unprincipled enough to do it, to pay money to pass a bill allowing us to pay the Government all we owed them, in lieu of paying them as a few politicians wanted it.

"POLITICIANS GET AWFULLY SHORT" OF FUNDS.

Q. Will you please tell me whether the Florida Senator here referred to is the same gentleman to whom you appear to have given a letter of introduction to Mr. Colton shortly prior?—A. I could not say; I think very likely it was—if I wrote it at all.

Q. If you wrote it at all, can you tell us the meaning of these words: "He is a clever fellow, but don't go any money on him"?—A. Well, the fact of it is, a good many of these politicians get awfully short; but I have always refused to lend them money unless they had good collateral. I do not think the Florida Senator was an exception.

Q. Then you think the meaning was: "Don't lend him any money without security?"—A. Of course, if we had money to lend, and he had Government bonds or any other good collateral, we should accommodate him.

Q. Your company was not in the habit of lending money?—A. It does not necessarily follow that the Central Pacific was going to lend him any money. I lend money myself sometimes.

Q. The allusion to $70,000 of bonds that are tied up for ten years; can you tell us what that refers to?

The $70,000 that I let ——— have are tied up for ten years. I think we can make more than the interest on the amount paid for ———'s road out of our other roads by not running the ——— at all; and ——— is very good-natured now.

THE SANTA MONICA ROAD WAS CUTTING.

A. I do not remember about the bonds being tied up, but it would have been a wise provision of the trade to keep those bonds off the market while we were selling the same securities ourselves. Los Angeles, Wilmington, and Santa Monica are not far apart, and the Los Angeles trade was pretty important, and steamers ran from San Francisco to Santa Monica for the Los Angeles trade. We ran to Wilmington and were competing for that trade, which was being cut all to pieces by the Santa Monica road, and I did think that we could save more money than the interest on the two hundred and odd thousand dollars, even if we did not run the Santa Monica road at all.

Q. The road referred to is evidently the road from Los Angeles to Santa Monica?—A. Yes.

SINKING-FUND BILL IN CONGRESS.

Q. Is the sinking-fund bill that is referred to in this letter, as it presents itself to your mind, the same bill that was referred to in the former letter, which you described as "our sinking-fund bill," in the words "help us with our (C. P. and U. P.) sinking fund in Congress"? The reference in the present letter is: "We must have friends in Congress from the West Coast, as it is very important, I think, that we kill the open highway, and get a fair sinking-fund bill by which we can get time beyond the maturity of the bonds that the Government loaned us to pay the indebtedness." Is that the same sinking-fund bill that the company then desired to have passed?—A. I should suppose so, if I wrote the letter.

Q. Do you remember having used such an expression as "kill the open highway"? What would that refer to?—A. I do not remember having used any such expression.

Q. Can you give any explanation as to what construction can be put upon those words: "Kill the open highway"?—A. No; I cannot. It could hardly be a railroad, for an open highway would be a road on which they would let everybody run cars, which would be impossible on a single-track road.

SCOTT'S "OPEN HIGHWAY."

Q. I will read you a letter from page 1776 of the Colton record:

NEW YORK, *May 15th*, 1877.

FRIEND COLTON: Yours of the 7th inst. is received. I am glad you are paying some attention to Gen. Taylor and Mr. Kasson. Taylor can do us much good in the South. I think, by the way, he would like to get some position with us in Cal. Mr. Kasson has always been our friend in Congress, and, as he is a very able man, has been able to do us much good, and he has never lost us one dollar. I think I have written you before about Senator ———. He may want to borrow some money; but we are so short this summer, I do not see how we can let him have any in Cal.

I have just given Senator ———, of Kansas, a letter to you. He is a good fellow and can do us much good, and, I think, is well disposed toward us.

Senator ——— is coming over; also his brother in-law, ———. They are good fellows, but ——— means business; not there, but in W.

Scott is working everywhere for his open highway, but I think we can beat him; but it will cost money and harder work to beat him with money under the plan of some of my associates, viz: having it understood that the C. P. and S. P. are, as it were, one property. Then it would be without money if the public could know the facts; that is, that the S. P. is a separate and distinct property.

Railroad credits are as badly demoralized as ever here. The Baltimore and Ohio R. R. paper is thrown out by nearly, if not all, the banks here.

I hope before this reaches you that the road will be completed to Fort Yuma and a large outlay stopped there. I would like to know what the road has cost up to this time, say from Goshen south, and have the items given.

Jay Gould told me the U. P. had contracted to have a branch built 100 miles long from their road towards the Black Hills, for which they pay for the road (no rolling stock) $9,000 per mile, iron rails. I guess he don't do as well as that.

Yours, truly,

C. P. HUNTINGTON.

I am disposed to think we could trade with Scott for all the T. and P. rights west of the Rio Grande for a small sum.

Is there anything in that letter that you recall?—A. In all those letters there are ideas that are not new to me, and there are others that I have no recollection of.

Q. Does the suggestion as to Scott's "open highway" refresh your recollection as to the use of the term "kill the open highway" in the other letter?—A. No; I do not see how it could mean an "open highway," unless Scott might have said he was going to build a railroad and allow everybody to run cars on it.

Q. Might it not have been a sarcastical allusion to Scott's plan, or to Scott's road?—A. It is possible. Of course we were building a road; we took all honorable means that we could to succeed; and wanted to pass a sinking-fund bill.

Q. Do you recollect writing to Colton that a certain Senator, whose name is not given, might want to borrow some money, but that you were too short to let him have any in California?—A. No; I do not. There are quite a number, though, who have been in the Senate, I think, in its history, whom I would not be likely to have much money for when they wanted to borrow.

Q. But would you be likely to write to Mr. Colton with reference to the subject and give him a warning?—A. Well, I might, and I might not.

Q. The point would be that if he were not warned he might possibly lend money and lose it?—A. I do not remember having written such a letter. It would have been very proper to have done so surely, if I thought he would lose the money by lending it.

Q. Can you give us the name of the Senator referred to in the connection I have just stated?—A. I cannot. If I had the list to look

over, I have no doubt I could tell more than one as to whom it would not be safe to have much money when they wanted to borrow.

A KANSAS SENATOR GETS A LETTER.

Q. (Reading:)

I have just given Senator ———, of Kansas, a letter to you. He is a good fellow and can do us much good, and, I think, is well disposed towards us.

Can you tell us who that Senator was?—A. No; I do not know. Any gentleman, I think, who wanted to do the right thing would do what we wanted to have done, and I should be very likely to give him a pass.

Q. He is identified as a "Senator from Kansas." Do you know who the Senators from Kansas were at that date, May, 1877?—A. I do not; but that is easily ascertained.

"GOOD FELLOWS BUT MEAN BUSINESS."

Q. The next allusion is:

Senator ——— is coming over; also his brother-in-law, ———. They are good fellows, but ——— means business; not there, but in W.

Am I correct in assuming that "W." means Washington?—A. That is the first letter in the word Washington, certainly. You might or might not be correct. I do not recollect having written any such letter.

Q. (Reading:) "Senator ——— is coming over." How would you construe that? Coming over to California?—A. I do not know whether it meant coming over there, or coming over to the right view of the subject. We might have shown him that what we wanted was the correct thing; and he might be coming over to the right.

Q. Coming over to the right view of the subject?—A. Yes.

Q. (Reading:) "Also his brother-in-law, ———." Do you remember any Senator at that time who had a brother-in-law in whose position, or in whose views, you were interested?—A. I do not.

Q. Can you inform us who is referred to by this "Senator ———" who was "coming over"?—A. No. I am writing a great many letters every day, and if I had written portions of these I could hardly be expected to remember much about them, as the names seem to be all blank.

AS TO STATEMENT THAT CENTRAL PACIFIC HAD NOT EARNED ITS DIVIDEND.

Q. I will read you from page 1799 of the Colton case a letter under date of October 29, 1877:

NEW YORK, *October 29th*, 1877.

FRIEND COLTON: Herewith I send mem. of bills payable in November. A very heavy list as the money market is to-day, but I think $400,000 of it will have to come from the earnings of the roads, and we should begin to lay by something this month for the January interest. We should not pay any dividends this fall. It would hurt us in Washington, and here particularly with the German bankers. Mr. Herman told me a few days since, when I asked him for money, that he had none then, but if he had he would not lend us any if we paid div. this fall. He said we did not earn last year as much as we declared in dividends, and in looking over the annual report he seems to be right, and I cannot find where our sinking fund makes any figure in the profit and loss account of the report. I wish you would examine the last report in relation to the above two things.

Yours, truly,

C. P. HUNTINGTON.

Do you recollect writing on that subject?—A. I do not. I have been always very careful about looking after our financial matters and seeing that everything was paid. This letter is in that direction. I do not recollect having written it, or having been refused any money by any German bankers.

Q. I call your attention more particularly to the statement made by you, that after examination you had concluded this banker was right in stating that "we did not earn last year as much as we declared in dividends, and in looking over the annual report he seems to be right." Do you remember whether that was the conclusion you reached?—A. I remember something of the kind. I do not know that it was at that date I wrote out for an explanation, and they said that there was considerable net money out of the earnings of previous years.

Q. From prior years?—A. Prior years; and that it was all right. And it was all right. I do not remember the figures, but I know the impression on my mind was very distinct that it was all right from explanations that they made. We have always been very particular about such things, not to pay any dividends that were not earned.

Q. I am to understand that your own conclusion was that as far as the assertion made in this note is concerned, you subsequently became satisfied that the dividend which was declared was absolutely declared out of earnings either of that year or of prior years—out of the surplus?—A. I do not connect it with that letter particularly, but I know that at some time I asked them the question, and they explained it to me, and became satisfied that it was all right.

PERSONNEL OF RAILROAD COMMITTEE.

Q. I now read you a sentence from a letter on page 1800 of the Colton case, dated October 30, 1877. After referring to matters of business, I find this sentence:

The committees are made up for the 45th Congress. I think the R. R. Com. is right, but the Com. on Territories I do not like. A different one was promised me. Sherrel has just telegraphed me to come to Washington to-night. I shall not go as I am not well, and to always go at Sherrell's call would kill me or any one else in one session of Congress. I think there never was so many strikers in Washington before, and I think there will be more bills of an unfriendly character offered than ever before.

Do you remember anything in regard to that subject in the fall of 1877?—A. I do not. I know there have always been a great many people in Washington, belonging to the Third House, who were very impecunious. The landlords, I was told, were after them very sharp; and they were making great efforts to raise money to pay board bills.

Q. I refer particularly to this: "A different one [committee] was promised me." Do you recollect using such a sentence as that in any of your letters?—A. I do not. I cannot imagine where I would have got the promise. No Speaker ever promised me anything. Of course we brought all the influence to bear that we could, to have appointed good men, who could not be swerved by small politics or by local influences against the right.

Q. In the course of such efforts the personnel of the committee, as contemplated, must have been the subject of discussion?—A. Most assuredly it would have been.

Q. So that this sentence may mean that, after conferring with your friends in Washington, they had represented to you that they believed their efforts would be successful in getting such a committee appointed as you desired?—A. We should naturally endeavor to get good men on the committees.

A GOOD MANY STRIKERS IN WASHINGTON.

Q. (Reading.) "I think there never was so many strikers in Washington before." That, I believe, you have explained by saying it was true that there were a great many persons in Washington who were more or less hungry and wanted their hotel bills paid?—A. Well, it was so, I believe; and as far as I know is so in all places where there is legislation going on. There are people in those places who want to be very useful to you, and who have "great influence," taking their own story for it. Of course, where one was a proper man no doubt we would employ him. I do not remember any particular case. I refer particularly to the "members of the Third House," as they are commonly called.

Commissioner LITTLER. As that house is not a recognized house under the Constitution I wish you would explain what you mean.

The WITNESS. It is not organized under the Constitution of the United States.

TEMPER OF CONGRESS NOT VERY GOOD—SOMEBODY MAY GET HURT.

Q. I will now read you a letter from page 1802, of the Colton case, dated November 9, 1877, omitting the business portion of the letter:

I do not think we can get any legislation this session for extension of land grants or for changing line of road unless we pay more for it than it is worth. Scott seems to be very confident that he can pass his T. and P. bill. I do not believe he can. Some parties are making great efforts to pass a bill through Congress that will compel the U. P. and C. P. to pay large sums into a sinking fund, and I have some fears that such a bill may pass. Jim Keene and others of Jay Gould's enemies are in it, and will pay money to pass. We have a hearing to-morrow before the Judiciary Com. The temper of Congress is not good and I fear we may be hurt, and somehow I do not feel so much like doing battle with the whole human race as I once did. I go to Washington to-night. The petition for change of line of S. P. has just come in.

Yours truly,

C. P. HUNTINGTON.

The WITNESS. What did I say about the human race?

Commissioner ANDERSON. "Somehow I don't feel so much like doing battle with the whole human race as I once did."

The WITNESS. I do not recollect ever having such a feeling come over me.

Q. You are ready still to do battle with the whole human race?—A. Yes; always ready to stand for the right, as I understand it.

Commissioner ANDERSON. It is not "doing battle for," but "doing battle with."

Mr. COHEN. It is a misprint.

The WITNESS. Either way will do.

Commissioner ANDERSON (to Mr. Cohen). Do you think it is a misprint?

Mr. COHEN. It must be. I do not know anything about it.

A FEAR OF HERR MOST AND HIS CROWD.

Commissioner ANDERSON. It follows the words, "The temper of Congress is not good and I fear we may be hurt." The context would not indicate that you were referring to peaceful methods of promoting the welfare of humanity, but the expression "doing battle" appears to refer to the fear that you would be antagonized by the temper of Congress and by what they intended to do.

The WITNESS. I do not remember having ever written that, but there was one time when it seemed as if Herr Most and his crowd had gath-

ered there and were going to strike wherever they could at property legitimately earned. Of course there were not many such; but still they made a good deal of noise. They were there for their own objects and reasons; I did not inquire what they were, but I do remember that there was a time when they struck out at legitimate interests.

OPPOSITION TO THE THURMAN BILL WITHDRAWN.

Q. This reference to a bill to compel the Union Pacific and Central Pacific to pay large sums into a sinking fund was doubtless to the Thurman bill, which was subsequently passed, and to the position it then occupied in Congress, I presume?—A. It is possible. The Thurman bill we were opposed to; but as we were told it would be a final settlement of the whole matter, we did not toward the last oppose it. They said that that should be the settlement, and we thought if that could be the finality we would not oppose it.

Q. Do you remember ascertaining at this time that "Jim Keene and others of Jay Gould's enemies" were in favor of and working to pass the Thurman bill?—A. I do not recollect now that I ever knew that Jim Keene had any interest in anything there. I have been told, and I believe, that the speculators in shares tried to get all sorts of legislation to benefit themselves and to send stocks up or down as their particular interests might require; and I think no one questions but what that is being done continuously.

BUYING VOTES IN CONGRESS NOT BENEFICIAL TO ANYBODY.

Q. The expression used in this letter, if you wrote it, is applied to speculators who were trying to get the Thurman bill passed. The letter says they "will pay money to pass" the bill. Does that refer to the use of money such as you have referred to before in explaining to members of Congress, or to the belief on your part that an improper use of money was to be made?—A. I do not suppose that anybody could go into Congress and buy votes that would be of any benefit to him. While it is very likely that there is a percentage in every body of men that may be influenced by money, and while it is very likely that there have always been such men in Congress, still if you should buy two or three of them and get them to work for you, they would drive away ten honest men for every one such man you hired to work for you.

Q. Do I understand you to mean by that, that you do think that occasionally it does happen, though it may be a mistaken policy, that a small percentage of members of the legislature are hired by reward in money, or in stock, or for value, to assist in the passage of legislation or to prevent hostile legislation?—A. I should think it would be strange if such a case had not happened, although the principle is wrong and the policy, I think, would be bad. What I did say, however, was, that in any large body of men there is always a small percentage of men that are not true to themselves or to anybody else; but they are pretty generally known; and you cannot employ them to your own advantage. What others do, of course, I have no means of knowing.

TO GET LEGISLATION THIS SESSION MUST PAY MORE THAN IT IS WORTH.

Q. I will read you another sentence:

I do not think we can get any legislation this session for extension of land grants, or for changing line of road unless we pay more for it than it is worth.

If that sentence was used by you, what payment did you refer to, the language being "pay more for it than it is worth"?—A. Just what I would mean if I had a case in court. Sometimes when a man has sued me I have settled, not because it was right, but because I thought I could not employ counsel to defend it as cheaply as I could settle it. In this case I probably thought that it was not worth the bringing men from different parts of the United States to make efforts to extend the grant. That meaning seems to me to be very clear, and I think almost any one would so construe it, except some party that is looking with a desire to find some unclean thing.

"ANNOYED BY THE WASHINGTON BUSINESS."

Q. I will read you from page 1803 of the Colton case the following letter:

NEW YORK, *November* 15*th*, 1877.

FRIEND COLTON: Yours of the 2nd, No. 27, came to hand some days since, and would have been acknowledged before but for the reason that I have been very busy in Washington most of the time and I return there again to-morrow night, as I have a hearing before the Judiciary Committee on Saturday. You can have no idea how I am annoyed by this Washington business, and I must and will give it up after this session. If we are not hurt this session it will be because we pay much money to prevent it, and you know how hard it is to get it to pay for such purposes; and I do not see my way clear to get though here and pay the Jan. interest with other bills payable to Jan. 1st, with less than $2,000,000, and possibly not for that. I hear from all directions that Scott is very sure of passing his T. and P. bill this session. I do not believe it; but he has never before, I think, made the effort that he is now making. I think Congress will try very hard to pass some kind of a bill to make us commence paying on what we owe the Government. I am striving very hard to get a bill in such a shape that we can accept it, as this W. business will kill me yet if I have to continue the fight from year to year, and then every year the fight grows more and more expensive; and rather than let it continue as it is from year to year, as it is, I would rather they take the road and done with it.

Yours, etc.,

C. P. HUNTINGTON.

Do you remember substantially having those sentiments at that time in November, 1877?—A. No; I have no recollection of having got as tired as that letter would seem to show that I was. I have been pretty vigorous for over fifty years.

Q. As to those allusions to the payment of money you make the same explanation you have made before?—A. Most assuredly. I do not know what other construction could well be put upon them.

"MATTERS NEVER LOOKED WORSE IN WASHINGTON."

Q. I will read you from page 1806 of the Colton record, under date of November 22, 1887, as follows:

NEW YORK, *Nov.* 22, 1887.

FRIEND COLTON: Yours, Nos. 28 and 29 and 30, are received. Why I asked you how much we owe to the Bank of Nevada was, Kelley, of E. K. & Co., said that he heard we owed them $2,000,000. I said to him that I did not think the C. P. owed them anything, but that I would write and find out. Matters never looked worse in Washington than they do at this time. It seems as though all the strikers in the world were there. I send with this copy of one of their letters I received yesterday, all of the same tenor. The one I send is from ex-Senator ———. They have a bill in to make the Pacific roads pay the Gov. what they owe (not due). The Gov. put it into a fund to be used to build the Texas and Pacific road, and do such other things as the people most do want. If you have ties and rails at Yuma I think it would be well to keep a few men at work extending the S. P.; it will help us in W. I would not do but very little, just enough to say work, but not enough to feel the cost. Money is getting some easier, but the distrust of railroad credits is worse than ever, if that is possible.

Yours truly,

C. P. HUNTINGTON.

A LETTER PRINTED WITHOUT SIGNATURE.

The following letter comes immediately after the one I have just read:

Personal. (Copy.)

1339 K STREET, *Washington, Nov.* 20, 1877.

Mr. HUNTINGTON:

DEAR SIR: I have noticed the movements of the Com. on the Judiciary and seen the published proceedings relating thereto. Of course my advice is gratuitous, and if it is worth nothing will cost nothing, but I am not sure as you will get anything from the committee that you can accept. Indeed, I am sure you cannot accept anything they report, but can you beat it? To that question I address myself. First, I say, not by proposing to that same committee the bill of last session.

Mr. COHEN (interposing). What are you reading from?

Commissioner ANDERSON. I am reading from a letter without signature, which is printed in connection with the letter just read from Mr. Huntington, in which he says, "The one I send is from ex-Senator ———."

Mr. COHEN. Whom do you expect to show that is?

Commissioner ANDERSON. I do not know. It is a part of the letter, sent as an inclosure with the other letter.

Mr. COHEN. I do not think anonymous letters ought to go into this record.

Commissioner ANDERSON. This is not anonymous.

Mr. COHEN. Particularly if you have not got the original.

Commissioner ANDERSON. If we have not the original it is not our fault.

Mr. COHEN. We have not got it.

Commissioner ANDERSON. It is not an anonymous letter. It is a letter printed without a signature; that is all.

Mr. COHEN. That is as near anonymous as you could make it, as you will see by the definition of the word if you will look at the dictionary.

Commissioner ANDERSON. It is referred to in the letter which we have read (and which we state is from Mr. Huntington), by the words: "The one I send is from ex-Senator ———."

OBJECTED TO.

Mr. COHEN. I will ask you, if you were defending a case in court, whether you would admit a letter of that kind to the detriment or injury of your client?

Commissioner ANDERSON. If the original were proved to be in the possession of the witness, or under his control, yes.

Mr. COHEN. But it is not under his control. I ask for a vote of the Commission as to whether that is a legitimate and proper use of the opportunity of examining this witness. I would like to have a vote of the Commission taken as to whether this is a legitimate examination; whether it is within the purposes confided by Congress and the President to this Commission, and whether the Commission is making a fair and proper use of its opportunities.

Commissioner ANDERSON. Mr. Cohen, I must ask you to state whether or not you object to the question on the ground that the witness can not be compelled to answer it under Judge Field's decision.

Mr. COHEN. I have stated my objection. I say further that I am sent here by the Central Pacific Railway Company to watch their interests, having been appointed by the president and board of directors for that

purpose, and it is my duty to object to any impertinent, irrelevant, or improper testimony finding its way into this record. I do not care whether the witness is willing to answer the question or not. Other people have rights as well as the witness. I do not think it is a legitimate mode of carrying out the purposes and duties confided to this Commission.

Commissioner LITTLER. How will the reading of that letter prejudice the Central Pacific road?

ALLUSION TO ANONYMOUS LETTERS.

Mr. COHEN. You have got in your possession anonymous letters from everybody that has ever had a dispute with this corporation about freights, or about any matters of business, and from everybody who has ever asked for a pass and been refused. If you commence putting anonymous letters into the record, where will you stop? We have had about twenty-four hours or more of this foolishness—raking up old grievances, reading letters which have been before the people of the United States now for ten or twelve years, wasting the time of the Commission, and wasting the time of the witness, which is valuable, and the time of counsel, and I claim it is not a proper subject of examination. I say further that I do not think this commission has any right to depart from well-recognized rules of evidence, or to examine this witness on anything which a judge of a court of record would not allow him to be examined upon.

LETTER IN QUESTION NOT ANONYMOUS.

Commissioner ANDERSON. I wish to say in regard to my own position about it, that the letter I am reading is not an anonymous letter. It is referred to in a letter which purports to be signed by Mr. Collis P. Huntington——

Mr. COHEN (interposing). You have not even proved it is Mr. Huntington's letter.

Commissioner ANDERSON. Please let me state my reason for reading the letter from the printed case. We have on the record the fact that the original letters from which these copies (whether correct or not) were made, have been prevented from reaching our hands by an action instituted by Mr. Huntington. We are entirely desirous of having the originals, in the usual way, in court, before us, instead of these printed papers; but as that has been made impossible by Mr. Huntington's own act, I deem it to be within the rules of law to read the copies, no matter how imperfectly verified, when the witness, by his own action, prevents the originals from being before us.

IF ANONYMOUS IT WOULD NOT BE READ.

In regard to the letter which I am reading, and which is referred to in the other letter, if it were an anonymous letter I would not read it, nor would I ever vote in this Commission or anywhere in favor of reading an anonymous letter under any circumstances. But, as far as asking the question is concerned, the act directs us to ask the question whether moneys have been used to influence legislation. That is our duty. The court may have decided that a witness need not answer if he does not choose to answer; but nobody has decided that this Commission shall not ask the question, and therefore we do ask it and intend to ask it. This

letter is from an ex-Senator, and it is cited in the principal letter in connection with the statement that many letters of this character are sent to him, and that "it seems as though all the strikers in the world are in Washington now." I therefore say that, in my judgment, it refers directly to the inquiry which Congress has instructed us to make. I will with great pleasure put the vote which you desire to have put.

Mr. COHEN. I desire to say in reply that I claim that you have not proved that the letter to which this anonymous communication is attached was written by Mr. Huntington. Further, I would say that as far as I recollect, I do not think that the original of this paper that you are asking him about is among the letters the production of which was enjoined by the circuit court of California. I do not think we have the originals.

Commissioner ANDERSON. Gentlemen of the Commission, I desire your instructions as to whether I shall proceed or not.

The CHAIRMAN. Proceed with the examination, unless there is some objection on the part of the Commission.

Mr. COHEN. I would like a vote of the Commission as to whether this is a proper mode of examination.

The CHAIRMAN. Mr. Cohen can enter his objection.

Mr. COHEN. I would like a vote of the Commission as to whether this is a proper examination.

The CHAIRMAN. The chair rules that Mr. Anderson may proceed with his examination. If there is any objection that you have to make as counsel you can enter it on the record.

Mr. COHEN. I have stated my objection.

THE READING OF THE LETTER CONTINUED.

Commissioner ANDERSON. I continue the reading of this letter, then:

First, I say, not by proposing to that same committee the bill of last session. They are set in another direction. Second, not by having no counter measure. How, then, can you hope to defeat them? I reply, first, by at once putting before the Committee on the Pacific Railroad such a bill as you can accept and by pressing a report from that committee. If you rely upon moving it as an amendment or substitute you will fail, as it then has the sanction of no committee of this Congress, and can not be pushed successfully. Second, let Mr. Mitchell, of the Pacific Railroad Committee, call his committee, thoroughly discuss and report such a bill as you can accept. Then antagonize the report of the Judiciary Committee with a report from the Pacific R. R. Committee, and our friends then can sustain the report of the one committee against the other. The Thurman bill will pass if no concerted and determined effort is made to defeat it. I live close by and see often two members of the Judiciary Committee, and they have another measure to follow their bill if they pass it. Their new measure is, put by law your roads into the hands of a receiver until and while the requirements of the law are being fulfilled, so that if you take the case growing out of this new law to the Supreme Court, in the mean time your roads and funds are controlled by a receiver. I only allude to this as a plan that I have heard spoken of. These suggestions are entirely gratuitous; but, as you know, I am

Yours, truly,

——— ———.

Now, do you remember writing a letter inclosing the letter which I have just read to you?

WITNESS DOES NOT RECALL THE LETTER.

The WITNESS. I do not. I do not remember ever having read that before. Was that letter with those others that were stolen? Was that stolen, as was claimed, with the others?

Commissioner ANDERSON. I was not one of the parties connected with that burglary. I can give you no light,

The WITNESS. I did not know but that you might have some light on the subject that I have not.

Commissioner ANDERSON. I can not give you any light.

The WITNESS. I have no recollection of ever having seen anything of the kind before.

Q. In the letter-in-chief of November 22, which I have read, the language used is, "The one I send is from ex-Senator ———." Do you remember writing a letter and inclosing a letter from an ex-Senator relating to these measures?—A. I do not.

AS TO SUGGESTIONS AND OFFERS OF ASSISTANCE.

Q. Did you frequently receive letters from persons in Congress, making suggestions and offering to assist?

Mr. COHEN. This is not from a person in Congress.

Commissioner ANDERSON. From persons in Washington offering to assist you if permitted?

The WITNESS. Of course we were trying to establish a proper sinking fund, and we were communicating with every one that we thought was disposed to, and that was able and willing to, help us.

Q. Among those correspondents was or was not ex-Senator Pomeroy?—A. I knew the Senator.

Q. Did you receive letters from him containing suggestions as to your proceedings?—A. I do not recollect.

Q. Do you now recollect receiving from him the letter which I have read to you?—A. I do not.

Q. As to the proper way of advocating your interests in regard to legislation and in relation to the Thurman bill?—A. I do not. I knew him, but I am not clear whether I asked him to help us or not.

THE SANTA MONICA ROAD.

Q. I read from a letter at pages 1810 and 1811 of the Colton record, November 24, 1877, the following:

The Departments have ruled that we have another year to build the S. P. Then, if we do not get extension of time when needed, a law to change the route would do us no good. I notice what you write of the Santa Monica road. I am satisfied with that trade, and when you write pay ——— no part of the $25,000, because there is an unsettled account of, say, $6,000. I think you forget his position. I have paid him the $25,000, as he told me he needed it very much. I hold the $70,000 S. P. that he was to have in the trade; that is, he is to have the coupons for ten years, then the bonds. ——— can do us much good, and says he will. If he does not, the fault will not be mine. I find nothing in this office to show that all the S. P. between Caliente and Mohave station has been accepted by the Government, or that we have ever made application to have it accepted. When I heard that one of the commissioners to examine the S. P. out from Yuma was to go from this side, I made objections, which I would not have done if I had known that it was the Sturges that has been so long in the Interior Department, and I hope you will explain it to him, as he is one of the best men in that Department of the Government, and can do us good in our land matters.

This is a part of the letter of November 24, 1877. Does the transaction that I have read come to your mind as one that you were familiar with at the time?—A. No. I had forgotten about it.

Q. Is this Santa Monica road the same one referred to before as the Los Angeles and Independence?—A. Yes.

Q. Do not the figures recall to you that they are the same figures alluded to in the other letter, $70,000 of bonds, and that the gentleman was to have the coupons for ten years?—A. I had forgotten about the bonds being $70,000. There was a certain amount; I should have said

$30,000, and $200,000 in cash. Of course the coupons belonged to the party that owned the bonds, and to be paid when due.

Q. It is the same transaction evidently that was referred to before?—A. I do not recollect just how that was, but this evidently was the Santa Monica road. I have no recollection of having loaned $25,000 on $70,000, or whatever amount of bonds it was, but they were good collateral. If I had the money to spare and anybody wanted that amount of money on the bonds I should have been glad to let them have it.

FLOATING BONDS.

Q. What was the object in holding those bonds for ten years, giving him the coupons meanwhile, and the bonds at the end of the ten years?—A. That is not an uncommon thing when we are first floating bonds. When I first came over here I traded the bonds with the Spuyten Duyvil works; I let them have half a million dollars of those bonds, but I had a contract with them that they should not put the bonds upon the market at less than par and accrued interest, because they would be likely to demoralize the market.

Q. Did you keep the bonds, or did you deliver them to the Spuyten Duyvil Company on a contract that they were not to put them on the market?—A. I think I delivered the bonds.

Q. Do you remember any case in which you sold bonds and held them in your custody and control for ten years, and simply paid the coupons over?—A. No; I do not remember that I did.

Q. In this case the language used is:

I hold the $70,000 S. P. that he was to have in the trade; that is, he is to have the coupons for ten years, then the bonds.

Then follow the words:

—— can do us much good, and says he will.

The blank refers, does it not, to the gentleman who sold you the Santa Monica road?—A. From his geography he would naturally support bills that would develop California. I do not believe Senator Jones ever did any favor for us because of our buying his Santa Monica road.

THE PURCHASE OF THE SANTA MONICA A LEGITIMATE BUSINESS TRANSACTION.

Q. Does not the blank left in this letter mean Senator Jones?—A. I presume it does. I do not know that I wrote the letter, but I think it is probably a part mine and a part not mine. There certainly is nothing wrong in the purchase of this road. We bought a road of Senator Jones that cost him $716,000 and we paid possibly $270,000 for it. I thought it was $250,000. It was a good purchase for us. If anybody wanted to borrow $25,000 on $70,000 of the bonds I would have let them have the money, because the collateral was perfectly good.

THE OUTLOOK NOT GOOD.

Q. I read you part of a letter, from page 1814 of the Colton case, dated December 17th:
